Mr. BLACKBURN. I ask the Senator in charge of the bill whether this item is predicated upon a report made by the Committee on Privileges and Elections?

Mr. HALE. I thought I had stated that it was.

Mr. BLACKBURN. I understood the Senator to say that the committee had followed the usual rule. That rule, as I understand it, is to predicate the amount upon a report made from the committee that tried the case.

Mr. HALE. That is the case here.

Mr. McLAURIN. I have not read the bill through, but I should like to know another thing. I should like to know whether any amount has been allowed to those who prosecuted the protest against the admission of the Senator from Utah to a seat in the Senate.

Mr. HALE. Of course there has been no claim presented to Congress, because there was no contestant. Heretofore in cases where there have arisen contests between sitting members and contestants the Senate has appropriated money for both, but in this case no claim of that kind has been put forward because there was no contestant for the seat.

Mr. McLAURIN. Do I understand the Senator to say that the Committee on Privileges and Elections have recommended the payment of this amount?

Mr. HALE. Fifteen thousand dollars. The amendment was introduced from the committee. It is on that basis.

Mr. McLAURIN. The Committee on Privileges and Elections?

Mr. HALE. The Committee on Privileges and Elections.

Mr. HANSBROUGH. I offer an amendment to come in after line 25, on page 48. I move to insert as a separate paragraph:

For maintenance of the Indian school at Bismarck, N. Dak., $15,000, or so much thereof as may be necessary.

I will state——

Mr. OVERMAN. Will the Senator from North Dakota yield to me for a moment?

Mr. HANSBROUGH. Certainly.

Mr. OVERMAN. I wish to correct one matter stated here. While I am not objecting to the item in the bill, I wish to state that there has been no meeting of the Committee on Privileges and Elections, so far as I know; that I received no notice of any meeting. There must be some mistake about a recommendation of this amount by the Committee on Privileges and Elections. They might have done it, but there has been no meeting of the committee. Other Senators bear me out in my statement. If there has been any call, we were not notified.

Mr. HALE. I am mistaken in my statement. I thought that the amendment was offered by the Committee on Privileges and Elections. I am told by the chairman that that was not the case. I was wrong about it. But there is no question about the amount.

Mr. HANSBROUGH. I was about to state that the Indian school building at Bismarck, N. Dak., is now in process of construction and will be completed early in the fall. This sum of $15,000 is for maintenance between the time of completion and the end of the fiscal year. Of course if it is not completed the money will not be used. Therefore I have added the words "or so much thereof as may be necessary."

Mr. HALE. I know nothing about this matter. Has it been estimated for by the Department, or is it a bill that has passed the Senate? If not, of course it is subject to a point of order. I do not know about that. The Senator must tell us about it.

Mr. HANSBROUGH. Of course it is a matter that would hardly come in the estimates. The situation was only recently discovered by the Department. My attention was called to it by an officer of the Department a few days ago. Certainly the matter had been overlooked by the Department itself. I hardly think it comes within the rule.

Mr. GALLINGER. Mr. President, the white people of Washington have been put to a great deal of inconvenience, and I think the Indians can suffer slightly in the same direction. I make the point of order against the amendment.

The VICE-PRESIDENT. The point of order is sustained.

Mr. SPOONER. On page 45, after line 13, I move to insert:

To enable the Secretary of the Interior to purchase from the reporter of the Supreme Court of the United States, at $3 per copy, 576 copies of a digest prepared by him of opinions contained in volumes 187 to 202, inclusive, of the reports of said court, and to distribute such digests in the same manner and to the same persons as the 576 copies of reports of said court are now distributed by him under the several acts of Congress relating thereto, and that the amount necessary to pay for said digests is hereby appropriated out of any money in the Treasury not otherwise appropriated; in all, $1,728.

Mr. HALE. This is entirely new. Has it been estimated for or has it been a bill passed by the Senate or recommended by any committee?

Mr. SPOONER. If the Senator will allow me a moment, I agree with him entirely that the amendment is subject to a point of order. That it is subject to a point of order, I think, is due entirely to an oversight of my own. It was before the Committee on the Judiciary in my charge and I overlooked it. I have no doubt the committee would have authorized a favorable report upon it.

The purpose appears upon the face of the amendment. Under existing law 576 copies of the report are distributed to judicial and quasi-judicial officers of the United States. It is very important, of course, everyone knows, that officers discharging judicial functions or quasi-judicial functions, like the land officers and district attorneys, should have the digest. This brings the decisions up from volume 182 to volume 202.

I will say to the Senator, if he will let it go in and the conference committee feel that it is not well justified, it can be stricken out. I think it is important.

Mr. HALE. On the statement of the Senator, I will not make the point of order.

The amendment was agreed to.

Mr. McLAURIN. I offer the following amendment, to come in immediately after the word "dollars," line 11, on page 64:

*Provided*, That the same amount shall be appropriated to defray the expenses of those who prosecuted the protest.

I have just been informed that the women of the country made up $7,500 to employ attorneys to prosecute the protest. They do not seem to have been able to raise as large an amount by very nearly one-third as was raised by the contestee or protestee; but, I think, if the protestee is to receive $15,000 to defray his expenses, those who opposed him ought to receive an equal amount for prosecuting the protest, which they did in good faith.

Mr. SPOONER. The Government has paid $25,000 of the expenses.

Mr. McLAURIN. I did not hear what the Senator from Wisconsin said.

Mr. HALE. I was just going to say what the Senator from Wisconsin has already said. The United States has already paid more than $25,000 to these parties.

Mr. McLAURIN. I can not hear what the Senator from Maine says.

Mr. HALE. The United States has already paid for the benefit of the parties who were making this contest, who were the contestants, more than $25,000. That has already been paid, but nothing has been paid to the Senator from Utah.

Mr. McLAURIN. I will ask the Senator if he will yield to me for a question?

Mr. HALE. Certainly.

Mr. McLAURIN. How was the money paid to these protestants?

Mr. HALE. I do not know to whom it was paid, but it was paid to cover their expenses in the way of witness fees and traveling expenses of witnesses who were summoned here.

Mr. McLAURIN. I will ask if the same thing was not done for the witnesses for Senator SMOOT?

Mr. HALE. Not unless they were summoned by the committee.

Mr. McLAURIN. My understanding is that the same thing was done for the witnesses for the protestee and that the United States paid his witnesses. That is my understanding.

The VICE-PRESIDENT. The Chair does not understand that the Senator from Maine has interposed a point of order.

Mr. HALE. I think it is better to take the vote of the Senate. I have some doubt about it.

Mr. McLAURIN. I should like to know what the point of order is, if it is to be made.

The VICE-PRESIDENT. The question is on agreeing to the amendment.

Mr. BACON. I ask that the amendment may be read.

The VICE-PRESIDENT. The amendment will be again stated.

The SECRETARY. On page 64, line 11, after the word "dollars," insert:

*Provided*, That the same amount shall be appropriated to defray the expenses of those who prosecuted the protest.

Mr. BACON. Mr. President, I think there is a good deal in what the Senator from Mississippi suggests to the Senate in this regard, though I do not think the amendment is in proper shape. I think it has been the universal custom in each House when there has been a contested election, which is analogous to this case, to pay a certain sum, but which is considered not as compensation. I suppose the Senator from Maine inadvertently used the word "compensation" when he meant "reimbursement." It is to pay a certain sum of money to reimburse each side for expenses incurred in the contest. I think it would not be proper to adopt an amendment which should stipulate that a certain sum equal to that which was paid to reimburse the Senator from Utah should be paid to those who occupied an opposing attitude to him, but I do think it would be proper to pay an amount to reimburse them within certain limits for such expenditures as they made in the prosecution of the contest.

Mr. WARREN. Will the Senator permit me to ask him a question?

Mr. BACON. Certainly.

Mr. WARREN. Of course a contest between two men who both believe they are entitled to the same seat in Congress makes some foundation upon which to rest the payment of the expenses of both; but would the Senator from Georgia undertake or consent to establish a precedent here now by paying John Doe and Richard Roe, who make claim for no one for a seat in this body, so that hereafter any persons, no matter whether it is any of their business or not, can attack any Senator on this floor and be paid for making such attacks?

Mr. BACON. I certainly would not desire to encourage any capricious attack on the right of a Senator to a seat on this floor, but nobody will contend that this was a capricious attack. It was one which very deeply interested the entire American people, and there is not pretense that it was a capricious attack on the right of a Senator to his seat on this floor. I think it was evidently done in the utmost good faith. Whereas there may have been some zealous parties who may have possibly been influenced by motives rather more extreme than we would sustain or approve, at the same time the general proposition which was made and upon which this most notable contest was founded can not be classed among those attacks which may be said to be capricious, and an undue attack upon the right of a Senator to his seat on this floor.

Mr. CARMACK. I wish to ask the Senator if those who prosecuted this protest against the Senator from Utah have made any request for reimbursement?

Mr. BACON. They have not, so far as I know.

Mr. CARMACK. Then it seems to me the Senate certainly ought not to volunteer to make reimbursement.

Mr. BACON. If the Senator had permitted me to proceed I possibly would have made a suggestion in that regard which would have relieved him of that inquiry. I had previously said that I did not think the amendment was in proper form.

Mr. McCUMBER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from North Dakota?

Mr. BACON. I would prefer if the Senator will allow me to proceed with my reply, and then I will yield.

Mr. McCUMBER. I merely wanted to ask the Senator a question.

Mr. BACON. I wish to reply first to the suggestion of the Senator from Tennessee. I can not reply to both at once. Then I will yield with pleasure to the Senator.

I was proceeding to say when interrupted that I would think it unfortunate if any action should be taken by the Senate at this time which would negative the propriety of the reimbursement within certain limitations of the parties who made expenditures in the prosecution of the question as to the right of Senator SMOOT to retain his seat.

As I understand it, the Government has paid the expenses of witnesses on both sides, which I think was eminently proper to be done. I understand further that the appropriation in this bill is to reimburse Senator SMOOT for expenditures made by him outside of the matter of procurement of witnesses, in the payment of his counsel and other expenses, and I think that is an eminently proper appropriation to be made. I think it also proper, if we knew the amount, to reimburse the parties who we must be assured made expenditures upon the same line in the prosecution. But in the absence of any information on that subject, I do not think we could properly adopt the amendment offered by the Senator from Mississippi.

So the Senator from Tennessee and myself are in accord on that matter. My sole purpose was to prevent any action by the Senate which would seem to negative the right of these parties at some future time to make known what demands they may have in reference to the matter.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Georgia yield to the Senator from Maine?

Mr. BACON. I promised to yield to the Senator from North Dakota.

Mr. HALE. If the Senator is not through, I do not wish to interfere.

Mr. BACON. I promised to yield to that Senator.

Mr. McCUMBER. I simply wish to ask the Senator a question. Is it not true that all the witnesses have been paid?

Mr. BACON. I think so.

Mr. McCUMBER. Then, the sum that is sought to be paid by this amendment is for the attorneys. Is it not also true that the attorneys have been paid?

Mr. BACON. I am sure I do not know. They were not paid by the Government, I presume.

Mr. McCUMBER. No; but if they have been paid by anyone who employed them, why should the Government pay them again?

Mr. BACON. I understand that this appropriation is to reimburse the Senator from Utah.

Mr. McCUMBER. I am not speaking about the Senator from Utah, but of the amendment. The amendment proposes to appropriate $15,000 to pay some other expenses; and inasmuch as the Government has already paid the expenses of the witnesses, most of the appropriation must necessarily be for expenses of counsel. It is my understanding that the counsel for the prosecution were taken care of and that their expenses and fees have been paid.

Mr. BACON. Now, Mr. President, that is, I presume, the question of the Senator from North Dakota. As I understand it, the Senator from Utah has paid his counsel, and this is to reimburse him for that expenditure. On the other hand, I suppose it is true really that those who prosecuted this question as to the right of the Senator from Utah to his seat have also paid their counsel. I simply contended that when a proper presentation was made they should within certain limitations be reimbursed; but, so far as this amendment is concerned, I myself could not vote for it, because we have no evidence as to what was paid or the persons by whom it was paid. I think that makes clear my position in the matter.

Mr. HALE. I move to lay the amendment on the table.

Mr. DUBOIS. Mr. President——

Mr. HALE. I am so very desirous of getting the bill through and getting it over to the House to avoid a night session that I must make the motion.

Mr. DUBOIS. I can clear up a little of this question in just a few words, if the Senator from Maine will allow me.

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Idaho?

Mr. HALE. I will yield briefly to the Senator.

Mr. DUBOIS. I knew nothing about the amendment which the Senator from Mississippi has proposed. I was not consulted about it at all and I had nothing whatever to do with it. But the facts are that the women organizations of the country and the ministerial association paid the attorneys $7,500. That amount was paid and it was paid by those organizations. That answers the question of the Senator from Tennessee.

Mr. CARMACK. Let me ask the Senator how the money was paid?

Mr. DUBOIS. It was paid directly to the attorneys through the ministerial organization and the woman's organizations of the country.

Mr. CARMACK. They collected the money, I suppose?

Mr. DUBOIS. They collected the money from their people.

Mr. CARMACK. And will give it back?

Mr. DUBOIS. If it is given back to them I have no doubt it will be used in good work, in missionary work, and works that they carry on.

Mr. HALE. Mr. President, I have already moved to lay the amendment on the table.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maine to lay the amendment on the table.

The motion was agreed to.

Mr. McLAURIN. Mr. President, I offer another amendment, and I wish to address a few remarks to the Senate on it, before anybody else gets the floor.

The VICE-PRESIDENT. The amendment proposed by the Senator from Mississippi will be stated.

The SECRETARY. At the same point in the bill it is proposed to insert the following proviso:

*Provided*, That $7,500 be appropriated to defray the expense of those who prosecuted the protest.

Mr. McLAURIN. Mr. President, in reference to the form of the amendment, I should myself prefer to put it in different phraseology if I had time, but I did not see this provision in the bill until a few minutes ago, and I have not had an opportunity while this discussion has been going on to prepare an amendment which meets in some respects my idea of the justice of this case. If I had time to prepare an elaborate amendment, I should prepare one that probably would be in better phraseology than this.

In reference to the suggestion of the Senator from Tennessee [Mr. CARMACK] that this is a mere voluntary act, I think an act of justice ought always to be voluntary, and I do not think that the Senate of the United States or the Congress of the United States ought to wait until demand is made to do an act of justice when it is apparent that it ought to be done.

Mr. CARMACK. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Tennessee?

Mr. McLAURIN. With pleasure.

Mr. CARMACK. Does the Senator from Mississippi claim that the United States ought to pay money to any person who is not even asking for it?

Mr. McLAURIN. I think if it owes the money or if it is just, that it ought to. I think the United States Government, like an individual, ought not to wait to be dunned. I think when an individual has the money and owes a just debt that the individual ought to pay it, and so, I think, with the Government. Here is a proposition to pay one of the contestants, and in that same proposition there is a proposition, which I make, to pay the other.

Mr. BACON. Will the Senator permit me to ask him a question?

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. McLAURIN. I do, if the Senator from Tennessee is through with his question.

Mr. CARMACK. I intended to ask the Senator one other question.

Mr. McLAURIN. Very well.

Mr. CARMACK. The money which has been used by the opponents or the contestants against Senator SMOOT was collected, as I understand the Senator from Idaho [Mr. DUBOIS], from people all over the country. How are we going to get this money back to the people who really paid it?

Mr. DUBOIS. No, Mr. President; the Senator misunderstood me. It was this woman's organization which expended this money in this good work, and they would expend it again in good work if the amount is refunded to them.

Mr. CARMACK. For other purposes?

Mr. DUBOIS. In good work, missionary work. The money originally came from this organization.

Mr. McLAURIN. That I think answers the question of the Senator from Tennessee.

Mr. CARMACK. No, sir; the money might be expended for other purposes.

Mr. BACON. Mr. President, I desire to ask the Senator from Mississippi a question.

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. McLAURIN. With pleasure.

Mr. BACON. I desire to ask the Senator from Mississippi this question: If this amendment should be adopted, who is the person who will be authorized to go to the Treasury and draw the money?

Mr. McLAURIN. Is that the question the Senator propounds?

Mr. BACON. Yes.

Mr. McLAURIN. The person who paid the money for the prosecution.

Mr. BACON. But it must be paid to somebody.

Mr. McLAURIN. If the Senator from Georgia or anybody else can draw an amendment that will make it more explicit, I shall take pleasure in accepting such an amendment.

Mr. BACON. If the Senator from Mississippi will pardon me, I would do so if I knew the names of the parties and the amounts paid by them; but I would not be in favor of paying them any amount larger than was expended by them. I do not know what the amount is nor the parties by whom the expenditure was made, and I do not see how any amendment could be framed which would meet the case.

Mr. TILLMAN. Somebody must receipt for it before they can get the money out of the Treasury.

Mr. McLAURIN. I believe that by law that is certain which is capable of being made certain—id certum est quod certum reddi potest. I believe that is one of the legal maxims, and I think that about covers the case. The parties who paid the amount would present their claim, and that amount could be returned to them. It does not seem to me that there is so much trouble about the ascertainment of the ones to whom this money should go, as there is about the willingness to pay the amount to them.

Here is $15,000 to be paid to one of the parties to this contest and $7,500 is asked for the other parties to the contest. Because one party——

Mr. CLAY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Georgia?

Mr. McLAURIN. With pleasure.

Mr. CLAY. I will ask the Senator has there been any contest at all?

Mr. McLAURIN. Then, I will say "protest." There has been a protest.

Mr. CLAY. If the Senator will allow me, if somebody else had been a candidate for United States Senator against Senator SMOOT and had claimed that he, instead of Senator SMOOT, had been elected, though Senator SMOOT had received the certificate of election, and such a contestant had come here and contested the seat of Senator SMOOT, then there would have been a precedent for paying both the contestant and the contestee; but simply to say that because numerous persons have protested against the Senator from Utah holding a seat in this body, the Senate should pay them for their expenses is simply inviting assault upon the titles of Senators and Representatives to their seats.

Mr. McLAURIN. If A should sue B in court, there would be two litigants, and the litigation would probably end by the success of one and the defeat of the other; but that does not disprove the proposition where a protest is filed, as in this case, and the protest has been prosecuted by the protestant and defended by the protestee, that there is a contest. There was a contest here between the protestant and the protestee, and it does not make any difference whether the parties were called protestants and protestees or whether it be called a contest; it is an effort on the part of the protestants to keep out of the Senate a man who is supposed by them not to be worthy of a seat in the Senate, and the junior Senator from Georgia, who has just taken his seat [Mr. CLAY], did not believe that this was a frivolous protest—the prosecution of the protest against the seating of the claimant to his seat—because, as I recollect, he voted for excluding the Senator from Utah from his seat and voted to uphold the protest made by these protestants.

Mr. MALLORY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Florida?

Mr. McLAURIN. With pleasure.

Mr. MALLORY. I desire to ask the Senator from Mississippi if he does not see the difference in the case of a contest for a seat in the United States Senate between a contestant and a contestee who was seated, and the case of parties who come here protesting against the seating of an individual or who come here with a protest showing why they think he ought not to be seated? Does the Senator from Mississippi see no distinction between those two cases?

Mr. McLAURIN. Of course there is a distinction; but when a Senator comes with a certificate showing that he is duly elected and the contestant comes with a contest and fails, the contestant is allowed money for his expenses in the contest. It is a distinction without a difference.

Mr. MALLORY. Why do these protestants ask for this money?

Mr. McLAURIN. I suppose it is because they want to get the money out of the Treasury. I do not know of any other reason. It seems to me the justice of the matter would be to allow these litigants to stand upon their merits just as any other contestants in election cases are allowed to stand upon their merits. Like any other contestants prosecuting a contest,

they should not be denied the amount expended in defraying the expense of the litigation. That is my idea about it.

Mr. MALLORY. I will not interrupt the Senator to go into an exposition of my views of the matter.

Mr. McLAURIN. I should be very glad if the Senator would do so, because I always like to hear the Senator speak.

Mr. MALLORY. There is a very wide distinction between the two cases. The Senate pays a contestant in case of a contest, because it is proper and right that those who think themselves duly elected to this body should not be deterred from contesting their seats just because they may not have the means to do so and have no certainty of reimbursement; but that is a very different thing from a case in which there is no contest whatever brought into the Senate, but just simply a protest filed. If we set a precedent of this kind, there is no telling how many protests may be filed against any Senator who comes here, duly elected, simply for the purpose of getting the compensation which may be awarded to the protestant.

Mr. McLAURIN. A frivolous protest would be treated as a frivolous suit or a frivolous prosecution in court would be treated. The prosecutor would be taxed with the costs.

Mr. DANIEL. Was the money that it is proposed to reimburse to these people the money of those by whom it was expended?

Mr. McLAURIN. I do not know that the Senator from Utah paid out of his own pocket his expenses. I do not know that the Mormon Church did not pay them; I do not know anything about that; but I know if it is just to pay the expenses of the protestee it is just to pay the expenses of the protestants.

Mr. DANIEL. The Senator does not know that they had any? That is the question I asked him.

Mr. McLAURIN. They have already paid——

Mr. DANIEL. Seven thousand five hundred dollars, I believe.

Mr. McLAURIN. It is said that they paid $7,500 to the lawyers.

Mr. DANIEL. Are there any other expenses?

Mr. McLAURIN. I did not ask whether there were any other expenses. This amendment does not propose to pay the lawyers. It proposes to refund to the protesting women the money they paid to the lawyers.

Mr. DANIEL. The lawyer, then, has been paid, according to his contract?

Mr. McLAURIN. Certainly.

Mr. DANIEL. And you propose to pay him a bonus?

Mr. McLAURIN. No, sir; I do not propose to pay the lawyer.

Mr. DANIEL. Who is to be paid?

Mr. McLAURIN. It is to reimburse those who have paid the lawyer to prosecute the protest.

Mr. DANIEL. Who paid for their own legal expenses?

Mr. McLAURIN. Certainly. The committee amendment proposes to reimburse the protestee for his own legal expenses, and if that is done the protestants should be reimbursed their legal expenses.

Mr. DANIEL. Was the $7,500 gathered up by small contributions?

Mr. McLAURIN. It was stated by the Senator from Idaho to be from organizations.

Mr. DANIEL. Did the organizations gather it by contribution?

Mr. McLAURIN. I am not in the confidence of the organizations. I do not know about it; but it does not make any difference to me who gathered it, where they gathered it, or how they gathered it. They used it for what they considered a good purpose, a just purpose, and a purpose that was moral. Furthermore, they were women, and because they were women they ought not to be cut out. That is my idea about it.

Mr. BURROWS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Michigan?

Mr. McLAURIN. With great pleasure.

Mr. BURROWS. Mr. President, I perhaps ought to state the facts, so far as I know them. When this investigation commenced it was asked at the outset if anyone appeared for the contestants, and Mr. Tayler, now Judge Tayler, said he appeared for the contestants, who were nineteen gentlemen from the city of Salt Lake who signed the protest. The question was asked if anyone appeared for Senator SMOOT, and Mr. Worthington, an attorney of this city, and also Mr. Van Cott, of Salt Lake City, said they appeared for him and desired to be heard.

Mr. Carlisle was also announced to appear for the protestants and did appear, and he conducted the latter part of the hearing. The hearing was a protracted one, as the Senate knows. Over one hundred witnesses were subpœnaed. Of course the witnesses were all paid by the Government their traveling expenses and the usual per diem allowance. Mr. Tayler remained in the case until he went on the Federal bench, and then Mr. Carlisle concluded the case. What was paid by the contestants for Mr. Tayler's services and for Mr. Carlisle's services I have no knowledge. I have stated the simple facts of the case, and that is all there is to it.

Mr. McLAURIN. Mr. President, there has been handed to me a list of the expenses, which is as follows: Witnesses $22,641.40; stenographer $4,124.43; marshal $181.34. Then there is a little item which I can not make out, of $14.20; aggregating $26,961.44.

The thing that occurs to me is that it is bad policy for the Government to pay expenses of either party to this protest; but, inasmuch as the expenses of the protestee are to be paid, and inasmuch as extravagant counsel fees are to be allowed—because it does seem to me that in a case of this kind $15,000 is rather extravagant for counsel and attorney's fees—if the organization of women who fought this case thought that the morals of the country required that there should be a protest entered against the admission of a man into the Senate who belonged to an organization that recognized polygamy; if they thought that the admission of one who belonged to an organization that recognized polygamy was to strike at the homes of the country; prosecuted in good faith that protest and expended this amount of money, and it can not be charged that it was a frivolous prosecution, it does seem to me that the actual amount of money that they expended, inasmuch as it is only half of that that is appropriated for the protestee, ought to be appropriated in their behalf. That is my idea about it, and I submit it to the Senate.

As I have said before, I can not believe it is good legislation or that it is good policy for the Government to pay either party to this contest. So far as the principle is concerned, while there is an apparent distinction between a contestant contesting for a seat and a contestee contesting for the retention of his seat, that distinction is merely in words, because the principle is exactly the same.

In one case the contestant says, "I am entitled to this seat and the other man is not entitled to it, and he ought not to be permitted to legislate for the country, because he has not been elected to represent the State whose credentials he brings purporting to authorize him to represent it," whereas in the other case the protestants say, not that they want a seat, but that good government requires that the man who occupies the seat ought not to be entitled to the seat until an adjudication can be had of the question of his election, of the returns of his election, and of his qualifications. If they say that because of a deficiency in either one of these he is not entitled to his seat, they have a right to present their protest, whether it is to the election, to the returns, or qualifications, and they have a right to bring it before the Senate of the United States and ask the Senate to pass upon the qualifications. Whether it is decided by the Senate that the only qualifications are those negatively named in the Constitution or whether all matters tending to justify his expulsion may be considered, is a matter immaterial to this question.

Mr. HALE. Mr. President, the House of Representatives is waiting to receive this bill, and therefore I am constrained to move to lay the amendment of the Senator from Mississippi on the table.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Maine.

The motion was agreed to.

Mr. HANSBROUGH. I offer the amendment which I send to the desk to come in on page 63, after line 3.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 63, after line 3, it is proposed to insert:

For increase in salary of the Secretary of the Senate, from March 4 to June 30, $833.33, and for the fiscal year of 1908, $2,500.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from North Dakota. [Putting the question.] The "noes" appear to prevail.

Mr. HANSBROUGH. I should like to have the question again put.

Mr. HALE. I would rather the amendment would go in, and I will make no point on it.

The VICE-PRESIDENT. The Chair will again put the question. The question is on the amendment proposed by the Senator from North Dakota [Mr. HANSBROUGH].

The amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes; further insists upon its disagreement to amendments Nos. 4, 10, 11, 12, 68, 69, 80, 82, 83, 87, 96, 97, 98, 99, 117, and 126 to the bill; recedes from its disagreement to the amendments of the Senate Nos. 78 and 79; agrees to a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR of Alabama managers at the conference on the part of the House.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 10305) to provide for the repayment of certain customs dues.

ENROLLED BILL SIGNED.

The message further announced that the Speaker of the House had signed the enrolled bill (H. R. 25483) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes, and it was thereupon signed by the Vice-President.

THE MERCHANT MARINE.

Mr. GALLINGER. Mr. President, it will be recalled that there was an agreement that the shipping bill should go over until 5 o'clock, it being understood that it would not interfere with appropriation bills. I now rise to make a request for unanimous consent that the further consideration of that matter shall be postponed until 11 o'clock to-morrow morning.

Mr. BLACKBURN. That is agreeable, Mr. President.

Mr. GALLINGER. I understood it would be agreeable to the opponents of the bill.

The VICE-PRESIDENT. Is there objection to the request of the Senator from New Hampshire? The Chair hears none; and it is so ordered.

HOMESTEAD SETTLERS IN ALABAMA.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 6704) to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905, which was, on page 4, line 2, after the word "aforesaid," to insert:

*Provided*, That such homesteader or vendee or successor in interest of either of said railroad companies shall not be permitted to select more than 160 acres of lands in one section nor more than 320 acres of contiguous lands.

Mr. PETTUS. I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

STANDING AND SELECT COMMITTEES OF THE SENATE.

Mr. ALLISON submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That the standing and select committees of the Senate as constituted at the end of this session be, and they are hereby, continued until the next regular session of Congress, or until their successors are elected.

PAYMENT OF CLAIMS.

Mr. PETTUS. I desire to make a few remarks to the Senate, and I promise that I will try my best to deserve the praise that was given to Red Jacket, who was famed as a speaker; and the secret of his mastery was that his speeches were short, so Halleck says.

I desire to ask unanimous consent for the present consideration of the bill (S. 5951) to repeal section 3480 of the Revised Statutes of the United States.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. PETTUS. Mr. President, I desire to thank the Senators, and especially the President of the Senate, for the indulgence and kindness which they have extended to me ever since I have been here. The Senate may possibly be afflicted with my presence for the next eight years. I have been treated here with as much kindness and consideration as I have at my home, and the Lord knows that has been abundant.

Now, as to this question, here is a statute which has been virtually abrogated ever since the President made his proclamation of amnesty. Some Senators, impressed with the idea that that was not so, have objected to this bill, but they have had the magnanimity and kindness to yield their notions on that subject when they had the advice of lawyers in whom they had confidence, and I thank them for so yielding.

Mr. President, this act was enacted years ago, just after the war. It was one of the penal statutes, but I propose to prove now in a very short way that it has been abrogated by the President of the United States in his general amnesty. Here I have the authorities, which I will not trouble the Senate to read, except the headnote:

The President's proclamation of the 25th December, 1868, granting "unconditionally and without reservation to all and every person who directly or indirectly participated in the late insurrection or rebellion a full pardon and amnesty for the offense of treason against the United States, etc., with restoration of all rights, privileges, and immunities under the Constitution, and the laws which have been made in pursuance thereof," granted pardon unconditionally and without reserve; and enables persons otherwise entitled to recover from the United States the proceeds of captured and abandoned property, under the abandoned and captured property act, to recover it though no proof be made, as was required by that act, that the claimant never gave any aid or comfort to the rebellion. (Armstrong *v.* U. S., 13 Wallace.)

There is another case following this to exactly the same effect. These two decisions of the Supreme Court decide without any qualification that the act which I seek to have repealed has been abrogated. There were some gentlemen who doubted this matter, but they consulted counsel in whom they had confidence.

This bill has been approved by every member of the Judiciary Committee except one, and that is the distinguished Senator from Pennsylvania [Mr. KNOX]. He was not present. But he has thoroughly examined the question and has convinced those who were opposed to the bill on the legal grounds that there was no foundation for it. This statute has been virtually destroyed by these decisions, as the Committee on the Judiciary has unanimously agreed.

Mr. President, the statute being of no force or effect, you might ask me, "Why do you want it repealed if it is of no force or effect?" It has been published as the law of the land ever since, and there are various men affecting to know all about the law who now act upon it.

During Mr. Cleveland's Administration the Comptroller of the Treasury refused to pay a small warrant issued by the Secretary of the Interior because it was to a southern man and there was no proof of his loyalty; and that stood, although the Secretary of the Interior tried his best to get it allowed.

Mr. President, this thing of pardon is not usually very well considered by anybody except the lawyers. If I had lived north of Mason and Dixon's line in 1861 I would quote the Bible for you. I would say:

Let the wicked forsake his way and the unrighteous man his thoughts; and let him return unto the Lord, and He will have mercy upon him; and to our God, for He will abundantly pardon. (Isaiah lv, 7.)

I myself do not say that, but I say if I lived north of Mason and Dixon's line I would put in that plea.

Mr. President, all I have to say in conclusion is that this statute has been virtually repealed by the amnesty proclamation of the President. All lawyers who thoroughly examine the case agree that it was virtually repealed by that act. I would not ask to have it repealed, but it is acted on by many people who think they know more law than Chief Justice Marshall, although they never looked into a law book.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ADDITIONAL DISTRICT JUDGE IN CALIFORNIA.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 25692) to provide for an additional district judge for the northern and southern districts of California; which was read the first time by its title and the second time at length.

Mr. SPOONER. I ask unanimous consent for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. SPOONER. I move to amend the bill by striking out all after the enacting clause and inserting in lieu thereof what has passed the Senate, on the recommendation of the Judiciary Committee, at an earlier stage of the session.

The VICE-PRESIDENT. The Senator from Wisconsin proposes an amendment, which will be stated.

The SECRETARY. It is proposed to strike out all after the enacting clause and insert:

That there shall be in the northern district of California an additional district judge, who shall be appointed by the President, by and with the advice and consent of the Senate, and shall possess the same qualifications and have the same powers and jurisdiction and receive the same compensation provided by law in respect to other district judges.

SEC. 2. That the senior circuit judge of the ninth circuit or any circuit judge within the State of California shall make all necessary orders for the division of business and the assignment of cases for trial in said district.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "A bill to provide for an additional district judge for the northern district of California."

ORDER OF PROCEDURE.

Mr. HALE. I ask that at the conclusion of the eulogies which are set for to-day, the Senate take a recess until 11 o'clock to-morrow morning.

Mr. DANIEL. Just a suggestion, Mr. President——

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at the conclusion of the eulogies this evening the Senate take a recess until 11 o'clock to-morrow morning. Is there objection to the request?

Mr. DANIEL. I rose to make an observation—to see, if it consisted with the views of the Senators who have in charge the regulation of business; I should like to have the Senate proceed with the eulogies at 8 o'clock to-night, if it be agreeable, and I hope it may be. We have deferred them that they might not interfere with other business.

Mr. CARTER. I suggest that a recess be now taken until 8 o'clock.

Mr. HALE. Then let me see if I can modify my request. Of course we have to take a recess. We can not adjourn. This session must be carried on until Monday forenoon.

Mr. CULLOM. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from Illinois?

Mr. HALE. I am trying to do my best. The trouble is that if the eulogies come on at 8 o'clock nobody will be here——

Mr. DANIEL. This evening at 8 o'clock?

Mr. HALE. Yes; but I say nobody will be here if we take a recess from now until 8 o'clock—two hours—and nothing is to be done but the eulogies. Therefore I have to get the agreement now.

Mr. ALDRICH. What is the suggestion of the Senator from Maine?

Mr. HALE. I do not know how the Senator himself may be, but the Senator from Wisconsin and others have stated that they will go right on——

Mr. DANIEL. Some gentlemen are not ready, though.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from California?

Mr. FLINT. Before any action is taken——

Mr. HALE. I will make this proposition, that the Senate now take a recess——

Mr. ALDRICH. I suggest 6.30, so as to have an executive session.

Mr. HALE. What else does some one else want?

Mr. WARREN. The Senator asks what some one else wants. There are a few small matters, a conference report or two, and one or two small matters to which there can be no objection. It seems to me they ought to be cleaned up between now and 8 o'clock. So I think we ought not to take a recess until 8 o'clock.

Mr. FLINT. Before any action is taken——

Mr. HALE. If we are going into general business——

Mr. LODGE. Which will keep us all here.

Mr. CULLOM. I want to make a statement.

Mr. HALE. I am no more interested in this than is anybody else. We have got to do——

Mr. CULLOM. I was about to move an executive session.

Mr. KEAN and others. Oh, no.

Mr. HALE. Let us have an agreement. I will make this proposition. I ask unanimous consent that the Senate take a recess until 8 o'clock——

Mr. DANIEL. When?

Mr. HALE. Now—that the Senate take a recess until 8 o'clock, and then at the close of the evening session the Senate shall take a recess until 11 o'clock to-morrow morning.

Mr. ALDRICH. I ask for a modification of the request—that at 6.30 o'clock the Senate take a recess. That will enable the Senate to have an executive session, which I am told on all hands is very desirable.

Mr. CULLOM. It will last only a few minutes.

Mr. ALDRICH. Let us take a recess until 8 o'clock, with the understanding that at the session this evening there shall be nothing but eulogies, and on the conclusion of the eulogies a recess shall be taken until 11 o'clock to-morrow morning.

Mr. HALE. Then, I will modify my proposition——

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Maine yield to the Senator from California?

Mr. HALE. Yes.

Mr. FLINT. I should like to ask what in the meantime becomes of the unfinished business, the conference report on Senate bill 5133?

Mr. HALE. It goes over until to-morrow.

Mr. FLINT. Then, I should like to have unanimous consent that it shall be taken up immediately——

Mr. HALE. It will be up.

Mr. LODGE. It is privileged, anyway.

Mr. HALE. I will see if I can get this agreement—that at the conclusion of the executive session the Senate take a recess until 8 o'clock this evening, and that at the close of the night session it take a recess until 11 o'clock to-morrow morning.

Mr. ALDRICH. And that at the evening session there be nothing but eulogies.

Mr. HALE. Of course, the evening session to be devoted to eulogies.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at the close of the executive session the Senate take a recess until 8 o'clock this evening, then to reassemble and listen to eulogies, and that at the close of the eulogies the Senate take a recess until 11 o'clock to-morrow morning.

Mr. HALE. That is it.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

Mr. TILLMAN. No other business to be transacted this evening but the eulogies.

Mr. OVERMAN. I rise to inquire, as it understood that no business is to be conducted after the eulogies to-night?

The VICE-PRESIDENT. That is the purport of the unanimous-consent agreement.

Mr. HALE. Yes.

DEATH OF H. BOWYER M'DONALD.

The VICE-PRESIDENT laid before the Senate the following communication; which was read:

UNITED STATES SENATE,
OFFICE OF THE SECRETARY,
*March 2, 1907.*

*To the President of the Senate:*

It becomes my painful duty to advise you of the death of H. BOWYER MCDONALD, Chief Clerk of the Senate, and for upward of thirty-four years an employee of this body.

Respectfully,

CHARLES G. BENNETT, *Secretary.*

EXECUTIVE SESSION.

Mr. CULLOM. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 6 o'clock and 15 minutes p. m.) the Senate took a recess until 8 o'clock p. m.

## EVENING SESSION.

The Senate reassembled at the expiration of the recess.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24815) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908, recedes from its disagreement to the amendments to the bill numbered 86 and 88, further insists on its disagreement to the residue of the amendments, agrees to a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. WADSWORTH, Mr. SCOTT, and Mr. LAMB managers at the conference on the part of the House.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the Vice-President:

S. 4964. An act for the relief of Thomas F. Walters;

S. 5660. An act for the relief of William N. Hughes;

S. 5869. An act for the relief of Larvan Gordon;

S. 6134. An act providing for the conveyance to the State of North Dakota of certain tracts of land for the use and benefit of the North Dakota State Historical Society;

S. 6729. An act authorizing the President to appoint Webb C. Maglathlin a second assistant engineer in the Revenue-Cutter Service;

S. 7550. An act for the relief of Harry A. Young;
S. 7840. An act granting an increase of pension to Lewis A. Towne;
S. 8303. An act to establish the Foundation for the Promotion of Industrial Peace;
S. 8427. An act to annul certain titles to land acquired by judicial proceedings in courts of the United States in Texas, and for other purposes;
S. 8540. An act to ratify a certain lease with the Seneca Nation of Indians;
S. 8580. An act granting land to Anna Johnson;
H. R. 3268. An act for the relief of Henry C. Bassett, heir of Henry Opeman Bassett, deceased;
H. R. 8699. An act for the relief of James A. Carroll;
H. R. 10095. An act making certain changes in the postal laws;
H. R. 10305. An act to provide for the repayment of certain customs dues;
H. R. 11401. An act granting an increase of pension to William Kling;
H. R. 13418. An act for the relief of W. S. Hammaker;
H. R. 15859. An act ceding lands to Colorado State Agricultural College;
H. R. 19500. An act for the relief of Indian traders Marion Wescott, F. F. Green, and J. A. Leige, assignee of Joseph F. Gauthier, a Menominee Indian trader, with the Menominee Indians of Wisconsin;
H. R. 19751. An act to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss.;
H. R. 21091. An act authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Homason's Company B, First Oregon Mounted Volunteers, the name of Hezekiah Davis;
H. R. 22588. An act for the relief of homestead entrymen who have paid more than the lawful purchase money;
H. R. 24816. An act to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906;
H. R. 24833. An act for the relief of the Louisiana Molasses Company (Limited) and the Louisiana Distilling Company;
H. R. 25437. An act to grant American registry to the German bark *Mariechen;*
H. R. 25474. An act to amend sections 5 and 6 of an act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same;"
H. R. 25739. An act to authorize the Cairo and Tennessee River Railroad Company to construct bridges across Cumberland River;
H. R. 25801. An act granting an honorable discharge to Seth Davis;
H. R. 25811. An act to authorize the Monroe, Farmerville and Northwestern Railway Company to construct a bridge over the Ouachita River and one over the D'Arbonne River in Louisiana;
H. R. 25832. An act to authorize Herman L. Hartenstein to construct a dam across the St. Joseph River, near the village of Mottville, St. Joseph County, Mich.;
H. R. 25849. An act permitting the building of a dam across the Savannah River at Cherokee Shoals;
S. R. 92. Joint resolution to authorize the Secretary of War to permit José March Duplat to receive instruction at the Military Academy at West Point; and
H. J. Res. 236. Joint resolution authorizing the Secretary of the Navy to furnish metal for a bell.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE RIXEY.

The VICE-PRESIDENT. The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The Secretary read the resolutions of the House, as follows:

IN THE HOUSE OF REPRESENTATIVES,
*February 25, 1907.*

*Resolved*, That as a mark of respect to the Hon. JOHN F. RIXEY, late a Member of this House from the State of Virginia; and in pursuance of the order heretofore made, the business of the House be now suspended to enable his associates to pay fitting tribute to his high character and distinguished services.

*Resolved*, That the Clerk communicate these resolutions to the Senate.

*Resolved*, That the Clerk be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased.

Mr. DANIEL. Mr. President, I beg leave to offer the resolutions which I send to the desk.

The resolutions were read and unanimously agreed to, as follows:

*Resolved*, That the Senate has heard with profound sorrow of the death of Hon. JOHN F. RIXEY, late a Representative from the State of Virginia.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

Mr. DANIEL. When two days hence the Fifty-ninth Congress shall cease and the term of the Sixtieth Congress shall begin, there will be names accredited to the new roll which will have none to answer thereto. Death has been busy in this Congress. Four Senators and five Representatives have ceased to be. This day three weeks ago JOHN FRANKLIN RIXEY, of Culpeper, Va., Representative of the Eighth district, was numbered amongst them. He was the able and effective Representative of that district for ten years. He had been chosen, although absent from the State by reason of his sickness, to succeed himself. No need for his presence. The people knew him and were for him. The voice of the Ruler of the Universe has overruled the voice of the people and has disposed the purposes of man.

Mr. RIXEY was born in Culpeper, near the county seat which bears the county name, on the 1st day of August, 1854. He died in this city on the 9th day of February of the present year, at the home of his brother, Surgeon-General Rixey, of the Navy. His body, attended by the committee of the two Houses of Congress which had been appointed to pay to him the last honors, and followed by many mourning friends, was borne to his home and consigned to his native dust.

There is a brief sketch of him in the Congressional Directory, which recites as follows: That he was educated in the common schools, at Bethel Academy, and the University of Virginia; is a lawyer and farmer; was Commonwealth's attorney for Culpeper County twelve years; was elected to the Fifty-fifth, Fifty-sixth, Fifty-seventh, and Fifty-eighth Congresses, and reelected to the Fifty-ninth Congress, receiving 7,986 votes to 2,443 for his opponent. To this account should be added that he was reelected to succeed himself at the Congressional election of November, 1906.

For five terms he had faithfully served his people with diligence and with successful attention to every duty committed to his hands.

It is probable that there is no district in the United States, unless it be the Congressional district of Maryland which adjoins the District of Columbia, which has so many affairs to be attended to in Washington as has this Eighth district of Virginia. Many of its people have located here. Many who are engaged in Washington on official or other business have located there. Many of them find employment here by reason of their proximity and convenient access. The Representative of the district has therefore entailed upon him multifarious duties such as are but lightly shared by Representatives from distant places.

With patience, with alacrity, with faithful and affectionate regard for his people, as well as with a loyal and devout sense of obligation to his country, Mr. RIXEY bestowed a constant and unrelaxing devotion to his tasks.

The feelings of a past generation have died out save in honor of the past. There is nothing of public sentiment in Virginia that is not in unison with the United States. Congressman RIXEY, though in boyhood he knew war in its sternest and bitterest ways, represented to-day and to-morrow as much as ever his brother, who heads the Medical Corps of our Naval Department.

As a member of the Naval Committee of the House he distinguished himself by his knowledge of naval affairs, and he was always to be found at the post of duty. His interest in and attention to agriculture led to the measure that established the experimental agricultural station in Alexandria County, just across the Potomac River.

Of a fine mind, well trained in the schools, and with an earnest and energetic nature which was tireless and ceaseless in pursuing the ends it aimed at, few men have been so concentrative in their endeavors or so successful in their attainment.

His boyhood was spent at the very focus of the active scenes of war. From his father's house, where were the headquarters of the Federal Army in the town of Culpeper, General Grant, on the 3d of May, 1864, rode forth to the battle of the Wilderness. During the four years while the storm of conflict raged over northern Virginia scenes of swift recurring battles were familiar to his eyes and the diapason of the cannonade familiar to his ears. When war ended, the territory which he represented and that adjoining had come to be known as "the Flanders of the War."

When the surviving Confederate soldiers returned to their

homes. Maj. Albert G. Smith, who had been wounded in Pickett's charge at Gettysburg, and who I have heard described by his comrades as standing on the heights with the hilt of a sword in his hand, which had been broken by some hurtling missile of the battle, established the Bethel Academy near the town of Warrenton, in Fauquier. As Lee went to the head of Washington College, which became Washington and Lee University, so Major Smith now devoted himself to training the boys of the countryside in the ways of peace. Not forgetting that peace must always be prepared for war, and instinctively knowing that "to ride, to shoot, and to tell the truth" was the maxim of his people for the instruction of youth not less than the ancient Persian, he made it a military as well as a classical and mathematical academy. At one time one of his tutors was Major Jenkins, of South Carolina, afterwards distinguished at Santiago, and many of his boys went forth with the Army of the United States to the Spanish war.

In the Berkley School and in this academy young RIXEY received his early education, and then repaired to the University of Virginia and to the study of law.

He was ere long elected Commonwealth's attorney for Culpeper County, and then commenced the Congressional career which has been so unhappily closed by his death.

For scenic and for dramatic things and for those which attract conspicuous notice, Mr. RIXEY displayed but little taste. His was a businesslike and practical mind, that looked to the accomplishment of results rather than to ostentation or parade on the road to them.

He was a lover of the country, and lived at a beautiful home near Brandy Station, which overlooks the field of the great cavalry battle of June 9, 1863, between Stuart and Pleasanton. A third of the war was fought in Virginia. The Eighth and the adjoining districts, with that around Richmond and Petersburg were its centers. Within view of the summit on which stands his home are many other battlefields and scenes identified with the great strife which on each side made ambition virtue.

As success came to him he increased his holdings of land. A farm was to him the spot of most attractiveness. On the scarred Manassas field, scene of great wrestlings, as well as in his native county of Culpeper, he rejoiced to see the grass grow and his flocks and herds feed amidst scenes of pastoral beauty.

His was a wholesome as well as an active and busy life. The domesticity of his nature manifested itself in his pursuits and apirations whenever public cares relaxed.

He was an able lawyer; well read in the books, and well practiced in his profession. He established high rank at a bar where he was brought into competition and conflict with many of the brightest and ablest minds of the State.

When he entered politics he soon became a leader of the people. The successive times that he was chosen to represent them here attest their fidelity to him even as his own career attests his fidelity to them.

If deep conviction, thorough devotion, and the enthusiasm of service make the partisan, such, then, must Mr. RIXEY be counted. But he was not a man offensive either in words or ways to those opposed to him. Standing for the independence and honesty of opinion, for free action and free speech, he respected those whose opinions were different from his own. He observed the wisdom that comes from the heart. He obeyed the wise counsel so well given by Allen G. Thurman, "the old Roman," when he said: "Keep a civil tongue in your mouth."

Such is the characteristic of all well-mannered, self-respecting, and well-poised men, who remember that by the very truths on which their own rights are founded rest also side by side with them the equal rights of others. "So use thine own as not to hurt another" is a maxim of our common law, borrowed from the broad-minded and deep-hearted jurisprudence of ancient Rome, that lays its inflexible injunction on the tongue as well as on the hand of man, and keeps him within the bounds of his own domain in the moralities, decencies, and civilities of life as well as in his dealings with respect to material things.

Partisan he may have been—most of us are—but he never trenched by word upon the character, as he did not by deed, upon the belongings of another.

The Eighth district of Virginia is one of the most historic regions of the United States. If its history were written it would involve the writing of the history of the whole country from its colonial days to the present time.

When one considers even the names of the counties which Mr. RIXEY represented he sees in them the names drawn from memory of the motherland rather than from the new inspirations of the Republic.

Culpeper County, of which he was a native and a resident, was formed in 1748 and named after Lord Culpeper, one of the colonial governors of Virginia.

Fairfax County dates its origin to 1742 and bears the name of Lord Fairfax, who held an immense grant from the English Crown. Fauquier County, separated from Prince William in 1759, was called after Charles Fauquier, colonial governor from 1758 to 1767. King George County, formed in 1720 from Richmond County, takes its name from the English King. Loudoun County, formed in 1757 from Fairfax, gets its name from the Earl of Loudoun, who commanded the British forces during the latter part of the French war. Prince William County, named after an English prince, was created from Stafford and King George. Stafford, formerly a part of Westmoreland, was formed in 1675. Louisa, created in 1742 from Hanover, and Alexandria, the newcomer—all alike bear the ancient names. I have not examined to see, but, unless in New England, I doubt if there is another Congressional district in the United States where so many counties bear the old colonial names which they bore when independence was declared. Alexandria County has the fine flavor of the ancient days, which it acquired from the venerable city which was the home of both Washington and Lee.

The traits of the fatherland are in them. But they are Americans all; founders and lovers of freedom as the greatest of human possessions; patriotic to the core; upholders of home rule, but filled with the splendid aspiration of the reunited nation.

They are lovers of the land, and on isolated plantations they have planted pleasant homes. They have taken part not only in the Indian wars that antedated the Revolution, but in every war with which this country has been identified. I noted not long since, in traversing some of the reminiscences of Culpeper, that George Washington was surveyor of that county when he was a youth of 17, in the service of Lord Fairfax, making his own living and going out into the adventures of life before he had yet become a man. In the records of that county there is this entry:

> 20th July, 1749, George Washington, Gent., produced a commission from the president and members of William and Mary College, appointing him to be surveyor of this county, which was read, and thereupon he took the usual oaths to His Majesty's person and Government and took and subscribed the abjuration oath and test, and then took the oath of surveyor, according to law.

Four of our great Presidents are identified with its history. Washington's tomb is in Fairfax. Madison lived and rests in Orange. Monroe for a time had his seat at Oak Hill, in Loudoun. Zachary Taylor was born in Orange.

When the Revolution broke out the Culpeper minutemen made a name for themselves, not only in the swift patriotism with which they responded to the call of Governor Patrick Henry, but by their conduct upon the field of battle. The Culpeper minutemen turned out for war the last time in the Spanish war. From the day of the Revolution to this hour they have always been ready to respond at a moment's warning to their country's call. They float on their flag the picture of a rattlesnake, with the legend, "Don't tread on me!" Those Culpeper minutemen and the men of the adjoining counties were soon formed into a regiment. Lawrence Taliaferro, a kinsman of the distinguished Senator now representing Florida in this body, was its colonel.

Stevens was its lieutenant-colonel, afterwards a general. Thomas Marshall, father of the great Chief Justice, was its major, and serving as a lieutenant was the incipient Chief Justice himself.

There is a story told of this regiment at the battle of the Great Bridge which I like to refer to, because it is characteristic of the great people who inhabit the region of Virginia along the Potomac, and which those going westwardly in the State and beyond it have carried with them. This regiment encountered in the battle of the Great Bridge a regiment of the British regulars. They were behind earthworks, and when the British regulars charged them they were beaten back. Swift to heal, as quick and steady to fight, the Virginians leaped over the breastworks and helped to bind the wounds which they had made.

The people of this whole section are high spirited, chivalrous, brave, quick to resent insult, firm and strong in resistance to wrong, but at the same time one of the sweetest-tempered and most hospitable people that one could meet upon a summer's day. They are lovers of the land. They rejoice in the scenes of the countryside, in the fields, in the streams, in the woods. In their libraries are good books that abound not in sensations. They are good hunters and fine marksmen and they are hospitable

hosts. The refinements of life abide amongst them and they are as gentle in peace as they are fierce and dauntless in war.

Mr. RIXEY was a representative man of this countryside. His father was a landholder. He himself had that land thirst which made him buy and cultivate the land whenever he was able to do so. He bespoke a people who loved home, who imbibe principles of love of country from the fireside. They respect character above all things; never call without reverence the name of woman.

The Representatives of this district have always been men of mark. The district looks upon its Representative as a man who must be one fit to hold a great and responsible office and worthy to discharge its trust and duty. Since the reconstruction period but six men have represented it: Elliot Braxton, descended from a signer of the Declaration of Independence; Eppa Hunton, renowned first in his service in the legislature of his State and in the State convention and then as a soldier, who led the ironsides of battle; John S. Barbour, accomplished in many ways—in the studies of the academy; as president of a great railroad; as chairman of a great party; equal in mental grasp and in social dignity to any of the higher tasks of life. Then William H. F. Lee, a brave soldier and a noble gentleman, a man whose beautiful attachment to his every duty was like the esprit de corps which converts the soldier to the cause which commands his allegiance; then Elisha Meredith, a younger man of a new generation, but one of a most noble and manly type; manly and vigorous mold, generous, active, a true friend, a hardy champion, a man of hope who died too young, and then succeeding him came JOHN F. RIXEY, whom we mourn to-day.

Three of these Representatives have died while they served in the House of Representatives, Lee and Meredith, and now, also, RIXEY. Two of them became Senators of the United States, John S. Barbour and Eppa Hunton, and the former was borne from this Chamber to his last home. The latter survives, venerated of all. Who will be Mr. RIXEY's successor no man knows, but we all know that these six gentlemen who have represented their State in the halls of Congress have represented it and their country well and that their successor has worthy exemplars before him.

Mr. RIXEY's home life was a happy one. He wedded Miss Barbour, daughter of James Barbour, who was a lawyer, legislator, and publicist, who was distinguished by the abilities which have characterized the family to which he belonged. For many years they dwelt together in the holy estate and in the quiet hospitable home. We pause at its threshold. But to its inmates go forth our deepest sympathy for the loss irreparable. We can neither retrieve nor heal it; we can only bow before Him whose mercy endureth forever.

In the fifty-fourth year of his age, while his ripened faculties, cultivated by experience as well as by education, were at maturity, and when they might have been of most benefit to his country, to his family, and to his kind, he has been cut down. There were premonitions of his end. A year ago, when Congress adjourned, it was known that he was ailing. It seemed that that dreadful disease, tuberculosis, had menaced if not yet fully attacked him. He went to the wholesome climate of Colorado seeking relief. But he sought it there in vain. He returned to his home. During his absence he had been chosen as his own successor. But it was not to be. He was for several months an invalid, and it became evident that the hand of the destroyer could not be stayed. Patient, submissive, meeting the fate in store for him with the fortitude with which he had contemplated all the tasks and dangers and tribulations of life, peacefully, at his brother's home in this city, on the 9th day of last month he breathed his last.

It is a characteristic of our race, Mr. President, and one worthy to be cultivated and preserved, that they do not make loud lamentations over the dead and do not seek ostentatious funerals. When their time has come, they step aside for the generation that presses upon their heels. They would not add one memory of grief and sorrow to those left behind. It can be said of JOHN F. RIXEY that he performed a man's part in life, and did it well and faithfully. It is enough.

His kindred, his companions, and his people honored him. Those dear to him loved him. Such was his reward. He proved equal to all the tasks which he assumed. He has passed hence, leaving a name to be cherished by those who loved him and to be honored and respected by those who knew him.

Mr. HOPKINS. Mr. President, death is ever an unwelcome guest. He is no respecter of person, no respecter of time or place. The laughing schoolboy feels the clutch of his icy fingers and passes from the pleasures and pastimes of childhood into the great unknown. The gray-haired man, who has conquered every obstacle that appeared in his pathway during a long and strenuous life, though surrounded by every comfort and luxury that wealth can bring, responds to the call that death sends to him, and leaves all and follows death out into the shadows and across the dark waters that separate this life from a future existence.

However long may be the struggle, however fierce the contest, all alike must sooner or later yield to that grim-visaged monster.

JOHN F. RIXEY has trodden the path prepared for him by death long before his exit from this world, and has passed into the great unknown. Many years before death finally claimed him for his own he recognized that he was stricken with a mortal disease and, like the Christian philosopher that he was, prepared to meet his final conqueror with that perfect resignation that comes from a realization of a well-spent life here and an assurance that the transition from this life to another will take him to that better world where all Christians are taught the just will meet.

Death achieved no mastery over him. He fought the battle as becomes a true Christian, and when the inevitable hour approached welcomed death more in the spirit of a victor than that of the vanquished. Dearly as he loved this life, his family and friends, his native State and his country, he believed that he was passing into that higher and holier existence that we are all taught is the fortune of those who follow the simple precepts of a Christian life.

I first met Mr. RIXEY in the House of Representatives in the Fifty-fifth Congress. He had just been elected to the House from the Eighth Virginia district, and I had been reelected from the then Eighth district of Illinois. I had had a service of some years in the House of Representatives and was well acquainted with many of the older Members of Congress from that State. That great Commonwealth and her public men have always had a great interest for me. The Northwest Territory, from which the State of Illinois was carved, was once a possession of Virginia, and all loyal citizens of Illinois take a natural pride in that State and her public men. Mr. RIXEY was a typical Virginian. He had inherited that love of country life that is characteristic of the great men of that State from the time of Washington and Jefferson to that of Lee and Wise. The men of mark in that State have been men who were passionately fond of country life.

Mr. RIXEY did not possess the brilliant qualities of mind that made Patrick Henry the first orator of his time and Robert E. Lee one of the greatest military geniuses of his age. His attainments were of the solid, substantial kind, that were so marked in the type of men like James Madison in the earlier history of the State, and more recently in men like the late Senator Barbour.

In his brief biographical sketch that he prepared for the Congressional Directory, he described himself as a lawyer and a farmer. To men residing in great cities like Chicago, New York, or Philadelphia this combination of farmer and lawyer seems inconsistent, but it accurately described the life that was led by Mr. RIXEY. He was a country-bred lawyer, and when he was not engaged in court or over his law books in the preparation of a case for trial, was out upon his plantation enjoying to the fullest limit the pleasures of rural life. It is said that he was very successful at the bar. From my knowledge of him as a Member of Congress, I can well appreciate the fact of his great success with courts and juries. He had an air of honesty that disarmed opposition, and possessed a clearness of speech and a cogency of reasoning that must have made him very effective with the jury of twelve or with the judge.

His experience upon his farms in coming in close touch with nature gave him keener perceptions and a nicer judgment on all questions of right and justice than can be acquired in a smoky law office in a great city. There is something about life in the country that broadens and enlightens the mind. Men who follow intellectual pursuits are greatly strengthened and broadened by this contact with nature that one derives from country life. John Marshall would never have given to the country and to the world those marvelous opinions construing the Constitution of our common country had he been deprived of the benefits and influences exerted upon him in that ideal country life that he enjoyed during the thirty-odd years that he was Chief Justice of the Supreme Court of the United States.

The late Judge Drummond, of Chicago, is a man whose name is revered and loved by all lawyers who had the good fortune to practice in the circuit court of the United States at Chicago—the court over which he presided. I have often heard it said by those who were most familiar with him, that whenever he was troubled over legal questions that were argued before him or when his mind was clouded or uncertain on what course he should adopt on litigation pending before him, he would go out

into the country to his little farm and there, while he was overseeing the care of his cattle and sheep and hogs and horses, he solved the problems that perplexed him while in his court room in the great city; and when he came back to his court he came with a mind clarified and broadened by his country experience and administered the law in a spirit of fairness and justice that has placed his name among the greatest judges of this or any other country.

Mr. RIXEY naturally, from his mode of life, took a deep interest in politics, and that he should eventually represent his people in Congress was as natural and as inevitable as that night follows day. His practice at the bar in the circuit carried him over many of the counties of his district. The people in the court room learned of his high character, his candor, and his fidelity to duty, and when the time came in his career when he felt that he could abandon in whole or in part his law practice the people of the Eighth Virginia district honored themselves by electing him to the House of Representatives of the United States. The repeated elections which followed his first show how well he met the expectations of his constituents and how fully he discharged all of the duties of a Representative in Congress. I found him during the Fifty-fifth, Fifty-sixth, and Fifty-seventh Congresses, in which I served with him, always alert when the interests of his constituents or of his State were involved. He was a broad-minded, patriotic citizen, and while he never forgot the people of his district or of his State, he was always quick to respond to any question that involved the true interests of his country.

Mr. President, Virginia will undoubtedly have in the future, as she has had in the past, men to represent her in the Congress of the United States of marvelous oratorical ability, but she will have no one, in my judgment, who will be more faithful to her interests or more true to his ideals than was JOHN F. RIXEY.

Mr. HEMENWAY. Mr. President, I desire to add a few words of tribute to the memory of JOHN FRANKLIN RIXEY. I served with him in the Lower House of Congress, and there learned to respect and admire him. He was a member of the Committee on Naval Affairs, and my position on the Committee on Appropriations frequently brought me in personal contact with the members of his committee, and I shall never forget the industry, patience, and patriotism with which Mr. RIXEY discharged his duties as a Representative of the great State of Virginia. We differed in politics, but above partisanship there always shone out from his character the higher and nobler sentiments of a patriotic American citizen.

He was a typical Virginian, and he was proud of her history. He knew Virginia as the great State that she is, that has furnished to our country some of our most noted statesmen and greatest jurists. He was born in Culpeper County, August 1, 1854, during the days when public sentiment was arraying itself on one side or the other of the question that seven years later resulted in the greatest war the world has ever witnessed. His earlier impressions were formed during the days when men thought deep and strong, when martial music filled the air and soldiers were marching to war. Though he lived in a section of the country where the fruits of war were most bitter, and where the hand of destruction fell most heavily, yet in his life and public service there was naught but the broadest statesmanship that rejoices in a great united country.

Words of eulogy can not add to or detract from the fame of any man, but when offered as they are to-day they do credit to those who speak them. Perhaps no higher tribute can be paid a man in public life than the tribute that he labored earnestly and faithfully to bring about matters of public benefit, and perhaps no public man who had an ambition to serve the people faithfully and earnestly would desire a greater compliment than have it said of him "he succeeded."

Measured by this test, Mr. RIXEY's life was complete. He not only served his people diligently and faithfully and accomplished much good, but he made many friends, who shall always remember him pleasantly and kindly.

Mr. CARMACK. Mr. President, the death of JOHN F. RIXEY was to me a personal grief. I served with him as a Member of the House, was brought into close and frequent contact with him in committee, and learned to know him—head and heart. We entered the House together. We became friends almost as soon as we became acquaintances. This friendship, upon my part, was based upon the only sure and enduring foundation of friendship, an admiration for the solid qualities of the man. I observed in my association with him that his conscientiousness in the performance of public duties was marked and exceptional. He loved to know things thoroughly and to do things well. He sought with earnest purpose to know his premises perfectly before he reasoned to the conclusion. He brought to the consideration of public questions a mind that was lucid, clear, and logical. It seemed to me that he labored to cast out of his thought all prejudice and preconceived opinion when he had to deal with a particular case. He had fixed principles which he held, not for show nor for purposes of academic discussion. They were to him rules of life, and he made his opinions and his conduct in particular cases conform rigidly thereto. Truth and right and justice were always present with him.

In dealing with public matters his thought was directed to the merits of the question in debate rather than to the temper or disposition of his audience, and his power of persuasion lay in the force of his reasoning, the lucidity of his statement, and his clear comprehension of the subject. He was a man of ability—of much more than usual ability—and yet it was his character more than his intellect that commanded respect. The same might be said of every man who is truly great. It was true of Washington; it was true of Lee; it was true of Alfred. JOHN F. RIXEY had a character which made him love the right; he had an intellect which enabled him to understand and defend it.

He therefore could always command attention. While never a rhetorical, he was always an interesting speaker, for he brought to the discussion of every question that most compelling of all faculties, earnestness—an evident sincerity and a strong conviction. His intellectual abilities would not have made him what he was if they had not been coupled with love of truth and justice. I saw and observed this quality in him when we were members of the Committee on Claims in the House of Representatives. No false or unjust demand upon the public Treasury could evade his relentless questioning; but he was as eager to do justice to the claimant as he was to the Government, and every honest claim found in him an earnest champion.

Before he entered public life he had won distinction as a lawyer in competition with a bar famed for legal lore and skilled in forensic combat. There were perhaps many of those whom he met in such combat who had, in the popular sense of the term, a greater gift of eloquence than he. He was a match for the best of them, because he was learned in the law, industrious in the preparation of his cause, and clear and logical in its presentation, and had that indescribable power of character which gives double power to the intellectual faculties. Those who knew him as a lawyer not only testify to his ability, but to the fidelity with which he observed the ethics and honorable traditions of a noble profession. This was a part of his character as a gentleman, born and bred.

From my first acquaintance with JOHN F. RIXEY he seemed a man in feeble and failing health, whose mental energies held disease at bay. In the latter years of his service this fatal disease made steady progress upon him, but he clung heroically to his post of duty, disregarding the warnings of his physicians and the pleadings of his friends that he might be faithful—faith-to the last—to his trust. He felt that the high honors his people had bestowed upon him demanded of him a great sacrifice in their service. He made that sacrifice to the uttermost—"greater love hath no man than this."

JOHN F. RIXEY was not only esteemed and respected, but by those who knew him he was loved. He had that charm of manner which goes with a pure and upright soul—the charm which, unconsciously and without effort, sheds itself abroad, a charm which all men feel, but which none can define.

It is to me a melancholy pleasure to lay my humble wreath upon the coffin of so grand a man. I hope the few but earnest words I speak may be of some comfort to his family and his friends. Whenever such a life goes out there is the comforting thought that such a character and such a life can never be in vain. The pure spirit of JOHN F. RIXEY has passed beyond the bounds of this mortal life; but he lives, not alone in the loving hearts of friends and family, but in the blessed influence he left behind, which will help to make in his own image the lives of those who come after him.

### MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE ADAMS.

The VICE-PRESIDENT laid before the Senate the following resolutions from the House of Representatives; which were read:

IN THE HOUSE OF REPRESENTATIVES,
*February 24, 1907.*

*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. HENRY C. ADAMS, late a Member of this House from the State of Wisconsin.

*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of the exercises of this day, shall stand adjourned.

*Resolved*, That the Clerk communicate these resolutions to the Senate.

*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased.

Mr. SPOONER. Mr. President, I offer the resolutions which I send to the desk, and ask their adoption.

The VICE-PRESIDENT. The resolutions will be read.

The resolutions were read, and unanimously agreed to, as follows:

*Resolved*, That the Senate has heard with profound sorrow the announcement of the death of Hon. HENRY C. ADAMS, late a Member of the House of Representatives from the State of Wisconsin.

*Resolved*, That the business of the Senate be now suspended, in order that fitting tribute be paid to his memory.

Mr. SPOONER. Mr. President, the angel of death has been very busy among the Members of the Fifty-ninth Congress. Many times we have been summoned, giving pause to the public business, to stand by the open grave of a comrade in the public service who has died in the line of duty. In this roll of the dead is the name of one of Wisconsin's best-loved and most-trusted citizens, the Hon. HENRY CULLEN ADAMS, late a Member of the House of Representatives from the Second district, who was stricken on his journey homeward, and in Chicago on Monday, the 9th of July last, sank into "that sinless, stirless rest which we call death."

It is my belief that but for his spirit of self-sacrifice and unyielding devotion to duty as a legislator he might have been still among us. I saw him often during the last week of the session, ill and weary, but intensely interested, as a leading member of the Committee on Agriculture, in the pure food and agricultural appropriation bills, each containing novel and important propositions which he deemed of vital consequence to the people, and the success of which he promoted with unflagging spirit and unceasing personal effort. The end of the session left him, in the reaction from its activity and excitement, an easy victim to any acute physical ailment. In our last conversation he spoke of his unutterable longing for the rest and companionship of home and its surroundings of rare beauty. In the providence of God he was never again to behold it, but his wasted body was borne by loving hands, amid the tears of the thousands who had known and loved him, to the resting place which he had long ago chosen.

Mr. ADAMS was born November 28, 1850, at Verona, Oneida County, N. Y. He removed with his parents to Wisconsin in 1851, attended the Albion Academy one year and the University of Wisconsin three years, being compelled by frail health to forego the ambition to graduate with honor in his class, which no one doubted he would have attained.

He was a member of the Wisconsin legislative assembly two terms, from 1883 to 1887, and from the beginning of his service was a distinguished and useful member of that body.

He served a time as State superintendent of public property, and was dairy and food commissioner of Wisconsin from 1894 to 1902. It is safe to say that there was not in any State a dairy and food commissioner who excelled him in aptitude for the work or in ability to perform it, if, indeed, his equal was anywhere to be found.

He was elected to the Fifty-eighth Congress and reelected to the Fifty-ninth Congress from the Second district, his home being at Madison, the capital of the State, which also is the home of my colleague and myself.

Mr. ADAMS was married on the 15th of October, 1878, to Miss Anna B. Norton, and his home life was always a charming and happy one.

He could look back upon an ancestry in which were great names celebrated for learning, eloquence, and distinguished public service to the whole country. I knew his father well and entertained for him great admiration. He was a scientific farmer, many times a member of the legislature, and a man of mark and individuality in a body in which were a large number of the ablest men in the State. He was an entrancing speaker. His voice was musical and his diction perfect. A very modest man, who never talked of himself, it used to be marveled that "Farmer Adams" was so scholarly and so eloquent. But Benjamin Franklin Adams was one of the earlier graduates of Hamilton College, New York, and for some years professor of Greek and Latin in that institution. He would have been eminent at the bar or in public life, but he preferred the life of the farm and the intelligent and scientific pursuit of agriculture. The last time I ever saw him was at a Psi Upsilon banquet, the first he had attended for over forty years and at which he was the guest of honor. In an hour he grew young again and made an address of great beauty. In a little time he died.

On the farm and under the tutelage of such a father, HENRY CULLEN ADAMS spent his youth, and was well taught before entering college in history, the languages, literature, rhetoric, and agriculture in its theoretical and practical phases. Here he imbibed an abiding love for agriculture, a thorough knowledge of the needs of the farmer, and a sincere devotion to his interests. His life work was largely dedicated to the service of agriculture. He was a man of large constructive ability, an admirable logician, of analytical, yet broad, mind, and the author of many laws enacted in Wisconsin and other States in the interest of agriculture. He spoke in many States in advocacy of pure-food laws and of the dairy interests of the country. There was no field or phase of agriculture in which he had not been a student and upon which he could not write and speak instructively and with great ability.

He was a Republican always. He loved politics of a decent, manly sort, and he was one of the most interesting and popular exponents of the principles and policies of the party which he loved who ever appeared upon the hustings in the Northwest.

He was a broad-minded man, full of charity for all men and tolerant of differences of opinion, and, although a partisan, he found no warrant because of difference of opinion upon party principles and public policies for impeaching the patriotism or sincerity of his opponents.

It had been, Mr. President, to my knowledge, the ambition of his life to become a member of the national House of Representatives, and he was admirably equipped in every way to render to the country great and conspicuous service as a national legislator. During the too brief period which he served here he exhibited in a high degree strength as an original thinker, an eloquent and resourceful debater, a high order of constructive statesmanship, an unconquerable spirit, a geniality which won the affectionate regard of his associates in both parties, and made it certain that, with health and years of service, he could easily achieve a lofty eminence in the field of national legislation. His whole life, Mr. President, was pathetic in this, that it was the constant struggle of a dauntless spirit with bodily weakness.

In the last session which he attended he made great impression upon the body of which he was a member, and won the respect and admiration of the President and members of his Cabinet. I have more than once dwelt with peculiar pleasure, since he was laid to rest at "Forest Hill," near by the home which he had builded for himself and family, and in which he had spent so many happy years, upon the fact that I was able in the last conversation I had with him, as we sat in our cloak room, to repeat in his presence the friendly and flattering words spoken of him by the President in conversation with me an hour before. They brought color into his pale cheeks and a new light to his tired eyes.

He spoke always with persuasive eloquence, and when aroused, with great power, and with a vocabulary which was simple and quite classic.

His body was frail, but his will was strong; his ambition was keen and honorable, and his spirit was unconquerable. He possessed a rare sense of humor and was a delightful companion, a faithful friend, and quick and tender in his sympathies.

It was altogether characteristic of him and of his life that the first legislative purpose which he developed and pursued in Congress to successful consummation was an enlargement of the appropriation for the support of agricultural colleges and experiment stations, the value of which to the farmers of the country, and therefore to the people of the country, he knew as well, if not better, than any other man of my acquaintance.

He was a man of strong convictions, and when committed upon a policy or principle which he thought was right he was absolutely unshakable. He was opposed to the compulsory joinder of two Territories into one State, and no power or pleading could move him from his position. And that, Mr. President, was characteristic of him, although he was as free from what men commonly call obstinacy as any man I ever knew.

He died too soon, but—

Death is the dropping of the flower that the fruit may swell.

Wisconsin will not forget his shining qualities and his splendid public services, and her good people will tenderly cherish his memory.

My colleague [Mr. LA FOLLETTE], who was a lifelong friend of Mr. ADAMS, is, to his sorrow, prevented from joining in the tribute to him this evening because of illness.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE KETCHAM.

The VICE-PRESIDENT laid before the Senate the following message from the House of Representatives, which was read:

IN THE HOUSE OF REPRESENTATIVES,
*February 24, 1907.*

*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon JOHN H. KETCHAM, late a Member of this House from the State of New York.

*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the

House, at the conclusion of the memorial exercises of this day shall stand adjourned.

*Resolved*, That the Clerk communicate these resolutions to the Senate.

*Resolved*, That the Clerk communicate these resolutions to the family of the deceased.

Mr. DEPEW. Mr. President, I offer the resolutions I send to the desk.

The VICE-PRESIDENT. The Senator from New York submits resolutions, which will be read.

The Secretary read the resolutions, as follows:

*Resolved*, That the Senate has heard with profound sorrow the announcement of the death of the Hon. JOHN H. KETCHAM, late a Representative from the State of New York.

*Resolved*, That the business of the Senate be now suspended, that fitting tribute may be paid to the memory of the deceased.

The VICE-PRESIDENT. The question is on agreeing to the resolutions submitted by the Senator from New York.

The resolutions were unanimously agreed to.

Mr. DEPEW. Mr. President, those of us who have been here for many years have experienced during this Congress and others how frequently death comes where there are 90 Senators and 386 Members of the House. As a rule, the colleague who has departed did not have the qualities of mind or distinction in public life which raised him sufficiently above the average of his fellows for him to be distinguished beyond them all. Now and then there is a rare character who does possess these qualities and has achieved this unique success.

I know of no one in my long acquaintance with public men, covering now more than half a century, who without being spectacular, without calling to himself the attention of the whole country, yet had such a remarkable career as Gen. JOHN H. KETCHAM. He lived in the district adjoining the one in which I was born and passed most of my life, and during the whole of his public career he was my intimate friend. I knew him in his private, business, and political life. He had the distinction of being for thirty-four years a Member of the House of Representatives, a period longer than any other man has served since the formation of the Republic, and in the changing conditions, increased population, and greater competition of our times and those which will succeed, I doubt if that record will ever be equaled, and I think he will always stand as the man who spent more years in the public service in the popular branch of our Government than any other one who ever served there.

His career presents a beautiful example of American life. He was born in modest circumstances. He became a farmer in early life, upon a moderate patrimony, and proceeded at once, with the qualities which made his success, to impress himself upon his community. The advantages of education to him were only those of the common school and the local academy, but they sufficed to overcome all obstacles and to enable him to surpass all his contemporaries.

He was a member of the local legislature of his county as a supervisor from his town the year he became of age. Two years afterwards he became a member of the lower house of the legislature of the State of New York, and at 25 he was a State senator. He was reelected, and then came the civil war.

The manner in which the volunteer regiments were raised in our State was that in each Congressional district three citizens were appointed to take charge of the recruiting. In his Congressional district they were Benson J. Lossing, the distinguished historian; Judge Emmett, one of the most eminent members of our supreme court, and this young senator. The work of this recruiting service devolved upon this young man, who had already become a familiar figure upon every farm and in every household in the district. In three weeks the One Hundred and Fiftieth New York was raised. They were men of his own age, of his own period, his intimate friends, his political allies and associates, and their demand was that he should go with them as their leader to the front, and they elected him their colonel.

He was a young married man with a little family—very young—yet he did not hesitate a moment. He assumed the responsibility of command of the regiment—a farmer's boy who knew nothing whatever of military tactics and who had never been connected with a military organization. But with the same persistent energy and grasp of things with which he had to do that made his success, he drew about him the best military talent available and studied night and day, and used the same efforts with his regiment, until when it came to the front it was a disciplined organization with a competent leader.

During all the years of the civil war it was the characteristic of the One Hundred and Fiftieth New York that it was equal to any duty it might be called upon to perform. It was in all the campaigns of the Army of the Potomac and afterwards in those of the Army of the West, and as in different battles its ranks were depleted they were recruited again from these same farmer boys of the district which its colonel had represented in the legislature.

He was wounded at Gettysburg, his life despaired of, and from that wound he suffered during his life. But when he could once more move, though he had ample excuse to retire, he was with Sherman, at the head of the One Hundred and Fiftieth New York, and marching through Georgia to the sea.

In 1865 the boys, writing home from the regiment of their colonel, who was always caring for their comfort regardless of his own, whether it was in camp or on the battlefield or in the hospital, created a sentiment in the district that he should represent them in Congress, and he was practically unanimously elected. For four terms he was in the lower House, covering eight years.

Then came one of the most remarkable contests which has ever occurred in our country. It was in 1872. The candidacy of Horace Greeley had demoralized for the time the Republican party, which had been brought up on the New York Tribune, and demoralized the Democratic party which had nominated its most distinguished, able, and bitter opponent as its candidate for the Presidency. The Democratic party then undertook to defeat Colonel, Brigadier-General, Major-General, and Congressman KETCHAM. They selected a millionaire opponent, and the contest developed election methods to an extent never before or since known.

In those days we had no civil-service and no corrupt-practices acts. In those days when the courts met and the judge charged the grand jury on the statutory clauses, among which was bribery at the polls, it received no other attention than a smile in the court room. In this contest, which attracted the attention of the country, and especially of our State, General KETCHAM was defeated by a few hundred votes. But it was known and admitted that the contest had cost the successful candidate more than a quarter of a million dollars, and when the grand jury met again and the judge solemnly charged, no smile was seen in the court among the grand jury, the petit jurymen, the litigants, the lawyers, or the witnesses, because all knew the facts, and many of them were disgracefully connected with them.

No investigation followed and no action was taken, and no public interest in the matter shown. We hear much in praise of the good old times and regrets that they can not return, but such a canvass and election would be impossible now in our State or any other.

General Grant knew and appreciated General KETCHAM as a soldier, and came, during the General's eight years in Congress, to recognize his talents for affairs, and instantly called upon him to serve the Government in the new organization of the District of Columbia, appointing him on the commission with Governor Dennison, of Ohio, and Henry T. Blow, of Missouri, two eminent executive officers. The General made a deep and profound study of the capital problem. He became familiar with the plan of that remarkable genius, L'Enfant, who was selected by General Washington to lay out this city, then a city of magnificent distances, so well described by that phrase.

During his three years as Commissioner he energetically advanced the plans since carried out and expanded which have made Washington remarkable, and in the full development of which this city will become the most beautiful capital in the world.

But after three years without its old Representative his district found it did not have the same distinction and service as with General KETCHAM, and it again called on him to represent its people in the House of Representatives. The second time he was a Member for sixteen years, eight times consecutively reelected, generally without any opposition, though it was one of the most doubtful districts in our State, and often Democratic. But frequently he would be unopposed in order that his forceful genius and efforts might not prevail in the local campaign.

At the end of sixteen years his health failed, and he retired for three years, but the district again demanded him. It would have no one else. He was unanimously called upon and remained in Congress for eight years more, until his death.

One of the most pathetic and beautiful tributes which can be paid to a man was that which crowned his life. It was known that he was in desperate health; it was known that he was paralyzed; that he could perform little or no service for his district or the country, and yet the convention of his party unanimously nominated him, and it was understood that there would be no opposition; but unhappily he died ten days before election.

Mr. President, here is the life of a man who was fifty-one years in the public service, who was thirty-four years in Con-

gress, who served with distinction in the legislature of his State, who won approbation as a Commissioner of this capital District of the country, and who as a soldier received the commendation of his brigade and division commanders for distinguished services in the field, and who left the Army a major-general.

Now, what were the peculiarities, what were the characteristics, which made this very remarkable career? He served in Congress under the leadership of Thaddeus Stevens, James G. Blaine, James A. Garfield, William McKinley, David B. Henderson, and JOSEPH G. CANNON; and while the RECORD might display little of what he did, he was a most valuable assistant to each one of them. He was in Congress with every President from Lincoln to Roosevelt, and while occupying but little space in the public press he was constantly invited to the White House for his assistance and advice.

It was known that while orators might speak and leaders might direct, there was no Member of Congress in KETCHAM'S time who could accomplish so much for the success of any measure or the defeat of any bill which was before the House. If he could have written his reminiscences and autobiography, giving the unwritten story of party measures and policies and the secret of success and of failure of leaders during his long term, what a valuable contribution it would have been to our political history.

In New York, which probably more than any other State in the Union has been for a century in both parties subject to dominant leadership, he was always a stalwart. He was in office when the famous partnership of Seward, Weed, and Greeley was dramatically dissolved, and continued during Greeley's temporary leadership and the control of Thurlow Weed. He was in office when Conkling and Fenton had their bitter fight, first Fenton in command and then the autocratic domination of Conkling, and so on down to the time of his death. He never shifted from one side to the other as leaders changed. His own side might be in a minority in the State organization, but his hold upon his own district, from the affection which the people had for him, was such that the State organization could never wrest from his hands the organization of his Congressional district.

He was a politician of the old school. He believed in machines. He believed in patronage. He believed in getting all that was possible of positions for his friends. I do not think any man who lived in his time, or any twenty, had so many men in office as General KETCHAM. He had an instinctive knowledge when there was a vacancy in any Department of the Government, and he had a man ready to fill it and generally got him in. The President or a Cabinet minister or the bureau head knew perfectly well when General KETCHAM came in that the desired position had to be surrendered before the General retired. He did not confine his activities to political appointments in taking care of his friends. There was scarcely a firm or corporation in the State with a large force of employees which was not subject to his activities. The New York Central Railroad had the Hudson River division running on one side of his district and the Harlem division on the other, and during the period of nearly twenty years while I was its executive officer if a vacancy occurred in his district General KETCHAM knew it before I did—before it was reported to the president—and he was in my office with a candidate for the place, and usually secured it.

I will say in this connection that his selections were always men fitted for the duties. There was no distinction with him as to politics in securing positions. If the candidate was a young man whom he believed deserving or a middle-aged man with whom fortune, for no fault of his own, had somehow gone wrong, he would do for him what he could. Fathers were succeeded by sons grateful to this old general who had either given them in youth a lift in life or saved the family in hard luck from distress.

He had an utter contempt for the holier-than-thou patriot. He had an inexpressible and infinite loathing for the man who believed that he was lifted as he tore down reputations.

Now, then, what constituted his enormous success? How did he remain fifty-one years in public life? How did he rise to be a major-general in the hot battles of the civil war? Why was it he could never be defeated, except in that one extraordinary canvass against him, in his own district? Why was he as fortunate in business as in politics? Because under all circumstances and at all times he was a man of such wise judgment and good sense that he knew a situation before other people; because of tireless industry, which was spurred to greater effort by failure and often won victory from defeat.

He never made a speech, and yet he was more successful than great orators. He never wrote a magazine article or a contribution for the newspapers, and yet he had more influence with the public opinion of his district than all orators or editors or magazine writers.

Mr. President, this farmer, legislator, Senator, Congressman, soldier had ideals. He had ideals about his home, and it was a beautiful one, with wife and children. He had ideals about the public service, and he did his full part in the great measures which for the last fifty years have been before the Congress of the United States. He had his ideals as a soldier, and he met the commendation of those great soldiers whose names will be forever connected with the most glorious part of the history of our country. He had ideals of public life—that he should be true to his country, his friends, and his own manhood and independence.

So Gen. JOHN H. KETCHAM lived and died. For fifty years he was in the open and before the public. Important investigations were held while he was upon the platform, but he was never brought in. Great scandals smirched both Houses of Congress while he was in office, but he was never touched. Continually on the platform and in the public eye, his record was always honorable, and he had the highest consideration of his associates, his friends, and his enemies.

I know of no example of a man so inconspicuous and yet so great which furnishes such a noble lesson of the possibilities of American citizenship to the youth of our country as that of Gen. JOHN H. KETCHAM.

Mr. HOPKINS. Mr. President, I served for eighteen years in the House of Representatives with General KETCHAM. During that period I learned to know him well. I ask the privilege of printing in the RECORD my estimate of his character and his public services.

The VICE-PRESIDENT. Without objection, permission is granted.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE FLACK.

The VICE-PRESIDENT. The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The resolutions were read, as follows:

IN THE HOUSE OF REPRESENTATIVES,
*February 24, 1907.*

*Resolved*, That the business of the House be now suspended and that opportunity be now afforded Members to pay tribute to the memory of Hon. WILLIAM H. FLACK, late a Representative from the State of New York.

*Resolved*, That as a special mark of respect and esteem for Mr. FLACK, the House, at the conclusion of these proceedings, adjourn.

*Resolved*, That the Clerk communicate these resolutions to the Senate.

*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased.

Mr. DEPEW. Mr. President, I submit the resolutions which I send to the desk, and I ask for their adoption.

The resolutions were read and unanimously agreed to, as follows:

*Resolved*, That the Senate has heard with profound sorrow of the death of Hon. WILLIAM H. FLACK, late a Representative from the State of New York.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

Mr. DEPEW. Mr. President, when a man has passed his limit of three score and ten, and four score is near, his death is not an interruption, but the sudden checking of ultimate possibilities. We mourn his loss as we have in the last hour that of General Ketcham, who died at 74. But when the dread event comes in the early forties it is more than an ordinary calamity. The citizen who is in his meridian and has accomplished something of success is a valuable asset of his community and of the State. He has cleared the obstacles and difficulties from his pathway, his judgment has ripened, experience has made him wise, and the course before him is clear.

Mr. WILLIAM HENRY FLACK commenced the struggle early, with no advantages other than those afforded by the common school. He made his fight in the battle with the world in the community where he was born. At 46, when he died, he had been a success in business, a trustee and president of his village, chairman of his party committee in the county, and twice a Member of Congress from the district comprising the counties of St. Lawrence, Franklin, Essex, and Clinton. In the usual course of events he should have possessed thirty years more for service to his country and rewards for himself.

The difficulties which surround a country boy who aspires not only to business success, but to a political career, are greater than those which meet the son of the city. This is peculiarly the case where political distinction is desired. The man of the town is absorbed in the hot competitions of his vocation. The theater, the club, and other social diversions claim his spare time. It is only in periods of excitement about public questions that his attention is diverted to political matters. Public

opinion in great cities is dormant unless aroused by some crisis in the affairs of the municipality, the State, or the nation. After a period of feverish and passionate activity the people settle down again to the normal conditions with less interest in public affairs than in those which pertain immediately to their welfare. In the city there is no neighborhood. The citizen rarely knows who lives on his street or who are the occupants of the other apartments in his apartment house. Many a man who has been distinguished and looked up to by his neighbors in the country, who has been a local oracle and in a measure the pride of the people, has come to the metropolis for a larger field for his talents and activities. I have had the ex-judge and the ex-Senator or ex-Congressman say to me: "I do not know who lives on either side of me or across the way. I am a stranger in the elevator to those who are going to their offices in the vast building. I am jostled in the streets and crowded on the cars. Few call upon my family, and we might almost as well be in the Desert of Sahara. I miss the attention and recognition to which I have been accustomed, and that most delightful flattery in the world, the respect and admiration of men, women, and children, which I had at home, and we are going back. No pecuniary rewards compensate for the loss of that human contact and brotherly feeling which constitute the larger part of the pleasures of life." Under these conditions the organization more than the individual governs his career, unless he can control the organization.

In the country, however, the circle of the citizen enlarges with his activities and he becomes socially and politically well known, first in the town, then the county, and afterwards the district; but he must be somebody and do something which raises him above the average in order to receive recognition as a leader. Happily for our institutions, politics in these rural communities are not the spasmodic and often wild passions or crazes of the hour, but they are the thought and the pursuit of everyone all the year round. The newspapers are not read for the stock market or telegraphic news or cablegrams, but for editorials, transactions of conventions, and speeches of public men. Magazines are on the table of the sitting room not for ornament, but to be read. The lecture hall takes the place of the theater, and there the greatest questions of religion, politics, and sociology are discussed. The interval between the morning and afternoon service on Sunday is utilized as a sort of Chautauqua for the interchange of views, and they promote general education. It is to the credit of Mr. FLACK that he made his career in such a community. There is no community more typical of the very best conditions of rural life in the country than the district which Mr. FLACK represented in Congress. Its common and high schools, its academies and its college, are of the foremost educational rank. Its people have always been noted for their public spirit, interest in public affairs, and pronounced convictions. In the best sense they are all politicians, and the schoolhouse is as much a political primary as it is a primary school. Men of State and national fame have been its representatives. No ordinary man could command the suffrages of these counties. The difficulties in the way of success are greater because they are overwhelmingly of the same party, and a nomination is an election, and the competition is infinitely keener than where a nomination means a doubtful fight.

Mr. FLACK possessed not only the confidence of the people, which led to his being so often honored, and each time with promotion, but he had in a peculiar degree the love as well as the respect of all. He possessed a personality so agreeable and a disposition so charming that they won to him everyone with whom he came in contact. His illness, unfortunately, prevented continued activities in the House of Representatives, but while here he was a conscientious worker and had the confidence and respect of his associates. He leaves an honorable record for his family and for the representation of New York in the Congress of the United States.

Mr. DEPEW. I move that the Senate do now take a recess.

The motion was agreed to; and (at 9 o'clock and 32 minutes p. m.) the Senate took a recess until to-morrow, Sunday, March 3, at 11 o'clock a. m.

## NOMINATIONS.

*Executive nominations received by the Senate March 2, 1907.*

COLLECTORS OF CUSTOMS.

Reginald Branch, of New Jersey, to be collector of customs for the district of Burlington, in the State of New Jersey, in place of I. Snowden Haines, resigned.

William B. Boone, of New Jersey, to be collector of customs for the district of Bridgeton, in the State of New Jersey, in place of George W. McCowan, whose term of office expired by limitation February 23, 1907.

Walter Fifield, of New Jersey, to be collector of customs for the district of Great Egg Harbor, in the State of New Jersey. (Reappointment.)

Charles F. Leach, of Ohio, to be collector of customs for the district of Cuyahoga, in the State of Ohio. (Reappointment.)

APPOINTMENTS IN THE ARMY.

*General officers.*

Col. Alfred C. Markley, Thirteenth Infantry, to be brigadier-general from March 2, 1907, vice Jocelyn, retired from active service.

Col. Charles B. Hall, Eighteenth Infantry, to be brigadier-general, vice Duggan, to be retired from active service.

PROMOTIONS IN THE ARMY.

*Corps of Engineers.*

Lieut. Col. John G. D. Knight, Corps of Engineers, to be colonel from March 2, 1907, vice Heuer, retired from active service.

Maj. George W. Goethals, Corps of Engineers, to be lieutenant-colonel from March 2, 1907, vice Knight, promoted.

Capt. Herbert Deakyne, Corps of Engineers, to be major from March 2, 1907, vice Goethals, promoted.

First Lieut. Michael J. McDonough, Corps of Engineers, to be captain from March 2, 1907, vice Deakyne, promoted.

Second Lieut. Ernest Graves, Corps of Engineers, to be first lieutenant from March 2, 1907, vice McDonough, promoted.

*Cavalry Arm.*

Second Lieut. Arthur J. Lynch, Fifteenth Cavalry, to be first lieutenant from February 28, 1907, vice Duncan, Fourteenth Cavalry, retired from active service.

APPOINTMENTS IN THE ARMY.

Maj. Gen. Fred C. Ainsworth, The Military Secretary, to be The Adjutant-General with the rank of major-general from April 23, 1904.

Brig. Gen. William P. Hall, military secretary, to be adjutant-general with the rank of brigadier-general from April 23, 1904.

Col. Henry O. S. Heistand, military secretary, to be adjutant-general with the rank of colonel from July 22, 1902.

Col. George Andrews, military secretary, to be adjutant-general with the rank of colonel from August 7, 1903.

Col. William A. Simpson, military secretary, to be adjutant-general with the rank of colonel from August 18, 1903.

Col. Henry P. McCain, military secretary, to be adjutant-general with the rank of colonel from April 23, 1904.

Col. James T. Kerr, military secretary, to be adjutant-general with the rank of colonel from June 17, 1905.

Lieut. Col. Alexander O. Brodie, military secretary, to be adjutant-general with the rank of lieutenant-colonel from June 10, 1905.

Lieut. Col. Benjamin Alvord, military secretary, to be adjutant-general with the rank of lieutenant-colonel from June 17, 1905.

Maj. Eugene F. Ladd, military secretary, to be adjutant-general with the rank of major from June 23, 1905.

PROMOTIONS IN THE ARMY.

*Adjutant-general with the rank of lieutenant-colonel.*

Maj. Eugene F. Ladd, adjutant-general, to be adjutant-general with the rank of lieutenant-colonel from March 2, 1907, to fill an existing vacancy.

*Deputy surgeon-general with the rank of lieutenant-colonel.*

Joseph Y. Porter, late captain and assistant surgeon, United States Army, to be deputy surgeon-general with the rank of lieutenant-colonel from March 2, 1907.

POSTMASTERS.

CALIFORNIA.

Clyde F. Baldwin to be postmaster at Whittier, in the county of Los Angeles and State of California, in place of Lindley M. Baldwin. Incumbent's commission expired February 9, 1907.

Oliver H. Duvall to be postmaster at Claremont, in the county of Los Angeles and State of California. Office became Presidential January 1, 1907.

KENTUCKY.

James N. Coffey to be postmaster at Columbia, in the county of Adair and State of Kentucky. Office became Presidential January 1, 1907.

ILLINOIS.

Charles F. Douglass to be postmaster at Ashland, in the county of Cass and State of Illinois, in place of Charles F. Douglass. Incumbent's commission expired February 23, 1907.

Karl Miller to be postmaster at Winchester, in the county of

Scott and State of Illinois, in place of Karl Miller. Incumbent's commission expires March 3, 1907.

B. Reinbach to be postmaster at Waverly, in the county of Morgan and State of Illinois, in place of James M. Joy. Incumbent's commission expired February 23, 1907.

INDIANA.

Henry P. Hardie to be postmaster at Anderson, in the county of Madison and State of Indiana, in place of Robert P. Grimes, resigned.

NEW JERSEY.

Charles C. Cowperthwait to be postmaster at Mount Holly, in the county of Burlington and State of New Jersey, in place of Charles C. Cowperthwait. Incumbent's commission expired February 26, 1907.

Thomas C. Elvins to be postmaster at Hammonton, in the county of Atlantic and State of New Jersey, in place of Marcellus L. Jackson. Incumbent's commission expires March 2, 1907.

Arthur Winner to be postmaster at Palmyra, in the county of Burlington and State of New Jersey, in place of John E. Morton, resigned.

MASSACHUSETTS.

George Abbott to be postmaster at East Douglass, in the county of Worcester and State of Massachusetts, in place of George Abbott. Incumbent's commission expired February 11, 1907.

Frederick H. Greene to be postmaster at Ashburnham, in the county of Worcester and State of Massachusetts, in place of Ermina L. Evans, resigned.

MICHIGAN.

Frederick A. Roethlisberger to be postmaster at Hillsdale, in the county of Hillsdale and State of Michigan, in place of Edwin J. March. Incumbent's commission expired February 19, 1907.

MISSOURI.

Walter A. Coon to be postmaster at Republic, in the county of Greene and State of Missouri. Office became Presidential January 1, 1907.

John M. Eaton to be postmaster at Fayette, in the county of Howard and State of Missouri, in place of James Taylor. Incumbent's commission expired January 13, 1907.

PENNSYLVANIA.

Clara E. Fessenden to be postmaster at Roulette, in the county of Potter and State of Pennsylvania. Office became Presidential January 1, 1907.

OKLAHOMA.

W. S. Cade to be postmaster at Shawnee, in the county of Pottawatomie and Territory of Oklahoma, in place of George E. McKinnis. Incumbent's commission expired January 13, 1907.

TEXAS.

William J. Miller to be postmaster at Hallettsville, in the county of Lavaca and State of Texas, in place of William J. Miller. Incumbent's commission expires March 2, 1907.

J. S. Wells to be postmaster at Bowie, in the county of Montague and State of Texas, in place of William C. Smith, removed.

WISCONSIN.

James W. Meiklejohn to be postmaster at Waupun, in the county of Fond du Lac and State of Wisconsin, in place of James W. Meiklejohn. Incumbent's commission expired February 26, 1907.

## WITHDRAWAL.

*Executive nomination withdrawn from the Senate March 2, 1907.*

Henry P. Hardie, sent to the Senate to-day, to be postmaster at Anderson, Ind.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 2, 1907.*

UNITED STATES MARSHAL.

George H. Green, of Texas, to be United States marshal for the northern district of Texas.

REGISTER OF LAND OFFICE.

William Farre, of Oregon, to be register of the land office at Burns, Oreg.

PROMOTIONS IN THE NAVY.

Commander Thomas B. Howard to be a captain in the Navy, from the 24th day of February, 1907.

Passed Asst. Paymaster Francis J. Painter, United States Navy, retired, with the rank of lieutenant, to be a paymaster on the retired list of the Navy, with the rank of lieutenant, from the 29th day of June, 1906, in accordance with the provisions of an act of Congress approved on that date.

Professor of Mathematics Harry McL. P. Huse, to be a commander on the active list of the Navy from the 25th day of February, 1907, to take rank next after Commander William L. Rodgers, in accordance with the provisions of an act of Congress approved February 15, 1907.

PROMOTIONS IN THE ARMY.

Joseph Y. Porter, deputy surgeon-general and lieutenant-colonel.

Maj. Gen. Fred. C. Ainsworth, adjutant-general and major-general.

*To be adjutant-generals.*

Col. William P. Hall, with the rank of brigadier-general.
Col. Henry O. S. Heinstand, with the rank of colonel.
Col. George Andrews, with the rank of colonel.
Col. William A. Simpson, with the rank of colonel.
Col. Henry P. McCain, with the rank of colonel.
Col. James T. Kerr, with the rank of colonel.

Lieut. Col. Alexander O. Brodie, with the rank of lieutenant-colonel.

Lieut. Col. Benjamin Alvord, military secretary, to be adjutant-general with the rank of lieutenant-colonel from June 17, 1905.

Maj. Eugene F. Ladd, adjutant-general, to be adjutant-general with the rank of lieutenant-colonel from March 2, 1907, to fill an existing vacancy.

Maj. Eugene F. Ladd, with the rank of major.

*Colonels to be brigadier-generals.*

Alfred C. Markley.
Charles B. Ball.

*Corps of Engineers.*

Col. John G. D. Knight to be colonel.
Maj. George W. Goethals to be lieutenant-colonel.
Capt. Herbert Deakyne to be major.
First Lieut. Michael J. McDonough to be captain.
Second Lieut. Ernest Graves to be first lieutenant.

*Cavalry Arm.*

Second Lieut. Arthur J. Lynch to be first lieutenant.

COLLECTORS OF CUSTOMS.

William B. Boone to be collector of customs at Bridgeton, in the State of New Jersey.

Reginald Branch to be collector of customs at Burlington, in the State of New Jersey.

Walter Fifield to be collector of customs at Great Egg Harbor, in the State of New Jersey.

POSTMASTERS.

COLORADO.

Augusta Reardon to be postmaster at Victor, in the county of Teller and State of Colorado.

CONNECTICUT.

Walter B. Cheney to be postmaster at South Manchester, in the county of Hartford and State of Connecticut.

ILLINOIS.

Karl Miller to be postmaster at Winchester, in the State of Illinois.

B. Reinbach to be postmaster at Waverly, in the State of Illinois.

Charles F. Douglas to be postmaster at Ashland, in the State of Illinois.

INDIANA.

Virgil A. Geiger to be postmaster at Cherubusco, in the county of Whitley and State of Indiana.

W. O. Nash to be postmaster at Jacksonville, in the county of Green and State of Indiana.

IOWA.

Charles H. Hoyt to be postmaster at Fayette, in the county of Fayette and State of Iowa.

KANSAS.

John K. Cochran to be postmaster at Pratt, in the county of Pratt and State of Kansas.

John Gilman to be postmaster at Madison, in the county of Greenwood and State of Kansas.

Robert D. Rodgers to be postmaster at Syracuse, in the county of Hamilton and State of Kansas.

Lisse H. Shoup to be postmaster at Cimarron, in the county of Gray and State of Kansas.

MICHIGAN.

William H. Goodman to be postmaster at Allegan, in the county of Allegan and State of Michigan.

John T. P. Smith to be postmaster at Clarkston, in the county of Oakland and State of Michigan.

MINNESOTA.

Thomas M. Paine to be postmaster at Glencoe, in the county of McLeod and State of Minnesota.

Mark Swedberg to be postmaster at Luverne, in the county of Rock and State of Minnesota.

MISSISSIPPI.

Robert Burns to be postmaster at Brandon, in the county of Rankin and State of Mississippi.

MISSOURI.

Archie T. Hollenbeck to be postmaster at Westplains, in the county of Howell and State of Missouri.

William W. Wagner to be postmaster at Jefferson City, in the county of Cole and State of Missouri.

NEBRASKA.

James N. Brooks to be postmaster at Rushville, in the county of Sheridan and State of Nebraska.

William Cook to be postmaster at Hebron, in the county of Thayer and State of Nebraska.

William T. Mauck to be postmaster at Wahoo, in the county of Saunders and State of Nebraska.

John F. Nesbit to be postmaster at Tekamah, in the county of Burt and State of Nebraska.

NEVADA.

William B. Graham to be postmaster at Ely, in the county of White Pine and State of Nevada.

NEW JERSEY.

James E. Sherman to be postmaster at Frenchtown, in the county of Hunterdon and State of New Jersey.

NORTH DAKOTA.

James D. McKenzie to be postmaster at Milnor, in the county of Sargent and State of North Dakota.

OREGON.

William H. Lachner to be postmaster at Baker City, in the county of Baker and State of Oregon.

Thomas P. Randall to be postmaster at Oregon City, in the county of Clackamas and State of Oregon.

James S. Van Winkle to be postmaster at Albany, in the county of Linn and State of Oregon.

PENNSYLVANIA.

Ada U. Ashcom to be postmaster at Ligonier, in the county of Westmoreland and State of Pennsylvania.

W. F. Balsbach to be postmaster at Bellwood, in the county of Blair and State of Pennsylvania.

Barnett C. Fretts to be postmaster at Scottdale, in the county of Westmoreland and State of Pennsylvania.

SOUTH DAKOTA.

John Reich to be postmaster at Scotland, in the county of Bonhomme and State of South Dakota.

Delbert W. Wilmarth to be postmaster at De Smet, in the county of Kingsbury and State of South Dakota.

VIRGINIA.

James Carter to be postmaster at Chatham, in the county of Pittsylvania and State of Virginia.

R. W. Garnett to be postmaster at Farmville, in the county of Prince Edward and State of Virginia.

John B. Grayson to be postmaster at Warrenton, in the county of Fauquier and State of Virginia.

William H. Parker to be postmaster at Onancock, in the county of Accomac and State of Virginia.

Thomas H. Smith to be postmaster at Manchester, in the county of Chesterfield and State of Virginia.

WISCONSIN.

James W. Meiklejohn to be postmaster at Waupun, in the State of Wisconsin.

David B. Worthington to be postmaster at Beloit, in the county of Rock and State of Wisconsin.

## REJECTION.

*Executive nomination rejected by the Senate March 2, 1907.*

POSTMASTER.

CONNECTICUT.

Joseph T. Elliott to be postmaster at Middletown, in the county of Middlesex and State of Connecticut.

## PECUNIARY CLAIMS.

The injunction of secrecy was removed March 2, 1907, from the ratification of a convention signed on August 13, 1906, by the delegates of the Governments represented at the Third International Conference of American States, continuing in force, with the exception of its third article, the convention providing for the arbitration of pecuniary claims signed on January 30, 1902, by the delegates to the Second International Conference.

# HOUSE OF REPRESENTATIVES.

SATURDAY, *March 2, 1907.*

The House met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. HENRY N. COUDEN, D. D.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the Senate had passed without amendment joint resolution and bills of the following titles:

H. J. Res. 236. Joint resolution authorizing the Secretary of the Navy to furnish metal for a bell;

H. R. 25849. An act permitting the building of a dam across the Savannah River at Cherokee Shoals;

H. R. 25811. An act to authorize the Monroe, Farmerville and Northwestern Railway Company to construct a bridge over the Ouachita River and one over the D'Arbonne River, in Louisiana;

H. R. 25801. An act granting an honorable discharge to Seth Davis;

H. R. 24833. An act for the relief of the Louisiana Molasses Company (Limited) and the Louisiana Distilling Company;

H. R. 22588. An act for the relief of homestead entrymen who have paid more than the lawful purchase money;

H. R. 21091. An act authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Humason's Company B, First Oregon Mounted Volunteers, the name of Hezekiah Davis;

H. R. 19751. An act to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss.; and

H. R. 15859. An act ceding certain lands to Colorado State Agricultural College.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 25437. An act to grant American registry to the German bark *Mariechen.*

The message also announced that the Senate had passed the following resolutions; in which the concurrence of the House of Representatives was requested:

Senate concurrent resolution 54.

*Resolved by the Senate (the House of Representatives concurring),* That the President be requested to return the bill S. 5623, entitled "An act granting an increase of pension to Nicholas M. Hawkins."

Also:

Senate concurrent resolution 53.

*Resolved by the Senate (the House of Representatives concurring),* That the President be requested to return the bill S. 7822, entitled "An act granting an increase of pension to William N. Bronson."

The message also announced that the Senate had passed bill of the following title; in which the concurrence of the House of Representatives was requested:

S. 8622. An act granting an increase of pension to William N. Bronson.

The message also announced that the Senate had passed with amendment bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 16659. An act to correct the military record of Tobe Holt.

SENATE BILLS REFERRED.

Under clause 2, Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 8328. An act to permit the laying of two water pipes from Bayonne, N. J., to Staten Island, New York—to the Committee on Interstate and Foreign Commerce.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 24925. An act making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes; and

H. R. 24991. An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 23551. An act making appropriation for the support of the Army for the fiscal year ending June 30, 1908;

H. R. 24925. An act making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 24991. An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes; and

H. R. 15909. An act for the relief of the widow and minor son of Capt. Charles W. Dakin and the widow and minor children of Thomas J. Hennessy, late of the San Francisco fire department, who lost their lives while fighting a fire on board of the U. S. Army transport *Meade*.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I present a conference report on the sundry civil appropriation bill. I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from Minnesota presents a conference report, and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 6, 18, 19, 20, 28, 29, 33, 57, 58, 62, 63, 65, 88, 101, 102, and 109.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 5, 7, 8, 9, 13, 14, 15, 23, 24, 25, 26, 27, 30, 31, 35, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 52, 53, 54, 55, 59, 60, 61, 64, 66, 67, 70, 71, 72, 75, 76, 77, 84, 85, 86, 89, 90, 91, 92, 93, 94, 100, 104, 105, 106, 107, 108, 112, 113, 114, 115, 116, 118, 119, 120, 121, 123, and 124, and agree to the same.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment as follows: Strike out all after the word "available" in line 5 of said amendment; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: Strike out all after the word "available" in line 4 of said amendment; and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "for his information and action thereon;" and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Point Cabrillo light and fog-signal station, California: For completing a light and fog-signal station at or near Point Cabrillo, California, twenty-five thousand dollars."

And the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In line 2 of said amendment, after the word "February," insert the word "twenty-sixth;" strike out the fourth line of said amendment, and in lines 6 and 7 of said amendment strike out the words "at a cost not to exceed;" and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For light and fog-signal station at or near the west end of the draw near the Lehigh Valley Railroad bridge at Passaic, N. J., fifteen thousand dollars."

And the Senate agree to the same.

Amendment numbered 51: That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows: In line 2 of said amendment strike out the word "islands;" and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For light keepers' dwellings and appurtenant structures, including sites therefor, within the limit of cost fixed by said act approved February twenty-sixth, nineteen hundred and seven, seventy-five thousand dollars."

And the Senate agree to the same.

Amendment numbered 73: That the House recede from its disagreement to the amendment of the Senate numbered 73, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For completion of building, including everything necessary for occupation, exclusive of nurses' home, and in addition to the two following sums, fifty-six thousand four hundred dollars, to be immediately available."

And the Senate agree to the same.

Amendment numbered 74: That the House recede from its disagreement to the amendment of the Senate numbered 74, and agree to the same with amendments as follows: On page 95 of the bill, in line 11, after the word "dollars," insert the words "to be immediately available;" and on page 95 of the bill, in line 19, after the word "dollars," insert the words "to be immediately available;" and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "one hundred thousand dollars;" and the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Road to national cemetery, Keokuk, Iowa: For repairs to approach roadway to the Keokuk, Iowa, National Cemetery, one thousand five hundred dollars: *Provided*, That the city of Keokuk improve and agree to maintain in proper repair the road leading south from the main driveway of the city cemetery to the point where the road herein authorized to be improved begins."

And the Senate agree to the same.

Amendment numbered 103: That the House recede from its disagreement to the amendment of the Senate numbered 103, and agree to the same with an amendment as follows: Add after the word "appropriated," at the end of said amendment, the following: "This appropriation is made upon the express understanding that it is in full of all just claims against the United States and the District of Columbia on account of the reconstruction of said hospital, and that neither the United States nor the District of Columbia shall hereafter be called upon to pay any further sum on account of such reconstruction or debts incurred in connection therewith;" and the Senate agree to the same.

Amendment numbered 110: That the House recede from its disagreement to the amendment of the Senate numbered 110, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four hundred and one thousand seven hundred dollars;" and the Senate agree to the same.

Amendment numbered 111: That the House recede from its disagreement to the amendment of the Senate numbered 111, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "four million five hundred and twenty-eight thousand and forty-four dollars;" and the Senate agree to the same.

Amendment numbered 122: That the House recede from its disagreement to the amendment of the Senate numbered 122, and agree to the same with an amendment as follows: On page 190 of the bill, in line 5, strike out the words "present session" and in lieu thereof insert the words "first session of the Fifty-ninth Congress;" and the Senate agree to the same.

Amendment numbered 125: That the House recede from its disagreement to the amendment of the Senate numbered 125,

and agree to the same with an amendment as follows: Restore the matter stricken out by said Senate amendment, amended as follows: On page 197 of the bill, in line 19, after the word "be," insert the words "approved by the Commission and then;" and the Senate agree to the same.

The committee of conference have been unable to agree on amendments numbered 4, 10, 11, 12, 22, 68, 69, 78, 79, 80, 82, 83, 87, 96, 97, 98, 99, 117, and 126.

J. A. TAWNEY,
WALTER I. SMITH,
GEO. W. TAYLOR,
*Managers on the part of the House.*
W. B. ALLISON,
EUGENE HALE,
JAMES H. BERRY,
*Managers on the part of the Senate.*

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for the sundry civil expenses of the Government for the fiscal year 1908, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on each of said amendments, namely:

On amendments numbered 1, 2, 3, 5, 6, 7, 8, 9, and 10, relating to public buildings: Increases the amount for the public building at Asheville, N. C., from $30,000 to $45,000, as proposed by the Senate; inserts the provision proposed by the Senate relative to the expenses incident to the occupancy of the building at Cedar Rapids, Iowa; appropriates $5,000, as proposed by the Senate, for additional land for the public building at Erie, Pa.; and appropriates $25,000, as proposed by the House, for the public building at Fairmont, W. Va., instead of $25,000, as proposed by the Senate, for the purchase of the site; appropriates $70,000, as proposed by the Senate, for the public building at Lynchburg, Va., and makes a verbal correction in the provision for the public building at Richmond, Va.

On amendment numbered 13: Appropriates $5,000, as proposed by the Senate, for a telephone line from the Umpqua River life saving station, Oregon.

On amendments numbered 14, 15, 16, and 17: Inserts the appropriations proposed by the Senate for the construction of two revenue cutters, a seagoing tug, and a boarding vessel for the Revenue-Cutter Service.

On amendments numbered 18, 19, 20, 21, 23, and 24: Makes verbal corrections in the text of the bill; fixes the compensation of three employees at the Bureau of Engraving and Printing at $1,600, $1,400, and $1,200, respectively, as proposed by the Senate.

On amendments numbered 25, 26, and 27: Appropriates, as proposed by the Senate, for a general inspector of supplies for public buildings at $3,000, an inspector of furniture and other furnishings for public buildings at $2,500, and an inspector of furniture at $1,600.

On amendments numbered 28 and 29: Appropriates $3,800,000, as proposed by the House, instead of $3,700,000, as proposed by the Senate, for expenses of collecting revenue from customs during the fiscal year 1908, and repeals the indefinite appropriation for the customs service to take effect at the close of the fiscal year 1907, as proposed by the House, instead of 1908, as proposed by the Senate.

On amendment numbered 30: Appropriates $1,500, as proposed by the Senate, instead of $1,200, as proposed by the House, for expenses of local appraisers' meetings.

On amendment numbered 31: Appropriates $540, as proposed by the Senate, for addition to the Prudence Island light station, Rhode Island.

On amendments numbered 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, and 56 strikes out the appropriation of $100,000, as proposed by the Senate, for a light station at the easterly end of Gull Island, Lake Superior, Wisconsin, and appropriates for certain other light stations authorized by the act approved February 26, 1907, and for light keepers' dwellings in the sums proposed by the Senate.

On amendments numbered 57, 58, 59, 60, 61, and 62, relating to the Light-House Establishment: Appropriates $800,000, as proposed by the House, instead of $825,000, as proposed by the Senate, for repairs of light-houses; $950,000, as proposed by the House, instead of $1,000,000, as proposed by the Senate, for salaries of keepers of light-houses; $700,000, as proposed by the Senate, instead of $650,000, as proposed by the House, for expenses of buoyage; $375,000, as proposed by the Senate, instead of $350,000, as proposed by the House, for lighting of rivers, and $15,000, as proposed by the House, instead of $25,000, as proposed by the Senate, for oil houses for light stations.

On amendments numbered 63 and 64: Appropriates for a chief of division of naturalization, $3,500, as proposed by the House, instead of $4,000, as proposed by the Senate.

On amendment numbered 65: Strikes out the appropriation of $50,000, proposed by the Senate, for compensation of special agents for carrying on the work of the division of naturalization.

On amendment numbered 66: Appropriates $50,000, as proposed by the Senate, for the division of information in the Bureau of Immigration and Naturalization.

On amendment numbered 67: Appropriates $5,000, as proposed by the Senate, to ascertain the conditions under which to refuse permission to certain aliens to enter the United States.

On amendment numbered 70: Appropriates $720,000, as proposed by the Senate, for the Senate office building.

On amendments numbered 71 and 72: Appropriates, as proposed by the Senate, $7,500 for metal cases for the office of the clerk of the Supreme Court, and $3,000 for ventilating machinery in the attic of the Senate Chamber.

On amendments numbered 73 and 74: Appropriates $56,400, instead of $114,000, as proposed by the Senate, for completing the new Freedman's Hospital building.

On amendment numbered 75: Makes the appropriation for resurvey of Wyoming boundary line immediately available.

On amendments numbered 76, 77, and 81: Appropriates $100,000, instead of $150,000, as proposed by the Senate, for gauging streams and determining the water supply of the United States, and limits the investigation of structural materials by the Geological Survey to such as are for the use of the United States, as proposed by the Senate.

On amendments numbered 84 and 85: Appropriates $25,200 to continue the work of reproducing the official records of the offices of the surveyor-general and register and receiver at San Francisco until December 31, 1907, and $2,000 for rent of office room for said force.

On amendment numbered 86: Makes the appropriation for the Mesa Verde National Park immediately available.

On amendment numbered 88: Strikes out the provision proposed by the Senate placing the control of the expenditure of the appropriation for reindeer in Alaska under the Commissioner of Immigration.

On amendments numbered 89, 90, 91, 92, 93, and 94: Fixes the price per lamp per annum for electric lights in the public parks at $85, as proposed by the Senate, instead of $80, as proposed by the House.

On amendment numbered 95: Appropriates $1,500 for road to national cemetery at Keokuk, Iowa.

On amendment numbered 100: Makes the appropriation heretofore made for enlargement of the Fort Sheridan Military Reservation available for additional land.

On amendments numbered 101 and 102: Appropriates $40,000, as proposed by the House, instead of $50,000, as proposed by the Senate, for the Chickamauga and Chattanooga National Park.

On amendment numbered 103: Appropriates $130,629.67, as proposed by the Senate, for Providence Hospital.

On amendment numbered 104: Appropriates $6,500, as proposed by the Senate, for renewal of plumbing in Garfield Hospital.

On amendment numbered 105: Makes appropriation of $15,000, heretofore made for moorings in Hampton Roads and adjacent waters available also for temporary beacons and buoys during the Jamestown Exposition.

On amendments numbered 106 and 107: Appropriates $45,000, as proposed by the Senate, for improving sewerage system at the Soldiers' Home at Togus, Me.

On amendments numbered 108, 109, 110, and 111: Appropriates $6,500, as proposed by the Senate, for pipe line to water system at the Pacific Branch of the Soldiers' Home, and strikes out the appropriation of $8,325 proposed by the Senate for an iron fence at said Home.

On amendment numbered 112: Makes the appropriation for the Red Cross conference immediately available.

On amendments numbered 113, 114, and 115: Appropriates, as proposed by the Senate, $1,800 for rent of an additional building for the Department of Justice; $1,000 for furniture, and $3,000 for miscellaneous expenses of said Department.

On amendment numbered 116: Appropriates $30,000, as proposed by the Senate, instead of $20,000, as proposed by the House, for a court-house and jail at Nome, Alaska.

On amendments numbered 118, 119, 120, and 121: Makes cer-

tain appropriations for the reform school for the District of Columbia immediately available, and makes a verbal correction in the text of the bill.

On amendment numbered 122: Inserts the provision proposed by the Senate relative to printing for The Military Secretary's office, War Department.

On amendments numbered 123 and 124: Appropriates $2,298,367.50, as proposed by the Senate, to pay outstanding four and one-half per cent bonds of the Panama Railway Company.

On amendment numbered 125: Restores to the bill the provisions proposed by the House making available for equipment purposes the appropriation made for 1907 for reequipment of the Panama Railroad.

The committee of conference have been unable to agree on the following amendments of the Senate, namely:

On amendment numbered 4, concerning public building at Denver, Colo.

On amendment numbered 10, concerning subtreasury public building at San Francisco.

On amendment numbered 11, addition to Bureau of Engraving and Printing.

On amendment numbered 12, appropriating $3,000,000 for buildings for Departments of State, Justice, and Commerce and Labor.

On amendment numbered 22, appropriating $125,000 for transportation of silver coin.

On amendments numbered 68 and 69, striking out the provision of the House requiring the statistics as to woman and child labor to be taken by the Census Office.

On amendments numbered 78, 79, 80, 82, and 83, relating to the Geological Survey.

On amendment numbered 87, proposing to establish a national park in Idaho.

On amendments numbered 96, 97, 98, and 99, relating to military posts.

On amendment numbered 117, relating to the Spanish Treaty Claims Commission.

On amendment numbered 126, striking out the provision proposed by the House relating to the purchase of supplies for Executive Departments, and inserting, by the Senate, appropriations for purchase of parks in the District of Columbia.

J. A. TAWNEY,
WALTER I. SMITH,
GEO. W. TAYLOR,
*Managers on the part of the House.*

Mr. TAWNEY. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The gentleman from Minnesota moves to agree to the conference report.

Mr. TAWNEY. On that I ask the previous question.

Mr. CLARK of Florida. Mr. Speaker, I would like to ask about the last item read by the Clerk. Is there a disagreement on that?

The SPEAKER. The Clerk will report the item.

The Clerk read as follows:

On amendment numbered 126, striking out the provision proposed by the House relating to the purchase of supplies for Executive Departments, and inserting by the Senate appropriations for purchase of parks in the District of Columbia.

Mr. CLARK of Florida. I understand there is a disagreement on that?

Mr. TAWNEY. That is disagreed to. The conferees have not agreed to it.

Mr. KEIFER. Mr. Speaker, there are some amendments we understand have been agreed to and some not, but we have not had opportunity to examine the report of the conference committee. To some of the amendments disagreed to we desire to ask the House to recede from its former disagreement and to concur, and I desire to make a motion of that kind at the appropriate time.

Mr. TAWNEY. Mr. Speaker, I will say if the previous question is ordered on the adoption of the report and the report is adopted, I understand the parliamentary situation then will be that any Member of the House who desires a separate vote on any amendment yet in conference and disagreed to will have an opportunity to make that motion. Following the adoption of the report I intend to move that the House further insist upon its disagreement to the amendments that are yet in conference and agree to the conference asked by the Senate.

Mr. KEIFER. But, Mr. Speaker, I desire to make a motion to recede from some amendments.

The SPEAKER. But the motion can not be made until the conference report is first disposed of.

Mr. CLARK of Missouri. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CLARK of Missouri. Will the motion of the gentleman from Minnesota shut out a separate vote on any amendment which may be desired?

The SPEAKER. Not of those still undisposed of, but this would buckle all those agreed to—that is, buckle up everything covered by the report.

The question was taken; and the report was agreed to.

Mr. TAWNEY. Now, Mr. Speaker, I move that the House further insist upon its disagreement to the amendments yet undisposed of and ask for a further conference.

The SPEAKER. Is a separate vote demanded upon any amendment?

Mr. KEIFER. Mr. Speaker, before that is put I desire a separate vote——

Mr. UNDERWOOD. Mr. Speaker, I desire——

The SPEAKER. The gentleman will please state on what amendment a separate vote is desired.

Mr. UNDERWOOD. Mr. Speaker, I desire to get some information from the chairman of the committee before I make the request. I would like to ask the chairman of the committee to state the situation of this bill at present as to the items in reference to the Geological Survey.

Mr. TAWNEY. I will say for the information of the House and for the information of the gentleman from Alabama that the particular items in disagreement between the two Houses in this report are, first, the amendment of the Senate proposing to purchase the site for a departmental building at the cost of $3,000,000. There is another Senate amendment in respect to a public building that is in disagreement, which is an authorization of the preparation of plans for the construction of a very large public building in the city of Denver. The amendment of the Senate in respect to woman and child labor is in disagreement, and the amendment of the Senate in respect to the fuel tests, increasing the appropriation $50,000, and the language which extends the purpose of that investigation to all the coal fields of the United States, is in disagreement; and the amendment in respect to the investigation of black sand; also the amendment in respect to the transportation of silver dollars, and the amendment in respect to the purchase of large areas of land in the District of Columbia for public parks is in disagreement. Those are the chief amendments that are in disagreement, including also—and I do not want to omit it—the amendment of the Senate striking out the House provision standardizing the miscellaneous supplies of the Departments, which was carried in our bill as we passed it in the House.

Mr. WILEY of New Jersey. May I ask the gentleman a question?

Mr. TAWNEY. Yes.

Mr. WILEY of New Jersey. I would like to know what was done about the structural material for topographical survey?

Mr. TAWNEY. The structural-material item is included in the agreement. The House conferees receded from the disagreement and agreed to the language the Senate inserted. That is the only change.

Mr. DALZELL. Did they cut out the words "for use of?"

Mr. TAWNEY. Yes; "for use of."

Mr. DALZELL. That is not a disagreement?

Mr. TAWNEY. No.

Mr. DALZELL. No. 78, increasing the sum to $50,000, and No. 79, putting in the language that was stricken out on the point of order, are both in disagreement, and also, if I understand the gentleman rightly, No. 80, for the investigation of black sand?

Mr. TAWNEY. Those three are all in disagreement.

Mr. WILEY of New Jersey. And the one relating to the topographical survey?

Mr. TAWNEY. The topographical survey is in disagreement.

Mr. NEEDHAM. Is there an agreement on the investigation of water resources?

Mr. TAWNEY. Yes; there is an agreement, and it is included in the report just adopted.

Mr. MONDELL. As I understand it, the agreement is a reduction of $50,000 in the Senate provision?

Mr. SIMS. The gentleman from Minnesota [Mr. TAWNEY] spoke of matters of serious disagreement, and did not mention the omnibus park bill, to provide four parks in the District of Columbia.

Mr. TAWNEY. I beg the gentleman's pardon. I did mention it.

Mr. SIMS. I beg the gentleman's pardon; I misunderstood it.

Mr. TAWNEY. I stated that the proposition to purchase various areas in the District of Columbia for public parks is in serious disagreement.

Mr. SIMS. I am glad to hear the gentleman say "seriously in disagreement."

Mr. MANN. Mr. Speaker, I have no doubt that this colloquy is interesting to the gentlemen, but the rest of us would like to know what it is.

Mr. TAWNEY. Mr. Speaker, I have made the motion that the House insist upon its disagreement to the Senate amendment.

The SPEAKER. Is a separate vote demanded upon any amendment?

Mr. KEIFER. Mr. Speaker, there is.

The SPEAKER. What amendment?

Mr. KEIFER. On amendment No. 22.

The SPEAKER. Any other amendment?

Mr. KEIFER. Yes; there are others here. The gentleman from Pennsylvania [Mr. DALZELL] will designate the numbers.

The SPEAKER. Does the gentleman from Pennsylvania ask a separate vote?

Mr. DALZELL. On amendments Nos. 78, 79, and 80.

Mr. KEIFER. And on No. 76 also.

Mr. WILEY of New Jersey. Mr. Speaker, I demand a separate vote on Senate amendment No. 82.

Mr. CRUMPACKER. Mr. Speaker, I ask a separate vote upon the provision relating to the investigation of woman and child labor.

The SPEAKER. What is the number of it?

Mr. CRUMPACKER. I do not have the number.

Mr. PARSONS. Nos. 68 and 69.

The SPEAKER. Is there objection? If not, the vote will be taken on the remaining amendments in gross. The gentleman *from Minnesota* [Mr. TAWNEY] moves to further insist on the House disagreement to the Senate amendment, excepting those on which separate votes have been demanded.

The question was taken; and the motion was agreed to.

The SPEAKER. The Clerk will report the first amendment.

The Clerk read as follows:

Amendment No. 22, to strike out the paragraph reading as follows:

"Transportation of fractional silver coin: For transportation of fractional silver coin, by registered mail or otherwise, $50,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, fractional silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation."

And insert in lieu thereof the following:

Transportation of silver coin: For transportation of silver coin, including fractional silver coin by registered mail or otherwise, $125,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation.

Mr. KEIFER. Mr. Speaker, I move that the House recede from its disagreement and agree to the amendment.

The SPEAKER. The gentleman from Ohio moves that the House recede from its disagreement and concur in the same. The gentleman from Minnesota controls the time.

Mr. TAWNEY. I will yield to the gentleman.

Mr. KEIFER. Ten minutes will be more than I will want.

Mr. TAWNEY. I yield to the gentleman.

Mr. KEIFER. Mr. Speaker, I do not want to rehash the talk that has been going on during this and the last session on the subject of the free carriage by the Government of silver coin. Originally when this bill came in here it made no provision for carrying any silver coin, neither silver dollars nor fractional silver. The bill was amended in the House so as to appropriate $50,000 for the carriage of fractional silver coin. It was my proposition that we should appropriate $120,000, the usual sum appropriated in recent years for the purpose of carrying silver coin generally. The Senate put in this amendment, which I now move to have concurred in, appropriating $125,000 for the free carriage by the Government of silver coin—that is, the carriage of silver dollars and fractional silver coin. This is the exact amount that the Secretary of the Treasury asked this year to have appropriated.

In the general deficiency bill that we passed last night we put in a sufficient sum to carry silver dollars and fractional coin for the remainder of the present fiscal year.

Mr. TAWNEY. I do not think the gentleman is stating that exactly right. We carry a deficiency for the fiscal year 1906 of six thousand and some odd dollars, which deficiency arose in consequence of the express companies not getting their accounts in in time to be closed up under the appropriation.

Mr. KEIFER. Mr. Speaker, my statement was substantially right—providing for a deficiency for the carriage of silver coin of all kinds for the present fiscal year. So that up to the end of this present fiscal year provision has been made in accordance with the appropriations ever since 1881.

Now, my motion is to do just that thing that we have been in the habit of doing, to wit, provide for the free carriage by the Government, not to banks alone, but to all persons in this country who may ask to have silver dollars and fractional silver coin sent to them for use. If we do not do this we are striking the first great blow at silver dollars, of which we have about 560,000,000. We are discrediting them. We will be taking out of circulation about 85,000,000 silver dollars and will have to substitute small paper at greater expense than is proposed by this amendment. The silver dollar is desired by the miner in the coal-mining regions and in all places where oil is being pumped from the earth and handled. It is desired by all miners in the mining regions of the United States, including Alaska, and by the common people throughout the entire West. It is desired by all of the people of the South where labor is carried on. The people use the silver dollar and like it. The opposition seems to come from places where they do not desire it, or perhaps need it; from places like the city of New York, where the people and the banks can get their silver coin without any expense to the party or to the Government, and this is true in other eastern cities. Boston, New York, Philadelphia, Baltimore, and Washington are all places where there are subtreasuries or a treasury of the United States, where silver coin can be obtained by the banks when they want it without cost. These cities have five of the ten subtreasuries of the United States. The other five are at New Orleans, Chicago, Cincinnati, St. Louis, and San Francisco. Now, when you go west of St. Louis there is but one place where there is a subtreasury where silver coins can be obtained, and that is San Francisco; and all that great geographical region west, if they want silver, the people who use it, will have to obtain it at great cost to themselves, whereas the people who are opposing this, from the East, can obtain it without any cost. And, as said by Mr. Roberts, the Director of the Mint, it is essential and necessary in order to keep up our circulation of currency and coin in the United States.

I appeal to the House to do simply that thing which has been done and accepted as proper by the people practically since we had silver coin to a large amount to circulate in this country. It is not, as has been stated on the floor of this House over and over, in order to defeat this provision, an appropriation of $125,000 or $135,000 to carry silver dollars alone; but all that is asked here is an additional appropriation of $75,000; and it will turn out that if this is not done that we will have to provide for a deficiency yet for carrying fractional silver.

In the past fractional silver coin and silver dollars have been carried together, and it has been hard to separate the cost of each separately. The cost is not to be measured by the amount so much as by the cost and the frequency of shipment. There was a little incident that occurred a few years ago called the "Yonkers incident," in which gentlemen say the Government was cheated out of a few dollars in the matter of transporting coin, and that has been the stock in trade of those who are opposed to carrying more silver coin for a great many years. It has been repeated in this session of this Congress, but that incident is of the past and was corrected; and we have been carrying millions upon millions of dollars since without a second incident, so far as I know. The Government should look to it that it makes no contracts by which it will be cheated in the carriage of this money. I wonder they do not urge it now against having any appropriation at all for carrying currency or coin, because by some possibility somebody may do something that is not fair to the Government. I regard this as of great importance to the country, especially to the great Northwest and the South, and to all the people who desire to continue to use the silver. We should not discredit and drive out of use the, about, $85,000,000 now generally in circulation, and which we have by law pledged to keep on a parity with gold.

Mr. Speaker, that is all I desire to submit at this time. There are others who want to be heard on this question.

Mr. TAWNEY. I yield five minutes to the gentleman from Maine [Mr. POWERS].

Mr. POWERS. Mr. Speaker, I hope that the House will recede and concur in the Senate amendment. This provision which the Senate has enacted, or substantially this provision, has been in every appropriation bill for more than twenty-five years. It has for its purpose the sending to distant places in the country of silver dollars, which are very much desired and needed there, and it does help to keep in circulation the silver dollars, of which we have so large an amount coined and piled up in the United States Treasury. That there is now a crying

need in many parts of the country for small bills or silver dollars is evidenced by the provisions of the Aldrich bill, which has just passed the Senate and which, among other things, attempts to relieve that want. I can see no good reason why we should not appropriate for the carriage of these silver dollars, if we appropriate for carrying fractional currency. The same rule, in my judgment, applies to both, and the demand of the people is as urgent for one as the other. Take it in a far-off lumbering country—I mean a locality distant from any financial center, like that in northern Maine, which in part is located in the district that I have the honor to represent—and the people there, the woodsmen, the laborers, the small banks, and others engaged in business, desire to have these dollars, and very many of them are used. They have been carried to them in the past when called for at a very small expense on the part of the Government. It is common knowledge that the Government has a contract with the express companies for transporting money to all parts of the United States, and under this contract moneys are carried much more cheaply than individuals are charged. These silver dollars are not only wanted by the country banks, but they are used by the people in their business relations. Anybody who looks over our country to-day who is conversant with the conditions in the South and in the West, or even away down in the State of Maine, knows that there is a dearth of small bills; knows that silver dollars are demanded with as much force as is the fractional currency, for the transportation of which this bill provides; and if it is good legislation to appropriate to carry the one, I see no reason why it is not proper and good legislation to appropriate to transport the other when the business of sections distant from a subtreasury demand it.

Of course gentlemen who live in large business and financial centers, who represent banks and banking institutions where there are subtreasuries, or where they are in close contact with subtreasuries, can readily and easily get small currency, can readily and easily get silver dollars; but as to the people who, living far away in small towns and cities, have had the privilege for more than a quarter of a century of obtaining this silver, which has been so beneficial to them and has cost the Government so little compared with its profits from the seigniorage, to take that privilege away will work a great hardship. It seems to me that this is a sort of cheeseparing, a sort of saving that ought not to commend itself to the Members of this House. Therefore I hope that we shall recede and concur. Let the same privileges and opportunity to obtain silver dollars which have been extended to the distant parts of the country and to the country banks for the accommodation of the customers and to the merchants and business men of having these silver dollars carried to them, so that the people can get them when desired and needed, still continue to be granted in the future. [Applause.]

Mr. TAWNEY. I yield five minutes to the gentleman from Connecticut [Mr. HILL].

Mr. HILL of Connecticut. Mr. Speaker, may I have the attention of the House for two or three minutes? I am an officer of a bank, and the gentleman from Maine [Mr. POWERS] is an officer of a bank. He asks that in the interests of the banks this $125,000 may be appropriated.

Mr. POWERS. Will the gentleman pardon me?

Mr. HILL of Connecticut. The gentleman said in the interest of the banks and the people.

Mr. POWERS. Yes.

Mr. HILL of Connecticut. Very well. Now, as an officer of the bank, desiring fair play toward the American people, I ask that the Appropriations Committee may be sustained and this amendment may be defeated. The banks of the United States are paid by this Government about $5,000,000 a year to furnish circulation to the people of the country, about 1 per cent profit on all of their circulation, and they have no right to come to the United States Treasury and ask that the people as a whole shall transport their money for them from the Treasury. I think that is a sound proposition, and as a bank officer I repudiate coming to the Treasury and asking for charity or help to transport that money. I repudiate it also because I believe it has developed into a colossal system of graft by the express companies. I deny the statement that the Treasury Department is here asking for this money. Not a report has been made to that effect.

Mr. KEIFER. No report has ever been made that I can remember asking to discontinue it.

Mr. HILL of Connecticut. The gentleman remembers what occurred forty years ago, but not what occurs from day to day now.

Mr. KEIFER. The gentleman from Connecticut is mistaken; I will put my memory against his.

Mr. HILL of Connecticut. I challenge the gentleman.

Mr. KEIFER. It is time for the gentleman from Connecticut to correct his statement, when he says that this is in the interest of the banks alone, when the very terms of it allows any individual to call for the silver coin.

Mr. HILL of Connecticut. Mr. Speaker, I can not allow the gentleman to make a speech in my time. There has not been a report of the Treasury Department for the last ten years which has not opposed or which has favored the free transportation of silver. Of course, when they submit estimates to pay the expenses of the Government they must make an estimate to carry out the legislation of Congress, if Congress sees fit to legislate contrary to their advice.

Now, I want to say this, Mr. Speaker, and I will rest this proposition on this one statement: An attempt has been made to distinguish between the East and the West and the North and the South. Every one of you gentlemen in the South and in the North and in the East and the West who have found difficulty in getting one and two dollar bills, who have been refused them over and over again at your bank, think that you can not get paper money and must take silver dollars. You have been deceived in that proposition in just this respect—that your banks could get silver dollars free of charge, and they had to pay to get the paper money. Now, that is all there is to it, and if you will disagree to this amendment and compel your banks to get you paper money, you will have no trouble to get all the small bills you want. Why? Here is a proposition that you are probably going to act on to-day, which provides for all the small bills the country can possibly need; all you can ask for, all you can wish are provided for in this bill. I refer to the Aldrich bill. But just so long as the banks can have silver dollars transported to them free that bill will do you no good, for the banks will not pay 60 or 70 cents on each thousand dollars express charges, if they can make the Government pay $2.15 a thousand on silver, and thus permit them to escape that expense. If you want small bills, if you want paper money, vote down this amendment.

Mr. TAWNEY. Mr. Speaker, the conferees on the part of the House, in the consideration of this question, felt that in view of the action of the House, it was our duty to insist upon the disagreement of the House to this Senate amendment. Now, what is this proposition? The Senate proposes to give or to appropriate for the transportation of silver dollars more money by this amendment than has ever been appropriated for the purpose in any previous fiscal year. They propose to appropriate $125,000 for this purpose. The beneficiaries of that appropriation are the banks and the express companies. The Government of the United States and the people of the United States are not benefited when they can get small bills with which to transact their business; it is not material to them. But if the banks can have this smaller currency transported at the expense of the Government while their bills must be transported at their own expense, they will continue, when there is a special demand for currency, to call upon the express companies or to make a demand upon the subtreasury to continue its transportation at the expense of the Government alone for their convenience.

Now, Mr. Speaker, I do not believe we can justify the expenditure of this large sum of money for the purpose that does not inure to the benefit of the people—one that does not involve the performance of any governmental purpose whatever.

It is, to say the utmost, merely to provide for the convenience of the banks, and, as the gentleman from Connecticut has said, to continue a monumental graft that is now being practiced by the express companies on the Treasury of the United States. The gentleman from Ohio [Mr. KEIFER] says that we appropriated in the deficiency bill to continue this practice throughout the remainder of this fiscal year. That statement is not correct.

The appropriation carried in the general deficiency bill was not an anticipated deficiency; it is an actual deficiency. The gentleman also spoke of our paying the expense of transporting currency. It may be that he did not stop to think of the fact, but it is a fact nevertheless, that the Government of the United States does not transport free of charge any money for anybody, except silver dollars and fractional silver coin and minor coin. We have amply provided in the amendment which was offered by the committee, and agreed to by the House, for the transportation of fractional silver currency and also for the transportation of minor coin. That transportation the Government of the United States can afford to pay, because it is making a large profit out of the coinage of fractional silver currency and also out of the minor coins—nickels and pennies. But, Mr. Speaker, I do contend that there is no justification for the Government of the United States paying $2.50 for every thousand dollars of silver that any bank wants to have transported to the subtreasury or to itself, and I trust that

this motion will be voted down. I believe that if it is voted down we will finally end the practice of transporting free of charge or at the expense of the Government the silver dollars for the benefit of the banks and the large department stores of this country that are using silver dollars as change and as a medium of advertising.

Mr. KEIFER rose.

The SPEAKER pro tempore (Mr. BURTON of Ohio). Does the gentleman yield?

Mr. TAWNEY. I yield three minutes to the gentleman from Ohio.

The SPEAKER pro tempore. The gentleman is recognized for three minutes.

Mr. KEIFER. Mr. Speaker, I congratulate the gentleman from Connecticut [Mr. HILL] in having made one speech in which he has not exaggerated the cost of carrying the silver dollars by the Government. A few days ago he had it one hundred and thirty-five thousand, and to-day he is modest about it. He still insists that it is the banks that get the benefit of it, whereas it is the people and not the banks that get the benefit of it, and both the gentleman from Connecticut [Mr. HILL] and the gentleman from Minnesota [Mr. TAWNEY] say that we do not carry any coin. I beg their pardon, but I desire to say that we carry all of the coin to different parts of the United States—gold, as well as silver—for the purposes of distribution. We do not carry gold coin in exactly the same way, but we send gold coin and paper money all over the country, to all the subtreasuries or business centers of the United States. If we did not do that we would all have to go to the mints for all our coin, and to Washington, D. C., for our paper currency, and then suffer the inconvenience and great injustice that the gentlemen who oppose this Senate amendment desire the people who believe in the silver dollar and who want to use it will suffer if this amendment is not adopted. I congratulate the gentleman from Minnesota [Mr. TAWNEY] on again calling attention to the single Yonkers incident, about the irregularity of an express company in carrying coin, where the Government was cheated, and insisting that that one instance should be a sufficient reason for striking down a policy of the Government that has existed so long and worked so well. The gentleman says I was mistaken about my statement as to the general deficiency bill. I was exactly right. Reading the bill will show that I was. The language of it shows that we did appropriate, to add to the one hundred and twenty thousand that we appropriated last year, about $18,000 more, to complete the carriage of silver dollars and fractional coins for the present fiscal year.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Ohio that the House recede from its disagreement to Senate amendment 22, and agree to the same.

The question was taken; and the Chair announced himself in doubt.

Mr. KEIFER. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

Mr. TAWNEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. TAWNEY. The question that the House is about to vote upon is upon agreeing to the Senate amendment appropriating $125,000 for the transportation of silver dollars.

The SPEAKER pro tempore. That is the question. The question is, Shall the House recede from its disagreement to Senate amendment 22, and concur.

The question was taken, and there were—yeas 107, nays 151, answered "present" 8, not voting 111, as follows:

YEAS—107.

So the motion was rejected.

The Clerk announced the following pairs:

For the day:

Mr. MORRELL with Mr. WILLIAM W. KITCHIN.

Mr. SOUTHWICK with Mr. LINDSAY.

Mr. RIVES with Mr. VAN DUZER.

Mr. ANDRUS with Mr. BOWERS.

Mr. BARCHFELD with Mr. TALBOTT.

Mr. BARTHOLDT with Mr. HENRY of Texas.

Mr. BIRDSALL with Mr. MCNARY.

Mr. MCKINLAY of California with Mr. BYRD.

Mr. HUFF with Mr. BUTLER of Tennessee.

Mr. BURLEIGH with Mr. MOORE of Texas.

Mr. CONNER with Mr. FIELD.

Mr. HAYES with Mr. MCLAIN.

Mr. KAHN with Mr. RHINOCK.

Mr. MCKINLEY of Illinois with Mr. JOHNSON.

Mr. MARSHALL with Mr. GOLDFOGLE.

Mr. MILLER with Mr. JONES of Virginia.

Mr. MOORE of Pennsylvania with Mr. ROBERTSON of Louisiana.

Mr. VREELAND with Mr. HEARST.

Mr. WILSON with Mr. RICHARDSON of Kentucky.

For the vote:

Mr. COUSINS with Mr. REID.

Mr. WATSON with Mr. SAUNDERS.

Mr. SMITH of California with Mr. PATTERSON of North Carolina.

Until further notice:

Mr. DWIGHT with Mr. FLOYD.

Mr. BUTLER of Pennsylvania with Mr. GARNER.

Mr. BOUTELL with Mr. GRIGGS.
Mr. HUGHES with Mr. STANLEY.
Mr. LORIMER with Mr. HUMPHREYS of Mississippi.
Mr. MADDEN with Mr. HARDWICK.
Mr. YOUNG with Mr. WEISSE.
Mr. FULLER with Mr. HOPKINS.
Mr. LILLEY of Pennsylvania with Mr. GILBERT.
Mr. BINGHAM with Mr. COCKRAN.
Mr. FOSTER of Vermont with Mr. POU.
Mr. AMES with Mr. BOWIE.
Mr. LITTAUER with Mr. LIVINGSTON.
For the session:
Mr. VAN WINKLE with Mr. MCDERMOTT.
Mr. MCCARTHY with Mr. BROOCKS of Texas.
Mr. BRADLEY with Mr. GOULDEN.
The result was announced as above recorded.

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. TAWNEY] is recognized.

Mr. TAWNEY. Mr. Speaker, I move that the House insist upon its disagreeing vote to this amendment and ask for a further conference.

The SPEAKER pro tempore. The gentleman from Minnesota moves that the House further insist upon disagreement to the Senate amendment and ask for further conference.

The question was taken; and the motion was agreed to.

The SPEAKER pro tempore. The next amendment is amendment No. 68. No. 69 is so closely connected with it, if there is no objection, it may be considered with it. Is there objection to the consideration of the two amendments together?

Mr. CRUMPACKER. They ought to be considered together. They are substantially one amendment.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Indiana [Mr. CRUMPACKER].

The SPEAKER pro tempore. The request is made that amendments Nos. 68 and 69, which are inseparably connected, may be considered together. Is there objection?

Mr. UNDERWOOD. Mr. Speaker, I would like to have the amendments reported.

The SPEAKER pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Amendment No. 68:
Page 101, in line 5, strike out "Census Office."
Amendment No. 69:
Page 101, lines 5 and 6, strike out "under the Census Office."

Mr. TAWNEY. Mr. Speaker, if I can have order, I think I can state what the amendment is in a word. When the sundry civil bill was under consideration an amendment was offered by the gentleman from Indiana [Mr. CRUMPACKER] to place the investigation as to women and child workers under the Bureau of Labor. The bill as reported provided for investigations under the Census Office. Now, the Senate has stricken out the Census Office, leaving the investigation to be made under the Department of Commerce and Labor. I yield to the gentleman from Indiana [Mr. CRUMPACKER] five minutes.

The SPEAKER pro tempore. The question before the House is, Is there objection to the consideration of the two amendments together? If there is no objection, they will be considered together.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman from Minnesota [Mr. TAWNEY] a question.

The SPEAKER pro tempore. The gentleman from Minnesota can proceed only by unanimous consent.

Mr. CLARK of Missouri. I ask unanimous consent, then, to ask the gentleman a question.

The SPEAKER pro tempore. Unanimous consent is asked that the gentleman from Minnesota [Mr. TAWNEY] may explain these two amendments.

Mr. TAWNEY. Mr. Speaker, I understand I have the floor on this conference report.

The SPEAKER pro tempore. The Chair will suggest that no motion has been made to recede and concur, and the Chair would further suggest that the request has been made that these two amendments be considered together. Is there objection? [After a pause.] The Chair hears none.

Mr. CRUMPACKER. I had supposed they had been submitted.

Mr. Speaker, I move now that the House recede from its disagreement to the Senate amendment and that the House concur in those amendments.

The SPEAKER pro tempore. The gentleman from Indiana moves that the House recede from its disagreement to Senate amendments Nos. 68 and 69 and concur in the same.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Indiana [Mr. CRUMPACKER].

The SPEAKER pro tempore. The gentleman from Indiana [Mr. CRUMPACKER] is recognized for five minutes.

Mr. CRUMPACKER. Mr. Speaker, the purpose of the Senate amendment is to leave the investigation of women and children in the industries under the control of the Secretary of the Department of Commerce and Labor instead of requiring that investigation to be made by the Census Office. This question was up when the sundry civil bill was before the House for consideration. The law originally authorizing the investigation required it to be done by the Secretary of the Department of Commerce and Labor. It authorized him, of course, as he would have had the power without specific authority, to use any bureau in his Department in making the investigation. The Director of the Census informed the Committee on Appropriations that the Census Office was not fitted or adapted to make this kind of investigations. The Census Office recently published a very excellent report upon children in the industries. It is now engaged in the preparation of a report upon women in the industries. These reports are largely statistical, the only kind of reports the Census Office is qualified to make. The Census Office is peculiarly a census office, a statistical bureau, and this investigation, as, of course, the House knows, is much broader than merely a statistical investigation. It goes into the sociological, the moral, and the educational condition of women and children in the industries. And it seems to me that if the investigation is to be made at all, it ought to be made by the Bureau of Labor. The question ought to be left with the Secretary of Commerce and Labor, and rather than to require the Census Office to make the investigation the appropriation had better be struck out altogether, because in a large measure it must of necessity be a duplication of work that has recently been done, and the result will not be satisfying to those who are promoting the investigation.

It is one of great importance and ought to be in the hands of a bureau that is peculiarly fitted to make this identical kind of investigation. The Administration earnestly asks that the Labor Bureau be charged with this work and responsibility. But the amendment put in the bill by the Senate leaves the whole question to the discretion of the Secretary of Commerce and Labor; leaves it where the original law vested it; leaves it where it ought to be left. And I believe, Mr. Speaker, that the House ought to recede from its disagreement and concur in the Senate amendment. If it can not do that, I believe the appropriation ought to be stricken from the bill; because I believe it will be largely a waste of money. I have the utmost faith in the Census Office. It is a splendid statistical bureau, and its reputation is such that the Government ought to be proud of its work. But statistical work ought not to be commingled and combined with this speculative investigation contemplated by the appropriation carried in the bill. The Census Bureau ought to be free from speculative inquiries. The reports of that office should be impartial, free from opinion, free from bias, color, or recommendation, if its reputation and work are to be valuable for statistical purposes.

Mr. KEIFER. Mr. Speaker, I desire to ask the gentleman whether the Census Office has ever had an investigation of this character, and whether it is not confined to matters of statistics?

Mr. CRUMPACKER. Its work has always been confined to statistical investigations, and the labor office has conducted all the labor investigations that the Government has ever authorized; and, incidentally, valuable reports have been made and given to the public on such questions by the Bureau of Labor.

Mr. TAWNEY. Mr. Speaker, I will now answer the question that the gentleman from Missouri wanted to ask.

Mr. CLARK of Missouri. What I want to know is this, so that Members can understand how they are voting: There is so much confusion you can not hear anything. Now, if we vote for the Crumpacker motion and it carries, then this work is to be done by the Labor Bureau?

Mr. CRUMPACKER. No.

Mr. TAWNEY. I will answer the gentleman's question. It will then be done by the Department of Commerce and Labor, and under the law the Department of Commerce and Labor is authorized to utilize the Bureau of Labor or the Census Bureau; and then, in addition to that, the law is so loosely drawn that it is construed to give the Secretary authority to employ agencies other than those two Bureaus for the purpose of making this investigation.

Mr. CLARK of Missouri. Then if we vote down the Crumpacker motion, then we go back to your position and say that it shall be done by the Census Office?

Mr. TAWNEY. Not necessarily. We ask the House to further insist on disagreeing to the Senate amendment. Then it would go back to conference again, and the House would not

lose an opportunity to vote on the proposition later on as they may see fit to.

Mr. CLARK of Missouri. Now, one more question. If the Crumpacker motion prevails, then the Secretary can have it done by either one of the two Bureaus?

Mr. TAWNEY. Then he will be able to have it done by either one of the two Bureaus or any outside agency he may see fit to employ.

Mr. CLARK of Missouri. And if your motion prevails, it will have to be done by the Census Bureau?

Mr. TAWNEY. It will have to be done by the Census Bureau, provided the Senate recedes.

Mr. SLAYDEN. I should like to ask the gentleman a question.

Mr. TAWNEY. I yield to the gentleman.

Mr. SLAYDEN. If the Senate amendment prevails, then it would open up the possibility of having it done at an additional cost, possibly the creation of an additional bureau, demanding an additional appropriation; and that would not be necessary if it was done by the Census Bureau?

Mr. TAWNEY. That is exactly what it means.

Mr. SLAYDEN. Then I am with the chairman of the committee.

Mr. TAWNEY. I now yield three minutes to the gentleman from New York.

Mr. FITZGERALD. Mr. Speaker, the question before us is very simple. If the motion of the gentleman from Indiana prevails, the Secretary of Commerce and Labor is given discretion to have the condition of woman and child labor investigated as he sees fit. If the motion is voted down, the amendment goes back into conference. The House, when the bill was before it, voted to place this work on the Census Office. It did that because the committee, after a complete investigation, determined that the Census Office was the only bureau of the Department of Commerce and Labor that was equipped to do the work.

Mr. CLARK of Missouri. I would like to ask the gentleman from New York a question.

Mr. FITZGERALD. I yield to the gentleman.

Mr. CLARK of Missouri. Did not the Director of the Census state that his office was not equipped to do this work, and that he did not want to do it, and did not want it loaded onto him?

Mr. FITZGERALD. I will reply to that in my own way. The Director of the Census in effect stated this: That his Bureau had been compiling facts and publishing information that was accurate; that the public had confidence in the reports of his Bureau; that the information sought to be acquired by this investigation was of such an uncertain character that he feared if his office was charged with the obligation of doing the work, that it would seriously impair the confidence of the public in the reports made by his Bureau in other investigations.

It is easy to understand his statement that he did not desire to do the work, because the President has stated that he did not want the Census Bureau to do it. The Secretary of Commerce and Labor has stated that he did not want him to do it. The Commissioner of Labor insists that his Bureau is the proper bureau to do the work. The question for the House to determine, with all the information before it, is which bureau will most efficiently and economically do the work. I merely wish to say one word with regard to a certain statement that has been issued as to the motive that is behind the effort to compel the Census Bureau to do the work. It is not a reflection on the Bureau of Labor; it is not intended, as has been charged, as a penalty upon the Bureau for doing certain other work, but the action of the committee was based upon the conviction, which was made certain by all the evidence before it, that the only bureau of the Government that has the facilities to do the work is the Census Bureau.

The Commissioner of Labor himself admits that he had not the facilities to do this work, and that if he is charged with it he will have to spend months in the most important cities of the country in perfecting an organization. I believe the preliminary work of organizing his bureau will take as long as it would take the Census Bureau to complete the investigation. Nobody has charged that the Census Bureau has been inefficient in other work heretofore imposed upon it. Nobody has complained that it has been partial in its investigations. It has so done the work committed to it that it has earned the confidence of the entire country, and for one I am heartily in favor of imposing this investigation upon that bureau, because I believe it will do the work better than any other bureau.

Mr. TAWNEY. I yield to the gentleman from Missouri [Mr. CLARK] three minutes.

Mr. CLARK of Missouri. Mr. Speaker, I do not really know whether this squabble is very important or not, but one thing I do know, and that is that child labor in factories ought to cease. It has dwarfed the English laboring people to such an alarming extent that a systematic governmental inquiry has been instituted to discover some remedy for the physical decadence of English men and women. Child labor in factories will dwarf our laboring people. We should put a stop to it before it is everlastingly too late; and surely we should have the facts. I do not care very much what the President of the United States wants, or the Secretary of Commerce and Labor or the Director of the Census. It seems to me, however, expressing my own opinion and not undertaking to express the opinion of anybody else, that it is the difference between putting this investigation into friendly hands and unfriendly hands; and on that proposition the President and his Secretary of Commerce and Labor happen to be right.

Mr. SMITH of Iowa. Does the gentleman suspect the Census Bureau of being unfriendly?

Mr. CLARK of Missouri. That is exactly what I do, under the circumstances.

Mr. SMITH of Iowa. Have you any reason for suspecting the Bureau of the Census to be unfriendly?

Mr. CLARK of Missouri. I do, because it did not want to do the work. It is but human nature that if you or I or any of the rest of us are set to do a task that we really want to do, we will do it with a great deal more enthusiasm and thoroughness than if we are set to do another task that we do not want to do. The Director of the Census says they are not situated to do it. He ought to know. These other people do want to do it, and I am in favor of giving them a chance. None of them can do anything except collect the facts, and facts are what we want. Nobody cares anything about what the opinion of some one is. What we want is the facts. These facts properly presented will give the various State legislatures information on which to act.

Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. CLARK of Missouri. Yes; certainly.

Mr. FITZGERALD. Does the gentleman from Missouri think he ought to vote to put this work in charge of a bureau the head of which admits that he has neither the organization nor the facilities to do the work?

Mr. CLARK of Missouri. I will answer that question in this way: While he says that, the Director of the Census says he is not fixed to do it.

Mr. FITZGERALD. He did not say exactly that.

Mr. CLARK of Missouri. If he did not say that, I should like to know very much what he did say.

Mr. CRUMPACKER. He said that the organization of his office was not adapted to doing it. He said he did not know anything about that kind of an investigation himself and he could not prepare for it.

Mr. CLARK of Missouri. That is exactly the situation. I do not mean that the Census Bureau is unfriendly to finding out the truth about it, but I do say that the Census Bureau in this particular juncture is unfriendly to this investigation. It does not want to undertake the work, and the work should not be forced upon it. That is all I have to say about it.

Mr. TAWNEY. I yield two minutes to the gentleman from Massachusetts [Mr. SULLIVAN].

Mr. SULLIVAN. Mr. Speaker, I do not think the House has any reason to apprehend that the Director of the Census will not perform his duty if the law imposes upon him the obligation of doing this work. It is true it is a new work for him. It is equally true that it would be a new kind of work for the Bureau of Labor. It is also true that the Census Office has compiled statistics heretofore and is better equipped than the Bureau of Labor for doing that kind of work. There is no reason why the Bureau of the Census can not do the work better than the Bureau of Labor, because it is an older organization and a better-equipped one. Although the Director of the Census did say it was new work, which he would not like to undertake and that his Bureau was not adapted for the doing of it, his statement did not carry conviction before the committee, for he gave the committee no reasons for that conclusion, and the committee believed that not only was his Bureau adapted for it, but that it was better adapted for it than any other agency of the Government.

Now, the House can choose, if it will, to create a new organization at a greater expense to the taxpayers or have the work performed cheaper by an organization already in existence. The House the other day voted by a large majority to put this work under the Director of the Census. Since that vote was taken no new reason has grown up why we should reject the previous conclusion, except the insistence of the executive department of the Government that the law shall

be bent according to its will, and that, I submit, is not a sufficient reason to cause this House to reverse its previously recorded judgment. [Applause.]

Mr. TAWNEY. Mr. Speaker, I now yield three minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. I will be corrected if I am not right in this, that the census is now under the direction of the Department of Commerce and Labor. That being conceded, what we are proposing to do is to direct the Secretary of Commerce and Labor, through the Census Bureau, one of the bureaus under that Secretary, to make this investigation. Now, I think the bill as it comes to us amended from the Senate is exactly right, and if I am right in my statement—and no one seems to controvert it—then if we agree to the motion of the gentleman from Indiana to recede from our disagreement and concur in the Senate amendment, it will leave the Secretary of Commerce and Labor to make this investigation according to his own best plan, and he might even do it under the Census Bureau.

We are undertaking to tell him how he is to carry out the provisions of the act of January 29, 1907, a provision that requires an investigation into the condition of women and child workers in the United States, one of the most important laws perhaps that this or any other Congress has ever passed, important in its ultimate results on the condition of humanity in the United States. I therefore insist that to adopt the motion of the gentleman from Indiana is simply to authorize the Secretary of the Interior to build up whatever machinery is necessary under him to carry out this required investigation.

Mr. TAWNEY. Mr. Speaker, I want to say just a word in conclusion in regard to this amendment. When this amendment was offered on the floor of the House last week in the Committee of the Whole it was voted down by a vote of 98 to 34. The conferees on the part of the House therefore felt that it was their duty to return to the House and report a disagreement instead of agreeing, even had we been disposed to agree, to the Senate amendments.

Mr. CRUMPACKER. Will the gentleman yield for a question?

Mr. TAWNEY. I will.

Mr. CRUMPACKER. Is it not true when this amendment was proposed, when this bill was before the Committee of the Whole House, that it was not the present amendment, but one to strike out the Census Office and substitute the Bureau of Labor; and this simply strikes out the Census Office and leaves it with the Department of Commerce and Labor?

Mr. TAWNEY. The gentleman has stated the facts correctly; but it is only fair to say that while the amendment comes back from the Senate to the House in the form it does it is not, in substance, different from the amendment offered by the gentleman from Indiana. In fact, it is in effect the same amendment. Every person, every Member of this House, knows that those who are opposed to this investigation being made by the Census Bureau intend and propose to have it made by the Bureau of Labor. Now, as the gentleman from Ohio has said, this investigation under the law is placed in the Department of Commerce and Labor. The law does not stop there; the law simply declares that the head of the Department may utilize the Census Bureau and the Bureau of Labor. The law also contains other language which is construed to confer upon that Department authority to employ any independent agency to make that investigation.

Now, Mr. Speaker, the thought of the House undoubtedly was, as expressed in the vote a few nights ago, that inasmuch as the Census Bureau now has an organization of intelligent special agents, clerks, and other people eminently qualified to make the investigation, and in view of the fact that the Bureau of Labor has no organization at all and will necessarily have to create a new orgnization for the purpose of carrying on this investigation, to place the investigation under that Bureau would lead to an enormous unnecessary expense. For this reason, sir, it was thought best to leave this investigation under the Census Bureau, as the Committee on Appropriations recommended.

Mr. UNDERWOOD. Will the gentleman yield?

Mr. TAWNEY. Certainly.

Mr. UNDERWOOD. I want to ask the gentleman if this is not the difference in that proposition—that if it is left to the Census it will be a mere statement of facts; if it is left to the Bureau of Labor, it will be an investigation that will wake the country up to legislation to protect women and children. Is not that the real difference?

Mr. TAWNEY. Why, I am surprised at the want of information manifested by the gentleman from Alabama in the question that he has asked.

Mr. UNDERWOOD. Wherein is the want of information?

Mr. TAWNEY. The want of information is as to what the law requires this investigation to be. The law specifies the character of the investigation. It can not be determined by the character of the work now being done by that Bureau, and it is only a question of which agency of the Government shall be employed for the purpose of finding that information. It does not necessarily mean statistical information alone if you confine it to the Census Bureau. The men employed in the Census Bureau who are engaged in gathering statistics in regard to manufacturing industries are sufficiently intelligent to acquire information regarding the manufacturing industries of the country; and what sense is there, what justification is there, for Congress to require that when a man goes into a factory one day to gather information which he is authorized to obtain that he shall then cease that investigation, leave the factory, and then be followed by another man from another bureau in the same Department the next day to obtain the information which is required under this law?

Mr. UNDERWOOD. Because the gentleman well knows it is discretionary with the agent to make the kind of a report that he expects to make. The Census Bureau will report statistics, and if you leave it to the Bureau of Labor it will report facts. It will show where these women and children are being ground down, and the Census report will not show that. That is why this investigation ought to be made by the bureau that will show the country what is actually happening.

Mr. TAWNEY. I am surprised that the gentleman from Alabama is unable to comprehend the duty the law imposes upon the bureau that is charged with making this investigation, I care not whether it is the Census Bureau or the Bureau of Labor.

Mr. MANN. Will the gentleman yield?

Mr. TAWNEY. I do.

Mr. MANN. Is it not a fact that in the past and at the present time the Census Bureau in making various reports makes reports covering the whole scope of the subject, without confining itself to statistical information alone?

Mr. TAWNEY. That is absolutely the fact, and the last two bulletins published by the Census Bureau disclose that fact.

Mr. MANN. Is it not a fact that in such matters as reports upon chemicals, those reports cover the whole scope of the subject, a thorough report not upon statistics, but upon the subject-matter, and that these reports are considered the standard reports in the United States covering the whole scope of the subject?

Mr. TAWNEY. That is absolutely true.

Mr. KEIFER. Mr. Speaker——

The SPEAKER pro tempore. Will the gentleman yield?

Mr. TAWNEY. I yield to the gentleman from Ohio for a question.

Mr. KEIFER. I wish to ask the gentleman, in order that the House may know, whether there is anything in the act of January 29, 1907, that requires a statistical report at all, and whether it is not confined wholly to the matter of conditions—that is, relating to the industrial, social, moral, educational, and physical condition of women and children workers—and whether he can find anything in that act that relates to any matter that is statistical, as is usual in the matter of the Census Bureau?

Mr. TAWNEY. In respect to the question of the gentleman from Ohio [Mr. KEIFER], I will say that it is just as competent for the representatives of the Census Bureau to inquire into the things mentioned in that law as it is for the representatives of the Bureau of Labor or any outside organization that may be brought in for the purpose of making its investigation.

Mr. PRINCE. Mr. Speaker, will the gentleman yield for a question?

Mr. TAWNEY. I do.

Mr. PRINCE. Is it not a fact that the same Cabinet officer directs this investigation, whether it is through the census or through the other bureau?

Mr. TAWNEY. That is true.

Mr. PRINCE. And if there is any question about going into the merits of it, it falls upon the Cabinet officer, and no one else, in failing to make the report.

Mr. TAWNEY. That is a fact.

Mr. MANN. If this work should be done by the Census Office, is it the intention, as insinuated by the gentleman on the opposition, to have the work done by the tabulating machines in the Census Office?

Mr. TAWNEY. I don't think I need to answer that question, Mr. Speaker. Mr. Speaker, I call for a vote.

The SPEAKER pro tempore. The question is on the motion

of the gentleman from Indiana, that the House recede from its disagreement to Senate amendments numbered 68 and 69 and concur in the same.

The question was taken; and on a division (demanded by Mr. CRUMPACKER) there were—ayes 55, noes 87.

So the motion was rejected.

Mr. TAWNEY. I move that the House further insist upon its disagreement to amendments numbered 68 and 69.

The question was taken; and the motion was agreed to.

The SPEAKER pro tempore. The next amendment to which there is disagreement is numbered 76, which the Clerk will read.

Mr. KEIFER. I called attention to that for a separate vote, and somebody said the matter had been adjusted.

Mr. TAWNEY. That is included in the report which has been adopted.

Mr. KEIFER. Then it is already adopted.

The SPEAKER pro tempore. Seventy-eight is the next Senate amendment, and the Clerk will report the same.

The Clerk read as follows:

Page 15, line 10, insert, after the word "hundred," the words "and fifty," so as to read: "$250,000."

Mr. DALZELL. Mr. Speaker, I move that the House recede from its disagreement to amendment numbered 78 and agree to the same.

The SPEAKER pro tempore. The Chair would suggest the amendment now under consideration is numbered 77.

Mr. TAWNEY. No. 77 is embodied in the report which has been disposed of.

The SPEAKER pro tempore. The Chair was in error. The gentleman from Pennsylvania moves that the House recede from its disagreement numbered 78 and concur in the same. Does the gentleman from Minnesota yield to the gentleman from Pennsylvania?

Mr. TAWNEY. I yield five minutes to the gentleman from Pennsylvania.

Mr. DALZELL. Mr. Speaker, the paragraph to which the amendment is made is that—

For the continuation of the analyzing and testing of the coals, lignites, and other mineral fuel substances belonging to the United States, in order to determine their fuel value, etc., under the supervision of the Director of the United States Geological Survey, $200,000.

The Senate has amended by adding "and fifty," making the total appropriation $250,000. The appropriation for the current year in the sundry civil bill is $250,000. The amendment offered in the House was for $250,000, but $50,000 was stricken out upon the motion of the gentleman from Minnesota upon the statement that a considerable amount of equipment had been purchased during the current year, and for that reason the appropriation was not required to be so great for the next as for the current year. Now, Mr. Speaker, I have made an investigation of the matter, and I find that the statement of the gentleman from Minnesota was in error. The total amount expended for equipment during the current year was less than $25,000, and the estimate for equipment to be purchased in the coming year is in excess of $35,000. In addition to that I find that there are some special reasons why this appropriation should not be less than it is for the current year. For instance, a number of tests are to be made in connection with the Naval Department for the manufacture and use of briquettes on the naval vessels; and investigations are in progress as to the spontaneous combustion of coals in storage, for which it is estimated there will be required at least the sum of $30,000. Then there is, in addition, to continue special investigations of coal and lignites on the public lands, for which an estimate is made at $25,000. Then there is a special investigation of very great importance in connection with the explosions in coal mines and loss of coal and loss of life, for which $25,000 is estimated as necessary. I am told that over 4,000 men were killed in explosions in coal mines in the United States during the past year, and coal to the amount of millions of dollars' worth was lost. Now, Mr. Speaker, it is not necessary that I should say anything about the necessity and the value of these coal tests. That question has already been passed upon, and it is simply a question of the amount of money to be appropriated. The $50,000 which the Senate has now added to the House appropriation makes the appropriation the same as for the current year. The reason why the $50,000 was cut off in the House, as given by the gentleman from Minnesota, turns out to have been an error. It turns out, in other words, that the necessity for the appropriation for the next year should be as much as for the current year, and, if these estimates be taken into account, larger than for the current year. For that reason I think the House ought to concur in the Senate amendment.

Mr. TAWNEY. Mr. Speaker, the gentleman from Pennsylvania in stating the situation in respect to this $50,000 addition, or the Senate amendment appropriating $50,000 in addition to the amount carried in the bill as it passed the House, said that the estimate was reduced $50,000 in the House upon the statement of the "gentleman from Minnesota," that a large part of that appropriation for the current fiscal year had been expended for the purchase of equipment, and upon that statement the House reduced the appropriation to $200,000, or the exact amount which by the Senate amendment it is proposed to increase the appropriation. And then the gentleman from Pennsylvania says further that he has since made an investigation and he finds that the statement of the "gentleman from Minnesota" was erroneous. Now, I want to give the House the facts in regard to this matter, and let the House judge as to whether the statement of the "gentleman from Minnesota" or the gentleman from Pennsylvania is in error. The gentleman from Pennsylvania, in discussing this proposition when this bill was under consideration in the committee of the whole last week, said:

With respect to these fuel tests, if the committee will turn to page 572 of the hearings before the Committee on Appropriations of last year, 1906, it will find outlined in those hearings a complete programme for these fuel investigations, and the statement made that the completion of this programme would require several years. After that testimony was submitted to the committee an appropriation was made for $250,000, and immediately after the passage of the appropriation a new equipment, estimated for, was purchased, the necessary additional experts were employed, and the investigations, necessarily modified in accordance with the wording of the appropriation act, were inaugurated.

The statement referred to came from the gentleman from Pennsylvania [Mr. DALZELL] and not from the "gentleman from Minnesota."

Mr. DALZELL. Will the gentleman allow me?

Mr. TAWNEY. Just a minute. I want to complete this. On the next page of the CONGRESSIONAL RECORD, page 3894, the Members of the House will find:

Mr. TAWNEY. Mr. Chairman, I move now to reduce the appropriation to $200,000.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

"Strike out the word 'fifty;' so that it will read '$200,000.'"

Mr. TAWNEY. Now, Mr. Chairman, I do that upon the statement of the gentleman from Pennsylvania—

It was not done on my statement. It was done on the statement of the gentleman from Pennsylvania—

that out of the current appropriation of $250,000 the Geological Survey has bought very expensive machinery for carrying on these tests. It is therefore manifest that they will not need $250,000 for the service if the service is continued during the next fiscal year.

Mr. DALZELL. Will not the gentleman allow me a moment?

Mr. TAWNEY. In just a moment. I want to complete the statement. But, Mr. Speaker, the statement of both the gentleman from Pennsylvania and myself was correct. I now read from House Document No. 691. In the estimates submitted to the last session of Congress for this indentical purpose it reads as follows:

*For analyzing, etc.: Coal, lignites, etc.*—For the investigation of the coals, lignites, and other fuel substances of the United States, in order to determine their fuel values, etc., under the supervision of the Director of the United States Geological Survey, and at such places as he may deem most advantageous (sundry civil act, Mar. 3, 1905, vol. 33, p. 1187, sec. 1), $200,000.

Two hundred thousand dollars was the estimate for the investigation. Following that:

For the removal of the plant and necessary equipment, $50,000.

That was the estimate—$200,000 for the investigation and $50,000 for the purchase of equipment for making the investigations—and upon that basis Congress appropriated $250,000 for this service. But when the amendment was offered by myself, the gentleman from Pennsylvania said:

Mr. Chairman, on the statement of the gentleman from Minnesota, I accept the amendment.

That statement was a repetition of his own statement that a large amount of the money appropriated for the current fiscal year for the investigation was for the specific purpose of purchasing equipment, and that appropriation was based upon the estimate submitted, and now it is proposed by the gentleman from Pennsylvania [Mr. DALZELL] to appropriate for this purpose $50,000 more than has ever been appropriated for the testing of coals and fuels in any one fiscal year. I now yield to the gentleman.

Mr. DALZELL. Mr. Speaker, I do not wish to be put in the position of doing an injustice to the gentleman from Minnesota. I freely concede that the statement he made to the House was based upon a prior statement made by me. The statement made by me on which the gentleman based his statement I have since found to be erroneous. I concede also that the concession that I made with respect to this appropriation when the gentleman

offered his amendment was made upon the statement as made by him, and that that statement turns out to be erroneous. So that, going back again, perhaps I was the party that made the first erroneous statement, but all the subsequent action of the House was based upon that statement; and I say now that, after a full investigation, I find that that statement was erroneous, and that all the reason that existed as to why we should have an appropriation of $250,000 for the current year in the current sundry civil bill exists for the having of that appropriation for the coming year in the sundry civil bill, and it is in answer to those necessities, as demonstrated by the work of this Commission, that the Senate has inserted what ought to have been kept in in the House—the $50,000—so that our appropriation ought to be just as the Senate has made it, namely, $250,000, and for that reason the House ought to concur in the Senate amendment.

Mr. TAWNEY. Mr. Speaker, in reply to the gentleman from Pennsylvania, I will say that it matters not to me how much investigation he has made since this House acted upon this proposition; and it matters not from whom he obtained his information, the appropriation of $50,000 was made at the first session of this Congress for the current fiscal year for buying an equipment with which to make this investigation, and now it is proposed to increase the appropriation for the investigation, because the appropriation during the current year is $250,000. I call for a vote.

Mr. UNDERWOOD. I ask the gentleman to yield to me for a few minutes.

Mr. TAWNEY. I call for a vote.

Mr. UNDERWOOD. Then I make the point of no quorum. If the gentleman does not yield me five minutes on this subject, he can bring in his quorum.

Mr. JAMES. I ask unanimous consent that the gentleman may have some time.

The SPEAKER pro tempore. The time is under the control of the gentleman from Minnesota.

Mr. TAWNEY. I will yield to the gentleman; I thought he wanted to ask me a question.

Mr. UNDERWOOD. Then I will withdraw the point of no quorum.

The SPEAKER pro tempore. Does the gentleman withdraw the point of no quorum?

Mr. UNDERWOOD. I do.

The SPEAKER pro tempore. The gentleman from Alabama is recognized for five minutes.

Mr. UNDERWOOD. Mr. Speaker, I feel a great deal of interest in this appropriation to be given for an investigation of the fuel products of the country. There are a large number of coal mines in my district, and I am candid to say that I feel this appropriation is of great importance to the people I represent. Testing the coal is not merely a question of developing an individual industry, but it is for the purpose of developing the coal business of the United States. As I have stated before in this House, the European governments have a government test of coal. When the collier of Great Britain sends his coal to South America, it goes there with a government test. When the captain of a ship enters a port to buy his coal, he has that government test lying before him, and he knows exactly how much fixed carbon and how much fuel material there is in that coal. When the coal of the United States goes to a South American port, you can send the test of an individual chemist, the chemist of the company, but it carries no official authority with it. The result is that our coals are always discriminated against in foreign ports; and the only effort that has been made along this line of testing coal at all is this recent effort on the part of the Geological Survey. Now it is doing great good.

Mr. SULLIVAN. Does the gentleman understand that this appropriation will supply the kind of service he mentions, namely, testing coal for export?

Mr. UNDERWOOD. I do not contend at all that this is an effort to test coal for export. Now, what I do say, and what is evident, is that this experiment goes to my district and goes to the district of the gentleman from Pennsylvania and goes to the districts of the West. It tests the coal that comes not out of a particular set of mines, but of a particular country. Coals are marked in their character. Say the Pratt seam will be investigated, and if the coal comes out of the Pratt seam it gets the Government certificate. That does not indicate from what mine it comes, but what is represented by that seam of coal. Now, I yield to the gentleman from Kansas.

Mr. CAMPBELL of Kansas. Can the gentleman from Alabama cite a single instance in which these coal tests have been of practical value to the country?

Mr. UNDERWOOD. Well, I will say to the gentleman that in his own country my understanding is that the effort on the part of these people to take the lignite coals of the West and convert them into briquettes has proved successful and demonstrated that a good fuel material can be made out of coal that was not useful heretofore.

Mr. CAMPBELL of Kansas. I will state to the gentleman from Alabama that the only test made of the coal in my section of country—and we have great quantities of it there, and we know what it is good for, and knew that before the creation of this Bureau—I think the only Government test of the coal from there is an alleged test the result of which was to publish to the world that our coal was not a coke-bearing coal. This was done in face of the fact that we then had coke ovens and a large coke industry in that district.

Mr. UNDERWOOD. Well, I will state to the gentleman that there is coke and there is coke, and you can make coke out of almost any coal; but you can make coke that when you put it into the furnace it has not strength to bear the burden, and those cokes are practically no good. I do not know anything about the test. It may be that your coal has so much sulphur in it that it would make a weak coke. It would not appear to be different when you had it in your hand, but when the burden is put on top of it it would not bear it, and that is the very purpose of this investigation, and shows that they have accomplished something there.

Mr. TAWNEY. I yield three minutes to the gentleman from Texas [Mr. SLAYDEN].

Mr. SLAYDEN. Mr. Speaker, touching the question of equipment for this coal investigation, I want to speak for just a moment. The importance of it is hardly questioned by anyone. We all know that the President of the United States, whom I do not always accept as the best and highest authority upon all questions, has recently recommended, and very wisely, as I think, that the immensely valuable coal lands owned by the Government should be so handled as to return the best possible dividend to the people, who own them. It is highly desirable that the country should be advised of the value of those lands, and nothing will so well develop that value as the work done by the Survey.

Now, as to the equipment. Less than $25,000 has been expended in the present equipment for this coal testing. I think the gentleman from Pennsylvania [Mr. DALZELL] was rather unfortunate in his remarks about it when this bill was under discussion in the House. Less than $25,000 has been expended. In addition to that, having had put upon them the burden of investigating about 50,000,000 acres——

Mr. TAWNEY. Will the gentleman from Texas permit a question?

Mr. SLAYDEN. Yes.

Mr. TAWNEY. From what paper is the gentleman reading?

Mr. SLAYDEN. A memorandum.

Mr. TAWNEY. Prepared by the gentleman himself?

Mr. SLAYDEN. No, Mr. Speaker, I went to the authorities on that subject. The gentleman's sneer can not overturn the fact that reputable and honorable gentlemen, who have no personal interests to serve in this matter, have not in the whole course of their lives and will not now tell falsehoods in order to get an appropriation to aggrandize their bureau.

Mr. Speaker, having had put on them, as I started to say, the duty of investigating about 50,000,000 acres of the public lands supposed to be underlain with coal, they will require an additional equipment of the value of about $35,000 and a certain increase of ten or fifteen thousand dollars, I believe, for chemical and laboratory materials.

I believe that this is a wise appropriation to make. I believe it is in the interest of all the people that it should be made. I believe it tends to make them appreciate, and to make the world appreciate, the value of one of their greatest assets, and that it is good common sense and good business policy to make the appropriation, as recommended by the Senate.

Mr. TAWNEY. I yield five minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL of Kansas. Mr. Speaker, I am opposed to the amendment and to the entire appropriation, for the reason that I contend that the work alleged to be done is of no practical value to the country. We were burning coal in this country for many years prior to the St. Louis Exposition. We knew then that there were conditions under which coal dust would explode, and that there were dust explosions in coal mines. We knew that there was coke-bearing coal; we knew that there was noncoke-bearing coal; we knew that there was coal that was serviceable to the Navy; we knew there was other coal that was not serviceable to the Navy, and it is not shown by anyone that the Navy has accepted or rejected coal because of these tests. No man in favor of this appropriation can point to a single practical test that has been made that has been of service to the whole country. It may be that tests that have

been made have been of practical service to some particular coal field or some particular section of the country that produces coal; but upon the whole no one who is supporting this proposition has pointed to a practical test that has been made that is of substantial value. Now, while this bureau—for it is now a Bureau that is to be permanently saddled upon the country—was making its coal tests at the St. Louis Exposition, which were intended to be temporary and to have an existence only during the lifetime of the exposition, a coal producer in my district offered a carload of coal out of the coke-producing section of that coal field for the purpose of having a test made. He was ignored. A carload of coal from Kansas, 18 miles away from the coke-bearing coal, reached the testing plant at St. Louis. A test was made and a bulletin was published stating that Kansas coal was not a coke-bearing coal. The gentlemen in charge of the tests had no information as to what part of the coal field this coal came from. They simply knew that it was a carload of coal that reached them from the large coal field of Kansas. They made an alleged test and then published a bulletin, containing the statement that Kansas coal would not make coke. As a matter of fact we had a town we call Cokedale, in Cherokee County, Kans., where at the time this bulletin was published there was a large string of coke ovens producing coke. The coke was sold and being burned everywhere in that part of the country. Since the issuance of this bulletin the ovens at Cokedale have shut down because a Government bureau said Kansas coal would not produce coke.

Now, I would like to hear some who favor this appropriation say, before this vote is taken, that these tests are of practical value to the country.

Mr. TAWNEY. I now yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, unlike the gentleman from Kansas [Mr. CAMPBELL], I have no grievance against the work or the reports of the operations of this Bureau. On the contrary, I believe they have been doing a very good work; at least, that the greater portion of the work that they have been carrying on is exceedingly useful, and that their reports in the main have been just and fair and in accordance with the facts.

But in passing upon this matter we must take into consideration not only the character of the work, the amount which may be necessary to carry it on, but we should also take into consideration the decision of the House in regard to other work of the Geological Survey, and the decision that the House arrived at when this matter was first under investigation.

Most of the appropriations of the Survey have been reduced by the united action of the two bodies, indicating an intent on the part of Congress to somewhat limit the activities of the Geological Survey along various lines. The House has already passed upon this particular matter and has passed upon it with the full knowledge, in my opinion, of the facts in the case. It is true that a considerable portion of the appropriation last year was used for the purchase of machinery, and I am of the opinion that a less amount will be required or should be used for that purpose next year. I think it is very much better if this work is to be continued, that it should be continued with a reasonable appropriation, an appropriation sufficient to carry on the work along proper lines, rather than with a temporarily increased appropriation above the amount given for other branches of the service, resulting in all probability in a successful effort to reduce it or wipe it out at the next Congress.

If I were of the opinion that the gentleman from Texas seems to be, that the activities of the Bureau have been directed toward advising the action that has been taken in regard to the public coal lands of the country, I should vote against the appropriation in toto; and if the present policy of the Interior Department relative to the coal lands of the Government continues with the advice of this Bureau, I shall be compelled to oppose the appropriation of a single dollar in the future for this kind of work.

Mr. SLAYDEN. Will the gentleman from Wyoming allow me an interruption?

Mr. MONDELL. Yes.

Mr. SLAYDEN. I want to say to the gentleman that he evidently misunderstood me. I did not say that the activities of the Geological Survey had led to the position of the President with reference to coal lands. I meant to convey the idea that the action of the President had increased the activities on the part of the Geological Survey.

Mr. MONDELL. I practically understood the gentleman. I want to call his attention to the fact that the orders withdrawing practically all the national coal lands from entry have prevented all coal development in the West, and whatever good this Bureau may have done in the last year, if it had anything to do with proposing that policy and advocating it, or recommending it, it would have been infinitely better for the West had there been no Bureau of this sort or kind created. To-day, in the face of an increasing demand for coal, all public coal lands are withdrawn from entry, tied up absolutely, creating a monopoly in the hands of those who are already operating coal mines, making it possible for them for the first time in the history of our western country to increase the price of coal at the mines above a reasonable profit above the cost of mining.

This is the condition we find ourselves in to-day, and if this bureau had anything to do with bringing about that condition of affairs, brought about by repeal of the coal-land laws of the land by Executive order, I shall regret that I ever favored one dollar of appropriation for this purpose.

Mr. Speaker, the work which has been carried on under this appropriation has been a highly useful and beneficial work. The men who have had it in charge are most earnest, capable, and efficient men, as in fact are most of the men in charge of the work of the Survey in all branches; but I am not in full sympathy with all the lines of work contemplated for the future, and especially am I not in sympathy with what seems to be a tendency through Government bureaus to commit the Government to permanent paternalistic and socialistic policies.

Mr. TAWNEY. I now yield to the gentleman from Massachusetts [Mr. SULLIVAN].

Mr. SULLIVAN. Mr. Speaker, none of the arguments which have been made to sustain the appropriations for gauging streams and the making of topographical maps and surveys are available for the purposes of this discussion. The matter of investigating the quality of coal is not a national one in any sense of the word, but is purely a local question. It is a question which affects the States and the owners of coal lands in those States. The attempt to increase this appropriation, it seems to me, ought not to be made now. The House conferees have very generously made a concession in agreeing to an appropriation of $200,000, and it seems to me that the House ought to sustain the committee in that regard and not pile upon the appropriation $50,000 more.

Mr. UNDERWOOD. Is not the appropriation as it comes back here just as it was when it went out of the House? It passed the House for $200,000.

Mr. SULLIVAN. And the amendment now is to increase it $50,000.

Mr. UNDERWOOD. Yes; and the conferees have not yielded to anything, nor has the committee yielded to anything.

Mr. SULLIVAN. Mr. Speaker, this is simply another attempt to put upon the Government an expense which properly should rest upon private individuals: There is no reason why the Pennsylvania Railroad or the coal trust should not make these experiments at their own expense. There is no reason why that expense should be saddled upon all the taxpayers of the United States, and I have not heard in the argument of any gentleman upon this side or upon that any good reason for compelling the National Government to pay the bill which properly ought to be paid by the owners of coal mines in the several States of the Union.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Pennsylvania that the House recede from its disagreement to the Senate amendment No. 78 and concur in the same.

The question was taken; and on a division (demanded by Mr. DALZELL), there were—ayes 84, noes 50.

Mr. TAWNEY. Mr. Speaker, I demand tellers.

Tellers were ordered.

Mr. DALZELL and Mr. TAWNEY were appointed tellers.

The House again divided; and the tellers reported—ayes 92, noes 50.

So the motion was agreed to.

The SPEAKER. The next amendment for consideration is amendment No. 79, which the Clerk will report.

The Clerk read as follows:

Page 115, beginning with line 12, insert the following:

*Provided*, That in examinations, hereby authorized, of fuel materials for the use of the Government of the United States, or for the purpose of increasing the general efficiency or available supply of the fuel resources in the United States, the Director of the Geological Survey may have the necessary materials collected from any part of the United States where they represent extensive deposits; and it shall be the duty of the Director of the Geological Survey to have examined, without charge, the fuels required for use by the Government of the United States, and to give these examinations preference over other work: *Provided further*, That in publishing the results of these investigations the materials examined shall not be credited to any private party or corporation, but shall be collected and described as representing such extensive deposits.

Mr. DALZELL. Mr. Speaker, I move that the House recede from its disagreement to this amendment No. 79 and concur in the same.

Mr. TAWNEY. Mr. Speaker, I yield three minutes to the gentleman from Pennsylvania.

Mr. DALZELL. Mr. Speaker, I hardly think it is necessary to occupy the attention of the House. This is purely a legislative provision. It is a matter that is embodied in the current sundry civil appropriation bill, and has been always where the appropriation that has already been put into the bill has been made. It went out in the House upon a point of order, because it was new legislation. Undoubtedly it is legislation, but it is good legislation; it is in the interest of the public service, and it is legislation, to repeat what I have said, that we have always had in connection with this appropriation. I can see no reason why there should be any objection made to concurring in the Senate amendment, since the addition has been made to the appropriation.

Mr. TAWNEY. Mr. Speaker, if I can have the attention of the House for just a minute I will endeavor to state why, in my judgment and in the judgment of my associates on the conference, this amendment should not be concurred in. The House passed this provision limiting the investigation and the test of fuel upon lands owned by the Government of the United States. The importance of this amendment is the fact that it widens the scope of the investigation and authorizes the Geological Survey to not only test the fuels on the lands belonging to the United States, but to test the fuels belonging to individual coal operators and mine owners. The coal purchased in any section of the country, owned by anybody, or the coal trust, or anybody else, can be tested, and tested at the expense of the Government, under this proposed legislation—

And it shall be the duty of the Director of the Geological Survey to have examined, without charge, the fuels required for use by the Government of the United States and to give these examinations preference over other work: *Provided further*, That in publishing the results of these investigations the materials examined shall not be credited to any private party or corporation, but shall be collected and described as representing such extensive deposits.

The first part of the amendment, "that in examinations, hereby authorized, of fuel materials for the use of the Government of the United States, or for the purpose of increasing the general efficiency or available supply of the fuel resources of the United States," is where the Survey obtains its authority to examine everybody's coal, or every coal deposit wherever located and owned by anybody whomsoever, and I submit, Mr. Speaker, that if this work is of benefit to the corporations that own the great coal beds of this country, they should at least pay the charge and expense of making the investigation if they are unable or have not the facilities to make the investigation themselves. The amendment as it passed the House is limited, as I said, to an investigation of fuel belonging to the United States and for the use of the United States. It was not proposed by the House to extend this investigation into every coal mine throughout the United States and have an investigation made at the expense of the Federal Treasury, as it is now proposed by this Senate amendment which the gentleman from Pennsylvania moved to concur in.

Mr. UNDERWOOD. I ask the gentleman from Minnesota for a minute or two.

Mr. TAWNEY. I yield to the gentleman from Alabama three minutes.

Mr. UNDERWOOD. Mr. Speaker, I think it is very important for us to concur in this Senate amendment if we wish to carry out the very purpose for which we have made this appropriation. The object of Congress in appropriating $250,000 for fuel tests, and other appropriations for the Geological Survey all along the line, has not been for the purpose of investigating lands that belong to the Government. The argument has been made here from the beginning, from the very time this survey was inaugurated, that it should cover the space of the United States, and that the words "public domain" meant the United States from the Pacific to the Atlantic oceans, not the mere land that belonged to the Government of the United States. The investigation, if limited merely to the domain that belongs to the United States, would be limited to a few Western States and Territories. It is of as much importance and of more importance to the consumers of coal and the people who use this material to know what is in the coals of Pennsylvania, Alabama, and Illinois as there is in the coals of the western domain, and the real object of this investigation is for the purpose of investigating all the coals of the United States, and the gentleman opposing this amendment seeks to limit the operation of the appropriation merely to the public domain in the western territory and cut that benefit away from the southern, middle western, and eastern people entirely, and therefore I think that the motion should be adopted.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Pennsylvania that the House recede.

Mr. MONDELL rose.

The SPEAKER pro tempore. For what purpose does the gentleman rise?

Mr. TAWNEY. I yield three minutes to the gentleman from Wyoming.

Mr. MONDELL. Mr. Speaker, I presume this motion will be carried, for I imagine that the same interests that increased the appropriation $50,000 will demand that the major portion of it be used in the Eastern States to determine the value of fuel in private ownership. It is a curious and interesting fact, Mr. Speaker, that while originally practically all the appropriations for the Geological Survey were supposed to be for the development of the public domain, but a limited portion of those appropriations are so used now. The words "national domain" were unquestionably placed in the fundamental law of the Survey with a view of indicating the lands owned by the Government, and for many years the topographic and geological surveys, the stream gauging, and most of the other activities of the Survey were confined very largely to the western country, where the Government has large landed interests, where it has millions of acres of land to dispose of, where it is attempting to develop a vast and undeveloped region; but gradually the eastern brethren began to trench upon those appropriations, these practically the only appropriations of all of the millions of annual appropriations of the Government that are or ought to be peculiarly beneficial to western development.

So year after year smaller and still smaller portions of these appropriations are used in the West on the public domain. But a fraction of the appropriation for stream gauging is now used where the Federal Government owns public lands; but a fraction of the appropriation for topographic surveys is used for the purpose of thus surveying the public domain; but stream gauging is carried on in Massachusetts and Alabama and New York for the purpose of enabling wealthy corporations to determine the amount of available waterpower for their mills and factories, and topographic surveys are carried on in the aid of street-car and trolley companies and other corporations desiring to know the topographical features of large cities and of densely populated regions where they propose to operate.

And so on through all of these appropriations, intended originally to develop the resources of the West, intended to aid in the development of that great region comprising the public domain where we have so many important problems to be determined and solved. Gradually these appropriations have been shifted east of the Mississippi River, until those of us who have stood here year after year fighting for them find that our regions obtain only the crumbs that remain after the older States have received bountiful helpings from the national larder. In many instances wealthy Commonwealths——

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. MONDELL. Mr. Speaker, I ask unanimous consent to continue for two minutes more.

Mr. TAWNEY. Mr. Speaker, I yield two minutes to the gentleman.

Mr. MONDELL. Wealthy eastern Commonwealths, where the land is all in private ownership, where private capital is well able to develop all the resources of the region, are clamoring for these paternalistic public appropriations, for they are paternalistic when applied to private industry. They are not paternalistic when they are intended for and used for the benefit and development of the public domain. And so, I say, year after year we find these appropriations passing from the territory for which they were originally intended to other territory where, in my opinion, the Federal Government should make no appropriations for the purpose of enabling individuals or corporations to develop private property.

Mr. Speaker, if the lands of the West were all in the hands of individuals and taxable; if it were not a fact that one-half to four-fifths of our territory belongs to the Government and is therefore not taxable; if we were in position to draw on all our area for the support of our institutions, our people would not, in my opinion, ask for appropriations like this, for then, and in that event they would be paternalistic as they are now when diverted to the development of private lands and private industries.

Give us our domain, pass into the hands of the States or gradually into the hands of private individuals the lands of the West and the West will not be here as a mendicant, asking for Federal appropriations for the gauging of streams belonging to individuals, for the testing of coals belonging to private parties, or for the carrying on of any of these enterprises in the interest of private corporations.

Mr. OLMSTED. How about irrigation?

Mr. MONDELL. We are paying all we receive for irrigation back to the nation.

Mr. OLMSTED. You have not paid back much yet.

Mr. MONDELL. Well, we begin to do so this year, and those funds are not derived from taxation, but from the money received from land sales. In this session we passed a bill which gives to the seaboard and the people along our river systems—and I do not quarrel with that appropriation—$80,000,000 for rivers and harbors, a gratuity, while we are to pay back every dollar which we receive for irrigation.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Pennsylvania [Mr. DALZELL], that the House recede from its disagreement to Senate amendment No. 79, and concur in the same.

The question was taken; and the Speaker pro tempore announced that the ayes seemed to have it.

Mr. TAWNEY. Division, Mr. Speaker.

The committee divided; and there were—ayes 75, noes 37.

So the motion was agreed to.

The SPEAKER pro tempore. The next amendment in order is amendment No. 80, which the Clerk will report.

The Clerk read as follows:

For the continuation of the investigation of the black sands of the United States, and especially processes for the electric smelting of iron ores, to be immediately available, $25,000.

The SPEAKER pro tempore. The gentleman from Pennsylvania is recognized to make a motion.

Mr. DALZELL. Mr. Speaker, I move that the House recede from its disagreement to Senate amendment No. 80 and concur in the same.

The SPEAKER pro tempore. The gentleman from Pennsylvania moves that the House recede from its disagreement to Senate amendment No. 80 and concur in the same.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. DALZELL].

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. DALZELL] is recognized for five minutes.

Mr. DALZELL. Mr. Speaker, I regard this amendment as the most important of all the amendments to this portion of the bill relating to the Geological Survey. I believe that if the Members of this House understood the actual situation and what the value of this amendment is there would not be a dissenting voice to the motion. One great essential to the manufacturing interests of this country, and especially to the electrical interests of this country, is the possession of platinum. There is not in all the United States a place where platinum can be secured except through the medium of these black sands. The only platinum that is now available for manufacturing purposes is produced in Russia. It is controlled by an English syndicate, and the price of platinum in the market to-day is $40 an ounce. Now, through these investigations that have been made in the years gone by of the black sands upon the Pacific coast a great many mineral resources have been ascertained, and amongst others the existence of platinum.

To a large extent the experiment made in the investigation of the black sands upon the Pacific coast have been completed, but the black sands of the Gulf coast, the black sands of the entire South Appalachian Range yet remains to be made; and how much there is of hidden mineral wealth in these black sands nothing but an investigation made under Government supervision can disclose. It is the purpose of the provision put in by the Senate, which ought to have been put in by the House, to devote the sum of $25,000 to make this investigation. The result may be, if we may judge from what has been accomplished in the past, an addition to the wealth of the country many times $25,000. It is for these reasons that I say the Senate amendment ought to be concurred in by a unanimous vote.

Mr. SMITH of Iowa. Mr. Speaker, the testimony taken before the committee in reference to the investigation of black sands shows, if it be reliable, and I take it that it is, that we have already discovered that the black sands wasted contain more than four times as much platinum as is annually consumed in the United States. This is not, therefore, an effort to discover whether we can produce platinum in America, because it has already been discovered that the annual waste of these sands carries with it more than four times as much platinum as is consumed now in America.

Not only that, but these investigations of black sands show a production of iron, varying from 5 to 50 per cent, whereas 12 per cent would pay handsomely for the reduction of the iron in the sands. In the face of that it is proposed here not to appropriate $25,000 for the continuation of the investigation of black sands, but that it shall be extended into an investigation of processes for the electric smelting of iron ore. If it be the duty of this Government to investigate processes for the electric smelting of iron ore, then why is it not the duty of this Government and the function of this Government to enter upon investigations with the view of discovery in every mechanic art? If it has been discovered that these black sands carry all the way up to more than 50 per cent of magnetic ore, why should not the process of the reduction of the iron be discovered by private individuals, as all other important scientific truth is discovered?

I have not worried the House by talking upon these fuel tests and on the tests of concrete, but the fact is we entered a few years ago, at the St. Louis exposition, into an investigation of these fuels with an appropriation of $7,500, as I recall. That has grown and grown and grown until now it takes $250,000 a year to carry on these investigations. I think I see in this proposal for the entering upon an investigation of processes of electric smelting iron ores something which portends hundreds of thousands of dollars of expense a year in the near future. Most of the Departments of the Government have to rely upon the general benefits of their service as the basis of appeal for an appropriation.

Fortunate is the bureau of the Government which, desirous of unlimited expansion, is able to do a little bit of something for many Congressional districts and thereby enlist the support of the people of those districts for that local use. But if we are to launch out and vest authority in the Government and impose upon it the duty of making investigations of discoveries of all kinds in every line of human industry and human endeavor, there is absolutely no limit to the possibilities of appropriations for these investigations.

This investigation of black sands has gone so far as to demonstrate their commercial value for the purpose of producing both platinum and iron, and it is not the duty of this Government now to go on and discover and improve processes of electric smelting of iron ores. That is like what it has done in the fuel tests. The money has been spent not in testing the fuel, but in testing whether the fuels are more productive of power in their original form or when first converted into gas; and they are now taking a step further and are investigating gas engines, and determining what are the best patterns of gas engines. We see how these processes go on. Is it not sufficient for us, having loaded ourselves with the fuel test and the concrete test, to at least wait until we have found whether this is a never-ceasing and never-ending work before we embark in an effort to make scientific discoveries in other lines of human endeavor? I am opposed to this amendment of the Senate because the investigation of black sands has now reached a state where the utilization of these sands is for American industry and enterprise. I am utterly opposed to this amendment, because it provides for embarking in an investigation of processes of the electric smelting of iron ore.

Mr. TAWNEY. I yield five minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. Mr. Speaker, it is a very common way of attempting to defeat a very meritorious proposition to exaggerate what it is and also to speculate about what it might be. Now, we are not proposing by this provision of the Senate to do anything more than we have been doing under like appropriations from year to year. We are proposing, of course, to investigate and enter upon processes of electric smelting of iron ores; but an investigation of the things that have been done and entered upon by the Geological Survey will show that we have made some very material progress in that direction and that we have brought it about up to the point where we can produce satisfactory results, and we should not stop now and lose the rich fruits of work already done and which will largely be lost if we cease to continue the work so well begun.

The gentleman from Iowa [Mr. SMITH] professes to believe that we ought to turn over that result to private individuals and private companies; but in order to make his statement complete he ought to have said that we ought to turn it over to the steel trust and to the great corporations of this country, in order that they may make it a monopoly against the people of this country, rather than have the Government do it and give it over to the people of the country. In the new use of electricity our skilled practical men in the Geological Survey have entered the field for the purpose of determining whether the great black-sand regions of our country and other ores of this country that have always been denominated "refractory" and are utterly useless, could be made useful and could be smelted through the processes of electricity and made valuable. In this day, when we have about exhausted the iron ores that are not refractory from our great mines in Pennsylvania, in Ohio, and on Lake Superior, and elsewhere, it is about time that we were introducing the new process and making the discoveries that will make this valuable ore useful and utilize it and cheapen it. In so far as progress has been made, it promises to save to the people

of this country many hundreds of millions of dollars in the near future, and yet we are now hesitating whether we shall give for this purpose, to carry on these processes, the sum of $25,000 or leave this matter to go into the control of the great corporations interested in iron ore and steel and let them ultimately get patents from the United States for the new discoveries and hold them for at least a period of seventeen years under patent monopoly. It is for this reason that I have been in favor of continuing this appropriation. The other reasons stated by the gentleman from Pennsylvania [Mr. DALZELL] are equally potential. For fear that there would be any lack of zeal on the part of the Geological Survey, the Senate, in wording this amendment No. 80, says:

For the continuation of the investigation of black sands of the United States, and especially processes for the electric smelting of iron ores, to be immediately available, $25,000.

I regard that as a very small appropriation for the very great interest involved in it.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Massachusetts [Mr. SULLIVAN].

Mr. SULLIVAN. Mr. Speaker, it is difficult to account for the reasoning of the gentlemen who advocate this appropriation. The gentleman from Ohio [Mr. KEIFER] says that the Government of the United States should make these scientific investigations, because forsooth unless the Government does, private industry may make the examination and obtain a patent upon the process, and in that manner extra charges may be imposed upon the people of the United States. That is a reason which I submit to the House for its own examination without further comment.

The gentleman says further that if this investigation be made, it will result in the gain of hundreds of thousands of dollars by the people of the United States. That statement carries with it the inference that these black sands are already of great commercial value, and it follows unavoidably from that that private industry should pay the expense of making the initial investigation, inasmuch as private industry will ultimately reap the profit of the transaction. Now, if the reasoning of the gentleman from Pennsylvania be followed, every commercial transaction must be preceded by a scientific investigation under the auspices of the Government of the United States. Examine his statement for just one moment. He says that platinum, which can be obtained from black sands, is to-day worth $40 an ounce, and that the available supply is under the control of an European syndicate. That means that platinum is immensely valuable in the United States to any organization of individuals who will make it commercially available, and it follows from that that there is a sufficient stake hung up now for private industry to warrant it in paying the expenses of this investigation.

And yet in the face of the great value of the article, disclosed by the argument of the gentleman from Pennsylvania, he asks that the Government of the United States be compelled to pay the bills which will ultimately benefit the owners of the territory where these black sands are located.

I could not help admiring the subtle touch of the gentleman from Pennsylvania [Mr. DALZELL] when he suggested that the black sands in the Appalachian Range had not yet been investigated. It seemed to me when he made that remark he disclosed a sublime faith in the corruptibility of the minority in suggesting that an appropriation would be useful in certain sections of the United States. [Laughter.] I trust that Members on this side of the House will reject the proposition that is contained in the suggestion of the gentleman from Pennsylvania, and will show by their votes that they still retain a portion of the measure of their original virtue which formerly they asserted by opposing all paternalistic schemes, and vote solidly against this pernicious enterprise, which has no justification in business, sound legislative principles, or in morals. [Applause.]

Mr. TAWNEY. I now yield three minutes to the gentleman from New Jersey [Mr. WILEY].

Mr. WILEY of New Jersey. Mr. Speaker, I wish to answer the statement of the gentleman from Massachusetts [Mr. SULLIVAN] who has just taken his seat. His premises, if true, would justify the conclusion that he draws from them, but the fact is his premises are not quite correct. It is necessary in investigating the black sands to ascertain by scientific investigation whether those sands bear this platinum, which is the article we are in search of.

Mr. SULLIVAN. That has already been demonstrated.

Mr. WILEY of New Jersey. In certain localities.

Mr. SULLIVAN. On the Pacific coast.

Mr. WILEY of New Jersey. Yes; upon the Pacific coast.

Mr. SULLIVAN. The gentleman is correcting my premises.

Mr. WILEY of New Jersey. I will do so if the gentleman will let me proceed. The southern black sands have not been investigated, and it is unknown at the present time whether they do or do not contain platinum, although the presumption is in favor of it. Now, this appropriation is to determine whether or not platinum exists in these sands. It is necessary such investigation should be made by the United States Government, because no private individual or company is capable of doing it. The source of platinum at the present time is Russia, and during the Russo-Japanese war the mines were practically abandoned and the price of platinum rose to fabulous figures. Now, the platinum discovered in the black sands has been for the good of this country at large, and served to render this nation, to some extent, independent of the foreign supply. All the electric systems use it to a large extent, and so do the jewelers. This investigation will show whether these sands contain the platinum and whether it is worth while to work them. If the presence of platinum is established private capital will at once be enlisted to obtain it, but in the absence of such determination by a disinterested investigation, such as the United States would make under this appropriation, no private capital will be forthcoming, and these sands will be neglected in the future as they have been in the past.

Mr. TAWNEY. Mr. Speaker, I now yield five minutes to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, if I understand it, sufficient investigation has been made to demonstrate that they can find platinum in paying quantities in the sands of the Pacific coast. It has also been demonstrated that by force of electricity they can extract the iron ore from those sands, although it is difficult to get it in any other way, if not impossible. These experiments or demonstrations have proved that these black sands are of commercial value. What more does the great iron industry need? What more do the great electric industries of the United States need? If there are any industries that possess boundless wealth and capital, boundless resources, that have in their employ great talent, the greatest ingenuity of any class of business in the United States in greater degree than these two industries, I would like to have some gentleman name them. Is it possible that the Government of the United States is to take the lead in individual endeavor? Are the men engaged in these industries of so little enterprise, of so little perseverance, and so little enthusiasm in their work that they will decline to invest the paltry sum of $25,000 to discover what a mine of vast wealth, as it has been described in this case, there is in these black sands? What reason is there for the Government of the United States not leaving this to individual enterprise? My friend from Ohio says that it is turning it over to the great steel trust. Great heavens! Is there any danger of the United States discovering anything of value? If so, the steel trust will be on hand and they will take it just as soon if the United States discovers it as though the individual discovered it.

It will make no difference about that. It seems to me almost like demagogy gone mad to say that the United States must invest money in this investigation in order to protect itself from the corporations which are engaged in the manufacture of steel and of iron, and the gentleman says that if they discover the process they will take out patents and make a monopoly of it. Well, it does not prevent a monopoly by the way of the patents, for the United States to make investigations and discoveries.

Mr. KEIFER. Why not?

Mr. PAYNE. Because we would wake up the next morning and find that the man who was employed by the United States, paid by the United States, the cost of whose investigation was paid by the United States, goes over to the Patent Office and gets out a patent upon the process which he has discovered.

Mr. KEIFER. And in every such instance it has been held void.

Mr. MANN. Oh, the gentleman from Ohio is mistaken about that.

Mr. PAYNE. The gentleman is mistaken about the law, as he sometimes is; and then they have a monopoly against the citizens of the United States. The United States itself may use the patent, but the citizens of the United States can not, and it is a question that has not been settled yet, as to whether this particular thing is not the property of the citizen employee of the United States and that he can make the United States pay for it. I suspect the only reason why that question has not been settled, is because there is no way now by which they can get into the Court of Claims to bring an action for such a claim as that; but it does not protect the people of the United States, the individuals, the manufacturers from the claim of a patent discovered by the employee of the United States Government. Mr. Speaker, it seems to me there is no

reason why we should not leave this to individual enterprise; we should never make it a charge upon the Treasury of the United States.

Mr. TAWNEY. Mr. Speaker, just one word. I want to call the attention of the House to the fact that this proposition was first suggested to Congress in 1905. It was then limited exclusively to the investigation of black sands at Portland, Oreg., where an exposition was then being held. And in the following year, in the urgent deficiency bill, or at the beginning of this Congress, the appropriation of $25,000 was made in the following words:

To enable the Director of the Geological Survey to complete the investigation of the useful values contained in black sands.

That was to complete the investigation. Now, they propose to start anew not only along the line of investigating black sands, but they propose for the benefit of the steel manufacturers of this country to engraft upon this investigation this language:

And especially processes for the electric smelting of iron ores.

That is a field so wide that no one can begin to encompass it at this time. The investigation that would be authorized by this language would put the Government of the United States in the position of investigating processes of all kinds, as well as instrumentalities and equipment of all kinds, for the purpose of developing the industry of electric smelting of iron ores.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAWNEY. Yes.

Mr. MANN. Has the gentleman made any calculation as to how many millions or hundreds of millions of dollars could be used for the purpose of investigating process for the electric smelting of iron ores?

Mr. TAWNEY. I have not. It is not possible for anybody to make even an approximate estimate of that expense.

Mr. MANN. Without a very vivid imagination.

Mr. SULLIVAN. I would suggest that the appropriations be coextensive with the appetite of the steel trust.

Mr. MANN. It would go beyond the appetite of the steel trust. It would go beyond even the imagination of my friend from Ohio [Mr. KEIFER].

Mr. KEIFER. The steel trust does not want it, and is opposed to it.

Mr. TAWNEY. In view of the fact that at the beginning of this Congress it was proposed by Congress and by the Geological Survey itself to complete this investigation with an appropriation of $25,000 then given, I submit that this House ought not to go on record in favor of further continuing the investigation or embarking upon the business of investigating the processes for the electric smelting of iron ores, and I hope the motion of the gentleman from Pennsylvania will not prevail.

The SPEAKER pro tempore. The question is on agreeing to the motion of the gentleman from Pennsylvania that the House recede from its disagreement to the Senate amendment No. 80 and concur in the same.

The question was taken; and on a division, demanded by Mr. DALZELL, there were—ayes 56, noes 67.

Mr. THOMAS of North Carolina. Mr. Speaker, I demand tellers.

Tellers were ordered.

Mr. TAWNEY and Mr. DALZELL were appointed tellers.

The House again divided; and the tellers reported—ayes 79, noes 77.

Mr. TAWNEY. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

Mr. TAWNEY. Mr. Speaker, I ask unanimous consent that the amendment may be reported, so that the House will know what it is voting upon.

The SPEAKER pro tempore. Unanimous consent is asked that the amendment be again reported. Is there objection? [After a pause.] The Chair hears none, and the Clerk will report Senate amendment No. 80.

The amendment was again reported.

The question was taken; and there were—yeas 123, nays 142, answered "present" 4, not voting 108, as follows:

YEAS—123.

So the motion was rejected.

The Clerk announced the following additional pairs:

For the day:

Mr ACHESON with Mr. BURGESS.

For the vote:

Mr. RODENBERG with Mr. HOWARD.

Mr. MONDELL with Mr. WILEY of Alabama.

Mr. MCLACHLAN with Mr. FLOOD.

Mr. KENNEDY of Ohio with Mr. SPARKMAN.

Mr. COOPER of Pennsylvania with Mr. SHERLEY.

Mr. DAVIDSON with Mr. TRIMBLE.

Mr. BUCKMAN with Mr. SULZER.

Mr. BROOKS of Colorado with Mr. PUJO.

Mr. BONYNGE with Mr. LAMAR.

Mr. ROBERTS with Mr. BURLESON.

Mr. JENKINS with Mr. HENRY of Texas.

Mr. SHERMAN with Mr. LEWIS.

Mr. BEDE (in favor of) with Mr. STEVENS of Minnesota (against).

Until further notice:

Mr. SNAPP with Mr. GOLDFOGLE.

Mr. NEVIN with Mr. MOORE of Texas.
Mr. PEARRE with Mr. GILL.
Mr. MOUSER with Mr. TOWNE.
Mr. LILLEY of Connecticut with Mr. CLAUDE KITCHIN.
Mr. LE FEVRE with Mr. RHINOCK.
Mr. KLEPPER with Mr. MCLAIN.
Mr. HOWELL of Utah with Mr. SAUNDERS.
Mr. HAUGEN with Mr. STEPHENS of Texas.
Mr. BOWERSOCK with Mr. FIELD.
Mr. BEIDLER with Mr. REID.
For the session:
Mr. WANGER with Mr. ADAMSON.
The result was announced as above recorded.

Mr. TAWNEY. Mr. Speaker, I move that the House further insist upon its disagreement to the Senate amendment.

The SPEAKER pro tempore. The gentleman from Minnesota moves that the House insist upon its disagreement to the Senate amendment.

The motion was agreed to.

The SPEAKER pro tempore. The next amendment for consideration is No. 82, which the Clerk will report.

The Clerk read as follows:

On page 116, line 13, before the word "thousand," insert "and fifty;" so it will read: "$350,000."

Mr. OLMSTED. Mr. Speaker——

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania to make a motion.

Mr. OLMSTED. Mr. Speaker, I move that the House do recede from its disagreement to that amendment and concur therein.

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. OLMSTED] moves that the House recede from its disagreement to Senate amendment No. 82 and concur therein.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. OLMSTED].

The SPEAKER pro tempore. The gentleman from Pennsylvania is recognized for five minutes.

Mr. OLMSTED. Mr. Speaker, this is not a matter that in any exceptional manner affects Pennsylvania, for out of $480,000 expended last year only $17,100 were expended in that State. This covers the topographical survey of the whole country, and the whole country is interested in it. It affects every State in the Union.

As this bill was originally reported from the Committee on Appropriations the words "United States," which had previously appeared, were changed to "national domain," intending thereby to confine the topographic survey to the lands owned by the Government, and the appropriation was reduced to $250,000. But the House, in the Committee of the Whole, struck out "national domain" and inserted "United States." A motion was made to increase the appropriation to $400,000, but it carried at $300,000. The Senate has increased the amount to $350,000, which was just the amount appropriated in the previous year and the year before that for expenditure for topographical surveys throughout the United States. I submit that if $250,000, the amount proposed by the Appropriation Committee for lands owned by the United States, was a proper appropriation, then $350,000 is very small when covering all the United States, not confining it to lands owned by the Government itself.

This work, Mr. Speaker, is in progress in every State and Territory in the Union. It is just about half completed now. From all sections there are clamors for this work—from the Government Departments, the War Department, and the Interior Department. The States are interested to such extent that thirteen different States out of their own treasuries have appropriated for the purpose of expediting this survey. I think that the Senate amendment restoring the amount to the same figure which was appropriated in the preceding year and the year before that is certainly a very proper amendment, and I therefore hope that the House will recede from its disagreement and concur in that amendment.

Mr. TAWNEY. Mr. Speaker, the amount of money that the Geological Survey can expend in making a topographical survey is limited only by the amount that it can get from the Congress of the United States. The work that is now being done by the Geological Survey in the making of topographical surveys is being done in those States that cooperate with the Geological Survey in making the survey, and if the State is willing to put up $50,000, the Director of the Geological Survey is willing to take out of this Federal appropriation an amount equal to the amount contributed by the State.

Mr. OLMSTED. Will the gentleman yield just for a question? I think the gentleman is in error there, for I find in the report of the Director that money was expended in forty-five States last year, and only thirteen contributed anything out of their own treasury.

Mr. TAWNEY. The money that is expended in the States that do not contribute is the smallest amount that the Director of the Geological Survey does expend, simply because he wants it to be said on the floor of the House that he is not spending all of this money in the States that contribute aid in making this topographical survey. I say, therefore, that the House deliberately, after full discussion here the other night, voted $300,000 for this survey during the next fiscal year, and that it is ample to meet the requirements of that service during the next year. And in view of the enormous appropriations at this session of Congress I submit that every man on this floor should vote to keep that appropriation at the amount fixed a week ago, when we voted in favor of $300,000 for this service. I ask for a vote.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Pennsylvania [Mr. OLMSTED] that the House recede from its disagreement to Senate amendment No. 82 and concur in the same.

The question was taken; and the Chair announced that the "noes" seemed to have it.

Mr. OLMSTED. I ask for a division, Mr. Speaker; but first I would like the amendment to be understood by the House.

The SPEAKER pro tempore. The gentleman from Pennsylvania [Mr. OLMSTED] asks unanimous consent that the amendment be again reported. Is there objection?

There was no objection.

The amendment was again reported.

The House proceeded to divide.

Mr. OLMSTED. I withdraw the demand.

The SPEAKER pro tempore. The demand for a division is withdrawn, and the motion is lost.

Mr. TAWNEY. Mr. Speaker, I move now that the House further insist upon its disagreement in this amendment.

The SPEAKER pro tempore. The gentleman from Minnesota moves that the House further insist upon its disagreement to the Senate amendment.

The question was taken; and the motion was agreed to.

Mr. TAWNEY. Mr. Speaker, I move to agree to the conference requested by the Senate.

The motion was agreed to.

The SPEAKER announced the appointment of Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR of Alabama as conferees on the part of the House.

### AGRICULTURAL APPROPRIATION BILL.

Mr. WADSWORTH. Mr. Speaker, I call up the conference report on the agricultural bill.

The SPEAKER. The gentleman from New York calls up the conference report on the agricultural appropriation bill.

Mr. WADSWORTH. I ask to dispense with the reading of the report and that the statement may be read.

Mr. PAYNE. Pending that, I suggest to my colleague that he ask the report be considered as read. I desire to raise a point of order against the report. Then, afterwards, if that is decided in his favor, he can ask for the reading of the statement.

The SPEAKER. The gentleman from New York asks unanimous consent to dispense with the reading of the report. The Chair hears no objection.

The conference report is as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24815) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 13, 44, 45, 50, 56, 57, 62, 63, 64, 67, 68, 69, 71, 74, 75, 76, and 78.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 7, 8, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, 20, 22, 23, 24, 25, 26, 28, 29, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 46, 47, 49, 51, 53, 54, 55, 58, 59, 60, 61, 65, 66, 73, 81, 82, 83, 84, 85, 87, and 89, and agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "ninety-five thousand seven hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and nineteen thousand two hundred dollars;" and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with amendments as follows: In line 1 of said amendment, after the word "and," insert "also;" and on page 34, in line 6, after the word "into," strike out the words "interstate or;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: On page 40 of the bill, in line 6, after the word "forests," insert the words "in the District of Columbia or elsewhere;" and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In line 2 of said amendment, after the word "officers," strike out the word "for" and insert in lieu thereof the word "of;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In line 3 of said amendment, after the word "Congress," insert the words "classified and;" and in the same line, after the word "detailed," insert the words "reports of all receipts by the Forest Service and classified and detailed;" and in line 11 of said amendment, after the word "receipt," insert "and there is hereby appropriated and made available as the Secretary of Agriculture may direct, out of any funds in the Treasury not otherwise appropriated, so much as may be necessary to make refunds to depositors of money heretofore or hereafter deposited by them to secure the purchase price on the sale of any products or for the use of any land or resources of the national forests in excess of amounts found actually due from them to the United States;" and in line 26 of said amendment, after the word "sources," strike out the colon and the matter following down to and including the word "reserve" in line 30; and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: Restore the matter stricken out, in addition to the matter inserted by the Senate; and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"BUREAU OF BIOLOGICAL SURVEY.

"Salaries, Bureau of Biological Survey: One biologist, who shall be Chief of Bureau, three thousand dollars; one clerk, class 1, $1,200; two clerks, at $1,000 each, $2,000; one clerk, $900; one messenger or laborer, $480; in all, $7,580."

And the Senate agree to the same.

Amendment numbered 52: That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$52,000;" and the Senate agree to the same.

Amendment numbered 70: That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"Nutrition investigations: To enable the Secretary of Agriculture to incur such expenses as may be necessary for the packing, transporting to, and storing in Washington, D. C., of all apparatus now the property of the Government and used in the nutrition investigations, $5,000, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "One million and thirteen thousand two hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "Twelve thousand three hundred and ninety dollars;" and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "Seventy thousand and fifty dollars;" and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "Eight million six hundred and ninety-two thousand two hundred and ninety dollars;" and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine million four hundred and forty-seven thousand two hundred and ninety dollars;" and the Senate agree to the same.

J. W. WADSWORTH,
CHAS. F. SCOTT,
JOHN LAMB,
*Managers on the part of the House.*

REDFIELD PROCTOR,
H. C. HANSBROUGH,
F. M. SIMMONS,
*Managers on the part of the Senate.*

The Clerk read as follows:

STATEMENT.

The House recedes from amendments Nos. 1, 2, 3, 7, 8, 9, 10, 12, 15, 16, 18, 19, 20, 21 with amendment, 22, 23, 24, 26, 28, 29, 30 with amendment, 31, 32, 33, 34 with an amendment, 36, 38, 39, 40, 41, 43 with an amendment, 46, 47, 48 with an amendment, 49, 51, 53, 54, 55, 58, 59, 60, 61, 65, 66, 70 with an amendment, 73, 81, 82, 83, 84, 85, 86, 87, and 89.

The Senate recedes from amendments Nos. 4, 13, 50, 52, 56, 57, 62, 63, 64, 67, 68, 69, 71, 74, 75, 76, 77, 78, and 79.

Amendment No. 1 appropriates $12,000 for the salary of the Secretary of Agriculture, in accordance with the law recently passed.

Amendment No. 2 increases the salary of the Assistant Secretary from $4,500 to $5,000.

Amendment No. 3 increases the salary of the solicitor to $3,500.

Amendments Nos. 10, 15, 26, and 36 increase the salaries of the Chiefs of the Bureaus of Animal Industry, Plant Industry, Chemistry, and Forestry to $5,000.

Amendment No. 73 restores the salary of the Director of Office of Public Roads to $2,750, the amount originally recommended by the House committee.

Amendment No. 16 increases the salary of the chief clerk of the Bureau of Plant Industry to $2,250.

Amendment No. 53 increases salary of the cashier of the division of disbursements and accounts to $2,000.

Amendment No. 12 increases the amount for experiments in animal feeding and breeding from $25,000 to $50,000. This was the amount originally proposed by the House bill.

Amendment No. 20 increases the appropriation for grain investigations from $15,000 to $40,000. The increase was conceded by your conferees to meet the demands for foreign commerce.

Amendment No. 31, granting an increase of $1,000,000 to the Forest Service, was agreed to by your conferees because of a Senate amendment which requires all receipts from the forest reserves to be turned into the Treasury, and not to be again available by the Forest Service except by direct appropriation.

Amendment No. 34 requires the Secretary of Agriculture to submit detailed reports of receipts and estimates for the Forest Service and estimate of expenditures intended for this service each year, and that all receipts from the Forest Service after July 1, 1907, shall be covered into the Treasury, thus putting an end to the use of those receipts as a "revolving" fund. This amendment further provides that hereafter no forest reserves shall be created nor any additions made within the limits of the States of Oregon, Washington, Idaho, Montana, Colorado, or Wyoming except by act of Congress.

Amendment No. 41 strikes out that provision of the House bill which provides "that no part of this sum shall be used for the payment of compensation or expenses to any officer or other person employed by any State, county, or municipal government," and substitutes the following: "That any sum used for compensation of or payment of expenses to any officer or other person employed by any State, county, or municipal government shall be reported to Congress in detail."

The Senate amendment was agreed to by your conferees in the belief that it would be perhaps wiser to allow the Department to follow its own plan for at least the first year of the enforcement of the pure-food law.

Amendment No. 48 restores to the bill the salaries for the

Bureau of Biological Survey exactly as it is carried in the current bill.

Amendment No. 70, as amended by the conferees, instead of restoring the item for nutrition investigations, appropriates $5,000 to bring to Washington the apparatus belonging to the Government which has been used in these investigations.

Amendment No. 89 provides that hereafter, on or before the 1st day of January of each year, the Secretary of Agriculture shall submit to Congress, in addition to the estimates now required by law, classified and detailed estimates of every subject of expenditure intended for the Agricultural Department for the next fiscal year and detailed reports of all expenditures under any appropriation for each service during the preceding fiscal year.

All other amendments are for correction of totals, slight changes in verbiage, correction of punctuation, restoration of two or three paragraphs stricken out in the House on points of order, but which in no way change the original intent and purpose of the bill.

On careful examination of the bill by the conferees it was found that no authority was given the Forest Service to employ help in the District of Columbia, the words authorizing such employment having been inadvertently stricken from the House bill under a point of order. The conferees therefore recommend the insertion, after the word "forests," in line 6, page 40 of the bill, of the words "in the District of Columbia or elsewhere."

J. W. WADSWORTH,
CHAS. F. SCOTT,
JOHN LAMB,
*Managers on the part of the House.*

Mr. FITZGERALD. Mr. Speaker, I wish to make the point of order against the conference report on the ground that the conferees have inserted on page 40 language in an item which was not in dispute between the two Houses. On page 40, line 24, the conferees have changed the text in the language agreed to by both Houses by inserting, after the word "forest," the words "in the District of Columbia or elsewhere."

Mr. WADSWORTH. Now, Mr. Speaker, I concede the point of order; but the report makes mention of the fact, and my statement calls further attention to the fact. It evidently was a typographical error or an error of some kind by which certain words were left out which authorized the Forest Service to employ help in the District of Columbia. If this is not inserted, the Chief Forester can not pay anybody for work in the District of Columbia.

The SPEAKER. The gentleman from New York [Mr. FITZGERALD] makes the point of order that the conferees have exceeded their authority by changing the text to which both Houses have agreed by inserting, after the word "forest," the words "in the District of Columbia or elsewhere." And the report states that such is the case. Does the gentleman from New York confess the point of order?

Mr. WADSWORTH. I do. I simply want the House to understand there was no attempt at concealment.

The SPEAKER. The Chair sustains the point of order.

Mr. WADSWORTH. Then I move that the House insist upon its disagreement to the Senate amendments and ask a further conference.

The SPEAKER. Is a separate vote demanded on any of the amendments?

Mr. OVERSTREET of Indiana. I ask a separate vote on amendment 86 so that I may offer an amendment. It is on page 72.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the vote will be taken on the other amendments in gross.

Mr. DAVIS of Minnesota. I ask that the House concur in Senate amendment——

The SPEAKER. Precisely; but the gentleman from New York, in charge of the bill, moves that the House do further insist upon its disagreement upon all amendments, and the Chair is trying to find out how many amendments the motion of the gentleman would include and on which there is a desire for a separate vote.

Mr. DAVIS of Minnesota. I ask a separate vote on amendment No. 88.

The SPEAKER. Is there any other amendment on which a separate vote is desired? If not, the vote will be taken in gross on the other amendments, excepting amendments 86 and 88.

No other separate vote was demanded.

The SPEAKER. The question is on agreeing to the motion to insist on disagreement to all the other amendments on which a separate vote is not asked.

The question was taken; and the motion was agreed to.

The SPEAKER. The Clerk will report amendment No. 86.

The Clerk read as follows:

Survey of and report on Appalachian and White Mountain watersheds: To enable the Secretary of Agriculture to examine, survey, and ascertain the natural conditions of the watersheds at and near the sources of the various rivers having their sources in the Southern Appalachian Mountains and the White Mountains, and to report to Congress the area and natural conditions of said watersheds, the price at which the same can be purchased by the Government, and the advisability of the Government's purchasing and setting apart the same as a national forest reserve for the purpose of conserving and regulating the water supply and flow of said streams in the interest of agriculture, water power, and navigation, $25,000, to be immediately available.

Mr. OVERSTREET of Indiana. Mr. Speaker, I move to concur with an amendment which I offer.

The SPEAKER. The gentleman from Indiana moves to concur in the Senate amendment which has just been read with an amendment. The Clerk will report the motion of the gentleman from Indiana.

The Clerk read as follows:

Amend the Senate amendment numbered 86 by striking out all after the words "to enable the Secretary of Agriculture" and inserting the following: "to examine and ascertain the natural conditions, especially as to forests, of the area of land at and near the sources of all the various streams in continental United States which are of sufficient importance in navigation to have been made the object of expenditure of national money for their improvement, or which have water supplies already utilized for manufacturing or irrigation or capable of such utilization, and to report to Congress the areas and natural conditions of said watersheds, the prices at which the same can be purchased by the Government, and the advisability of the Government's purchasing and setting apart the same for the preservation or propagation of such forests as may be needed to conserve, regulate, or increase the water supply of the before-described streams in the interests of agriculture, water power, and navigation, $25,000, to be immediately available."

Mr. WADSWORTH. I yield five minutes to the gentleman from Indiana [Mr. OVERSTREET].

Mr. OVERSTREET of Indiana. Mr. Speaker, the distinction between the Senate amendment and the amendment I have offered is simply this: The Senate amendment proposes an examination of the sources of rivers having their sources in the southern Appalachian Mountains and the White Mountains. The amendment which I offer is to broaden that examination and leave it open in order that the Congress may have the information, first, of the particular sections where these rivers rise and where the land ought to be purchased, and, second, what the cost may be. If we start upon a project of this kind, individualizing one particular part of the country—the White Mountains, for example—and then wait for a subsequent Congress to select another particular locality, it will be a never ending project; and, I think, at the outset, before Congress has expended any money in the purchase of these lands for the protection of water supplies, we ought to have a more general examination than the Senate amendment provides, and some additional data, before we determine what the cost may be. We seek only to know all the facts, and Members can not criticise any honorable effort which may be made to ascertain those facts. I insist that if this project is to be entered upon at all, we ought to enter upon it on a broader scale than by the limitation to the southern Appalachian Range and the White Mountains, for the purpose of determining more accurately and comprehensively the facts with reference to the cost of the project. I would be glad if the gentleman from New York [Mr. WADSWORTH] would express his recognition of the necessity and the advisability of first ascertaining all of these facts before entering upon the project and would accept the amendment.

Mr. WADSWORTH. I yield to the gentleman from South Carolina [Mr. LEVER] five minutes.

Mr. LEVER. Mr. Chairman, the purpose of amendment No. 86 is plainly set forth in the language of the amendment itself. It is intended to enable the Secretary of Agriculture to make a survey of the Appalachian and White Mountain regions with a view to ascertaining the natural conditions of the watersheds at or near the sources of the various navigable rivers having their fountain heads in these regions, and to report to Congress the number of acres of land involved in these watersheds, the price at which they can be bought, and the advisability and practicability of the Government purchasing them with a view of setting them apart as a forest reserve, in order to conserve and regulate the water supply of the streams which have their origin in these lands. All of this is to be done in the interest of agriculture, to protect the great water powers along these streams, and to aid in making navigable these water courses. This is the plain intent of the amendment, which was put on the agricultural appropriation bill in the Senate through the

efforts of the senior Senator from North Carolina [Senator SIMMONS]. It will be remembered that when the agricultural bill was before the House I had the honor of moving an amendment to appropriate $3,000,000 for the purchase of sufficient lands in the Appalachian and White Mountain regions out of which to establish a forest reserve sufficient to adequately and economically protect the water courses having their origin in these mountain regions. The point of order was raised against the amendment and was sustained by the Chair. Thereupon, my friend from North Carolina [Mr. THOMAS] offered an amendment which, in effect, is the amendment now under consideration. The point of order was raised also against this amendment, and was likewise sustained.

While I shall heartily support this Senate amendment, I must confess that I feel that with reference to the Appalachian Range we have sufficient information and data upon which to pass wise legislation, for it will be remembered that the Department of Agriculture and the Geological Survey, acting together under authority of Congress given some years ago, made an extensive survey of that region, and that report has been submitted to Congress and is now a public document, containing over 100 pages of valuable and detailed information.

However, be that as it may, the friends of the idea of establishing forest reservations in the Appalachian and White Mountain ranges are now brought face to face with an adroit and carefully concealed effort to defeat the whole proposition.

The substitute offered by the gentleman from Indiana [Mr. OVERSTREET] is an indirect attempt to defeat all legislation looking to the establishment of these forest reserves. The substitute of the gentleman proposes to make an examination and to ascertain the natural conditions of the area of land at or near the sources of all the various streams in continental United States, and for this purpose appropriates $25,000. That the purpose of the gentleman from Indiana can be accomplished for this sum of money is absolutely ridiculous, and no one better knows it than the gentleman himself. The truth is that the adoption of the substitute is intended to load down this proposition for the purpose of defeating the ends sought by the Senate amendment. The gentleman from Indiana says he wants the facts. We, too, want all of the facts in regard to this proposition. We are quite willing to have the facts, so far as we are concerned on this side, and, I think, as far as all of the friends of this proposition are concerned, but we are not willing to load down the proposition with another proposition covering the entire country—all of continental America. We are opposed to the substitute of the gentleman from Indiana, and I trust that the friends of the idea of forest reserves for the Appalachian and White Mountain regions will line up and vote it down, so that the House may concur in the Senate amendment and permit the survey passed by it to be made, in order that some of the objections raised against the bill to make a direct appropriation for the purchase of these regions may be met.

With respect to the Appalachian regions, Congress now has sufficient information upon which to act wisely, but a survey of the White Mountains is necessary to ascertain the facts upon which to base economical and wise legislation.

The substitute of the gentleman from Indiana is evidently sinister to the whole scheme of forest reserves in these mountains, but even if it were made in good faith its adoption would mean a delay of from three to five years before any final conclusion could be reached and before sufficient information could be had upon which to act.

This bill has been knocking at the door of Congress for years and years. We have an opportunity now to get the facts upon which Congress can act. The Senate has sent this amendment to us. It is up to us to stand by that amendment in order that we may get the facts, and the friends of this Appalachian-White Mountain proposition will make a great mistake and delay the final creation of these reserves many and many years, and perhaps defeat them finally, by the adoption of the substitute. I wish to say, without imputing to him any motives, for I would not do that, that this substitute has been drawn by a master hand, for if he had studied for years a scheme by which to defeat this whole proposition I do not think he could have found a more effective one by which to do it. It is a drag-net proposition which appeals to the selfishness of every Member of the House, and all of us have more or less of that in us. If the gentleman from Indiana is opposed to the creation of forest reserves in the White Mountain and Appalachian regions, and if it is his purpose to stand up against the strong recommendation of two Presidents of his own party and to place himself against the judgment and the wishes of twelve great States and numerous commercial and civic organizations, not to take into account an undoubted majority of this House, then let the gentleman say so in plain terms and let him make his fight in the open daylight and without any attempt at concealment. Let the friends of the proposition to create forest reserves in these mountain regions not misunderstand the purpose of the substitute. This is really but the opening gun in the battle that is to be fought over this proposition, and to suffer defeat now means everlasting defeat. To defeat the substitute of the gentleman from Indiana means that we control the situation and in the end will force upon Congress a recognition of the justice of this proposition. This, in a way, is a test vote, and yet, because of the drag-net and thin-butter-spread character of the substitute. I do not feel that the vote which is soon to be taken will be a correct evidence of the real strength of the proposition. So adroit is the substitute that it is certain to fool some of us. I trust, therefore, that the House will vote down the substitute offered by the gentleman, so that we can concur in the Senate amendment and let this proposition get before the Sixtieth Congress in order that the House may have an opportunity to express itself upon it. And when such an expression is had, I believe that the wisdom of the American statesmanship will find its vindication in the adoption of the idea of forest reserves in these mountain regions, thereby answering the appeals of the agricultural, manufacturing, and commercial interests of the New England and Southern States. [Applause.]

Mr. WADSWORTH. I now yield five minutes to the gentleman from North Carolina [Mr. THOMAS].

Mr. THOMAS of North Carolina. Mr. Speaker, the evident purpose of the amendment to the Senate amendment offered by the gentleman from Indiana is to kill the whole proposition for a survey of the Appalachian and White Mountain forest reserves. There are a great many Members of this House from New England and the South who believe that we should have at least an investigation of the facts relating to these proposed forest reserves in New England and the South. We are vitally interested in this matter. Now, what does the amendment of the gentleman from Indiana propose? He proposes to have a survey and an investigation of all the watersheds in the United States. The effect of the adoption of that amendment would be necessarily to defeat the whole proposition advocated by New England and the South. What are we asking for in the Senate amendment? Let me read the amendment inserted in the Senate to the agricultural appropriation bill. It is a simple, plain proposition. I want the House to hear it in full:

> To enable the Secretary of Agriculture to examine, survey, and ascertain the natural conditions of the watersheds at and near the sources of the various rivers having their sources in the Southern Appalachian Mountains and the White Mountains, and to report to Congress the area and natural conditions of said watersheds, the price at which the same can be purchased by the Government, and the advisability of the Government's purchasing and setting apart the same as a national forest reserve for the purpose of conserving and regulating the water supply and flow of said streams in the interest of agriculture, water power, and navigation, $25,000, to be immediately available.

This is a very small appropriation. The purpose of it is simply by a survey to get at the facts with reference to the advisability of establishing forest reserves in the White Mountains and the Appalachian regions. For years we have been knocking at the door of Congress, asking Congress to do something in the way of an appropriation for these forest reserves. We believe in New England and in the South that such legislation means not only the preservation of the agricultural lands, but also the conservation of our water power for manufacturing purposes, and that means millions of dollars to the people of New England and to the people of the South. We are simply asking to have the facts investigated, the survey made, and then, if advisable, we can go a step further in the passage of the bill to establish the reserves. If not advisable and to our national interests, we can stop with the survey.

It seems to me the adoption of the Senate amendment is in the interest of the economic administration of the Government. We are simply endeavoring by a survey to ascertain whether we ought to establish these forest reserves in the White Mountains and the Appalachian region; then after a survey is made we can tell whether the Congress of the United States ought to act favorably upon the bill reported by the Committee on Agriculture establishing these reserves.

Mr. LITTLEFIELD. I would like to inquire of the gentleman from North Carolina whether the Senate amendment ought not to provide, as well as "ascertaining the natural conditions," also for ascertaining the natural and "existing" conditions, because I understand there has been a pronounced change in the character of the surface of the earth in the Appalachian region, especially, and more or less in the White Mountains. The amendment ought to provide for disclosing the natural conditions and the existing conditions.

Mr. BURLESON. A change in the natural conditions?

Mr. LITTLEFIELD. Certainly.

Mr. BURLESON. Then would not that be still the natural condition?

Mr. LITTLEFIELD. Not at all, you may say, in the sense of not being artificial, and so disclose the whole situation.

Mr. WADSWORTH. I am inclined to think the gentleman from Maine is right.

Mr. THOMAS of North Carolina. The gentleman may be right, but my idea is that the words "natural conditions," as the gentleman from Texas has suggested, would include existing conditions.

Mr. LITTLEFIELD. You might strike out the word "natural," and say "ascertain the conditions," and that will give us what the situation is.

Mr. THOMAS of North Carolina. I see no objection to amending the Senate amendment in that way.

Mr. LITTLEFIELD. I would be very glad, with that amendment, to vote for the Senate amendment.

Mr. THOMAS of North Carolina. I hope the motion of the gentleman from Indiana [Mr. OVERSTREET] will be voted down, and I hope that the motion to recede and concur in the Senate amendment with the amendment suggested by the gentleman from Maine will be adopted. The expenditure of this small amount for survey will give us the facts and may save millions to the agricultural and manufacturing interests of New England and the South. [Applause.]

Mr. WADSWORTH. I yield five minutes to the gentleman from South Dakota [Mr. MARTIN].

Mr. MARTIN. Mr. Speaker, I favor the amendment proposed by the gentleman from Indiana [Mr. OVERSTREET], and in taking this position I do so from the standpoint of one who thoroughly believes in our forest-reserve movement. A great deal of criticism has been let loose in both ends of the Capitol upon the general administration of the forest reserves. For one, I have little sympathy with the criticism. I have lived for a quarter of a century in a locality where I have been a close observer of this system. I live on the edge of one of the oldest forest reserves of the entire system, where I have had opportunity to observe both the old method and the new. I therefore favor this amendment, because I think it will in a sensible and legitimate way ascertain the necessary facts regarding this great region of the East and South before the Government shall embark specifically upon the enterprise.

I think that public sentiment is rapidly growing to an understanding of the fact that the great forest and water resources of the country must be administered in a conservative way for the benefit of this as well as future generations. When the Black Hills Forest Reserve was established in 1898 you could scarcely find one man in a thousand who was not opposed to the idea. The practical management and working out of this idea has been so successful that I challenge anyone to find now one man in a thousand in that immediate vicinity who does not recognize its great benefits. One of the mistakes made in the establishment of the forest reserves in the western country has been that there has not been sufficient inspection in advance before the boundaries of the reserves have been established. As a result of this boundary lines have been too carelessly drawn, in the first instance, and large areas not needed for the cultivation or preservation of timber, but better adapted to grazing and agricultural purposes, have been unfortunately included in some of the forest reserves. It is because of this that the reserve system has, to a certain extent, come before the country with a great deal of criticism attached to it. The amendment offered by the gentleman from Indiana would give a thorough investigation of the necessary data upon which Congress could act intelligently in the near future.

We have now in the United States 139 forest reserves, embracing 129,000,000 acres. I will publish with my remarks a list of these reserves, showing the dates when established and the acres of each. It is a noticeable fact that the Senators and Representatives who are objecting to the public forestry movement come from States where the reserves were but recently created. The free pioneer of the West is accustomed to free range, free water, and free fuel, and he at first resents the reserve system as an interference with the time-honored rights of an American citizen. But he soon discovers that the forest supervisor and forest rangers are the best friends of the honest and permanent settler—protecting the forests against destruction by fire, conserving the water resources for the common good, and apportioning the range privileges on an equitable basis, so that all may receive a reasonable share of these benefits.

The act passed at the last session of Congress providing for agricultural settlement in forest reserves was a wise measure. Most of the forest reserves of the West are traversed by fertile valleys. There are some of the best agricultural lands in the country, and being well watered and in close proximity to fuel and building materials they present some of the best opportunities for permanent home building. The permanent settlers in forest reserves take a lively interest in the protection of the timber and water supply. They are usually organized by the forest rangers into an auxiliary force, and can be called into action quickly in case of fire or other emergency.

Our national forestry movement came none too early. The ruthless devastation of the protecting forests at the sources of our rivers was seriously affecting the regular distribution of our water resources. The inevitable effect was torrential floods during the season of rain and melting snow and an insignificant flow during the months of summer and fall. Private greed too often fells the young growing timber as well as the mature trees, and tops and branches are allowed to dry on the ground where they fall, making fuel for forest fires.

Before the Government took the public forests into its own control vastly more timber was destroyed by fire than was taken for commercial uses. The people are beginning to understand that trees are to be protected and grown like any agricultural crop and that only the mature product is to be gathered from year to year. This system is necessary for the best interests of to-day as well as for the generations of the future.

The Black Hills Forest Reserve affords a good concrete illustration of what may be expected from our forest reserve system. It is at present our most important reserve from a commercial standpoint. The large mining operations in that vicinity require vast quantities of mining timber, and lumber and building material are in constant demand in the neighboring towns and agricultural valleys. These demands are now met without destroying the immature trees.

This reserve is about 100 miles long by 40 miles in width. It is a delight to ride through the reserve and see the thrifty young forests springing up on every side. Thousands of acres are now covered with dense vegetation that were comparatively barren until the system of forest patrol was established.

I prophesy that Senators and Members of Congress who are now rebellious against this national forestry movement will be won over among its supporters when they have opportunity to see what the reserve system can accomplish. I have only words of commendation for the Chief Forester, who is the real head of this national movement. He has dedicated his life to a great idea that promises only good for the entire country. He brings to this Service the devotion and enthusiasm of a high purpose, and should receive the cordial support of both branches of the Congress. [Applause.]

Mr. WADSWORTH. I yield five minutes to the gentleman from Massachusetts [Mr. MCCALL].

Mr. MCCALL. Mr. Speaker, I am opposed to the amendment offered by the gentleman from Indiana [Mr. OVERSTREET] and am in favor of the adoption of the Senate amendment as amended in accordance with the suggestion of the gentleman from Maine. I do not think that anything will come from the proposed dragnet and general investigation. If a proposition were up for some particular river or harbor improvement, it would be just as sensible to amend it by proposing to investigate all the rivers and harbors of the country. If there is anything to be investigated in connection with our western forest reserves, let that be done; but this is a distinct proposition. A bill has passed the Senate and has passed the committee of the House in favor of establishing two great forest reserves. There are at least fifteen States interested in those reserves. The Commonwealth of Massachusetts has none of the forests within her area, but she is vitally interested in having the sources of her rivers protected. And it is for the purpose of specially investigating this clear-cut and definite proposition that this appropriation is proposed. The bill establishing these forest reserves would, in all probability, have received consideration at this session of Congress if it had not been for the indefinite character of some of the information upon it and the lack of knowledge as to the extent to which the Government would be committed; and this survey is in the direction of educating the next Congress so it may understand precisely what the proposition means. An appropriation of $25,000 for the forest-reserve system and water courses of the whole country, as proposed by the Overstreet amendment, is absurdly small. It will have to be followed up by millions, and the gentleman from Minnesota will be fighting here, as he has been fighting through this Congress, the appropriations proposed for making other investigations and maps and surveys than those of the Geological Survey. I trust the amendment proposed by the gentleman from Indiana will be voted down and that then the Senate amendment as amended will be passed.

Mr. WADSWORTH. I yield five minutes to the gentleman from Ohio [Mr. BURTON].

Mr. BURTON of Ohio. Mr. Speaker, this is a very important question, involving the respective spheres of activity of the States and the Federal Government. The partial solution of that question by the civil war and other events has already added many pages to the history not only of this country, but of the world. Even those who believe in the unlimited power and authority of the Federal Government may well shrink before some of the undertakings which have recently been entered upon by the Federal Government, and we ought to consider a proposition of this kind very carefully before we adopt it; but if we are to adopt it at all, should we not bear in mind that all portions of the country should be treated alike? [Applause.] The great danger is that when the Federal Government infringes upon the responsibilities and functions of States partiality will be shown, that one locality will assert its claims or rights to the detriment of all the rest. I may say with reference to the branch with which I have had most to do in this House, that of rivers and harbors, that there is no justification for the taking up of that class of work by the Federal Government unless the scales are held with absolute equality and all portions of the Union—North, South, East, and West—are treated alike. And just so it is in this matter. If we are to enter upon these surveys as to the waters on the watersheds, surveys of water power, or anything of that kind, the investigation should not be directed to one part of the country, but to the whole country alike, and so I favor the amendment of the gentleman from Indiana.

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from New Hampshire [Mr. CURRIER].

Mr. CURRIER. Mr. Speaker, the gentleman from Ohio has said that the entire country should be treated alike in this matter, but this appropriation is for a specific purpose which has already received the sanction of the Senate which has passed the bill for these two forest reserves and the sanction of this Committee on Agriculture of the House, which unanimously reported the bill. It is true, of course, that it can not receive any consideration at this session, but this matter will be up again, and we want to be able to tell the committee and the House the natural conditions regarding this matter and lay before them the facts as to the cost of the proposed reserves, so that this matter can be acted upon intelligently by the committee and by the House. If this matter is to be beaten, let it be beaten in a square and manly way and not by indirection [applause], for whatever may be the intention of the mover of this proposition this amendment in fact destroys this whole thing. Talk about a survey of all the navigable rivers of the country and all the watersheds at the expense of $25,000! Why, it is absolutely ridiculous!

Mr. OVERSTREET of Indiana. There is no such proposition for a survey. The word "survey" is not in there.

Mr. CURRIER. Any such examination as you are talking about, extending from the Atlantic to the Pacific and from the Lakes to the Gulf, would cost hundreds of thousands of dollars. It would take years to make any such investigation.

Mr. MANN. Would not the Secretary of War under the substitute have the authority to first make investigation of the Appalachian and White Mountain propositions?

Mr. CURRIER. No other proposition has been pending in this Congress. This has not only been pending, but has passed the Senate and has been unanimously reported from the Committee on Agriculture. It is one specific provision, and we ask for this small appropriation in order that at the next Congress we may lay all the facts before this House. It is a reasonable request.

Mr. MANN. Could not the Secretary have the authority?

Mr. CURRIER. He may have the authority. We want him directed to do it.

Mr. SOUTHARD. What is the objection to directing him?

Mr. CURRIER. None. The amendment of the gentleman from Indiana [Mr. OVERSTREET] leaves him open to wander all over this country to make an investigation.

Mr. THOMAS of North Carolina. Will the gentleman allow me to say that this simply gives an intelligent examination and investigation of the question for future action.

Mr. CURRIER. That we may present this matter fully to the next Congress and to this committee. I am not going into the merits of this project, but if you would give us these reserves we would save in our river and harbor bill alone three times over the cost of the reserves in the next five years in preventing the filling up of streams. I hope the amendment offered by the gentleman from Indiana will be beaten. Let the reserve bill at some time come before this House, and if you want to vote it down there will be no murmur from us; but beat it squarely and in the open.

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, I have a love for everything in the forest, from the tiniest plant to the loftiest tree; and I believe—and have for years—that it might be desirable for the General Government to own and control a forest reservation in the White Mountains and in the southern Appalachian region. But before I would be willing to cast my vote in favor of such a proposition I must know what the effect will be on the adoption of that policy. I can see in my mind's eye, Mr. Speaker, in the not far distant future that this country may adopt the policy which has been adopted by some of the foreign countries, and may adopt the plan of conserving its future interests by the establishment of forest reservations. And when my distinguished friend from New Hampshire [Mr. CURRIER] and my distinguished friend from Massachusetts [Mr. MCCALL], through selfish interests in favor of their local projects, object to the survey of the rest of the country and to giving us the information which we need before entering upon the scheme, I think the gentlemen are shortsighted.

Mr. CURRIER. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. CURRIER. Whenever you will bring in a project here which will receive the approval of the Senate and is unanimously reported by this committee, we will vote to give you a survey.

Mr. MANN. Well, Mr. Speaker, with all due deference to that great legislative body at the other end of this Capitol, its sanction to me contains no weight. [Applause.] Mr. Speaker, the gentleman wants this proposition. Why not let us know what the plan will cost? Under the proposition contained in the substitute amendment, the Secretary of Agriculture, which means the Chief of the Forestry Division, may enter upon an investigation of these two projects and report upon them at the next session of Congress if he be able to do so.

Mr. LEVER. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. LEVER. I would like to say to my friend from Illinois——

Mr. MANN. I will yield for a question; I do not yield for a speech.

Mr. LEVER. I would like to ask my friend from Illinois, then, that if to ascertain these facts is not the very purpose of this amendment here?

Mr. MANN. Ah, the amendment of the Senate proposed to commit this Government to a policy about which it knows nothing as to cost. I want information before entering upon a project which is to cost not millions of dollars, but billions of dollars. Mr. Speaker, I ask leave to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Maine [Mr. LITTLEFIELD].

Mr. LITTLEFIELD. I will say, Mr. Speaker, first, that the longing the gentleman from Illinois [Mr. MANN] has for information before he embarks on a large enterprise involved in the expenditure of a large sum of money will be gratified if the Senate amendment to this bill passes. That is the precise and specific object of this amendment—to get the necessary information in order to enable intelligent action to be taken thereon; and the gentleman can gratify his love for all of the various things that grow in the forests on the basis of that information provided this amendment passes. I am very much interested, and I agree with the distinguished chairman of the Committee on Rivers and Harbors in the proposition that everything should be applied equally and alike; but it depends somewhat on the situation as to whether that applies in every respect. I have yet to learn that because we surveyed one river or one harbor that all the rivers and all the harbors are to be surveyed.

Mr. BURTON of Ohio. I will say to the gentleman that what I was dealing with was all of the same class.

Mr. LITTLEFIELD. I so understood it.

Mr. MCCALL. The proposition is that they were all to be surveyed at the same time.

Mr. MANN. The rivers to be surveyed in New England?

Mr. LITTLEFIELD. Not at all. But looking at it in the way that the learned River and Harbor Committee exercises its judgment as to the rivers that shall be surveyed and as to the harbors that shall be surveyed, wisely and properly; but I want to say to the House that they did not survey every harbor and every river, and I can call a great many men in this House as witnesses to this fact.

Now, this amendment contemplates, with all due deference to the gentleman from Indiana who introduced it, a survey of all areas that are the sources of all the various streams in continental United States "which are of sufficient importance to navigation to have been made the object of expenditure of

national money for their improvement, or which have water supplies already utilized for manufacturing or irrigation," because the amendment requires the Secretary to report to Congress the areas and natural conditions of such watersheds.

How is the Secretary going to report an area without in the first place determining the area; and how will he determine it without a survey? Of course it is all well enough by this amendment to provide it shall be done, but how is he going to do it without doing it; how get areas without surveys?

Now, this proposition appropriates $25,000 for a survey of all sources of water supplies of the United States. Absolutely preposterous from every possible financial standpoint! The amendment is not seriously intended to promote this object. Now, what is the proposition here? Why, that the great watersheds that have been generally discussed as being essential and necessary to the preservation of great water supplies, not only for navigation, but for manufacturing and for the development of power. Now where are the watersheds that have been the main subject of discussion? Where are they in any other section than those to which attention has been called and which are provided for in the Senate amendment?

Mr. FITZGERALD. The Adirondacks shed is a very important one.

Mr. LITTLEFIELD. If you want to put in the Adirondacks, put it in, and add $12,500 to your appropriation, which would take care of that.

Mr. FITZGERALD. I am not sure that it would.

Mr. LITTLEFIELD. When you undertake to adopt this proposition putting $25,000 to survey a thousand areas, why, it is indirectly undertaking to defeat the proposition. Now, let us have by the appropriation of $25,000 the information that we all want, and then we can tell whether it is wise to proceed. I hope the Senate amendment will prevail and the amendment of the gentleman from Indiana will be voted down.

Mr. WADSWORTH. I yield five minutes to the gentleman from Massachusetts.

Mr. McNARY. Mr. Speaker, I desire to ask attention to the effect that this will have upon the people of the State of Massachusetts. I have received a great number of petitions from people living in New England in favor of the White Mountain and Appalachian forest reservations. We have been urged to join with the southern Members, the men who come from the States of Maryland, Virginia, West Virginia, North and South Carolina, Georgia, Alabama, and Tennessee, to endeavor to save the forests for the purpose of properly conserving the water supply of all those States. This project has been well considered for a number of years. It has received the thought and the attention of many people. It has been presented before committees of this House and of the Senate, and it comes here with the indorsement of thousands of men—engineers and technical men as well as the ordinary people in all these communities. Why should we, therefore, be balked in carrying out a good plan merely because gentlemen urge an amendment which on its face may appear fair, but the main and ultimate purpose of which is absolutely to kill the survey of the White Mountains and the southern Appalachians?

We find in the White Mountains the source of five streams—the most important streams in New England for the purpose of developing manufacturing and power. Two of those streams, the Connecticut and Merrimac, rise in New Hampshire and flow to the sea through Massachusetts. The Connecticut is navigable in both Connecticut and Massachusetts. The Merrimac is navigable in Massachusetts. In neither Massachusetts nor Connecticut can we control the depletion of the forests in New Hampshire and the grievous injury thereby caused to our interstate streams both as to navigability and supply for power for industrial purposes. The same is true as regards the rivers rising in New Hampshire and flowing through Maine to the sea. It is an interstate, not a State, matter and is therefore national in its scope.

We find in the southern Appalachians, in Maryland, the Virginias, the Carolinas, Tennessee, and Alabama, the sources of the streams which in the future will yield a great power supply, increase our industrial development and wealth, as well as streams which in their lower reaches form the highways of commerce. This project has been carefully looked into. Why, now, because some gentlemen desire to block it as it has been blocked for a long time, should we vote for this amendment? Gentlemen say we should survey all watersheds en bloc. The rivers and harbors of our country are not surveyed altogether at one time. They are surveyed seriatim and in detail. All the work of the Government on rivers and harbors is done seriatim and in detail and not in one block or comprehensive plan.

Looking at the map of the forest reserves of this country, we find that the whole western country is covered with these reserved forest areas, but in the East there is not one forest reserve. It is just as important for us in the East to have our industrial or power water supply and the water in our rivers for commercial or navigation purposes cared for as it is to locate these great forest reserves in the West for irrigation. It seems to me that any man who believes in this principle of the conservation of water supply will vote for the amendment put on by the Senate and vote against the proposition of the gentleman from Indiana [Mr. OVERSTREET]; because if we vote for the amendment of the gentleman from Indiana we will endanger the White Mountain and Appalachian survey. If there be other areas, the Adirondacks or anywhere else, let them come forward in due time, and, after they receive proper committee consideration, let us vote upon them; but concerning this present matter, we now know its beneficial effect; we have it in a shape where we can accomplish some good. Let us therefore vote down the amendment of the gentleman from Indiana, and then vote to concur with the Senate on the proposition for $25,000 for the survey of the White Mountains and the southern Appalachian region. [Applause.]

Mr. WADSWORTH. I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, so far the Federal Government has established forest reserves on the public domain only. The amendment incorporated in this bill by the Senate proposes to establish forest reserves by acquiring property that has been reduced to possession and control by individuals in the several States. It is an entirely new departure. It is something to which, at least on this side of the House, it would be natural to expect some opposition. But if it is to be done at all, Mr. Speaker, it should be done without regard to the section of the country. Why should my State be discriminated against? It has expended more than $20,000,000 to conserve its forest reserves and to protect its watersheds. If the Federal Government is to go into these other States in order to do that work for them, why should not my State be reimbursed for its expenditure? The State of Pennsylvania, if I be not mistaken, has expended large sums from the State treasury to create forest reserves and to protect the watersheds within that State. Should not the Federal Government reimburse that State for that work?

Mr. SULLIVAN. I should like to ask the gentleman whether, in his judgment, this is not strictly a national project; and, second, suppose the cupidity of lumber cutters in the State of New Hampshire causes the depletion of the timber there and causes a diminution of the waters of a stream which flows from New Hampshire down through Massachusetts to the sea, what means has the State of Massachusetts of protecting that stream and protecting a navigable river of the United States?

Mr. FITZGERALD. Mr. Speaker, if that argument is to be conceded, and I will not challenge it at this time, it justifies the Federal Government in interfering in every case where some wrongdoer in one State creates an evil condition in another State. I am not ready to admit that to be advisable. But if we are to embark upon this new policy of having the Federal Government go into the different States to establish forest reserves, not upon the public domain but by the acquisition of land now held by private interests and subject to State control, then when we initiate the policy we should do it in such a way that the Federal Government may go into every State where it would be desirable to protect the watersheds of rivers that are navigable and that run through more than one State. For that reason I favor the amendment of the gentleman from Indiana. Let us have this "square deal" about which we hear so much.

The Senate amendment can be analyzed very easily. It is a combination between those representing the New England States and those representing the States that will be benefited by the acquisition of the land in the Southern Appalachian chain. They are united not because of community of interest, but because of community of plunder. Such a combination has never been seen before in this House.

Mr. McNARY. Without making any comment upon the gentleman's last remark, I should like to ask him if he has ever advocated certain surveys and improvements in the waters of New York Bay, without reference at all to having the whole country surveyed and the waters of every other bay improved?

Mr. FITZGERALD. No; I have not.

Mr. McNARY. Mr. Speaker, will the gentleman let me ask him——

Mr. FITZGERALD. Let me answer the gentleman. I say I have not.

Mr. McNARY. Let me ask the gentleman whether or not he has proposed any specific surveys or favored any surveys or specific improvements for New York Harbor?

Mr. FITZGERALD. I know what the gentleman's question

is, and I am glad to say to the House that I have an unblemished record. I have never proposed any survey. I have asked the Congress to provide money to continue improvements that were in the course of being made, but I have not, so far as I can recollect at the present time—I may be under a misapprehension. [Laughter.]

Mr. LITTLEFIELD. The gentleman does not think of any now. [Laughter.]

Mr. FITZGERALD. But regardless of that, I do not believe that any gentleman in this House believes that an amendment to a river and harbor bill for surveys for new projects is on the same plane as this project; that is a general and settled policy upon which the Government has embarked.

The SPEAKER. The time of the gentleman has expired.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 23630) to quiet title to lands on Jicarilla Reservation and to authorize the Secretary of the Interior to cause allotments to be made and to dispose of the merchantable timber, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CLAPP, Mr. CURTIS, and Mr. TELLER as the conferees on the part of the Senate.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department, disagreed to by the House of Representatives, had agreed to the conference asked by the House of Representatives on the disagreeing votes of the two Houses thereon, and had appointed Mr. FULTON, Mr. KEAN, and Mr. MCLAURIN as the conferees on the part of the Senate.

The message also announced that the Senate had passed joint resolution and bill of the following titles; in which the concurrence of the House of Representatives was requested:

S. R. 95. Joint resolution relating to proceedings to set aside deeds alleged to have been made by Mexican Kickapoos.

S. 8614. An act to amend the act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896.

The message also announced that the Senate had passed with amendment bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company, and to extend and improve said plant.

AGRICULTURAL APPROPRIATION BILL.

Mr. WADSWORTH. I now yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, that consistency is the rarest of all jewels has, it seems to me, been very clearly demonstrated in the course of this debate by the remarks of the learned and talented gentleman from Massachusetts, who perhaps is the most earnest and forceful defender of the rights of the State, at least on this side of the House. In the course of his remarks against the pending amendment, he suggested that he desired to invoke the strong arm of the Federal Government in behalf of the people of Masschusetts as against the rights of the States, and the people of the States lying at the headwaters of the rivers that flow through Massachusetts, and that are utilized in that great State to a considerable extent for manufacturing purposes.

And when we gaze on the other side of the Chamber and note these gallant defenders of State rights, these strict constructionists of the Constitution, these gentlemen who at all times hotly insist that the Federal Government shall not invade the sacred rights of the sovereign States, we discover that when it comes to the establishment of forest reserves and the securing of an appropriation, lo and behold, they are not only willing, but anxious that the Federal Government shall acquire and establish jurisdiction over vast areas of territory, and their voice and vote is against the rights of the sovereign States to jurisdiction over their territory, and in favor of making such jurisdiction in favor of Federal bureaucratic control.

Now, Mr. Speaker, if we are to embark on this paternalistic, imperialistic, and centralizing policy, if it is true that this is an empire and not a republic, if we have not a nation of independent and sovereign States which, under the Constitution, have the right and ought to manage their own affairs; if, on the contrary, the Federal Government should go abroad, buy land at high figures, establish its sovereignty, without regard to the interests of the people of the States—if we are to do this, Mr. Speaker, let us do it with our eyes open; let us know what it means and what it is going to cost. Would it cost $10,000,000 for the White Mountains and $100,000,000 for the Appalachian Reserve and a thousand million for all of these great forest and game preserves? If that is the amount that it is going to cost, let us know about it, and let us know what this establishment of Federal power and control over vast areas will lead to. Let us know how far it goes, what its interference with the rights of the States is to be, and what will be the ultimate outcome of it. Does it mean great game preserves in which the favored few—not the citizens of the State who should enjoy the preference rights to which they are entitled under State governments, but favorites of officials having charge of the forest reserves—are to be allowed to go in and hunt and fish and enjoy all the sylvan delights of these great imperial and royal preserves? If that is a good policy for us to start upon, let us know what it means, where it is going to lead us to, and, above all, how much it is going to cost, and the only way to find out is to have the examination proposed by the amendment offered by the gentleman from Indiana, which I hope will be adopted.

Mr. WADSWORTH. Mr. Speaker, I yield two minutes to the gentleman from South Carolina [Mr. LEVER], a member of the committee.

Mr. LEVER. Mr. Speaker, I was very much interested in the statement of the gentleman from Wyoming [Mr. MONDELL], but I want to remind him that his plea for State rights is coming rather late, when he already has in the West 127,000,000 acres in forest reserve.

Mr. MONDELL. Not by our fault, I will say to the gentleman, and we will gladly surrender at least 100,000,000 acres of those reserves.

Mr. LEVER. We would be very glad to take that in the Appalachian and White Mountain ranges.

Mr. LITTLEFIELD. I would suggest that they have an irrigation proposition in the West which involves exactly these questions, the limit of which nobody yet knows, in millions.

Mr. MONDELL. All of which is to be paid back into the Federal Treasury; not a penny of which is a gift.

Mr. LITTLEFIELD. That is the expectation, but it has not been paid back yet.

Mr. LEVER. Mr. Speaker, I do not yield the floor. I have only two minutes.

The SPEAKER. The gentleman from South Carolina has the floor.

Mr. LEVER. Mr. Speaker, in addition to the 127,000,000 acres under forest reserve, they have their great irrigation scheme out there, and we people over here support it gladly because we think it is a good work.

Mr. MONDELL rose.

Mr. LEVER. I can not yield.

Mr. MONDELL. Is the gentleman willing to pay for these reserves, as we pay for the irrigation?

Mr. LEVER. I do not yield, Mr. Speaker. The gentleman supports the substitute to the Senate amendment because he says he wants the facts. The gentleman must know that the very purpose of the amendment is to get the facts that the gentleman from Wyoming [Mr. MONDELL] speaks about. The Senate amendment proposes to ascertain the cost of the land, to ascertain the natural conditions of the streams and the amount of water power, and all such important information. The very thing the gentleman wants we are trying to get in this amendment, and I do trust that the friends of this proposition will vote down the substitute offered by the gentleman from Indiana [Mr. OVERSTREET].

Mr. WADSWORTH. Mr. Speaker, I yield three minutes to the gentleman from Indiana [Mr. OVERSTREET].

Mr. OVERSTREET of Indiana. Mr. Speaker, there is now pending in this House, I am informed, one bill which asks for an appropriation of $10,000,000 for the purchase of a part of this Appalachian Range.

Mr. LEVER. Three millions of dollars.

Mr. OVERSTREET of Indiana. I think there is one bill calls for $10,000,000. This amendment of the Senate seeks to fasten upon Congress a policy which would lead directly to that character of purchase. The forest reserves to which the gentleman from South Carolina [Mr. LEVER] has referred in the West are reserves of public lands.

Mr. LEVER. Let me ask the gentleman——

Mr. OVERSTREET of Indiana. No; I decline to yield. They are not the purchase of private property. The very fact that the Congress has entered upon the project of irrigation in the West ought to challenge our attention to the importance of going slowly into a new project before we commit the Government to those large expenditures. We should know more of the

facts necessary to base our judgment upon some reasonable grounds. We have no information as to what particular section will be next in order for this survey and examination, and I am in favor of the ascertainment of those facts before we have gone too far to retrace our steps. I think that the Members of this House should take a second thought before they commit the Government to such a condition of affairs, and I appeal to that second thought of the Members, and I believe that when it has been properly exercised they will agree that it is far better to adopt the amendment than to embark upon the project of the survey of these two particular sections of the country with a view to their purchase.

Mr. SOUTHARD. Will the gentleman yield?

Mr. OVERSTREET of Indiana. I yield to the gentleman.

Mr. SOUTHARD. I would like to ask the gentleman why his proposition does not commit the Government just as much as that involved in the Senate amendment?

Mr. OVERSTREET of Indiana. I am very glad the gentleman asked me that question. It gives us an examination of sufficient latitude to have some sort of information of the final cost. If we bring into the House at the next session a proposition for the purchase of a part of the White Mountain and southern Appalachian Range and then a suggestion is made for an additional examination and purchase, we would be just where we are now; but we do not know whether this project is to cost $3,000,000 or $300,000,000, and now is the time to stop and consider whether or not we will move on without information or by adopting this kind of examination find out just where this project will lead the Government. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on the motion of the gentleman from Indiana that the House recede and concur in the Senate amendment with an amendment, which has been reported.

Mr. THOMAS of North Carolina. Mr. Speaker, a parliamentary inquiry. Will the motion to recede and concur not take priority over the motion of the gentleman from Indiana?

The SPEAKER. The Chair understands that a motion to recede and concur would take priority, but both motions are divisible, and if the motion was taken first on receding, as it would be, then the motion to amend would have precedence over the motion to concur.

Mr. THOMAS of North Carolina. Mr. Speaker, then if we vote down the motion of the gentleman from Indiana we can move to recede and concur?

The SPEAKER. Yes.

Mr. UNDERWOOD. Mr. Speaker, I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. UNDERWOOD. At this stage of the proceedings, the bill having come from the conference committee, has not that motion which has a tendency to bring the two Houses together priority over a motion that has not? Then, if that is the case, at this stage of the proceedings would not the motion to concur have priority over the motion to recede and concur?

The SPEAKER. In the first place, the bill is not in conference. In the second place, under all circumstances a motion to recede and concur is divisible and takes precedence over the motion to disagree. Now, then, the gentleman from Indiana made a motion to recede and concur with an amendment. That is divisible. Now, if that vote on another motion, which would be in order, to recede and concur, is taken and a vote is taken to recede and the House should conclude to recede, why then the amendment of the gentleman from Indiana would be in order before the vote on the motion to concur. As many as are in favor of the motion of the gentleman from Indiana that the House do recede and concur in the Senate amendment with an amendment that has been reported, say "aye;" those opposed, "no."

The question was taken; and the Chair announced the Chair was in doubt.

On a division (demanded by Mr. OVERSTREET of Indiana) there were—ayes 74, noes 105.

Mr. OVERSTREET of Indiana. Mr. Speaker, I ask for tellers.

Tellers were ordered.

The SPEAKER. The gentleman from Indiana [Mr. OVERSTREET] and the gentleman from South Carolina [Mr. LEVER] will take their places as tellers.

The House again divided; and the tellers reported—ayes 71, noes 121.

So the amendment was rejected.

Mr. LAMB. Mr. Speaker, I move to recede and concur in the Senate amendment.

The question was taken.

The Chair announced that the ayes seemed to have it.

Mr. MANN. Division, Mr. Speaker!

The SPEAKER. The gentleman from Illinois demands a division.

Mr. MANN. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 138, nays 115, answered "present" 4, not voting 120, as follows:

YEAS—138.

So the motion was agreed to.

The Clerk announced the following additional pairs:
Until further notice:
Mr. BANNON with Mr. GARBER.
Mr. BABCOCK with Mr. BROUSSARD.
Mr. BURKE of Pennsylvania with Mr. DAVIS of West Virginia.
Mr. BROOKS of Colorado with Mr. PUJO.
Mr. CAMPBELL of Kansas with Mr. RANSDELL of Louisiana.
Mr. GILLETT with Mr. LIVINGSTON.
Mr. COLE with Mr. GUDGER.
Mr. DOVENER with Mr. HEARST.
Mr. PEARRE with Mr. TOWNE.
For the balance of the day:
Mr. DAVIDSON with Mr. JONES of Virginia.
Mr. JENKINS with Mr. HENRY of Texas.
For the vote:
Mr. BRADLEY with Mr. GAINES of Tennessee.
Mr. DRAPER with Mr. BURLESON.
Mr. GAINES of West Virginia with Mr. SIBLEY.
The result of the vote was announced as above recorded.

The SPEAKER. Is a separate vote demanded on amendment No. 88?

Mr. WADSWORTH. Mr. Speaker, I move that the House insist on its disagreement and ask for a committee of conference.

The SPEAKER. The gentleman from New York [Mr. WADSWORTH] asks that the House insist on its disagreement to amendment No. 88.

Mr. CLAYTON. Is this amendment No. 88 the one relating to agricultural colleges?

The SPEAKER. The amendment will have to be reported.

Mr. WADSWORTH. The amendment is for aid to the State agricultural colleges.

Amendment No. 88 was read, as follows:

That there shall be, and hereby is, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be paid as hereinafter provided, to each State and Territory for the more complete endowment and maintenance of agricultural colleges now established, or which may hereafter be established, in accordance with the act of Congress approved July 2, 1862, and the act of Congress approved August 30, 1890, the sum of $5,000, in addition to the sums named in the said act, for the fiscal year ending June 30, 1908, and an annual increase of the amount of such appropriation thereafter for four years by an additional sum of $5,000 over the preceding year, and the annual sum to be paid thereafter to each State and Territory shall be $50,000, to be applied only for the purposes of the agricultural colleges as defined and limited in the act of Congress approved July 2, 1862, and the act of Congress approved August 30, 1890.

That the sum hereby appropriated to the States and Territories for the further endowment and support of the colleges shall be paid by, to, and in the manner prescribed by the act of Congress approved August 30, 1890, entitled "An act to apply a portion of the proceeds of the public lands to the more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts established under the provisions of the act of Congress approved July 2, 1862," and the expenditure of the said money shall be governed in all respects by the provisions of the said act of Congress approved July 2, 1862, and the said act of Congress approved August 30, 1890: *Provided*, That said colleges may use a portion of this money for providing courses for the special preparation of instructors for teaching the elements of agriculture and the mechanic arts.

Mr. CLAYTON. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The SPEAKER. The gentleman from Alabama [Mr. CLAYTON] moves that the House recede and concur in the Senate amendment, which motion takes precedence of the motion of the gentleman from New York [Mr. WADSWORTH].

Mr. WADSWORTH. Mr. Speaker, how much time have we on that?

The SPEAKER. The gentleman from New York controls the time.

Mr. WADSWORTH. How much time—an hour?

The SPEAKER. The Chair supposes that there could be an hour, but it is now fifteen minutes past 5 o'clock, and many other bills to be acted upon.

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. CLAYTON].

Mr. CLAYTON. Mr. Speaker, I may say to the gentleman from New York [Mr. WADSWORTH] that a brief statement from him would be quite sufficient to inform the House as to what this particular Senate amendment is, and that, so far as I am concerned and so far as I am advised on the part of everybody else who is in favor of this Senate amendment, there is no desire for any protracted discussion. It is a simple proposition, Mr. Speaker, to increase the appropriation for the support and maintenance of agricultural and mechanical colleges. I believe, without stopping to read it in extenso, this Senate amendment provides $5,000 per annum. For how many years?

Mr. WADSWORTH. Five thousand dollars the first year, $10,000 the second year, $15,000 the third year, $20,000 the fourth year, $25,000 the fifth year, and for every year after that $25,000 a year

Mr. CLAYTON. I understand that; and, Mr. Speaker, it is in line with the legislation that has heretofore been passed, beginning with the act of Congress in 1862, for the support and encouragement of agricultural and mechanical colleges and for the teaching of scientific agriculture and of mechanical arts. Now, that is the whole subject. It is for the benefit of agricultural and mechanical colleges. I think, Mr. Speaker, that is all I desire to say.

Mr. WADSWORTH. Mr. Speaker, the House conferees refused to agree to that amendment, first, because it was a most important piece of legislation, leading to important results, involving an ultimate expenditure of $1,150,000 a year, and it had never been considered by the House committee nor by this House and had never been considered by the Senate five minutes. We refused to agree to it also for the reason that there is no State in this Union so poor that it is not able to give to the cause of agriculture anything which that cause may justly ask of her.

Mr. CLAYTON. Mr. Speaker——

Mr. WADSWORTH. What does the gentleman desire?

Mr. CLAYTON. I wanted to ask the gentleman in reply to his first suggestion whether the House committee had not considered this matter, and I doubt not that is true——

Mr. WADSWORTH. It is true.

Mr. CLAYTON. Has not considered it at this session, but has not the Committee on Agriculture repeatedly at former sessions of Congress considered this very appropriation named here in this bill?

Mr. WADSWORTH. Never to my knowledge, and I have been chairman of the committee twelve years.

Mr. CLAYTON. Now, if the gentleman will pardon me, I do not know and do not recall now what committee it was or whether the gentleman was present; but I recollect distinctly that some committee of this House several Congresses ago did have hearings on this very matter.

Mr. WADSWORTH. That may be so, but it was not the Committee on Agriculture during the last twelve years.

Mr. LACEY. There were hearings in the Committee on Public Lands a number of years ago on this question.

Mr. CLAYTON. The hearing was before the Committee on Public Lands.

Mr. WADSWORTH. That is another proposition entirely. Now, Mr. Speaker, as I said before, there is no State in this Union so poor that she can not give to the cause of agriculture any sum that it needs. The original appropriation in 1862 was made when there were a great many new Territories and new States. They were not rich; they had not developed their taxable property, and perhaps in those days it was a sensible proposition.

Mr. TAWNEY. How much are we appropriating to agricultural colleges?

Mr. WADSWORTH. We are already appropriating to agricultural colleges $25,000, and this seeks to add $5,000 a year to that sum, until the total reaches $50,000 a year. To my mind there is a more serious opposition to this bill than that. Mr. Speaker, it opens the widest door toward centralization of power in the Federal Government. It is the longest step toward centralization that this House has ever taken.

Let me show you how easy the steps are. Last year we passed the Adams bill, so called, giving $15,000 a year for the experimental stations. I said then I was opposed to it, and that I thought every State ought to take care of its own. Now, the next thing in the programme will be $15,000 or $25,000 for agricultural colleges. And the step, as you see, has come. Now, let me show you the bills that are pending along this line now before the Committee on Agriculture: "To apply a portion of the proceeds of the public lands to the State normal schools." Now, there are twice as many State normal schools as there are agricultural colleges, and twice as many votes behind them to pass that measure in this House. Another is this bill in question. Another is "For the maintenance of agricultural colleges in Congressional districts;" another, "To provide"—listen—"To provide an annual appropriation for industrial education in agricultural high schools and in city high schools;" another, "To provide for an annual appropriation for branch agricultural and branch experimental stations, and regulate the expenditure thereof."

Now, Mr. Speaker, the next step will be the public schools; and there you have Federal governmental supervision of your school systems and Federal governmental control of your education. That is the basis of my great opposition to it, and I beg this House not to take this step; at least let it go over and be considered on its merits and not jam it through here on an appropriation bill.

Mr. CLAYTON. Will the gentleman give me a few minutes?

Mr. WADSWORTH. With pleasure. I yield five minutes to the gentleman.

Mr. CLAYTON. Mr. Speaker, I did not in the beginning desire or intend to indulge in very extensive remarks, but I do desire to reply briefly to some of the observations just delivered by the gentleman from New York. First, as to his suggestion that this matter has not been properly considered, I desire to say that it has been considered in former Congresses; that it has been discussed in the public prints; that every Member in this House—it may be with the exception of those Members from cities—certainly all the Members of the great country districts, have had this matter under consideration and have had it called to their attention. So much for the "surprise;" that this legislation is by way of "surprise," and that we do not know what we are about to do.

Mr. Speaker, we know what we want to do and when we want to do it, and we propose to pass this measure now in order that poor boys may have the full benefit of a good education in scientific agriculture and the most useful and common mechanical arts.

We have been deliberating upon it, we have been considering it, and this House understands the proposition now as well as if we were to discuss it and consider it again and again during forty Congresses. We are going to have this legislation now. I appeal to the Members from the farming districts to stand with me.

Before going further, I desire to say that the gentleman from Iowa has just called my attention to what occurred in a former Congress. This matter was considered by the Committee on Agriculture—this specific proposition. Since that time——

Mr. WADSWORTH. Will the gentleman yield for a question?

Mr. LACEY. By the Committee on Public Lands.

Mr. WADSWORTH. Oh!

Mr. CLAYTON. I beg your pardon. The Committee on Public Lands considered this very measure. It was not brought before Congress; why, I do not know. The only difference between that measure and this measure is that the proposition when it was pending before the Committee on Public Lands, provided that the funds should come out of the sale of the public lands. Since that time the legislation of Congress has exhausted the money arising from the sale of public lands by devoting it to irrigation purposes.

Now, then, as to the other proposition, of centralization—that this is a great scheme of centralizing the Government. Well, now, nobody is afraid that the Government is going to be ruined and centralized on account of this small contribution to the agricultural and mechanical colleges of the country.

It is too late to discuss this policy of legislation. It was begun in 1862, this very sort of legislation, and it is strictly in line with the policy of that legislation that this present measure is ordered. The agricultural and mechanical colleges that have been aided by appropriations of Congress since the act of 1862 and the other act of 1890 have never in the slightest degree fallen under Federal control. So that imaginary danger suggested by the gentleman from New York can not frighten us.

The gentleman from New York tries further to make it appear that it is a frightful proposition, that a large number of bills of different characters that he refered to might be considered by the House. No good lawyer would and no good legislator ought to depart from the discussion of a pending case or pending measure by going off to try an imaginary case or a measure that is not before the court or legislature. Let us consider this measure that is before us, and on its merits. We do not hesitate to give money to Annapolis or West Point. We do not hesitate to give money for our consular service. We do not hesitate to encourage the commerce of our country, and let us in this small way encourage agriculture as we have commerce, her handmaiden. [Applause.]

Mr. KEIFER. I should like to ascertain whether this provision does not give to every college, regardless of its size, the same sum of money. I understand that to be the fact, and I wish to state that that was not the provision of the act of 1862 establishing these colleges.

Mr. WADSWORTH. I yield five minutes to my colleague from Minnesota [Mr. TAWNEY].

Mr. TAWNEY. Mr. Speaker, as I understand this proposition involved in the Senate amendment, it is that ultimately, under the legislation now upon the statute books and under the legislation that it is proposed by this amendment to write into the statute books, the Government of the United States will in four years be contributing annually to the agricultural colleges and experimental stations $80,000 each per annum. Now, Mr. Speaker, the House, in concurring in the amendment a few moments ago authorizing the survey of the Appalachian Forest Reserve, has opened the way for the expenditure in the next few years of $200,000,000 in the purchase of the worthless land it is proposed to buy from individuals and the States for forestry purposes. I want to call attention to the fact that in the next fiscal year we perhaps will have to meet out of the current revenue of the Government a larger expenditure, authorized by this Congress, than we have ever before made in any year in the history of our Republic. Notwithstanding this fact, the Senate sends us this amendment, thus largely increasing the amount to be donated to the State agricultural colleges. Is there no limit, Mr. Speaker, to the extravagance of this Congress? During this session of Congress the Senate has increased the appropriations carried in the bills sent to that body by the enormous amount of $51,000,000. Fifty-one million dollars is the gross increase of the regular appropriation bills by the Senate above the amount these bills carried when they left the House. Eight millions of that is accounted for on account of the service-pension bill, $6,000,000 of it on account of the Coast Artillery bill, for which the House must share the responsibility with the Senate, leaving a net increase on the part of the Senate over the appropriations as they passed the House of $35,000,000, a larger increase than has ever been made by the other House of Congress for a great many years, if not in the entire history of this country.

I therefore submit, in view of these enormous increases, that we should stop and consider whether or not we can afford to thus legislate on an appropriation bill, without opportunity for considering the merits of the proposed legislation and without time to consider whether the Federal Treasury will be able to stand the increased expenditure made necessary by appropriating this increased amount to every State and Territorial agricultural college in the country. True, the amount is only $80,000 to each college, but that amount will be added to hereafter if this policy is continued, as is evidenced by the bills that are now pending before the Committee on Agriculture.

Mr. SOUTHARD. I should like to ask the gentleman if this amount is not more urgently needed in the improvement of State roads?

Mr. TAWNEY. No doubt this amount would serve a better purpose in some respects if used in the improvement of our roads, but it would be hard for the gentleman from Ohio to convince his rural constituents of that fact. Pressure upon Congress for the passage of a good-roads bill is growing all the time, and if we continue this policy of paternalism much further it will not be long until Congress will be swept off its feet and called upon to appropriate from $25,000,000 to $50,000,000 annually for the construction and maintenance of good roads. I hope, Mr. Speaker, that the House will stop and consider the extent to which we are going in this session of Congress in the appropriation of the public funds for objects that are not governmental, but purely paternal.

Mr. STAFFORD. Would $80,000 a year be sufficient to support an agricultural college without any aid from the State whatever?

Mr. TAWNEY. I do not know whether $80,000 would be sufficient, but in view of the fact that it is not a part of the business of the Federal Government to maintain these local institutions, $80,000 is more than we ought to contribute for that purpose. Mr. Speaker, I now yield five minutes to the gentleman from Minnesota [Mr. DAVIS].

Mr. DAVIS of Minnesota. Mr. Speaker, if the House will give me its attention for a few moments I will, in a concise form, give what I understand to be the present situation. In 1862 the Congress passed what is known as the "Morrill Act." That act gave an endowment for the benefit of agricultural colleges and mechanic arts schools certain donations of land, and the States were authorized under that act to select these lands, sell them at the price then authorized, and out of the proceeds to form a permanent endowment fund for inaugurating and perpetuating the agricultural and mechanic arts colleges. Supplemental to that act the second Morrill Act, in 1890, was passed, which gave to each State having an agricultural college therein established the sum of $25,000 annually.

Now, at the time the first Morrill Act was passed there was no such thing as a manual training school, a mechanic arts school, an industrial school, or an agricultural college. The impetus given to that branch of education by this donation was very marked. It produced an effect like that produced upon our public schools when the Government donated and appropriated large tracts of the public domain in their behalf. Our common schools, which are our pride are largely the product of Federal aid. Call it paternalism, call it centralization of power, but such is the case with the present common school system, and who objects to it? In consequence of these two public acts, what has been the result? At the present time

it has incited every State government to invest, and they have invested in lands and buildings for agricultural colleges and mechanic arts schools the enormous sum of $45,834,731, making an average for each State of $954,000.

At the present time the annual appropriations by the Government for the maintenance of all these schools is less than $2,000,000. Of the total expenses of maintaining this splendid system of education, 83 per cent thereof is borne by the respective States.

Now, Mr. Speaker, I want to say just a word as to centralization. I do not agree that this provision, or any other of a similar kind, means in the least centralization of power. Centralization of power does not mean to build up and make strong an individual State. The individual State is a unit, and the more powerful you make the individual State, the more independent it becomes; and the greatest power you can give the individual State is to aid it and to educate it along the lines of industrial arts and agriculture. This amendment means decentralization in every line and every word.

The family unit is strongest when each of its members are individually strong. The State is most powerful when all of its peoples are social, moral, and intellectual giants, and the Federal Government is all powerful only when each and all of the States and Territories constituting it have attained a degree of great solidarity; call it what you may, "paternalism" or "centralization of Federal powers," yet to my mind the education obtained by and through colleges of agriculture or mechanic arts strengthens and develops not only the Government, but all and each of its constituent parts, and hence fails to be obnoxious.

During the year 1905 the total income from all sources for all of these colleges was $9,748,702, 83 per cent of which was furnished by the respective States and the balance by the Federal Government. This showing indicates the great strides that have been made in this line of education since the endowment of these colleges under the Morrill Act of 1862.

The amendment placed upon this bill by the Senate, and which I earnestly hope will be concurred in by the House, provides for an annual increase of appropriations for these colleges of agriculture and mechanic arts in the sum of $5,000 for each State and Territory in which one or more of these colleges are established and maintained, and a like increase of $5,000 for four additional years thereafter, thus making $25,000 for each State and Territory, so that ultimately the Federal Government will contribute to the States and Territories $50,000 annually for the encouragement and maintenance of these institutions of learning.

The amendment further provides that a portion of this may be used for providing courses for the special preparation of instructors for teaching the elements of agriculture and the mechanic arts.

Statistics show that of the many thousand students now being instructed in these colleges the line of their instruction is as follows: Fully one-half thereof are pursuing a practical course of study in all the various branches of mechanic arts; and of the remainder, about two-thirds are being educated along agricultural lines and one-third in home economics.

This new education, while retaining the high moral and ethical ideals of the old, combines with these substantial training in doing the thing of everyday life. This broader field of public education is now suited to the needs alike of workers, business men, home makers, technicians, and professionals. It trains to think by thinking. It trains to do by doing. And Congress can not do too much to help the States in completing this broadest kind of public education.

These land-grant colleges have influenced the nonagricultural industries to nearly as great a degree as they have improved agriculture.

The engineering courses in these colleges have supplied a large share of the men to develop our vast systems of transportation and manufacturing.

The people are generally awakening to the value of educating the boy and girl along these lines who are to remain on our farms. They are being educated, as it were, closer to the soil, for in its last analysis productive land is the basis of our greatest and lasting prosperity.

We are nearing the 90,000,000 population mark, and about one-third of whom are of school age. Therefore let us be wise in time and educate these young men and women in a way that they will not only be self-supporting and wholly independent, but that they may by their knowledge and habits of industry contribute more surely to the welfare, happiness, and prosperity of our already great but constantly increasing civilization, ever remembering that education ought not to be, and is not, a burden upon civilization, but that education is strong and bears upon its shoulders civilization itself. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. WADSWORTH. I now yield five minutes to the gentleman from Kansas [Mr. SCOTT].

Mr. SCOTT. Mr. Speaker, the importance of the original act by which the agricultural colleges were established is of course conceded. It might indeed be called an epoch-making measure, because it began a new policy on the part of the Federal Government. It was a measure of so great importance and ran so far contrary to the policies that had theretofore been followed that the preceding President, James Buchanan, vetoed a similar, if not exactly the same, measure during his Administration. He vetoed it on the ground that it was an unwarranted, unconstitutional expenditure of Government funds to be expended in education wholly within the State.

Here we have a measure brought in in the closing hours of this session almost as important as this original act, because it doubles the appropriation which the original acts carried, brought in here without any consideration by any committee in this House, without any consideration on the floor of the Senate, and in such a shape that if it had been brought here originally it could have been stricken from the bill on a point of order. It seems to me, therefore, that the action of your conferees in refusing to concur was fully warranted in the interest of orderly and regular parliamentary procedure. But passing by for a moment the irregular way in which the measure comes before us. I most earnestly believe that the House ought to stand by its conferees on the merits or, I should say, the demerits of the measure. I want to call the attention of Members of this House to the fact that the Government of the United States is already paying to each of these agricultural colleges $25,000 a year under the Morrill Act, $15,000 a year under the Hatch Act, and when the Adams Act matures we will be paying $15,000 more a year, a total of $55,000 a year, which goes to these agricultural colleges and experiment stations in every State and Territory of the Union. If this act should become a law when it reaches maturity, we will then be paying $80,000 a year to every State and Territory, and that would make an annual appropriation for that purpose of $3,840,000. It seems to me preposterous that the States should come to the Congress after having been so generously treated and demand still further grants. I know that in the State which I have the honor to represent here we have a splendid agricultural college, and I am not saying a word against the policy, because I approve of it. We have a splendid agricultural college, and I want to say to the credit of the man who presides with honor over that institution that he has not asked the Representatives here from Kansas to support this measure, because he knows that that State can provide for itself.

Mr. PERKINS. Mr. Speaker, how much are these strictly agricultural colleges? Is it not a fact that by no means the larger proportion of students actually follow the profession of agriculture, and that to a large extent they are mostly colleges for general education for those entering all ranks of life?

Mr. SCOTT. The gentleman from New York has called the attention of the House to a very important fact, Mr. Speaker, and that is that the agricultural colleges carry general courses of instruction and do not by any means limit their work to education in agriculture—another reason why this additional grant should not be made. But I was going on to say that if any of these colleges need more money than they are getting from the Government, there is no Commonwealth in this nation that is not amply able to supply that money. I may be pardoned if I make reference to a personal experience. As a member of our own State legislature, when bills came before the committee of which I was a member making appropriations for the various educational institutions of the State, we took judicial notice of the fact that the agricultural college was getting $40,000 a year, as it was at that time, from the Government, and we cut the appropriation from the State treasury by just that amount. If we pass this measure, it simply means that when the next legislature meets the amount of money to be appropriated from the State treasury will be reduced by just the amount this bill carries. And what is true in Kansas will be true in all the other States and Territories. The passage of this bill will not result in a single additional dollar being spent for agricultural education. It will simply mean that the money shall be taken from the national and not from the State treasuries.

[Here the hammer fell.]

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. TOWNSEND].

Mr. TOWNSEND. Mr. Speaker, I shall not occupy much time, but I feel like calling the attention of the House to the

fact that this is not a departure from the methods that have been hitherto followed, and in answer to the statement of the gentleman that this is a question that has never been properly considered, I desire to inform the House that a printed document of the Senate entitled "Hearings before the Committee on Agriculture and Forestry" is in evidence before us, and to further inform the gentleman of the fact that beginning at about page 58 and concluding with page 86 there is evidence on this particular subject taken before the Committee on Agriculture in January and in the first days of February of this year. I think some of the most distinguished gentlemen that have been before any committee appeared before the committee at that time and made statements as to the necessity of this particular legislation.

It is not true that this legislation is intended for State purposes alone. The original idea which was maintained in 1862 and which was again brought to the attention of the Congress in 1890 fairly illustrated the fact that if this Government was to aid in any particular department of the public life, it could bring the most benefit through aid along the lines of our agricultural schools. One gentleman has suggested that a majority of the boys who graduate from our agricultural colleges do not follow the profession of farming (I think it is a profession at this time); but the fact of the matter is that there is scarcely a boy who goes out from our agricultural schools who does not make life mean more, who does not contribute perhaps more to the general benefit of the whole people, than is done by the graduate of almost any other college. This provision is made for the purpose of enlarging the possibilities of the work of these schools, and it is interstate. There can be no question about that. There is coming to be a common system of agricultural schools throughout the United States, and the professors in one school visit and lecture to the students in other schools. So I say that there is a fairly uniform system all through the United States. We have here in this House contributed thousands of dollars of the public money for the purpose of investigating fuels, for the purpose of investigating our geological conditions, and yet I submit that there is no money that could be expended in a more generally useful way, in a way that reaches the people more directly, that more forcibly appeals to the higher manhood and to better civilization, than this particular appropriation. [Applause.] And it is supported, I repeat, by the very best men who have appeared before any committee—men who have devoted their lives to this particular work.

I do not care to occupy any further time, although it is a most fruitful subject for discussion. Let us consider for a moment the higher principles of our civilization, and not devote ourselves always to the lower elements. We have a school in Michigan that turns out boys which reflect credit on all of the United States. It is the first of its kind in the United States. It is an inspiration for others to follow. Let us say by our vote that manhood is not at a discount in comparison with coal or gold. Can this House afford to subsidize steamship companies, develop water courses, test coal, and then refuse to aid in extending knowledge and developing manhood? I can not believe it.

[Here the hammer fell.]

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Michigan [Mr. GARDNER].

Mr. GARDNER of Michigan. Mr. Speaker, I regret to differ with my honored colleague, but I would like to have him and the House notice a few figures. We are now, if this measure passes, contracting to give $80,000 a year in perpetuity to fifty institutions, State and Territorial. What does that mean to each college? It means a sum equal to $2,000,000 every year at 4 per cent per annum to every institution. At 4 per cent that means an accrued income at the end of twenty years of $1,600,000 to the agricultural college of the State of Michigan and every other like institution.

It means the drying up of private benevolence and that our States will withhold the hand that gives to our agricultural colleges because the General Government gives so liberally. I speak for the State of Michigan when I say I believe her great commonalty do not ask it. She is rich in agriculture, rich in mines, rich in all the elements of wealth, and she does not ask the Government to give this perpetual endowment, which would annually employ forty professors at $2,000 each. The Michigan Agricultural College is the oldest, the most renowned, and one of the best endowed in the country. The President of the United States comes to us on the 31st of May to celebrate our semicentennial as the mother of all the agricultural colleges in the United States.

Mr. TOWNSEND. Let me interrupt the gentleman. I want to remind the gentleman that before Members of this House and before Members of the Senate the president of the agricultural college in Michigan did insist that this should be granted. I know of no way of voicing the sentiment of Michigan except through its authorized agent. [Applause.]

Mr. GARDNER of Michigan. And there is no institution in the country that will not do the same. There is not a State that has not an agricultural college, and there is not a Territory that has not an agricultural college now that will not have one in twelve months and come here asking for $80,000 to sustain it. I hope, gentlemen, you will not embark upon this undertaking without ample consideration and discussion. This is far-reaching in extent. The gentleman from Michigan talks about the benefit to men living upon the farm. A former president of the Michigan Agricultural College states that very few of her graduates are practical agriculturalists——

The SPEAKER. The time of the gentleman has expired.

Mr. WADSWORTH. Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. HEPBURN].

Mr. HEPBURN. Mr. Speaker, I am sincerely in favor of concurring in the Senate amendment. [Applause.] I do not regard this bill as showing any predilection toward paternalism. If it is, then paternalism with regard to the matter of education has been a favored method of procedure of the Government of the United States. The very first of the new States carved out of the Northwest Territory coming into the Union received a sixteenth section of land in each township for educational purposes. Every other State, from 1803 down to about 1860, received a sixteenth section of land for educational purposes. Then came a new policy and the sixteenth and thirty-sixth sections of land were granted to all of the new States, and to some a very much larger portion of the public domain was given.

There has been no equality in the distribution of the public lands, but very great inequality. The old States not only secured all of the land within their borders, but Pennsylvania, New York, Connecticut, and others of the old States received large grants in the Northwest Territory. Now, this is in the direction of absolute equality to all the States. Heretofore the legislation has not been of that character. The original grant made to establish agricultural colleges in 1862 was 30,000 acres for each Senator and Representative in the delegation of the State. Under that legislation the State of New York, without an acre of public lands within her borders, received about 900,000 acres. She received it in scrip, and scrip that very shortly became very much more valuable than the dollar and a quarter an acre, the money value that that act of Congress gave to this donation. Practically it was money to the old States rather than land.

Now, this bill in its operation is uniform. It operates upon all the States alike. It will be remembered that some of the States by the act of 1862 were debarred from participating in its benefits. Whether that has been remedied to the full since then I am not prepared to say, but some of them at least are compelled to take an inferior quality of land that did not bring to them the large sums that some other of the States got. This bill, however, is equal in its benefits to all, and I for one am not deterred by the fear that this is paternalism. I am not deterred by the extravagant figures of my friend, the $40,000,000 that are to be given to his State, which he will upon reflection conclude was an effort to draw upon his imagination. No such sums as those come from the Treasury of the United States. He talks about income rather than capital.

Mr. GARDNER of Michigan. Does the gentleman deny the accuracy of the figures?

Mr. HEPBURN. I do not deny the accuracy of the figures, but the gentleman has multiplied, in showing the enormousness of this grant, the actual outlay of the Government some twenty or twenty-five times.

Mr. GARDNER of Michigan. Does not the gentleman know that every college in the land creates its income in that way?

The SPEAKER. The time of the gentleman has expired.

Mr. WADSWORTH. Mr. Speaker, I yield three minutes to the gentleman from Ohio [Mr. KEIFER].

Mr. KEIFER. The gentleman who has just taken his seat has fallen into some confusion about equality. He has forgotten that the original act of 1862 gave a certain number of acres of land or scrip to each Congressional district, and that in that way we had in the larger States the larger amount of land or scrip. He has also forgotten that States that had no land subject to be taken up got only scrip and could not enter land with it in the name of the State unless on land within the State. He has forgotten that in the States having no land subject to entry they generally sold their scrip for 50 cents an acre. I bought some of it myself, and I know. The only State that I can now

recall that violated that was the State of New York. That State had its scrip taken by Mr. Cornell, who went to Wisconsin and, perhaps, to other States and Territories and there entered it in his own name and afterwards sold it and gave the proceeds of the sale to the State of New York, and therefore New York called her agricultural college "Cornell." That is the way it worked in that State. And now it is not proposed to equalize this matter of donation and to carry it on from year to year, but it is proposed to give to each agricultural college in each State, and to each little agricultural college as much as the greater ones. If this is equity, I do not understand it. That is the reason, no doubt, that it has friends all around here, but if we are going to do equity we should give in proportion to numbers in each State, in proportion to students in the colleges. You ought to do it by following the same general principle and rule established in the original act of 1862, which laid the foundation for all these colleges. That act only intended to endow, through the public lands, these agricultural institutions, and it did not contemplate the carrying on of those institutions, and it devolved on the States to carry them on, as has been done ever since.

[Cries of "Vote!"]

Mr. WADSWORTH. Mr. Speaker, I ask for a vote.

The SPEAKER. The question is on the motion of the gentleman from Alabama to recede from the disagreement and concur in the Senate amendment.

The question was taken; and the Speaker announced that the noes seemed to have it.

Mr. CLAYTON. Division!

The committee divided; and there were—ayes 100, noes 92.

Mr. WADSWORTH. Mr. Speaker, I ask for the yeas and nays.

Mr. WILLIAMS. Mr. Speaker, I want to suggest to the gentleman from New York that we take a recess from now until 8 o'clock, and at 8 o'clock have the yeas and nays.

Mr. PAYNE. Regular order!

Mr. WILLIAMS. That destroys the recess, and you will have to be here all night.

The yeas and nays were ordered.

The question was taken; and there were—yeas, 120, nays 87, answered "present" 4, not voting 166, as follows:

YEAS—120.

So the motion to recede and concur was agreed to.

The following additional pairs were announced:

For this session:

Mr. SHERMAN with Mr. RUPPERT.

Mr. BRADLEY with Mr. GOULDEN.

Mr. FOSS with Mr. MEYER.

Until further notice:

Mr. BROWNLOW with Mr. GAINES of Tennessee.

On this vote:

Mr. ELLIS (against) with Mr. PADGETT (in favor).

Mr. MCKINLEY of Illinois with Mr. LEVER (against college).

Mr. NORRIS (favor receding) with Mr. ROBERTS (against receding).

Mr. COOPER of Pennsylvania with Mr. BARTLETT.

Mr. LILLEY of Connecticut with Mr. STEPHENS of Texas.

Mr. KINKAID with Mr. RUCKER.

Mr. BEIDLER with Mr. BRUNDIDGE.

Mr. BEDE with Mr. SMITH of Texas.

Mr. WATSON with Mr. CLAUDE KITCHIN.

Mr. SIBLEY with Mr. RICHARDSON of Alabama.

Mr. GOEBEL with Mr. LLOYD.

Mr. SNAPP with Mr. SHACKLEFORD.

Mr. DRAPER with Mr. BURLESON.

Mr. BARTHOLDT with Mr. DE ARMOND.

Mr. GARNER (in favor) with Mr. KELIHER (against agricultural college).

Mr. ALEXANDER with Mr. DAVEY of Louisiana.

Mr. BURKE of Pennsylvania with Mr. HUNT.

Mr. DAWSON with Mr. SIMS.

Mr. HOWELL of Utah with Mr. SLAYDEN.

Mr. PRINCE with Mr. SULZER.

Mr. THOMAS of Ohio with Mr. SPIGHT.

Mr. KNAPP with Mr. TOWNE.

The result of the vote was then announced as above recorded.

On motion of Mr. CLAYTON, a motion to reconsider the vote by which the House receded from its disagreement and concurred in the Senate amendment was laid on the table.

Mr. BURLESON. Mr. Speaker, I send to the Clerk's desk a bill and ask that it be read.

The Clerk read as follows:

A bill (H. R. 13671) to provide for the taking of a census of agriculture in the year 1906 and every tenth year after the year 1905.

*Be it enacted, etc.*, That in addition to the census now required by law to be taken every ten years, there shall be taken in the year 1906 and every tenth year after the year 1905 a census of agriculture, which shall show:

First. A classified census of live stock, with their values.

Second. The acreage of the principal crops, including cotton, corn, wheat, rice, and oats, grown in the United States.

SEC. 2. That the Director of the Census is hereby authorized and required to prepare such schedules and to make such rules and regulations and to submit such estimates as may be necessary to carry this act into effect. And he may utilize the services of rural free-delivery carriers wherever practicable in distributing and collecting schedules along the routes of such carriers, who will perform this service without additional compensation: *Provided*, That for the purpose of securing the statistics required by this act the Director of the Census may select and appoint special agents when necessary, and such special agents shall receive compensation at rates not to exceed $4 per day and actual necessary traveling expenses and an allowance in lieu of subsistence not exceeding $2 per day during their necessary absence from their usual place of residence: *And provided further*, That said special agents shall be residents of the counties where they are to be employed.

SEC. 3. That the Director of the Census is hereby prohibited from publishing any statistical data gathered under the provisions of this act containing an element of estimation, but he shall only cause to be announced actual facts ascertained to exist through careful canvass and enumeration.

Mr. BURLESON. Mr. Speaker, more than three years ago I introduced a bill embodying substantially the same provisions contained in this bill. I did so after consultation with the representatives of many agricultural associations and at the instance of the late secretary of the National Live Stock Association of America, who urged the importance of a more frequent enumeration of live stock. At that time the purpose of the bill was indorsed by the National Board of Trade. Shortly before then a committee had been appointed, representing the various commercial organizations of our country, to investigate agricultural statistics as disclosed by the last census, and this committee, consisting of a member of the Philadelphia Commercial Museum, the New York Produce Exchange, the Chicago Board of Trade, the Baltimore Chamber of Commerce, the Cincinnati Chamber of Commerce, and the National Board of Trade unanimously reported in favor of "a census report every five years, especially for agricultural data which form a basis for calculations of estimates and of area and production by other official service, governmental and otherwise, as to the more prominent crops and as to the number of farm animals." Since introduction this bill has likewise been indorsed by a number of agricultural societies and farmers' institutes and associations throughout the Southern States.

The purpose of the measure is first to obtain a quinquennial census of the live stock of the country. The necessity and importance of this is readily and naturally suggested to the mind of every thoughtful person. A second purpose is to obtain a quinquennial census of the acreage planted to the more important crops like cotton and wheat, for the purpose of furnishing the Bureau of Statistics of the Agricultural Department more frequent standards, in order to enable it more accurately to prepare its annual estimate of these crops.

Mr. Speaker, the annual estimate of live stock issued by the Agricultural Department largely depends for its accuracy upon a base line of established fact. This base line is furnished every ten years by the national census. It is believed by those most competent to judge that there should be furnished to the scientific statisticians who make these estimates a more frequent standard. Believing this, the cattle growers of the Northwest and the Southwest have been for many years persistently urging the necessity of a quinquennial census of live stock. They say that the period of time between each decennial census is so long that they become uncertain whether or not the annual estimate furnished by the Agricultural Department is sufficiently accurate to enable them to determine the real value of their stock.

If error should creep into the annual estimates of live stock made by the Agricultural Department, one can readily understand that the error might become more hurtful year by year as we get away from the standard which is furnished by each decennial census, and this error might not be corrected until the next decennial period was reached. You can easily understand what great damage might be done our live-stock interests, especially when it is remembered that we annually export approximately a quarter of a billion dollars of live stock and meat products. Furthermore, a material change in the market price of live stock frequently results in a decrease of the output for several years following this change of price. I will illustrate what I mean: Suppose there is a marked advance in the price being paid for cattle in Fort Worth, Chicago, Kansas City, or St. Louis. It frequently results in many female cattle being disposed of, and in consequence of this fact there is for several years a smaller increase in the number of cattle. Or, on the contrary, as has happened, if cattle sell for a number of years at a very low price, the stock raiser is not encouraged to enlarge his herd, but, on the contrary, reduces the number of his female cattle, which is followed, of course, by a decrease in the annual output of cattle. These conditions can only be known to the parties at interest through the instrumentality of the Department of Agriculture when it announces its annual estimate of live stock, and any action we can take to make these estimates more accurate is, of course, of the greatest importance. All stock growers thoroughly understand this.

The purpose of this bill has therefore been indorsed by the National Live Stock Association of America and by the Texas Cattle Growers' Association. Mr. Martin, late secretary of the National Live Stock Association, made a trip from Denver to Washington for the purpose of setting this measure on foot, having been directed to do so by the membership of that organization.

Mr. Speaker, the knowledge of the number of stock raised in the country has not only a very material effect upon the value of the stock, but if the fact is made known (through the annual estimates) that the number of cattle or hogs has for any reason decreased or increased it enables the grower to determine the correct line of policy to adopt—whether to sell or to hold; whether to prepare to increase or diminish the number he is growing.

The principal difficulty besetting the statistician in making the annual estimate of live stock has been the marked changes in conditions occasioned by the extraordinary development of the southwestern and northwestern sections of our country.

These varying conditions have brought about many radical changes, especially with regard to domestic animals, which the system of the Department has found it difficult to meet as time has elapsed after each census. The transference of stock raising from range to farms, the multiplication of farms upon hitherto public land, the expansion of dairying, the feeding of beef animals, the breeding of horses, and the shifting of sheep-growing areas—all these have presented difficulties with which no system short of a census enumeration could cope during years far subsequent to a census. If this country had such constant and stable agricultural conditions as are found in Great Britain, Germany, or France, perhaps the crop-reporting system, outside of census enumeration, might be trusted to work along upon this census base line for a period of ten years, since it would find no place where it would be balked by radical and momentous changes in agriculture and stock raising; but in this country, where such changes are constantly going on, the country certainly needs to give to the Department of Agriculture a more frequent base line than one every ten years with respect to the principal crops and domestic animals.

Mr. Speaker, I desire to impress on the House the importance of the special agricultural census under discussion, and I ask consideration of two or three commodities or groups of commodities. Take the *live stock on farms and ranges*. They have increased to vast numbers, and in the aggregate amounted to 204,000,000 on January 1, 1907, at a time when the number of sheep and of swine is from 15 to 20 per cent below the number in early summer.

The value of live stock on farms and ranges in the United States was ascertained by the Department of Agriculture to be $4,424,000,000 on January 1, 1907. The increase in the number of domestic animals on the farms and ranges of this country for a period of sixty-seven years is exhibited in certain tables which I will embody in my remarks.

TABLE A.—*Number of domestic animals on farms and ranges June 1, as ascertained by census enumerators in contiguous United States, 1840–1900.*

[Not including calves, colts, and lambs under 1 year.]

| Census of June 1— | Cattle. | | | Horses. | Mules.[a] | Sheep. | Swine. |
|---|---|---|---|---|---|---|---|
| | Total. | Dairy cows. | Other cattle. | | | | |
| | *Number.* | *Number.* | *Number.* | *Number.* | *Number.* | *Number.* | *Number.* |
| 1840.. | 14,971,586 | ..... | ..... | ..... | ..... | 19,311,374 | 26,301,293 |
| 1850.. | [b]17,778,907 | 6,385,094 | [b]11,393,813 | [b]4,336,719 | [b]559,331 | 21,723,220 | [b]30,354,213 |
| 1860.. | [b]25,620,019 | 8,585,735 | [b]17,034,284 | [b]6,249,174 | [b]1,151,148 | 22,471,275 | [b]33,512,867 |
| 1870.. | [b]23,820,608 | 8,935,332 | [b]14,885,276 | [b]7,145,370 | [b]1,125,415 | 28,477,951 | [b]25,134,569 |
| 1880.. | [c]39,675,533 | 12,443,120 | [c]27,232,413 | [b]10,357,488 | [b]1,812,808 | [c]42,192,074 | [c]49,772,670 |
| 1890.. | [c]57,648,792 | 16,511,950 | [c]41,136,842 | [c]15,266,244 | [c]2,251,876 | [c]40,876,312 | [c]57,426,859 |
| 1900[d] | 52,403,828 | 17,135,633 | 35,268,195 | 16,952,191 | 3,032,987 | 39,852,967 | 62,868,041 |

[a] Prior to 1890 asses and burros were enumerated with mules.
[b] No separate report or estimate of range animals.
[c] Including estimated number of range animals separately reported.
[d] For purposes of comparison spring calves, colts, and lambs are not included in the total numbers of neat cattle, horses and mules, and sheep, respectively, for 1900. In 1850 they were excluded from reports by instructions to enumerators. For other census years no instructions were given concerning them. It is probable that a few, but not all, were reported.

TABLE B.—*Total value of domestic animals, 1900 and 1907, in contiguous United States.*

[Including calves, colts, and lambs under 1 year.]

| Date. | Total. | Cattle. | | |

| DEPARTMENT OF AGRICULTURE. | | | | |
| 1907, January 1: | | | | |
| On farms and ranges | 204,132,000 | 72,534,000 | 20,968,000 | 51,566,000 |

| Date. | Horses. | Mules. | Sheep. | Swine. |
|---|---|---|---|---|
| CENSUS. | | | | |
| 1900, June 1: | *Number.* | *Number.* | *Number.* | *Number.* |
| On farms and ranges | 18,267,020 | 3,264,615 | 61,503,713 | 62,868,041 |
| Off farms and ranges | 2,936,881 | 173,908 | 231,301 | 1,818,114 |
| Total | 21,203,901 | 3,438,523 | 61,735,014 | 64,686,155 |
| DEPARTMENT OF AGRICULTURE. | | | | |
| 1907, January 1: | | | | |
| On farms and ranges | 19,747,000 | 3,817,000 | 53,240,000 | 54,794,000 |

NOTE.—The number of sheep and swine January 1 is 15 to 20 per cent below the number of the preceding June 1.

Mr. Speaker, a very cursory examination of these tables discloses the great importance of the meat animals of this country. They furnish not only one-third of the food of the nation, but sustain an export trade amounting in value to $200,000,000 annually. If the value of the exports of live animals and of dairy, packing-house, and other animal products be combined, the exports have ranged during the last ten years from about $200,000,000 to $270,000,000 annually.

TABLE D.—*Value of exports of live animals and dairy, packing-house, and other animal products, 1897–1906.*

| Year ending June 30— | |
|---|---|
| 1897 | $188,322,221 |
| 1898 | 217,808,053 |
| 1899 | 218,377,750 |
| 1900 | 233,764,590 |
| 1901 | 254,966,844 |
| 1902 | 250,815,851 |
| 1903 | 220,998,208 |
| 1904 | 233,034,209 |
| 1905 | 224,000,796 |
| 1906 | 268,748,834 |

The interest of the consumer in this matter is often overlooked, and it may be affected to the extent of many millions of dollars annually. It is the consumer, fully as much as other parties, who would be benefited by the quinquennial census of farm products and domestic animals. It has been estimated by the Department of Agriculture that in 1900 the production of meat, in terms of dressed weight and of weight of extra edible parts not included in dressed weight, amounted to 19,000,000,000 pounds, of which about 2,400,000,000 pounds were exported.

TABLE E.—*Meat production, exports, and consumption, expressed in pounds of dressed weight and weight of extra edible parts, 1900.*

| Kind of meat. | Production. | Net exports (mean of three years). | Consumption. |
|---|---|---|---|
| | *Pounds.* | *Pounds.* | *Pounds.* |
| Beef, including veal | 8,771,263,000 | 830,855,000 | 7,940,408,000 |
| Mutton, including lamb | 1,135,484,000 | 615,000 | 1,134,869,000 |
| Pork, including lard | 9,279,583,000 | 1,601,565,000 | 7,678,018,000 |
| Total | 19,186,330,000 | 2,433,035,000 | 16,753,295,000 |

If, through any failure on the part of the Bureau of the Census or of the Department of Agriculture to report the full number of meat animals, the price of meat at retail were to be advanced as little as one-quarter of a cent a pound, the meat expense of the consumers of the country, upon the basis of the consumption of 1900, would be advanced about $42,000,000, and an increase of 1 cent per pound would mean to them an advance of $168,000,000 in their annual meat bill.

Are not these great interests entitled to most serious consideration at our hands?

Now, Mr. Speaker, a word about the necessity of a more frequent census of the acreage planted to the more important crops. Recently the Keep Commission, a board consisting of some of the most intelligent officials connected with this Administration, recommended that an agricultural census be taken every year. I myself do not think there is a necessity for that, but I do think there is necessity that we have more frequent and more accurate knowledge of the acreage of the important crops. It would be of incalculable benefit to the Bureau of Statistics of the Agricultural Department in making its annual estimates if it could have a quinquennial census of the acreage planted, thereby preventing to a great extent or lessening the chances of making inaccurate estimates. If a census could be had every five years, it would decrease the percentage of chances of error creeping into its estimates, which might increase from year to year as we get away from the decennial census result, which is now the sole standard.

There are frequent changes in the acreage planted to the more important crops, sometimes from one cause and sometimes from another. The price for wheat or cotton being very high one year may result in a very large increase in the acreage for the succeeding year, or the invasion of a section of our country by an insect pest may, as it frequently does, result in a material reduction in the acreage planted to an important crop. And when you consider that agriculture furnishes the exports that retain for our country the balance of trade in her favor, I think everything should be done that can be done to aid the farmer to intelligently and profitably market the fruits of his labor.

To illustrate my meaning, Mr. Speaker, we all must recognize the importance of accurate statistical information relating to wheat. It is not only important as a source of domestic food, but it has been valuable as an article of export. A knowledge of the quantity of wheat raised in this country is of great importance not alone to the farmer and the miller, but also to the vast number of bread consumers. For years the amount produced has been so large that the surplus itself has been of great proportions, great enough to exert a very large influence upon world prices, if not at times a dominating one. More than one-fifth of the wheat of the world is raised in the United States, with a value in recent years that reaches $500,000,000.

TABLE F.—*Place of United States in world's production of wheat.*

| Year. | The world (nearly). | United States. | |
|---|---|---|---|
| | | Production. | Fraction of the world's crop. |
| | *Bushels.* | *Bushels.* | *Per cent.* |
| 1899 | 2,783,885,000 | [a] 658,534,252 | 23.7 |
| 1901 | 2,955,975,000 | 748,460,218 | 25.3 |
| 1902 | 3,126,624,000 | 670,063,008 | 21.4 |
| 1903 | 3,224,993,000 | 637,821,835 | 19.8 |
| 1904 | 3,170,723,000 | 552,399,517 | 17.4 |
| 1905 | 3,337,400,000 | 692,979,489 | 20.8 |
| 1906 | 3,209,464,000 | 735,260,970 | 21.6 |

[a] Census.

TABLE G.—*Wheat production, exports, and consumption, 1899–1906.*

| Year. | Production. | | Domestic exports, year beginning July 1. (Flour reduced to wheat, at 4½ bushels per barrel.) | Consumption of domestic crop (including seed and animal feed). |
|---|---|---|---|---|
| | Quantity. | Farm value. | | |
| | *Bushels.* | | *Bushels.* | *Bushels.* |
| 1899 (census) | 658,534,252 | $369,945,320 | 186,096,762 | 472,437,490 |
| 1901 | 748,460,218 | 467,350,156 | 234,772,516 | 513,687,702 |
| 1902 | 670,063,008 | 422,224,117 | 202,905,598 | 467,157,410 |
| 1903 | 637,821,835 | 443,024,826 | 120,727,613 | 517,094,222 |
| 1904 | 552,399,517 | 510,489,874 | 44,112,910 | 508,286,607 |
| 1905 | 692,979,489 | 518,372,727 | 97,609,007 | [a] 595,370,482 |
| 1906 | 735,260,970 | 490,332,760 | ..... | ..... |

[a] Stocks on hand at beginning and end of this year as well as of previous years modify the apparent consumption.

It is patent that any ignorance with regard to the supply of wheat which would indicate a shortage that would increase the price by, say of 5 or 10 cents per bushel, might increase the consumers' expense for flour to the extent of $25,000,000 to $50,000,000 annually. This is on the basis of a consumption of 5½ bushels of wheat per capita annually for food purposes. Its market price might be materially affected because of a lack of such information.

But, Mr. Speaker, I now want a word about cotton—our most important crop. Cotton is more sensitive to influences upon its price than any other crop or product of the farm, and, more than any other product, it is the object of false reports, of efforts legitimate and illegitimate to depress or raise its price. Until within the last half dozen years the cotton grower was the frequent victim of the professional crop estimator, whose object is always to overestimate the crop and thus depress the price.

Mr. Speaker, this situation, so disastrous to the cotton growers, has now been largely relieved, because the professional estimators have been put out of confidence, if not out of business, by the two governmental offices that now issue crop reports—the Bureau of the Census, and the Bureau of Statistics of the Department of Agriculture. The cotton crop alone is of such great importance that it should have the benefit of a quinquennial census of acreage in order that the Department of Agriculture may be given every opportunity to make its annual estimate of the yield just as accurate, just as near the truth as possible. To do this the Department of Agriculture must have a foundation not more than five years distant at the farthest.

The cotton crop of this country now amounts to more than 5,000,000,000 pounds annually, with a value, not including seed, of $560,000,000, or, with seed, of $650,000,000. Two-thirds of the cotton of the world is raised in the United States, and about the same fraction of the world's exports of cotton go out of this country, mostly to Europe. Let the exports of cotton from this country cease and the apparent balance of trade in favor of this country on account of the interchange of commodities would be nearly, if not completely, extinguished.

The consequences of false reports concerning the prospective quantity of the cotton crop are very large, and as far as they are merely a question of dollars can be approximately ascertained. If the Government were to cease its cotton reports and the crop left at the mercy of the speculators, for every cent per pound that the price were unfairly depressed the growers would lose $50,000,000 or more, according to the size of the crop; and to a proportionate degree the whole country would suffer because of the decreased value of our exports.

TABLE H.—*Production, exports, and consumption of cotton, 1899–1906.*

[500-pound bales, gross weight.]

| Year. | Production. | | Domestic exports, year beginning September 1. | Consumption of domestic crop. |
|---|---|---|---|---|
| | Quantity. | Value, not including linters. | | |
| | *Bales.* | | *Bales.* | *Bales.* |
| 1899 | 9,459,935 | $323,758,171 | 6,505,133 | 2,954,802 |
| 1900 | 10,266,527 | ..... | 7,178,782 | 3,087,745 |

[a] The Bureau of Statistics of the Department of Commerce and Labor has made a new classification, which renders it impossible, at this time, to compare with preceding years.

How important is this crop, not alone to the section producing it, but to all the United States? Can we afford to fail to do anything within our power which will tend to increase its production? Is it not to our interest to do all we can, considering its importance as an export product, to increase its market value?

Mr. Speaker, it is palpable that frequent information concerning the prospective production and the harvested amount of the principal farm crops is essential alike to successful agriculture, to the stability of the business of marketing the crops, and to the financial safety of the manufacturers who use them as raw materials.

So well has this matter been understood that traders and manufacturers who have had a business large enough to sustain the expense have for many years undertaken to acquire a knowledge of present conditions affecting principal farm crops; and for a shorter period of time these efforts have been supplemented by private crop-reporting agencies, which have sold their reports or have given them gratuitously to the public in order that they might sell their publications.

In more recent years most of these private lines of crop estimation have drifted toward, if not positively into, the uses of speculators and gamblers in prices. As far as these private agencies are concerned, some of them make earnest endeavors to publish the truth; others are at the service of bulls or bears in the market, if they are not actually manipulated by them.

If left to themselves they would create a situation in which the few would profit at the expense of the many, and these few at any time would be in danger of themselves becoming losers to another set of winners for the moment.

In the meantime the farmers, the producers of fabulous contributions to the wealth of the nation, the men upon whom the prosperity of the nation rests and ever must rest, would find their crops the football of speculation and price gambling were it not for an impartial service furnishing accurate statistics.

It is practically out of the question that 100,000, much less 1,000,000, farmers should combine to report to a central office of their organization information which would enable that office to indicate the size of the forthcoming crops or of the harvested crops. Even if such large numbers of farmers should cooperate for this purpose and find incorruptible managers of the undertaking, there would be small confidence in the accuracy of the work, and those who buy these crops from the farmers would reject the estimates for fear that self-interest might have exerted a controlling influence in their preparation. Still we need estimates, impartial and as near accurate as possible, and these are now being given us by the able and upright statistician, Mr. Victor H. Olmsted, who heads the Bureau of Statistics in the Agricultural Department.

In such a large field of production as that of the United States, with crops so large as to be beyond the efforts of the mind to grasp, with countless diversities of conditions of soil, of rainfall, of heat, and of transportation, with its numerous antagonistic forces within the domain of production, of trade, and of industrial consumption, and particularly with its greater antagonisms reaching out from each of these domains into one or both of the others, it becomes a herculean task to prepare with any degree of accuracy an estimate of any particular crop. It is distinctly a situation in which a governmental office must be called into requisition, and it should be required to establish facts and to make them known to all parties. To do this in such a way as to win the confidence of the public every facility for securing accuracy should be afforded.

The system of estimation should be as perfect as it can be devised, and it can be readily seen that the success in making such estimates depends essentially upon a base line of established fact. This all-important base line has so far been furnished the statistician of the Department of Agriculture only once in each decade.

Mr. Speaker, to furnish an additional base line is the purpose of this measure. I think the facts I have brought to your attention demonstrate the necessity of a restricted agricultural census midway between the decennial census.

The interests that are concerned and that would be benefited by this extra agricultural census are too large to be measured. On the part of the farmers alone there is a capital which has now reached $28,000,000,000. On the part of the traders in farm products and industrial consumers of them no corresponding figure can be estimated.

A quinquennial census of live stock and of the acreage of the important crops can be taken for about $900,000; this amount distributed over a period of ten years would be $90,000 a year. This would cover the cost of this all-important work. How trivial this sum is compared with the interests to be affected. Mr. Speaker, I now desire to read from the hearings had in support of this bill a short statement by Mr. Secretary Wilson. When asked to express his views with reference thereto he said:

Secretary WILSON. Look up the discussion, Mr. Chairman, in regard to the taking of a quinquennial census of manufactures, and apply every word of the reasons therein set forth to a quinquennial census of crop acreage and live stock. There is not a reason given for having a census taken of manufactures that does not apply with much greater force to a census taken of those things mentioned in this bill.

We sell every year to foreign countries approximately $900,000,000 worth of farm products. In round numbers, $250,000,000 of that is live stock and animal products; $650,000,000 of that is the value of the farm crops of the country—first, corn; I shall not mention hay; next, cotton, then wheat, rice, etc.

* * * * * * *

The farmers of the United States last year produced, using round numbers, $6,415,000,000 worth of farm products and sent abroad approximately $900,000,000 worth, which is considerably more than half of all the stuff we export in a year.

Mr. BURLESON evidently has in mind a quinquennial census between the decennials, for the purpose of giving to those who are growing these articles and those who are dealing in them a closer idea of the tendency and trend of production along those lines. Before there was a permanent Census Bureau provided for, the Department of Agriculture had for many years been in the habit of making estimates of the production of all those things. But the time between decennial censuses was too long, because the increase of production of one class of things and the possible standstill or decrease in the prduction of another might have a very great influence on the producer and the dealer in the United States. The benefit that would come to the Department of Agriculture would be that instead of having once in ten years a reliable basis for estimating we should have it once in five years.

Mr. Speaker, every time there is a long gap between the Government reports upon the conditions of the crops or the size of the crops private agencies begin to get in their work, and there never has been a case when these private agencies, unless checked through Government sources of information, have not overestimated the production, with a consequent depression of prices. To-day if the Government should cease to make its estimate of the cotton crop, we might just as well put the price fixing of that great product in the hands of Mr. Buston, Mr. Neill, and other professional estimators. For a number of years I have been laboring to make the estimates issued by these professional estimators as little hurtful to the farmer as possible. It was to accomplish this end that I caused to be enacted the law providing for the Ginners' reports, and it is a source of much satisfaction to me that the Neills and Bustons can not affect the market price of cotton as they once could by giving out gross and outrageous overestimates of the crop. The passage of this bill will still further aid in securing honest and accurate statistics relating to this important crop and thereby aiding in making still less hurtful the practices of the professional estimators.

Mr. Speaker, I have endeavored to show the importance of this measure. I believe it is of vast importance to the people of the entire country, and especially to the people of the South. After a most careful hearing, the Committee on the Census, on April 31 of last year, unanimously reported the same, and now for a year it has been pending on the Calendar awaiting consideration at the hands of this House. I have repeatedly made efforts to secure an opportunity to have the same given a hearing. In these efforts I have had the cooperation of the chairman of the Census Committee, the gentleman from Indiana [Mr. CRUMPACKER]. We have gone to the extent of asking that the bill be taken up on suspension day, when, as we all know, it would require two-thirds majority to pass it; but, Mr. Speaker, all my efforts have resulted in failure, and this bill, though of the utmost importance to my people, will die upon the adjournment of this body day after to-morrow. I now send to the Clerk's desk, and ask that same be read, a letter I have recently received from the Secretary of the National Live Stock Association of America.

AMERICAN NATIONAL LIVE STOCK ASSOCIATION,
*Denver, Colo., January 29, 1907.*

Hon. ALBERT S. BURLESON,
*House of Representatives, Washington, D. C.*

DEAR SIR: I have the honor to inclose you herewith copy of a resolution adopted at the Tenth Annual Convention of this association, held at Denver, Colo., January 23, 1907, indorsing your bill for a new and more frequent census of live stock in the United States. I trust you will have this resolution read in Congress and referred to the proper committee.

If there is any assistance our association can render you in having this bill enacted into law, please advise.

Very respectfully, yours,

T. W. TOMLINSON, *Secretary.*

Mr. Speaker, I now ask that the resolution be read.

The Clerk read as follows:

Resolution adopted at the Tenth Annual Convention of the American National Live Stock Association, held at Denver, Colo., January 22 and 23, 1907.

Whereas live stock growers of the United States are absolutely without correct information as to the number of animals being produced for food purposes; and

Whereas it would be greatly to the advantage of both the producer and the consumer to have correct data as to the probable meat supply for present and future markets; and

Whereas the Federal Government provides estimates regarding crops, such as cotton, wheat, etc., greatly to the advantage of the producers of those commodities; and

Whereas we believe the Government should supply similar information as to live stock: Now, therefore, be it

*Resolved*, That the American National Live Stock Association, in convention assembled in Denver, Colo., January 22 and 23, 1907, respectfully petitions the Federal Government to at once take a full and comprehensive census of all cattle, sheep, and hogs in the United States; and be it further

*Resolved*, That the bill now pending in Congress providing for such census every five years, known as the "Burleson bill," be hereby indorsed by this convention; and be it further

*Resolved*, That a copy of these resolutions be forwarded to the proper Department of the Federal Government in Washington and to all Members of Congress.

I hereby certify that the above is a true copy.

T. W. TOMLINSON, *Secretary.*

Mr. BURLESON. Mr. Speaker, the fate of this bill is an apt illustration of the tremendous power which the majority of the membership of this body has lodged in the hands of our presiding officer. Here is a bill of tremendous importance to all the people of the United States. It has been reported favorably, both Democrats and Republicans joining with unanimity in recommending its passage. I am confident if I had been permitted by the organization of this House to bring it before this body that this bill, with all its provisions fully understood, would have received the support of 90 per cent of the Members of this House. No difficulty was experienced when the effort was made to secure a quinquennial census of manufacturers; but notwithstanding the persistence with which I have urged this quinquennial census of agriculture, only disappointment has been my portion. I have been unable to secure even consideration of same.

Mr. Speaker, it is my purpose to reintroduce this bill at the beginning of the Sixtieth Congress, and I shall press it to enactment if energy and persistence can possibly accomplish that end.

Mr. WADSWORTH. Mr. Speaker, I move that the House agree to the conference asked by the Senate.

The motion was agreed to.

The SPEAKER announced as conferees on the part of the House Mr. WADSWORTH, Mr. SCOTT, and Mr. LAMB.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 23630. An act authorizing the President to nominate and appoint Birchie O. Mahaffey, John A. Cleveland, and Traugett F. Keller as second lieutenants in the United States Army;

H. R. 25630. An act to amend an act entitled "An act to amend section 1 of an act entitled 'An act relating to the Metropolitan police of the District of Columbia,' approved June 8, 1906;"

H. R. 19275. An act for the relief of T. E. Boyt;

H. R. 6104. An act to reimburse John Waller, late postmaster at Monticello, N. Y., for moneys expended in carrying the mails;
H. R. 25846. An act permitting the building of a dam across the Savannah River at Calhoun Falls;
H. R. 25848. An act permitting the building of a dam across the Savannah River at Andersonville Shoals;
H. R. 25847. An act permitting the building of a dam across the Savannah River at Hattons Ford;
H. R. 25850. An act permitting the building of a dam across the Savannah River at Trotters Shoal;
H. R. 20128. An act to complete the naval record of Patrick Naddy;
H. R. 8984. An act to amend the laws governing labor or improvements upon mining claims in Alaska;
H. R. 25738. An act to authorize the Cairo and Tennessee River Railroad Company to construct a bridge across the Tennessee River;
H. R. 11040. An act to authorize the receivers of public moneys for land districts to deposit with the Treasurer of the United States certain sums embraced in their accounts of unearned fees and unofficial moneys;
H. R. 24122. An act in reference to the expatriation of citizens and their protection abroad;
H. J. Res. 31. Joint resolution authorizing the wearing of the distinctive badge adopted by the Army and Navy Union upon all occasions of ceremony;
H. J. Res. 240. Joint resolution to create a joint committee to consider the revision and codification of the laws of the United States;
H. R. 15320. An act to remove charge of desertion standing against Peter Parsch;
H. R. 22210. An act to correct the military record of Homer Quick;
H. R. 11044. An act authorizing and directing the Secretary of the Treasury, in certain contingencies, to refund to receivers of public moneys acting as special disbursing agents amounts paid by them out of their private funds;
H. R. 25716. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906;
H. R. 25717. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906;
H. R. 24390. An act to correct the military record of Charles H. Kellen;
H. R. 24605. An act granting to the Norfolk and Portsmouth Traction Company the right to operate trains through the military reservation on Willoughby Spit, Norfolk County, Va.;
H. R. 25776. An act permitting the building of a dam across the Savannah River at Middleton Shoals;
H. R. 25795. An act to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida;
H. R. 25401. An act to authorize the Secretary of War to make certain disposition of condemned guns and cannon balls;
H. R. 21857. An act to correct the military record of Jacob Rockwell;
H. R. 25774. An act permitting the building of a dam across the Savannah River at Turner Shoals;
H. R. 25773. An act permitting the building of a dam across the Savannah River at McDaniel Shoals; and
H. R. 19524. An act to amend an act entitled "An act to require the erection of fire escapes in certain buildings in the District of Columbia, and for other purposes," approved March 19, 1906.

ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:
H. R. 25483. An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes;
H. R. 19751. An act to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss.;
H. R. 25832. An act to authorize Herman L. Hartenstein to construct a dam across the St. Joseph River near the village of Mottville, St. Joseph County, Mich.;
H. R. 3268. An act for the relief of Henry O. Bassett, heir of Henry Opeman Bassett, deceased;
H. R. 10095. An act making certain changes in the postal laws;
H. R. 19500. An act for the relief of Indian traders Marion Wescott, F. F. Green, and J. A. Leige, assignee of Joseph F. Gauthier, a Menominee Indian trader, with the Menominee Indians of Wisconsin;
H. R. 24816. An act to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906;
H. R. 24833. An act for the relief of the Louisiana Molasses Company (Limited) and the Louisiana Distilling Company;
H. R. 21091. An act authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Humason's Company B, First Oregon Mounted Volunteers, the name of Hezekiah Davis;
H. R. 25801. An act granting an honorable discharge to Seth Davis;
H. R. 22588. An act for the relief of homestead entrymen who have paid more than the lawful purchase money;
H. R. 25437. An act to grant American registry to the German bark *Mariechen;*
H. R. 15859. An act ceding certain lands to Colorado State Agricultural College;
H. R. 25849. An act permitting the building of a dam across the Savannah River at Cherokee Shoals;
H. R. 25811. An act to authorize the Monroe, Farmerville and Northwestern Railway Company to construct a bridge over the Ouachita River and one over the D'Arbonne River, in Louisiana;
H. R. 13418. An act for the relief of W. S. Hammaker;
H. R. 25474. An act to amend sections 5 and 6 of an act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same;"
H. R. 25739. An act to authorize the Cairo and Tennessee River Railroad Company to construct bridges across Cumberland River;
H. R. 11401. An act granting an increase of pension to William Kling;
H. J. Res. 236. A joint resolution authorizing the Secretary of the Navy to furnish metal for a bell;
H. R. 10305. An act to provide for the repayment of certain customs dues; and
H. R. 8699. An act for the relief of James A. Carroll.

The SPEAKER announced his signature to enrolled bills and joint resolution of the following titles:
S. R. 92. A joint resolution to authorize the Secretary of War to permit Jose March Duplat to receive instructions at the Military Academy at West Point;
S. 8580. An act granting land to Anna Johnson;
S. 7550. An act for the relief of Harry A. Young;
S. 6729. An act authorizing the President to appoint Webb C. Maglathlin a second assistant engineer in the Revenue-Cutter Service;
S. 6134. An act providing for the conveyance to the State of North Dakota of certain tracts of land for the use and benefit of the North Dakota State Historical Society;
S. 5869. An act for the relief of Larvon Gordon;
S. 8540. An act to ratify a certain lease with the Seneca Nation of Indians;
S. 5660. An act for the relief of William N. Hughes;
S. 4964. An act for the relief of Thomas F. Walters;
S. 8427. An act to annul certain titles to land acquired by judicial proceedings in the courts of the United States in Texas, and for other purposes;
S. 8303. An act to establish the Foundation for the Promotion of Industrial Peace; and
S. 7840. An act granting an increase of pension to Lewis A. Towne.

AGRICULTURAL APPROPRIATION BILL.

Mr. DAVIS of Minnesota. Mr. Speaker, I have introduced, during this session of Congress, a certain bill which I deem, if enacted into law, one of the greatest importance to all of the people of the United States, and I feel confident that when its provisions are fully understood by the Congress it will almost unanimously meet its approval. During this short session, owing to the vast amount of other business which has engrossed attention, little opportunity has been given for consideration of this measure; and my purpose at this time in addressing myself, as I shall, to the provisions of this bill is that the Congress and the country at large may in the interim consider it and be prepared to place a just estimate upon it, and that we may, during the first session of the Sixtieth Congress, act accordingly. The bill as introduced is known as H. R. 24757, and entitled "A bill to provide an annual appropriation for industrial

education in agricultural high schools and in city high schools and for branch agricultural experiment stations, and regulating the expenditures thereof." Specifically its language is as follows:

*Be it enacted, etc.*, That there shall be, and hereby is, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be paid, as hereinafter provided, to each State and Territory for the maintenance of instruction in agriculture and home economics in agricultural high schools of secondary grade and instruction in mechanic arts and home economics in city high schools of secondary grade, a sum of money equal to 10 cents per capita of the population of each State and Territory, respectively, as shown by the last preceding national or State census, as shall be apportioned by the Secretary of Agriculture and estimated for in the annual estimates submitted to Congress for the Department of Agriculture: *Provided*, That the funds thus appropriated shall be used only for instruction in agriculture, mechanic arts, and home economics, and that all States and Territories and all schools accepting these funds shall provide other funds with which to pay the cost of providing the necessary lands and buildings and of instruction in all general studies required to make well-rounded high school courses of study.: *And provided further*, That not less than one-half of the sum thus appropriated to any State or Territory shall be expended for instruction in agriculture and home economics in agricultural high schools maintained under State authority in rural communities, and the number of such agricultural high schools which shall be entitled to receive the benefits of this act in any one State or Territory shall not exceed one school for each ten counties in that State or Territory.

SEC. 2. That there shall be, and hereby is, annually appropriated, out of any money in the Treasury not otherwise appropriated, to be paid, as hereinafter provided, to each State and Territory for the maintenance of branch agricultural experiment stations under the direction of the State agricultural experiment stations now established or which may hereafter be established in accordance with the act of Congress approved March 7, 1862, the sum of $2,500 for each branch experiment station already established by legislative enactment of the respective States and Territories, or which shall be established by said States or Territories in connection with agricultural high schools as appropriated for by this act: *Provided*, That no State or Territory shall be entitled to the benefits of section 2 of this act until its legislature shall by law provide for the establishment of such branch stations and shall provide annually for the equipment and maintenance of such branch stations a sum at least equivalent to that appropriated annually to the State or Territory under section 2 of this act; and the sum paid to each State or Territory under section 2 of this act shall be applied only to paying the necessary expenses of conducting at such branch experiment stations experiments bearing directly upon the agricultural industry of the United States, having due regard to the varying conditions and needs of the respective States or Territories and the respective agricultural regions therein.

SEC. 3. That the sums hereby appropriated to the States and Territories for the maintenance of branch agricultural experiment stations and for instruction in agriculture, mechanic arts, and home economics shall be annually paid, one-half on the 1st day of July of each year and one-half on the 1st day of January of each year, by the Secretary of the Treasury, upon the warrant of the Secretary of Agriculture, out of the Treasury of the United States, to the treasurer or other officer duly appointed by the governing boards of said experiment stations and schools to receive the same, and such officers shall be required to report to the Secretary of Agriculture on or before the 1st day of September of each year a detailed statement of the amounts so received during the previous year and of its disbursement on schedules prepared by the Secretary of Agriculture. The grants of money authorized by this act are made subject to legislative assent of the several States and Territories to the purpose of said grants.

SEC. 4. That if any portion of these moneys received by the designated officers of any State or Territory for the maintenance of instruction in agriculture, mechanic arts, and home economics or for the maintenance of branch experiment stations as provided in this act shall by any action or contingency be diminished or lost or be misapplied, it shall be replaced by said State or Territory concerned, and until so replaced no subsequent appropriation shall be apportioned or paid to such State or Territory: *Provided*, That no portion of said moneys shall be applied directly or indirectly under any pretense whatever to the purchase or erection of any building or buildings or to the purchase or rental of lands.

SEC. 5. That it shall be the duty of each of said city high schools, agricultural high schools, and branch experiment stations annually, on or before the 1st day of February, to make to the governor of the State or Territory in which it is located a full and detailed report of its operations, including a statement of receipts and expenditures, a copy of which report shall be sent to each of said agricultural high schools, city high schools, and branch experiment stations, to the Secretary of Agriculture, and to the Secretary of the Treasury of the United States, said reports to be made on blanks to be supplied by the Secretary of Agriculture.

SEC. 6. That on or before the 1st day of July in each year after the passage of this act the Secretary of Agriculture shall certify to the Secretary of the Treasury as to each State and Territory whether it has complied with the provisions of this act and is entitled to receive its share of the allotment herein provided for branch experiment stations, for agricultural high schools, and for city high schools under this act and the amount thereupon which it is entitled to receive. If the Secretary of Agriculture shall withhold a certificate from any State or Territory for the whole or part of its appropriation, the facts and reasons therefor shall be reported to the President and the amount involved shall be kept separately in the Treasury until the close of the next Congress in order that the State or Territory may, if it shall so desire, appeal to Congress from the determination of the Secretary of Agriculture. If the next Congress shall not direct such sum to be paid, it shall be covered into the Treasury, and the Secretary of Agriculture is hereby charged with the proper administration of this law.

SEC. 7. That the Secretary of Agriculture shall make an annual report to Congress on the receipts and expenditures and on the work of the agricultural high schools, city high schools, and branch agricultural experiment stations in all of the States and Territories to which allotments are made, and also whether the appropriation of any State or Territory has been withheld, and, if so, the reasons therefor.

SEC. 8. That Congress may at any time amend, suspend, or repeal any or all the provisions of this act.

A Federal appropriation is sought for the purpose of encouraging the several States and Territories in the promotion of industrial and agricultural education, and with their cooperation. It is mainly for the purpose of encouraging a type of education for the mass of our people that will train them for the practical affairs of life; and while the Morrill Act of 1862 has undoubtedly stimulated great activity along this line, the present measure supplants it and to a large extent will consummate the purposes desired. The science of agriculture is basic in principle, and sooner or later we should return to first principles, and in the last analysis we must recur to the soil as the fundamental source of our wealth, prosperity, and happiness as a people. The practical training to be obtained, if this bill becomes a law, for the young men and women on the farm will undoubtedly make country life more attractive and beneficial, and the industrial training sought to be encouraged in city schools add very materially to the prosperity and happiness of all those who will avail themselves of the opportunities thus provided. The measure therefore responds to the needs of both rural and city conditions.

This bill is designed especially to secure simple justice to the workers and home makers of our country. We have too long confined technical education to the professional classes. Let us carry out the wise plan begun by Congress in 1862—the land-grant act establishing colleges of agriculture and mechanic arts—and provide, along with general schooling, industrial education, not only to the privileged 5 per cent, but also to the 95 per cent who are doing the world's work.

The increase of knowledge, the specialization of industries, and the close division of labor have made a new world, into which the graduates of our schools are precipitated. The old education leads the pupil to believe that he is prepared for life. His preparation is only general. The new education must prepare the pupil for some specific line of life. It must be both broad and practical. It must combine the theme written in the book, the theme written in the soil and in the machinery, with the inspiration for the best living which modern conditions can provide.

The Congress of the United States and other legislative bodies in the world ere long will have spent more than $100,000,000 in agricultural research. Along other lines much greater sums are being expended in university laboratories, in laboratories supported by our great industrial organizations, and in private laboratories devoted to research and invention. The utility results of science have gained recognition in agriculture, in the non-agricultural industries, and in home making. The much-enlarged body of knowledge rapidly becoming available in all vocations has made necessary such organization of our school system that the rising generation may have the key to this new knowledge. The old forms of education, which have so wonderfully aided in bringing forward our civilization, must be rearranged, that the curriculum of our schools may be broadened and enriched with this rapidly accumulating new knowledge.

We shall soon have about 90,000,000 of people in this country, one-third of whom, or 30,000,000, will be of school age—between 5 and 20 years—and entitled to school privileges. The Twelfth Census, using round numbers, showed that one-half the persons of school age attended school in 1900, and thus we may calculate that we shall soon have 15,000,000 pupils in schools. Since practically one-third of our population is engaged in agriculture and two-thirds in nonagricultural pursuits, we may roughly say that we shall have 5,000,000 pupils preparing for country life and 10,000,000 preparing for city life. Since three teachers are required for each 100 pupils, we shall need 150,000 teachers in country-life education and 300,000 teachers for schools leading to city life, or a total of 450,000 teachers. With the material increase in the numbers of pupils taking secondary and higher courses of study, we may hope to have 7 per cent of American youth entering high schools of secondary grade, and of these 2 per cent entering higher institutions of collegiate grade; but the great educational problem will remain—the training of the 93 per cent who will stop with the primary city school and the primary rural school. As our schools are improved in their general educational work and in their efficiency to aid the pupil to make a good living, we may expect to increase the proportion of children attending school. Since the teachers in the primary schools are mainly trained for their work in the secondary schools, the most important means for improving the primary schools is better to provide for the preparation of their teachers. Our high schools have three important functions, viz: (1) To give to a large number of people a better education that individually their success may be greater; (2) to place among the people of the country a large number of trained workers whose success, example, and help will enable all people with whom

they associate to become more efficient and more successful, and (3) to prepare the necessary teachers to conduct the primary schools in the most efficient manner possible.

Our educators, farmers, professional, and business classes are of one mind in a desire that the evolution of our school system shall be directed into lines which shall carry to all the people our accumulating technical knowledge and thus add efficiency to our workers. When our population reaches 90,000,000, we shall have engaged in gainful occupations 33,000,000 of people. Of the latter at least 30,000,000 will be interested in agriculture and mechanic arts education and at least another 25,000,000 in home economics education. At $1 a day the industrial and home-making value of these 55,000,000 people, counting 300 days as a year, is $16,500,000,000. It would seem easy by sharply turning our school system somewhat more toward technical instruction to increase the economic efficiency of our workers 1 per cent, or $165,000,000 annually. This bill proposes to devote $8,000,000 to this purpose.

In 1862 the Congress of the United States ventured upon an experiment by providing for the establishment in each State of a college devoted to agriculture and the mechanic arts. Out of this action has grown not a theory, but a condition. The situation demands that we utilize the results of these experiments and the new knowledge thus secured. The knowledge is of more value than any dozen mechanical inventions ever devised. Our American educational machine must be so evolved and even reorganized as to reach every industry and every home in the land. This bill undertakes to point the way and to provide the funds with which to accomplish this purpose. The undertaking is too important to be left to sporadic action, and is too expensive to be inaugurated systematically throughout the United States under any auspices less able to provide funds and to secure cooperative action than the Federal Government.

We now have over fifty State colleges of agriculture and mechanic arts. Their past growth warrants the hope that before long they may have an average of 1,000 students each in collegiate courses related to industry; 500 in mechanic arts courses, 300 in agriculture, and 200 in home economics, or a total of 50,000 students, where there are now 20,000.

Minnesota, Nebraska, Alabama, Georgia, and other States have demonstrated that the industrial education started in our State colleges should be extended into a system of agricultural high schools and into our city high schools. The trend has been to organize an agricultural high school for each group of about ten counties, as has been done in Alabama and Georgia, and to develop mechanic arts education, both in separate city high schools and as courses of study in general city high schools. Minnesota and Nebraska led in devising and developing schools of agriculture of high school grade articulating with the college above, and with both the rural schools and the farms below. Alabama and Georgia have recently taken the lead in establishing one of these schools in each Congressional district. Minnesota and Nebraska have agricultural high schools with 600 and 300 students, respectively. The graduates of these schools nearly all go back to the farm. A very small number go into other vocations, and probably 10 per cent go forward into collegiate courses in agriculture, most of them to become agricultural technicians. These schools have demonstrated so effectively that farm boys and girls can be educated for country life and returned to country life that everyone who looks into the work of these institutions is ready to promote this kind of schools for the entire country.

To Georgia belongs the credit and honor of first taking the step thoroughly to establish a sufficient number of well-equipped agricultural high schools to meet the needs of the farm boys and farm girls of the State. Last July the Georgia legislature authorized Governor Terrell to establish an agricultural high school in each of Georgia's eleven Congressional districts. A State appropriation of $6,000 was provided annually as a current expense fund with which to begin each school. The districts securing these schools were required to provide at least 200 acres of land and to erect buildings and equip the schools. The different localities sought to secure the location of these schools. The result was such that it is inspiring the entire country with an interest and faith in high school education in agriculture and home economics. By private subscription Georgia has raised $800,000 with which to establish and equip these eleven schools. Never before have the American people so emphatically expressed their faith in agricultural education. In no way has the South better expressed the fact that she is rising from the difficulties and depression which resulted from the civil war.

The passage of this bill will precipitate a similar movement in every State in the Union. If all of the States will follow Georgia's example, we shall have 300 agricultural high schools for our 3,000 agricultural counties. With each of these schools averaging 500 students we would have a total of 150,000 students in agricultural high schools, an average of 3,000 in each State. This number of students would provide a large number of men technically trained in agriculture to become leading farmers, and a large number of young women trained in home economics to develop exemplary farm homes. It would also provide a body of young people who could rapidly be developed into teachers who could carry instruction and inspiration in agriculture and home building into all the rural schools of the land and thus carry this education to all farm youth. There may be a difference of opinion as to whether we shall make our rural schools more efficient by retaining the present unit—the isolated rural school—or whether we should consolidate these into larger units. Which ever plan is pursued, all must agree that this class of schools must be improved by providing teachers trained both in general studies and in the subjects relating to the future life work of that 85 per cent of rural youth which will remain in country life. It may be presumed that the expense will not be very greatly different whether we develop the rural schools under a plan of consolidation or by adequately improving the little rural schools. At present we have no body of people in our rural communities who have either knowledge or faith to reorganize our country schools. Probably the chief function of the provisions of this bill will be to provide a large class of leaders in our rural communities who, as progressive farmers and home makers and as rural school-teachers, will press to a successful issue the development of our rural primary school system.

The State colleges of agriculture and mechanic arts established by the Congress have developed mechanic arts education even much more rapidly than agricultural education. The engineering courses of these colleges have been very successful and popular from the start, and this class of instruction has extended into numerous city high schools, as in the mechanic arts high schools of St. Paul, Pittsburg, Philadelphia, and Washington. The graduates of these colleges and high schools have profoundly modified our mechanical and transportation industries. Our manufacturing and transportation companies are in touch with these local mechanic arts high schools and with these State colleges and are offering good positions to every young man who shows technical instincts and ability. Graduates of these mechanic arts high schools in turn have carried the elements of this line of instruction under the name of "manual training" into very many of the primary city schools of the country. Most of these mechanic arts high schools are as yet relatively small because of the difficulty of securing local appropriations sufficient to pay the larger expenses of these more practical studies which require laboratories and shop practice as well as class-room instruction. This bill is designed to meet this difficulty. Our State colleges were more tardy in developing education in home economics than in either mechanic arts or agriculture, but even in this line it may be said that the Congressional act of 1862 has developed a revolution in education in domestic economy. Numerous of the State colleges having successfully organized instruction in domestic-science subjects have provided teachers who have successfully introduced this line of education into city high schools, agricultural high schools, and into a large proportion of the colleges and academies attended by women, and even into city primary schools and into some rural schools. It is found that this line of technical education is relatively inexpensive and yet very important for the future home makers.

Under the movement for industrial education and research started in the sixties, including the Federal Department of Agriculture, the State experiment stations, the State agricultural colleges, and the two or three dozen agricultural high schools, we now spend, exclusive of inspection and other general work, something like $10,000,000. These expenditures have added not less than a billion dollars in value to the products of our American farms, shops, and other industries, and greatly improved the social conditions of our workers and of all our people. Thus for the price of one battle ship there is created sufficient additional wealth to pay two or three times over our direct and indirect expenses incident to war.

I maintain that we should have a properly equipped Army and Navy that we may have stability and peace for our industries; but, on the other hand, those who advocate large expenditures for the Army or for the Navy should be the first to see the importance of expenditures which create individual efficiency and wealth. Now that our national wealth has reached nearly $100,000,000,000, our annual production nearly $30,000,000,000, and our Federal appropriations nearly $1,000,000,000, are we not ready seriously to consider the proposition of making it possible for every boy and girl in the entire country to secure at least the rudiments of technical industrial education? The

relatively small cost is clearly within the scope of our public financial ability.

Of the three great wastes in the economies—land, material, and labor—by far the greatest waste is from inefficient labor. It has been truthfully said that while America wastes land the Old World wastes labor. In America labor commands $1 to $2 a day; in Europe one-fourth of that amount, and in the Orient one-tenth of that amount. The greatest economic need is that our industries be so changed that labor be not wasted. The recent wonderful and far-reaching developments in transportation of all kinds is suddenly bringing together, in close economic competition, all the peoples of the entire world. The nation that uses its labor, lands, and products to the best advantage will take the lead in civilization and in power.

Can America afford to continue the kind of education which cultivates tastes too expensive for the earning capacities of her people, while other peoples are willing to labor cheaply and live within their means? Even more than with boys we are making the mistake of educating the tastes of our girls more rapidly than we are training them in the ability to secure those things which satisfy their tastes. Our most important racial and national institution—the home—can be developed along with our other institutions only as we give to it the discoveries of science and build it up through education. It is not enough that America have homes averaging better than homes of other parts of the world; they should be very much better. The leadership assumed by Congress in 1862 brought with it responsibilities. These responsibilities may now be clearly seen. There is only one organized body competent to deal with the question of the rapid development of technical education for the workers in the industries throughout all of the States, and that is this Congress.

This bill provides for the inauguration of a movement in industrial education second only in importance to the original bill of 1862 creating in America this class of education. It provides for introducing throughout all our public schools of a secondary or high school grade education in mechanic arts, agriculture, and home economics. The sum it is proposed to appropriate is less than 1 per cent of the revenues of the Government, and is based upon an appropriation to the various States and cities of 10 cents per capita of the inhabitants thereof provided that a like sum is raised by them. This means practically appropriating for the industrial education of each pupil of school age 30 cents per annum, or for each pupil actually in school 60 cents per annum.

The bill provides that the money allotted to each State shall be equitably divided between the city people and the country people. Each city will receive 10 cents per captia on its population at the last national or State census. The money thus allotted to the respective States and not apportioned to city high schools will be available for use toward the maintenance of one agricultural high school in each rural Congressional district, or its equivalent. Thus, my own State of Minnesota, with a population of about 2,000,000, half of whom are in cities, will receive $200,000 annually, $100,000 to be apportioned to the respective cities according to their population and $100,000 to be used in eight or ten agricultural high schools distributed throughout the State. Under this bill thousands would be provided with industrial and agricultural education where now hundreds receive this kind of instruction in the one or two schools of each class now in operation.

The course of study in agricultural high schools and mechanic arts high schools, having now been under trial and development for nearly twenty years, has been nearly as well worked out as the general courses of study in our city high schools, and are also successfully articulated with the rural school and the primary city school below and with the college courses above. Passing the land-grant act of 1862 was an experiment, because no agricultural or mechanical college had then been successfully started. The passage of this measure would not be an experiment, because agricultural high schools and mechanic arts high schools, both including industrial work for women in relation to the home, are recognized as among our most successful institutions. It is believed by those well informed that every dollar appropriated for the Federal Department of Agriculture and for the State experiment stations and State college returns to the American people, or rather earns for the American people, at least $20. There is no reason why the appropriations under this act shall be less productive.

The farmers of America have rapidly changed from an indifferent attitude toward so-called "book farming" to a high appreciation of and a profound respect for agricultural science and institutions devoted to improving agriculture. Education in mechanics and home economics has likewise risen to a plane of high appreciation. It requires no prophet to predict that within ten years after the passage of a law as outlined in this bill the entire point of view recently held by the farmers of this country toward agricultural schools and by the practical men of affairs toward city high school education will have been changed.

The feverish desire to leave the land and go to the city will have been removed. Farms as places of business and farm homes as places to develop splendid families will be appreciated at their true American value. With the great Federal Department of Agriculture, with fifty State agricultural colleges and experiment stations, with two or three hundred agricultural high schools and branch experiment stations, and with tens of thousands of improved consolidated rural schools and with other educational machinery as college-extension work, and with highly developed agricultural literature, and with a like equipment for education in city industries, the American people will be so informed and inspired in industrial affairs and home making that we shall have a new America. The pivotal place in turning the education of our workers, whether in country or city, more toward the things with which they must deal is in the high school, because here the teachers for primary schools are trained in those subjects in which they are to instruct the primary pupils.

The provision in this bill which appropriates $2,500 to be placed with an additional amount to be supplied by the respective States for branch experiment stations for each agricultural high school is important from two standpoints. It is necessary that the teachers of agriculture, horticulture, live stock, and dairying in these agricultural high schools have as part of their instructional machinery actual farm operations and such research work as the State experiment stations and the Federal Department of Agriculture may properly delegate to these institutions. The working out of crop rotations and farm plans, the testing of commercial fertilizers, the testing and breeding of plants, the demonstrating of methods of destroying insects, and many other similar lines will have a large value, both as part of the school education and as a means of working out improvements in agriculture.

The question is often asked, Why should the Federal Government take up the burden of the State? Will not the use of Federal money tend to retard activity along educational lines in the States and cause them to depend on Federal aid? Is Congress not already doing too much for the people of the States? Congress, and especially the State legislatures, have not taken full cognizance of the fact that the Federal Government raises and expends more than three times as much money as do all of the State governments combined. The fact that the Federal Government has the indirect, and therefore easy, methods of raising taxes, while the States have the direct and more difficult methods of raising taxes is the best of reasons why the Federal Government should lead general cooperative movements in bringing about important changes affecting the entire length and breadth of the country. Congress, with $800,000,000, offering to cooperate with the States with their aggregate of $200,000,000, will help the States so to increase their $200,000,000 that they will have means with which to improve their secondary and primary schools, tasks which now seem so large as to well-nigh paralyze effort in many States. Material Federal aid will greatly encourage and inspire State and local effort. If this bill is passed, and the States duplicate the amount of money thus appropriated, American education can be put upon a new plane in every State in the Union. Georgia's experience shows that the States are willing to supply the equipment and part of the current-expense fund. Let the Federal Government meet Georgia halfway, and every State will follow the noble example set by that vigorous Commonwealth.

Does not this plan of using some of our immense national funds with which to build up local institutions decentralize rather than increase the tendency to centralization? How can we better strengthen the States than by turning over to State management funds with which to strengthen their educational institutions, around which local interest and local pride center?

This bill does not establish a new precedent in principle, because it simply carries out the precedent established in our country in organizing State colleges of agriculture and mechanic arts in 1862. The British Government several years ago, from their large income from taxes, passed an almost identical act, thus building up local institutions. Under that act technical education, for the most part secondary in grade, has been supplied to the people of the cities of the British Islands, and numerous agricultural high schools have been organized in individual counties or by groups of counties. Through the legislation provided in H. R. 24757 America will not only keep pace with the most progressive nations, but will be in a position to take the lead in industrial education for the masses.

We need to build up a class of people educated in distinctive industrial and agricultural schools, highly organized, so as to give instruction and to inculcate pride in industrial affairs and in the American home. So long as the teachers of our schools are trained in schools devoted mainly to nonindustrial interests they can not well build up an industrial community with full knowledge and inspiration for their life work. Let us have as a dominating force in the education of our country youth and our city youth teachers who are chosen as trained leaders in building up rural and industrial science and practice and in home making.

There is encouragement in the fact that year by year the strong men of the world's legislative bodies are joining the ranks of those who favor larger appropriations for research and education related to the industries. The time has arrived in many of the States when the farming interests demand that legislative bodies counteract the tendency to pile up the largest part of our annual increase of permanent wealth in our largest cities. Labor, too, under wise leadership, is ready to demand more of the fruits of science and art in the form of technical training for their children.

The proposition in this bill at first seems radical. When carefully considered it is not as radical as the proposition to build new battle ships. It is a plan for investing money in the higher industrial efficiency of the nation's 60,000,000 workers and in the better living of all people of all classes. It proposes that we give our workers a square deal by giving them a chance to secure technical training, as we now provide technical training for the professional classes. It looks to universal technical education. This kind of education is not a net expense. It is a net profit. It is an expenditure such as we make in business, only here the economic return plus the social benefit is greater than the expected profits in business. This plan is not an experiment. It will bring the results. No other solution has been offered to the problem of bringing to a free people the results accruing from their own expenditures in scientific research. If another plan superior to this can be devised, let us adopt it, and, failing in that, let us perfect and utilize the plan outlined in this bill.

PERSONAL REQUEST.

Mr. FLOOD, by unanimous consent, obtained consent to file, as a part of the report of the Committee on Expenditures in the Department of Agriculture, the views of the majority of the committee on Mount Weather, and to ask that the report filed by the chairman of the committee be reprinted with the majority's views on Mount Weather substituted for those of the chairman, and the chairman's views on Mount Weather be printed as a minority report from the committee on that subject.

Mr. PAYNE. I move that the House take a recess until 8.30 p. m.

The SPEAKER. The Chair desires to say to gentlemen that the pension appropriation bill must again be sent to conference, and there are many other important bills that ought to be considered to-night, and they can not be considered without a quorum. The question is on the motion of the gentleman from New York [Mr. PAYNE] that the House take a recess until 8.30 p. m.

The question was taken; and the motion was agreed to.

Accordingly (at 6 o'clock and 33 minutes p. m.) the House took a recess until 8.30 o'clock p. m.

## EVENING SESSION.

The recess having expired, the House (at 8.30 p. m.) resumed its session.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. ROSE, its assistant secretary, announced that the Senate had passed the bill of the House (H. R. 25692) to provide for an additional district judge for the northern and southern districts of California, with an amendment thereto, in which the concurrence of the House was requested.

NORTHERN AND SOUTHERN DISTRICTS OF CALIFORNIA.

The SPEAKER laid before the House the bill (H. R. 25692) to provide for an additional district judge for the northern and southern districts of California, with a Senate amendment thereto.

Mr. JENKINS. I move that the House concur in the Senate amendment.

The motion was agreed to.

On motion of Mr. JENKINS, a motion to reconsider the last vote was laid on the table.

PENSION APPROPRIATION BILL.

Mr. GARDNER of Michigan. Mr. Speaker, I desire to call up the conference report on the pension appropriation bill, and ask that the report be read.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24640) "An act act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes," having met, after full and free conference have been unable to agree.

WASHINGTON GARDNER,
W. P. BROWNLOW,
JOHN A. SULLIVAN,
*Conferees on the part of the House.*

P. J. MCCUMBER,
N. B. SCOTT,
*Conferees on the part of the Senate.*

Mr. GARDNER of Michigan. I move that the House insist on its disagreement and accede to the request of the Senate for a conference.

The motion was agreed to; and the Speaker announced as conferees on the part of the House Mr. GARDNER of Michigan, Mr. BROWNLOW, and Mr. SULLIVAN.

CERTAIN STREET RAILWAY TRACKS IN THE DISTRICT OF COLUMBIA.

Mr. BABCOCK. Mr. Speaker, I desire to call up a Senate bill and to make the motion which I send to the Clerk's desk.

The Clerk read as follows:

I move to suspend the rules and agree to the following:

"*Ordered*, That immediately upon the adoption of this order it shall be in order to take up the bill (S. 6147) entitled 'An act authorizing changes in certain street railway tracks within the District of Columbia, and for other purposes,' with the amendment thereto reported by the Committee on the District of Columbia, to offer thereto the following amendments: First, strike out section 13 of the House substitute providing for wide tires; second, to provide for universal 3-cent fares, to be collected only from passengers provided with seats; and after votes on the aforesaid amendments the question shall be on the committee amendment and on the bill to a final passage without intervening motion or appeal."

The SPEAKER. Is a second demanded?

Mr. JAMES. I demand a second, Mr. Speaker.

Mr. BABCOCK. I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Wisconsin is entitled to twenty minutes and the gentleman from Kentucky [Mr. JAMES] to twenty minutes.

Mr. BABCOCK. Mr. Speaker, this bill provides for the extension of the tracks of the existing street car lines to the Union Depot in the most direct way possible.

Mr. SULZER. Does it provide for 3-cent fares?

Mr. BABCOCK. The order provides for an amendment being offered for 3-cent fares.

Mr. SULZER. What does it provide about the fare?

Mr. BABCOCK. Three-cent fares, not to be paid unless a passenger is given a seat. Do you want any more?

Mr. SULZER. Oh, yes; transfers, too?

Mr. BABCOCK. That is the amendment that is to be considered.

Mr. SULZER. All right; it is about time the people got something. At last, it seems their day is coming.

Mr. BABCOCK. Now, Mr. Speaker, in addition to this is the new construction of the Capital Traction Railway in northeast Washington that has been asked for by the citizens for many years, a good piece of construction that public policy demands. Further than that, Mr. Speaker, it reenacts what is known as the "smoke bill," that the House has passed once or twice before.

And I want to say just a word in reference to the smoke proposition. For several years the people of the District of Columbia—the manufacturers, the hotels, and the restaurants—have been obliged to comply with the present smoke law. Many of them have been fined many times. The electric light company has been driven out of the city, at a cost of $1,000,000 to build a new plant on account of this smoke ordinance. Now, this bill provides that the steam locomotives in the city of Washington shall come under the provisions of this act, a matter of equity between the citizens of Washington and the locomotives in the city.

Mr. Speaker, this is all this bill provides, except that it provides that a motion shall be in order to strike out the provision for wide tires; that it shall be in order for the gentle-

man from Kentucky to offer an amendment for 3-cent fares. It ought to pass, it should pass, and this House will fall far short of its duty unless it does pass.

Mr. PAYNE. Will the gentleman yield?

Mr. BABCOCK. Certainly.

Mr. PAYNE. Does this resolution give any Member the liberty of proposing an amendment that any person shall be carried free on the street cars?

Mr. BABCOCK. It does not.

Mr. PAYNE. I am surprised that the gentleman has made that admission.

Mr. BABCOCK. I notice that the gentleman from Mississippi [Mr. WILLIAMS] is not here.

Mr. SIMS. Yes; the gentleman is here. He will be in his seat in a moment.

Mr. BABCOCK. It was understood that he was to offer the amendment.

Mr. SIMS. The gentleman from Mississippi understands that this motion, if carried, itself eliminates the wide-tire amendment.

Mr. BABCOCK. I do not think it does. It is in order for that motion to be considered, and, if the motion should be made, to strike it out. I will yield to the gentleman from Mississippi.

Mr. WILLIAMS. Mr. Speaker, when this bill was before the House the other day I opposed a motion to suspend the rules and put it upon its passage for two reasons, first, because if it were put on its passage on a motion to suspend the rules, the House would have no opportunity to discuss or to vote upon the amendment offered by the gentleman from Kentucky [Mr. JAMES]; secondly, because the bill contained a provision requiring wide tires in the city of Washington. This provision was subject to a point of order under the ordinary procedure when the opportunity to make the point of order could be given to that provision, to which I was opposed independently of an opportunity of making the point of order.

The chairman of the District Committee now offers the bill with the broad-tire provision stricken out of the bill if this resolution is passed. Moreover, the amendment offered by the gentleman from Kentucky [Mr. JAMES] will be subject to discussion, adoption, amendment, or rejection.

Mr. CLARK of Missouri. But the chairman of the District Committee says that the motion will have to be made in order to strike out the section relating to wide tires.

Mr. WILLIAMS. I understood the broad-tire provision, section 13, is stricken out of the bill, as the gentleman presented it.

Mr. BABCOCK. That is the report, but I think the gentleman should make the motion to strike it out formally.

Mr. WILLIAMS. The gentleman from Michigan agreed with me that the bill would be presented with that stricken out.

Mr. BABCOCK. Yes; it says that it shall be in order to strike it out.

Mr. WILLIAMS. Is it in order to make the point of order on it now?

Mr. BABCOCK. No; but make a motion to strike it out.

Mr. WILLIAMS. Then the gentleman has not presented to the House the matter as he and I agreed that it should be presented.

Mr. BABCOCK. Yes; he has as far as possible.

Mr. WILLIAMS. What I insist upon is this: This bill to permit certain railroads to extend their lines to the Union Depot had placed upon it by the Committee on the District of Columbia a provision for broad tires for road wagons, which was not germane to the bill and against which a point of order would lie.

Now, unless the gentleman presents the bill in such shape as to enable me to make that point of order for the consideration of the Chair, then I must insist that this bill be defeated.

Mr. BABCOCK. Mr. Speaker, I ask unanimous consent that the section the gentleman refers to be stricken from the bill.

Mr. SHACKLEFORD. Mr. Speaker, I object.

Mr. BABCOCK. Then, Mr. Speaker, I move that the section be stricken from the bill.

Mr. WILLIAMS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WILLIAMS. I will ask the Speaker to read the order and to tell me whether or not, worded as it is, it would be in order for me to raise the point of order as to the germaneness of section 13. If it be in order for me to raise that point of order, I know it will have to go out on the point of order. Then I do not care. The point of order is that section 13, being an amendment, is not germane to the subject-matter of the bill.

The SPEAKER. The Chair would suggest that, by unanimous consent, the gentleman from Wisconsin can change his motion so as to put it in the following form, which the Clerk will read.

The Clerk read as follows:

*Ordered*, That immediately upon the adoption of this order it shall be in order to take up the bill S. 6147, entitled "An act authorizing changes in certain street railway tracks within the District of Columbia, and for other purposes," with the amendment thereto reported by the Committee on the District of Columbia, to offer thereto the following amendments:

First, to strike out section 13 of the House substitute, providing for wide tires, unless said amendment shall have been ruled out on a point or order, which is hereby authorized.

Second, to provide for universal 3-cent fares to be collected only from passengers provided with seats; and after votes on the aforesaid amendments the question shall be on the committee amendment and on the bill to a final passage without intervening motion or appeal.

Mr. BABCOCK. Mr. Speaker, I make the request.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. JAMES. Mr. Speaker, how much time has the gentleman consumed?

The SPEAKER. The gentleman has fourteen minutes left.

Mr. JAMES. Mr. Speaker, the amendment which I shall offer gives an opportunity to the House of Representatives to vote on a 3-cent fare. I desire to ask the gentleman from Wisconsin [Mr. BABCOCK] how much time he is willing to agree on for a discussion of this question as to the merits of the amendment?

Mr. BABCOCK. I understand there are twenty minutes on each side.

Mr. JAMES. Oh, no; that is on this question of suspending the rules upon my demand for a second.

Mr. SIMS. It is on the other also.

The SPEAKER. That question does not arise at this time.

Mr. JAMES. Then, Mr. Speaker, I want to be heard in support of the amendment that I shall presently offer affording 3-cent fares in this District.

We have been legislating for the various States trying to curb the rapacity of the railroads throughout the country, trying to make them deal equitably and fairly with the shippers, with the produce from the farm, with the great commerce of the country, and in that battle on behalf of the people in favor of justice to all I most heartily joined; and now, Mr. Speaker, I want to urge that this House remedy the daily outrage that is being perpetrated right within the shadow of this Capitol by the street car monopoly, an outrage being perpetrated on the laboring people, the men who work, the women who toil. It is for these that I now appeal.

Mr. Speaker, a 5-cent fare does not amount to much to the Members of Congress. It does not amount to anything to a man who has money, but when we consider the fact that it is 10 per cent, 15 per cent, 20 per cent, and sometimes 25 per cent of the wages of the laboring people of this District, people who labor by the hour for their money, to them it amounts to a very great deal. To these people who toil at 5 cents, 10 cents, and 15 cents an hour, when we consider, Mr. Speaker, that street car fares mean hours of toil to them, then it is time for this House of Representatives to give consideration to this question. [Applause on the Democratic side.]

There are two street-car systems in this city. One is the Capital Traction Company, the other is the Washington Electric Company. The Capital Traction Company goes right by this Capitol. It has a franchise which was given to it by this Government without a dollar being paid for it by the company. The company then capitalized and valued that franchise at $12,000,000, and last year this street-car company collected as street-car fares $1,700,000 and declared a dividend of 6 per cent upon $14,000,000, including $12,000,000 of watered stock. They take the franchise given by the people to them without charge and make it a burden to be borne upon the bending backs of the people from whom it came. [Applause on the Democratic side.]

These companies are given a monopoly of the people's highway, a highway which belongs to all the citizens, a highway of the beggar as well as the street-car magnate, and yet, Mr. Speaker, these street-car companies virtually pay no taxes and not a dollar for the purpose of keeping up the streets of this city.

The Capital Traction Company has made and declared dividends amounting to over $7,000,000 in the last ten years, and this does not take into consideration the extension of their tracks, which was paid out of their profits. They made this last year as profits off the people of this District within a hundred thousand dollars of the original cost of the 22 miles of double track which they own in this District. The Washington Electric lines, that have all the other lines trustized and monopolized in this District, collected last year off of the people $2,879,000, and, allowing 50 per cent as operating expenses, it declared dividends of $1,400,000, and the 50 per cent operating expenses is far more, in my judgment, than it would cost; and

I now appeal to this Congress and ask you, will you allow this outrage to go on right here in the capital of your country? [Applause on the Democratic side.] Not only that, but they go further. They pay the president of this street-car company twice as much salary as is paid to the Vice-President of the United States of America. After all of the exorbitant salaries, which are prolific, to the men high up in places, with a juggling of figures, with a concealment of profit, with a payment of interest upon debts which they do not owe, yet their dividend is so enormous absolutely that they have to add millions of water to the stock in order to keep all the people everywhere from rising up in outrageous protest against it. [Applause.]

The Capital Traction Company, which it cost in round numbers not more than $1,500,000 to build, after adding the $12,000,000 of watered stock, they put that stock upon the market, and it is selling to-day for $1.40. So we see that by the exactions of this company and by the enormous and wonderful profit it makes that its stock to-day is on the open market worth close on to $20,000,000. Mr. Speaker, there can be no doubt on earth that these companies can make abundant profit out of a 3-cent fare.

The legislatures of the various States, in obedience to the public will, are requiring the railroads to charge reasonable fares. Railroads that cost many times as much to operate their lines as it does a street car line, cost more to build, people are demanding that they should come down to that basis of justice of "live and let live." [Applause.]

Mr. Speaker, we do not represent the people of this great city directly. They are orphaned, so far as direct representation is concerned, but on behalf of those people at home for whom we do directly speak, in their names I appeal to the manhood of this Congress to rise up and do justice to these people here, although you do not represent them directly; draw in front of the aggressions of these combinations the naked sword of American justice and in behalf of the laboring people command these companies to do common justice. [Loud applause on the floor and in the galleries.]

Mr. Speaker, I reserve the balance of my time. If the gentleman from Wisconsin desires to yield some of his time, I trust he will do so; if not, I yield five minutes to the gentleman from Tennessee.

Mr. SIMS. Mr. Speaker, will the gentleman from Wisconsin yield me some time? I wish to speak on both amendments?

Mr. BABCOCK. How much time does the gentleman want?

Mr. SIMS. Ten minutes.

Mr. BABCOCK. I have only fourteen minutes remaining. I yield the gentleman four minutes.

Mr. SIMS. The gentleman from Kentucky will yield me six?

Mr. JAMES. I yield six minutes and the gentleman from Wisconsin yields four, making ten minutes.

Mr. SIMS. Mr. Speaker, I wish to state to the House that I have worked hard for a long time to compel the street railway companies of this District to agree to universal free transfers. It was my purpose to offer such an amendment to this bill. I certainly desired to do so. The gentleman from Wisconsin [Mr. BABCOCK] desired to have an amendment known as the wide-tire amendment, but in order to get legislation upon that, about which there seems to be no disagreement, the gentleman from Wisconsin has agreed that the amendment for wide tires may be stricken out, and I have agreed to yield and not offer the amendment for universal free transfers. But I do believe that something ought to be done. The street railway companies will not do anything until they are forced. They did not want to furnish vestibules for their cars to save the lives of their motormen, until Congress forced them to do so. For the same reason I was not willing to advocate 3-cent fares, but inasmuch as we have been threatened by the street railway companies to litigate and test in the courts the question of universal free ransfers I gave it up. Now, I wish to state a few facts, and take them from the hearings, that the House may have a clear knowledge of the condition of affairs. The gentleman from Kentucky has truthfully stated that not one cent has been paid by any street car company of the District of Columbia for the privilege of constructing and operating its railway. I can not discuss at length both of these railroad companies in the brief time I have, but inasmuch as the gentleman from Kentucky has referred to the Capital Traction Company, I will give you from the hearings the facts. Mr. Dunlop was asked what constituted the Capital Traction Company, what its properties were. I quote from the hearings:

Mr. SIMS. I want to ask you a line of questions; whether these provisions are just. What companies does the Capital Traction Company embrace? What does the title "Capital Traction Company" embrace?

Mr. DUNLOP. The Capital Traction Company is the Rock Creek Railway Company with its name changed. If you will turn to the law of March 1, 1895, you will get the whole thing. The Capital Traction Company is simply the Rock Creek Railroad Company with the name changed by act of Congress.

Mr. SIMS. What was the capital stock of the Rock Creek Railway Company?

Mr. DUNLOP. I don't remember; I think it was about $200,000, but you will find it in that same law; I want to answer all your questions absolutely.

Mr. SIMS. I know that; but I want to have to ask them before you answer them.

Mr. DUNLOP. The Capital Traction Company is the Rock Creek Railway Company with its name changed. The same law that authorized that authorized it to purchase the Washington and Georgetown Railway and to pay for the consideration of that purchase in stock, giving them the right to issue their stock to pay for that consideration.

Mr. SIMS. Now, I want to ask this; I think we will get along faster if we will just follow the path that I have mapped out. When you changed the name to Capital Traction, then you issued $12,000,000 of capital stock?

Mr. DUNLOP. Yes, sir; and it was authorized by the law. Just as much as if it had been authorized in the original charter.

Mr. SIMS. You issued $12,000,000, and then you started to float it?

Mr. DUNLOP. There was no floating of it then; and there was never a dollar of cash passed in the transaction.

Mr. SIMS. Never a dollar; all stock?

Mr. DUNLOP. All stock.

Mr. SIMS. Now, when that $12,000,000 was first issued, and put upon the market, for what did it sell? I do not mean what you people exchanged between yourselves, but what was the stock worth on the market?

Mr. DUNLOP. I don't remember; it was something below par; it went down finally to 45.

Mr. SIMS. Went as low as 45?

Mr. DUNLOP. Yes; went as low as 45, and sold on our local exchange for 45.

Mr. SIMS. What is it worth now?

Mr. DUNLOP. About 141 or 142.

Mr. SIMS. Now, then, all purchases or extensions or improvements since that time have been made without any increase of the capital stock?

Mr. DUNLOP. There has never been an issue of stock; there is no law to allow us to increase; we would not attempt to do that.

Mr. SIMS. Consequently all improvements and extensions have been made out of the earnings of the road?

Mr. DUNLOP. No, sir; they have been made by the issuance of bonds.

Mr. SIMS. You have issued how much, one million?

Mr. DUNLOP. There is outstanding $1,080,000.

Mr. SIMS. You paid in 1896, $419,873; in 1897, $209,000; in other words, going on down giving the different dividends; you made extensions in 1891, and your extensions were $480,000, and sale of real estate $558,000.

Mr. DUNLOP. That was the sale of the old powerhouse site to the Government.

Mr. SIMS. And you issued the next year as dividends amounting to $960,000.

Mr. DUNLOP. Four hundred and eighty thousand dollars of that came from the proceeds of the sale of that lot.

Mr. SIMS. Why didn't you pay that on the bonds?

Mr. DUNLOP. Why didn't we pay that on the bonds? That was a matter for the directors to decide. I can not say why they did not pay it. It belonged to the stockholders, and they gave it to them.

Mr. SIMS. And you received $250,000 insurance at the same time?

Mr. DUNLOP. Yes, sir.

Mr. SIMS. Why was it not paid on the bonded indebtedness?

Mr. DUNLOP. Because that was to be put into the electric system on Pennsylvania avenue.

Mr. SIMS. There has been no increase of capital, but a vast increase of value. I gather from the reports for ten years, until 1906, a few days ago, you have paid out in dividends and extensions, together with the proceeds of real estate, $558,000, $6,515,245.15. Your stock to-day is worth about 140.

Mr. DUNLOP. It is selling at about 141 or 142 on the exchange.

Mr. SIMS. In addition to the stockholders receiving all this amount of money and the company's extensions, amounting to about $1,000,000, the increased value in your stock is about $14,000,000. Now, the Capital Traction, since it was formed and started, has got in the way of profits and added value to stock more than the entire issue of stock.

The CHAIRMAN. Didn't you make an error when you said $14,000,000? It should be $480,000.

Mr. SIMS. It went as low as 45. There was an increasing value of $10,000,000 in the price of the stock, and they received $6,000,000 in the way of dividends and consideration. Of course, we realize——

Mr. DUNLOP. Well, General, I think this would throw some light on that: The Washington and Georgetown Railroad Company had sold all of its property to the Rock Creek Railway Company, and went out of existence. The stockholders numbered between 180 and 200, I think. I do not think it ever was over 200, and my recollection is that at the time this took place it was about 180. The Capital Traction Company's stockholders number about 1,250, and you have the names of them in the last report.

Mr. SIMS. I don't want to get off on that.

Mr. DUNLOP. I want to get off on that because I want to disabuse your mind of one thing, that the people who own this stock now have paid a great deal——

Mr. SIMS. I do not care anything about that. I want to ask you, at the time this capital stock was issued you had of single track 35.90 miles, and of double track 17.95 miles; in other words, 18 miles of double track. Now, at $12,000,000 the capital you issued would amount to $666,666.66⅔ per mile of double track. I mean when you issued it.

Mr. DUNLOP. That goes right to the question. You criticise the Rock Creek Railway Company for paying such prices.

Mr. SIMS. I only want to get at the facts. For the 18 miles of double track you issued stock at the rate of $666,666.66⅔ per mile.

Mr. DUNLOP. The Rock Creek Railway Company issued stock for the consideration paid to the owners of the Washington and Georgetown Railway Company, whether it was $500 a mile or $1,000 a mile.

Mr. SIMS. Your statement heretofore has been that it cost $120,000 to construct double track.

Mr. DUNLOP. I looked that up since last meeting. What we built last year cost $63,612 per mile of single track.

Mr. SIMS. But the whole construction has not cost that?

Mr. DUNLOP. I am speaking of the track construction—just what Mr. Madden said cost $30,000, and that he had seen a contract for. And I

went further back than that. I want to get that clear in the minds of the committee. I went back and looked up all the extensions we had made under the Capital Traction Company's management, and the F and G street line and this extension out east here were $66,000, because there were a great many more gas mains and water mains to move in the streets.

Mr. SIMS. You say it cost $66,000. Say it cost $150,000 per mile of double track. You have it capitalized at $666,000 per mile of double track. How much of that is water and how much money?

Mr. DUNLOP. There is none of it water; not a drop of water in it. The Capital Traction Company paid that consideration under an act passed by Congress, and issued that stock.

Mr. SIMS. Perhaps I should not have used the word "watered." What is the difference between the capitalized value and the actual money value?

Mr. DUNLOP. The actual money value upon which it is bound to pay dividends is $12,000,000; that is the actual value.

Mr. SIMS. Is it bound to pay dividends upon that?

Mr. DUNLOP. Yes; it is bound to pay dividends, if it makes the money. That is the money value of the present company.

Mr. SIMS. You are paying 6 per cent dividends upon that value?

Mr. DUNLOP. We are.

Mr. SIMS. And paying for all construction out of the earnings?

Mr. DUNLOP. Not at all. I just said we were issuing bonds, and if you have a report you will find that we have a floating debt this last year of $405,000, and that really is not completed.

Mr. SIMS. But you do not contemplate increasing your capital stock to pay those bonds?

Mr. DUNLOP. No, sir; because we have no right to do it, and we do not contemplate doing anything unlawful.

Mr. SIMS. Why don't you pay the $558,000 you got for real estate on your indebtedness, and reduce it?

Mr. DUNLOP. We paid $480,000—not $580,000—to the stockholders. We paid it by order of the directors.

Mr. SIMS. You received $558,000?

Mr. DUNLOP. The balance of it was used in other matters of the company.

Mr. SIMS. You received that?

Mr. DUNLOP. Certainly we received it.

Mr. SIMS. You were carrying at least $480,000 bonded indebtedness and you were paying 6 per cent on it, and you were paying dividends on approximately $700,000 per mile, and then you tell this committee and this country that you can not take the little reduction that might come about by free transfers, and further acknowledge that your capital stock has enhanced in market value $10,000,000 since shortly after——

Mr. DUNLOP. Whose stock are you talking about?

Mr. SIMS. You said it went to 45 cents.

Mr. DUNLOP. I said the present stock went down to 45.

Mr. SIMS. That was all it was worth then.

Mr. DUNLOP. Not at all.

Mr. SIMS. Then why didn't you sell the stock for what it was worth?

Mr. DUNLOP. How do I know? How does anybody know? It is worth 141 now.

Mr. SIMS. Because it brings it. Anything is worth what it will sell for.

Mr. DUNLOP. That was on the stock exchange.

Mr. SIMS. But the people sold the actual stock, didn't they?

Mr. DUNLOP. I think you will find that there was not very much sold then.

Mr. SIMS. Hasn't there been an enhanced value in the stock of your company out of all proportion——

Mr. DUNLOP. Certainly the stock has enhanced, and the interest of the stock is only 4 per cent on 150. Would you loan money at 4 per cent? I wouldn't.

Mr. SIMS. Would the price of your stock be materially reduced or affected in any way by giving free transfers?

Mr. DUNLOP. Certainly it would.

Mr. SIMS. What effect would it have?

Mr. DUNLOP. It would have the same effect as the issuing of 15,000,000 transfers has now. If we got full fares we would get greater receipts. It will affect it just to the extent that we haul passengers from all the other systems coming to us.

Mr. SIMS. But your business will increase and your receipts will increase with each passenger you carry free after a certain number.

Mr. DUNLOP. That is speculative.

Mr. SIMS. And the idea that it would reduce receipts is also speculative.

Mr. DUNLOP. I know something about that.

Mr. SIMS. Would you take less than 140 for your stock if we put on free transfers?

Mr. DUNLOP. I do not want to sell mine, for just the reason that none of you gentlemen would want to. I think I am entitled under any State law or any law in the country to reasonable compensation on that stock, and I think 6 per cent is not unreasonable. You fix 6 per cent as a point where it is not usury, and I think it is reasonable that the courts will bear me out in that.

Mr. SIMS. Isn't 4 per cent stock good stock; isn't it par everywhere?

Mr. DUNLOP. It is better than 3.

Mr. SIMS. It is practically 100 cents on the dollar?

Mr. DUNLOP. Not at all; some men would not touch it. You would not invest in 4 per cent stock, you said.

Mr. SIMS. No, sir; I said I did not have any money to lend. Now, you would not as a stockholder in your company agree to sell your stock at less than 140 if we put on free transfers?

Mr. DUNLOP. No, sir; because I have it at par and it is bearing me 6 per cent.

Mr. SIMS. You have made 4 per cent then?

Mr. DUNLOP. I have not made anything because I have not sold it.

Mr. SIMS. You have received 6 per cent?

Mr. DUNLOP. Yes; and I have also received 2 per cent.

Mr. SIMS. You have received what was allowed.

Mr. DUNLOP. You will find that we paid——

Mr. SIMS. Your stock has been improved by extension, etc.?

Mr. DUNLOP. Not at all; extensions have a tendency to draw it down.

Mr. SIMS. Are not your extensions a part of the property?

Mr. DUNLOP. Of course.

Mr. SIMS. Is 22 miles of Capital Traction worth more than 36?

Mr. DUNLOP. No; we could have made more money on the 22 than on the 36.

Mr. SIMS. Yes; you said it cost $166,000 a mile to build it.

Mr. DUNLOP. I want to say on that point, because the public doesn't understand this any better than General Sims does, that the more miles you operate the less net profit you get out of it. We have been asking to be allowed to cover this whole District with our lines, and stand ready to build them to-day, but it would reduce our net profits if we did, and it would do away with the demand for free transfers.

Mr. SIMS. With your road as it is, will you not be able without extension, if we give free transfers, to pay your 6 per cent dividend year in and year out with the normal growth of the District?

Mr. DUNLOP. I think not, because we will simply be a dumping line for everything.

Mr. SIMS. You think your company would be injured worse than any other?

Mr. DUNLOP. I think we would be very materially injured.

Mr. SIMS. You would be very materially injured. And yet you would not sell your stock for any less than you say it is bringing now?

Mr. DUNLOP. I do not run the Capital Traction Company on my personal interest. I put that aside absolutely. I try to operate that company on business principles; if my stock didn't pay me 1 per cent I would not have anything to say.

Mr. SIMS. Because you get a salary as president?

Mr. DUNLOP. My salary is known of all men. It is in the public documents here in the Capitol. I am not ashamed of it; I earn every dollar of it. And if the stockholders do not think so, they can say so and I will get out. They pay me $15,000 a year.

Mr. SIMS. That is the reason why I said that you can afford to be in this company, even if you did not have a share. You would not sell your stock because it carries with it something more than the dividend. Suppose you held no office in the company.

Mr. DUNLOP. It carries with it a dividend on its face value that I invested in.

Mr. SIMS. Suppose you had no office and we were going to pass a bill materially reducing the value of the stock, would you not sell your stock at present prices?

Mr. DUNLOP. If I knew you were going to pass a bill to ruin me, I would sell it to-morrow.

Mr. SIMS. But we can not injure you, as you are getting a salary, even if we allowed free transfers. But I believe, Colonel, that you can give free transfers without hurting the stockholders or salaried officers or anybody else.

Mr. DUNLOP. I disagree with you, General, from any standpoint. I think I know more about the business than you do.

Mr. SIMS. You know it better ten times than I do.

Mr. DUNLOP. And then there is the other question to which I want to call the committee's attention. As I said before, we will obey any law that Congress passes that is reasonable. We have always done it, and there need be no penalty in it to make us obey; we will do it without that; but if Congress passes an unreasonable law the courts are open to us.

Mr. SIMS. They ought to be open to you.

Mr. DUNLOP. They ought to be, and I think there is not one gentleman at this table who will deny it. If you pass a law loading us up with free transfers, no one here will deny that we will have a right to go to the courts. But I want to say that there is another question involved there, the right to make any corporation or individual carry a passenger or do any other kind of work without reward. The free transfer means that we must carry those passengers without reward. That question will go to the courts.

Mr. SIMS. The reason I have asked you so much about your own company is because I can not understand the reports of the other companies at all, but I can understand yours.

Mr. DUNLOP. We make everything so that any man can understand. We have nothing to hide, gentlemen, and I want to say here that we make money, too.

Mr. SIMS. Your reports show it.

Mr. DUNLOP. We do not deny it.

Mr. SIMS. But for the franchises——

Mr. DUNLOP. For the franchises we hold the receipts of the District government at 4 per cent.

Mr. SIMS. It is the lowest tax on the face of the earth.

Mr. DUNLOP. The lowest tax on the face of the earth?

Mr. SIMS. The lowest that I have heard of to call it tax. I do not think that it would be reasonable to call it tax if it were any lower.

Mr. DUNLOP. That is your private opinion.

Mr. SIMS. It is about 30 cents per $100 on the selling value of the stock.

Mr. DUNLOP. You are getting into stock; I am not a stock dealer.

Mr. SIMS. It is good property with or without free transfers, and it will be 200 one of these days, and the reason of it is because the city is growing.

Mr. DUNLOP. I want to tell this committee now that if I can make it worth 500 I am going to do it, and you do it, too, at home.

Mr. SIMS. You are looking at it from a salary standpoint, while we are looking at it from the standpoint of the good of the people. When will the day come that your company will be willing to give something in the way of reduced fares?

Mr. DUNLOP. Never. If Congress opens the way to us and says that we can build out to the sections that are clamoring for the car lines it will do away with the demand for free transfers.

Now, I will not read it all, because it is too long. But here is the Capital Traction Company, that, as shown by the statements of its president, was simply the Rock Creek Company with its name changed. The Rock Creek Company had $200,000 of capital stock. The name was changed and stock reissued for $12,000,000. The hearings show that only 18 miles of double track then existed. Five miles of that double track was overhead construction, which cost only half the cost of underground. The capitalization, as is thus shown, was $666,000 per mile. Not a dollar was added to the treasury, not an additional dollar put in. Then the power house, or the lot upon which it stood, was sold. The Government bought it, because it was cheap, at over $550,000, and instead of the company then paying its bonded indebtedness of $1,000,000 then existing, it put $480,000 in the pockets of its stockholders as an extra dividend. The capital stock has advanced from 45 cents on the dollar, market value, to $1.47 on the dollar, for which it sold to-day, making

more than $10,000,000 in profits by advancement of stock. Over $6,000,000 in dividends have been paid, until the enhanced value of stock and dividends exceed every dollar ever put into the treasury of the company by way of investment. And yet they say they will not have free transfers—they will not do something for nothing. When I asked Mr. Dunlop if free transfers would reduce the value of the stock materially he said yes. I asked him if he would sell his at the present market value in case the law passed, and he said he would not. I said to him, "Your stock is a good property, and it will go to 200." He said, "I will make it 500 if I can."

This shows the spirit of those who own and conduct these roads, and here are the facts. This House is as capable of judging whether they can carry passengers for 3 cents as I am. The proof shows that the highest cost of underground construction has never exceeded $60,000 per single mile, or $120,000 for a double track of underground construction, and it is capitalized at $666,000 per mile, including overhead and underground construction, besides having built all new construction out of earnings or without additional issue of stock. These are the facts briefly stated, but not fully stated, as to the railway proposition.

Now, as to the smoke amendment. The terminal company came to Congress last session and asked for a law to permit them to acquire additional real estate at the terminal station by way of condemnation. Upon that bill was ingrafted the smoke amendment, which I had the honor to offer, simply making the steam railways subject to the same law that every other interest and every individual in the District is now subject. One concern, the Washington Traction Railway Company, has paid $5,000 in fines for violating that law. The people of this District stood at the doors of the District Committee for years to get the law repealed or modified. Congress has stood firm on it, and at a cost of hundreds of thousands of dollars every individual and industry in the District of Columbia has been forced to accept this law, while every steam railroad that runs through the District of Columbia can run its engines through the District burning soft coal or anything else, and smoking up the city. The railway engines make more smoke than all the other industries in the District combined. What a farce to require everybody else to obey the law and let go scot-free the railways. There is the great Union Station, toward which the Government has paid by way of cash and real-estate contributions more than $5,000,000—that, taken in connection with the fact that the railways have occupied public property—the Mall—for more than thirty years without paying one single cent of rental, and without even paying taxes. The Government gave them the Long Bridge, and with it the contract that they should maintain the highway part in perpetuity——

The SPEAKER. The time of the gentleman has expired.

Mr. SIMS. Mr. Speaker, could I get two minutes in which to finish the statement?

Mr. BABCOCK. I have no more time, I am sorry to say.

Mr. SIMS. I am right in the midst of a statement which is not complete. I ask unanimous consent for three minutes.

The SPEAKER. The gentleman from Tennessee [Mr. SIMS] asks unanimous consent for three minutes. Is there objection?

There was no objection.

Mr. SIMS. I thank the House for the opportunity to finish this statement, which will have to be hurried. This company was bound to keep that highway bridge in repair in perpetuity. But an act of Congress relieved them and built a new highway bridge at the expense of the District and the nation. This company is now occupying public property, and have charged every other railroad entering here for the use of terminals that they have absolutely free except the cost of the buildings. I have before me the ordinance of New York City, and this same railway company pays to the city of New York for the privilege of going under her streets $75,000 a year for the first ten years and $225,000 for the next fifteen years, with the power to readjust after that time, as I am informed by a gentleman from New York. They are spending in the neighborhood of $100,000,000 in construction of tunnels under East River and North River and through the city. The New York ordinance provides that they must use electricity. We do not provide that they shall use any particular method of preventing smoke, but leave it alone to them. Is this House by its vote going to say that the railroad property of this country is a pet, a select and special favorite, and that these companies shall not be held to the observance of the same law to which every other property holder of the city is subject?

Now, before the tracks are laid, before the plans are executed, is the time to legislate. After its tracks are laid, the plans executed, then if we should undertake to do what we are doing by this bill they will say they constructed their terminals as provided by Congress and now it would be unjust and inequitable to force them to change their construction after completion. We give them to January, 1908, to prepare to obey the law. If they will only make an effort, and it shall appear that they have not had sufficient time, I am confident Congress will give them an extension of time if necessary. Is New York City to be held up to this country as a model, where a single board of aldermen act, while the great Congress of the United States, in its own Capitol, allows them to dig a tunnel under Capitol Hill, spoiling the street in front of the finest building on earth, absolutely free, and allow them to smoke up and ruin these fine buildings simply because it will cost them something to prevent the nuisance? [Loud applause.]

Mr. WILLIAMS. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WILLIAMS. If the bill is to be read, the point of order which I would make would come immediately after the reading of the section to which the point of order is to be made, but if the bill is not to be read, I would ask the Chair whether it is not in order now to make the point of order?

The SPEAKER. The rule has not yet been adopted.

Mr. BABCOCK. Mr. Speaker, I understand that the amendment proposed by the gentleman from Kentucky has not yet been offered.

The SPEAKER. Well, the rule has not been passed, and the gentleman from Kentucky can not offer the amendment until the vote is taken on the motion to suspend the rules and agree to the order.

Mr. BABCOCK. I yield five minutes to the gentleman from Michigan.

Mr. SMITH of Michigan. Mr. Speaker, it rarely happens that important legislation meets the wishes of us all in every particular. There are some features of this proposed legislation that do not meet my approval.

I would like to have Congress at this time give notice to the railroads entering the city of Washington that in a reasonable time they will be expected and required to bring their trains into the city with electrical engines or by some power that will avoid the smoke nuisance.

We know from what has already transpired that the railroads will oppose this proposition, but there is no good reason to be given in opposition except the question of expense.

The New York Central and Hudson River Railroad is using electrical engines at their terminals in New York City by means of the third rail. They now have thirty-five electrical engines, and this new method of moving their trains in and out of the city seems to be a decided success.

I am told that we have appropriated between twelve and fifteen millions of dollars for white marble buildings that are being or are soon to be erected in this city. Is not this the time and place to take the precaution and give notice to the railroads entering the city that we feel that they ought to join with us in sparing no efforts to preserve these beautiful buildings from the discoloration that will surely come to them in a short time if the smoke trouble is not abated?

I desire to spend just a moment upon the amendment with reference to 3-cent fares. A few days ago this House passed a bill fixing the rate of fare for a suburban railroad desiring to enter this city at 3 cents. If there is a gentleman within the sound of my voice here to-night that knows where in the financial markets of this or any other country you can get money to build a suburban railroad with a 3-cent fare, I would like to have that gentleman stand up now.

Gentlemen, we are asked by an amendment to this bill to say that the electric railroads in the city of Washington shall charge only 3 cents. I wish for one that it were possible to do so—perhaps it is. Knowing, as we all do, that the underground system here costs much more than it does in the most of the cities, where the overhead system is used, and where in many cities a straight 5-cent fare is charged, and in some cases six tickets sold for a quarter, as they are here, I do not feel at this time that I can give my vote to the 3-cent proposition without some additional light. I think so important a matter should receive further and more careful consideration and that we should move cautiously at this time.

My judgment is that the people are not complaining so much about the rate of fare and universal transfers as they are about the want of cars and the lack of proper service. [Applause.]

Mr. HEPBURN. Mr. Speaker, a few days ago when the proposition was made to suspend the rules and pass this bill I was opposed to that action not because of the provisions of the bill, but because an opportunity was not given to secure certain amendments that I thought ought to be engrafted upon the bill. I am in favor of the passage of the bill, but I am confident that its merits can be enhanced by the adoption of the amendment

to be proposed by the gentleman from Kentucky [Mr. JAMES]. It has been suggested that this amendment, providing for universal 3-cent fares and prohibiting the collection of fare from any passenger who is not furnished with a seat, is untimely, that this is not the fit occasion for its consideration.

I am free to admit, Mr. Speaker, that it would have been better that there should have been ample time for the discussion of this question; that there should have been hearings, and that all of the facts beyond disputation should have been brought to the attention of the House; but, Mr. Speaker, if that has not been done, it is not the fault of those who favor this amendment. [Applause.] We have sought opportunity time and again to engraft amendments upon the legislation that would compel, upon the part of the owners of these franchises within the District, some attention to be paid to the interests of the people of this District. Mr. Speaker, I am not able to prove to the satisfaction of this House that a 3-cent fare will be remunerative to all of the roads that are interested in this subject, but I have no doubt that every Member of this House, from the ample information that we now have, is satisfied that to one of the great street railway corporations a 3-cent fare would be remunerative and will enable them to pay fit and proper dividends upon their stock, watered as it is.

The other corporation, the Washington Electric, consists, I think, of thirteen distinct corporations. Five of the roads owned by that company, and consolidated under this new name, are remunerative roads. The other eight perhaps to-day are not, but, Mr. Speaker, remember they have cost this corporation next to nothing. They have but little real investment in those roads, which have been built largely out of bonds. The capitalization of this Washington Electric Company amounts to about $229,000 for each mile of single track. Forty-two miles of single track they own and now operate, and their lines have been built out of the bonds that they have issued, and the stock has cost the present proprietors nothing, as I am informed. So that if they do not secure the ample dividends immediately that will in five or six years raise the price of their stock from forty-five to one hundred and forty-seven, they can afford to wait. They will not be out anything.

Now, Mr. Speaker, it is within the knowledge of all the membership of this House that the people of this District are not furnished with those proper facilities for comfortable riding that it is their right to demand. It is my fortune very frequently to be compelled to take, between the hours of 4 and 6 o'clock, a car near the Library building. On all of the occasions but four or five since I came into this city nearly four months ago, when I have attempted to use that road, I have been compelled to stand. On one occasion I counted the passengers who overloaded the car that I was in. Twenty-four persons were sitting, nineteen persons were standing between the seats, twelve persons were on the rear platform, and one passenger was on the front platform. Here was a much larger number of men and women who were compelled to pay their fares who were not provided with seats than those who had seats. In my humble judgment, it is a crime, it is a robbery for these corporations to compel men and women to pay for a comfortable ride and then habitually refuse to furnish it. [Applause.]

So it is that I most heartily favor the adoption of this amendment that makes it a crime, punishable under the law, for any of their servants to demand, with threats, from a reluctant passenger compensation for that which the company habitually refuses to give to its customers. We are in their power; we can not help ourselves. They can say, "Walk, if you do not want to ride." There are some people that can not walk, that need to ride, that need these rights, that are entitled to them, and that are willing to pay for them, and I insist that they ought to be permitted to have them.

One gentleman sneeringly said, a little while ago, "Is there any provision in this bill to compel these corporations to carry passengers for nothing?" and seemed to think that the friends of the measure had been derelict because they had not incorporated such a provision. Another gentleman in my hearing sneeringly said, "Do you propose to shoot or hang the president?" Ah, no, Mr. Speaker, no one wants either to shoot or to hang; no one wants to compel them to perform a service for nothing. All that the people in this District want, all that the friends of this measure want, is to compel these corporations that have received these franchises without the payment of a cent when they come to Congress asking for other franchises, asking for still greater facilities, asking for other opportunities to build railroads out of the bonds and to issue stock for which they do not pay, at least to give those facilities which common honesty and common decency require that they should give. [Applause.]

Mr. BABCOCK. Mr. Speaker, I want to say a few words in answer to the gentleman from Iowa [Mr. HEPBURN]. It is not a question of bonds or stocks or capital. During the last year the cost of each passenger carried by the Capital Traction Company was 2½ cents; on the other line, the Washington Electric, 2.56 cents. This was the actual operating expenses; it did not include taxes, it did not include interest on bonds, it did not include dividends, and if you pass this provision for a 3-cent fare, it means confiscation. Mr. Speaker, I yield the balance of my time and ask for a vote.

Mr. HEPBURN. Will the gentleman answer me a question before he yields?

Mr. BABCOCK. Yes.

Mr. HEPBURN. Has any man, under the solemnity of an oath, made the statements that the gentleman repeated here? [Applause.]

Mr. BABCOCK. These statements made to the House are made under oath.

Mr. HEPBURN. I should like to cross-examine for half an hour the man that dares to make that statement. [Applause.]

The SPEAKER. The question is on suspending the rules and agreeing to the order.

The question was taken; and two-thirds having voted in favor thereof, the rules were suspended, and the order was agreed to.

Mr. PAYNE. Mr. Speaker, is not the bill to be read?

Mr. BABCOCK. The bill has been read in the House two or three times.

Mr. SHACKLEFORD. I ask unanimous consent that the reading be dispensed with and that the gentleman from Mississippi be allowed to make his point of order now.

The SPEAKER. The Clerk will read the amendment.

The Clerk read the amendment in the nature of a substitute, as follows:

*Be it enacted, etc.*, That the City and Suburban Railway of Washington be, and it hereby is, authorized and required to construct a double-track extension of its lines from New Jersey avenue and G street NW. eastwardly to and along Massachusetts avenue with such northerly deviation as may be necessary to bring the tracks immediately in front of and adjacent to the main entrance to the Union Station to junctions with the existing tracks at Third and D streets NE. and at the northwest corner of Stanton square; also to extend its double tracks on North Capitol street southwardly from the intersection of G street to Massachusetts avenue to connect with the tracks of the City and Suburban Railway of Washington, hereinbefore authorized.

SEC. 2. That the Washington Railway and Electric Company be, and it hereby is, authorized and required to construct a double-track extension of its line from Delaware avenue and C street NE. northeastwardly along Delaware avenue to Massachusetts avenue, there to connect with the tracks of the City and Suburban Railway of Washington, hereinbefore authorized; also a double-track loop on the Union Station plaza connecting with the four tracks provided for in section 6: *Provided*, That existing transfer arrangements between the Washington Railway and Electric Company and the Metropolitan Coach Company, a corporation of the District of Columbia, shall not be terminated except by authority of Congress; and, unless said Metropolitan Coach Company shall within one year after the passage of this act substitute motor vehicles to be approved by the Commissioners of the District of Columbia for the herdics now used by it, its right to operate its line shall cease and determine: *Provided further*, That all transfers issued by the Metropolitan Coach Company shall be properly dated and punched as to time limit, and that unless said transfers are so dated and punched the Washington Railway and Electric Company shall not be required to receive them: *And provided further*, That the aforesaid companies are hereby required within one year after the completion of the work herein authorized, to remove their respective tracks from the following streets and after their removal to repave the space now occupied by said tracks to the satisfaction of the Commissioners of the District of Columbia, namely: G street NW. from North Capitol street to New Jersey avenue; C street north from First street east to Fourth street east; First street east from C street north to D street north; D street north from First street east to Massachusetts avenue; First street west from C street north to G street north; Sixth street west from Louisiana avenue to B street north; and Louisiana avenue from Fifth street west to Sixth street west; and upon neglect or refusal of said companies to remove their respective tracks and to repave said space to the satisfaction of the said Commissioners within the time above limited said companies shall be deemed guilty of a misdemeanor and shall be subject to the penalty provided in section 710 of the Code of Laws for the District of Columbia, regarding the removal of abandoned tracks, and said Commissioners are authorized to remove said tracks and to repave the space occupied by same and charge the cost thereof to such railway company, and the same shall be collected as provided in section 5 of the act providing a permanent form of government for the District of Columbia approved June 11, 1878.

SEC. 3. That the Capital Traction Company of the District of Columbia be, and it hereby is, authorized and required to construct a double-track extension of its lines from C street and Delaware avenue NE. northeastwardly along Delaware avenue to the plaza in front of the proposed Union Station, together with a double-track loop passing in front of the station on said plaza, connecting with the four tracks provided for in section 6 and northwestwardly along Massachusetts avenue to Fourth street NW., there to connect with the existing tracks of the Washington Railway and Electric Company and thence over those tracks (under intercompany agreement) to Seventh and K streets NW., there to connect with the existing Seventh street tracks of said Capital Traction Company; also a double-track extension of its lines beginning

at Florida avenue and Seventh street NW., running eastwardly along Florida avenue to its intersection with Eighth street east, thence along Eighth street to its intersection with said company's tracks at Pennsylvania avenue SE.; also a double-track extension beginning at the intersection of Eighth and F streets NE., westwardly on said F street to Second street east, thence to connect by such route as may be approved by the Commissioners of the District of Columbia with the double-track loop hereinbefore mentioned.

SEC. 4. That the companies hereinbefore named be, and they hereby are, permitted to lay duct lines on such streets as may be necessary for the proper operation of their lines, the location of such duct lines to be approved by the Commissioners of the District of Columbia.

SEC. 5. That the construction of the aforesaid street railway lines shall be commenced within six months and completed within eighteen months from the date of the passage of this act; and in default of such commencement or completion within the time in this section specified, all rights, franchises, and privileges granted by this act shall immediately cease and determine.

SEC. 6. That where the route or routes provided for in this act coincide with each other or with the route or routes of existing street railways or street railways hereafter authorized to be operated or constructed, one set of tracks shall be used in common, upon terms mutually agreed upon, or, in case of disagreement, upon terms determined by the supreme court of the District of Columbia, which is authorized and directed to give hearing to the interested parties, and to fix the terms of the joint trackage: *Provided*, That there shall be at least two sets of double tracks immediately in front of the main entrance to the Union Station facing Massachusetts avenue, the most northerly rail being not more than 50 feet south of the said main entrance.

SEC. 7. That the railway companies affected by this act shall have over and respecting the routes herein provided for the same rights, powers, and privileges as they respectively have or hereafter may have by law over and respecting their other routes and shall be subject in respect thereto to all the other provisions of their charters and of law.

SEC. 8. That authority is hereby given the Commissioners of the District of Columbia to use such portions of reservation 77 as may, in their judgment, be necessary for sidewalks and roadways and for street railway use. And authority is hereby given the Commissioners to acquire by purchase or to condemn in accordance with existing law for street purposes so much of square 626 lying north of the north building line of square 567 extended as they may deem necessary, and the cost of acquiring said property as above shall be paid by the City and Suburban Railway of Washington: *Provided*, That where a portion of any lot is authorized to be acquired as above the said Commissioners may, in their discretion, acquire the entire lot; the portion thereof, when so acquired, lying south of the north building line of square 567 extended to become the property of the said City and Suburban Railway of Washington so soon as the entire costs of acquisition as above specified shall be paid by it.

SEC. 9. That whenever, in the construction of the new tracks herein authorized, the Commissioners of the District of Columbia deem it necessary, in order to reasonably accommodate vehicular traffic, to widen the roadway of any street or streets in which such track or tracks are to be laid, the cost and expense of such widening, including the laying of new sidewalks, the adjustment of all underground construction, and of every public appurtenance, shall be borne by the said railway company, and the said railway company shall deposit with the collector of taxes of the District of Columbia the estimated cost of changing and widening the said street or streets, the work to be done by said Commissioners; and whenever, at any future time, the said Commissioners deem it necessary to widen the roadway of any street or streets occupied by the extensions herein authorized said railway company shall bear one-half the cost of widening and improving such street or streets, to be collected in the same manner as the cost of laying or repairing pavement lying between the exterior rails of the tracks of said street railroad and for a distance of 2 feet exterior to such track or tracks is collectible under the provisions of section 5 of an act entitled "An act to provide a permanent form of government for the District of Columbia," approved June 11, 1878.

SEC. 10. That whenever in the construction of any of the tracks herein authorized it is necessary, in the opinion of the Commissioners, to improve, by paving or otherwise, the roadway of any street occupied by such track or tracks, said company shall adjust the grade of its tracks to the new grade of the street or streets, the cost thereof to be borne by said company in the same manner as the cost of paving between the exterior of the tracks of the street railroad companies, as referred to in the preceding section.

SEC. 11. That the arrangement of all tracks herein authorized within the lines of the plaza in front of the Union Railroad Station shall be in accordance with the plans approved by the Commissioners of the District of Columbia, and all work of constructing the extensions herein authorized shall be executed in accordance with plans to be approved by the Commissioners of the District of Columbia, and under a permit or permits by the said Commissioners.

SEC. 12. That on and after January 1, 1908, the provisions of the act of Congress approved February 2, 1899, entitled "An act for the prevention of smoke in the District of Columbia, and for other purposes," shall be, and are hereby, extended to apply to any and all steam locomotive engines of any description used on any steam railroad within the District of Columbia; and any officer, agent, or employee of any individual, firm, or corporation operating any steam locomotive engine or any steam railroad within the District of Columbia from the smokestack of which engine shall issue or be emitted dense or thick black or gray smoke or cinders after the date above mentioned shall be deemed and held guilty of creating a public nuisance and violating the provisions of said act.

SEC. 13. That from and after the 1st day of January, 1908, every wagon or other vehicle of whatsoever kind or description weighing, when loaded, more than 2 tons exclusive of the weight of the vehicle, used, operated, or propelled on, over, or across any of the streets, avenues, alleys, bridges, or roadways of the District of Columbia, shall have wheel tires not less than 4 inches broad. Any owner or driver or other person in control of such wagon or other vehicle so using, operating, or propelling the same who shall violate the provisions of this section, shall, on conviction thereof in the police court of the District of Columbia, be punished by a fine not exceeding $25, or by imprisonment for not more than sixty days, or both.

Mr. WILLIAMS. Mr. Speaker, I make the point of order that this is a Senate bill with a House amendment, and that section 13 is not germane to the subject-matter of the bill.

The SPEAKER. The Chair sustains the point of order.

The Clerk completed the reading of the bill, as follows:

SEC. 14. That all acts and parts of acts inconsistent herewith are hereby repealed.

SEC. 15. That Congress reserves the right to alter, amend, or repeal this act.

Mr. JAMES. Mr. Speaker, I offer the following amendment, which I send to the Clerk's desk.

The Clerk read as follows:

Add a new section as follows:

"That from and after the passage of this act the rate of fare that may be charged for the transportation of passengers over any and all street railway lines in the District of Columbia shall not exceed 3 cents, good for one continuous transportation of one passenger over the whole or any part of the line of said street railway company over which tickets are sold; and all conductors or other persons are hereby prohibited from demanding or receiving a fare or ticket from any passenger who is not provided with a seat.

"For a violation of any of the provisions of this section such company or other person violating the same shall be subject to a fine of $500 for each offense."

Mr. PERKINS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PERKINS. Can I demand a division of the amendment, so that a vote shall be taken on a portion of the amendment which provides for 3-cent fares and a separate vote on the amendment forbidding the collection of fares unless the passenger is provided with a seat? If so, I demand such a division.

Mr. BABCOCK. Mr. Speaker, I would say that under the rule it is provided that the amendment shall be offered as a whole. The order specifically stated it to be one proposition.

The SPEAKER. The gentleman from New York [Mr. PERKINS] demands a division of the question. It seems to the Chair, after examining the amendment with some care, that there are two propositions.

Mr. PERKINS. I demand a division, Mr. Speaker, that the vote be taken on the question of the 3-cent fare first, and, second, the vote on the question refusing to allow any charge where a seat is not furnished.

The SPEAKER. The Clerk will read the first proposition as the Chair has marked it.

The Clerk read as follows:

That from and after the passage of this act the rate of fare that may be charged for the transportation of passengers over any and all street-railway lines in the District of Columbia shall not exceed 3 cents, good for one continuous transportation of one passenger over the whole or any part of the line of said street railway company over which tickets are sold.

Mr. HEPBURN. Mr. Speaker, allow me to suggest to the Chair that the question is not divisible, for the reason that the penalty that is to be found at the end of the second part applies to both of these prohibitions.

The SPEAKER. The Chair will state to the gentleman from Iowa that the consistency or wisdom of either or both propositions is not with the Chair. The only question is, Are there two propositions to be separated? and the Chair finds that there are.

Mr. HEPBURN. But, Mr. Speaker, how can there be two distinct propositions divided as the Chair proposes to divide them?

The SPEAKER. The Clerk will read the first one and then read the other.

Mr. HEPBURN. But the penalty applies to the first one as well as to the other.

The SPEAKER. After all, the continuity or the wisdom of the proposition is not to be passed upon by the Chair. The only question is whether there are two propositions, so that if one is taken away there would remain a substantive proposition, and the Chair finds there are two. The Clerk has reported the first one, and the question is now on the motion to insert the proposition read.

The question was taken.

The SPEAKER. The Chair is in doubt.

Mr. JAMES. Mr. Speaker, I demand a division.

Mr. BABCOCK. Mr. Speaker, I call for the yeas and nays.

The SPEAKER. The gentleman from Wisconsin demands the yeas and nays. As many as are in favor of ordering the yeas and nays will rise and stand until counted.

Mr. BABCOCK. Mr. Speaker, I withdraw the demand for the yeas and nays.

The SPEAKER. The gentleman withdraws the demand for the yeas and nays.

The question was again taken; and on a division, there were—ayes 114, nays 103.

Mr. BABCOCK. Mr. Speaker, I now demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 141, nays 102, answered "present" 8, not voting 126, as follows:

YEAS—141.

| Davis, Minn. | Kitchin, Wm. W. | Rives | |

So the amendment was agreed to.

The Clerk announced the following additional pairs:

For the vote:

Mr. CONNER with Mr. PUJO.

Mr. HULL with Mr. TALBOTT.

Mr. BROWNLOW with Mr. SPARKMAN.

Mr. BEIDLER with Mr. WILEY of Alabama.

Mr. GARDNER of Michigan with Mr. KLINE.

Mr. BENNETT of Kentucky with Mr. MAYNARD.

Mr. WACHTER with Mr. MEYER.

Mr. SMITH of Iowa with Mr. BROUSSARD.

Until further notice:

Mr. GRONNA with Mr. HENRY of Texas.

Mr. CALDERHEAD with Mr. UNDERWOOD.

Mr. JENKINS with Mr. CLARK of Florida.

Mr. BUTLER of Pennsylvania with Mr. GARNER.

Mr. WATSON with Mr. CLAUDE KITCHIN.

Mr. BARTHOLDT with Mr. DAVIS of West Virginia.

Mr. COUSINS with Mr. GILL.

Mr. DARRAGH with Mr. GUDGER.

Mr. OLMSTED with Mr. TOWNE.

Mr. ROBERTS with Mr. RANSDELL of Louisiana.

Mr. THOMAS of Ohio with Mr. SPIGHT.

Mr. TIRRELL with Mr. SAUNDERS.

The result of the vote was announced as above reported.

[Applause on the floor and in the galleries.]

The SPEAKER. The Speaker must admonish the galleries not to applaud. The Clerk will report the remainder of the amendment.

The Clerk read as follows:

And all conductors or other persons are hereby prohibited from demanding or receiving a fare or ticket from any passenger who is not provided with a seat. For a violation of any of the provisions of this section such company or other person violating the same shall be subject to a fine of $500 for each offense.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken; and the amendment was rejected.

The SPEAKER. The question is on agreeing to the amendment in the nature of a substitute.

Mr. SIMS. Mr. Speaker, I do not think the House understands they are voting now on the whole substitute reported by the committee as amended.

Mr. JAMES. Mr. Speaker, a parliamentary inquiry. Has it not been passed on by a yea-and-nay vote?

The SPEAKER. The question is on agreeing to the amendment reported from the Committee on the District of Columbia as amended.

Mr. GOLDFOGLE. Mr. Speaker, I ask unanimous consent that the amendment be again reported.

Several MEMBERS. Oh, no.

The SPEAKER. Objection is heard.

The question was taken; and the Chair announced that the "noes" seemed to have it.

Mr. JAMES. Division, Mr. Speaker.

The House divided; and there were—ayes 141, noes 91.

So the amendment was agreed to.

The bill as amended was ordered to be read a third time, was the third time, and passed.

On motion of Mr. JAMES, a motion to reconsider the vote by which the bill was passed was laid upon the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed bill of the Senate of the following title:

S. 5951. An act to repeal section 3480 of the Revised Statutes of the United States.

The message also announced that the Senate had passed, with amendments, the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes.

GENERAL DEFICIENCY BILL.

Mr. LITTAUER. Mr. Speaker, I call up the bill H. R. 25851, the general deficiency bill, and ask unanimous consent to disagree to the amendments of the Senate and ask for a conference.

Mr. KEIFER. Mr. Speaker, there are some amendments we would like to concur in. I object, unless we will be allowed to make a motion to concur.

Mr. LITTAUER. Mr. Speaker, I move that the rules be suspended, the bill be taken from the Speaker's table, the amendments be disagreed to, a conference asked, and the Speaker be directed to appoint conferees without intervening motion.

The SPEAKER. The gentleman from New York [Mr. LITTAUER] moves that the rules be suspended and that the bill be taken from the Speaker's table, amendments be disagreed to, and that a conference be asked, and that the Chair be directed to appoint conferees without intervening motion. Is a second demanded?

A second was not demanded.

The SPEAKER announced the following conferees: Mr. LITTAUER, Mr. TAWNEY, and Mr. BRUNDIDGE.

CURRENCY BILL.

The SPEAKER laid before the House the bill H. R. 13566, with Senate amendments, which were read.

Mr. FOWLER. Mr. Speaker, I move to concur in the Senate amendments, and upon that motion I demand the previous question.

The SPEAKER. The gentleman from New Jersey moves to concur in the Senate amendments, and on that motion demands the previous question.

Mr. JAMES. Mr. Speaker——

Mr. LEWIS. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. LEWIS. Mr. Speaker, I ask for the regular order.

Mr. JAMES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. JAMES. I want to offer an amendment.

The SPEAKER. The gentleman from Kentucky has not the floor for that purpose. The gentleman from New Jersey has the floor and has moved to concur in the Senate amendments, and upon that motion demands the previous question.

Mr. JAMES. Mr. Speaker, a parliamentary inquiry.

Mr. WILLIAMS. Mr. Speaker, the gentleman from Georgia [Mr. LEWIS] desires to offer a motion which has precedence of that. He calls for the regular order. The regular order is that this bill go to the Committee on Banking and Currency.

The SPEAKER. What would send it there? How does the regular order send it there?

Mr. WILLIAMS. The gentleman makes the motion.

The SPEAKER. The gentleman has not the floor for that purpose.

Mr. WILLIAMS. I now make the motion.

The SPEAKER. And the gentleman from Mississippi has not the floor for that purpose. The gentleman from New Jersey took the floor, was recognized, moved to concur in the Senate amendments, and upon that motion demands the previous question; and until that is voted down the gentleman can not obtain the floor.

Mr. WILLIAMS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WILLIAMS. Does or does not a motion to send this bill to the committee have precedence of the motion to concur? And if it have precedence, does the fact that the motion to concur has been made cut off its precedence? In other words, can a rule of the House be violated merely by a recognition?

The SPEAKER. There is no rule of the House as the gentleman seems to think. It is perfectly plain. The gentleman from New Jersey [Mr. FOWLER], the chairman of the Committee on Banking and Currency, rose in his place and addressed the Chair, and moved that the House do concur in the Senate amendments, and upon that motion demands the previous question.

Mr. WILLIAMS. Mr. Speaker, the gentleman from Georgia [Mr. LEWIS] also rose in his place and was attempting to get recognition from the Chair.

The SPEAKER. Two gentlemen can not be recognized at the same time.

Mr. WILLIAMS. I understand that, of course.

The SPEAKER. The chairman of the Committee on Banking and Currency, under usage and custom, was entitled to recognition and can not be taken off his feet until the House takes him off.

Mr. WILLIAMS. A gentleman can not be taken off his feet except in one way, and a gentleman can always be taken off his feet in that way. Whenever any gentleman on his feet makes a motion, and another gentleman rises and makes a motion which has precedence of that motion in connection with the bill which is sent in from the Senate, a House bill with a Senate amendment, then a motion to send it to the committee charged by this House with the consideration of the subject-matter is a motion having precedence, and it being a motion having precedence, the gentleman who has made a motion not having precedence can be taken off his feet by the Member making a motion having precedence.

The SPEAKER. Now, as to the question of fact. The motion of the gentleman from New Jersey is in order, and he can not be taken off his feet by a motion to refer to a committee.

Mr. SHERMAN. No such motion was made. The gentleman from Georgia simply demanded the regular order.

Mr. WILLIAMS. This is the regular order.

Mr. SHERMAN. He made no motion.

The SPEAKER. No such motion was made.

Mr. WILLIAMS. But this is the regular order.

The SPEAKER. The gentleman from Mississippi and all gentlemen will please be in order.

Mr. JAMES. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. JAMES. I want to know if a motion to concur in a Senate amendment to a House bill with an amendment does not have precedence over a motion to concur?

The SPEAKER. It would if the gentleman from New Jersey had not demanded the previous question.

Mr. JAMES. But before he demanded the previous question I was on my feet. [Laughter.]

The SPEAKER. The gentleman might be on his feet, but parliamentarily he is not upon his feet until he is recognized by the Chair. [Laughter.]

Mr. JAMES. That may be.

The SPEAKER. The question is on ordering the previous question.

Mr. FITZGERALD. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. FITZGERALD. Should not this Senate amendment under the rule require consideration in Committee of the Whole, or else does it not have to be referred to the committee?

The SPEAKER. The Chair is not aware of anything in it that requires consideration in Committee of the Whole.

Mr. FITZGERALD. I desire to call the attention of the Speaker to the language of the bill, which provides that the Secretary of the Treasury is authorized to issue notes under certain contingencies. That involves expense or a charge upon the Treasury.

The SPEAKER. That is a matter of argument or speculation. But even if it were correct, the point of order having not been made until the gentleman makes the motion and demands the previous question, it would come too late. But it is not necessary to decide that matter. The point of order was not made; and the gentleman from New Jersey makes a motion which is in order, and upon that demands the previous question.

The question was taken on ordering the previous question; and the Speaker announced that the ayes seemed to have it.

Mr. WILLIAMS. Division, Mr. Speaker.

The House divided; and there were—ayes 175, noes 100.

Mr. LEWIS. I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 164, nays 84, answered "present" 2, not voting 127, as follows:

YEAS—164.

| Dale | Jenkins | Pujo | Welborn |
| Davey, La. | Johnson | Ransdell, La. | Young |
| Davis, Minn. | Jones, Va. | Reid | |

So the previous question was ordered.

The Clerk announced the following additional pairs:

Until further notice:

Mr. DRESSER with Mr. HENRY of Texas.

Mr. BENNETT of Kentucky with Mr. UNDERWOOD.

Mr. BEIDLER with Mr. CLAUDE KITCHIN.

Mr. BROWNLOW with Mr. SPARKMAN.

Mr. LAWRENCE with Mr. PUJO.

Mr. WACHTER with Mr. MEYER.

Mr. BROWN with Mr. BROUSSARD.

Mr. BUCKMAN with Mr. BANKHEAD.

On this vote:

Mr. DICKSON of Illinois with Mr. DAVEY of Louisiana.

The result of the vote was announced as above recorded.

Mr. JAMES. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. JAMES. I want to offer the following amendment.

The SPEAKER. This is not the amendment stage.

Mr. JAMES. I offer the following amendment, and ask that it be reported for the information of the House.

The SPEAKER. The amendment is not in order. The previous question has been ordered. The question is on concurring in the Senate amendments.

Mr. JAMES. Mr. Speaker, I appeal from the decision of the Chair that the amendment is not in order.

Mr. MANN. I make the point of order that that appeal is dilatory.

Mr. JAMES. You know more than I do about it, then. I had made it in good faith.

Mr. SHERMAN. In good faith, after the previous question is ordered!

Mr. JAMES. Mr. Speaker, I desire to say that the amendment I offer is an amendment to the Senate amendment.

Mr. DALZELL. Regular order, Mr. Speaker.

Mr. PAYNE. The gentleman has offered an amendment after the previous question has been ordered, and every Member of the House knows that the rules of the House prohibit it and that the appeal from the decision of the Chair can not be classed as anything else but dilatory.

Mr. WATSON. Mr. Speaker, I make the point of order that the amendment by the gentleman from Kentucky is not in order under the parliamentary status.

Mr. SULZER. That can not be determined until the amendment is read.

Mr. HEFLIN. Mr. Speaker, let us have the amendment read.

The SPEAKER. The gentleman from Kentucky proposes to offer an amendment after the previous question has been ordered on a motion to concur in the Senate amendments, and the point of order is made that it is not in order to offer an amendment after the previous question is ordered. Under the present conditions the Chair sustains the point of order.

Mr. JAMES. And from that decision, Mr. Speaker, I appeal.

Mr. PAYNE. I make the point of order that the appeal is dilatory.

Mr. MANN. I move to lay the appeal on the table.

Mr. JAMES. And upon that I call for the yeas and nays.

The SPEAKER. The gentleman from Kentucky asks for the yeas and nays.

The question was taken.

The SPEAKER. Thirty-six gentlemen have arisen; not a sufficient number.

Mr. JAMES. I demand the other side.

The SPEAKER. The gentleman from Kentucky demands the other side. As many as are opposed to ordering the yeas and nays will rise. [After counting.] One hundred and sixty-one gentlemen have arisen on the other side.

Mr. JAMES. Mr. Speaker, I demand tellers.

The SPEAKER. The gentleman from Kentucky demands tellers.

The question was taken.

The SPEAKER. Forty gentlemen have arisen; a sufficient number, and tellers are ordered.

The SPEAKER appointed the gentleman from Illinois [Mr. MANN] and the gentleman from Kentucky [Mr. JAMES] as tellers.

Mr. LACEY. Mr. Speaker, I make the point of order that the gentleman from Kentucky did not demand tellers on ordering the yeas and nays.

Mr. FLOOD. The regular order, Mr. Speaker.

The SPEAKER. Did the gentleman from Kentucky intend to demand tellers on ordering the yeas and nays?

Mr. JAMES. Certainly.

The SPEAKER. The Chair so understood the gentleman.

The House divided; and the tellers reported 53 ayes and 143 noes.

The SPEAKER. On this question the ayes are 53 and the noes are 143, a sufficient number, and the yeas and nays are ordered. As many as are in favor of laying the appeal from the decision of the Chair on the table will answer "aye" and those opposed "no," and the Clerk will call the roll.

The question was taken; and there were—yeas 159, nays 67, answered "present" 10, not voting 141, as follows:

YEAS—159.

So the motion to lay the appeal on the table was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. ALEXANDER with Mr. SPARKMAN.

Mr. COUDREY with Mr. BRANTLEY.

Mr. TIRRELL with Mr. ELLERBE.

Mr. EDWARDS with Mr. TAYLOR of Alabama.

Mr. MAHON with Mr. PAGE.

Mr. LE FEVRE with Mr. GOLDFOGLE.

For the vote:

Mr. DALE with Mr. MAYNARD.

Mr. CURRIER with Mr. LEGARE.

Mr. BABCOCK with Mr. SIMS.

Mr. BURKE of Pennsylvania with Mr. KLINE.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the motion to concur.

Mr. FOWLER. Mr. Speaker, just a moment. I understand that we have twenty minutes on a side.

The SPEAKER. Under Rule XXVIII, clause 3, there not having been any debate on this proposition, the previous question being ordered, there is twenty minutes' debate on a side, in the opinion of the Chair. The Chair will recognize the gentleman from New Jersey.

Mr. FOWLER. Mr. Speaker, at the last session of Congress the House passed House bill 13566, and it is now returned with certain amendments. By the act of March 14, 1900, our note issues of various kinds were all rearranged, the object being to bring our silver certificates down to practically $10 and under, although 10 per cent of the silver certificates could be issued for $20 and upward. Our gold certificates were $20 and upward. Our United States notes were to be issued in a $10 denomination and upward. The result was that in the course of three years we find that we had only practically half enough of $1, $2, and $5 bills.

The House passed a bill providing for two changes, namely, a $5 gold certificate, which also included a $10 certificate, and that the national banks could issue such a part of their notes in $5 denominations as the Secretary of the Treasury might authorize. The object was to cut up the two hundred and ninety-five millions of $5 silver certificates in ones and twos, so far as the trade of the country might require. We sent that bill to the Senate, and they have amended it in one or two respects. They have changed the $5 gold certificate to a $10 gold certificate, and they have provided that the Secretary of the Treasury may issue $1, $2, and $5 United States notes instead of cutting up the $5 silver certificates as we intended by supplying the $5 gold certificates. They also amended the bill in another respect. They exclude the exception in the act of June, 1864, which provided that customs receipts should not be placed in the banks.

That exception was made in order that we might secure gold coin in order to pay interest on the public debt. They also made another change, which provided that, with the authority or approval of the Comptroller of the Currency and the Secretary of the Treasury, we could retire by deposits of lawful money nine millions of bank notes per month instead of three millions. Another amendment was that the public money should be equitably distributed throughout the United States. Those are the only amendments which were made, and the motion was to concur in those amendments.

Now I will give the gentlemen on the other side their twenty minutes and will reserve the balance of my time.

Mr. LEWIS. Mr. Speaker, I regret that such important legislation has come up at such a late hour of the session. I do not believe the Members of this House fully understand the importance of this bill. The gentleman from New Jersey has stated the points in the bill sent over by the House to the Senate. That bill was a very innocent one. It merely provided for the cutting down of some of our larger denominations of money into smaller bills. The Senate has taken this bill and amended it and sent it back to us entirely disguised or in a new form. The original House bill provided for the cutting down of the $20 gold certificates into $5 certificates. The Senate amended the bill so as to cut them down to $10 denominations instead of $5, as provided in the House bill. The Senate then ingrafts very dangerous legislation, to my mind, on the House bill, in that it authorizes the Secretary of the Treasury to deposit all and every kind of money, including customs receipts, with national-bank depositories of the United States. In 1864, when the national-bank act went into effect, it provided that only the internal-revenue receipts could be deposited by the Secretary of the Treasury in these depositories, but this bill provides now that the customs receipts shall also be deposited in these national-bank depositories.

Now, so far as I am concerned, I have no objection to depositing this money in those depositories if we derived benefit from it by charging interest therefor. We are told that the country demands that this money go to the banks that it may bring prosperity and ease the financial stress, etc. Now, that all sounds very well, and I am willing to help the country, but through this bill we first help the national banks and afterwards the national banks help the country. Now, in Georgia we have a law by which the State money is deposited in the different State bank depositories, for which the State charges 2 per cent interest. Now, we ought to get interest on this money deposited in these national-bank depositories. I have noticed in the last ten years, and I only go back ten years, there has been an average deposit of $150,000,000 in these depositories by the Government. Let us figure the interest at 2 per cent per annum. In the last ten years at 2 per cent, and 2 per cent is a low rate, it would have amounted to $30,000,000 that this Government has given as a profit to the national banks of this country. I am putting that on the basis that the national banks only made 2 per cent. The national banks make more than 2 per cent. Now, if a national bank has a deposit with the Secretary of the Treasury of 2 per cent bonds as security to secure these deposits, then it can only make 2 per cent; but we see where the Secretary of the Treasury is now depositing other securities. I notice the statement in the morning paper, coming from the Treasury Department, in which it was stated that there were $57,000,000 of deposits secured by State, municipal, and railroad bonds. Thus the profit to the banks must be much greater. But we will go further. As I understand, the great money centers get the real benefit of these deposits, because they have the security more readily to furnish the Secretary of the Treasury. We know that savings banks, trust companies, and life insurance companies all have many securities, such as bonds, etc., suitable for securing these deposits. Therefore national banks need not own at all times bonds to secure deposits, for they can go and hire or borrow these securities from these institutions. When they do that, they do not have to put their own money in the bonds. Then they make a profit up to the amount of interest they charge for the money loaned out. In other words, I will put it this way: We will take one of these depositories, say, in the city of New York, one of the large banks of $25,000,000 capital. They want to get some of this free Government money. What would they do? They would go out to one of these trust companies, insurance companies, savings banks, or probably their customers, and borrow, or, if not, they would hire or rent, these bonds, and they can get them for a very small per cent. Then they send them on and get this money and lend it out at the present existing rate of 6 per cent. Then what profit will such

deposits net the banks? Six per cent on $150,000,000 is $9,000,000 a year. Take the New York banks, and they have been loaning money on call for the last six months at the rate of 10 and 20 per cent. Suppose we put it at 10 per cent, and what would be their profit? It would be $15,000,000 a year on this Government money put out by the Secretary of the Treasury. Now, that applies to past and present conditions. Put this Senate bill into law, and the Secretary of the Treasury would be able to loan a much larger amount to the banks, thereby giving these favored banks of depository a very largely increased profit.

Mr. HILL of Connecticut. How would the Treasury Department pay all of the debts of the Government if they deposited all the money in the banks on which they were going to draw this large amount of interest? Can the Secretary of the Treasury deposit anything but the surplus under any law?

Mr. LEWIS. I am only speaking of the surplus now. The present amount of money in the depositaries is $150,000,000, and a few days ago it was $155,000,000. I am speaking of what is in the banks now. The New York Stock Exchange is looking forward to the passage of this bill. Let me read to you what comes out in the papers every day. I will read the headnotes. Here is one:

New York Stock Exchange. Tone very weak. Depression largely due to the delay of the Aldrich bill.

Meaning the bill which is now under consideration.

That came out a few days ago. Let me read here something of a day or two ago. It is as follows:

More or less encouragement was felt in the financial community over the prospect of the passage to-morrow in Congress of the Aldrich bill.

A few days ago Wall street was troubled for fear this bill would not become a law, but on yesterday they were happy because they thought the bill would pass.

Mr. Speaker, I desire to have printed as a part of my remarks an editorial from the New York World, which I think strongly expresses the true results to come from the operation of this bill:

A GIFT TO THE BANKS.

Before the Aldrich currency bill is passed by the House of Representatives it should be amended, as ably urged by Mr. NELSON in the Senate, to provide for the payment of 2 per cent interest by national banks upon Government money deposited with them.

No Member of the House who votes for the measure without that amendment will ever be able to explain to his constituents why he does so, for there is no explanation. Senator SPOONER attempts one when he says:

"The object in depositing money in the banks is not to secure interest thereon, but to get the money in circulation among the people."

That is one object undoubtedly. But in accomplishing that object the Government need not and it should not make a free gift every year to James Stillman, George F. Baker, Valentine Snyder, and other bankers of the United States of a million dollars or so of interest money.

Now, Mr. Speaker, I would like to say more, but we have only twenty minutes for debate, and there are other Members who desire to speak. [Applause on the Democratic side.]

Mr. JAMES. Mr. Speaker, this bill properly defined is a bill to turn four hundred millions of the people's money into the Wall-street banks in New York. That is what it means. You can not deny it. It can not be disguised. You can not conceal it. That is the true situation. But it means more than that. It means not only to turn $400,000,000 into the Wall-street banks, but it means to deny to every other bank in the United States a fair opportunity to get this money deposited in those banks, that the people in the West, and in the South, and in the other parts of the United States may have the opportunity to use it. [Applause on the Democratic side.] Not only that, but you give it to these banks without a dollar of interest, and when you voted to sustain the Speaker in ruling my amendment out of order, when I appealed from his decision, you voted to turn over to the national banks four hundred millions of the people's money without a dollar of interest.

The amendment which I proposed was as follows:

The Secretary of the Treasury before depositing any public money in the national banking associations designated as depositories for same shall advertise for bids of interest under such rules and regulations as he may prescribe, and in depositing said money aforesaid in the national banking associations he shall deposit same with the national banking associations paying the greatest amount of interest for same, but in no event shall the rate of interest be less than 2 per cent. Where the rate of interest bid by more than one national banking association for any deposit of such public money is an equal rate above the 2 per cent aforesaid, the Secretary of the Treasury in such event shall distribute said public money equitably in the various national banking associations throughout the various States making such equal bids, and the rate of interest chargeable upon the public money deposited in the national banking associations under this act shall be computed from the average daily balance of such deposit: *Provided*, That the amount deposited in any national banking association, under the provisions of this act, shall not exceed 50 per cent of the capital stock of such association.

But the party in the majority upon this floor, knowing that this amendment would be presented, fearing even their own side upon a vote directly upon it, seek to conceal their true purpose behind parliamentary tactics and deny to the country the opportunity to see their votes recorded upon the amendment itself. The majority knowing I had heretofore offered it in the committee, that I had declared upon this floor on February 16 of this year that I would introduce this amendment, they resort to the previous question to hide behind it, afraid to meet an outraged people upon the direct issue, by saying the amendment was not voted on, when by their votes sustaining the Speaker they made it impossible to vote on it. On February 16 in the House I used this language:

We are told that in the Senate a bill will soon be passed that will come through here with the rapidity of a streak of lightning, providing that the customs duties shall be deposited in the national banks and the national banks shall keep that money there, perhaps $400,000,000 a year, without any interest and loan it to whom they please at from 6 to 10 per cent.

The amendment which provides for interest had been submitted to and approved by my Democratic colleagues upon the committee and to the floor leader of the minority upon this side, and had his approval as the true Democratic policy upon the question of the loaning of public money to the national banks. When I appealed from the decision of the Chair refusing me the opportunity to have this amendment considered in the House, a motion was made to lay the appeal upon the table, and in this way we have a direct vote upon the question of whether or not the national banks should use the people's money without interest or pay interest therefor. Every Member upon the floor knew when he cast his vote, if he voted to overrule the decision of the Speaker, that this amendment would be considered, and if adopted the millions of the people's money deposited in the banks would bring into the public Treasury as interest between five and ten millions of dollars yearly. The record of that vote is now history, but the country is afforded the opportunity of seeing the friends of themselves upon one side and those who believe in giving their money out to corporations without interest on the other side. [Applause on the Democratic side.]

Mr. Speaker, under this amendment the public money would be loaned out under competitive bids of interest to the highest bidder. It provides where two or more associations make equal bids of interest that then the Secretary shall distribute said money equitably to the various banking associations throughout the States making such equal bids, and it limits the amount that may be deposited in any one bank to 50 per cent of the capital stock. Who is prepared to proclaim that this is not just? When this matter was under consideration in the Senate the Senate had an opportunity to vote directly upon the question of interest, and I believe that if the House had been given such an opportunity, they would have voted by a considerable majority in favor of making the banks pay interest.

Under the provisions of this bill which you are now considering, which, when it went from the House only provided for the issuance of gold certificates in denomination less than $20, was amended in the Senate so as to strike out the words "customs dues," which is now the law, which requires all of the customs dues collected to be turned into the United States Treasury, and by this amendment turns this money into the banks in the respective ports of entry throughout the United States, and as we all know New York port collects 70 per cent of the money collected under our customs duty system, therefore 70 per cent of this money will be deposited in the New York banks. It is virtually the only system we have of getting gold, as customs dues are paid in gold. And this gold now is to be turned into the national banks without any interest at all.

Why was this scheme held back until the last hours of the Fifty-ninth Congress? And here it comes into this House at 12.30 o'clock Sunday morning to be considered, and all debate shut off, except a very limited time upon each side for the discussion of this momentous question.

The State of Missouri loans its money out to competitive bidders and by this gets 3 per cent. The State of Kentucky, which I have the honor in part to represent upon this floor, gets 2½ per cent interest upon its public money, and many other States of this Union get interest upon the public fund. If this amendment were adopted which I have offered, competitive bids would have been received by the Secretary of the Treasury from the far West, from the South, from the Northwest, and the national bankers of these sections of the country, the producing section, would have had a chance to make bids upon this money. But this opportunity is denied them and, under the provisions of this bill, three-fourths of this money will go into the Wall street banks, to be used by the gamblers upon the stock market, and the Treasury of the United States made an ally

and an aid to the bulls and bears in the market. [Applause on the Democratic side.]

Mr. WEEKS. Will the gentleman yield?

Mr. JAMES. I have not got time. Your side would not give us a chance for a fair debate, or I would have been glad to yield to any gentleman in this House. But you gentlemen knew well enough that this bill would not stand the open light of discussion, and hence you keep us down to twenty minutes' debate upon it. [Applause on the Democratic side.]

Mr. Speaker, under the provisions of this bill, which was amended in the Senate, and now up for consideration, it is provided:

That the Secretary of the Treasury shall require the associations thus designated to give *satisfactory* security by deposit of United States bonds *and otherwise* for the public money.

What does this mean? It means that the Secretary of the Treasury will have the right, under the provisions of this bill, to designate bonds of any character, whether railroad bonds, trust bonds, or bonds of whatever description, whether Southern Pacific Railroad bonds, Louisville and Nashville Railroad bonds, Illinois Central Railroad bonds, or any bonds whatever as may be satisfactory to him will be deposited as security for this money, which is to be loaned to the banks without interest; and it is further provided in this bill "that the Secretary shall on or before the 1st of January of each year make a public statement of the securities required during that year for such deposit."

Under the provisions of this bill the Secretary can affect the market value of the bonds and securities of every description. It puts the United States Government, in an official way, as a gambler upon the stock markets, because every man knows that when the secretary declares that bonds of a certain character will be received for the deposit of public money that it will have a tendency to make those bonds rise in value and therefore will aid the gamblers upon the market who are playing that side of the issue, and yet after millions of the public money have been deposited in the national banks, secured by such bonds as may be *satisfactory* to the Secretary of the Treasury, have been deposited in the national banks, we are *not* informed how the *Government is to be reimbursed* in case of a *collapse of these stocks*. It has never been held by any Secretary of the Treasury since this Government has been in existence that any bonds should be accepted for the deposit of public money except national bonds until Secretary Shaw made this ruling during his term of office. National bonds have always been accepted as security, because the Government looked upon *its bond* as being as good as gold; but now under the provisions of this bill it invites the Secretary, indeed, directs that he shall accept other bonds than national bonds, and that he shall advertise what bonds are to be acceptable. Satisfactory security to the Secretary? National bonds? No. Satisfactory security? What sort? Southern Pacific Railroad bonds.

Mr. CLAYTON. Satisfactory to whom?

Mr. JAMES. Oh, satisfactory to the bankers. Satisfactory to the money changers, not satisfactory to the people.

Mr. Speaker, only day before yesterday, by a majority of three votes, after the opposition had won upon the first vote, upon a reconsideration, which was made possible only by a majority of three, this House decided to give to the shipbuilding trust a subsidy of $4,000,000 a year for ten years. But now, to-night, you are called upon to vote to give to the national bankers' trust a subsidy of from $5,000,000 to $10,000,000 a year. [Applause on the Democratic side.] But the viciousness of this system does not end here, Mr. Speaker. Not only have you done this, but you have inaugurated this vicious system which will make it possible for the Secretary of the Treasury to get enormous campaign funds to corrupt the elections and to debauch the ballot. And how is this done? Under the provisions of my amendment bids should be advertised for the public money; the bank that bid the greatest per cent of interest could get it, but under the provisions of this bill this money is to be deposited in the national banks as the *Secretary of the Treasury may direct*. No competitive bid of interest, no interest at all, but merely to be deposited by him. After these millions of dollars have been deposited in the national banks by the Secretary of the Treasury, what will be done when election time is drawing near? The head of the Republican party will go to these national banks and to the stockholders of same and point out to them that they have had the use of millions of the *people's money without interest* through the *favoritism* of the *Republican Secretary of the Treasury* and will *modestly* suggest that the Republican party is in need of campaign money, and of course it will be forthcoming in abundance. Can the people indorse such a system as this? Is the public mind so adverse to all idea of equal chance and fair opportunity that it desires to change the doctrine that the Government should deal equitably with all her citizens, regardless of political affiliations, and that public legislation should be for the public weal and not for political campaign corruption funds? [Applause on the Democratic side.]

Let me quote to you here what Mr. Berry, the treasurer of the great State of Pennsylvania, had to say upon the question of interest, when testifying before the Committee on Banking and Currency at its hearings recently. He said:

Of course money is worth more than 2 per cent to any bank, and the demand for it makes a contention between the different bankers in the State as to who shall have it, and keeps the treasurer in constant hot water, and he has no index as to where it ought to go. If, however, we had a competitive interest rate, then the man who wanted it the most would pay the most for it and would pay it and turn the proceeds to the city, the State, or the nation, as the case might be.

So we see this brilliant financier of one of the greatest States of the Union declaring in favor of a competitive rate of interest. He states that the State of Pennsylvania gets 2 per cent interest upon its deposits; that the State of Maryland gets 2½ per cent interest on its deposits.

The purpose, Mr. Speaker, of the Democratic side in this controversy is to divorce the United States Government from Wall street. It is to give equal chance and equal opportunity to all the citizens of the United States. It is to give to the people interest upon its public funds. It is to give to the bankers of all parts of this Union an equal chance to bid for the public money and not be denied this right through the arbitrary action of the Secretary of the Treasury.

Let me quote to my Republican friends upon the other side of this Chamber the language of a distinguished Republican United States Senator, Mr. McCUMBER, who, in discussing this question when it was in the Senate, used this language:

I certainly fail to understand why the bankers receiving the benefit should not pay the 2 per cent, or whatever may be necessary. If the money is worth nothing to them, there is nothing to compel them to take the money. If they do not need it badly enough to pay the extra 2 per cent, let it go as it is. If they do not need the money, then we certainly should not give it to him. But I presume, Mr. President, that the money they have received from the Treasury of the United States has been of inestimable value to them not only in loaning it again, but in upholding an immense amount of industrial securities that are held by banks until they can get rid of them; and that, I believe, more than anything else, is the basis of the desire of these great banks of New York and other eastern cities to secure Government deposits without the payment of one cent of interest.

Who can dispute the logic and the justice of this argument? Who is willing to declare for a standard in this country of taxation so high that it will fill the Treasury to overflowing with the people's money, which is to be loaned to the banks without interest, that they may fatten upon it?

Let me quote the language of another distinguished United States Senator in discussing this bill, which is known as the "Aldrich bill." I quote from Senator NELSON:

If the banks were simply required to keep this money in their vaults and were not permitted to loan it out, or if they would loan the Government money to the people without interest, I would not say anything. But where they take this volume of Government money by the millions and loan it out and loan it out on stock collaterals at an immense profit, why, in the name of justice and fairness, should we not compel them to pay a portion of the gains to the Government of the United States?

Yet, Mr. Speaker, all these arguments have been brushed aside, and here beyond midnight on the Sabbath day this legislation is to be rushed through under the whip and spur of the previous question in less than one hour's consideration, turning over the Federal Treasury to the benign mercies of the coupon clippers and the money changers. [Applause on the Democratic side.]

The people of this country should inquire why it is that nearly every State in this Union is receiving interest upon its public money from the banks of from 2 to 3 per cent, and when these banks are paying interest to depositors of from 3 to 4 per cent, they want to know why the men who represent them upon this floor will turn over their money to the banks without any interest at all? [Applause on Democratic side.] You remember, Mr. Speaker, when the subtreasury scheme was up, you and those who thought with you denounced that as Populistic, and said that it had a tendency to anarchism; but, Mr. Speaker, it should be recalled that those struggling farmers only wanted under that system the opportunity to pledge their crops for public money, upon which they were always willing to pay interest. But now, after having denounced that system, your party turns and takes the money for which they were willing to pay interest and turns it over to the national banks without a single cent of interest, and back of this money to secure it you have no fruition of the harvest field, no gathered crop, no bursting bin, but only the inflated, watered stock as may by the Secretary of the Treasury be declared to be ac-

ceptable. In the name of the American people, Mr. Speaker, I protest against this outrage upon them. Your party, flushed with many victories, seem to have the opinion that you shall never be called to account. [Applause on the Democratic side.] I would remind you gentlemen upon the other side that a public office is a public trust; that the public money in the Treasury is a public trust, and, in my judgment, if the people of this great Republic come to understand this question, they will drive from power a party which is drunk with rapacity and public plunder. [Loud applause on the Democratic side.]

Mr. LEWIS. I ask the gentleman from New Jersey to consume some of his time.

Mr. FOWLER. You had better use all your time.

Mr. LEWIS. I prefer not to use it all at this time.

Mr. FOWLER. I yield four minutes to the gentleman from Maine.

Mr. POWERS. Mr. Speaker, notwithstanding the eloquent assertions the gentleman from Kentucky has just made on this floor, this bill is wise legislation and is demanded and indorsed by the best business interests of the country, and the persistent opposition to it by our Democratic friends will not commend itself to the country or gain for them any special credit, glory, or political advantage. The newspapers of to-day state that the prospect that this bill will pass has created confidence and strengthened the market, and so far as I have seen them, all indorse it. Assertions are not facts. The gentleman says this is to dump $400,000,000 of the people's money into Wall street for the benefit of the gamblers there, and take it away from other sections and places whenever the Secretary of the Treasury sees fit to do so. Now, let us see what the bill provides and how much of truth there is in this statement. I assert that the bill expressly prohibits such action.

Mr. JAMES. Will the gentleman allow me to ask him a question?

Mr. POWERS. I have not time to yield.

On page 6, commencing in line 23, it reads as follows:

*Provided*, That the Secretary of the Treasury shall distribute the deposits herein provided for, as far as practicable, equitably between the different States and sections.

Perhaps the gentleman from Kentucky will see in the record of his remarks that this is a sufficient answer to that contention.

Mr. JAMES. Will the gentleman state if in the Fifty-eighth Congress he did not vote that the national banks should pay interest to the Government on deposits of the public funds?

Mr. POWERS. I shall answer that in this way: That this is a bill that is dealing with the present; it has several provisions that are necessary; we must pass this as it is or get no legislation whatever. This is the one and only chance that we have to get any legislation this session along the lines the bill proposes, and the matter of interest can wait and be attended to by the next Congress.

Mr. JAMES. Well, answer the question then.

Mr. POWERS. I must absolutely decline to be interrupted. Now, it may be that it is not entirely satisfactory to me and that it could be improved if we had time to do it, but we must take this bill as it is or take none. We are not getting interest on deposits now; the bill makes no change in that regard. I think it may be proper to charge interest, since it settles the question that other securities and Government bonds may be used by the banks, but, as I have said, that question must be relegated to a future Congress. It was enhaustively discussed in the Senate and defeated by a large majority. Therefore I submit for the present to what is inevitable.

The gentleman from Kentucky says, "Why should not the United States receive interest on its money" that the State of Kentucky and the State of Missouri? The State of Kentucky, the State of Missouri, and the State of Maine deposit their money with the banks without demanding any such security from the banks receiving it as the United States would require. As far as I know none whatever is demanded. That is a very cogent reason why they should receive interest on their deposits. This bill endeavors to return to the channels of trade the money of the people instead of locking it up in the Treasury, a condition tending to create panics and which does not exist in any other civilized country, which is of vastly more importance to the country than the mere question of interest on any deposit.

It also provides for the printing and distribution of one and two dollar bills, which the business interests of the country urgently demand. It also authorizes, with the consent and approbation of the Secretary of the Treasury and the Comptroller of the Currency, an increase in the retirement of national-bank bills to the amount of $9,000,000 each month instead of the $3,000,000 limitation under existing law.

We have had before the Committee on Banking and Currency several of the leading bankers of this country, and according to the statements of all of them the one thing that is more troublesome than any other is the nonelasticity of our present currency system. It has seemed to me, though I believe my views are not fully shared or indorsed, that by permitting banks to retire a much larger sum every month we hold out the inducement to them, when money is needed, to take out or issue a larger amount of national-bank notes; and the bankers advocating credit or asset currency demand it especially for the reason that it will give greater elasticity and contract automatically when the abnormal demand has ceased.

For the purpose of effecting that a bill has been introduced substantially along the lines recommended by the bankers' committee, known as the "Fowler bill," being H. R. 23017, but I do not concede that this bill will effect any such purpose for reasons which I shall endeavor to explain, and at the same time submit my views upon the bill.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TALBOTT. Will the gentleman yield to me for a moment?

Mr. POWERS. I understand that my time has expired, and I ask unanimous consent that I may extend my remarks in the RECORD.

The SPEAKER pro tempore. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. TALBOTT. Mr. Speaker, I ask for one minute.

Mr. FOWLER. The gentleman from Georgia [Mr. LEWIS] has control of the time that is left on that side.

Mr. TALBOTT. Will the gentleman from Georgia yield to me one minute?

Mr. LEWIS. The time is already promised on this side, but I yield one minute to the gentleman.

Mr. TALBOTT. The gentleman from Maine [Mr. POWERS] has stated that one of the reasons why the Government made these deposits in the national banks without interest was because the banks in the various States which do pay interest on State deposits are not required to give security. I desire to state to the gentleman that the moneys belonging to the State of Maryland are deposited in the various national banks through the State, and the State receives 2½ per cent interest, and every bank is required to give bond.

Mr. POWERS. That may be so in Maryland, but I do not believe that is the rule as to any other State in the Union, and the requiring of a bank to give bond is a very different thing from requiring the deposit of bonds.

Mr. Speaker, I apprehend, if one sought to be considered wise in reference to financial and banking matters and to escape all criticism, it might be much better and easier to subscribe to the views of the bankers' committee in reference to the issuing of credit currency, and I concede that their large experience gives them a weight that should command consideration. Nevertheless, I shall have the temerity to doubt and differ from some of their conclusions.

I listened very attentively to the eminent bankers who appeared before the Committee on Banking and Currency, and I have also carefully read the plan or method proposed by the fifteen representatives, from all sections of our country, of the great finanical institutions in different monetary centers. I must confess that I am not convinced of its desirability or wisdom or that it will accomplish what is so confidently claimed for it, especially by giving to the country a credit currency which shall be sufficiently elastic to retire from circulation as soon as the emergency or conditions that called it into existence have passed.

By general consent of all who have studied the question and have carefully looked into and considered it, it is conceded that one of the most glaring defects in our present banking laws is the want of currency elasticity, so that the amount in circulation may accommodate itself to the business demands of the country at different times, as is the case in Canada, and, I believe, in some other countries.

This condition, I am confident, could be relieved to some extent by either repealing the $3,000,000 limitation which banks may now retire in one month or increasing it so as to permit them to retire at least twelve or fifteen million dollars per month. I doubt very much if this limitation was ever necessary or has been productive of any good. The last thing that banks desire is a panic and the consequent loss flowing therefrom. Hence I do not believe that they would do anything which should create an alarming stringency through the sudden retiring of their currency if they had the power to do it. But

admitting that there was a sufficient reason for the enactment, I submit that the reason no longer exists, and that we should either repeal or modify it.

We have been adding year by year to the volume of our various kinds of currency as the national wealth and business have increased. We have increased the circulation of national-bank notes so much during the past forty years that the right of the banks to retire a very much larger sum would only be extending the proportion which was granted them when the banking laws were passed, and this change should commend itself to the Congress and be enacted into law. I have hoped that a bill might be presented for that purpose solely and not connected with anything else, so that it would be debated and considered on its merits and voted upon.

It is my deliberate judgment that a credit currency as proposed by the bankers' committee, with a 2½ per cent tax on circulation to create a safety fund, or with a 3 per cent tax as in the bill now before the House, said currency to be issued as therein provided and to be possessed of so many of the attributes of money, will be readily received by all the people of the country with the same confidence as national-bank notes or any of the other denominations of currency now in circulation. And I have no question that it will be as safe and as good as our other varieties of money which we have in circulation, and I am sure that no one can or will lose anything by receiving it as money; that it will circulate among and lodge in the pockets of the people and in all the moneyed institutions, and that it will substantially accomplish all the requirements and purposes of money.

It is not upon any doubt as to its validity or its soundness that I place my objection to it, but I do contend that these very qualifications will prevent any immediate return to the banks issuing it through the several redemption agencies which it is proposed to provide for that purpose. In short, I fear and believe that the result of this credit-currency legislation will be the addition of another variety of money to our already multiplex currency, and also that it will largely inflate the circulation of the country, thereby further reducing and cheapening its purchasing power, intensifying the era of extravagance and speculation through which we are now passing.

Now, I for one am unalterably opposed to any inflation legislation. There are still ample means by which our currency can be properly increased under existing laws. To my mind, an inflation of $200,000,000 of our currency is uncalled for, and will sooner or later prove injurious to every legitimate industry. It may benefit for the present the speculator and promoter. Certainly none other. If I do not misrecall, the Secretary of the Treasury says in his report that such an expansion would indicate or produce no peril to the stability of the currency, but it does seem to me that we are making our various paper credits pretty large, considering the amount of gold that we have at the base; yet I do not apprehend that we will have any serious trouble so long as the balance of trade is in our favor and the outflow of gold does not exceed the amount that we can produce from our mines, and confidence continues unimpaired. Therefore I am inclined to concur in the views of the Secretary, and am not fearful of any resulting panic.

By the coinage of gold and silver, the organization of additional national banks, and the issuing of national-bank notes we added to the circulating medium of the country in the past fiscal year over $148,000,000. The mines are still producing an increased amount of gold, banks are being organized everywhere, and I have no doubt that in this manner we shall increase it fully as much during the present year.

Many banks now organized—in fact, most of them—can issue more currency if they choose to do so. We have in this country to-day almost $34 per capita, more than ever before, I am confident, and more than any other country in the world, except France. There are still bonds available for banking purposes and there is no immediate danger of the supply being exhausted. Many banks have bonds which they use as security for deposits placed with them from time to time by the Secretary of the Treasury. As they use them in this manner and for this purpose rather than for increasing their issues of national-bank notes, it is fair to assume that it is more profitable to do so. The opportunity for this use of Government bonds, and perhaps I should say the necessity results from the vicious and inadequate laws which lock the people's money in the Treasury instead of permitting it to be immediately returned to the channels of commerce and trade—a peculiar condition that Congress should relieve and do away with. I doubt if anything similar to it exists in any other civilized country.

The Government has been, and doubtless will from time to time, be placing upon the market Panama Canal bonds. These are all available for banking purposes, and I think it may be assumed that a very large amount of them will be issued before we shall complete what I regard as the most difficult undertaking of modern times. I therefore submit that we have not reached the limit to which our currency can expand under the present banking laws, and that there is no such urgent and imperative demand for this credit currency legislation as some of its sponsors and advocates would have us believe. The amount authorized in the bill is not so large, if we should stop there, and it had an element of elasticity as to be seriously objected to, if it were advisable to issue it at all.

The restrictions, conditions, and limitations provided furnish, I think, ample safeguards to protect the holder, but I do respectfully dissent from the proposition that in enacting this legislation we are following a precedent of any of the countries to which its advocates refer, which furnishes to us, as they claim, a safe and reliable guide to go by, and I have a fear—I had almost said a conviction—that we are embarking on an unknown and, to a great extent, unexplored financial sea, with no reliable chart to guide us, and that inflation and not elasticity will be the inevitable and unavoidable result which must come from this undertaking. That there is great danger that when we have once opened the door and authorized this limited issue of credit currency we may soon be induced or compelled to enlarge the amount, as the same financial distress or scarcity of money that called for this issue may recur with each succeeding year; hence this experiment, in the end, by its inflation will be found very potent to nurse and aid speculation than to supply yearly a natural want to move the crops. And I submit that a careful analysis of all the evidence given by its advocates furnishes no good ground for relief, no satisfactory and convincing one to my mind, at least, showing that when the emergency was passed this currency would readily return, through the redemption channels or otherwise, to the issuing banks.

There can be no question that it would largely remain among the people and in the various banking institutions of the country. This was the view of the Secretary of the Treasury, as I recall it, in his statement before the committee. My recollection is that he thought 15 per cent might come back. There is no sufficient compelling cause to send it home. A distrust of its soundness or value in the minds of its holders would assuredly hasten it back, but, as I have tried to show, there can be nothing of this kind, as it is abundantly safeguarded.

Also, a tax so high as to make it unprofitable to issuing banks, except upon extraordinary occasions, might, and I concede would, be very effective.

If we look over the money market and the rates of interest for the past twelve months, there has been no time that the 3 per cent tax on circulation which the bill provides for would have made it unprofitable to the issuing banks. Perhaps the additional amount authorized to be issued under certain circumstances and contingencies at a 5 per cent tax might and probably would be called in. We all know that there were very low rates of interest in this country for a number of years, but that within the past one or two years, owing to our great undertakings and the rise in prices and in wages, there has been an increase in the rates of interest not only in this country, but in Europe. The Bank of England several months ago raised its rate to 6 per cent. Our unprecedented prosperity, in which most of the civilized world has shared to a considerable extent, has created an abnormal demand for money and has enabled the borrowers to pay higher rates of interest. This has resulted as a necessary consequence of our rapid and extensive industrial development and the financiering of new undertakings.

Perhaps we are suffering a little, as some claim, from too much prosperity, especially as regards the high rate of interest. Yet I contend that on the whole legitimate business of the country has not been crippled and I can see no dire calamity threatening it to-day. The chariot wheels of industry, progress, and legitimate enterprise have moved on continuously and rapidly. There has been no very marked change, so far as I know, in the rates of interest during the different months of the past year paid on good time business paper. Perhaps it may have been 1 to 2 per cent higher at some one time than at others. The farmer, the lumberman, and the manufacturer have not been very much cramped or injured for want of the necessary funds to do business with.

The great fluctuations in the price of call money have not seriously affected their loans or their business. It is the promoter and speculator, the gambler in stocks, that at times have paid very high call-money rates during the past year. They have to have it on the hour. I have been informed, and I think correctly, that there is a rule of the New York Stock Exchange which makes it imperative that all cash sales or purchases of stock must be settled every afternoon of the transaction ex-

cept upon Saturday. This obligation and peremptory requirement to settle and pay on so short a time often create great fluctuations in the rate of interest on call money from day to day, but I am not sure we need to give ourselves uneasiness or lay awake nights brooding over the hardships of these gentlemen who are striving to get rich quick by gambling in stocks. They are amply able to care for themselves; and if some one of them does occasionally get "pinched," it may be a debatable question if any honest man is hurt. It is the "lambs" they are shearing without compunction or mercy that need our protection and sympathy.

I can not agree with the oft-repeated statement that has been made before the committee, that the methods adopted for issuing currency in England, France, Germany, or Canada, so far as I have been able to learn anything about them, furnish any precedent or substantial guide for what we are proposing to do in this bill. Our systems of banking are *sui generis*. Wholly unlike those of the countries before named. There are, in round numbers, some 6,000 national banks, and I believe nearly 8,000 more chartered by the several States. They are located not only in large centers, but in nearly every small town and village. They are not interdependent; they are doing business on individual responsibility.

In Germany, France, and England there is one great central or imperial bank for each country, having various branches in different localities and all controlled and guided under one management, or this is substantially so. I have neither the time nor the requisite knowledge to explain the conditions and limitations under which currency is issued in those countries. I have never sufficiently investigated their banking systems to do this. I know, however, that they are very unlike our own in many essential particulars.

Canada is referred to in the committee's report and was also pointed out at the hearings as a guide and example for what this bill proposes to do. I deny that in its essentials there is any similarity between the proposed credit-currency scheme and the methods of issuing bank bills in Canada. The currency provided for in this bill can be issued by 6,000 banks scattered all over the Republic. There are only thirty-four banks in Canada. I do not know how many of that number can or do issue currency. I am informed, and I think correctly, that no bank in Canada has this right unless it has a paid-up capital of at least $500,000. It can do no business until at least $250,000 of its capital has been paid in. In Canada banks pay out over their counters their own bills only. The credit currency which this bill authorizes can be paid out to customers or kept in the vaults by every national, savings, and State bank in the United States. They need not send it to the issuing or the redemption bank unless they choose to do so. When a bank in Canada receives the bills of any other bank it must send them to the bank which issued them. It is very plain that this limitation would make the currency contract automatically when there is no special demand for it, after it has been returned to the bank of issue.

A similar clause in this bill would necessarily contract it very rapidly; yet I doubt very much if any of our national banks would avail themselves of the right or privilege of having this limitation upon its circulation, and the same, I think, might be true in case the tax was made much larger than this present bill provides. Banks are not philanthropic institutions. They are in business to make something for their stockholders.

It is claimed that the provision in this bill authorizing this currency is especially in the interests of the "dear" people. To my mind it is a pretty good thing for the banks. Hence it allows banks to surrender part of their present issues and reap the benefit of it under certain conditions. I grant that many bankers have declared that its passage is both necessary and wise. Yet I have not received any letters or petitions from anyone engaged in the various industries asking me to vote for it. I have found many who believe that the bill should not pass. The press of the country is not calling for it very loudly, so far as I am able to judge.

A question has presented itself to my mind as to the fund that will be raised from this 3 per cent tax, which I am not clear or sure that I am right about, and perhaps some one can explain it to me. There can be no doubt that the 3 per cent tax will in the not far distant future produce a much larger amount than will be required for the necessary expenses and the very small sum that may be lost or paid out and not ultimately recovered back on account of failing banks.

A careful examination of the cost and losses by national banks in the past will convince anyone of this proposition. Now, what I desire to know is this: Will not that fund belong to the banks collectively in the proportion of the amount each has paid into it, and will or will not any bank winding up its affairs be entitled to have its equitable proportion refunded after all costs and liabilities up to that date have been adjusted and settled? If this is so, what bearing, if any, does it have upon the burdens which a higher tax than 3 per cent, or any tax, will in the last analysis place upon the issuing bank? The Treasury of the United States holds this money in trust. It can apply a certain amount of it, whatever may be necessary, to expenses and losses of failing banks. When that trust has been accomplished there is no provision whatever to turn the balance into the Treasury.

I have said that our national banking system is peculiar. I think that in its inception and in its methods of doing business it is unlike that of any other country. Our national-bank notes are not secured by coin reserves, but by the debt of the United States. They rest upon the debt of the Government. At the time of its passage the framers of the national banking act had in view two distinct purposes at least. One was to provide the country with a safe, sound, and reliable currency which should be good and circulate freely everywhere; the other to create a demand for the then large Government indebtedness, or at least for a part of it, with which the country found itself burdened and struggling at the close of the war of 1861.

As to the latter purpose, time has proved that its authors "builded better than they knew." It has been a very potent factor in enabling the Government to refund all its obligations at constantly decreasing rates of interest and has created such a demand for Government bonds for banking purposes that its 2 percents command a premium. No other nation borrows money at so low a rate as ours, and certainly we could not if it were not for the use of the bonds for banking and the necessity of having them in order to do the banking business.

It has also provided us, as was intended, a safe and sound currency, circulating everywhere in our country, and in many foreign lands, without discount or distrust. No laborer ever lost a dime by taking it for his wage—in fact, no one cares whether a bank issuing a bill is located in Maine or Texas, whether it is solvent or has gone into the hands of a receiver. The United States stands behind it and is virtually pledged to redeem it, and it certainly has and will continue to do it.

It is common knowledge that our national banking system in the past has been most bitterly attacked and denounced by political organizations, yet it has stood the test of over forty years and to-day, I submit, the people are satisfied with it and believe in it.

Next to its transportation facilities, the currency and banking of a country are essential elements for its prosperity and development. A want of sufficient elasticity, so that it may expand and contract with the demands of business, seems to be the gravest charge now brought against our banking system, and I concede that there is much force and truth in this charge. This should, and I think can be, remedied in part at least by proper legislation. Doubtless it may have other faults and weak points, but we should not lose sight of the fact that it has in the past accomplished much of good and has fully justified its right to be and the wisdom of those creating it.

Possibly in time it may outlive its usefulness, and it may become necessary to substitute some other method of banking in its place, yet I doubt very much if we shall improve or strengthen it by any such experimental patchwork as the credit currency proposition in this bill. I am of those who believe that it is better, at least for the present, "to bear the ills we now have rather than fly to others that we know not of," and I am quite confident that the country and the people share largely in this view.

As I have stated, I fear that the measure will be productive of more harm than good. I doubt its wisdom and am not fully convinced of its imperative necessity or that it would produce the beneficial results its sponsors claim for it. We have many kinds of currency—gold, silver, copper, greenbacks, national-bank notes, silver certificates, and gold certificates. I object to increasing the list by adding the proposed credit currency notes until the country has more carefully considered and weighed the proposition and fully understood its possible consequences. Does it lead us along the road of sound or populistic finance? I am not entirely clear upon this point.

What I contend Congress can and should do, and do it speedily, is to repeal or increase the $3,000,000 limitation to which I have referred, and should also provide some safe and secure methods by which money collected from the people by the Government, except so much as is needed for its present purposes, shall be immediately available, to be used in the trade and commerce of the country. Let us have less artificial in-

terference with monetary conditions, cease locking up in the Treasury of the United States the people's money, thereby creating a stringency and compelling the Secretary of the Treasury to do something unusual to avoid disaster or panic. After we have done this, which we can readily do, let Wall Street refrain from financing more than one new deal each day, especially of the Harriman dimensions, and I prophesy we will get on very well without this asset or credit currency, that business interests will be cared for, and, to use the words of Mr. Mattilini, we shall not go to the "demnition bow-wows," but, on the contrary, under the present good, efficient, and Republican Administration and the beneficial schedules of the much-maligned Dingley tariff, enterprise, peace, and happiness will still continue to rule and bless our land.

Mr. PRINCE. Mr. Speaker, this is the best measure we can hope to have before us in the closing days of this Congress. It may not be all that we would like to have such a measure contain, but nevertheless this is the best bill that is presented to us with any hope of passing at this time. I wish we could make the banks pay interest on the deposits. The purpose of this bill is to issue gold certificates in denominations of not less than $10. It also permits the depositing of customs receipts in the banks known as "depositories." It is said by some of the gentlemen on the floor that this will permit the placing in banks of $400,000,000 that are not now placed in the banks of our country. The truth about it is that this has been done by indirection, and we are now seeking to do it directly. It is not enlarging the volume of money in this country, but it is permitting customs receipts to be placed in the banks and to check upon those deposits if they see fit. It is done now. All the statements to the effect that it is swelling the coffers of Wall street is not in accordance with the facts.

As to another provision, about raising the limit of retirement from $3,000,000 to $9,000,000 a month, if it was not for the limiting clause in this bill, saying that it should be done only with the consent of the Comptroller of the Currency and the approval of the Secretary of the Treasury, I should not favor the provision, and I will state the reason why. On page 199 of the hearing before the Committeee on Banking and Currency, the present great Secretary of the Treasury, Mr. Shaw, stated as follows:

Mr. WEEMS. Mr. Secretary, I would like to ask you if it would not be necessary in that case to repeal the prohibition against retiring?

Secretary SHAW. No; that prohibition is quite generally misunderstood. That limitation is not against the redemption of notes, but against their retirement by a deposit of money. For instance, I can send in as many of the First National Bank notes as I please, every dollar of its issue, for that matter.

Mr. WEEMS. That is the retirement as distinguished from a redemption?

Secretary SHAW. Yes; and I want to speak on that subject a moment. That provision, I think, should be amended so as to allow, with the consent of the Secretary of the Treasury, an unlimited retirement. I do not think the bridle should be taken off entirely, and I will tell you why. When I was selling the Panama bonds this year and was trying to stimulate the price, some banks started in to reduce the price so that the Government bonds would sell lower; and they started to retire their circulation and put their bonds on the market to pound the price down, while I was making deposits to crowd the price up, and we had a very nice chase.

They had a limit of three millions a month, and I had no limit, and I got away with them, and I ran the price up over 1 per cent. [Laughter.] But they would have whipped me and bought those bonds probably below one-dollar-two instead of one-dollar-four, without that limitation.

Mr. JAMES. Mr. Speaker, I desire unanimous consent to extend my remarks in the RECORD.

There was no objection.

Mr. LEWIS. I yield the balance of my time to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, the gentleman from Maine was singularly unfortunate in his statement of facts. The gentleman from Maryland stated to the House the case in his State, and I am informed that is the case in Georgia. Each State requires security as well as interest. I hold in my hands the hearings before the Committee on Banking and Currency, and I find that it is the case in Pennsylvania, too.

I find that Pennsylvania requires security; that she lends the money at 2 per cent, and Mr. Berry, who was before the committee—the treasurer, I believe, of that State—says that such is the demand on the part of the banks for money after giving security and upon condition of paying 2 per cent that, to use his language, "It keeps the treasurer in constant hot water, and he has no index as to where it ought to go—none whatever under that system." He continues:

If, however, we had a competitive interest rate, then the man who wanted it the most would pay the most for it, and the man who took it would return the proceeds to the city or the State or the nation, as the case might be.

I could go entirely through the Union and find that the gentleman from Maine simply didn't know what he was talking about. Now, Mr. Speaker, banks do not lend money without demanding of the borrower both security and interest. The banks ought not to expect to borrow money from the people—and it is the people, because the Government's money is the people's money—without paying interest and without giving security. This whole thing, Mr. Speaker, the evil upon which you have arrived and the bad remedy that you are resorting to to cure it, are alike the results of your pernicious system of class legislation.

The best way to keep money in circulation among the people is not to tax it out of circulation into the Treasury. [Applause.] But when you have taxed it out of circulation into the Treasury, then, of course, it is a bad thing to keep it in the Treasury if you can get it back into circulation. Now, then, you are forced to put out this surplus somewhere; you call it a deposit, but you are forced to put the money out at work. Everything in this world that produces value is at work, and money is no exception to the general rule. And as money works and is an employee—and is a valuable employee at that—the universal custom of humanity is that you should pay something for it as its wage, besides securing the return of the money itself. There is no more reason why the Federal Government should lend its money to a pet class of bankers without demanding a dollar of compensation for the use of it and without security for its return than there is why the bank should lend me its money without demanding interest and security from me.

Mr. Speaker, this is a significant occasion. We all remember when the Hill bill was before this House; we remember when the majority of this House incorporated upon that bill a provision whereby it became necessary to put out the deposits to competitive interest bids to the banks. We remember very well that after that provision got upon that bill that bill died "aborning." They never dared carry the bill any further, they never dared face the country with the question of interest on deposits. And now you wait until just two nights before the close of this Congress and you bring into this House an entire currency bill grafted by the Senate upon a little innocent House bill—to do what? To take the people's money and give it to the banks without a dollar of interest. [Applause.] Hide behind what pretexts you please, that is what you are doing.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. FOWLER. Mr. Speaker, I want to say that the effect of this bill is only to give to the country a larger supply of one, two, and five dollar notes. There will be no other practical result whatever, and if the committee will bear with me, I would like to give my views of the present situation.

Let the merchants and bankers of the country answer these questions:

First. If our revenues be great enough to pay off our debt in the course of a few years, what shall we do for currency? What will become of the $600,000,000 of bank notes secured by Government bonds? Let them remember that our debt was reduced, from 1888 to 1891, $440,663,020.

Second. If, by any chance, we should be compelled to issue one or two thousand millions of bonds under stress of war, what would be the rate of interest? Not less than 3 per cent—probably under present demands for capital not less than 4 per cent. With an issue of, say, $2,000,000,000 at 4 per cent, what would be the selling price of the 2 per cent bonds? Would it exceed seventy? At this price the banks of the country would lose in their present bond investments about $200,000,000.

These possibilities alone ought to be sufficient to startle every thinking man and to condemn the present scheme of supplying currency for the country—a scheme in no way related to business demands, but distinctly a bond speculation.

But it is constantly asserted that we have the soundest currency in the world; and that it has been as good as the best for more than forty years. As a matter of fact, it has been no better than the price of our national credit. In 1862, when the banks in New Orleans were still redeeming their notes in gold coin, our bank currency was being redeemed in United States notes worth 75 cents on the dollar. And in 1864 our bank currency was being redeemed in United States notes, which were selling at $2.85, or 35 cents in gold. And they were never worth their face until we resumed specie payments January 1, 1879.

The credit of a nation, of a municipality, or of a corporation should never be the basis of currency; its only proper relation is that to the consumable wealth of a country, and its standard of value should be gold, or the metal of redemption.

The history of the bank of France and its signal aid to the

French Government in every crisis for one hundred years justifies the conclusion that the currency of a country should always rest upon its liquid wealth, as represented by the credits of commerce.

The average daily clearings last year for New York City were $342,422,000. The total clearings for New York City in 1906 were $103,754,000,000, and were settled by the payment in cash of 3.69 per cent, or $3,832,000,000.

The aggregate clearings of the United States for the year ending September 30, 1906, were $157,749,000,000 and were settled by paying approximately $5,793,000,000 in cash. Yet in the form of current credits, instead of paying only 3.69 per cent in gold or its equivalent, the percentage of lawful or reserve money in the hands of the people, with which they transact their daily business, is $1,206,531,814—the remaining money in their hands, consisting of bank notes, approximated $500,000,000. In other words about 60 per cent of current transactions are paid in reserve money, gold or its equivalent, instead of some form of credit; and $1,206,531,184 of gold or its equivalent is lodged in the pockets and tills of the people, and there locked up as effectually as though it were still in the bowels of the mountains.

If this vast reserve were in the banks, where it should be, it would serve as the basis of a credit of $6,000,000,000, with a reserve of 20 per cent. If we are going on, increasing in population and withdrawing reserves from the channels of trade for the daily transaction of current business, what effect will the practice have upon our present reserves or those we might hope to accumulate from the current production of gold?

Let no man suppose that the change of the law in respect to the $3,000,000 limit per month will have the slightest effect upon present currency conditions. It will not result in any perceptible change in our currency as related to business, but will of course facilitate the speculation in Government bonds to some extent. I challenge any man to give a single reason for supposing that the privilege of retiring $9,000,000 per month will result in any greater changes than we have heretofore had so far as our business requirements are concerned.

NATIONAL BANK-NOTE CIRCULATION, 1890–1906.

*Total national-bank notes outstanding at the end of August and December, in the years named and at the end of the following April.*

| Year. | August. | December. | April. |
|---|---|---|---|
| 1890 | $184,391,633 | $178,568,376 | $171,805,064 |
| 1891 | 168,543,059 | 172,993,607 | 172,529,451 |
| 1892 | 172,527,713 | 173,614,871 | 176,094,544 |
| 1893 | 183,755,148 | 208,948,105 | 207,875,695 |
| 1894 | 207,539,066 | 206,686,337 | 207,541,211 |
| 1895 | 211,372,045 | 213,960,598 | 221,316,027 |
| 1896 | 226,030,042 | 235,398,890 | 233,795,141 |
| 1897 | 230,844,256 | 229,634,216 | 224,481,878 |
| 1898 | 226,780,064 | 242,784,803 | 243,134,892 |
| 1899 | 241,623,553 | 243,842,067 | 271,034,337 |
| 1900 | 320,095,890 | 332,292,300 | 350,101,405 |
| 1901 | 356,152,903 | 359,720,711 | 357,476,407 |
| 1902 | 358,984,183 | 384,854,514 | 382,519,258 |
| 1903 | 417,346,487 | 421,106,979 | 434,909,942 |
| 1904 | 450,206,888 | 460,679,075 | 475,948,944 |
| 1905 | 503,971,395 | 540,914,347 | 556,646,282 |
| 1906 | 569,852,303 | | |

Mark this, that from 1890 to 1906, a period of sixteen years, there was an actual decrease of our bank-note currency from August to December in three of those years when it should have largely increased, while in seven of those years the increase was only about $3,000,000 each year. As a matter of fact, during these months the expansion of current credits ought to have been more than $250,000,000 in every year.

During nine of those sixteen years there was an actual increase of currency from December to April, when it should have decreased; and for seven years there was a decrease during the same months of only $2,700,000 per year.

Mark this, from 1864, when the first national-bank notes were issued, there was a gradual increase up to 1882, when the amount reached $357,000,000. Then, out of the plenitude of ignorance and mad prejudice, this uneconomic limitation of $3,000,000 each month was imposed.

From that very year, although the business of the country was constantly expanding, the national-bank notes began to contract, and, from 1882 to 1891, the $352,000,000 fell to $123,000,000.

Keeping these facts in mind, are we not at least put upon inquiry when we recall that in little Canada, to the north of us, with a population of only 5,800,000, they have an expansion and contraction of about $20,000,000 in the fall, or more than $3 per capita; while in Germany the expansion and contraction of bank notes or current credits is about $120,000,000 every three months.

If the principle of a true credit currency, such as is in operation in Scotland, Ireland, France, Germany, Austria, Japan, and Canada, were in force here, the expansion and contraction of current credits would annually exceed $250,000,000; and we would have no currency famines nor useless quantities of currency, at times suggesting if not leading to riotous and ruinous speculations, and constantly disturbing the natural and orderly course of business.

Again, let us not suppose that, so far as the business interests of the country are concerned, it is a matter of any consequence whatever that we have removed the words "except receipts from customs" from the statutes, except in this respect—that the Government can save the cost of transporting customs receipts from the point where received to a subtreasury, and the necessary cost of transporting internal-revenue receipts to such places or ports as pay a large amount of customs to the Government, in order that an equal amount to such customs may be returned to the channels of trade by the deposit of the internal revenues transferred for that purpose.

The internal-revenue receipts last year were $249,150,212.91, while the amount to-day deposited in the national banks is only $140,727,976.54, showing that the internal-revenue receipts largely exceed the bank deposits.

In support of the assertion that, commercially speaking, this change in the law will have little or no effect, I desire to call the attention of the House and the country to the fact that on May 9, 1906, the cash in the Treasury was $139,622,790.94, and that the liabilities outstanding against this amount were $102,492,007.36, leaving a working balance of only $37,130,783.58, or $13,000,000 *less* than the assumed working balance of $50,000,000.

As the law stands to-day, the Secretary of the Treasury could pay all the current expenses out of the customs receipts, and reserve the internal revenues, of which there have already been this year received $174,194,924.86, to deposit with the banks.

The matter resolves itself down to the mental attitude of the Secretary of the Treasury with regard to the current deposits of Government receipts. With the amendment, he may or may not from day to day redeposit all the customs receipts the Government may receive in the banks at the points where they are paid in, down to the assumed working balance of $50,000,000, and thereby save the cost of transporting internal revenues of the same amount to the points at which the customs are received. We have simply lopped off a branch long since dead.

Mr. Speaker, these questions suggested by this bill will never be settled until they are settled upon sound, economic principles—principles as certain in their operation as the laws of gravitation. Nor will any handicap be so heavy in our competition with the commercial world as the burden of bungling patchwork that precludes us from being what we ought already to have become—the leading, the controlling financial center of the world.

As it is, our methods in finance and currency only excite the derision of the financial centers of Europe; for they realize that if we but had the intelligence, courage, and patriotism to solve this one problem the world would take its financial cue from the United States every hour of the day the whole year round.

Think of these stupendous facts: The coal production of the United Kingdom, Germany, and France amounts to 422,671,000 gross tons, while that of the United States is 350,820,840 gross tons. Their production of pig iron is 23,319,000 gross tons, while ours is 22,992,380 gross tons. Their exports amount to $3,908,489,100, while ours are $1,717,953,382. Their railway mileage at the end of 1905 amounted to 80,984 miles, while ours amounted to 217,018 miles. Their gross receipts from operation of railways was $1,317,851,000, while ours was $2,082,482,406.

BANKING POWER OF THE WORLD.

Remember this, that while the banking power of the United States is $16,000,000,000 and that of all the rest of the world is but $21,000,000,000, we have a little over $500,000,000 of what we call bank notes, and the rest of the world has more than $4,000,000,000 of credit notes with which to carry on trade.

The banking power of the United States in 1906, as represented by capital, surplus, other profits, deposits, and circulation of national and other reporting banks, together with estimated amount of funds of this character in nonreporting banks, is shown to be $16,462,470,465. The items composing this fund are stated in the accompanying table:

| Classification. | Number. | Capital. | Surplus, etc. |
|---|---|---|---|
| National banks | 6,053 | $826,129,785 | $665,163,368 |
| State, etc., banks | 11,852 | 739,163,401 | 893,679,524 |
| Nonreporting banks [a] | 3,491 | 75,356,000 | 33,280,000 |
| Total | 21,396 | 1,640,649,186 | 1,592,122,892 |

| Classification. | Deposits. | Circulation. | Total. |
|---|---|---|---|
| National banks | [b] $4,145,783,632 | $510,860,726 | $6,147,937,511 |
| State, etc., banks | 8,159,894,029 | ..... | 9,792,776,954 |
| Nonreporting banks [a] | 413,160,000 | ..... | 521,795,000 |
| Total | 12,718,837,661 | 510,860,726 | 16,462,470,465 |

[a] Estimated capital, etc., based on reports received from private banks.
[b] Includes Government deposits.

From the latest and most reliable data obtainable the banking power of the foreign countries is estimated at $21,952,500,000, the details being set forth in the following table:

| Banks. | Capital. | Surplus. | Deposits. | Circulation. | Total. |
|---|---|---|---|---|---|
| | *Millions.* | *Millions.* | *Millions.* | *Millions.* | *Millions.* |
| Principal European and other foreign banks | $1,364.7 | [a] $587.4 | $7,642.7 | $4,111.8 | $13,706.6 |
| Foreign savings banks | ..... | ..... | 8,245.9 | ..... | 8,245.9 |
| Total | 1,364.7 | 587.4 | 15,888.6 | 4,111.8 | 21,952.5 |

[a] Estimated.

Mulhall estimated the world's banking power in 1890 at $15,985,000,000, the United States being credited with about one-third of that amount. Since that year the banking power of the United States has increased to the extent of $11,312,400,000, or over 219 per cent; that of the foreign countries, $11,117,500,000, or 102.6 per cent; and the combined banking power, $22,429,900,000, or 140.3 per cent.

The statement following, relating to the banking power of the world in 1890 and 1906, shows also the amounts and percentages of increase in 1906 over 1890:

| Classification. | 1890. | 1906. | Increase. | |
|---|---|---|---|---|
| | | | Amount. | Per cent. |
| | *Millions.* | *Millions.* | *Millions.* | |
| Banking power of the United States | $5,150 | $16,462.4 | $11,312.4 | 219.6 |
| Banking power of foreign countries | 10,835 | 21,952.5 | 11,117.5 | 102.6 |
| Banking power of the world | 15,985 | 38,414.9 | 22,429.9 | 140.3 |

Let us remember that of all the great questions confronting this country to-day none is to be compared with the importance of a sound and scientific financial system; one that automatically coordinates itself with the gigantic changes that are going on in the commercial world, and will give to the United States a mechanism of exchange as economic as sound credits and conservatism will permit.

No human mind can comprehend the frightful danger and wasteful disaster that may be attributable to the condition of our currency or complete want of any true current credit at all.

Already apprehensions are felt that something is wrong; and various excuses or explanations are forthcoming.

We are told that commodities are so far above what they ever were that this is the source of our danger. But is this true? Let us see.

I will insert in my remarks a table showing the prices of the 41 leading commodities selected by the Bureau of Labor for reference:

*Average wholesale prices of forty-one commodities, 1890 to 1897, and 1906.*

[From Bulletin No. 63 and advance figures of Bulletin No. 69 of the United States Bureau of Labor.]

The foregoing table shows that the prices in 1891 rose to the index number 131, against 133 in 1906.

Nor does this slight increase of only 1½ per cent in the prices of 1891 justify the declaration that gold has depreciated, for the increase in wages would more than account for this trifling advance in fifteen years; but then allowance must be made for the differential growing out of inventions, discoveries, and improved methods of production.

When the crops and general production are more abundant than ever in the history of our country, those of 1906 being upon the average more than 50 per cent above those of 1900, and nothing can be found in the general business situation to excite the suspicion and anxiety already felt, ought we not to look deeper and inquire more closely in order that we may get at the real cause and ascertain whether there is not an explanation, a solution, to this mental condition—nay, more, this financial condition—and remedy the evil before it is too late?

In search of the real reason for the universal caution now felt, I addressed certain queries to the Comptroller of the Currency, and herewith submit them and the detailed information they elicited:

TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY,
*Washington, January 17, 1907.*

SIR: In compliance with the request contained in your communication of the 16th instant, for certain information with respect to cash reserves held by national and other banks of the United States, I have the honor to inclose herewith statements prepared in the form indicated in your letter, as follows:

(1) Aggregate resources and liabilities of national banks on July 14, 1896, and June 18, 1906.

(2) Aggregate resources and liabilities of State banks, loan and trust companies, savings banks and private banks, 1896.

(3) Aggregate resources and liabilities of State banks, loan and trust companies, savings banks and private banks, 1906.

(4) Net deposit liabilities of national banks and reserve held thereon, July 14, 1896, and June 18, 1906.

(5) Individual deposits of State banks, amount and per cent of cash on hand and balance due from banks, June 30, 1896, and 1906.

(6) Individual deposits of loan and trust companies, amount and per cent of cash on hand and balance due from banks, June 30, 1896, and 1906.

(7) Individual deposits in savings banks, amount and per cent of cash on hand, and balance due from banks, June 30, 1896, and 1906.

(8) Individual deposits of private banks, amount and per cent of cash on hand and balance due from banks, June 30, 1896, and 1906.

(9) Individual deposits, amount and per cent of cash on hand and balance due from banks, of all banks reporting other than national.

(10) Net deposit liabilities and reserve held thereon, of commercial banks, savings banks, and all reporting banks together with per capita of deposits, on or about June 30, 1896.

(11) Money in the United States and distribution per capita.

(12) Reserve money held by all reporting banks on or about June 30, 1896, and 1906.

(13) Lawful money in circulation outside of banks on or about June 30, 1896, and 1906.

(14) Statement indicating the amount required to bring present cash reserve held by national banks and by all commercial banks to ratio of cash reserve held, 1896.

(15) Statement showing cash reserve held by commercial banks of the United States, Canada, Japan, and banks of issue of the principal European countries.

Respectfully,

T. P. KANE,
*Deputy and Acting Comptroller.*

Hon. CHARLES N. FOWLER,
*Chairman Committee on Banking and Currency,*
*House of Representatives, Washington, D. C.*

*Aggregate resources and liabilities of the national banks on July 14, 1896, and June 18, 1906.*

a Deposits and current accounts.
b Cash, money at call and short notice.
c Joint stock, colonial and foreign banks with London offices not included.
d Specie.

My thought was that our reserves must have fallen, and yet, with an increase in our gold supply of $873,397,245, from 1896 to 1906, it would seem at first blush as though this could not be, nor could it be if this vast amount of gold had gone into the banks where it belonged. But it did not go into the banks as it should, except in part. The banks got $433,000,000, and the people pocketed a little more than half of it, or $439,000,000.

Can any Member of this House tell me of what earthly use the $1,206,531,814 of reserve money, now in the pockets and tills of the people, is to the commerce of the United States, except as a medium of exchange which credit could perform as well?

It would take $465,751,980 to raise the reserves in the banks of the United States up to the ratios we held in 1896. The total reserves held by all the banks in the United States in 1906 were $960,041,857, or $250,000,000 less than the amount of the reserve money the people were using in trade. For all commercial purposes, except as a medium of exchange, it might just as well be in the bowels of the earth as in the pockets and tills of the people.

In fifteen years our population has increased 15,000,000, and the per capita pocket and till money of our people has gone up from $13.65 to $20.41, due undoubtedly to greater prosperity, higher wages, and better living. Of this $20.41 in circulation outside of the Treasury and the banks $15 is reserve money.

But can anyone explain to this House why a man should carry a check book, or demand credit, in his side coat pocket, and a gold certificate in his vest pocket? Why not the same kind of a credit in both pockets, except in this that one is a bank-book credit and the other a bank-note credit; the one a credit subject to order, the other a current credit?

Until we come to realize that it is the right of the mass of the people to have the same cheap or economic tool of trade as those who use check books, we shall fail utterly in our attempt to measure swords in the commercial world with the most advanced countries upon equal terms. Certainly every obvious advantage should be seized at once.

Let us settle once for all what a banker really is and what is his duty.

He is a merchant in credit and it is his duty to furnish to his customers the kind of credit they may ask for. If they want a book credit subject to check, the banker should give it to them. If they want current credit that passes by delivery, the banker should give it to them and keep it good by redemption in gold coin, which is insured by ample reserves.

The farmer, bringing to town his potatoes, corn, hogs, cattle, wheat, cotton, and other products, sells them to the local buyer, and getting his pay seeks the banker to sell his credit in the form of a deposit, upon which the banker pays him anywhere from 1 per cent to 3 per cent or possibly 5 per cent, just according to how large the deposit is and how long it is to remain with the banker.

The banker in return sells this credit, for which he is paying one rate of interest, to some other farmer or local dealer for a higher rate of interest. In other words, the banker is buying and selling credit, precisely as the local grain and stock dealer buys and sells produce, shipping it to other cities or commodity centers. So, too, the banker will send away all his access of credits to the market where he can sell them at the best price. As a result, we have a cotton market at New Orleans, a meat and grain market at Chicago, and a credit market at New York.

The loans made by the bankers, or credits sold by them, are approximately equal to the credits bought by them or the deposits made with them. To illustrate; September 4, 1906, the loans of the national banks amounted to $4,298,983,316.11, and the individual deposits were $4,199,938,310.35.

To compel the great mass of our people to carry about with them the actual gold coin in the form of certificates instead of a bank credit is as unjust to the people and as absurd as to pass a law to compel all farmers to bring their products to market in wagons with gold tires. Who would pay for the tires? Who pays the cost of a gold instead of a credit currency? Do you think the bankers pay it? Who is carrying the load imposed by a system that puts $1,200,000,000 of gold or reserve money into the pockets of the people instead of a current credit convertible into gold?

Do you think the bankers are paying the cost? Are they paying it any more than the stock, grain, and cotton buyers would pay for the gold tires were so onerous a burden imposed upon the productive industries of the country? What would the effect be upon the interest rates paid by the people, if one thousand millions or a billion of the reserves now locked up in the pockets of the people were in the banks where they would sustain loans of more than five thousand millions of dollars with a reserve of 20 per cent, or if the present average reserve of our country be taken, which is only 7.60 per cent, nearly three times five thousand millions, or fifteen thousand millions—three thousand millions more than all the loans in all the banks in the United States—which are now $12,000,000,000.

But our reserves are too low, and should be largely increased, and this is the very heart of this whole question.

Our people are using the reserves of the country as a medium of exchange when current credits should do this work, rising and falling in quantity precisely as the demand comes and goes, reflecting as perfectly the variation in cash transactions as our checks and drafts reflect the transactions in bank credits. Increased wages and increased cost of living have made a greater and greater demand for cash; and while the people have been

absorbing our reserves, the business of the country has gone on increasing, and the bankers have sold credits to such an extent, or, what is the same thing, have made loans to such an extent, that the reserves have gradually become smaller relatively since 1896, until now they are only 9.92 per cent against 14.73 per cent in 1896 in all the commercial banks—national, state, trust companies, and private banks—while including the savings banks they are only 7.6 per cent to-day against 9.90 per cent in 1896.

If one-third of the reserves hidden in the pockets of the people or the gold they have taken from the channels of trade since 1896 was in the banks, the ratio of our reserves would be as high as in 1896, and if two-thirds of the reserves lodged in the pockets of the people were in the commercial banks of the country, our reserves would be 20 per cent of our deposits.

Thus it is clear that the reserves in the country are more than ample for any apparent demand for credit, however great that may seem to be, if only they were in the bank vaults instead of in the pockets of the people.

Thus it happens that the condition of our national finances is such that the people are constantly absorbing more and more of our reserves as the times become more prosperous. Indeed, our financial and currency policy is such that our prosperity must inevitably lead to the destruction of that very prosperity—an anomaly, but the direct and natural fruit of our ignorance and wasteful folly.

Nor shall we escape the evil consequences of this condition, which will come to us in various ways, until we recognize two or three great economic truths and construct a financial and currency system upon them.

The first is that the place for our reserves is in our bank vaults, and not in the pockets and tills of the people.

The second is that there is not the slightest difference between bank-book credits and bank-note credits.

The third is that the required reserves should be ample; the bank-note credits passing with perfect facility into the bank-note credits, and both currently convertible into the reserves.

When we recognize and adopt these principles, incorporating them into a system, our rates of interest will become practically uniform throughout the country and throughout the year, and not England, but the United States will be the financial center and the world's commercial bills of exchange will bear the signet of the eagle and not of the lion and the unicorn.

The SPEAKER. The question is on the motion of the gentleman from New Jersey to concur in the Senate amendment.

The question was taken; and the House proceeded to divide.

Mr. WILLIAMS. Mr. Speaker, to save the time of the House, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 160, nays 72, answered "present" 2, not voting 143, as follows:

YEAS—160.

The Clerk announced the following additional pairs:

Until further notice:

Mr. PEARRE with Mr. UNDERWOOD.

Mr. HALE with Mr. WALLACE.

Mr. FOSTER of Vermont with Mr. POU.

Mr. DICKSON of Illinois with Mr. DAVEY of Louisiana.

Mr. BABCOCK with Mr. MAYNARD.

Mr. DAVIS of Minnesota with Mr. LAMB.

Mr. HALE with Mr. PAGE.

Mr. ROBERTS with Mr. PATTERSON of South Carolina.

Mr. SMITH of California with Mr. PATTERSON of North Carolina.

Mr. SPERRY with Mr. SOUTHALL.

The result of the vote was announced as above recorded.

On motion of Mr. FOWLER, a motion to reconsider the last vote was laid on the table.

Mr. WILLIAMS. Mr. Speaker, a moment ago I objected to the request of the gentleman from New Jersey to extend his remarks in the RECORD. Upon cooler reflection I desire to withdraw the objection.

The SPEAKER. The gentleman from Mississippi withdraws his objection to the gentleman from New Jersey printing his remarks.

Mr. WILLIAMS. Extending his remarks in the RECORD.

The SPEAKER. The Chair hears no objection to the request of the gentleman.

## IMMIGRATION STATION AT CHARLESTON.

Mr. LEGARE. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25719) to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Department of Commerce and Labor be, and he is hereby, authorized and directed to establish an immigration station at the city of Charleston, in the State of South Carolina, and to cause to be erected, on a site to be selected, a public building to temporarily accommodate and care for immigrants arriving at said city.

SEC. 2. That the sum of $70,000 is hereby appropriated for the erec-

tion of said building, which sum shall be paid from the permanent appropriation for expenses of regulating immigration, said sum to include heating and ventilating apparatus, elevators, and approaches.

The committee amendments were read, as follows:

After section 1 insert the following:

"*Provided*, That the land and dock room necessary for said station and building to be transferred to the Government of the United States free of any cost to the United States."

Page 2, line 1, after the word "the," strike out the words "permanent appropriation for expenses of regulating immigration" and insert in lieu thereof the words "immigrant fund."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

[Mr. BENNET of New York addressed the committee. See Appendix.]

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. LEGARE, a motion to reconsider the last vote was laid on the table.

IMMIGRATION STATION AT NEW ORLEANS, LA.

Mr. MEYER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 7247) to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to establish an immigration station at the city of New Orleans, in the State of Louisiana, and to cause to be erected on a site to be selected a public building to temporarily accommodate and care for immigrants arriving at said city: *Provided*, That the land and dock room necessary for said station and building be transferred to the Government of the United States free of any cost to the United States.

SEC. 2. That the sum of $70,000 is hereby appropriated for the erection of said building, which sum shall be paid from the permanent appropriation for expenses of regulating immigration, said sum to include heating and ventilating apparatus, elevators, and approaches.

The committee amendments were read, as follows:

Page 1, line 3, strike out "Secretary of the Treasury" and insert "Secretary of Commerce and Labor." Page 2, line 3, after the word "the," strike out "permanent appropriation of expenses of regulating immigration" and insert "immigrant fund."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. BENNET of New York. Mr. Speaker, the authorization of these new immigration stations, which for the first time place some southern ports on an equality with northern and western ones, calls attention especially at this time to the tide of immigration now setting so strongly toward us. There are many reasons for it. Prosperity among us, admiration for our form of Government, the fertility of our lands, and the happy experiences of friends and relatives bring to us thousands. With these voluntary immigrants we are, perhaps, entitled to exercise a high degree of care and scrutiny. But there is another class to whom, if true to our traditions, we owe a duty of maintaining a land of liberty and of refuge. This class is the refugee fleeing from persecution and dangers in his native land; to him we must temper scrutiny with mercy.

The present conditions in Russia are sending us thousands of unwilling immigrants, who leave their homes with as much reluctance as any of us possibly could ours. Not only must we receive these unfortunates, but if within our proper power we must also do what we can to remove the cause of their dire distress. Heretofore we have been advised that we were without power, but it is now suggested that this view is inaccurate. Distinguished lawyers and public citizens have united in a request to the Congress in the following form:

We, the undersigned, believe that the time has come when civilized nations may, and of right ought to, protest against the atrocities practiced by the Russian Government in its prolonged warfare against its own people.

The subject is one which interests all nations as a matter of common humanity. On more than one occasion governments have taken action for the amelioration or termination of abhorrent conditions existing in foreign countries. Many instances might be cited, but we content ourselves, as sufficient for our present purposes, in citing the case of the Bulgarian atrocities in 1877, when Russia, taking advantage of the general horror excited by the inhumanities of the Turkish forces within the dominions of the Sultan, intervened, in the name of humanity, to rescue the inhabitants of Bulgaria from their deplorable condition. Fifty years before various European powers, of whom Russia was one, intervened by force to redeem the Greek inhabitants of the Sultan's dominions from barbarities and oppression. In seeking now some means of inducing the Russian Government to ameliorate the condition of its subjects we are asking nothing for which the Russian Government has not itself in times past afforded a sufficient precedent.

This petition and protest rest solely and entirely upon the instances wherein the Russian Government has been and is disregardful of the obligations of a government toward its subjects as recognized by all civilized nations, and wherein it is guilty within its borders of flagrant violation of the terms of agreement of the Geneva treaty of 1864 and 1868 between the nations, and also of the second convention of the peace conference at The Hague in 1902, which forbid such acts of cruelty toward foreign enemies in time of war.

Knowledge of the facts involved has come from many and most varied sources—among others, reports both official and unofficial. A body of testimony has thus been accumulated, which produces upon the mind the irresistible conviction of the sad truth of these direful conditions. The principal facts may be grouped under the following heads:

(*a*) Thousands of men and women are dragged from their homes solely at the discretion or pleasure of local military or police authorities and "administratively" exiled without trial or examination and consigned to inevitable starvation and placed in the midst of remote settlements of semisavages (Ostiaks and Yakuts), close to and within the polar circle, where the most loathsome diseases are chronically epidemic. (See reports St. Petersburg "Society for Helping Political Prisoners and Exiles," 1906.)

(*b*) Hospitals are deliberately fired upon by the regular troops without rebuke. (See governmental and Douma committee reports on Kishenev, Homel, Bialostok, and Seidliz Pogroms.)

(*c*) The Red Cross is not respected, and the wounded are frequently slaughtered or thrown into the sea or buried alive with the dead. (See above reports on Pogroms; also the reports on the uprisings at Moscow, December, 1905, and at Sebastopol and Kronstadt, and also Klimkof report on the Baltic provinces. See Arts. II, III, V, XI, Geneva convention, 1864; also minutes second convention at The Hague, 1902, Art. XXIII, Secs. B and C.)

(*d*) Women, children, and aged and decrepit men—patently noncombatants—are maimed and killed by sword slashings, torn by bayonets, and trampled under hoofs of horses. (See report on pogroms; also report of Klimkof on Moscow, 1905; also official reports on events in Koursk, October, 1905. See minutes of the above convention, Art. XXV.)

(*e*) Girls and young women inhabitants of districts under military "protection" are repeatedly given over to violation by officers as well as ordinary soldiers. (See reports on pogroms by Governmental Commissioners Turau, Kouzminsky, Savich, and Douma committee of investigation; report of Pietoukhof on Seidliz; also report on the trial of Kishenev; investigation of society of Caucasian lawyers on Armenian massacres, Tiflis; and preliminary reports of official commission on the same subject, presided over by Veidenbaum.)

(*f*) Hundreds of homes are burned without warrant or reason at the mere whim and will of commanding officers. (See preliminary examination report of the Veidenbaum commission; the Captain Pietoukhof report on Seidliz. See also Albert Edwards in Collier's Weekly—affidavit certifying statements—and Kellogg Durland interview with General Alikanoff in the New York Evening Post, October 6, 1906—affidavit certifying statement; also minutes of the second convention at The Hague, Arts. XXV and XXVIII.)

(*g*) Tortures are applied to prisoners within fortresses and prisons to elicit information. (See Klimkof report and official complaints to ministers of justice; reports of Vladimeroff—Sunday World, January 27, 1907—affidavit certifying statements.)

(*h*) Field courts-martial endeavor to confuse ordinary civil offenses with revolutionary acts, leading to the almost daily execution of offenders who in civilized lands would receive the most trivial sentences. (See official proclamation through minister of war, 26th of August, 1906, and constantly appearing newspaper dispatches, for example, "Three persons hanged in public gardens in Odessa for stealing $3.50, etc."—Associated Press dispatch, January, 1907.)

(*i*) Villages are pillaged and looted by soldiers upon and during military occupancy, and by police and gendarmes during and immediately following disturbances—i. e., pogroms or massacres—and without any serious attempts on the part of the Government officials to bring to justice those who have violated their sacred duty of protecting the lives, persons, and property of the individuals, thus indicating governmental complicity or connivance. (See governmental and Douma reports, the Captain Pietoukhof report on Seidliz, and minutes of the second convention at The Hague, Art. XLVII.—Pillage is absolutely prohibited.)

(*j*) Massacres are planned and effected by the police and military authorities for the purpose of terrorizing the population in given localities to support specific political aims. ("Pogroms.") (See above reports on "pogroms.")

In view of the present appalling situation in Russia, above indicated; in view of the certainty that the ruthless methods now employed can at best lead to a purely artificial and temporary tranquillity; in view of the fact that the present policy of the Russian Government is a menace to the peace of the world, and in view of the undoubted influence of foreign public opinion upon the action of governments, even the most autocratic, we hereby request the Congress of the United States solemnly to protest against the perverted use of governmental functions, of which the Russian people are the victims.

The petition is signed, among others, by Justice Samuel Greenbaum, New York City; R. Fulton Cutting, New York City; Edwin R. L. Gould, New York City; Samuel L. Clemens, New York City; Jacob H. Schiff, New York City; A. S. Frissell, New York City; Dr. Lyman Abbott, New York City; Bishop Henry C. Potter, New York City; George Kennan, New York City; Charles Stewart Smith, New York City; William Jay Schieffelin, New York City; Julia Ward Howe, Boston, Mass.; Rev. Charles Gordon Ames, Boston, Mass.; E. H. Clement, Boston, Mass.; Louis D. Brandeis, Boston, Mass.; Joseph Lee, Boston, Mass.; Bishop Whittaker, Philadelphia, Pa.; F. Innes Forbes, Philadelphia, Pa.; Julian Kennedy, Pittsburg, Pa.; D. Chris Lange, M. D., Pittsburg, Pa.; H. D. W. English, Pittsburg, Pa.; Judge Cohen, Pittsburg, Pa.; F. H. Babcock, Pittsburg, Pa.; Bishop Regis Canevin, Pittsburg, Pa.; Chancellor Holland, Pittsburg, Pa.; Prof. John A. Brashear, Pittsburg, Pa.; Rev. S. Edward Young, Pittsburg, Pa.; Rev. J. Leonard Levy, Pittsburg, Pa.; A. Leo Weil, Pittsburg, Pa.; Clarence Burleigh, Pittsburg, Pa.; Hon. William S. Woods, Pittsburg, Pa.

It is of course too late at this Congress to take any action

whatever, but in the Sixtieth Congress the views set out in the petition and protest will be vigorously pressed.

The amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. MEYER, a motion to reconsider the last vote was laid on the table.

IMMIGRANT STATION AT GALVESTON, TEX.

Mr. GREGG. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8327) to provide for the establishment of an immigrant station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to establish an immigration station at the city of Galveston, in the State of Texas, and to cause to be erected, on a site to be selected, a public building to temporarily accommodate and care for immigrants arriving at said city: *Provided*, That the land and dock room necessary for said station and building be transferred to the Government of the United States free of any cost to the United States.

SEC. 2. That the sum of $70,000 is hereby appropriated for the erection of said building, which sum shall be paid from the permanent appropriation for expenses of regulating immigration, said sum to include heating and ventilating apparatus, elevators, and approaches.

The amendments recommended by the committee were read, as follows:

In section 1, line 3, strike out the words "Secretary of the Treasury" and insert in lieu thereof the words "Secretary of Commerce and Labor."

In section 2, page 2, lines 3 and 4, strike out the words "permanent appropriation for expenses of regulating immigration" and insert in lieu thereof the words "immigrant fund."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The amendments were agreed to.

Mr. BENNET of New York. Mr. Speaker, the passage of this and the two other bills for new immigrant stations is perhaps a proper occasion to call attention to the changes in the immigration law which, for the most part, go into effect on July 1, 1907. It is believed that the new law will greatly assist in the administration of the immigration law and also exclude certain classes of undesirable immigrants not now excluded.

The changes in the new immigration bill were made for the following reasons, and expected in each instance to accomplish the following purposes:

Section 1: The increase in the tax from $2 to $4 is expected to secure a fund of about a million dollars a year, which, paid into the United States Treasury, will recompense indirectly the country for the expenditure which it might make on individual immigrants before they become self-supporting. It is believed that this fund will be ample for that purpose, and if it does not go directly to the States spending the money, it at least goes into a fund of the country.

The change in the exemptions from "citizens of Canada," etc., to "aliens who have lived for a year in the Dominion of Canada," etc., was made for the reason that with increased head tax it was feared that some nation other than those specifically mentioned in the bill would raise the question of our right to extend a privilege to one nation which was not extended to all, and that such objecting nation might raise international questions based upon the most-favored-nation clause which is in most treaties. The words "or contract-labor laws" were inserted so as to make certain that the immigration fund could be used for the enforcement of the contract-labor laws, which are not, strictly speaking, entirely immigration laws.

The exemption of "aliens in transit through the United States" was inserted so as not to discriminate against steamship companies bringing aliens to ports in our country which aliens were destined for other countries.

The exemption of Guam, Porto Rico, and Hawaii from the head tax was made because of the effort which is being made to attract immigrants to those places, and the desire not to put any hindrance in the way of such efforts.

The labor condition maintained at the end of section 1 speaks for itself, and, while possibly useful in relation to the existing Japanese situation, will be useful at any time when industrial conditions become less prosperous; and immigrants who have gone to Canada, the Canal Zone, Guam, Cuba, Porto Rico, or Hawaii commence to feel any possible industrial depression, which would probably strike those places first, and attempt to come to the United States in large numbers, thus complicating what might by that time have become a serious economic problem among ourselves.

In section 2 the addition of imbeciles and feeble-minded persons to the excluded class needs no explanation, and the word "tuberculosis" is added because there is a controversy as to whether tubercular diseases are dangerous contagious diseases. The words "persons not comprehended within any of the foregoing excluded classes," etc., are intended to cover persons of low vitality or poor physique, or who should not, for some apparent physical reason, be admitted.

The words "or admit having committed" make a sensible and obvious change.

The words "persons who admit their belief in the practice of polygamy" bar out practicing polygamists, or those who intend practicing polygamy, without affecting some who accept literally the teachings of certain portions of the Old Testament.

The provisions in relation to women and girls speak for themselves, and merely strengthen the existing statutes.

The provision in regard to contract laborers puts back into the law language which was omitted, probably inadvertently, from the act of 1903, and makes it possible once more to enforce the contract-labor law vigorously. For the last four years there has always been a doubt as to whether contract laborers belong specifically to the excluded classes.

The provision in relation to excluding persons whose ticket or passage has been paid for by any corporation, association, society, municipality, or foreign government is aimed to prevent the bringing in of undesirable immigrants through the efforts of foreign governments, foreign cities, or benevolent or charitable societies.

The provision in relation to children under 16 years of age is aimed chiefly at the bringing in of Greek boys, who are sold into practical slavery in this country, and the provision as made is liberal, so as not to prevent the coming of all children.

The provision permitting those whose tickets or passage have been paid for by any corporation, association, etc., to go in immediate and continuous transit through the United States to foreign contiguous territory is inserted so as not to discriminate against steamships coming to our ports but bringing such passengers destined for foreign countries.

Section 3 is greatly broadened, so as to make certain the suppression of the immoral practices alluded to in the section. It is said by those connected with the enforcement of the law that the section as amended will permit of very successful efforts in this direction.

The changes in section 4 simplify and strengthen the contract-labor law.

The changes in sections 5, 7, and 8 are simply verbal, and speak for themselves.

In section 9 the addition of the words "idiots, imbeciles, epileptics, or persons afflicted with tuberculosis or with" makes this section, which is the punishment section corresponding with section 2, the excluding section, which heretofore the section did not exactly do. The other changes in the section are purely verbal.

In section 10 the addition of "tuberculosis" to the classes in which final exclusion can be had while extremely important is so simple as to require no explanation.

Section 11 enacts into law what is now the practice—that is, rejecting an accompanying alien in case of the exclusion of an alien rejected for sickness, mental or physical disability.

In section 12 the addition of the words "the name and address of the nearest relative in the country from which the alien came" is to enable the Department to send the alien back to some friend when such alien is rejected because of a mental infirmity.

The final clause of section 12 is new and provides the means for ascertaining how many aliens leave the country each year. This law gives an opportunity, which we have never had before, of finding out what the net increase of population is each year through the incoming aliens.

The changes in section 13 put on the manifest the information which is required for the examinations in sections 2, 3, and 10.

The proviso in section 15 needs no explanation.

The changes in sections 16 and 17 are simply verbal.

The changes in section 18 add railways other than those which have entered into contractual relations with the Department of Commerce and Labor to those liable for the illegal bringing in of aliens, and provide that the liability of those railways and of officers of vessels shall be for negligent failure. These changes strengthen and simplify the law, which was heretofore somewhat vague.

In section 19 the words "or shall make any charge for the return of any such alien, or shall take any security from him for the payment of any such charge," are aimed at preventing steamship companies from bringing aliens to this country, knowing such aliens to be inadmissible, but protecting themselves by taking security on the other side, so that the return passage is paid, the steamship companies thus actually profiting by

bringing to this country people who they know will be sent back. The changes in this section also permit the suspension of the deportation of any alien whose testimony is required in any prosecution for a violation of the immigration law.

In the interest of humanity the section has been amended so as to permit an alien suffering from tuberculosis, or from a loathsome or dangerous contagious disease, to be sent to a hospital, if the express permission of the Secretary of Commerce and Labor is obtained. The proviso at the end of the section also permits the detention of an insane alien whose health and safety will be imperiled by immediate deportation.

The changes in section 20 extend the time within which an alien who becomes a public charge, whether from causes existing prior to landing, may be deported, from two to three years, and puts one-half of the entire cost of removal to the port of deportation upon the contractor, procurer, or other person inducing the alien to enter the United States, and if that can not be done, then the cost of removal to the port of deportation shall be at the expense of the immigration fund and at the expense of the steamship company from there on.

Section 21 permits the deportation of any alien, subject to deportation, at any time within three years, and in the proviso at the end of the section is added the humane provision for the employment of a person at the expense of the immigration fund, to accompany an insane or sick alien back to the place from which he or she came.

In section 22 the addition of the words "and also surgeons in accordance with the provision of section 17" enables us to send surgeons to countries where an inspection by them of aliens prior to sailing will be permitted. This will save thousands of aliens, suffering from diseases which would bar them from entry, from taking the voyage, and will save many more thousands from the danger of infection or contagion from such immigrants during the voyage. The system is now, with the consent of the Italian Government, in use in various ports in Italy, and is giving great satisfaction.

In section 24 the appropriation of the lump sum of $50,000 for the enforcement of the contract-labor law was, in the judgment of the conferees, the only way which could be devised of enforcing the contract-labor law. It is presumed that the Secretary of Commerce and Labor will, from this fund, employ detectives who will be absolutely unknown to everyone connected with the immigration service, and who will be able, by traveling to and fro on the ships, to obtain evidence as to contract laborers.

In section 25 the words "which shall be rendered solely upon the evidence adduced before the board of special inquiry" enact into law a recent regulation of the Department, which supersedes the former bad practice of receiving additional evidence on appeal. As the law now is, if new evidence is discovered after the taking of the appeal the case is sent back to the original board of inquiry, which thus acts both upon the old and the new evidence.

Section 26 permits for the first time the giving of a legal bond in the case of any alien liable to be excluded because likely to become a public charge or because of physical disability from tuberculosis or loathsome, contagious disease, and otherwise admissible. There are thousands of cases in which it is practically impossible to separate families by deporting one or more members of the family who are liable to become public charges. Under this bond section the Government can now secure itself. The section provides for the giving of a bond which can be enforced. The whole record will go up before the Secretary, who can, either on that or on outside evidence, exercise his discretion.

In section 28 the changes enlarge the saving clause of the law.

In section 32 the word "foreign" was stricken out, so as to permit the Bureau to make arrangements with the American railway lines running into the United States similar to existing contracts with Canadian lines on the northern border.

In section 33 the definition of the term "United States" is changed so as to exclude the Isthmian Canal Zone. If this change had not been made, the importation of laborers into the Zone would have been seriously interfered with.

Section 34 prohibits the sale of liquors in the Capitol. It has, of course, no place in the immigration act. It is not repealed, but is simply left out of the act, and the new section 34 permits the appointment of a commissioner of immigration at New Orleans.

Section 36 was the repealing clause of the old law. The new section 36 prohibits aliens from entering the United States except at the seaports thereof or at such place or places as the Secretary of Commerce and Labor may from time to time designate. Curiously enough, although there was under the old law provision for deporting aliens who were found to be in the United States illegally, there was no provision preventing aliens from coming in wherever they saw fit, whether there was an inspection at the point or not. The proviso is to facilitate the passage of residents of Canada and Mexico across our northern and southern boundaries, respectively.

Section 37 had a curious history. It was drafted by the late Senator Hoar to cover the case of the wife and *two* children of a Syrian living in Worcester, Mass., and so strictly was this idea followed that it provided for the admission of "said wife and *either* of said children." It also provided that the act should be applicable only when the contagious disorder was contracted on shipboard, and, curiously enough, after further providing that said wife or children should be held until it should be determined whether the disorder was easily curable, failed to provide whether they should be admitted or deported after such fact was ascertained. The section was a curious example of the evil which generally results from passing a general statute to cover a particular case. The principle, however, was good, and the law now recognizes that a family may consist of either more or less, as well as two children, and strikes out the provision that the disease was contracted on shipboard, which is, of course, immaterial, and provides what the kindly Senator from Massachusetts evidently intended to provide—that is, that if the disease is found to be easily curable the persons can be landed.

Section 39 provides for the appointment of a commission of nine persons, three to be appointed by the President, three Senators to be appointed by the President of the Senate, and three Representatives to be appointed by the Speaker of the House. The Members of Congress are to serve without compensation and the members appointed by the President are to receive a compensation to be fixed by him. The commission has very wide powers, is not limited in its expenditures, and is required to report to Congress. The intention is to have this commission report authoritatively on existing facts bearing on immigration. Until now legislation on this subject has been embarrassed by the absence of the information which such a commission can obtain. The concluding portion of the section also empowers the President to call an international conference or to send special commissioners to any foreign country for the purpose of regulating by international agreement the immigration problems.

Section 40 provides for the creation of a division of information in the Bureau of Immigration and Naturalization. One of the evils of the present system is that there is not a proper distribution of immigration, and it is hoped that this division will assist in an equitable distribution.

Section 41 exempts accredited officials of foreign governments and their suites, families, and guests from the provisions of the act.

Section 42 is the air-space provision, which increases the amount of air space on each vessel by about 20 per cent. After this section takes effect on January 1, 1909, the requirements of the United States laws as to a proper air space for immigrants will be more liberal than those of any other country. Practically this is also a restrictive measure, as of course fewer can be brought on each ship, and, the number of ships being somewhat limited, fewer immigrants will come. The changes in this section are as follows:

*Minimum cubic feet, 7 feet between decks.*

| | Cubic feet. |
|---|---|
| Present law: | |
| Main deck, or first deck below | 100 |
| Second deck below | 120 |
| Proposed amendment: | |
| Main deck, or first deck below | 126 |
| Second deck below | 140 |

*Less than 7 feet between decks.*

| | |
|---|---|
| Second deck below | 120 |
| Proposed amendment, second deck below (about) | 180 |

Sections 43 and 44 are purely formal sections repealing all other immigration laws and laws conflicting with this new law and providing when the various parts of the law shall take effect.

The bill as amended was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. GREGG, a motion to reconsider the last vote was laid on the table.

PUBLIC BUILDING, ATHENS, OHIO.

Mr. GROSVENOR. Mr. Speaker, I ask unanimous consent to discharge the Committee on Public Buildings and Grounds from the further consideration of the bill H. R. 23221, and to pass the same.

The SPEAKER. The gentleman from Ohio asks unanimous

consent to discharge the Committee on Public Buildings and Grounds from the further consideration of the bill mentioned, and to consider the same at this time. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 23221) for the erection of a public building at the city of Athens, in the State of Ohio.

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to acquire for the United States, in the city of Athens, in the State of Ohio, in such manner as to him shall seem best, a suitable site, and cause to be erected thereon, according to plans and specifications to be approved by him, a substantial building, with good modern improvements and conveniences, for the post-office and other Government uses, at a total cost of not more than $100,000, said building to be distant at least 40 feet in every direction from any other structure.

The SPEAKER. Is there objection?

Mr. HEFLIN. I object.

Mr. PAYNE. I trust the gentleman will not object after three recognitions have been given on that side.

Mr. HEFLIN. I withdraw my objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. GROSVENOR. The following is a statement which I will print as a part of my remarks:

CERTIFICATE.

This is to certify that at a meeting of the Athens Commercial Club held on the 28th day of November, 1906, a committee consisting of Frank S. Roach, L. H. Clark, and C. L. Jones was appointed to secure a census of the city of Athens, Ohio; that said committee appointed J. A. Palmer and L. H. Clark as enumerators, and that the report of said enumerators in the taking of said census, showing the name and street of each person living in the territory canvassed, are on file with the Athens Commercial Club and open to public inspection.

ATHENS COMMERCIAL CLUB,
By H. G. STALDU, *President*.
M. B. LAWRENCE, *Secretary*.

MAYOR'S CERTIFICATE.

I, Gilbert E. Day, mayor of the city of Athens, Ohio, hereby certify that I am well acquainted with the inhabitants of the city; that the canvass taken under the direction of the Athens Commercial Club was made by J. A. Palmer, a retired merchant, and L. H. Clark, an attorney, and that, in my opinion, the number of inhabitants shown by said census is correct.

GILBERT E. DAY, *Mayor*.
ATHENS, OHIO, *December 26, 1906*.

Report of committee on taking the census of Athens and contiguous territory:

| | | |
|---|---|---|
| Precinct No. 1 | | 1,325 |
| Precinct No. 2 | | 1,225 |
| Precinct No. 3 | | 1,176 |
| Precinct No. 4 | | 966 |
| Precinct No. 5 | | 1,110 |
| Total in corporation | | 5,802 |
| Contiguous territory: | | |
| Richland | 214 | |
| Mechanicsburg | 138 | |
| Stringtown | 21 | |
| Asylum employees | 152 | |
| Barths Mill | 30 | |
| Children's Home | 62 | |
| Herrolds Mill | 60 | |
| Patients at asylum | 1,294 | |
| | | 1,931 |
| Grand total | | 7,733 |

I hereby certify that the above amounts are a true census of the different places.

FRANK S. ROACH,
*Chairman of Census Committee of Athens Commercial Club.*

ELECTION STATISTICS.

Ohio election statistics for 1905 show the total number of votes cast in the city of Athens to be as follows:

| | |
|---|---|
| Ward 1 | 316 |
| Ward 2 | 326 |
| Ward 3 | 257 |
| Ward 4 | 411 |

NOTE.—Ward 4 has since been divided into Wards 4 and 5.

SUMMARY.

| | |
|---|---|
| Official census for corporation, 1900 | 3,066 |
| Special census for corporation, 1905 | 5,151 |
| Special census for corporation, 1906 | 5,802 |
| Special census for corporation (and suburbs), 1906 | 7,733 |

*Post-office statistics.*—Four city carriers, nine rural carriers; receipts for year ending December 31, 1906, $17,801.81.

In addition there is located in the little city of Athens the internal-revenue collector's office, the jurisdiction of which covers a very wide scope of Ohio, including Columbus and much of the contiguous country. So that in estimating the necessity for a public building it is easily seen that the location is a very favorable one; three railroads, running east and west and north and south, come to Athens; ten passenger trains pass Athens a day going east and west and six a day going north and south. Furthermore, Athens is located in the very heart of the great coal development of Ohio, a business which is rapidly growing in that immediate locality.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GROSVENOR, a motion to reconsider the last vote was laid on the table. [Applause.]

AGRICULTURAL APPROPRIATION BILL.

Mr. WADSWORTH. Mr. Speaker, I desire to present a conference report on the bill H. R. 24815, the agricultural appropriation bill.

The SPEAKER. The gentleman from New York calls up the conference report on the agricultural appropriation bill.

Mr. WADSWORTH. Mr. Speaker, I ask unanimous consent that the report be omitted and the statement be read.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read as follows:

STATEMENT.

The House recedes from amendments Nos. 1, 2, 3, 7, 8, 9, 10, 12, 15, 16, 18, 19, 20, 21 with amendment, 22, 23, 24, 26, 28, 29, 30 with amendment, 31, 32, 33, 34 with an amendment, 36, 38, 39, 40, 41, 43 with an amendment, 46, 47, 48 with an amendment, 49, 51, 53, 54, 55, 58, 59, 60, 61, 65, 66, 70 with an amendment, 73, 81, 82, 83, 84, 85, 86, 87, and 89.

The Senate recedes from amendments Nos. 4, 13, 50, 52, 56, 57, 62, 63, 64, 67, 68, 69, 71, 74, 75, 76, 77, 78, and 79.

Amendment No. 1 appropriates $12,000 for the salary of the Secretary of Agriculture, in accordance with the law recently passed.

Amendment No. 2 increases the salary of the Assistant Secretary from $4,500 to $5,000.

Amendment No. 3 increases the salary of the solicitor to $3,500.

Amendments Nos. 10, 15, 26, and 36 increase the salaries of the Chiefs of the Bureaus of Animal Industry, Plant Industry, Chemistry, and Forestry to $5,000.

Amendment No. 73 restores the salary of the Director of Office of Public Roads to $2,750, the amount originally recommended by the House committee.

Amendment No. 16 increases the salary of the chief clerk of the Bureau of Plant Industry to $2,250.

Amendment No. 53 increases salary of the cashier of the division of disbursements and accounts to $2,000.

Amendment No. 12 increases the amount for experiments in animal feeding and breeding from $25,000 to $50,000. This was the amount originally proposed by the House bill.

Amendment No. 20 increases the appropriation for grain investigations from $15,000 to $40,000. The increase was conceded by your conferees to meet the demands for foreign commerce.

Amendment No. 31, granting an increase of $1,000,000 to the Forest Service, was agreed to by your conferees because of a Senate amendment which requires all receipts from the forest reserves to be turned into the Treasury, and not to be again available by the Forest Service except by direct appropriation.

Amendment No. 34 requires the Secretary of Agriculture to submit detailed reports of receipts and estimates for the Forest Service and estimate of expenditures intended for this service each year, and that all receipts from the Forest Service after July 1, 1907, shall be covered into the Treasury, thus putting an end to the use of those receipts as a "revolving" fund. This amendment further provides that hereafter no forest reserves shall be created nor any additions made within the limits of the States of Oregon, Washington, Idaho, Montana, Colorado, or Wyoming except by act of Congress.

Amendment No. 41 strikes out that provision of the House bill which provides "that no part of this sum shall be used for the payment of compensation or expenses to any officer or other person employed by any State, county, or municipal government," and substitutes the following: "That any sum used for compensation of or payment of expenses to any officer or other person employed by any State, county, or municipal government shall be reported to Congress in detail."

The Senate amendment was agreed to by your conferees in the belief that it would be perhaps wiser to allow the Department to follow its own plan for at least the first year of the enforcement of the pure-food law.

Amendment No. 48 restores to the bill the salaries for the Bureau of Biological Survey exactly as it is carried in the current bill.

Amendment No. 70, as amended by the conferees, instead of restoring the item for nutrition investigations, appropriates $5,000 to bring to Washington the apparatus belonging to the Government which has been used in these investigations.

Amendment No. 89 provides that hereafter on or before the 1st day of January of each year the Secretary of Agriculture

shall submit to Congress, in addition to the estimates now required by law, classified and detailed estimates of every subject of expenditure intended for the Agricultural Department for the next fiscal year and detailed reports of all expenditures under any appropriation for each service during the preceding fiscal year.

All other amendments are for correction of totals, slight changes in verbiage, correction of punctuation, restoration of two or three paragraphs stricken out in the House on points of order, but which in no way change the original intent and purpose of the bill.

On careful examination of the bill by the conferees it was found that no authority was given the Forest Service to employ help in the District of Columbia, the words authorizing such employment having been inadvertently stricken from the House bill under a point of order. The conferees therefore recommend the insertion, after the word "forests," in line 6, page 40 of the bill, of the words "in the District of Columbia or elsewhere."

J. W. WADSWORTH,
CHAS. F. SCOTT,
JOHN LAMB,
*Managers on the part of the House.*

Mr. WADSWORTH. Mr. Speaker, I move the adoption of the conference report.

The question was taken; and the motion was agreed to.

SATISFACTION OF CLAIMS.

Mr. MILLER. Mr. Speaker, I desire to call up conference report on the bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department.

The SPEAKER. The gentleman from Kansas [Mr. MILLER] calls up a conference report, which the Clerk will report.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment striking out paragraphs 32, 33, and 34, and also its amendment to the title of the bill.

That the House recede from its disagreement to the following Senate amendments and agree to the same, namely:

To pay John H. Lohman the balance due him on account of bounty accruing by the destruction of the enemy's vessels at the battle of Santiago, July third, eighteen hundred and ninety-eight, he being there and then an acting gunner, whereas he was allowed and paid bounty as chief gunner's mate only, fifty-nine dollars and twenty cents.

To reimburse Capt. E. J. Dorn, United States Navy, retired, in the amount expended by him as disbursing officer at the naval station, Tutuila, in June, nineteen hundred and one, and checked against his account because the vouchers representing such expenditures have been lost, four hundred and eighty-three dollars and nine cents.

J. M. MILLER,
G. E. WALDO,
JACK BEALL,
*Managers on the part of the House.*

C. W. FULTON,
JOHN KEAN,
A. J. MCLAURIN,
*Managers on the part of the Senate.*

Mr. MILLER. Mr. Speaker, I would like to make a statement in reference to this bill. I desire to call attention of the House to the fact that this House has passed 144 bills coming from the Committee on Claims, and notwithstanding it is more than twice the number of bills ever passed by any Congress in the history of the country, the amount of the appropriations necessary to pay these claims is much less than any former appropriation. And at this time I desire to thank the Speaker of the House and the Members of this body for the splendid treatment they have accorded to small and deserving claimants, or creditors, of the country, and especially for the treatment accorded to the Committee on Claims. [Applause.]

Mr. Speaker, I move the adoption of the report.

The question was taken; and the motion was agreed to.

JICARILLA RESERVATION.

Mr. MARSHALL. Mr. Speaker, I desire to call up conference report on the bill H. R. 23650, entitled "An act to quiet title to lands on Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made, and to dispose of the merchantable timber, and for other purposes."

Mr. HEFLIN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HEFLIN. I introduced, on the 26th of January, a joint resolution that called for a reprint of the Special Report on the Disease of the Horse, and the Committee on Printing——

The SPEAKER. That is not a parliamentary inquiry.

Mr. HEFLIN. And the Committee on Printing, Mr. Speaker, reported the bill.

The SPEAKER. That is not a parliamentary inquiry.

Mr. HEFLIN. I have not finished, Mr. Speaker, and I desire to finish my inquiry.

The SPEAKER. It is not a parliamentary inquiry.

Mr. HEFLIN. I have not finished yet, Mr. Speaker, and I desire to inquire now, in order that I may serve notice on others, that I may object, whether it may be in order to call up later this resolution, which is No. 229. Three-fourths of the House requested the committee to report it favorably.

The SPEAKER. The Clerk will report the conference report on the bill H. R. 23650, presented by the gentleman from North Dakota [Mr. MARSHALL].

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 23650, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment to section three.

That the House recede from its disagreement to the amendments of the Senate to sections one and two and agree to the same.

THOMAS F. MARSHALL,
CHAS. H. BURKE,
WM. T. ZENOR,
*Managers on the part of the House.*

MOSES E. CLAPP,
CHARLES CURTIS,
H. M. TELLER,
*Conferees on the part of the Senate.*

The statement is as follows:

The conferees on the points of difference between the two Houses on H. R. 23650 beg leave to report:

That the Senate recedes from its amendment to section 3, and thus leaves the bill in that particular as it passed the House.

The House recedes from the Senate amendment to section 1, which strikes out a surplusage of language and is fully covered by the proviso inserted by the Senate which previously formed section 2 of the bill as it passed the House, and section 2 is stricken out by the Senate because of the proviso mentioned, leaving the bill in this particular precisely as it passed the House.

THOMAS F. MARSHALL,
CHAS. H. BURKE,
WM. T. ZENOR,
*Managers on the part of the House.*

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and the conference report was agreed to.

On motion of Mr. MARSHALL, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

BRIDGE ACROSS RED RIVER, AT SHREVEPORT, LA.

Mr. WATKINS. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25885) to extend the time for building a bridge across Red River, at Shreveport, La.

The SPEAKER. The gentleman from Louisiana [Mr. WATKINS] asks unanimous consent for the present consideration of a bill, of which the Clerk will report the title.

The Clerk read as follows:

A bill (H. R. 25885) to extend the time for building a bridge across Red River, at Shreveport, La.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. WATKINS, a motion to reconsider the vote by which the bill was passed was laid on the table.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approvel, the following bill:

H. R. 25483. An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes.

DAM ACROSS COOSA RIVER, ALABAMA.

Mr. BURNETT. Mr. Speaker, I desire to call up from the Speaker's table and put upon its passage the bill S. 8526, with the amendment that has been agreed to.

The SPEAKER. The gentleman from Alabama asks unanimous consent to take from the Speaker's table, with the amendment, a bill which has been heretofore read.

Mr. MANN. I ask that the amendment be read.

The Clerk read as follows:

Page 4, strike out all after line 3, down to and including line 14, page 5, and insert:

"SEC. 3. That this act shall be null and void unless the dams herein authorized be commenced within three years and completed within seven years from the time of the passage of this act."

"SEC. 4. The authority herein conferred, shall, except as herein specifically provided, be subject in all respects to the provisions of the act 'An act to regulate the construction of dams across navigable waters,' approved June 21, 1906.

"SEC. 5. The right to alter, amend, or repeal this act is hereby expressly reserved."

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The amendment was agreed to.

The bill as amended was ordered to a third reading, read the third time, and passed.

On motion of Mr. BURNETT, a motion to reconsider the vote by which the bill was passed was laid on the table.

METLAKAHTLA INDIANS.

Mr. ESCH. Mr. Speaker, I ask unanimous consent for the present consideration of the bill S. 8299.

The bill was read. as follows:

A bill (S. 8299) to confer civic rights on the Metlakahtla Indians of Alaska.

*Be it enacted, etc.*, That all Indians of the Tsimpsean or Haida tribe of the full or mixed blood who emigrated from British Columbia and settled at Metlakahtla on Annette Island, in southeastern Alaska, in the year 1887 and subsequent years, as well as all descendants of such Indians, and all other Indians who have since become and remained bona fide residents of said Metlakahtla, Alaska, shall, if otherwise qualified, be entitled to receive and obtain licenses as masters, pilots, and engineers, as the case may be, of any and all steamboats and other craft, and also licenses as operators of motor boats and other craft, subject to the provisions of the act of Congress approved May 16, 1906, entitled "An act to amend section 4426 of the Revised Statutes of the United States, regulation of motor boats," with the same force and effect as if they had been citizens of the United States; any such Indian may be the owner of any such motor boat or other craft, subject to the provisions of the said act of May 16, 1906, although such Indian be not a citizen of the United States, without depriving said motor boat or other craft of the benefits and privileges of a vessel of the United States.

SEC. 2. That a certificate under the hand of any officer of the customs in Alaska, to the effect that the applicant for one of the different licenses mentioned in the foregoing section comes within one of the provisions of said first section of this act, shall together with the affidavit of the applicant to that effect, be sufficient evidence of the fact that said applicant is entitled to the privileges conferred upon said Indians by the first section of this act.

SEC. 3. That this act shall take effect and be in force from and after its passage.

Mr. SULZER. Reserving the right to object, I would like to ask the introducer of this bill if this is approved by Father Duncan?

Mr. ESCH. It is approved by the Secretary and the Commissioner.

Mr. SHERMAN. It is in the interest of Mr. Duncan's Indians.

Mr. SULZER. That is what I wanted to know.

The bill was ordered to a third reading, read the third time, and passed.

On motion of Mr. ESCH, a motion to reconsider the vote by which the bill was passed was laid on the table.

ALLOTMENT OF LAND IN SEVERALTY TO INDIANS.

Mr. SHERMAN. Mr. Speaker, I ask unanimous consent for the present consideration of the following bill:

The Clerk read as follows:

A bill (H. R. 25741) to amend section 3 of an act entitled "An act to provide for the allotment of land in severalty," etc., approved February 8, 1901.

*Be it enacted, etc.*, That the provisions of the proviso of section 3 of the act of February 28, 1901, being an act to amend and further extend the benefits of the act approved February 8, 1887, entitled "An act to provide for the allotment of land in severalty to Indians on the various reservations, and to extend the protection of the laws of the United States over the Indians, and for other purposes," authorizing the leasing for grazing and mining purposes of Indian reservation lands occupied by Indians who have bought and paid for the same, are hereby made applicable to lands embraced within any Indian reservation established by act of Congress or Executive order.

The amendment recommended by the committee was read, as follows:

In line 4 strike out the words "nineteen hundred and one" and insert "eighteen hundred and ninety-one."

Mr. SULZER. Reserving the right to object, I would like to ask the gentleman from New York if this applies to lands of the Indians in the State of New York?

Mr. SHERMAN. It does not.

Mr. SULZER. Then I have no objection.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The amendment was agreed to.

The bill as amended was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

On motion of Mr. SHERMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

COMPENSATION OF INSPECTORS OF CUSTOMS.

Mr. SULLIVAN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill I send to the desk.

The Clerk read as follows:

A bill (H. R. 12222) authorizing the Secretary of the Treasury to fix the compensation of inspectors of customs.

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized to limit and fix the compensation of inspectors of customs as he may think advisable, not to exceed in any case the rate of $5 per diem, and in all cases where the maximum compensation is paid no allowance shall be made for meals or other expenses incurred by inspectors when required to work at unusual hours.

Mr. PAYNE. Mr. Speaker, I object to the consideration of that bill.

The SPEAKER. The gentleman from New York objects to the consideration of the bill.

LEONARD MARTIN COX.

Mr. SHERLEY. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 25883.

The Clerk read as follows:

A bill (H. R. 25883) to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

*Be it enacted, etc.*, That the President be, and he is hereby, authorized to restore, by and with the advice and consent of the Senate, Leonard Martin Cox, formerly a civil engineer in the United States Navy, to the Corps of Civil Engineers of the Navy, to take rank next after Civil Engineer Fred Thompson: *Provided*, That said Leonard Martin Cox shall establish to the satisfaction of the Secretary of the Navy, by examination pursuant to law, his physical, mental, moral, and professional fitness to perform the duties of that grade: *And provided further*, That the said Leonard Martin Cox shall be carried as an additional to the number of the grade to which he may be appointed under this act, or at any time thereafter: *And provided further*, That the said Leonard Martin Cox shall not by the passage of this act be entitled to back pay of any kind.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects.

Mr. SHERLEY. I hope the gentleman will reserve his objection for just a moment.

Mr. MANN. It is late. I will talk with the gentleman later.

Mr. SHERLEY. I am doing this at the instance of the Secretary of the Navy. It is nothing that I desire.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. Objection is heard.

TRENT RIVER, NORTH CAROLINA.

Mr. BURTON of Ohio. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 253, relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

Mr. SULLIVAN. Mr. Speaker, I object, and I shall continue to object during the rest of the evening.

The SPEAKER. The gentleman from Massachusetts objects.

JOHN ALLEN.

The SPEAKER laid before the House the bill (H. R. 13122) to correct the military record of John Allen, with Senate amendments thereto.

Mr. DEEMER. I move to concur in the Senate amendments.

The motion was agreed to.

PHOENIX, ARIZ.

The SPEAKER also laid before the House the bill (H. R. 25039) to enable the city of Phoenix, in Maricopa County, Arizona Territory, to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company

and to extend and improve said plant, with Senate amendments thereto.

Mr. SMITH of Arizona. I move to concur in the Senate amendments.

The motion was agreed to.

INTOXICATING LIQUORS TO MINORS.

The SPEAKER also laid before the House the bill (H. R. 23556) prohibiting the purchase, procurement, sale, gift, or disposition of intoxicating liquors to minors by unlicensed persons, with a Senate amendment thereto.

Mr. WATSON. Mr. Speaker, I move to concur in the Senate amendment.

The motion was agreed to.

RETURN OF BILLS TO THE SENATE.

The SPEAKER laid before the House the following:

IN THE SENATE OF THE UNITED STATES.

*Resolved by the Senate (the House of Representatives concurring)*, That the President be requested to return the bill (S. 5623) entitled "An act granting an increase of pension to Nicholas M. Hawkins."

The concurrent resolution was agreed to.

Also the following:

*Resolved by the Senate (the House of Representatives concurring)*, That the President be requested to return the bill (S. 7822) entitled "An act granting an increase of pension to William N. Brunson."

The concurrent resolution was agreed to.

VALLEY FORGE PARK COMMISSION.

Mr. WANGER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 25812) to authorize the Secretary of War to deliver certain brass fieldpieces, with their carriages and equipments, to the Valley Forge Park Commission.

The SPEAKER. The gentleman from Massachusetts [Mr. SULLIVAN] has given notice of his intention to object.

Mr. NEEDHAM. The gentleman from Massachusetts is considering the question of withdrawing his objection.

Mr. SULLIVAN. I am not going to object, Mr. Speaker. A parliamentary inquiry, however, if the Chair will indulge me. Will it be in order to call up, under suspension of the rules, the bill which has been objected to? If so, I should like to draw conclusions with the gentleman from New York on the merits of the proposition.

The SPEAKER. Well, the Chair does not, to-night at least, think it is feasible to recognize the gentleman.

Mr. WALLACE rose.

The SPEAKER. For what purpose does the gentleman from Arkansas rise?

Mr. WALLACE. To ask unanimous consent for the present consideration of the bill H. R. 25557, which has been reported by the committee.

The SPEAKER. The Chair will first recognize the gentleman from Pennsylvania [Mr. WANGER], who first addressed the Chair. The Clerk will report the bill which the gentleman from Pennsylvania asks unanimous consent to consider.

The Clerk read as follows:

A bill (H. R. 25812) to authorize the Secretary of War to deliver certain brass fieldpieces, with their carriages and equipments, to the Valley Forge Park Commission.

*Be it enacted, etc.*, That the Secretary of War be, and he is hereby, authorized to deliver to the Valley Forge Park Commission, for the ornamentation of the grounds of Valley Forge Park, of the Commonwealth of Pennsylvania, twenty-five brass fieldpieces, with their carriages and equipments, now in the possession of the United States, the same to become the property of the Commonwealth of Pennsylvania for the purpose aforesaid: *Provided*, That no expense shall be incurred by the United States for the delivery of said articles.

With the following amendments:

Line 4, after the words "authorized to," insert "loan and."
Line 6, after "Pennsylvania," strike out "25" and insert "10."
Line 7, strike out "with their carriages and equipments."
Lines 8 and 9, strike out "become the property of the Commonwealth of Pennsylvania for the purpose aforesaid" and insert "be subject at all times to the order of the Secretary of War."

The SPEAKER. Is there objection?

There was no objection.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

By unanimous consent, the title was amended to read: "A bill to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania."

RELINQUISHMENT OF CERTAIN LAND IN PENSACOLA, FLA., TO THE CATHOLIC CHURCH.

Mr. LAMAR. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 360) to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That all the interest of the United States in and to the land in the city of Pensacola, in the State of Florida, known and described on the plat of said city of Pensacola as lots 1 and 2, between the squares and the lot on the east side of the Square of Ferdinand the Seventh, known as the Catholic Church lot, is hereby relinquished and released to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., trustee for the Catholic congregation of Pensacola, Fla., and his successors.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time; was read the third time, and passed.

On motion of Mr. LAMAR, a motion to reconsider the last vote was laid on the table.

ANDREW B. BAIRD AND JAMES S. BAIRD.

By unanimous consent reference of the bill (H. R. 25487) for the relief of Andrew B. Baird and James S. Baird and to confirm all sales and dispositions heretofore made by the United States out of the confiscated land of the late Spruce M. Baird, their father, known as "Baird's Ranch," in the Territory of New Mexico, was changed from the Committee on War Claims to the Committee on Public Lands.

COPYRIGHT BILL.

Mr. BARCHFELD, by unanimous consent, was given leave to file the views of the minority of the Committee on Patents on the bill H. R. 25133—the copyright bill.

LEAVE OF ABSENCE.

Mr. LIVINGSTON, by unanimous consent, was given leave of absence for the evening, on account of sickness.

IMPROVEMENT OF RIVERS AND HARBORS.

Mr. BURTON of Ohio. Mr. Speaker, I ask unanimous consent for the present consideration of H. R. 25872, creating a commission to consider and recommend legislation for the improvement of rivers and harbors of the United States, and for other purposes.

Mr. DALZELL and Mr. RAINEY both objected.

WILLIAM N. BRUNSON.

Mr. DAWSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill S. 8622, which is a corollary of the resolution recently passed to correct a mistake in a bill which had already passed both Houses.

Mr. CLAYTON. What is it?

Mr. DAWSON. It is a bill granting an increase of pension to William N. Brunson.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of William N. Brunson, late of Company G, One hundred and fifty-sixth Regiment Illinois Volunteer Infantry, and pay him a pension at the rate of $24 per month in lieu of that he is now receiving.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time; was read the third time, and passed.

On motion of Mr. DAWSON, a motion to reconsider the last vote was laid on the table.

PRESIDENTIAL APPROVALS.

A message from the President of the United States was communicated to the House by Mr. LATTA, one of his secretaries, who also announced that the President did, on the following dates, approve and sign bills of the House of the following titles:

On March 2, 1907:

H. R. 8984. An act to amend the laws governing labor or improvements upon mining claims in Alaska;

H. R. 9326. An act for the opening of Mills avenue NE. from Rhode Island avenue to Twenty-fourth street;

H. R. 10305. An act to provide for the repayment of certain customs dues;

H. R. 11040. An act to authorize the receivers of public moneys for land districts to deposit with the Treasurer of the United States certain sums embraced in their accounts of unearned fees and unofficial moneys;

H. R. 11044. An act authorizing and directing the Secretary of the Treasury, in certain contingencies, to refund to receivers of public moneys acting as special disbursing agents amounts paid by them out of their private funds;

H. R. 15320. An act to remove the charge of desertion standing against Peter Parsch;

H. R. 19524. An act to amend an act entitled "An act to require the erection of fire escapes in certain buildings in the District of Columbia, and for other purposes," approved March 19, 1906;

H. R. 21091. An act authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Humason's Company B, First Oregon Mounted Volunteers, the name of Hezekiah Davis;

H. R. 21857. An act to correct the military record of Jacob Rockwell;

H. R. 22210. An act to correct the military record of Homer Quick;

H. R. 24390. An act to correct the military record of Charles H. Kellen;

H. R. 24605. An act granting the Norfolk and Portsmouth Traction Company the right to operate trains through the military reservation on Willoughby Spit, Norfolk County, Va.;

H. R. 24816. An act to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906;

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company and to extend and improve said plant;

H. R. 25672. An act to amend an act entitled "An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River;"

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 25812. An act to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania; and

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

## RETIREMENT OF ARMY OFFICERS.

Mr. HULL. Mr. Speaker, I ask unanimous consent to discharge the Committee on Military Affairs from further consideration of Senate joint resolution 91, adjusting the status of certain officers of the Army as to their period of service required by the act of Congress aproved June 30, 1882, to entitle an Army officer to retirement on his own application, and that the bill may be now considered.

The Clerk read the bill, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the period of service entitling an Army officer to retirement on his own application, as required by act of Congress approved June 30, 1882, shall include all

service rendered by such officers as cadets at the United States Naval Academy, Annapolis, Md., or subsequent to graduation therefrom, or to service as commissioned officers of the Navy, or to both.

Mr. MANN. I object.

Mr. PAYNE. Mr. Speaker, I move that the House take a recess until 11 o'clock a. m.

The motion was agreed to; and accordingly (at 1 o'clock and 25 minutes a. m.) the House was in recess until 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the cases of Martin H. Johns and sundry others against The United States—to the Committee on War Claims, and ordered to be printed.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the action filed by the court in the cases of John A. Beaver, administrator, and others against The United States, dismissed for want of prosecution—to the Committee on War Claims, and ordered to be printed.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the action filed by the court in the cases of heirs of Isaac Burnett and others against The United States, dismissed for want of jurisdiction—to the Committee on War Claims, and ordered to be printed.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of Benjamin F. Fox against The United States—to the Committee on War Claims, and ordered to be printed.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the cases of William J. Pointevent and sundry other cases against The United States—to the Committee on War Claims, and ordered to be printed.

A letter from the assistant clerk of the Court of Claims, transmitting a copy of the findings filed by the court in the case of Charles H. Adams against The United States—to the Committee on War Claims, and ordered to be printed.

A letter from the Secretary of Commerce and Labor, transmitting a report in relation to the inquiry of the House as to the investigation of the *Larchmont* disaster—to the Committee on the Merchant Marine and Fisheries.

A letter from the President of the Board of Commissioners of the District of Columbia, transmitting a report of the operations of the excise board for the license year ended October 31, 1906—to the Committee on the District of Columbia, and ordered to be printed.

A letter from the Acting Secretary of the Navy, transmitting, in response to the inquiry of the House, a statement relative to the work on the battle ship *Louisiana*—to the Committee on Naval Affairs, and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. McCLEARY of Minnesota, from the Committee on the Library, to which was referred the bill of the House (H. R. 25853) authorizing the purchase of the historical art window, by Maria Herndl, of George Washington, and so forth, reported the same without amendment, accompanied by a report (No. 8158); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON of Ohio, from the Committee on Rivers and Harbors, to which was referred the bill of the House (H. R. 25872) creating a commission to consider and recommend legislation for the improvement of rivers and harbors of the United States, and for other purposes, reported the same without amendment, accompanied by a report (No. 8159); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. KAHN, from the Committee on Military Affairs, to which was referred the bill of the House (H. R. 25812) to authorize the Secretary of War to deliver certain brass field pieces, with their carriages and equipments, to the Valley Forge Park Commission, reported the same with amendment, accompanied by a report (No. 8160); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SHERMAN, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the Senate (S. 8328) to permit the laying of two water pipes from Bayonne, N. J., to Staten Island, New York, reported the same with amendment, accompanied by a report (No. 8163); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the Committee on Indian Affairs, to which was referred the bill of the House (H. R. 21401) authorizing the Secretary of the Interior to purchase the McIntosh Reservation, in Carroll County, Ga., and erect a monument thereon, reported the same with amendment, accompanied by a report (No. 8164); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DAVEY of Louisiana, from the Committee on Interstate and Foreign Commerce, to which was referred the bill of the House (H. R. 25885) to extend the time for building a bridge across Red River at Shreveport, La., reported the same with amendment, accompanied by a report (No. 8161); which said bill and report were referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. GREGG, from the Committee on Naval Affairs, to which was referred the bill of the Senate (S. 6447) to authorize the appointment of Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy, reported the same without amendment, accompanied by a report (No. 8156); which said bill and report were referred to the Private Calendar.

Mr. SULLOWAY, from the Committee on Invalid Pensions, to which was referred the bill of the Senate (S. 8568) granting an increase of pension to Rosanna A. May, reported the same without amendment, accompanied by a report (No. 8157); which said bill and report were referred to the Private Calendar.

Mr. PARKER, from the Committee on Military Affairs, to which was referred the bill of the Senate (S. 8585) for the relief of Charles W. Spalding, reported the same without amendment, accompanied by a report (No. 8162); which said bill and report were referred to the Private Calendar.

Mr. BUTLER of Pennsylvania, from the Committee on Naval Affairs, to which was referred the bill of the House (H. R. 25883) to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy, reported the same without amendment, accompanied by a report (No. 8165); which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. BURLESON and Mr. LOVERING: A bill (H. R. 25884) directing the fixing of a standard of cotton classification—to the Committee on Agriculture.

## SENATE.

### SUNDAY, *March 3, 1907.*

[*Continuation of legislative day of Saturday, March 2, 1907.*]

At the expiration of the recess (11 a. m. Sunday, March 3) the Senate reassembled.

Mr. JOSEPH W. BAILEY, a Senator from the State of Texas, appeared in his seat to-day.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the following bills:

S. 360. An act to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.;

S. 7812. An act to amend section 591 of the Revised Statutes of the United States, relative to the assignment of district judges to perform the duties of a disabled judge;

S. 8299. An act to confer civic rights on the Metlakahtla Indians of Alaska;

S. 8498. An act to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and state government and be admitted into the Union;" and

S. 8622. An act granting an increase of pension to William N. Bronson.

The message also announced that the House had passed the following bills, with amendments in which it requested the concurrence of the Senate:

S. 6147. An act authorizing changes in certain street railway tracks within the District of Columbia, and for other purposes;

S. 7247. An act to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building;

S. 8327. An act to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building; and

S. 8526. An act permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 on said river.

The message further announced that the House had agreed to the amendments of the Senate to the following bills:

H. R. 13122. An act to correct the military record of John Allen;

H. R. 13566. An act to amend sections 6 and 12 of the currency act approved March 14, 1900;

H. R. 16659. An act to correct the military record of Tobe Holt;

H. R. 23556. An act prohibiting the purchase, procurement, sale, gift, or disposition of intoxicating liquors to minors by unlicensed persons;

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company and to extend and improve said plant; and

H. R. 25692. An act to provide for an additional district judge for the northern and southern districts of California.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24815) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908.

The message further announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes, asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LITTAUER, Mr. TAWNEY, and Mr. BRUNDIDGE managers at the conference on the part of the House.

The message also announced that the House insists upon its disagreement to the amendment of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23650) to quiet title to lands on the Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made, and to dispose of the merchantable timber, and for other purposes.

The message further announced that the House had agreed to the concurrent resolution of the Senate requesting the President to return the bill (S. 5623) granting an increase of pension to Nicholas M. Hawkins.

The message also announced that the House had agreed to the concurrent resolution of the Senate requesting the President to return the bill (S. 7822) granting an increase of pension to William N. Bronson.

The message further announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 23221. An act for the erection of a public building at the city of Athens, in the State of Ohio;

H. R. 25741. An act to amend section 3 of an act entitled "An act to provide for the allotment of land in severalty," etc., approved February 8, 1901;

H. R. 25812. An act to authorize the Secretary of War to deliver certain brass fieldpieces, with their carriages and equipments, to the Valley Forge Park Commission;

H. R. 25885. An act to extend the time for building a bridge across Red River at Shreveport, La.; and

H. R. 25889. An act to provide for sittings of the United States circuit and district courts of the southern district of Ohio at the city of Dayton, in said district.

#### ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

H. R. 13122. An act to correct the military record of John Allen;

H. R. 23556. An act prohibiting the purchase or procurement, sale, gift, or disposition of intoxicating liquors to or for the use of minors by unlicensed persons;

H. R. 23650. An act to quiet title to lands on Jicarilla Reservation and to authorize the Secretary of the Interior to cause allotments to be made, and to dispose of the merchantable timber, and for other purposes;

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company and to extend and improve said plant; and

H. R. 25692. An act to provide for an additional district judge for the northern district of California.

#### MARTHA SANDERS.

Mr. BERRY. I report back from the Committee on Public Lands without amendment the bill (H. R. 23988) to authorize patent to be issued to Martha Sanders, widow of Levi B. Sanders, for certain lands therein described, and I submit a report thereon. I am on a conference committee and compelled to go back, and I ask that the bill be put upon its passage.

Mr. GALLINGER. I call attention to the fact that 11 o'clock was set for the further consideration of the so-called "shipping bill."

Mr. BERRY. I would not make the request, but I am compelled to go back to a conference.

Mr. GALLINGER. If it is my privilege, I will yield to the Senator.

Mr. BERRY. I thank the Senator very much.

The VICE-PRESIDENT. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

HOURS OF LABOR OF RAILROAD EMPLOYEES.

Mr. FLINT. I ask the Senate to proceed to the consideration of the conference report on the disagreeing votes of the two Houses on the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. GALLINGER. I call attention to the fact, Mr. President, that yesterday it was agreed that at 11 o'clock this morning the message from the House relating to the shipping bill would be called up. I, however, will yield for the consideration of the conference report, and shall then ask that the other matter be placed before the Senate.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

Mr. NEWLANDS obtained the floor.

COAL-LAND ENTRIES.

Mr. FULTON. The Senator from Nevada kindly agreed to yield to me to call up the Alaska coal bill. It is the bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska.

Mr. GALLINGER. Mr. President, I must insist upon the regular order.

Mr. FULTON. If the Senator will allow me to say just a word, this bill is not one that I feel any particular interest in. As I have explained before, it is one that the Senator from Minnesota [Mr. NELSON] prepared and has taken great interest in. He is not able to be here on account of sickness, and I agreed to call it up. I have called it up once or twice before, but there has been objection, but when these Senators inquired into the purpose and understood it they withdrew their objection. It simply provides for taking care of those who have already entered coal lands in Alaska, giving them a right to perfect the entry.

Mr. NEWLANDS. If the Senator from New Hampshire will permit me to say a word on the subject, I will state that I objected to the consideration of this bill the other day until I could examine it. I then found that it had been unanimously reported by the Committee on Public Lands, of which I am a member. I consulted with the Land Office regarding it, and they had no objections to it in its present form and stated that it was needed to protect the rights of people who made entries there. I think there will be no opposition to the bill, because it has been scrutinized over and over again by different members.

Mr. GALLINGER. Upon that statement of fact and with the understanding that it will not lead to prolonged debate, I will yield for that purpose.

Mr. HANSBROUGH. I suggest that the bill has been read.

The VICE-PRESIDENT. The amendment reported as a substitute by the Committee on Public Lands has been read. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended so as to read: "An act to amend an act approved April 28, 1904, entitled 'An act to amend an act entitled "An act to extend the coal-land laws to the district of Alaska,"' approved June 6, 1906."

CLAIMS ARISING UNDER THE NAVY DEPARTMENT.

Mr. FULTON submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 13005) to satisfy certain claims against the Government arising under the Navy Department, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment striking out paragraphs 32, 33, and 34, and also its amendment to the title of the bill.

That the House recede from its disagreement to the following Senate amendments and agree to the same, namely:

"To pay John H. Lohman the balance due him on account of bounty accruing by the destruction of the enemy's vessels at the battle of Santiago, July third, eighteen hundred and ninety-eight, he being there and then an acting gunner, whereas he was allowed and paid bounty as chief gunner's mate only, fifty-nine dollars and twenty cents.

"To reimburse Capt. E. J. Dorn, United States Navy, retired, in the amount expended by him as disbursing officer at the naval station, Tutuila, in June, nineteen hundred and one, and checked against his account because the vouchers representing such expenditures have been lost, four hundred and eighty-three dollars and nine cents."

C. W. FULTON,
JOHN KEAN,
A. J. MCLAURIN,
*Managers on the part of the Senate.*

J. M. MILLER,
G. E. WALDO,
JACK BEALL,
*Managers on the part of the House.*

The report was agreed to.

DISTRICT EXCISE BOARD.

The VICE-PRESIDENT laid before the Senate a communication from the Commissioners of the District of Columbia, transmitting, pursuant to law, the report of the operations of the excise board of the District of Columbia for the license year ending October 31, 1906; which was referred to the Committee on the District of Columbia, and ordered to be printed.

INDIAN AND FREEDMEN ENROLLMENT CASES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of the 28th ultimo, an additional statement relative to the number of Indian and freedmen enrollment cases pending before the Commissioner to the Five Civilized Tribes, etc.; which was referred to the Committee on Indian Affairs, and ordered to be printed.

FINDINGS BY THE COURT OF CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact filed by the court in the cause of Emily E. Bishop *v.* The United States; which, with the accompanying paper, was referred to the Committee on Claims, and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. BURKETT. I present sundry telegrams from telegraph operators in the State of Nebraska, relative to the eight-hour bill, which I ask may lie on the table and be noted in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered.

The telegrams were ordered to lie on the table, as follows:

From E. C. Greene, of Jansen; from agent Rock Island lines, of Murdock; from G. W. Barnes, of Richfield; from E. H. Williams, of Lincoln; from F. Felden, G. Manion, C. Evans, C. Huntington, A. Worth, R. Showers, S. Miller, R. Arneil, and L. Stewart, of Fairbury; from C. B. Askew, of Weeping Water; from E. E. Marr, of Elmwood; from P. W. Thomas, of Wabash; from A. V. Robotham, of Walton; from agent of Rock Island line, of South Bend, and from M. J. Johnson and W. A. Henry, of Ashton, all in the State of Nebraska.

Mr. BURKETT presented petitions of sundry citizens of Monroe and Wilcox, in the State of Nebraska, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

He also presented a petition of the Trades League of Philadelphia, Pa., praying for the enactment of legislation providing for a charge of 1 cent per ounce on first-class matter weighing more than 1 ounce, with a minimum charge of 2 cents for the first ounce; which was referred to the Committee on Post-Offices and Post-Roads.

He also presented a resolution adopted by the senate of the State of Nebraska, in favor of a fund being provided by Congress to meet the just proportion of the cost of administration of Government over Indian citizens and their lands by paying cost of building roads and bridges over Indian lands held in trust and the cost of criminal prosecution of Indian citizens; which was referred to the Committee on Indian Affairs.

Mr. SCOTT presented the petition of L. B. Bobbitt, of Raleigh, W. Va., and the petition of O. C. Vancamp, G. T. Blandenship, W. H. Speed, H. A. Conner, and A. J. Albert, of Matewan, W. Va., praying for the passage of the so-called "eight-hour bill" relative to railroad employees and telegraph operators; which were ordered to lie on the table.

Mr. CLARK of Montana presented a petition of 17 members of National Park Lodge, No. 123, Boiler Makers and Iron-Ship Builders, of Livingston, Mont., praying for the enactment of legislation to permit the protection of labor and industries from the competition of convict labor and manufactures; which was referred to the Committee on Education and Labor.

He also presented a memorial of Local Council No. 39, Order of Modern National Reserve, of Butte, Mont., remonstrating against the enactment of legislation to amend and codify statutes relating to the classification of second-class mail matter and the rates of postage thereon.

Mr. WARNER presented a petition of sundry citizens of the State of Missouri, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

REPORTS OF A COMMITTEE.

Mr. SCOTT, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

S. 1796. An act granting an increase of pension to Edith Burt Trout; and

H. R. 3208. An act granting a pension to Isabel T. Borthwick.

Mr. SCOTT, from the Committee on Pensions, to whom was referred the bill (S. 6175) granting an increase of pension to Neoline H. Ash, reported it with an amendment, and submitted a report thereon.

ADELLE V. C. M'DONALD.

Mr. KEAN. I am directed by the Committee to Audit and Control the Contingent Expenses of the Senate to report a resolution, and I ask unanimous consent for its consideration.

The resolution was read, as follows:

*Resolved*, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the contingent fund of the Senate to Adelle V. C. McDonald, widow of H. Bowyer McDonald, late Chief Clerk of the Senate of the United States, a sum equal to one year's salary at the rate he was receiving by law at the time of his demise, said sum to be considered as including funeral expenses and all other allowances.

Mr. KEAN. This is according to the usual custom. In other instances it is one-half year's salary, but when the employee has been here over thirty years we have given to the widow a full year's compensation.

The resolution was considered by unanimous consent, and agreed to.

HOURS OF LABOR OF RAILROAD EMPLOYEES.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. NEWLANDS. Mr. President, the bill is entitled "An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon." The particular provision to which I wish to refer is that contained in the proviso of section 2, which relates to the "operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches reports, transmits, receives, or delivers orders pertaining to or affecting train movements," etc.

I have received telegrams from a large number of telegraph operators employed by the different railroads in the State of Nevada asking me to support the amendment which was offered by Representative MURPHY, of the House of Representatives, and which is contained in this proviso, and which limits the hours of train dispatchers, operators, and other employees who, by the use of the telegraph or telephone, dispatch, transmit, receive, or deliver orders pertaining to or affecting train movements to nine hours a day. The bill went to conference, and the conferees made a change in that proviso. The change is this: They provide that for that class of telegraph operators known as train dispatchers the hours instead of being nine, as in the Murphy amendment, shall be eight.

But then they exclude the great body of telegraph operators from the benefit of the Murphy amendment and provide that their service shall not be longer than twelve hours a day except in case of emergency. I am told by those who represent the telegraph operators and by Representative MURPHY, of the House, who himself is an old telegraph operator and train dispatcher, that under the custom of the railroads as it now exists train dispatchers work only eight hours a day. So the conference report does not change their position at all as to hours of labor.

The difference, as I understand it, between the train dispatcher and the ordinary operator is that the train dispatcher has charge and direction of the orders relating to the movement of trains, and there are in his office other telegraph operators who have not that particular responsibility, but who receive and transmit orders by telegraph. It is also true, I believe, that at some stations there are telegraph operators who necessarily receive and transmit orders relating to the movement of trains who are not regarded as train dispatchers.

Under the provision, then, of the amendment known as the "Murphy amendment," the hours of all operators were restricted to nine hours. Under the conference amendment the hours of a very few of the operators, known as "train dispatchers," are limited to eight hours; but the great body of operators are limited to twelve hours. It is in behalf of this last body that I speak. I think that twelve hours is too long a service for any operator, except in case of an emergency.

Mr. CULLOM. Will the Senator allow me to make an inquiry? What proportion of the telegraph operators are limited to any given hours?

Mr. NEWLANDS. By this report?

Mr. CULLOM. By the conference report.

Mr. FLINT. All telegraph operators.

Mr. NEWLANDS. They are all limited. The train dispatchers are limited to eight hours, but the vast body of operators are limited to twelve hours.

Mr. CULLOM. Then the great body of the telegraph operators are limited to twelve hours?

Mr. NEWLANDS. They are left as they are now.

Mr. CULLOM. That is what I wanted to find out.

Mr. NEWLANDS. There is no change whatever.

Mr. CULLOM. So we are doing them no service at all.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from California?

Mr. NEWLANDS. Certainly.

Mr. FLINT. I wish to state to the Senator from Nevada that there is no limitation now upon telegraph operators.

Mr. NEWLANDS. But I understand the custom now is not to employ them longer than twelve hours. So the law does not operate so as to create any further limitation than that now customarily observed.

Mr. FLINT. I will state to the Senator that there were statements presented to us from railroads showing that there are a number of telegraph operators who work in excess of twelve hours a day.

Mr. NEWLANDS. But I imagine that that is only in cases of emergency.

Mr. FLINT. I think not. I think there are some stations, small country stations, where they work longer than twelve hours. This limits them to twelve hours.

Mr. NEWLANDS. Then I yield, of course, to the correction of the Senator so far as this small number of operators is concerned.

Mr. FLINT. It is very small.

Mr. NEWLANDS. The Senate will observe that practically no change is made regarding the hours of the vast body of telegraph operators. It seems to me that their demand is a reasonable one, that there should be a limitation, and that the limit of nine hours imposed by the Murphy amendment, as it passed the House, is a reasonable one, particularly in view of the fact that the Murphy amendment excepted cases of emergency, when the employees named in the proviso may be permitted to remain on duty for four additional hours in a twenty-four-hour period for not exceeding three consecutive days in any week.

I am told by Mr. MURPHY that if it is contended that it may be necessary to employ men in emergencies more than three consecutive days at the rate of twelve hours a day, the words "not exceeding three consecutive days in any week" may be stricken out, leaving simply a provision that in a case of emergency the hours can be extended from nine hours to twelve hours. An emergency may last over a period of three days if the amendment suggested by Representative MURPHY is accepted.

The objection was made by one of the conferees yesterday that the effect of the Murphy amendment would be to add 10,000 telegraph operators to the force of railroad employees in the country, and that it is doubtful whether that number of operators could be secured. That seemed a strong objection, but upon inquiry I find that the bill is not to go into effect for one year, and certainly during that time these additional employees ought to be secured.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from California?

Mr. NEWLANDS. Certainly.

Mr. FLINT. I desire to state to the Senator from Nevada a fact which was stated to the conference committee, that one of the rules of the union of telegraphers provides that no telegraph operator, a member of the union, can have a student unless he receives permission from the president of the Telegraphers' Union, or from the office of division superintendent, as I understand it, and one of the necessary acts before they can have the necessary number will be an amendment to the rules of the organization of the Telegraphers' Union.

Mr. NEWLANDS. But I imagine, Mr. President, that the Telegraphers' Union would quickly make this change, for they are urging legislation which will necessitate the employment of 10,000 more operatives, and unless the 10,000 more operators are secured, of course the emergency will continue that will enable the railroads to insist upon their serving twelve hours instead of nine. So they themselves will be interested in relaxing the rule which at present apparently restricts the number of operators who can be educated and employed. In addition to this, I am told that not one-half the operators in the country belong to this union.

But is the addition of 10,000 men to the working force of the railroads a very large or unreasonable addition? Obviously not, when we reflect there are 1,000,000 men in the employ of the railroads. Ten thousand men additional is certainly not a very large percentage of 1,000,000.

Then what additional expense will this involve to the railroads? I am told that the average telegraph operator does not receive more than $600 per year. That would mean for 10,000 operators not to exceed $6,000,000 per annum imposed as an expense upon the railroads, whose receipts now aggregate over two billion per annum.

Mr. President, I am aware that just at this time, when the consideration of the railroad question is prominent in the public mind, the railroads are being pushed from all points. Their rates are being attacked through the Interstate Commerce Commission, through the various legislatures of the States, and through the various commissions organized by the States, and unless they make a steady and earnest resistance they doubtless fear that their receipts will be largely diminished.

In addition to this, they are being pressed in the matter of taxes. Almost every State in the Union has under consideration some new tax law that will involve the increase of taxes paid by these corporations, or if legislation is not sought to increase their taxation, such administration of existing law is insisted upon as will increase it.

In addition to all this, their employees are insisting upon a material increase in their compensation, and many of the railroad companies have granted an increase of from 5 to 10 per cent. I can realize, therefore, that with all this pressure the railroads feel compelled to resist all movements tending either to the reduction of income or to an increase of taxation, or to an increase in their expenses caused by an increase in the number or the compensation of their employees.

So far as I am concerned, I wish to see every right of the railroads respected. I wish to see their receipts adequate not only to pay their taxes and operating expenses, but to give them a fair return upon a fair valuation. I have been for a long time urging in this body that the National Government should take hold of this whole question and by a national incorporation act sanction the consolidations which are now so much criticised, under proper control of capitalization and bond and stock issues through the Interstate Commerce Commission, with the expectation that automatically, by the projection of real capitalization, by the protection of a fair return, by the prescription of a fair rule of taxation, which can be done by the National Government with interstate railroads just as we do in the case of national banks, we will have a system which, while it will take care of the operators, restricting them only to reasonable hours, will insure a fair return on the capital invested in these corporations.

But, Mr. President, we are denied the opportunity of comprehensive legislation on this subject and can only take these matters up one at a time, and the question that now presents itself to us is whether a reasonable limitation shall be put upon the hours of this vast body of operators. I think that justice to them demands that it should be, and I think that the safety of the public requires it. I have reason to know that the safety of the public is greatly endangered by the excessive hours of railroad employees. Only recently I rode with the engineer of a freight train in the West, who assured me that he had been kept at work so long upon his train that he found himself one night asleep going along at the rate of 25 miles an hour. These conditions ought to be changed; and it seems to me that the telegraph operators, on whose work the safety of the public so greatly depends, should be protected from unreasonable hours.

While I plead for this legislation in their interest, I wish to say that I am ready to stand for the protection of the railroads in everything that relates to a fair return upon their capital and a fair system of taxation. I shall therefore move that the conferees be instructed to concur in the proviso to section 2 as it came from the House, with the elimination of the following words at the end of the proviso, "namely, not exceeding three consecutive days in any week."

Mr. CARMACK. What is the Senator's amendment? I did not understand the Senator's amendment.

Mr. NEWLANDS. I say I shall move, and I do move, for the acceptance of the House proviso to section 2, with the elimination of the words at the close of that proviso, "namely, not exceeding three consecutive days in any week;" and I move to eliminate those words at the suggestion of the author of the proviso, Representative MURPHY, of the House of Representatives. I will state that Mr. MURPHY was himself a telegraph operator and dispatcher, and that this proviso was drawn by him.

Mr. CARMACK. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Tennessee?

Mr. NEWLANDS. I yield the floor.

Mr. CARMACK. I wish to ask the Senator to state the general effect of his amendment in regard to the hours of labor. How does it affect the hours of labor?

Mr. NEWLANDS. The general effect of the amendment will be to limit the hours of all train dispatchers, operators, or other employees who by the use of the telegraph or the telephone dispatch, report, transmit, receive, or deliver orders pertaining to or affecting train movements to a period of not longer than nine hours in every twenty-four-hour period, with the exception of emergencies provided for in this proviso.

Mr. CARMACK. Mr. President, I shall support the amendment proposed by the Senator from Nevada [Mr. NEWLANDS]. I do not intend to enter into any general discussion of the bill except to express my regret that the House provision was not accepted. If I correctly understand the practical effect of the conference report, it means no change whatever, or at least no beneficial change, in existing conditions.

Mr. KEAN. It is impossible to hear the Senator. I am trying to listen.

Mr. CARMACK. I was saying that if I understand the measure in its present shape it accomplishes no change, or at least no beneficial change, in the condition of the telegraph operators of the country. It simply in effect legalizes existing conditions, the very conditions against which they are making complaint. It fixes upon them by law the very thing which they are seeking to remedy by law, and it is simply a mockery of their complaint, of their appeal to Congress to give them a measure of relief.

I think it would be better to have no legislation at all, to attempt nothing whatever in the name and under the guise of remedial legislation for a class of men who have been complaining to us, than to enact this bill; but we should leave it for some future Congress which may be more willing to meet what I concede to be the just and proper complaints and demands of the operators.

Very few of them now work over twelve hours, as the Senator from California [Mr. FLINT] says, and the only effect of the bill is to give relief to a very small number of telegraph operators and train dispatchers. If we can not do anything better than to give that little measure of relief, I think we had better do nothing at all and leave it to some other Congress to try to give a just and proper measure of relief.

I shall support the amendment of my friend from Nevada.

### PUBLIC BUILDING AT ATHENS, OHIO.

Mr. SCOTT. I ask unanimous consent for the passage of a small bill that will be a slight favor to a gentleman of the other House who is retiring after more than twenty years' service. This will be about the only opportunity that I will have to get the bill before the Senate.

It is the bill which has just come from the House, the bill (H. R. 23221) for the erection of a public building at the city of Athens, in the State of Ohio, and I ask for its present consideration. I hope the Senate will indulge me in this one case and allow the bill to be put on its passage.

The bill was read twice; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its con-

sideration. It directs the Secretary of the Treasury to acquire for the United States, in the city of Athens, in the State of Ohio, in such manner as to him shall seem best, a suitable site, and cause to be erected thereon, according to plans and specifications to be approved by him, a substantial building, with good modern improvements and conveniences, for the post-office and other Government uses, at a total cost of not more than $100,000, the building to be distant at least 40 feet in every direction from any other structure.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

IMMIGRATION STATION AT GALVESTON, TEX.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 8327) to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building, which were, on page 1, line 3, to strike out "Secretary of the Treasury" and insert "Secretary of Commerce and Labor;" and on page 2, line 3, to strike out all after "the" down to and including "immigration," in line 4, and insert "immigrant fund."

Mr. CULBERSON. I move that the Senate concur in the House amendments.

The motion was agreed to.

IMMIGRATION STATION AT NEW ORLEANS, LA.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 7247) to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building, which were, on page 1, line 3, to strike out "Secretary of the Treasury" and insert "Secretary of Commerce and Labor;" and on page 2, line 2, to strike out all after "the" down to and including "immigration," line 3, and to insert "immigrant fund."

Mr. DILLINGHAM. I move that the House amendments be concurred in.

The motion was agreed to.

FIELDPIECES FOR VALLEY FORGE PARK COMMISSION.

Mr. KNOX. I ask unanimous consent for the present consideration of the bill (H. R. 25812) to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission, of the State of Pennsylvania.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. KNOX. I offer the amendments which I send to the desk.

The VICE-PRESIDENT. The amendments proposed by the Senator from Pennsylvania will be stated.

The SECRETARY. In line 6, before the word "brass," it is proposed to strike out "ten" and insert "twenty-five;" and in the same line, after the word "pieces," it is proposed to insert "with their carriages and equipments;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of War be, and he is hereby, authorized to loan and deliver to the Valley Forge Park Commission, for the ornamentation of the grounds of Valley Forge Park, of the Commonwealth of Pennsylvania, twenty-five brass fieldpieces, with their carriages and equipments, now in the possession of the United States, the same to be subject at all times to the order of the Secretary of War: *Provided*, That no expense shall be incurred by the United States for the delivery of said articles.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

RED RIVER BRIDGE AT SHREVEPORT, LA.

Mr. MCENERY. I ask unanimous consent for the present consideration of the bill (H. R. 25885) to extend the time for building a bridge across Red River at Shreveport, La.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. GALLINGER. Mr. President, I am not going to object to the consideration of this bill, but I do want to put into the RECORD the fact that, in my judgment, the building of ships for the American merchant marine is of more consequence than the building of bridges across any river in the country. I shall not object to this bill, but if every Senator is to undertake to get bills passed by unanimous consent to-day, I shall very soon object.

Mr. FLINT. Mr. President, I simply desire to make the statement, so that it may go into the RECORD, that if the debate continues on this sixteen-hour bill, and if in addition the time of the Senate is to be taken up in passing other bills, in my opinion it will result in the defeat of the bill. We had great difficulty in coming to an agreement on this bill in conference, and the members of the conference on this bill are now engaged in other conferences, so that it would be very difficult to get the conferees together again on the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

COOSA RIVER DAM, ALABAMA.

Mr. PETTUS. I ask that the message from the House in regard to Senate bill 8526 be laid before the Senate.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 8526) permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 on said river, which was on page 4, to strike out all after line 3, down to and including line 14, page 5, and insert:

SEC. 3. That this act shall be null and void unless the dam herein authorized be commenced within three years and completed within seven years from the time of the passage of this act.

SEC. 4. The authority herein conferred shall, except as herein specifically provided, be subject in all respects to the provisions of the act entitled "An act to regulate the construction of dams across navigable waters," approved June 21, 1906.

SEC. 5. The right to alter, amend, or repeal this act is hereby expressly reserved.

Mr. PETTUS. I move that the Senate concur in the House amendment.

The motion was agreed to.

GENERAL DEFICIENCY APPROPRIATION BILL.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HALE. I move that the Senate insist upon its amendments and agree to the conference asked by the House, the conferees to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed Mr. HALE, Mr. ALLISON, and Mr. TELLER as the conferees on the part of the Senate.

JOINT POSTAL COMMISSION.

The VICE-PRESIDENT. The Chair appoints as members of the Joint Postal Commission of Congress on the part of the Senate, created by the post-office appropriation act to make an examination into the business system of the Post-Office Department and the postal service, the Senator from Pennsylvania [Mr. PENROSE], the Senator from Montana [Mr. CARTER], and the Senator from Georgia [Mr. CLAY].

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. M. C. LATTA, one of his secretaries, announced that the President had approved and signed the following acts:

On March 2:

S. 2787. An act to amend the act of Congress approved February 11, 1901, entitled "An act providing for allotments of lands in severalty to the Indians of the La Pointe, or Bad River, Reservation, in the State of Wisconsin;"

S. 3638. An act providing for the retirement of noncommissioned officers, petty officers, and enlisted men of the Army, Navy, and Marine Corps of the United States;

S. 5365. An act to appoint Joseph Y. Porter a lieutenant-colonel and deputy surgeon-general and to place him on the retired list of the Army;

S. 6498. An act to amend an act entitled "An act conferring jurisdiction upon United States commissioners over offenses committed in a portion of the permanent Hot Springs Mountain Reservation, Ark.," approved April 20, 1904;

S. 7994. An act authorizing the State of North Dakota to select other lands in lieu of lands erroneously entered in sections 16 and 36 within the limits of the abandoned Fort Rice and Fort Abraham Lincoln military reservations, in said State;

S. 8063. An act to amend an act entitled "An act to amend an act approved August 3, 1894, entitled 'An act concerning leases in the Yellowstone National Park,'" approved June 4, 1906;

S. 8128. An act granting to the St. Johns Light and Power Company a right of way for street railroad purposes through the United States Military Reservation of Fort Marion, in St. Augustine, Fla., and through other Government property in said city;

S. 8377. An act to amend an act entitled "An act permitting

the building of a dam across the Mississippi River in the county of Morrison, State of Minnesota," approved June 4, 1906; and

S. 8535. An act for the relief of certain white persons who intermarried with Cherokee citizens.

PENSION APPROPRIATION BILL.

Mr. McCUMBER submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate with a further amendment as follows: After the word "dollars," on page 4, line 6 of the bill, insert the following:

"*Provided*, That the Secretary of the Interior shall make inquiry and report to Congress at the beginning of its next regular session the effect of a reduction of the present pension agencies to one such agency upon the economic execution of the pension laws, the prompt, efficient payment to pensioners, and the inconvenience to pensioners, if any, which would result from such reduction. This provision shall not be construed as interfering with or limiting the right or power of the President in existing law in respect to reduction or consolidation of existing pension agencies."

And the Senate agree to the same.

P. J. McCUMBER,
N. B. SCOTT,
JAS. P. TALIAFERRO,
*Managers on the part of the Senate.*

WASHINGTON GARDNER,
W. P. BROWNLOW,
JOHN A. SULLIVAN (dissenting),
*Managers on the part of the House.*

The report was agreed to.

HOURS OF LABOR OF RAILROAD EMPLOYEES.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. PATTERSON. Mr. President, legislative bodies very rarely take the initiative in legislation of this kind. They usually await the action of those who are to be affected by it. Legislative bodies yield to a public sentiment. But it seems to me that when they profess to be yielding to a public sentiment they ought to do something substantial in that way and not make a mockery of it.

I think it is very much to be regretted that the bill as it passed the Senate, which related solely to railroad employees and did not include telegraph operators, should not have been presented to both bodies upon its merits without coupling with it the provisions now found in the report of the conference committee pertaining to telegraph operators.

I am inclined to think, Mr. President, that the provisions pertaining to the operators will prove very obnoxious to those who sought the interposition of Congress to grant them some relief. It legalizes a twelve-hour day, and surely neither telegraph operators nor any other class of workmen would be likely to favor a law that practically fixes their working day to be twelve hours.

At the present time, Mr. President, the telegraph operators have it in their power to fight as other organized corps of employees fight for the betterment of their condition. As a rule they have no legislative handicap to prevent them, as the result of a contest, from winning if they can convince their employers or the great public at large that their cause is just. But when you place upon the national statute books a law that permits employers to exact from them a certain number of hours of labor each day, it is as though Congress declares that that is a fair day's labor, and if the men affected shall seek to lessen the hours they find themselves confronted with a law that interferes very materially with any struggle they may enter upon to lessen their hours of labor.

Mr. President, the effect of this bill in dealing with telegraph operators is to give an eight-hour day, perhaps, to 1 in 500 telegraph operators and to legalize a twelve-hour day for all the rest of the telegraph operators. When I read the bill I labored under the impression that the committee which reported it had been deceived by railroad men, that they had been led to believe that the designation "train dispatcher" included a great many more members of the telegraphers' calling than it really did, and that they had confused the term "train dispatchers" with those who receive and transmit dispatches and that, laboring under a false impression, they had concluded to report this amendment as we find it in the conference report.

Mr. President, let me call the attention of this body to the language of this proviso:

*Provided*, That no train dispatcher, or dispatcher's operator in the dispatcher's office, or other employee who by the use of the telegraph or telephone issues orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than eight hours in any twenty-four-hour period.

In other words, this refers to the train dispatcher and to the operator working with the train dispatcher. How many such employees are there on any line of railroad? As I understand it, they usually have a train dispatcher in the train dispatcher's office on each division of the railway, and that is all. At the headquarters of a division you have a train dispatcher who regulates the movement of the trains within his division, which may cover several hundred miles of railway.

Mr. HEYBURN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. PATTERSON. Certainly.

Mr. HEYBURN. I noticed for the first time the words used in this provision when the Senator from Colorado read it "issues orders," etc. If the word was "transmit," it would, I think, cover the other class of operators the Senator has in mind. It seems to me that the word "issues" should be stricken out and the word "transmits" adopted, because that would then include all men who receive, for the purpose of sending them to the conductor and the engineer, messages governing the handling of trains.

Mr. PATTERSON. Mr. President, the thing which has led to so many railroad accidents of a serious character has not been mistakes committed by the train dispatchers. We have had accidents occurring by reason of erroneous dispatches being sent by dispatchers, but the accidents that usually occur are because of the failure of the operators at the different stations on the line of railway to give the dispatches to the engineers and the conductors of the trains as they pass the different stations on the line. Not one of these telegraph operators is permitted to have, if the railroad shall exact it from them, a shorter day's labor than one of twelve hours. The only persons affected by this eight-hour provision are those who sit at the headquarters office and send out the dispatches to the different parts of the line to control moving trains; but the men who receive dispatches—the men who are to deliver them and see that they are correctly given to the engineers and the conductors—are upon the twelve-hour schedule. No relief whatever is given to them. The Senator from Tennessee [Mr. CARMACK] very well characterized this in the remarks he made.

Mr. CARMACK. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Tennessee?

Mr. PATTERSON. With pleasure.

Mr. CARMACK. I ask the Senator from Colorado if he does not think that an act of legislation recognizing twelve hours as a proper limitation for these operators would be worse than to leave the matter in its present condition?

Mr. PATTERSON. I certainly do, Mr. President.

There are a great many operators now on different lines who work but eight hours a day. They are not train dispatchers; but the better roads, those that have more regard for the safety of the traveling public, have seen that it was profitable, both in the matter of saving their companies from damages on account of personal injuries and the safety of their rolling stock, to put their telegraphic employees on a shorter day schedule than twelve or thirteen hours, and they have done so. But the provision of this bill is an invitation to all such railways to exact the twelve-hour day or a greater number of hours than their operators are at present required to serve.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from California?

Mr. PATTERSON. With pleasure.

Mr. FLINT. I ask the Senator from Colorado if that same proposition would not apply to a sixteen-hour limitation, so far as railroad employees are concerned?

Mr. PATTERSON. There is a far greater difference between the employee who is stationed permanently at a point on the railroad and the employee who is operating and moving trains.

Mr. FLINT. The Senator did not answer the question I propounded, and that is this: The Senator seems to think that by fixing the hours of labor for telegraph operators at twelve the

corporations will conclude that Congress believes that that is a reasonable number of hours for telegraph operators to work. If that is true with reference to telegraph operators, why would not the passage of a bill by Congress limiting railroad employees to sixteen hours have the same effect upon the railroad officials of giving them the impression that Congress desires the railroad employees to work sixteen hours?

Mr. HANSBROUGH. Mr. President, I desire to state to the Senator from Colorado that I have here the report of the conference committee on the agricultural appropriation bill, which is a very lengthy bill, requiring a great deal of work to complete its enrollment, and I desire to submit the report so that it may go in.

Mr. PATTERSON. Mr. President, I am not going to occupy the floor very long. There are some matters that I want to say in connection with this bill, and I think the conference report had better come up in regular order.

Mr. President, after the many interruptions, attempting to recall the question propounded by the Senator from California, I would say that the difference in the employment or of the duties of telegraph operators and train operators is so marked and so clearly understood by the public that the criticism made with reference to practically legalizing a twelve-hour day for telegraph operators does not logically apply to those engaged in the movement and operation of trains.

The engineer and conductor and the other members of the train crew start out with a train. They may have a two or three or four or five hours' run. They are then practically out of service for a very considerable length of time at some distant point from the point of departure, waiting for the train that they are to take charge of to make the return trip. They are employees, as it were, on the wing, very largely the creatures of circumstance, attempting to live up to schedule time, but, as we all know, it is not a rare occurrence for schedule time to be knocked out and the trains compelled to proceed on their way on such time and under such circumstances as will permit them to get through. The period of daily employment by those operating trains running for twelve and fourteen and sixteen hours, and sometimes for a longer period, has grown out of the uncertain nature as to the length of the time they will be engaged in actively operating trains by reason of the uncertainties of the service. But, Mr. President, the telegraph operator is stationary. He is as stationary in his duties as is the man or the woman who works in a mill, and, therefore, there is no reason above and beyond a reason that would operate upon any other class of employees to keep them at work for a longer period than the community and the service ought to recognize as being wise and just, a period of time during all of which they can give all of their attention and all of their intelligence to the performance of the duties that devolve upon them growing out of their employment.

So I fully agree with the Senator from Tennessee, better no legislation at all with reference to these telegraph operators, than to mock them with legislation of this character. It is worse than a mockery, Mr. President, because, as has been before suggested, it legalizes the twelve-hour day and imposes burdens upon them that they should not be compelled to carry if they should enter upon a struggle with the great railway companies to reduce their hours of employment.

There has been some criticism upon the other part of the bill by those who represent the railroad men proper in connection with this legislation and at whose instigation very largely the legislation was undertaken. I should like to ask the Senator from California, in charge of this report, if he can state to the Senate what is meant in section 2 of this bill by the phrase "any twenty-four-hour period?" I will read the part of the bill in which that phrase occurs:

> And no such employee who has been on duty sixteen hours in the aggregate in any twenty-four-hour period shall be required or permitted to continue or again go on duty without having had at least eight consecutive hours off duty.

Is the twenty-four-hour period to be fixed arbitrarily by the company? Is the twenty-four-hour period a calendar day? Is the twenty-four-hour period to commence with each individual workman as he enters upon the duties of his twenty-four hours' labor?

Mr. FLINT. The last statement of the Senator is the correct statement.

Mr. PATTERSON. I wish the Senator from California would explain a little more in detail what is to be understood by this paragraph of the bill.

Mr. FLINT. Just as the Senator from Colorado stated in his last proposition.

Mr. PATTERSON. That is, that a twenty-four-period is one that applies to each individual and can not be a period that will be applicable at one and the same time to all or any great number of those who are employed in railroad work?

Mr. FLINT. It applies to each man.

Mr. PATTERSON. This criticism, Mr. President, was made upon that part of the bill—and I read it because it was made, though at the same time I am frank to say I can not quite comprehend how the conclusion it mentions has been reached—but it is said:

> The provision relative to aggregate time in section 2 as reported by the conferees arbitrarily requires an employee to take eight consecutive hours off duty immediately after the twenty-four-hour period, notwithstanding the fact that he had already had eight hours off duty within such twenty-four-hour period, and possibly there may have been only one hour's service between the two eight-hour rest periods.

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from California?

Mr. PATTERSON. With pleasure.

Mr. FLINT. In that case, the employee should be required to have a nine hours' rest, instead of an eight hours' rest; so as to make the full twenty-four hour period. And I may say to the Senator from Colorado that, in my opinion, there is not a bill that can be drawn that will not permit of a violation of the law technically under certain conditions that can be stated, so far as the operation of trains is concerned.

I have a number of examples that have been given to me under different provisions that have been drawn covering this particular section. The objection to this section as it came from the House, according to my view and the view of the members of the conference committee, was that it permitted a trainman to have an eight hours' rest during a twenty-four hour period and have not more than two hours' rest at any one time. The conference committee was of the opinion that it should be mandatory that the employee should have at least eight hours consecutive rest, and not eight hours rest divided up into two-hour periods.

Mr. PATTERSON. Mr. President, I am very frank to say that I have not been able to understand the justice of this particular criticism on that phase of the bill, and I said so when I called the attention of the Senator and of the Senate to it, but that the view of one of the men, and perhaps I might say of the representative of the railroad men here, may be put before the Senate, I ask the Secretary to read the communication which I send to the desk, as it refers to the entire bill, and some matters are brought out that the Senate ought to be in possession of.

The VICE-PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

> MARCH 2, 1907.
>
> DEAR SIR: I respectfully submit to you the following criticisms of the bill limiting the hours of service of railroad employees (S. 5133), as reported by the conference committee, and on behalf of the railroad employees who are seeking this legislation to express the hope that it will be returned to conference with the view of remedying these defects:
>
> "The provision relative to aggregate time, in section 2, as reported by the conferees, arbitrarily requires an employee to take eight consecutive hours off duty immediately after the twenty-four-hour period, notwithstanding the fact that he had already had eight hours off duty within such twenty-four-hour period, and possibly there may have been only one hour's service between the two eight-hour rest periods. Thus to force an arbitrary eight-hour rest period after only one hour's service would not only cause great inconvenience to the employees and unnecessarily keep them away from their homes, but it would also impede the movement of traffic where the immediate service of these employees was desired.
>
> "The proviso in section 2 which permits a carrier to work a telegraph operator twelve hours would specifically countenance by law the working of twelve hours a class of men a great number of whom are now only working eight hours. We fear that this would encourage carriers to increase rather than decrease the number of hours of telegraphers. Then, too, the fact that Congress had by law specifically recognized a twelve-hour day for this class of men would, we fear, put into the hands of the carriers a weapon, or at least an argument, to combat the present efforts of telegraph operators and other classes of railroad employees to decrease their hours of service by contract.
>
> "The provision in section 3 which reduces to one year the time within which suit can be brought is, in our minds, made without good cause. If individuals can not plead the statute of limitations in less than three years, we do not believe a corporation should be permitted to plead it in one year. The only argument so far advanced for making the period one year is that it is necessary in order to prevent the blackmail of railroad officers by railroad employees. This is a reflection on the railroad employees as a class. Out of nearly 1,000 actions which have been brought against the carriers for violations of the safety-appliance law there has not been one case where a railroad employee has been accused of blackmail. All criminal law can be used as a means of blackmail; therefore there is no good reason why a discrimination should be made in a law of this character.
>
> "The exemption proviso in section 3 applies to rest periods as well as service periods. We feel that this is not right, as an employee who has once been relieved from duty should not be required to again go on duty without the required amount of rest, except on relief and wreck trains.
>
> "The provision in section 3 which exempts the carrier from delays which could not have been foreseen, in our minds will render it impossible to successfully prosecute violations of the law, for the reason that this provision when applied to practical operation can be made

to cover almost any delay upon a railroad, including those which result from bad management."

Respectfully submitted.

——— ———.

Mr. CULLOM. Is that signed by anybody?

Mr. PATTERSON. It is signed by Mr. Fuller.

I think this bill should go back to conference, particularly with reference to the telegraph operators, and if it goes back to conference, then the conferees should take the paper which has just been read and try to meet, as far as possible, the objections that are urged to the bill, consistent with the duty of Congress to this large body of employees, and as a matter of course having in mind the rights of the employing companies.

But the dispatches which Senators have been receiving urging their support of the measure for the relief of the telegraph operators have all been based upon what is known as the "Murphy bill," or the "Murphy amendment." That divides the operators into two classes, and I take it that they are correctly described in this report, omitting amendments, and I will read it as the telegraph operators have urged that it should be adopted. I call the attention of the Senate to the bill as it is indorsed and urged by the telegraph operators:

That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime.

The discrimination is drawn between operators who work night and day and operators who work only in the daytime. As to those working night and day, they want the nine-hour day, and as to those who work only in the daytime, they are required to allow the period of work to be thirteen hours, while the bill as reported gives the eight-hour day only to the train dispatcher and the operator or operators in the train dispatcher's office—very few, perhaps, in each division, not to exceed three or four—while all the rest shall work twelve hours if the railroad companies shall require it and if the operators can receive employment upon no other terms.

Mr. President, the reason given by the Senator from California for this legislation it seems to me is not a good one. It is true that the telegraph operators' organization limits the number of apprentices, if I may use that term, but we know that there are telegraph-operator schools all over the country. In every city and town of any importance there are commercial colleges with departments that teach, among other things, telegraphy.

I take it, Mr. President, that the telegraph operators are about as poorly paid lot of skilled workingmen and working women as are found in the country. I think it was the Senator from Tennessee who suggested that fifty or fifty-five dollars a month is all that is usually paid to telegraph operators. I know of operators who receive but $35 per month. I suppose, as a matter of course, there are those who receive a greater wage than fifty-five or sixty dollars, but I think that $75 a month is a high wage anywhere paid to the average telegraph operator.

There is too great a disposition, Mr. President, to consult the wishes of the railway companies in matters of this kind. These companies are performing the functions of government. We delegate to the railway companies duties that should be performed by the Government for the people, and that is the reason why we are legislating in Congress from session to session and putting laws upon the statute books to regulate hours of employment and the character of the service and the rates to be charged and the character of the rolling stock, because these companies are performing duties that should be performed by the Government itself, but the Government has seen fit to delegate to the companies the doing of things that the Government ought to do. They are doing them at immense profit to themselves.

Congress, representing the Government, should not hesitate to fix the kind and character of service they must secure and the manner in which they shall use employees. It should not hesitate to fix just such rules and regulations for the benefit of the public and of the employees as the Government would fix were it engaged in performing the functions which, under the Constitution and the decisions of our Supreme Court, are declared to be governmental functions and that the Government has a right to assume and to perform whenever it shall determine so to do.

Railroad management in this country, Mr. President, has been such as to shock conservative business interests everywhere. The developments of but a few days ago before the Interstate Commerce Commission show to what extent and in what way great railroad magnates use the great powers that railroad management and high official connection with railroads confer upon them. Men, by the manipulation of railroad stocks, obtaining control of railway directories, rise suddenly from humble positions in the ranks of railroad men to be railway magnates, and instead of receiving a comparatively small salary, they are able to accumulate fortunes within a few years, until they are ranked with the billionaires of the world, hocus pocusing with stocks and railroad securities, using the funds and assets that belong to the stockholders to get possession of the stocks of other railways, that they may bring a number of railways under one particular management and turn the profits they earn to the benefit of those who, by reason of their position, are able to manipulate the securities of the companies.

If Congress, in the discharge of its duty, would drive the men who are at the head of the great railway corporations out of the stock market and prohibit them from handling the stocks of their companies as the skilled gambler will the marked deck of cards, we would have better legislation by Congress, and we would receive better service from their companies.

As to the manner in which these companies are performing their duties, and about which much tender solicitude is so frequently expressed, I desire to have read a letter that was sent to me from my home but a couple of weeks ago, written by a company every one of whose members is an ardent and radical Republican, but the concluding sentences of the letter show how they commence to view this matter of railway duty in dealing with the commerce of the country. I ask that the letter be read.

The VICE-PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

THE HALLACK LUMBER AND SUPPLY COMPANY,
*Denver, Colo., February 15, 1907.*

Hon. T. M. PATTERSON,
*United States Senator from Colorado, Washington, D. C.*

MY DEAR SENATOR: We desire to call the attention of the proper Department to the fact that our city and State as well as others are suffering for the want of building material from the Northwest. Building operations are being delayed and largely curtailed by the failure of the Northern Pacific Railway and other roads in that territory to move cars now loaded with material, which have been standing on the side tracks from one to three months, and also by refusing to furnish cars to the manufacturers.

Not only is the building business injured, but all lines are suffering from these delays.

We understand the order has been issued by the Northern Pacific Railway to move nothing but perishable freight. Not only is business suffering as above stated, but thousands of laborers will at an early date be forced into idleness, and the looked-for impetus to all business on the advent of spring will be prevented by the delay of shipments.

We state the conditions that prevail throughout the territory represented by your brother Senators and Representatives.

The situation is very serious and must end in relief by Government control, if the railways are not brought to time in some other way—and that very soon.

Trusting you will give this your early attention and that the proper Departments may have their attention called to this complaint, we are,

Yours, truly,

THE HALLACK LUMBER & SUPPLY CO.
C. C. MUNSON, *Assistant to Manager.*

Mr. PATTERSON. Mr. President, I will not refer further to the letter which has just been read, except to say that with one exception, perhaps, it is from the largest lumber and building supplies company between St. Louis and San Francisco, and when they write a letter such as that and suggest that the only relief to the country from the misgovernment of the railroads and the failure of the railway companies to meet their duties and perform them is Government control, it shows how rapidly this sentiment is growing, and it grows very largely because of the failure of Congress to perform its duty in dealing with the railways and on account of the contumacy of the railroads themselves.

Mr. President, Congress ought to bear in mind that by one provision of the amendment to the interstate-commerce act it turned sums of money into the treasuries of the railways which might well be used by them in increasing the number of operators and lessening their hours and enlarging their compensation. It has been estimated that by the provision prohibiting the issuing of free passes not less than $50,000,000 per annum was turned into the coffers of the railway companies, and I can not see as yet that there has been any equivalent given to the public by the companies in the way of the reduction of rates or in the increase of accommodations to the traveling public.

I was very much cheered by a report that I read in this morning's paper of a vote in another body. I will not say whether it was in this building or not, but it was the vote of a body that has the right to speak. It declared by an emphatic vote that the street railway companies of the city of Washington shall charge the traveling public but a 3-cent fare. It is a move in the right direction, a move for the benefit of

the people whose trustee Congress is and who should guard their interests in dealing not only with the great railways of the country, but with the public-utility corporations of the capital. I do hope that when the bill to which I have reference shall go to conference the Senate conferees will see the wisdom and the justice of the 3-cent-fare provision, for I am convinced that this is a great struggle in which the people must win, if not in this Congress in the one that will immediately follow this.

There is no trouble in this class of legislation with respect to interfering with honest and fair profits for these corporations. It simply takes from them the profits that are unjust and unfair. It takes from them money that should remain in the pockets of the traveling public and that has no business in the coffers of these public-utility corporations, having in mind at the same time that they should receive fair remuneration for the capital they have invested in industries of this character.

Mr. President, so far as this bill is concerned, I hope it will go back to conference, and if the Senate conferees can do no better, that they will take out of the bill which they will return to this body all reference to telegraph operators, so that the operators may commence the struggle again in a body that will be more favorable to their cause, so just to the employees, but also to the traveling public. The telegraph sections ought never to have been incorporated upon the Senate bill, and it looks to me as though somebody might have had in mind the possibility of so loading down the bill as to defeat it; or else, as an equivalent for the Senate bill, to acquire for the railway companies advantages in dealing with their telegraph operators that they lost under the bill as it dealt with the other employees of the companies.

### AGRICULTURAL APPROPRIATION BILL.

Mr. HANSBROUGH submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24815) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 13, 44, 45, 50, 56, 57, 62, 63, 64, 67, 68, 69, 71, 74, 75, 76, and 78.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 7, 8, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, 20, 22, 23, 24, 25, 26, 28, 29, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 46, 47, 49, 51, 53, 54, 55, 58, 59, 60, 61, 65, 66, 73, 81, 82, 83, 84, 85, 87, and 89, and agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "ninety-five thousand seven hundred and sixty dollars;" and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one hundred and nineteen thousand two hundred dollars;" and the Senate agree to the same.

Amendment numbered 21: That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with amendments as follows: In line 1 of said amendment, after the word "and," insert "also;" and on page 34, in line 6, after the word "into," strike out the words "interstate or;" and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: On page 40 of the bill, in line 6, after the word "forests," insert the words "in the District of Columbia or elsewhere;" and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In line 2 of said amendment, after the word "officers," strike out the word "for" and insert in lieu thereof the word "of;" and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment as follows: In line 3 of said amendment, after the word "Congress," insert the words "classified and;" and in the same line, after the word "detailed," insert the words "reports of all receipts by the Forest Service and classified and detailed;" and in line 11 of said amendment, after the word "receipt," insert "and there is hereby appropriated and made available as the Secretary of Agriculture may direct, out of any funds in the Treasury not otherwise appropriated, so much as may be necessary to make refunds to depositors of money heretofore or hereafter deposited by them to secure the purchase price on the sale of any products or for the use of any land or resources of the national forests in excess of amounts found actually due from them to the United States;" and in line 26 of said amendment, after the word "sources," strike out the colon and the matter following down to and including the word "reserve," in line 30; and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment as follows: Restore the matter stricken out, in addition to the matter inserted by the Senate; and the Senate agree to the same.

Amendment numbered 48: That the House recede from its disagreement to the amendment of the Senate numbered 48, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"BUREAU OF BIOLOGICAL SURVEY.

"Salaries, Bureau of Biological Survey: One biologist, who shall be Chief of Bureau, three thousand dollars; one clerk, class 1, $1,200; two clerks, at $1,000 each, $2,000; one clerk, $900; one messenger or laborer, $480; in all, $7,580."

And the Senate agree to the same.

Amendment numbered 52: That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$52,000;" and the Senate agree to the same.

Amendment numbered 70: That the House recede from its disagreement to the amendment of the Senate numbered 70, and agree to the same with an amendment as follows: In lieu of the matter proposed insert the following:

"Nutrition investigations: To enable the Secretary of Agriculture to incur such expenses as may be necessary for the packing, transporting to, and storing in Washington, D. C., of all apparatus now the property of the Government and used in the nutrition investigations, $5,000, or so much thereof as may be necessary."

And the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one million and thirteen thousand two hundred and twenty dollars;" and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "twelve thousand three hundred and ninety dollars;" and the Senate agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "seventy thousand and fifty dollars;" and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "eight million six hundred and ninety-two thousand two hundred and ninety dollars;" and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "nine million four hundred and forty-seven thousand two hundred and ninety dollars;" and the Senate agree to the same.

REDFIELD PROCTOR,
H. C. HANSBROUGH,

*Managers on the part of the House.*

The report was agreed to.

### HOURS OF LABOR OF RAILROAD EMPLOYEES.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two

Houses on the amendments of the House to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. FLINT. Mr. President, I am in entire accord with the views expressed by the Senator from Colorado and the Senator from Tennessee, that the provisions in reference to telegraph operators should not have been considered in this bill. The conferees from the Senate found themselves in the position of having to consider a new subject which had not been deliberated on in the Senate, and which affects between fifty and sixty thousand telegraph operators of this country connected with railroad operations. There was a request made to the conference committee that we should give a hearing in reference to the effect of this provision. We had a hearing, and we reached the conclusion that there were grave doubts whether employees capable of operating an instrument could be secured before the bill went into effect, and, second, whether it would not result in closing many offices where the business transacted would not justify the employment of two operators, and result in great inconvenience to the public.

Having this in mind, we submitted this matter to Mr. Clark, a member of the Interstate Commerce Commission, a man who has had great experience in railroad matters, a man who for many years was at the head of one of the labor organizations, and he drew the amendment in reference to telegraph operators which is in this bill. I have not been able to draw an amendment satisfactory to myself; that is, one which will include all those whom I desire included within the provisions of the bill and at the same time not close many small offices or jeopardize the lives of the people of this country by forcing the railroads to put incompetent men in charge of the telegraph key.

I believe that this question should have been left until the next session, when the matter could be fully considered. I myself am strongly in favor of an eight-hour day for the telegraph operators. I want to include in the provisions of this bill just as many operators as possible and not cripple the service or jeopardize the lives of the people.

The other provisions in this bill have been carefully considered, and the letter that the Senator from Colorado had read from Mr. Fuller has been carefully considered by the conference committee. We have had numerous conferences with Mr. Fuller and have endeavored, as far as it was possible, to adopt his views in reference to the provisions of this bill, and in my opinion we have materially strengthened the bill as it passed the House of Representatives.

Mr. CLAY. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield to the Senator from Georgia?

Mr. FLINT. Certainly.

Mr. CLAY. I desire to ask the Senator a question. On page 2, lines 23 and 24, it is provided—

> That no train dispatcher, or dispatcher's operator in the dispatcher's office, or other employee who by the use of the telegraph or telephone issues orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than eight hours in any twenty-four-hour period.

I wish to ask the Senator whether the eight-hour provisions of this bill apply really to anyone except the train dispatcher, because if you turn to line 2 on page 3, it especially says "who * * * issues orders."

Now, an operator in a dispatcher's office, I understand, does not issue orders. I understand that a train dispatcher has an operator who simply carries out the orders of the dispatcher. Consequently, the eight-hour provision of the bill does not apply to any class except the dispatchers. There is about one dispatcher to every 200 miles of railway and probably fifty or sixty operators who receive and transmit dispatches. In other words, if the conference report is accepted, it will be, in effect, simply legalizing conditions that are carried out at the present time. I understand the dispatchers now, by custom, work only eight hours. If the conference report is accepted, it will simply be carrying out conditions that are accepted at this time. Does not the Senator think that the House provision is rather preferable to the report of the conferees?

Mr. FLINT. Mr. President, the great trouble is that there is not a man I have talked with, either representing the organization or one who has had practical experience in the operation of railroads, or the members of the Interstate Commerce Commission, who can state the number of those who will be affected by the provisions of this bill. The question the conference committee was compelled to determine was whether or not we were willing to adopt this provision when we did not know whether it would affect the railroads or the public.

Mr. CLAY. The Senator does not claim that the conference report will apply to any class except the train dispatcher himself, I understand.

Mr. FLINT. And the train dispatcher's operator.

Mr. CLAY. The operator does not give orders.

Mr. FLINT. I am inclined to think he does give orders.

Mr. CLAY. Oh, no; the operator of the dispatcher does not give orders. He simply receives and transmits orders. The Senator will find, taking the whole bill together, that it applies simply to the dispatcher or his operator who gives orders, and I have never understood that the operator of a dispatcher gives orders. I think the Senator will find that only a small class will be affected by this conference report. I understand that at this time the eight-hour provision is carried out in regard to these dispatchers.

The Senator, I do not doubt, has examined the report of the Interstate Commerce Commission, and there he will find that a large per cent of the recent accidents which have happened—and the accidents that have occurred on railroads have increased largely during the last few years—have been on account of mistakes not made by dispatchers, but by operators. That will be found in the report of the Interstate Commerce Commission.

Mr. FLINT. Would the Senator be willing to have the lives of the people of this country placed in jeopardy by placing 15,000 men in charge of the keys who must learn the business between now and one year from to-day?

Is there a Senator who is prepared to state the number of men it will take to fill these offices made necessary by the increase under the House provision? Is there a Senator who is able to state the number of offices that will be affected in this country? There is not a single person I have talked with who is able to give an intelligent answer as to the effect of the House provision on the railroad operations of the country. If anyone could tell me just what the effect of that provision would be, the number of men that could be obtained, the number of men who would be required under the bill and that they could be obtained, I would vote for the eight-hour provision. But I am not able to answer the question of the Senator, and I am not able to get anyone else to answer it for me, as to how many men may be had or how many men will be required under the bill.

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield to the Senator from Nevada?

Mr. FLINT. I do.

Mr. NEWLANDS. Do I understand the Senator to say that the bill requires 15,000 employees? I thought the statement was made yesterday that it would require 10,000.

Mr. FLINT. I stated from ten to fifteen thousand yesterday, and that is a mere guess; nobody knows. Mr. Clark, the man who has had probably more experience as a member of a railroad organization, and now a member of the Interstate Commerce Commission, told me that he is unable to state the number of men that would be required under the House provision.

Mr. CLAY. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield to the Senator from Georgia?

Mr. FLINT. Certainly.

Mr. CLAY. Does the Senator mean to say that it will require ten or fifteen thousand additional men by reason of limiting the hours of work?

Mr. FLINT. Yes, sir; that is what I said.

Mr. NEWLANDS. Let me call the Senator's attention to the fact that, assuming this guess to be true, it means an addition of only 10,000 men to a general force employed by the railroads at present of 1,000,000 men, which is not a large percentage. In addition to that, the bill does not go into effect for one year, and I am told by Representative MURPHY, who was himself a telegraph operator, a train dispatcher, etc., and is now a Member of Congress, that it takes only six months to train a man in telegraphy. So it seems there is ample time for the training of this body of men.

It would seem to me that if this amendment would require the employment of 10,000 extra men, we would have had by this time some statement from the railroad organizations regarding it. They certainly ought to know; and if we have no statement to that effect from the railroads, it seems to me fair to presume that the increase will not be so large as the Senator apprehends.

Mr. FLINT. It was stated by those who testified before the conference committee that it would be impossible to obtain the number of employees that would be required under this bill. And I want to say that I am not stating my views, but what has been stated to me.

Mr. PATTERSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield further to the Senator from Colorado?

Mr. FLINT. I do.

Mr. PATTERSON. Mr. President, the House provision is very plain and simple in its terms. As I understand it, it divides the telegraph operators into two classes—those who are in offices, towers, and other places that are operated every hour of the twenty-four hours, and those who are in such places as are only operated during the daytime.

Now, what does that mean? The offices that are operated during the daytime are small, insignificant, unimportant offices, offices that are not open during the night, offices in which no business is done——

Mr. FLINT. If the Senator will allow me, I will ask him whether, in his opinion, an office would be a night office or a day and night office under the provision of the House bill where the station was on a branch line and the train started from the end of the line at 6 o'clock in the morning and did not return until 9 o'clock at night? Would this be a day and night office?

Mr. PATTERSON. I do not know. That would be a matter of construction after the law was enacted.

Mr. FLINT. Mr. President, that is just simply one of a hundred questions that could be asked as to this bill that no one can answer.

Mr. PATTERSON. There never was a change of any importance sought by anybody in which in opposition to it an ingenious person could not ask a hundred questions—and that is the number fixed by the Senator from California—that it might not be easy to answer.

But, Mr. President, as I said, the House provision divides them into two classes, and the last class are those who are operating in towers, offices, places, and stations that are only operated during the daytime.

Mr. FLINT. Has the Senator any idea how many there are of such offices?

Mr. PATTERSON. I have not the slightest idea.

Mr. FLINT. No one else has been able to state.

Mr. PATTERSON. What difference does it make as to the number of offices of that character? I think the number must be relatively small.

Mr. FLINT. It makes a difference in this, that we can not tell the number of men that will be required.

Mr. PATTERSON. I was going to suggest, Mr. President, that there must be a very considerable number of those offices, but what the relative number may be I do not know. But those day offices are usually small and unimportant offices. They are offices in which the telegraph operator may perform the duty of station agent and, as was remarked by some one yesterday, sweep out the office and do a dozen different chores around the station. Those men may be had by the railway companies to put in the offices that are run night and day, and there ought to be little or no difficulty in securing operators to fill the places that should thus be vacated.

Mr. President, obstacles that are raised to a measure of this kind are very often simply imaginary. There may be something in them, but they are obstacles that can be overcome. If this can be readily overcome, Congress ought not to hesitate a moment at legislation that has in view the welfare of the men and the safety of the traveling public. If these railway companies are required to live up to this law, I want to say to the Senator from California, we will know that they will live up to it, for these companies are powerful. They can create almost where the ordinary individual would hardly dare to exist. Impose the obligation upon them. That is what is to be done.

If it is necessary, Mr. President, let the conference committee put a provision in the measure such as is in the measure imposing the use of safety appliances upon railroads. Give a discretionary power to the Interstate Commerce Commission to relieve the railway companies for a reasonable length of time until the requisite number of skilled telegraph operators can be secured. If it is the will of Congress to have this reform, there is no substantial obstacle in the way. All that is necessary is for Congress to make proper provision and deal justly and wisely with the question. If discretionary power is necessary, put it in the hands of the Interstate Commerce Commission, and between the law and the Commission the reform will be put into effect and there will be little or no trouble experienced.

Mr. FLINT. Mr. President, I desire to have the Senate informed as to the conditions that confronted the conference committee and the objections that we saw in adopting the House provision.

I agree with the Senator from Colorado in another matter, that we should not place in the bill a provision for twelve hours for telegraph operators. We are legislating, in my opinion, in the bill for not more than 10 per cent of the railroad employees and not more than 10 per cent of the telegraph operators of the country; but after considering this matter in committee I favored the reporting of a bill limiting the hours to sixteen, for the reason that the railroad employees in the country desired it, and for the further reason that there were men being employed for a longer period and many accidents resulting therefrom; but it seems to me to be a wrong position for the Congress of the United States to go to the country with a statement that they believe that any railroad man should work sixteen hours in the operation of a train or that a telegraph operator should work twelve hours where he is charged with the movement of trains. I would favor a provision, if the labor could be had and conditions would warrant it, of fixing an eight-hour law instead of a twelve-hour law, as is provided in this bill; but I have reached the conclusion, after the hearing and after talking with the members of the Interstate Commerce Commission, that if we passed such a law it could not be complied with by railroad companies; and it would therefore be an idle thing and, in my opinion, result in more harm to those who favor an eight-hour law than any other act we could do, for if we passed an act requiring railroads not to permit operators to work for more than eight hours a day and the men could not be obtained, it would result in bringing upon the eight-hour advocates criticism that would result in injury.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield to the Senator from Oregon?

Mr. FLINT. Certainly.

Mr. PATTERSON. I wish to ask the Senator from California a question.

Mr. FULTON. The Senator yielded to me.

Mr. PATTERSON. Oh, I beg pardon.

Mr. FULTON. I understand from the Senator's remark that if the labor could be secured he would favor a prohibition against eighteen hours continuous employment.

Mr. FLINT. I state further that, if conditions would warrant it, I think there are some stations where the operators themselves would not want an eight-hour day. In some of the small country towns, where the train leaves early in the morning and there are no trains during the day until, say, 8 or 9 o'clock at night, where the operator acts as baggageman, as express messenger, as Western Union or Postal operator, and ticket agent, and attends to these matters and also acts as telegraph operator, he, the operator himself, would not want the work to be limited to eight hours, for the reason that during a large part of the day he would not be required to perform any duties—that is, between the time that the train left in the morning and returned at night—and yet would be on duty more than eight hours.

Mr. PATTERSON. May I ask the Senator from California a question?

Mr. FULTON. I have not yet asked my question. I only started to ask it and the Senator from California entered upon a further explanation.

The question I am intending to ask is simply in reference to that portion of the Senator's suggestion to the effect that sufficient labor can not be had. Is that due, in the Senator's judgment, to the fact that there are not enough skilled employees at the present time to be had, and that it would take more than one year to educate a sufficient number to supply the additions which would be required by this law?

If that be true, I ask the Senator if the objection would not be overcome by extending the time within which the law shall take effect? It is not perhaps important, I suggest, that the law shall take effect in a year or a year and a half from now. It is very important, however, that the principle shall be established that the men who are in charge of the operation of trains carrying passengers throughout the country shall be limited to reasonable hours. In the interest of the traveling public surely it is too long a time to require or to permit men who are sending dispatches in connection with the operation of the trains to be employed twelve hours. It endangers the lives of the people who are traveling every day that that is permitted.

Now, could not the provision be changed that requires this law to go into effect within one year so as to extend it to such time as the Senator thinks is necessary to educate a sufficient number of employees to fill these positions? We will then have the principle established and no doubt the men will be forthcoming to fill the places.

I wish to say that as to some of the amendments the conference committee have reported I think they are improvements. But here is the difficulty that I find myself placed in. I understand we can not amend the report. We must either accept the conference report or reject it. We can not, as I understand,

even instruct the conferees. If the report comes up as a whole, I shall have to vote against the adoption of it, because I believe that we should establish the principle here and now of prohibiting, as soon as the business of the country will not prevent such law taking effect, the employment of the people who are in these responsible positions for a longer period than, say, nine hours anyway. I think that is sufficient time.

Mr. PATTERSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from California yield to the Senator from Colorado?

Mr. PATTERSON. I wish to ask the Senator from Oregon as well as the Senator from California a question.

Mr. FLINT. I want to answer the inquiry of the Senator from Oregon, and then I will be through, if the Senator will permit me.

Mr. PATTERSON. Certainly.

Mr. FLINT. In my opinion there should not only be sufficient time to obtain the operators that will be found necessary under the increased number required by the bill, but there are certain instances where there should be exceptions made, as I have stated, in the small offices. I believe that it would be better not to pass at this session any bill in relation to the telegraph operators rather than to postpone it for a longer period, for the reason that if we do not pass any legislation on this subject at this session I would be in favor of the adoption of a resolution instructing the Interstate Commerce Commission to investigate the matter and make a full and complete report to the Congress of the United States as to whether a bill should be passed that contained the provisions of the House bill and what effect it would have on the railroad companies and the traveling public.

Mr. PATTERSON. Mr. President, speaking of the small offices, under the House provision the operators of the small offices are allowed to work for thirteen hours. So there is no trouble upon the score of the small and the unimportant offices.

Now, I want to ask the Senator from California whether, if the House amendment should be adopted and we add to that a proviso allowing the Interstate Commerce Commission to extend the operation of the act to certain railroads as application might be made by them for a reasonable time to enable them to secure the necessary operators, would not that immediately obviate all the difficulty which the Senator from California sees?

Mr. FLINT. Mr. Clark, of the Interstate Commerce Commission, stated that in his opinion a sufficient number of men could not be obtained.

Mr. PATTERSON. I suppose if Mr. Clark were asked to state how many would be necessary, of course he would say, "I can not tell," but if the law goes into effect and the different railway companies are given authority to apply to the Interstate Commerce Commission for relief from its immediate operation, then an investigation would be made and the Interstate Commerce Commission would readily determine for what length of time the law should be extended.

Mr. CARMACK. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Tennessee?

Mr. PATTERSON. Will the Senator from Tennessee permit me just a moment, and then I will yield.

Mr. CARMACK. Certainly.

Mr. PATTERSON. I want the Senate to understand the situation. The bill with the amendment that was put on the bill by the House is a bill that is entirely satisfactory to the railway employees of the country. Those are the provisions that they have urged the Senate to adopt. The House adopted those provisions by a very considerable majority. Those who changed those provisions must necessarily be the Senate conferees, and it is certainly in the power of this body to instruct the Senate conferees to adopt the House amendment and then allow the conferees of both Houses to make some such careful provision as I have suggested with reference to securing the requisite number of men.

Mr. FULTON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Colorado yield to the Senator from Oregon?

Mr. PATTERSON. With pleasure.

Mr. FULTON. Does the Senator from Colorado understand that it was held here a few days ago that a conference report can not be amended, nor can the conferees be instructed as to the character of the report they shall make? I may be mistaken, but that is as I recall it. I think the Senator from South Carolina [Mr. TILLMAN] recalls it.

Mr. TILLMAN. I think the rules themselves either specify or indicate that the instruction of conferees is not permissive except in the way that it has been done here by debate. The Senator will recall that on the rate bill, when we brought in the provision about free passes, while we were never instructed in express terms, we were lectured unmercifully here by everybody ad nauseam.

Mr. FULTON. I remember the occasion, and the Senator expresses exactly my understanding, that Senators may suggest on the floor what their ideas are and what they think should be done.

Mr. TILLMAN. And the Senate itself may make a suggestion, as they did on the vote on the pension agencies yesterday, by further insisting.

Mr. FULTON. Certainly.

Mr. TILLMAN. There are no definite instructions permissible, as I understand it.

Mr. FULTON. Further than that, I think no instruction can be given.

Mr. PATTERSON. The matter can be readily reached if the Senate thinks it should be reached. There is no trouble about that.

Mr. TILLMAN. No; by a vote.

Mr. PATTERSON. It seems to me there is no trouble in the way of putting this law into just and proper form and embracing in it such recent provisions as by common consent the law should contain.

### IMMIGRATION STATION AT CHARLESTON, S. C.

Mr. TILLMAN. I ask the Chair to lay before the Senate the bill which has come from the House providing for the establishment of an immigration station at Charleston.

The bill (H. R. 25719) to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building, was read the first time by its title and the second time at length, as follows:

*Be it enacted, etc.*, That the Secretary of the Department of Commerce and Labor be, and he is hereby, authorized and directed to establish an immigration station at the city of Charleston, in the State of South Carolina, and to cause to be erected, on a site to be selected, a public building to temporarily accommodate and care for immigrants arriving at said city: *Provided*, That the land and dock room necessary for said station and building be transferred to the Government of the United States free of any cost to the United States.

SEC. 2. That the sum of $70,000 is hereby appropriated for the erection of said building, which sum shall be paid from the immigrant fund, said sum to include heating and ventilating apparatus, elevators, and approaches.

Mr. TILLMAN. I ask that the bill be put on its passage.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

Mr. TILLMAN. I move that the bill (S. 8565) to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection of a public building in said city, on a site to be selected for said station, be indefinitely postponed.

The motion was agreed to.

### TERMS OF COURT AT DAYTON, OHIO.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 25889) to provide for sittings of the United States circuit and district courts of the southern district of Ohio at the city of Dayton, in said district; which was read the first time by its title and the second time at length, as follows:

*Be it enacted, etc.*, That from and after the passage of this act there shall be held at the city of Dayton, in the southern district of Ohio, a term of both the circuit and district courts of said district on the first Monday in May and November of each year.

SEC. 2. Grand and petit jurors summoned for service at such terms of either of the courts aforesaid may be residents of any part of the said southern district of Ohio.

SEC. 3. Prosecutions for crimes or offenses hereafter committed in any part of the said district shall be cognizable at the terms aforesaid of either of the said courts having jurisdiction thereof.

SEC. 4. All suits which, under existing law, may be brought within the said southern district, or any division thereof, may be instituted, prosecuted, tried, and determined at the said terms of court so to be held in the said city of Dayton.

SEC. 5. Any judge of the United States holding court in the southern district of Ohio in pursuance of existing laws may transfer any suit now pending in the court wherein he shall be so, as aforesaid, sitting to the next term of the circuit or district court, as the case may be, whichever shall have jurisdiction of the same next to be held at the said city of Dayton in accordance with the terms of this act.

SEC. 6. All acts or parts of acts inconsistent with the provisions of this act are hereby repealed to the extent of such inconsistency, but not otherwise.

Mr. FORAKER. I ask unanimous consent for the present consideration of that bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### OX BOW POWER COMPANY OF SOUTH DAKOTA.

Mr. CARTER. I ask unanimous consent for the present consideration of the bill (H. R. 25672) to amend an act entitled

"An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River."

Mr. FLINT. I wish to give notice that I shall not give consent for the consideration of any bill after this one has been acted upon. I am quite anxious that the pending conference report should be disposed of.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. McCREARY. I offer an amendment to the bill, which I send to the desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Kentucky will be stated.

The SECRETARY. In line 9, before the word "years," it is proposed to strike out "six" and insert "three;" so as to make the bill read:

*Be it enacted, etc.*, That section 2 of chapter 1821 of the laws of 1894, approved April 28, 1904, is hereby amended to read as follows:

"SEC. 2. That this act shall be null and void unless the structures herein authorized shall be commenced within one year and completed within three years from the date of approval thereof."

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

### HOURS OF LABOR OF RAILROAD EMPLOYEES.

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. NEWLANDS. Mr. President, I have put in form the motion which I have prepared regarding the telegraph operators, to which I have previously referred in my remarks.

The VICE-PRESIDENT. The motion submitted by the Senator will be read.

The Secretary read as follows:

Mr. NEWLANDS moves to instruct the Senate conferees to accept the House proviso to section 2, striking out the following words at the end of such proviso: "On not exceeding three consecutive days in any week;" so that it will read as follows:

"*Provided*, That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four-hour period.

Mr. NEWLANDS. I ask action on that motion if the discussion is ended.

The VICE-PRESIDENT. In the opinion of the Chair, the motion is not in order under the rules of the Senate.

Mr. NEWLANDS. Will the president of the Senate listen to a suggestion regarding that?

The VICE-PRESIDENT. The Chair will hear the Senator from Nevada.

Mr. NEWLANDS. Mr. President, this is a disagreement between the Senate and the House of Representatives. It is regarding the House bill which was presented as an amendment in the nature of a substitute for the Senate bill. The House of Representatives, as I understand, adheres to its amendment, and this is simply an instruction to the conferees on the part of the Senate to withdraw their disagreement as to that particular proviso.

The VICE-PRESIDENT. The only question before the Senate is on agreeing to the conference report.

Mr. TILLMAN. Or disagreeing to it, Mr. President.

Mr. NEWLANDS. Or disagreeing to it.

The VICE-PRESIDENT. The motion of the Senator from Nevada is not in order. It is in contravention of the uniform practice of the Senate. The question is on agreeing to the report of the conference committee. [Putting the question.] By the sound the "noes" appear to have it.

Mr. FLINT. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BERRY (when his name was called). On this question I am paired with the Senator from Maine [Mr. FRYE]. If he were present, he would vote "yea," and I should vote "nay."

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. MARTIN], but I transfer that pair to the junior Senator from Iowa [Mr. DOLLIVER] and vote. I vote "nay."

Mr. McCUMBER (when his name was called). I have a general pair with the junior Senator from Louisiana [Mr. FOSTER]. That Senator being absent, and not knowing what his vote would be upon this question if he were present, I withhold my vote.

The roll call was concluded.

Mr. DUBOIS. I am requested by the junior Senator from Wisconsin [Mr. LA FOLLETTE] to announce that if he were present he would vote "nay." He is absent on account of illness.

Mr. BRANDEGEE. I wish to announce that my colleague [Mr. BULKELEY] has been called from the Chamber and that he is paired with the Senator from Mississippi [Mr. MONEY].

Mr. WARREN. I have a general pair with the Senator from Mississippi [Mr. MONEY]; but that pair has been transferred, as I understand, to the Senator from Connecticut [Mr. BULKELEY]. I am therefore at liberty to vote. I vote "nay."

The result was announced—yeas 22, nays 38, as follows:

YEAS—22.

| | | | |
|---|---|---|---|
| Allee | Crane | Gallinger | Long |
| Ankeny | Curtis | Hemenway | Perkins |
| Brandegee | Dick | Heyburn | Proctor |
| Burnham | Dillingham | Kean | Spooner |
| Carter | Flint | Kittredge | |
| Clark, Mont. | Foraker | Knox | |

NAYS—38.

| | | | |
|---|---|---|---|
| Bacon | Fulton | Nixon | Sutherland |
| Blackburn | Gamble | Overman | Taliaferro |
| Burkett | Hansbrough | Patterson | Teller |
| Burrows | Hopkins | Pettus | Tillman |
| Carmack | Latimer | Piles | Warner |
| Clay | Lodge | Rayner | Warren |
| Cullom | McLaurin | Scott | Wetmore |
| Daniel | Mallory | Simmons | Whyte |
| Dubois | Mulkey | Smith | |
| Frazier | Newlands | Smoot | |

NOT VOTING—30.

| | | | |
|---|---|---|---|
| Aldrich | Clarke, Ark. | Frye | Money |
| Allison | Culberson | Hale | Morgan |
| Bailey | Depew | La Follette | Nelson |
| Berry | Dolliver | McCreary | Penrose |
| Beveridge | Dryden | McCumber | Platt |
| Bulkeley | Du Pont | McEnery | Stone |
| Clapp | Elkins | Martin | |
| Clark, Wyo. | Foster | Millard | |

So the conference report was rejected.

Mr. FLINT. Mr. President, I move that the Senate further insist on its disagreement to the amendments of the House of Representatives and ask for a further conference with the House thereon, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed as conferees on the part of the Senate Mr. PENROSE, Mr. FLINT, and Mr. DANIEL.

### THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. GALLINGER. Mr. President, I ask now that my motion shall be put to concur in the amendment of the House of Representatives to the so-called "shipping bill."

The VICE-PRESIDENT. The question is on the motion of the Senator from New Hampshire to concur in the House amendment.

Mr. CARMACK. Mr. President, I regret very much——

Mr. SCOTT. Mr. President, will the Senator from Tennessee, before he begins his remarks, yield to me for a moment?

Mr. CARMACK. Mr. President, as anxious as I am to hasten the consideration of this measure, I will yield to the Senator from West Virginia. [Laughter.]

### ISABEL T. BORTHWICK.

Mr. SCOTT. I ask unanimous consent for the present consideration of the bill (H. R. 3208) granting a pension to Isabel T. Borthwick.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Isabel Tait Borthwick, widow of John L. D. Borthwick, late chief engineer of the United States Navy, retired, and to pay her a pension of $30 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### JICARILLA INDIAN RESERVATION.

Mr. CURTIS submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23650) to quiet title to lands on the Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to

be made and to dispose of the merchantable timber, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment to section three.

That the House recede from its disagreement to the amendments of the Senate to sections one and two, and agree to the same.

MOSES E. CLAPP,
CHARLES CURTIS,
H. M. TELLER,
*Conferees on the part of the Senate.*

THOMAS F. MARSHALL,
CHAS. H. BURKE,
WM. T. ZENOR,
*Managers on the part of the House.*

The report was agreed to.

B. H. M'CALLA.

Mr. CULLOM. I ask the Senator from Tennessee to yield to me to secure the passage of a joint resolution.

Mr. CARMACK. I never could resist the Senator from Illinois, and I will yield to him.

Mr. CULLOM. I am directed by the Committee on Foreign Relations, to whom was referred the joint resolution (S. R. 98) granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany, to report it without amendment. I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution. It grants permission to Rear-Admiral B. H. McCalla, United States Navy, to accept the China war medal, with Pekin clasp, tendered to him by the King of Great Britain, and the Order of the Red Eagle, with swords, tendered to him by the Emperor of Germany.

Mr. CULLOM. I understand that Admiral McCalla is in very poor health and is anxious that this joint resolution shall be passed. I ask that it be acted upon immediately.

Mr. CARMACK. I do not want to delay the matter, but I should like the Senator to explain what is the Order of the Red Eagle? [Laughter.]

Mr. CULLOM. I do not know.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

UNCONSTITUTIONALITY OF LIQUOR LICENSES.

Mr. GALLINGER. I present a decision in full of Judge Samuel R. Artman, of Indiana, concerning the unconstitutionality of liquor licenses. I move that the decision be printed as a document.

The motion was agreed to.

HAROLD D. CHILDS.

Mr. DILLINGHAM. I ask unanimous consent for the present consideration of the bill (S. 8230) for the relief of Harold D. Childs.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes the President to nominate and, by and with the advice and consent of the Senate, to appoint Harold D. Childs, late midshipman, an ensign in the United States Navy, and to place him upon the retired list as such with three-fourths the pay of his grade.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MINNIE C. O'CONNOR.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (H. R. 12623) granting a pension to Minnie C. O'Connor, to report it without amendment, and I submit a report thereon. I ask for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Minnie C. O'Connor, dependent mother of John H. Reagin, late private, Hospital Corps, United States Army, and to pay her a pension of $12 per month.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

LOLA B. HENDERSHOTT AND LOUISE HENDERSHOTT.

Mr. McCUMBER. I am directed by the Committee on Pensions, to whom was referred the bill (S. 7845) granting a pension to Lola B. Hendershott and Louise Hendershott, to report it without amendment, and I submit a report thereon. I ask for the present consideration of the bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the names of Lola B. Hendershott and Louise Hendershott, children of the late Maj. Henry B. Hendershott, retired, and to pay each of said children a pension of $12 per month.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

SCHOOL LANDS IN OKLAHOMA.

Mr. LONG. I ask unanimous consent for the present consideration of the bill (H. R. 24655) to authorize the legislature of Oklahoma to dispose of a certain section of school land.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes the legislature of Oklahoma, when the State of Oklahoma shall have been admitted, to grant section 16 in township 14 north of range 4 east of the Indian meridian, Lincoln County, Okla., to the board of education of the city of Chandler, in that county, for school purposes upon such terms as the legislature may impose.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CLIMATIC PROVINCES OF ALASKA.

Mr. PILES. I present certain matter relative to the climatic provinces of Alaska. I ask that it be printed as a document, including the map.

The motion was agreed to.

FRANK J. LADNER.

Mr. McLAURIN. I ask unanimous consent for the present consideration of the bill (H. R. 20490) for the relief of Frank J. Ladner.

Mr. GALLINGER. I desire to say that I will not object to the request of the Senator from Mississippi in reference to this bill, but after it is disposed of I shall insist on the regular order.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It authorizes Frank J. Ladner to enter, at the minimum price of $1.25 per acre, in virtue of his and his assignor's long settlement and valuable improvements thereon, the following-described lands, to wit: Section 13, in township 8 south, range 14 west of the St. Stevens meridian, in the State of Mississippi, being the lands shown on the plat of official survey approved December 9, 1829, as the private land claim of John B. Lardner, containing an area of 640 acres, more or less, located in Hancock County, in that State, and upon payment of that sum a patent shall issue in favor of Frank J. Ladner.

Mr. McLAURIN. There is no amendment to the bill. It is to allow Frank J. Ladner to pay a dollar and a quarter an acre for 640 acres of land which he and his ancestors have occupied since 1829. There was some controversy about the title between the Government and the claimant, and he asks to be allowed to pay a dollar and a quarter an acre for this land in Mississippi.

Mr. GALLINGER. I think if the Senator does not debate the bill, it will pass.

Mr. McLAURIN. Very well.

Mr. CARMACK. I was going to ask if this land is on the Tombigbee River? [Laughter.]

Mr. McLAURIN. No, sir; it does lie on the Tombigbee River, but all the land in Mississippi is good.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CHANGES IN DISTRICT STREET RAILWAY TRACKS.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 6147) authorizing changes in certain street railway tracks within the District of Columbia, and for other purposes.

Mr. GALLINGER. The amendment need not be read. I move that the bill be referred to the Committee on the District of Columbia.

The motion was agreed to.

NEOLINE H. ASH.

Mr. SCOTT. Will the Senator from Tennessee yield that I may call up two very small bills?

Mr. CARMACK. I hope when I retire from this Chamber it will be with the reputation of always having been a courteous and obliging Senator. I yield to the Senator from West Virginia.

Mr. SCOTT. I ask unanimous consent for the present consideration of Senate bill 6175.

Mr. GALLINGER. The Senate is waiting with unusual interest and expectancy to hear a speech from the Senator from Tennessee on the shipping bill. Some of us have been given notice that under no circumstances should we absent ourselves from the Chamber when that speech is delivered. I believe the Senator proposes to call me by name in his speech. I want to be here to listen to it. This matter of unanimous consent can not go on much longer. We have to take up the serious question that is before the Senate. But I will yield to the Senator from West Virginia if these are pension bills.

Mr. SCOTT. They are pension bills.

Mr. GALLINGER. Thereafter we must proceed with the regular business.

Mr. SCOTT. I ask unanimous consent for the present consideration of the bill (S. 6175) granting an increase of pension to Neoline H. Ash.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Pensions with an amendment, in line 9, before the word "month," to strike out the article "a" and insert "per;" so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Neoline H. Ash, widow of Howard P. Ash, late paymaster, United States Navy, and pay her a pension at the rate of $35 per month in lieu of that she is now receiving, and $2 per month additional on account of each of the minor children of said Howard P. Ash until they reach the age of 16 years.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EDITH BURT TROUT.

Mr. SCOTT. I ask unanimous consent for the present consideration of the bill (S. 1796) granting an increase of pension to Edith Burt Trout.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to place on the pension roll the name of Edith Burt Trout, widow of Harry G. Trout, late captain, Second Regiment United States Cavalry, and to pay her a pension at the rate of $30 per month in lieu of that she is now receiving.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed the bill (S. 6249) to provide for the establishment of an agricultural bank in the Philippine Islands, with amendments; in which it requested the concurrence of the Senate.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 17415) to authorize the assignees of coal-land laws locations to make entry under the coal-land laws applicable to Alaska; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LACEY, Mr. MONDELL, and Mr. BURNETT managers at the conference on the part of the House.

The message further announced that the House had passed the following bill and joint resolution; in which it requested the concurrence of the Senate:

H. R. 16235. An act authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.; and

H. J. Res. 253. Joint resolution relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (S. 6704) to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905; and it was thereupon signed by the Vice-President.

AGRICULTURAL BANK IN THE PHILIPPINE ISLANDS.

Mr. LODGE. I ask the Chair to lay before the Senate the action of the House of Representatives on the Philippine agricultural bank bill.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 6249) to provide for the establishment of an agricultural bank in the Philippine Islands, which were, on page 2, line 13, before the word "hundred," to strike out "four" and insert "two;" and on page 3, section 2, line 9, after the word "upon," to insert "and be paid out of."

Mr. LODGE. I move that the Senate concur in the amendments of the House of Representatives.

Mr. CULBERSON. I wish to ask the Senator what the amendments relate to?

Mr. LODGE. The first amendment reduces from four hundred to two hundred thousand dollars "the total annual contingent liability under the guaranties authorized by this act at any time." The other amendment simply strengthens the security of the Government investment.

The amendments were concurred in.

THE MERCHANT MARINE.

Mr. GALLINGER. I ask for the regular order, Mr. President.

The VICE-PRESIDENT. The regular order is demanded. The question is on agreeing to the motion of the Senator from New Hampshire that the Senate concur in the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. CARMACK. Mr. President, I regret very much if I seem to belittle the discussion of a question of so much importance by introducing something that savors of a personal issue, if not of a personal quarrel. I had hoped to retire from this Chamber cherishing no unkind feeling of my own toward any Senator and with no Senator on either side of the Chamber having such a feeling toward me. The Senator from New Hampshire [Mr. GALLINGER] indulged in some remarks so personal in their nature that if I had not arrived at that time of life when the heyday in the blood is tamed, I might have forced it to a personal issue. I am glad for the first time in my life that I have arrived at an age when the impulses are restrained by the judgment, and when the hot blood and the ferocious impulses of my youth are under proper control.

The Senator from New Hampshire, whom I would love to call, as I used to do, my good friend from New Hampshire—he probably would not permit me to do that now—saw fit to describe certain parliamentary movements of myself and other Senators upon this floor as filibustering and those of us who engaged in that movement as filibusters. I was so shocked and stunned by the Senator's characterization that I lost, for the time being, my presence of mind, and the debate had proceeded too far before I could call him to order. The uniform courtesy, and, I may say, the punctilious regard for the rules of the Senate and for the general rules of politeness and courtesy and demeanor which have always characterized the Senator from New Hampshire, as well as the pleasant personal relations that have always existed between him and me, added to the shock of my astonishment when I found myself characterized by a term so outrageous and offensive—I will not say insulting, because I believe that would be a violation of the rules perhaps as gross as that committed by the Senator from New Hampshire.

Webster's Dictionary is regarded the world over as a standard authority, at least so far as the definition of words is concerned. Yet I remember that Thomas Carlyle once treated Daniel Webster with great gruffness and afterwards explained his conduct by saying that he mistook him for Noah Webster, the man who had written a dictionary and nearly ruined the English language.

Upon this point, while it is not directly and immediately involved in this debate, I wish to say that a man who labored to make his own style of composition appear like a literal translation from the German is himself no good judge of good English; and besides, Mr. Carlyle probably had reference to matters of orthography and derivation rather than to the definition of words. So far as definition is concerned I boldly maintain that Webster is still a standard authority, though I say this with no disrespect to Worcester, to the compilers of the Century Dictionary, or to any other modern lexicographical work or even to Doctor Johnson himself.

I do not believe that the Senator from New Hampshire, who is an erudite and accomplished scholar as well as a fair-minded Senator, a college graduate—at least he bears all the outward appearances, both in his looks and in his manner and in his conversation, of being a college graduate—will dispute this proposition with me. If he does, I am abundantly supplied with authorities to support my contention. The work to which I refer is available to every Senator, and if its authenticity is disputed I can easily bring it to the Senate and have it read from the desk, so that every Senator may judge for himself whether or not I am supported by competent authority.

Accepting Webster, therefore, as a standard authority, at least so far as definitions are concerned, because matters of orthography and derivation are not important to the phase of the question to which I am now addressing myself, I find that the word "filibuster" is thus defined in that great and monumental work which has maintained its authority against all captious criticism and all the later researches and studies and investigations of the most learned philologists. He does not spell it as I thought it ought to be spelled. [Laughter.] But, as I said in the beginning, I do not insist that Webster is an authority in that matter.

"Filibuster," with one "l;" "a lawless, military adventurer, especially one in quest of plunder; a freebooter."

That is what the advocates of this bill say about the people who oppose it.

"A lawless, military adventurer, especially one in quest of plunder; a freebooter."

This great work also tells us that the word was originally applied to the buccaneers infesting the Spanish main; and while it has had various local and occasional applications to bands of marauders and lawless adventurers, it appears that in each case it retained some of the substantial force of its original meaning.

The Senator from New Hampshire therefore has seen fit to characterize other Senators who have served with him amicably in this body, many of them like myself on terms of personal friendship with that Senator, men who have never been guilty of any act, so far as I know, that could be regarded as personally offensive to the Senator from New Hampshire, who have always demeaned themselves properly and courteously in their conduct toward him and in their relations with him, both as a Senator and in their social relations—he has seen fit to characterize them as plunderers and freebooters.

Mr. President, I think we all know what a freebooter is. It means one who is in quest of free booty. The derivation of the word shows that that is its meaning, and while I have not contended that Webster was an authority upon derivation, I think any other dictionary will bear out what Webster has to say upon that point.

The same authority I have quoted and upon which I shall rely throughout this debate defines it as a "pillager, a buccaneer." Going to the same high authority for the word "buccaneer," we find that it means "a robber upon the sea;" a filibusterer, a robber upon the sea. I could prosecute these definitions further, but I do not wish to take up the time of the Senate. [Laughter.]

I simply wish to call attention to the fact that we who are opposing this measure are charged by the great Senator from New Hampshire with being buccaneers and sea robbers, and in spite of the pleasant relations that have existed between the Senator from New Hampshire and myself, without having ever spoken a word either in debate or in private conversation, in his presence or behind his back, which, if conveyed to him, could have given the Senator from New Hampshire the slightest offense, I must go back home to private life branded by a man whom I have regarded as my friend, a man who has never received anything but kindness at my hands, a man of whom I have never spoken aught except a kindly word, as a plunderer, a marauder, a pillager, a buccaneer, a sea robber, and a pirate. [Laughter.]

Mr. President, in my career in politics I have been accused of almost everything except appendicitis, I believe [laughter], but it remained for the Senator from New Hampshire to take me from my inland home and launch me as a buccaneer and a pirate upon the sea. [Laughter.] That is the accusation which I must bear when I go back among my people.

And, Mr. President, I can not undertake to refute this accusation or to break its force by discrediting the character of the man who has made it. I can not go back to my people and say that this man from New Hampshire is a man of no character, a man of no standing, a fellow of no marked likelihood, a man whose word carries no weight, whose character gives no force to any accusation he may make against the character of another man. I can not say that truthfully, and therefore I can not say it at all. [Laughter.] I am bound to go back to my people and admit that I have suffered these accusations at the hands of a man who stands high in the Senate of the United States, a man of high character, a man of truth, an accomplished gentleman, a man of ability and of standing, and that is what I must bear from the Senator from New Hampshire.

But, Mr. President, however the Senator from New Hampshire may feel toward me and whatever he may say about me, I will not permit it to change the feelings that I have for him. I shall not forget the personal associations of the past. I shall not forget the many kindnesses I received at his hands. I am magnanimous enough to forget these false and outrageous accusations in the memory of the courtesies and kindnesses I have received from the Senator in other days.

Yet, Mr. President, while the tu quoque is not regarded as an argument of the highest value—I will not pause here to translate those words to the Senate; I do not wish to take up the time; the Senator from New Hampshire himself, who is an accomplished Senator, can explain to any of you in private the meaning of the term I have employed—I say while the tu quoque is never regarded as an argument of great force and value, I can not refrain from saying that if filibuster means sea robber, the interests that are behind this bill are the greatest filibusters the country and the Congress have ever seen.

For many years there has been what I think I may truly describe as a conspiracy against the Treasury on the part of a number of bands of shipowning adventurers, and the methods they have employed have caused them to deserve the name of political or legislative freebooters. They have been doing or trying to do their robbery upon the sea, which brings them exactly within the definition of the term filibuster; that is to say, if I have established to the satisfaction of the Senate that Webster's Dictionary is an authority in the matter of the definition of words. I see that I must hurry along. [Laughter.] Time stays for no man.

Way back in 1876 the Judiciary Committee of the House investigated a charge involving the use of enormous sums of money to promote the passage of a ship-subsidy bill. How much earlier than that it had begun I do not know. But the RECORD discloses that at least as far back as 1876 this conspiracy had begun to loot the Treasury of the United States, and they were spending enormous sums of money to accomplish that purpose.

An investigation was had in the House of Representatives. I think it was had by the Judiciary Committee. It may have been, however, by some other committee. The particular committee that conducted the investigation, however, is a matter of no special importance. It was conducted by a committee of the House of Representatives duly authorized and charged by the House of Representatives with the duty of conducting an investigation into the truth or falsity of the charge which had been made that vast sums of money had been expended by certain interested parties, capitalists in New York, New England, and elsewhere, for the purpose of bringing about the passage of a ship-subsidy bill.

Mr. DUBOIS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Idaho?

Mr. CARMACK. I yield to my friend from Idaho.

Mr. DUBOIS. In the line of the Senator's argument, if it will not disturb him, as I think it directly in point, I should like to read an extract from a very valuable book which I have here.

Mr. CARMACK. I am glad to yield to the Senator for that purpose.

Mr. SPOONER. In view of the desire of the Senator from Tennessee to finish, I hope the Senator from Idaho will not interrupt him.

Mr. DUBOIS. I will not, unless it is entirely agreeable to the Senator from Tennessee, but it seems to me that what I shall read is very apt at this stage of the Senator's remarks.

Mr. CARMACK. Any interruptions the Senator from Idaho makes are always apt and pertinent, and they serve always to illustrate the subject under discussion and to illuminate it and add to the information of the Senate upon the subject under discussion. I would not yield, fond as I am of the Senator personally, but I know that the interruption that he has in store will add to the value of the argument I am trying to make, and I am very glad to have it incorporated in the body of my remarks. [Laughter.] I believe, Mr. President, that any contribution that I can get from the Senator from Idaho will be a much more valuable part of my speech than any I can make myself. I cheerfully yield to the Senator from Idaho.

Mr. SPOONER. I suppose the Senator has no idea whatever of what the interruption will be.

Mr. CARMACK. None in the world.

Mr. TILLMAN. Except the word of the Senator from Idaho.

Mr. CARMACK. I simply yield to the Senator to make the interruption.

Mr. DUBOIS. I am quite sure after I read this little passage the Senate will insist, if necessary, that I shall read a great many passages from this same work. Here are some of the popular arguments for subsidy just in line with the Senator's statement now:

POPULAR ARGUMENTS FOR SUBSIDY.

*Introductory.*—The practical statesman troubles himself little about pure economic theory. He would scarcely understand Professor Mar-

shall's treatment, purporting to show the possible economic benefit of bounties. From the standpoint of practical politics it is not worth while to discuss a scheme for bounties which is based on mathematics higher than simple arithmetic. The chances that Professor Marshall's graphic representations will ever be made a plank in a political platform declaring for a bounty system are exceedingly slight. It would be difficult to arouse great enthusiasm among the farmers for a scheme proposing to lay upon agriculture the burden of all taxation, including a nice sum to be paid to the manufacturers as a bounty. We may rest assured that the graphic method will never be used to open the pockets of the taxpayers. The mathematics used to demonstrate the necessity for a bounty to shipping is of a much simpler sort. For example, it is said that England gave subsidies, and her commerce and shipping increased. More recently Germany gave subsidies, and since then her commerce and shipping have increased. Ergo, subsidies are beneficial, and if we would not be left behind we must give subsidies. By the same sort of mental process, which is sometimes called reasoning, the simple-minded savage persuades himself that comets and shooting stars exercise a baneful influence over the affairs of men. The statistics of commerce and merchant tonnage, which are used so freely to show the necessity for voting a subsidy, are entirely devoid of significance, and the childish confidence of some of our oldest politicians in these meaningless columns of figures is discouraging.

Mr. CARMACK. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Tennessee?

Mr. DUBOIS. Certainly.

Mr. CARMACK. Will the Senator read the last paragraph again? [Laughter.]

Mr. DUBOIS. I will do so. It is very important and answers a great many of the arguments. I will read it again with great pleasure:

The statistics of commerce and merchant tonnage, which are used so freely to show the necessity for voting a subsidy, are entirely devoid of significance, and the childish confidence of some of our oldest politicians in these meaningless columns of figures is discouraging. The statistics of the commerce and shipping of France, Italy, and Austria, quoted by the opposition to show the harmfulness of bounties, are by no means so worthless, for they show that, at least in some cases, bounties do not lead to an expansion in commerce and shipping. But to conclude that a bounty to shipping in the United States would act like a bounty to shipping in France is the reverse of reasonable. It is quite probable that this country would increase its shipping by means of bounties; but, as has been repeatedly pointed out, the enlarging of an industry by government aid does not mean an economic gain, much less an ethical gain.

Although the popular arguments for bounties are based on meaningless statistics, and are rather oratorical than logical, it seems necessary to consider some of the assertions most frequently made and most likely to mislead.

I thank the Senator from Tennessee. I will not interrupt him again unless with some such pertinent quotation as I have read.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from New Hampshire?

Mr. CARMACK. With pleasure.

Mr. GALLINGER. In view of the criticism, unwarranted as I think, that the Senator has made upon me, I desire to ask him at this point if he is familiar with the publication known as the "Century Dictionary," or have his investigations only led him to consult Webster's Dictionary, which is rather an old-fashioned publication along lexicographic lines?

Mr. CARMACK. I know it is the fashion in these frivolous days to sneer at old-fashioned things. I confess that so far as I am concerned I am different from the Senator from New Hampshire. I do not dislike the Constitution because it happens to be something old. I do not dislike the old traditions of the Republic because they have been handed down to us for many years. I do not dislike the Senator from New Hampshire because he is—— [Laughter.]

Mr. GALLINGER. Well, Mr. President——

Mr. CARMACK. I will yield to the Senator from New Hampshire to read any part of the Century Dictionary he chooses to bring before the Senate.

Mr. GALLINGER. I join with every Senator on both sides of the Chamber in the expression of profound regret that the Senator from Tennessee is to leave this body, and I am very anxious that when he leaves it he shall leave it with kind and considerate feelings toward his fellow-members.

Now, Mr. President, the only defense that I shall make is to read a definition from the Century Dictionary, which is a well-established work on this matter of lexicography, and which, I think, will be a sufficient defense of the word "filibuster"—spelled with one "l," which is the proper way, I will say to the Senator from Tennessee.

Mr. CARMACK. That is not the way we spell it in Tennessee.

Mr. GALLINGER. The word has this definition:

To obstruct legislation by undue use of the technicalities of parliamentary law or privileges, as when the minority in a legislative assembly—

Exactly what is going on here—

in order to prevent the passage of some measure obnoxious to them, endeavor to consume time or tire out their opponents by useless motions, speeches, objections, etc.

Then follows a quotation from Merriam:

The Democrats—

Just what is going on here now, you will observe—

The Democrats filibustered and postponed the vote till a day when strength could be fairly measured on it.

Now, Mr. President, I submit to the Senator that had his investigations extended a little further, and had he consulted more recent lexicographers than Webster, he would not have made the attack upon me that he has made; and as a justification for the characterization that I gave the other side of the Chamber yesterday I simply call attention to the Century Dictionary definition and to what is going on this morning.

Mr. TILLMAN. Will the Senator from Tennessee allow me?

Mr. CARMACK. In a moment.

Mr. President, the last quotation the Senator read with reference to Democrats impeaches the authority he brings before the Senate. It shows very plainly that it is a Republican dictionary. [Laughter.] I am surprised at the Senator from New Hampshire obtruding a partisan dictionary in a debate of this character. The dictionary to which I refer was compiled before the Republican party was born. It could not, therefore, have made these definitions with any view to any partisan purpose or to casting any reflection whatever upon the Republican party. That is obviously not true of the dictionary which the Senator from New Hampshire has brought into this body.

It is true, Mr. President, that my favorite dictionary, Webster, does give something like that as a part of this definition, but it says that this usage of the word is vulgar, and I would not for one moment suppose that a classical scholar like the Senator from New Hampshire would have used a word in this Chamber in its vulgar sense. [Laughter.]

The manifest purpose of the Senator from New Hampshire in bringing his Century Dictionary into this Chamber was to distract the attention of the Senate from the very pertinent matter read by the Senator from Idaho. [Laughter.] He was attempting to break the force of it, to divert the minds of the Senate and the minds of the people from an argument which the Senator could not answer.

I bring him back to it now, and I openly challenge him—if that be a proper term to be used here—to answer the argument presented by the Senator from Idaho; and I pause for a reply. [Laughter.] It looks to me, Mr. President, a good deal like the Senator from New Hampshire is trying to consume time with frivolous matters. [Laughter.] That comes within the definition of filibustering, even in its vulgar sense.

Mr. TILLMAN. If the Senator will permit me, while he is looking for something there, I want to take up the cudgels in behalf of Webster, not as a Democrat, but on this ground: The other day I heard a word used in the Senate of which I was in some doubt as to whether it existed or not. I have been rather a promiscuous reader, and I am pretty familiar with ordinary words that we meet in reading and hear in debate. I went to the Century Dictionary and could not find it. I went to the Standard and could not find it. I went to my old friend, Noah Webster—which, by the way, I think is revised and kept up to date by a very able body of scholars—and I found it there. It reminded me of the old blue book days when I used to learn how to spell in Webster.

Mr. CARMACK. It is very plain that the Senator from New Hampshire was trying to get away from the question here by getting up a debate about dictionaries. [Laughter.] I am trying, Mr. President, to express myself with as little feeling as possible in these matters, but I refer to the fact that as long ago as 1876—how many years before that it had begun I do not know—there was in full blast a conspiracy to extort money from the Treasury of the United States in the way of subsidies for steamships, a proposition to revive our merchant marine by taxing the people of the United States to pay the cost of building ships and whatever loss might be incurred in their operation, and that vast sums of money were used to promote the passage of a bill of that character through the Congress of the United States. The matter became flagrant, got into the newspapers, charges floated about from one end of the country to the other, accusations more or less specific were made, until they reached the dignity that required attention on the part of the Congress of the United States and a resolution was introduced in the House. I do not now recall who was the author of the resolution. He was a Member of the House, of course. He introduced a resolution calling for an investigation into the acceptance of this money, trying to find out who spent the money, for what purposes it was spent, and, if possible, the amount of money that had been spent to promote the passage of a bill which was then or had lately been pending, and which proposed to subsidize steamships by payments from the Treasury of the United States out of the taxes of the American people.

I say taxes because I am one of that class who believe that a tariff is a tax as much as any other kind of tax. That committee proceeded with its investigation, and Mr. Lord, from the Committee on Ways and Means, submitted a report in August, 1876.

Mr. McLAURIN. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Mississippi?

Mr. CARMACK. Certainly.

Mr. McLAURIN. From what document is the Senator reading?

Mr. CARMACK. I am reading from the CONGRESSIONAL RECORD.

Mr. McLAURIN. For what year?

Mr. CARMACK. The present year; but this is a quotation, I will say to my friend from Mississippi, which appears in a speech made elsewhere. Perhaps under the rules of the Senate I can not state exactly where that speech was made. I am not very familiar with the rules of the Senate, and I am always in a fear and trembling lest I should trespass upon them; but it is quoted in a speech made elsewhere only a few days ago, setting forth at length this report made by the Ways and Means Committee in 1876. The Senator will find it in the CONGRESSIONAL RECORD of February 26, under the heading "Subsidy bill," near the end of the second column on page 4083 and extending over to about the middle of the first column on page 4084.

This report goes on to say:

That the Committee on Ways and Means of the Forty-third Congress, after a thorough investigation of the charge that a large sum of money was used to secure the passage through Congress of an increased annual appropriation—

They already had some, but it was not enough. It simply whetted their appetites for more. That has been the way with these ship-subsidy grabbers from the beginning. They have been, like Oliver Twist, calling for more, more.

Mr. OVERMAN. May I ask the Senator a question?

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. CARMACK. Certainly.

Mr. OVERMAN. I noticed that the bill that passed the Senate introduced by the Senator from New Hampshire called it a subvention. Now you call it a subsidy. What is the difference between a subvention and a subsidy?

Mr. CARMACK. Well, Mr. President, a subsidy by any other name smells just as bad. The word "subsidy" has become so odious to the American people that its advocates have been trying to find a new word that they propose to use until that becomes as odious as the other; and I suppose that is why so many dictionaries are being brought out.

Mr. OVERMAN. Subvention means coming from under. I suppose they want to come from under the subsidy in order to get a new word.

Mr. CARMACK. Yes; the Republican party has to invent so many names for all these different plans of getting the money of the people out of the Treasury that it makes it necessary to have new dictionaries to supplant the old ones. I begin again:

That the Committee on Ways and Means of the Forty-third Congress, after a thorough investigation of the charge that a large sum of money was used to secure the passage through Congress of an increased annual appropriation to the Pacific Mail Steamship Company in the nature of a subsidy, report, among other things—

To show the Senate how unwilling I am to consume the time of the Senate I do not read the whole report.

The results of the evidence are that about $900,000 was disbursed upon the allegation that it was used in aid of the passage of the act now under investigation. That about $565,000 appears to have been paid to the exclusive use of persons having no official connection with such legislation, and that the disposition of the remaining $335,000 remains in doubt upon the evidence presented.

They never could trace where that $335,000 went to; they knew where it went from, and they knew the purpose for which it went; they knew why it was expended; they knew for what purpose it was expended; they knew what they were attempting to accomplish by the expenditure of this money, but they never could exactly locate where it went. [Laughter.]

That about $565,000 appears to have been paid to the exclusive use of persons having no official connection with such legislation, and that the disposition of the remaining $335,000 remains in doubt upon the evidence presented, but without any testimony showing that it was a reward paid to any person at that time a Member of either House of Congress, and that the uncertainty attending the disposition of this latter sum is owing to the refusal of William S. King to testify the truth, and to the failure or refusal of John G. Schumaker to present all the facts which the committee believe it was in his power to give.

TRENT RIVER, NORTH CAROLINA.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. FORAKER in the chair). Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. CARMACK. I do.

Mr. SIMMONS. Mr. President, I dislike very much to take any part of the valuable time of the Senator from Tennessee or to interrupt his very interesting discussion of the subject before the Senate, but I should like very much to have unanimous consent——

Mr. LODGE. Regular order, Mr. President.

Mr. SIMMONS. I should like very much to have unanimous consent for the immediate consideration of a joint resolution which has just passed the House of Representatives and been sent to the Senate, to correct an error made in the river and harbor bill. I will state that I am authorized by the Committee on Commerce to make a favorable report upon the resolution.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina?

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 253) relating to securing a channel of 6 feet depth over Foys Flats, in the Trent River, North Carolina, about 4 miles above Newbern. It authorizes the Secretary of War to expend such portion of the appropriation made in the river and harbor act of this session for the Neuse and Trent rivers, North Carolina, as may be necessary for securing a channel of 6 feet depth over Foys Flats, in the Trent River, North Carolina, about 4 miles above Newbern.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. CARMACK. Mr. President, I was saying, when interrupted by the very able and interesting bill of my friend from North Carolina [laughter], that these charges had been made in regard to the expenditure of money to secure the passage of the ship-subsidy bill—a bill in the interest of the Pacific Mail Steamship Company—that this investigation took place by a committee of the other House, and they made a report in 1876, now more than thirty years ago, indicating that at least that far back these subsidy grabbers were at work, and at work in the way with which we have all become familiar. This committee reported:

That the Committee on Ways and Means of the Forty-third Congress, after a thorough investigation of the charge that a large sum of money was used to secure the passage through Congress of an increased annual appropriation to the Pacific Mail Steamship Company in the nature of a subsidy, report, among other things:

"The results of the evidence are that about $900,000 was disbursed upon the allegation that it was used in aid of the passage of the act now under investigation. That about $565,000 appears to have been paid to the exclusive use of persons having no official connection with such legislation, and that the disposition of the remaining $335,000 remains in doubt upon the evidence presented, but without any testimony showing that it was a reward paid to any person at that time a Member of either House of Congress, and that the uncertainty attending the disposition of this latter sum is owing to the refusal of William S. King to testify the truth and to the failure or refusal of John G. Schumaker to present all the facts which the committee believe it was in his power to give."

The committee report the following resolutions:

"*Resolved*, That a copy of the testimony taken before the Committee on Ways and Means upon the question of a corrupt use of money to procure the passage of an act providing for an additional subsidy for the China mail service to be delivered to the Clerk of the House of Representatives, to be by him laid before the House at the first session of the Forty-fourth Congress, to the end that they make further inquiry and take due action upon the questions affecting William S. King and John G. Schumaker, and further proceed therein as they shall deem just.

"*Resolved*, That the Clerk of this House transmit to the United States district attorney a copy of the evidence taken before the Committee on Ways and Means upon the question of a corrupt use of money to procure the passage of an act providing for an additional subsidy for the China mail service, with directions to lay so much of the same as relates to the truth of the testimony given by William S. King and John G. Schumaker before the grand jury of said District for such action as the law seems to require."

The above resolutions were adopted by the House, and a copy of the evidence taken before the Committee on Ways and Means upon the question of a corrupt use of money to procure the passage of an act providing for an additional subsidy for the China mail service has been transmitted to the United States district attorney for the District of Columbia by the Clerk of the House in accordance with said resolution.

The whole subject is properly before the court, the offenses charged are crimes by statute, and the Constitution provides——

Mr. President, the fact was established beyond question, beyond dispute, that nearly a million dollars was expended in some way by this steamship company, which was already enjoying a large and profitable subsidy from the Government, to procure further subsidy; and that will be the case always. You might give them just as much subsidy as they ask for, or twice as much as they ask for, and at the very next session of Congress they would be back clamoring for more.

How this money was expended could not be discovered—that is, all of it. Three hundred and thirty-five thousand dollars of it was spent in a way that not a dollar of it could be traced; but that was because the men who spent the money, and spent it for the purpose of procuring the passage of that act, refused, when they were under oath before the committee, to tell where the money went to or how it was spent. But, Mr. President, we are justified in drawing the conclusion that that money was spent, at least, in an improper way. When men spend money to procure legislation and then, when put under oath, and with all the power of the House of Representatives to compel them to testify, refuse to say how the money was spent, we are justified in the conclusion that it was improperly, not to say wickedly and corruptly, spent.

Mr. President, this attempt to obtain subsidies from the Government in behalf of steamship companies, to make the taxpayers of the United States pay the losses of an unprofitable business, to make one business profitable at the expense of every other industry in the country, is but one phase of the old struggle which began with the beginning and will continue until the end of time, so to frame the laws of the country as to enable one man to eat his bread in the sweat of another man's brow. The temptation and the opportunity to get rich by legislation, instead of by honest work, has done more to prevent a natural and a healthful development of the industries of the United States than all other causes combined.

Mr. OVERMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. CARMACK. Certainly.

Mr. OVERMAN. Does the Senator think that if we had a law providing for the importation of free raw material we would accomplish the end which this bill attempts to attain?

Mr. CARMACK. I undoubtedly think so.

Mr. OVERMAN. I should like to read in the Senator's time a bill which has been introduced in the other House, a bill the passage of which, I think, would have done away with the object of the pending bill and have accomplished its ends.

I remember, Mr. President, seeing the statement that in 1860 80 per cent of the shipping of this country was done by American ships, carrying the American flag, and that now 80 per cent of the shipping is done by foreign countries in foreign ships which carry foreign flags. If of our shipping only 25 per cent is now done by this country, and only 20 per cent of such shipping carries the American flag, there must be some reason for it. One reason is because of the high tariff which is almost prohibitory upon materials which enter into the building of ships. So I think if we had adopted some bill like that which was introduced in the House of Representatives by the gentleman from Illinois [Mr. RAINEY] perhaps it might have accomplished the end sought. That bill, which is House bill No. 24127, reads as follows:

That all materials of foreign production which may be necessary for the construction of vessels built in the United States, and all materials necessary for the building of their machinery, and all articles necessary for their outfit and equipment, after the passage of this act, may be imported in bond under such regulations as the Secretary of the Treasury may prescribe, and upon proof that such materials have been used for such purposes no duties shall be paid thereon. Vessels receiving the benefit of this act shall be allowed at all times to engage in the coastwise trade of the United States, including the trade between the Atlantic and Pacific ports of the United States and including the trade on the waters of the northern, northeastern, and northwestern frontiers of the United States otherwise than by sea: *Provided*, That vessels built in the United States for foreign account and ownership shall not be allowed to engage in the coastwise trade of the United States, including the trade between the Atlantic and Pacific ports of the United States and including the trade on the waters of the northern, northeastern, and northwestern frontiers of the United States otherwise than by sea.

SEC. 2. That all articles of foreign production needed for the repair, outfit, or equipment of vessels in the United States, whether said vessels are of American or foreign ownership, may be withdrawn from bonded warehouses free of duty under such regulations as the Secretary of the Treasury may prescribe.

SEC. 3. That in the event that any vessel, recorded, registered, enrolled, or licensed as an American vessel of the United States pursuant to law, shall be repaired or equipped in a foreign port, no duties shall be accounted for or paid to the United States on material used in such repairs or equipment.

SEC. 4. That all laws or parts of laws in conflict with this act are hereby repealed.

My understanding is that the Secretary of State claimed that there was no such law in existence, but I find in the Revised Statutes the following:

SEC. 3114. The equipments, or any part thereof, including boats, purchased for, or the expenses of repair made in a foreign country upon a vessel enrolled and licensed under the laws of the United States to engage in the foreign and coasting trade on the northern, northeastern, and northwestern frontiers of the United States, or a vessel intended to be employed in such trade, shall, on the first arrival of such vessel in any port of the United States, be liable to entry and the payment of an ad valorem duty of 50 per cent on the cost thereof in such foreign country; and if the owner or master of such vessel shall wilfully and knowingly neglect or fail to report, make entry, and pay duties as herein required, such vessel, with her tackle, apparel, and furniture, shall be seized and forfeited.

SEC. 4330. No license, or enrollment and license, nor renewal of either, shall hereafter be issued to any vessel until the collector to whom application is made for the same is satisfied, from the oath of the owner or master, that all equipments and repairs made in a foreign port within the year immediately preceding such application, have been duly accounted for, and the duties accruing thereon duly paid; and if such owner or master shall refuse to take such oath, or take it falsely, the vessel shall be seized and forfeited. (See secs. 3114, 3115.)

I find also on reading, as the Senator from Tennesseee has done, in the CONGRESSIONAL RECORD, certain letters addressed to the shipowners of this country in which they are asked directly the question whether or not, if this law were repealed and they could get free raw material, it would not enlarge our shipping interests, and so on. I have here, among others, a letter from the Pacific Shipping Company.

I understand that the record shows there are about 1,150 shipbuilding establishments in this country, including other establishments incidental to shipbuilding, and there have been 350 letters written to shipowners. In reply they say that if this law were passed and they had free raw material the end sought would be accomplished. Here is one of the letters:

SAN FRANCISCO, *January 16, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Replying to your letter of the 6th instant, addressed to the Pacific Shipping Company, relative to a bill introduced by you providing for free material for constructing, repairing, and equipping ships, we submit the following opinion in regard to it:

The only material that would be imported in bond for such work would be steel plate, machinery, boilers, etc., and there is a question in my mind if this would be done to any appreciable extent; however, as a general move toward the reduction of the price of steel in this country, we are of the opinion that your bill is a good one, as it would be an entering wedge in forcing the steel trust to lower its price.

A few days ago a shipbuilder in San Francisco informed the writer that he could buy steel plate in China for 1 cent a pound less than what he paid for it in San Francisco. This is due probably to competition from Belgium and other points.

Referring to the bill of 1894 providing for the free entry of material for constructing American vessels to be used only in foreign trade, would say that the writer has had some experience with this bill and at one time was master of an American schooner coppered with metal out of bond. The vessel was allowed sixty days out of the year to coast and the balance of the time was obliged to go foreign. It kept us in hot water continually trying to keep within the sixty-day limit and thereby save the duty on the copper, and we were very glad when the copper was old enough to be condemned. We took off the foreign metal and put on American metal and have never tried the experiment since.

Regarding the cost of material for vessels, it is a fact that on this coast wooden steamers of very small tonnage are built for coasting business, and we think that the price per ton for building is probably higher than at any other place in the world; yet the vessels are able to make good interest on this great cost. The cost of the material in a ship does not matter so much as long as there is a good trade for the ship. There are certain classes of American vessels now that can be bought for a song, because, as there is no business for them, they are of no value. Again, there are American vessels with business that do well, and the price of a vessel depends on the percentage of profit that is to be made.

Private reports from the East state that the merchant-marine bill will probably fail. The opinion on this coast is that after the way it has been remodeled it is not as favorable as first intended.

I will also read another letter, to be found in the RECORD——

Mr. CARTER. Mr. President, if the Senator from Tennessee will give me his attention and it does not inconvenience the Senator from North Carolina——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Montana?

Mr. CARMACK. With pleasure.

Mr. CARTER. The matter to which the Senator from North Carolina [Mr. OVERMAN] is directing attention seems to me of minor importance in the presence of the unanswered question which has arisen in the minds of every Senator on this side, and, perchance, on the other side of the Chamber. That is as to what, if any, dictionary is used in the State of Tennessee, and what, if any, standard of spelling exists in that State, and whether such standard is uniformly recognized throughout all parts of the State? [Laughter.] This matter was suggested by the discussion to which the Senator very seriously addressed himself in the early progress of this debate. Perchance the direct question I now propound or present was not framed so as to elicit a direct answer, but it is a matter of much consequence and will prove a contribution to history as written up in the CONGRESSIONAL RECORD to have the Senator definitely

state whether a dictionary is used in Tennessee, and if so, what dictionary, when it was generally adopted, or whether any standard of spelling is uniformly recognized in that State with reference to the word in question or any other word? [Laughter.]

Mr. CARMACK. Mr. President, I want to say that there is a studied effort on the part of the Senators upon the other side of the Chamber, including the Senator from New Hampshire [Mr. GALLINGER], to consume time with frivolous questions. [Laughter.] The purpose is so plain that it can not be misunderstood, and I observe, too, that the Senator from Montana [Mr. CARTER] adopted the same tactics as did the Senator from New Hampshire. When the Senator from New Hampshire was confronted with the powerful statement made by the Senator from Idaho [Mr. DUBOIS] he promptly tried to divert attention by getting up a debate over a dictionary. [Laughter.]

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield further to the Senator from Montana?

Mr. CARMACK. Certainly.

Mr. CARTER. Observing that my question embarrasses the Senator from Tennessee, and inasmuch as he probably is not willing to admit that the dictionary is unknown in that State, I will withdraw the question.

Mr. CARMACK. No, Mr. President, I am not going to permit the Senator from Montana to withdraw it. The Senator can not intrude a question of that sort into my speech and raise an issue of that sort with me and then escape by withdrawing his question. I want to state, however, first the manifest purpose for which the question was asked. The Senator from North Carolina [Mr. OVERMAN], like the Senator from Idaho, was just in the act of presenting a powerful statement to the Senate which the Senator from Montana knew that he could not answer [laughter] and which he thought was creating a profound impression on the Senate. [Laughter.] So he, like the Senator from New Hampshire, and in furtherance of what I am almost tempted to describe as a conspiracy [laughter] on that side of the Chamber, brought up this question of dictionaries again. But if the Senator wants an answer to his question, "What dictionaries are used in Tennessee?" I will say to him that we stand by the Constitution and Webster's Dictionary. [Laughter.]

Mr. DUBOIS. Mr. President, I thoroughly agree with the Senator from Tennessee, and I am beginning to suspect that Senators on the other side are afraid to listen to the powerful arguments which are being used in this debate. [Laughter.] I am getting suspicious that they absent themselves because they are afraid to listen; and perhaps they have an organized method of trying to weary us out and to come in here by relays. [Laughter.] I do not charge that, but the circumstances are suspicious, and I suggest, Mr. President, the absence of a quorum.

The VICE-PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Allison | Dick | Kittredge | Perkins |
| Berry | Dillingham | Knox | Pettus |
| Beveridge | Dubois | Latimer | Piles |
| Blackburn | Flint | Lodge | Rayner |
| Brandegee | Frazier | Long | Scott |
| Burkett | Frye | McCreary | Simmons |
| Burnham | Fulton | McCumber | Smith |
| Carmack | Gallinger | McEnery | Stone |
| Carter | Gamble | McLaurin | Sutherland |
| Clapp | Hale | Mallory | Teller |
| Clark, Mont. | Hansbrough | Mulkey | Warner |
| Clay | Hemenway | Newlands | Warren |
| Crane | Heyburn | Overman | Wetmore |
| Cullom | Hopkins | Patterson | Whyte |
| Curtis | Kean | Penrose | |

The VICE-PRESIDENT. Fifty-nine Senators have answered to their names. A quorum is present.

Mr. CLAPP. I wish to announce that my colleague [Mr. NELSON] is detained at his home by illness. I make this announcement to cover all roll calls for the day.

### ST. LOUIS, IRON MOUNTAIN AND SOUTHERN RAILWAY COMPANY.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 8189) granting to the St. Louis, Iron Mountain and Southern Railway Company, a corporation, the right to construct, maintain, and operate a single-track railway across the lands of the United States in the southeast quarter of the northeast quarter of section 21, township 14 north, range 6 west of the fifth principal meridian, in the county of Independence and State of Arkansas, reserved for use in connection with the construction of Lock No. 1, upper White River, Arkansas; which were, on page 2, line 6, to strike out "who" and insert "and he;" on page 2, line 9, after "occupied," to insert "and compensation for any other injury sustained by the United States;" and on page 3, line 3, after "War," to insert "and in like condition and repair as when taken."

Mr. CURTIS. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

### FIELDPIECES FOR PETOSKEY, MICH.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 16235) authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. WARREN subsequently said: I am directed by the Committee on Military Affairs, to whom was referred the bill (H. R. 16235) authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich., to report it favorably without amendment, and, as it is a short matter, I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, insists upon its disagreement to the amendments numbered 4, 12, 22, 68, 69, 87, 117, and 126 to the bill; agrees to a further conference on the disagreeing votes of the two Houses thereon, and had appointed Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR managers at the conference on the part of the House.

The message also announced that the House had passed a joint resolution (H. J. Res. 211) authorizing the transfer of the files, books, and pamphlets of the Industrial Commission; in which it requested the concurrence of the Senate.

### ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

H. R. 13566. An act to amend the national banking act, and for other purposes;

H. R. 16659. An act to correct the military record of Tobe Holt;

H. R. 23221. An act for the erection of a public building at the city of Athens, in the State of Ohio;

H. R. 23988. An act to authorize a patent to be issued to Martha Sanders, widow of Levi B. Sanders, for certain lands therein described; and

H. R. 25885. An act to extend the time for building a bridge across Red River at Shreveport, La.

### DAMS ACROSS THE SAVANNAH RIVER.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives returning to the Senate, in compliance with its request, the bill (S. 8581) permitting the building of a dam across the Savannah River at Trotters shoals, the bill (S. 8583) permitting the building of a dam across the Savannah River at Calhoun Falls, the bill (S. 8572) permitting the building of a dam across the Savannah River at Andersonville shoals, and the bill (S. 8584) permitting the building of a dam across the Savannah River at Hattons Ford.

Mr. FRYE. I move to reconsider the votes by which the bills were ordered to a third reading and passed.

Mr. LATIMER. I understand that the bills recalled from the House are bills that passed the Senate, but House bills similar to them have passed both Houses.

The VICE-PRESIDENT. That is the fact.

The motion to reconsider was agreed to.

Mr. FRYE. I move that the bills be indefinitely postponed.

The motion was agreed to.

### COPIAH COUNTY, MISS.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives returning, in compliance with the request of the Senate, the bill (H. R. 3518) for the relief of Copiah County, Miss.

Mr. FULTON. I desire to call up my motion to reconsider the vote whereby the bill was passed.

Mr. MALLORY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Oregon yield to the Senator from Florida?

Mr. FULTON. Certainly.

Mr. MALLORY. I suggest to the Senator from Oregon that the Senator from Mississippi [Mr. McLAURIN] is deeply interested in the bill, and he is not present.

Mr. FULTON. I did not observe that the Senator was absent from the Chamber.

Mr. MALLORY. Possibly he is in the cloakroom.

Mr. FULTON. I will ask that the bill be laid aside until the Senator from Mississippi returns.

Mr. McLAURIN entered the Chamber.

Mr. MALLORY. He is present now.

Mr. McLAURIN. Mr. President, I started to say that I hoped the vote would not be reconsidered, but I can hardly say that. I very much desire that the vote should not be reconsidered. I do not think it ought to be reconsidered. The costs were incurred by the defendants in the suit of the Government against Copiah County and The Virginia Bridge and Iron Company, to the extent of $164.50. The bill was passed after almost a unanimous report by the Committee on Claims. Of all the members of that committee who are present in the city there has been but one Senator, and that is the Senator from Oregon——

Mr. MALLORY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Mississippi yield to the Senator from Florida?

Mr. McLAURIN. With pleasure.

Mr. MALLORY. I should like to know something about the bill. Is there a printed report accompanying the bill?

Mr. McLAURIN. Yes, sir; there is a report.

Mr. MALLORY. Of the committee?

Mr. McLAURIN. Yes, sir.

Mr. MALLORY. I should like to have the report read.

Mr. GALLINGER. I rise to a parliamentary inquiry. How did this matter get before the Senate?

The VICE-PRESIDENT. The message of the House of Representatives was laid before the Senate.

Mr. GALLINGER. That is privileged so far as presenting it is concerned, but it is not privileged so far as concerns the discussion of it, and I must object.

The VICE-PRESIDENT. Objection is made to the present consideration of the motion to reconsider.

Mr. McLAURIN. I was not in the Chamber when the matter came up. I was notified when I was out of the Chamber that this matter had come up, and I supposed it had come up on the motion of the Senator from Oregon.

The VICE-PRESIDENT. The Chair laid before the Senate the message of the House of Representatives in the usual course, and the Senator from Oregon asked that the motion heretofore made by him to reconsider the vote be now considered. Objection was interposed by the Senator from New Hampshire.

Mr. McLAURIN. That carries it over, I suppose.

### COAL LAND LOCATIONS IN ALASKA.

Mr. HANSBROUGH. I ask that the message from the House in regard to House bill 17415 be laid before the Senate.

The PRESIDING OFFICER laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 17415) to authorize the assignees of coal-land laws locations to make entry under the coal-land laws applicable to Alaska, and asking for a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HANSBROUGH. I move that the Senate insist on its amendments disagreed to by the House of Representatives, and agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the Presiding Officer appointed as the conferees on the part of the Senate Mr. HANSBROUGH, Mr. CARTER, and Mr. DUBOIS.

### THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. CARMACK. I do not understand that my friend the Senator from North Carolina [Mr. OVERMAN] had completed his statement when he was interrupted.

Mr. OVERMAN. I was not quite through.

Mr. CARMACK. I yield to the Senator that he may complete the statement he was making.

Mr. OVERMAN. I desire also to read a letter from the Thousand Island and St. Lawrence River Steamboat Companies, Kingston, Ontario.

THOUSAND ISLAND AND ST. LAWRENCE
RIVER STEAMBOAT COMPANIES,
*Kingston, Ontario, January 25, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Absence from home explains delayed acknowledgment of your communication of the 6th instant in connection with the bill which you have introduced in Congress providing for the importation in bond of materials for constructing, repairing, and equipping ships, and for other purposes.

I can assure you that we are heartily in accord with this bill. The Thousand Island Steamboat Company, which is an American corporation organized under the laws of the State of New York, has been in operation on the river St. Lawrence, in the Thousand Island region, between Cape Vincent, Clayton, and Ogdensburg, for a quarter of a century, and I can assure you that American shipping in this district has been greatly discriminated against in favor of Canadian tonnage by the existing laws of the United States Government in connection with repairing, supplies, equipment, etc., of such steamers when they happen to be in Canadian ports.

When I tell you that there is not an accessible port on the American side, from Cape Vincent to Ogdensburg, where steamers of any size can be docked and repaired, and that our American boats are practically forced to come to Kingston every winter to lay up and have their outfitting and repairing done on the Canadian side before being placed in commission in the spring, and obliged to pay 50 per cent duty on labor, material, and equipment furnished on this side, you will realize the disadvantages against which we have been working in endeavoring to compete in the excursion business on the river St. Lawrence with Canadian steamers, which are saved the expenses we are forced into.

I have taken up this matter individually several times at Washington in an endeavor to secure relief, but to no avail. We have been struggling along, nevertheless, doing our best with this burden upon us, and your bill seems like a ray of sunshine from the clouds, and I can assure you it has our strongest indorsement.

The summer traffic on the St. Lawrence River is increasing every year, and we are endeavoring to compete with the Canadian steamers for the business, but we are having a trying time on account of the heavy restrictions imposed by the United States Government on all work done and materials furnished in foreign ports.

When I tell you, as you are undoubtedly aware, that all the summer tourist trade to Montreal, down the grand rapids of the St. Lawrence River from the American side, is performed by Canadian steamers, when it is only just and natural that American boats should be competing for this service, you will realize that Canadian tonnage has been having the advantage and that the stringent regulations of the United States Government have been a great handicap and have had a dampening effect upon the efforts to compete for this service. In fact, we are charged duty upon the docking of American steamers in Canadian ports even when no material repairs are effected. We are refused the privilege of importing American paints and painting our steamers on this side without the payment of duty, both on the material and labor. We are forced to pay duty on all the provisions and supplies for passengers and crews, if taken on an American boat in a Canadian port, as soon as she touches the first American port. We would be very grateful for relief, I can assure you, and it would be a strong incentive to increasing the tonnage of American ships in these waters if such relief could be effected.

I would be glad, if it is possible at this late hour, to have included in the bill freedom from duty on labor, as well as on materials, when work is done on an American bottom in a foreign port, and also that no duty should be exacted on provisions and supplies furnished for the crew and passengers when taken in Canadian waters. I simply offer this as a suggestion, as we are now charged 50 per cent on all labor and a high rate of duty on supplies.

If I can be of any service in any way or can give you any further information that will be effective, I will consider it a favor if you will call upon me.

Yours, truly,
HOWARD S. FOLGER,
*General Manager.*

I next read a letter from Mr. Lunt:

JANUARY 20, 1906.

Hon. H. T. RAINEY, *Washington, D. C.*

DEAR SIR: I am particularly pleased by reading the bill you have introduced for free importation for goods to be used in construction and repairs for American shipping, and I trust very much that this bill will become a law.

Here are some of the principle materials used in the construction of a sailing ship or steamship: Steel plates, angles, and beams; galvanized-wire rigging; cotton duck; manila rope; bar iron, steel rivets.

The above will certainly cover 75 per cent of the material to be used in the construction of a steel vessel; and I would ask if all of the above are not controlled by trusts?

I was—in fact, am to-day—interested with some other parties to build a 3,000-ton American sailing ship, but the present prices of material have deterred us from going ahead, as, with the present existing conditions, we could not expect to build this vessel within 30 to 35 per cent of what they could build the same vessel in England for; and while we may expect to have our vessels cost us more, still this is far too much difference, and we have "hung up" the matter till conditions change.

By the passage of your proposed bill this would allow us, and no doubt many others, to go ahead and build up our American shipping.

Yours, very truly,
L. E. LUNT.

Here is one from Mr. Cobb:

EASTHAMPTON, MASS., *January 9, 1906.*

Hon. H. T. RAINEY.

DEAR SIR: Received yours of the 6th instant. I am heartily in favor of the proposed bill.

Our present law has resulted in a continuance of building of wooden vessels, which are obsolete.

Our wooden coastwise fleet would be put out of business if they had to compete with foreign-built steel vessels. But I believe that, were we able to import the materials, a fleet of steel vessels would be built at Atlantic ports both for foreign and coastwise business. Nor do I believe that any great quantity of material would be bought abroad.

The American producer of those materials would meet the price and the increased demand would help to make good the reduced margin of profit.

In 1902 I had a marine architect make for me the plans for a first-class steel sailing vessel to carry 2,500 tons cargo. This ship was planned to be available for any business. We found that the materials would cost $8,000 more if bought here than if bought abroad. Your proposed bill would have made the estimated cost of this ship $67,000 instead of $75,000. We could figure a fair return for our money at that price; at $67,000 she would have been an attractive investment. As we were about to contract for this ship the steel people advanced the price, making it to cost $5,000 more, and some labor movement coming just at that time caused the builders to raise their estimate $10,000 more, making the whole $90,000.

I immediately dropped the whole matter, as at that price she could make no fair return to her owners.

I wish while you were on this matter you would take up the matter of quarantine. Quarantine should be a national regulation, and, as it is enforced for the benefit of the whole people, it would be but just for the public Treasury to bear the expense. Give to American vessels free quarantine and indemnity for time detained and pass your bill, there will be small need for any subsidy except for mail service.

Yours, very respectfully,

O. W. COBB.

Here is a letter from William Matson, of the William Matson Navigation Company, San Francisco, Cal.:

MATSON NAVIGATION COMPANY,
*San Francisco, Cal., January 30, 1906.*

Hon. H. T. RAINEY, *Washington, D. C.*

DEAR SIR: I have duly received your favor of the 6th instant, inclosing a copy of a bill introduced by you to admit into the United States free of duty any material necessary for the construction and equipment of ships.

American steel can be purchased in England cheaper than in the United States, and for that reason I am heartily in favor of such a bill and think that it would do more to stimulate the shipbuilding industry than any form of ship-subsidy bill that has been introduced.

Prices quoted on steel vessels to-day make new construction almost out of the question, and if cost is not an object, the time required for construction, owing to inability to get deliveries of steel, places a serious obstacle in the way.

Only recently I asked for bids on a new steamer of about 8,000 tons dead weight capacity, but in order that the builders might quote on a delivery suitable to my requirements, they found it necessary to figure on English material, which, with duty and freight added, made the price prohibitive.

I notice a bill has been introduced in this Congress to prohibit foreign-built vessels securing the American flag. I think this bill is unjust, considering the present price of material used in ship construction.

I have been fortunate enough to secure American registry during this session of Congress for the Spanish ship *Gaditano*, on which I spent $126,000 for repairs. This is more than three times the cost of the ship, but notwithstanding this fact, I had considerable trouble in securing the flag.

I think every American shipowner would be willing to build his vessels in the United States if steel plates could be purchased at a reasonable price.

I am sending a copy of this letter to some of our California Representatives.

Yours, truly, WM. MATSON.

I now read a letter from Mr. Whitcomb:

ENTERPRISE TRANSPORTATION COMPANY,
*January 18, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Your letter of the 6th instant, inclosing copy of bill introduced by you in the House on the 4th, could not have reached us at a more opportune time. This company is planning the construction of its first pair of new steel ships for coastwise service, and we naturally feel most keenly the excessive prices charged for construction material, which are fictitiously high, as American manufacturers do not seem to figure their price on the cost of production, but rather on its cost in England plus the tariff. We do need a reduction of this tariff in order to bring our steel makers to time.

The boats we are planning can be built in England at from 30 per cent to 40 per cent less than we are being charged in this country. While we would hesitate to advocate the removal of laws which bar us from using in our service foreign-built ships, we most heartily indorse your bill, which opens to American shipbuilders foreign-made materials.

Yours, very truly, DAVID WHITCOMB, *President.*

Mr. HANSBROUGH. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Carolina yield to the Senator from North Dakota?

Mr. OVERMAN. I yield.

Mr. HANSBROUGH. Would it interfere with the eloquent remarks of the Senator from North Carolina if I should move to take up another bill and proceed to its consideration?

Mr. OVERMAN. I gladly yield to the Senator.

## UNION STATION.

Mr. HANSBROUGH. I move that the Senate proceed to the consideration of the bill (H. R. 9329) to amend an act approved February 28, 1903, entitled "An act to provide for a union station in the District of Columbia, and for other purposes."

Mr. KEAN. Regular order!

Mr. GALLINGER. There are twenty Senators who will want to speak on that bill.

Mr. OVERMAN. I yield.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from North Dakota to proceed to the consideration of the bill stated by him.

Mr. HANSBROUGH. On that I ask for the yeas and nays.

Mr. GALLINGER. Let the bill be read. I want the Senate to know what it is.

The VICE-PRESIDENT. The Secretary will read as requested by the Senator from New Hampshire.

Mr. OVERMAN. I decline to yield any further. I will proceed.

The VICE-PRESIDENT. The yeas and nays have been demanded upon the motion. Is there objection to the reading of the bill?

Mr. GALLINGER. Can there be objection to the reading of a bill which has never been read to the Senate?

Mr. HANSBROUGH. The bill has been read and has passed the Senate once, and was reconsidered.

Mr. CULLOM. Let us hear it read again.

The VICE-PRESIDENT. If the Senator from New Hampshire insists upon it, the Secretary will read the bill.

Mr. GALLINGER. I want the Senate to know what the bill is before they vote upon the question.

The VICE-PRESIDENT. The bill will be read.

Mr. HANSBROUGH. Certainly. I do not object to its being read.

Mr. GALLINGER. The Senator can not object.

The Secretary read the bill.

The VICE-PRESIDENT. Is there a second to the demand for the yeas and nays on the motion to proceed to the consideration of the bill.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. MARTIN]. I transfer my pair to the junior Senator from Iowa [Mr. DOLLIVER] and I vote "nay."

Mr. FLINT (when his name was called). I am paired with the senior Senator from Texas [Mr. CULBERSON]. If he were here I should vote "nay."

Mr. MALLORY (when his name was called). I have a general pair with the senior Senator from Vermont [Mr. PROCTOR]. If he were present I should vote "yea."

Mr. STONE (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK].

Mr. TILLMAN (when his name was called). I should like to inquire whether the junior Senator from Vermont [Mr. DILLINGHAM] has voted.

The VICE-PRESIDENT. He has not voted.

Mr. TILLMAN. I have a pair with that Senator, and I therefore withhold my vote.

Mr. WARREN (when his name was called). I announce my general pair with the Senator from Mississippi [Mr. MONEY]. I withhold my vote.

The roll call was concluded.

Mr. OVERMAN (after having voted in the negative). I inquire if the senior Senator from California [Mr. PERKINS] has voted.

The VICE-PRESIDENT. He has not voted.

Mr. OVERMAN. I am paired with that Senator, and I withdraw my vote.

Mr. CARMACK. I inquire if the senior Senator from Wisconsin [Mr. SPOONER] has voted.

The VICE-PRESIDENT. He has not voted.

Mr. CARMACK. I am paired with that Senator.

Mr. WARREN. By an arrangement of pairs the Senator from Mississippi [Mr. MONEY] will stand paired with the senior Senator from Delaware [Mr. ALLEE]. I vote "nay."

Mr. DUBOIS. I was requested to state that the junior Senator from Wisconsin [Mr. LA FOLLETTE] if present would vote "yea." He is detained by illness.

The result was announced—yeas 21, nays 26, as follows:

YEAS—21.

| | | | |
|---|---|---|---|
| Bailey | Frazier | McEnery | Scott |
| Berry | Gamble | McLaurin | Wetmore |
| Blackburn | Hansbrough | Newlands | Whyte |
| Brandegee | Hopkins | Patterson | |
| Burkett | Latimer | Pettus | |
| Dubois | McCreary | Rayner | |

NAYS—26.

| | | | |
|---|---|---|---|
| Burnham | Depew | Kean | Smoot |
| Carter | Dick | Kittredge | Sutherland |
| Clay | Elkins | Lodge | Taliaferro |
| Crane | Foraker | Long | Warner |
| Cullom | Frye | McCumber | Warren |
| Curtis | Gallinger | Penrose | |
| Daniel | Heyburn | Piles | |

NOT VOTING—43.

| | | | |
|---|---|---|---|
| Aldrich | Bulkeley | Clarke, Ark. | Flint |
| Allee | Burrows | Culberson | Foster |
| Allison | Carmack | Dillingham | Fulton |
| Ankeny | Clapp | Dolliver | Hale |
| Bacon | Clark, Mont. | Dryden | Hemenway |
| Beveridge | Clark, Wyo. | Du Pont | Knox |

| | | | |
|---|---|---|---|
| La Follette | Morgan | Perkins | Spooner |
| Mallory | Mulkey | Platt | Stone |
| Martin | Nelson | Proctor | Teller |
| Millard | Nixon | Simmons | Tillman |
| Money | Overman | Smith | |

So the Senate refused to proceed to the consideration of the bill.

The VICE-PRESIDENT. The Senator from Tennessee has the floor.

Mr. CLAPP. I ask the Senator from Tennessee to yield to me for a few moments.

Mr. CARMACK. I yield to the Senator from Minnesota.

### MENOMINEE INDIAN RESERVATION, WIS.

Mr. CLAPP. Some time ago a bill passed the House to provide for the sale of timber on the Menominee Reservation in Wisconsin. The junior Senator from Wisconsin [Mr. LA FOLLETTE], who to-day is confined to his home by severe illness, instead of having an amendment to the House bill adopted inadvertently had a Senate bill passed, which leaves nothing for conference. At his request, and on account of his absence, I ask unanimous consent for the present consideration of the bill (H. R. 24043) to authorize the sale of timber on certain of the lands reserved for the use of the Menominee tribe of Indians in the State of Wisconsin, so that the bill may be passed and go to conference. The bill had been read, and unless the Senate insists upon it, it need not be read again. I will offer an amendment to it.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. CLAPP. I move to strike out all after the enacting clause down to and including line 15, on page 2, and insert what I send to the desk.

The VICE-PRESIDENT. The matter proposed to be inserted will be read by the Secretary.

The Secretary read as follows:

That the dead and down timber upon the Menominee Reservation, in the State of Wisconsin, shall be each year estimated and logged, and that no more standing and growing timber shall be cut than is sufficient, when added to the dead and down timber, to make 20,000,000 feet in the aggregate, and only such standing and growing timber shall be cut as shall be marked for cutting under the direction of the Forestry Service. The Secretary of the Interior may permit the manufacture into lumber by the said tribe of so much of said annual cut of logs as he may deem advisable, and the sale of the same under such rules and regulations as may be prescribed by him: *Provided*, That if in the opinion of the Secretary of the Interior the Indians can not log the dead and down timber now upon the said reservation in time to save the same and protect the standing forest, he is hereby authorized to employ white laborers to assist said Indians to log the dead and down timber now upon said reservation: *Provided*, That the Secretary of the Treasury be, and he is hereby, authorized to advance out of the funds of said tribe, on the order of the Secretary of the Interior, the sum of $75,000, or so much thereof as may be necessary to enable the said Secretary of the Interior to carry out the provisions of this act, the said sum to be reimbursed to the said fund from the proceeds of the sale of timber as hereinbefore provided.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Minnesota.

The amendment was agreed to.

The VICE-PRESIDENT. There are further amendments reported from the Committee on Indian Affairs, which will be stated.

The SECRETARY. In line 16, page 2, strike out the figure "3" and insert in lieu thereof the figure "2;" and in line 22, page 2, strike out all after the word "Treasury," down to and including line 2 on page 3, in the following words:

Interest on which shall be allowed said tribe annually at the rate of 3 per cent per annum, to be paid to the tribe per capita, or expended for their benefit under the direction of the Secretary of the Interior.

The amendment was agreed to.

The bill was reported to the Senate as amended.

Mr. CARMACK. I ask for the reading of the bill as amended.

The VICE-PRESIDENT. The Secretary will read the bill as amended.

The Secretary read the bill as amended, as follows:

*Be it enacted, etc.*, That the dead and down timber upon the Menominee Reservation in the State of Wisconsin shall be each year estimated and logged and that no more standing and growing timber shall be cut than is sufficient, when added to the dead and down timber, to make 20,000,000 feet in the aggregate, and only such standing and growing timber shall be cut as shall be marked for cutting under the direction of the Forestry Service. The Secretary of the Interior may permit the manufacture into lumber, by the said tribe, of so much of said annual cut of logs as he may deem advisable, and the sale of the same under such rules and regulations as may be prescribed by him: *Provided*, That if in the opinion of the Secretary of the Interior the Indians can not log the dead and down timber now upon the said reservation in time to save the same and protect the standing forest, he is hereby authorized to employ white laborers to assist said Indians to log the dead and down timber now upon said reservation: *Provided*, That the Secretary of the Treasury be, and he is hereby, authorized to advance out of the funds of said tribe, on the order of the Secretary of the Interior, the sum of $75,000, or so much thereof as may be necessary to enable the said Secretary of the Interior to carry out the provisions of this act, the said sum to be reimbursed to the said fund from the proceeds of the sale of timber, as hereinbefore provided.

SEC. 2. That from the net proceeds of sales of said Menominee timber shall be deducted one-fifth part, which shall be deposited in the Treasury of the United States to the credit of the Menominee Indians in Wisconsin, to be used under the direction of the Secretary of the Interior for the benefit of said Indians, and the residue of said proceeds shall be funded in the United States Treasury.

SEC. 3. That all acts or parts of acts inconsistent with this act are hereby repealed.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE-PRESIDENT. The question is, Shall the bill pass?

Mr. CARMACK. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the Senator from Missouri [Mr. STONE]. In the absence of that Senator I withhold my vote.

Mr. FLINT (when his name was called). I am paired with the senior Senator from Texas [Mr. CULBERSON]. As he is not in the Chamber I withhold my vote.

Mr. MALLORY (when his name was called). I again announce my pair with the senior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. STONE (when his name was called). I am paired with the senior Senator from Wyoming [Mr. CLARK]. I do not see him in his seat and I withhold my vote.

The roll call having been concluded, the result was announced—yeas 56, nays 0, as follows:

YEAS—56.

| | | | |
|---|---|---|---|
| Bacon | Curtis | Hopkins | Perkins |
| Berry | Daniel | Kean | Pettus |
| Beveridge | Depew | Kittredge | Piles |
| Blackburn | Dick | Knox | Rayner |
| Brandegee | Dillingham | Latimer | Scott |
| Bulkeley | Dubois | Lodge | Simmons |
| Burkett | Foraker | Long | Smoot |
| Burnham | Frazier | McCreary | Spooner |
| Carmack | Frye | McEnery | Sutherland |
| Carter | Fulton | McLaurin | Taliaferro |
| Clapp | Gallinger | Millard | Tillman |
| Clay | Gamble | Overman | Warner |
| Crane | Hemenway | Patterson | Warren |
| Cullom | Heyburn | Penrose | Whyte |

NAYS—0.

NOT VOTING—34.

| | | | |
|---|---|---|---|
| Aldrich | Culberson | La Follette | Nixon |
| Allee | Dolliver | McCumber | Platt |
| Allison | Dryden | Mallory | Proctor |
| Ankeny | Du Pont | Martin | Smith |
| Bailey | Elkins | Money | Stone |
| Burrows | Flint | Morgan | Teller |
| Clark, Mont. | Foster | Mulkey | Wetmore |
| Clark, Wyo. | Hale | Nelson | |
| Clarke, Ark. | Hansbrough | Newlands | |

So the bill was passed.

### THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. OVERMAN. I now read a letter from J. J. Moore & Co.:

SAN FRANCISCO, CAL., *January 31, 1906.*

Hon. H. T. RAINEY,
*House of Representatives, Washington, D. C.*

DEAR SIR: Your favor of January 6, with copy of your bill, H. R. 10090, duly to hand, and in reply thereto beg to say that we have carefully studied the proposed bill, and whilst it may bring some relief to shipping men and the shipping interests of the United States, it appears to us not to go far enough. The fact that you have introduced this bill in the House of Representatives is evidence that you have gone into the matter of shipbuilding in the United States. We would ask if you can see how our merchant marine can be increased very much within the next ten or fifteen years from the present shipbuilding facilities, or from any new concerns likely to be built? It is our opinion that in face of the large amount of Government work being done and to be done little could be accomplished in the way of turning out merchantmen. There is no question of doubt but what the trade of the United States is to-day suffering severely for the want of sufficient American vessels to do our coasting business, and every year will add to this difficulty. Under the circumstances, would it not be a feasible and businesslike proposition for Congress to pass an act permitting American citizens to buy foreign-built ships and receive for them an American registry by paying a reasonable duty, even to the extent of 50 per cent? Surely no honest shipbuilder can object to competition on foreign-built vessels with such a tariff, and we can assure you that it would be a great relief to the shipping industry of the United States. This bill might be made operative for a term of years—say ten years—and if by that time our shipbuilding facilities had increased to an extent that they could fill our requirements, it might be allowed to die.

There is another bill which might be passed that would be of advantage to a great many American merchants doing a foreign business—that is, to permit them to buy foreign-built vessels and own them in their own names under a provisional register prohibiting them from the coasting business. Surely such a bill as this could not injure American shipbuilders or shipowners. For instance, we know of many vessels which are in reality owned by American citizens, but are under foreign flags, with the result that they pay taxes in a foreign country and also

provision and spend considerable money in foreign ports that would be spent at home if under an American flag.

We must say that we have consulted many shipping men on this subject, and they all agree that either of the bills above referred to would be a great relief to shipping men without any injury to shipbuilding.

I call the attention of the Senate to this one paragraph:

We would like to mention a circumstance that occurred to us a few years ago, as follows: A steel schooner was built in Scotland, at a cost of $52,000, with American money. We wished to have a similar vessel built at home under the American flag. We put the plans and specifications before a local firm of shipbuilders, and the lowest price we could obtain was $133,000. Under such circumstances how is it possible for American ships to compete with foreigners and pay interest upon such an enormously increased cost?

Trusting that our suggestion may be of some value to you and placing ourselves at your command should you desire any further correspondence from us, we are, dear sir,

Yours, faithfully,

J. J. MOORE & Co.
J. J. MOORE, *President*.

Mr. CARMACK. The Senate did not seem to be paying attention, and I should like to have the Senator from North Carolina read it again.

Mr. SCOTT. We can not hear the Senator from North Carolina over here.

Mr. CARMACK. That is what I was complaining of, that we could not hear the Senator from North Carolina, and I asked him to read the matter over again, in order that the Senate may hear it.

Mr. OVERMAN (reading)—

We would like to mention a circumstance that occurred to us a few years ago, as follows: A steel schooner was built in Scotland, at a cost of $52,000, with American money. We wished to have a similar vessel built at home under the American flag——

Mr. TILLMAN. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Carolina yield to the Senator from South Carolina?

Mr. OVERMAN. I will finish reading this first, Mr. President. The letter continues:

We put the plans and specifications before a local firm of shipbuilders, and the lowest price we could obtain was $133,000.

Now I yield to the Senator from South Carolina.

Mr. TILLMAN. Will the Senator tell us who "us" is?

Mr. OVERMAN. The shipbuilders.

Mr. TILLMAN. What shipbuilders? From what is the Senator reading?

Mr. OVERMAN. I have read the address from a letter from San Francisco, signed by J. J. Moore & Co. and J. J. Moore, president of this shipbuilding concern.

Mr. TILLMAN. If the Senator from Tennessee [Mr. CARMACK] will permit me, I should like to ask the Senator from North Carolina if it is not true that American steel manufacturers can make steel cheaper than it is made in England, and that we have shipped steel rails abroad?

Mr. OVERMAN. That is mentioned in several of the letters from which I have been reading.

Mr. TILLMAN. I apologize to the Senator for bringing in stale information or something of the sort that has already been utilized; but the phenomenal difference between the cost of a ship in the United States and the same ship under the same specifications abroad was so startling that I just wanted to remind some people that it was not because of natural conditions, but that it arose from unnatural conditions.

Mr. OVERMAN. The Senator has the point of the controversy. I will say that several of the letters I have read mention the fact that steel is so much lower in England than it is here on account of our steel trust.

Mr. TILLMAN. I beg pardon. I was not aware that the Senator had read that statement.

Mr. CARMACK. I hope the Senator from North Carolina will read some of those letters over again. I should like to hear them.

Mr. GALLINGER. Mr. President, will the Senator from Tennessee yield to me for a moment?

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from New Hampshire?

Mr. CARMACK. Certainly.

Mr. GALLINGER. Getting away from levity for a moment, Mr. President, I should like to ask the Senator from North Carolina if he knows what proportion of the cost of a ship the steel is?

Mr. OVERMAN. No, sir; I have not been informed, and I should like the Senator to inform the Senate as to that.

Mr. GALLINGER. It is about 5 per cent; and the added cost of American ships is in the matter of labor almost entirely. That is all I care to put in the RECORD.

Mr. OVERMAN. I am giving the evidence here from the shipowners themselves, and they ought to know more about it than anybody else. They say the difference in cost in this case was nearly a hundred thousand dollars.

Mr. TILLMAN. Will the Senator from Tennessee allow me to ask the Senator from New Hampshire a question?

Mr. CARMACK. With pleasure.

Mr. TILLMAN. How much of a steal is involved in the ship-subsidy scheme? [Laughter.]

Mr. GALLINGER. Mr. President, I will answer that by saying that I do not know that there is any steal in it. The Senator from South Carolina sees a steal in everything.

Mr. TILLMAN. Oh, no.

Mr. GALLINGER. Yes; that is the Senator's habit. If the Senator can point out to the country that there is any steal in extending the postal law of 1891 so that we may have some American ships flying the American flag and carrying the American mails, I am willing that he should do so.

Mr. TILLMAN. I will let the Senator from Tennessee [Mr. CARMACK] do that.

Mr. GALLINGER. All right.

Mr. FRYE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Maine?

Mr. CARMACK. With pleasure.

Mr. FRYE. Mr. President, it occurs to me that even a filibuster may be conducted in a dignified manner; that the Sabbath day might be remembered in the United States Senate, and that to amuse the galleries and excite their laughter does not assist at all in defeating the ship-subsidy bill.

Mr. CARMACK. Mr. President, if any part of those remarks were intended for me, I want to say to the Senator from Maine that I am not responsible to him for my conduct, and that I shall conduct myself according to my own ideas of propriety. If the Senator from Maine wants to leave the Senate Chamber here on Sunday and attend church, he has my permission to do so. [Laughter.]

Mr. FRYE. I would much rather be in church than to be here on a Sunday witnessing the performance which has been going on to-day.

Mr. CARMACK. Mr. President, if the Senator from Maine wishes to take a recess until to-morrow morning, I shall not interfere with him.

Mr. FRYE. The Senator could not.

Mr. CARMACK. Well, Mr. President, to become dignified, and especially for the delectation of the Senator from Maine, who I think is much more concerned about the failure of the ship-subsidy bill than he is about observing the dignity of anything or anybody——

Mr. FRYE. Mr. President, allow me to say——

Mr. CARMACK. I decline to yield to the Senator from Maine.

Mr. FRYE. I should like to reply to the last statement of the Senator from Tennessee.

Mr. CARMACK. I decline to yield to the Senator.

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Maine?

Mr. CARMACK. I do not.

The VICE-PRESIDENT. The Senator from Tennessee declines to yield.

Mr. CARMACK. Mr. President, the Senator from New Hampshire [Mr. GALLINGER] says that steel plays a very little part in the cost of shipbuilding in the United States. He may be right about that; I do not profess to be an expert in the matter of shipbuilding, but there are others who are experts who do not agree with the Senator from New Hampshire. One of these men is Mr. Andrew Carnegie, who is suspected of knowing a good deal about the use of steel.

Mr. Andrew Carnegie says the United States has not only supplied its own wants, "but is competing to supply the wants of the world, not only in steel, but in the thousand and one articles of which steel is the chief component part," and expresses the opinion that the increasing demand from the world at large "can be met only by the United States."

"The influence of our steel-making capacity," adds Mr. Carnegie, "must be marvelous, for the nation which makes the cheapest steel has the other nations at its feet as far as manufacturing is concerned in most of its branches. The cheapest steel means the cheapest ships, the cheapest machinery, the cheapest thousand and one articles of which steel is the base."

That is quoted from the Review of the World's Commerce, and Andrew Carnegie confidently expresses the opinion that the cheapest steel does mean the cheapest ships, and that the nation that produces steel more cheaply than any other nation is the nation which will be able to build ships cheaper than any other and to control the commerce of the world without the benefit of a subsidy and without the benefit of protection. That, at least, is the logic of his argument.

## MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had

passed the bill (S. 8119) to readjust the boundaries of the naval reservations in Porto Rico in pursuance of the act of July 1, 1902.

The message also announced that the House insists upon its amendment to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon; agrees to a further conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. HEPBURN, Mr. WANGER, and Mr. ADAMS managers at the conference on the part of the House.

The message further announced that the Speaker of the House had appointed Mr. OVERSTREET of Indiana, Mr. GARDNER of New Jersey, and Mr. MOON of Tennessee, members of the Joint Postal Commission authorized in the post-office appropriation bill.

The message also announced that the Speaker of the House had appointed Mr. HOWELL of New Jersey, Mr. BENNET of New York, and Mr. BURNETT members of the joint commission to investigate the subject of immigration as authorized under the immigration act.

The message further announced that the Speaker of the House had appointed Mr. MOON of Pennsylvania, Mr. PARSONS, Mr. DENBY, Mr. SHERLEY, and Mr. HOUSTON members of the Joint Committee for Revision of Laws, authorized under joint resolution No. 240.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution; and they were thereupon signed by the Vice-President:

S. 7247. An act to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building;

S. 7812. An act to amend section 591 of the Revised Statutes of the United States relative to the assignment of district judges to perform the duties of a disabled judge;

S. 8327. An act to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building;

S. 8498. An act to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, and for other purposes;

S. 8526. An act permitting the erection of a dam across Coosa River, Ala., at the place selected for Lock No. 12 on said river;

S. 8622. An act granting an increase of pension to William N. Bronson;

H. R. 13605. An act to satisfy certain claims against the Government arising under the Navy Department;

H. R. 20490. An act for the relief of Frank J. Ladner;

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 25889. An act to provide for sittings of the United States circuit and district courts of the southern district of Ohio at the city of Dayton, in said district; and

H. J. Res. 253. Joint resolution relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

ORDER FOR RECESS.

Mr. HALE. By reason of a message from the House of Representatives, I ask that at 6 o'clock this evening the Senate take a recess until half past 8.

The VICE-PRESIDENT. The Senator from Maine asks unanimous consent that at 6 o'clock the Senate take a recess until half past 8. Is there objection? The Chair hears none, and it is so ordered.

MASONIC LODGE OF BEXAR, ALA.

Mr. PETTUS. By reason of a clerical error in the resolution reported from the Committee on Claims, the claim of the Masonic Lodge of Bexar, Ala., was omitted. With the approval of the chairman of the committee, I offer a resolution to correct the mistake.

The resolution was considered by unanimous consent and agreed to, as follows:

*Resolved*, That Senate bill No. 3060, for the relief of Masonic Lodge of Bexar, Ala., be, and the same is hereby, referred to the Court of Claims under the provisions of section 14 of the act approved March 3, 1887, for investigation and report of all material facts.

Mr. McLAURIN. I suggest the absence of a quorum.

The VICE-PRESIDENT. The Senator from Mississippi suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ankeny | Daniel | Kean | Patterson |
| Bacon | Dick | Kittredge | Perkins |
| Beveridge | Dillingham | Latimer | Pettus |
| Blackburn | Dubois | Lodge | Piles |
| Brandegee | Du Pont | Long | Rayner |
| Bulkeley | Flint | McCreary | Scott |
| Burnham | Foraker | McCumber | Simmons |
| Carmack | Frazier | McEnery | Smoot |
| Carter | Frye | McLaurin | Stone |
| Clapp | Gallinger | Mallory | Sutherland |
| Clark, Mont. | Gamble | Millard | Taliaferro |
| Clark, Wyo. | Hansbrough | Newlands | Warner |
| Cullom | Hemenway | Nixon | Warren |
| Curtis | Heyburn | Overman | Whyte |

The VICE-PRESIDENT. Fifty-six Senators have answered to their names. A quorum is present.

Mr. CLARK of Wyoming. I ask for the adoption of the order which I send to the desk.

The VICE-PRESIDENT. Has the Senator from Tennessee yielded the floor?

Mr. CARMACK. No, sir.

The VICE-PRESIDENT. Then the order is not now in order.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. CARMACK. Mr. President, I wish to express my most earnest regret for a little unpleasantness that recently occurred, and I especially regret that I spoke under the impulse of the moment more sharply than I should have done in reply to the suggestions of the Senator from Maine [Mr. FRYE], which were really proper and in the interest of the proper decorum of the Senate. There is no Senator here for whom I have a higher regard or a deeper respect than I have for the Senator from Maine, and I especially wish to express my regret for the last remark I made in a little colloquy and to withdraw that remark, with my apologies to the Senate and to the Senator from Maine.

Mr. FRYE. Mr. President, I am obliged to the Senator, for whom I have a very great respect. I did not mean to give him personally any offense by what I said.

Mr. CARMACK. Mr. President, we have wandered over a good deal of ground in this discussion, it is true. I do not think any part of it, however, has been irrelevant, or very little of it, except such parts as have been injected by Senators upon the other side of the Chamber, chiefly by the advocates of this bill. While the dictionary question, which the Senators upon the other side brought in, was not altogether relevant, I must say it was illuminating and that the Senate has derived a great deal of valuable information upon that question.

Mr. President, what the Senator from North Carolina [Mr. OVERMAN] read to the Senate was exceedingly pertinent to the merits of the question under discussion. The plain fact behind all this effort to secure ship subsidy is that a number of people, instead of putting their own energy, their own enterprise, and their own capital into the business, call upon the Government to finance their operations at the expense of the taxpayers of the United States. They are hoping to draw their fat dividends not from the profits of the business, but from the taxes of the American people. Let me give you an illustration of how this bill will work if it be enacted into law.

Here is the case of a ship called the *Morro Castle*, which plies between New York and Rio de Janeiro. A calculation has been made of the daily consumption of coal by that ship, the price of the coal, the number of the crew, their wages per day, and the cost of feeding the crew. Taking all the expenses of running the ship between New York and Rio de Janeiro, it appears that the total cost of coal is $11,220, of wages $4,206, of food $2,234, making a total of about $15,600 per trip. The subsidy that this vessel would receive under the terms of the bill would be $33,333.33. There would be a clear profit derived from the subsidy alone of about $17,600 on every trip, and a profit every year of $424,145, or in ten years, under the operations of this bill, $4,241,455.20. That would be the amount, Mr. President, by which the subsidy would exceed the total cost of the operation of that vessel, not simply to make up any losses that might occur in the operation of it, but it would pay

the whole cost of running that vessel and, over and above that cost, would pay a profit of $424,145.52 per annum, and for ten years $4,241,455. Mr. President, it is impossible to characterize too severely a measure under which such a thing as that may occur. This is not a bill to enable a ship to run in competition with foreign vessels, but it pays all the running expenses of that vessel, the wages, the cost of coal, and the feeding of the crew, and then gives a clear profit over and above that in the amount I have named.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from New Hampshire?

Mr. CARMACK. I do.

Mr. GALLINGER. What vessel did the Senator make his calculation upon?

Mr. CARMACK. The *Morro Castle.*

Mr. GALLINGER. What is the speed of that vessel?

Mr. CARMACK. Sixteen knots, I think.

Mr. GALLINGER. I think the Senator is mistaken.

Mr. CARMACK. No; I am not. It is a 16-knot ship.

Mr. GALLINGER. Of course the Senator knows that under the provisions of this bill, if the bill should be passed—which I trust it will be—it will be necessary to construct new ships of 6,000 tons, with a speed of 16 knots. We have very few vessels extant that can make 16 knots; in fact, there are, I think, only two or three carrying the American flag. These will be extremely expensive ships. I did not exactly catch the Senator's statement on that point.

Mr. CARMACK. I have calculations here on two vessels—the *Esperanza* and the *Morro Castle.* The *Esperanza*, however, is only a 14-knot ship, but the *Morro Castle* is a 16-knot ship.

Mr. GALLINGER. Those are foreign vessels. Would the Senator kindly allow me to look at that statement?

Mr. CARMACK. Yes, sir.

Mr. GALLINGER. Because this is a practical matter that is legitimate for discussion.

Mr. CARMACK. Mr. President, you say you can establish a merchant marine by such a system of bounties. Maybe so—you could grow oranges in New Hampshire if the Government of the United States would only provide a large enough bounty to cover all losses and pay dividends besides. No business deserves to succeed if it can not succeed except at the expense of all other industries. If the capital of the country has not gone into the building of American ships, it is because it found more profitable employment in other fields. It was not a losing but a paying business to let others do the carrying while our capital was employed to better advantage in other lines of business. To divert this capital by law from enterprises in which it is earning honest dividends into a business which can only be supported by taxing every other industry in the land is, from an economic point of view, waste and profligacy and from a moral point of view spoliation and robbery.

But there is an honest way to build up our merchant marine, not by taxing, but by untaxing the people. There was a time when American vessels did nearly all of the carrying trade of the United States. It was a time when we had no subsidies; but we did have a low tariff. American exports were then carried in American bottoms, and the American flag was on every sea. The same policy would restore like conditions.

I ask the Secretary to read the extract which I have marked.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

[Congressional Record, February 26, 1907, page 4110.]

SHIP SUBSIDIES AND HIGH TARIFF.

John Roach, protectionist shipbuilder, to a special committee of the House, in 1869, said:

"America has lost her commerce, and what has she obtained in exchange for it? Simply the right of a few men to charge $9 per ton in gold on the importation of pig iron. Pig iron is the basis of all other metals connected with the making and repairing of ships. There has been a revolution in shipbuilding, and iron is the material from which they are now built. The high cost of iron produced by the tariff upon it is one of the principal difficulties our commerce has to contend with. I did not come here to ask a bounty. I came here to tell you that while all other articles of American produce are protected to a great extent, there is no protection for American ships. If Congress will take off all the duties from American iron, reducing it to the price of foreign iron, then we are prepared to compete with foreign shipbuilders. The labor question is mistaken; we are prepared to meet that difficulty and to ask no further legislation on the subject."

Mr. Morrill, protectionist Republican, asked Mr. C. H. Cramp as to the rate of duty imposed on shipbuilding material, and Mr. Cramp replied:

"About 40 per cent; and if our shipbuilders could be relieved from that, they could compete successfully with foreign shipbuilders. The difference in the cost of labor would be overcome by the superiority of American mechanics. Wooden ships will no longer be built, since iron ships are superior in every respect."

Senator Chandler, of Michigan, in 1872, said:

"It is desirable to own iron ships, very desirable, and I hope to see the day when we shall have our old supremancy in shipping, but it never will be done in the world by subsidies. It is not the subsidized lines of Great Britain that pay the largest returns. * * * You will never restore your flag to the ocean by subsidies, I care not how great you may make them; you may increase your subsidies to $10,000,000 a year, and you will not restore your flag."

Senator Morrill, of Vermont, in 1872, said:

"Is it practicable to recall our shipping? I think it is, and by the simplest process. Not a dollar of subsidies. Give us cheap materials and we will do it. Give us the ground on which we stand, so that we shall have our materials just as cheap as they can be afforded elsewhere, and then all these shipyards and all that skilled labor will be at work at once; and you will find that we shall restore the balance of the shipping interests on the ocean that now stands against us."

Senator Sherman, May 4, 1872, said:

"Since we can not build these vessels within 20 or 30 per cent of the cost in England, why not admit them free? Why not admit them duty free, raise the American flag upon them, put American officers upon their decks, and have American lines instead of British lines? Why, sir, if that bill should pass authorizing foreign ships when owned by American citizens to be used for the present for three years under the American flag one-half of the lines between New York and England would be American lines in sixty days."

UNITED STATES PREDOMINANT IN IRON AND STEEL MAKING.

President McKinley submitted January 29, 1901, to Congress an official Review of the World's Commerce, which at page 22 states:

"The most striking fact in our export development is the remarkable growth of the foreign demand for our iron and steel, our exports amounting to nearly $130,000,000 in 1900 against $32,000,000 in 1895. In an article in the New York Evening Post of January 12, 1901, Mr. Andrew Carnegie says the United States has not only supplied its own wants 'but is competing to supply the wants of the world, not only in steel, but in the thousand and one articles of which steel is the chief component part,' and expresses the opinion that the increasing demand from the world at large 'can be met only by the United States.'

"'The influence of our steel-making capacity,' adds Mr. Carnegie, 'must be marvelous, for the nation which makes the cheapest steel has the other nations at its feet as far as manufacturing is concerned in most of its branches. The cheapest steel means the cheapest ships, the cheapest machinery, the cheapest thousand and one articles of which steel is the base.'" (Review of the World's Commerce, 1900.)

CHEAPNESS OF AMERICAN GOODS.

"It is the relative cheapness of American steel that has given it preeminence, and it is the same with other products that are winning their way abroad. Economy of production is the master key that unlocks for us markets that seemed a little while ago to be inexorably closed. This economy of production implies not merely low prices to the foreign consumer, but a greater degree of excellence, a superior adaption to his wants. As he has been pointed out in the Reviews, as well as elsewhere, the American workingman, though receiving higher wages, produces, with labor-saving machinery, at a lower unit of cost, and his greater application and ingenuity enable him to avail himself effectively of the most recent inventions and appliances for improving the quality of his special line of work. The American factory system is highly organized and more efficient than any other, and if our export trade were as well developed, there would be little to fear." (Review of the World's Commerce, 1900.)

Mr. GALLINGER. Will the Senator from Tennessee yield to me for a request?

Mr. CARMACK. With pleasure.

Mr. GALLINGER. I ask unanimous consent that to-morrow at 11 o'clock a vote be taken on this bill.

Mr. McLAURIN. I object.

The VICE-PRESIDENT. Objection is made.

Mr. GALLINGER. Then I ask unanimous consent that at 11.30 o'clock to-morrow a vote be taken on the bill.

Mr. CARMACK. I object.

The VICE-PRESIDENT. Objection is made.

Mr. GALLINGER. Of course, Mr. President, I am at the mercy of the gentlemen who intend to talk the bill to death, and I have no redress.

Mr. CARMACK. I am glad the people of the United States will not be at the mercy of this bill.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from New Hampshire?

Mr. CARMACK. With pleasure.

Mr. GALLINGER. The statement that was just read quoted the late Senator Sherman as saying that if we had free ships this entire problem would be solved. I call the attention of the Senator from Tennessee to the fact that if he will examine the testimony taken by the late Merchant Marine Commission he will find that the leading capitalists in Boston and New York were asked if in the event of a free-ship bill passing they would invest any money in the shipping business, and they all replied without hesitation that they would not do so, that they could not sail those ships at a profit, because of the increased cost as compared with foreign ships, but, on the contrary, that they would have to sail them at a loss, and not a dollar would they invest in them.

One other point, if the Senator will kindly allow me. The Senator has just submitted a calculation as to the profits that would result on this line to Argentina, the bill allowing $800,000 a year for fortnightly service. In the Senator's calculation—and I want him to look at this matter seriously—he made no allowance whatever for interest on the investment, for insurance, for depreciation, which is 5 per cent on the cost of a vessel, or for administrative expenses, and many other things.

One other point that I want particularly to call to the attention of the Senator from Tennessee. He assumed in his calculation that one ship could perform this service, while it will be absolutely necessary to place four ships on the line to Brazil and five ships on the line to Argentina. So the alleged profit of $424,000 a year would have to be divided by four in one case and by five in the other. It would make a very great difference in the calculation the Senator made if he should take that into consideration.

Mr. President, in reference to free ships I want to add one more word, and that is, that if we have free ships it means the closing of American shipyards and throwing out of employment American workmen and keeping the shipyards of foreign countries and the workmen of foreign countries employed.

Mr. CARMACK. Of course capitalists would never invest in the building of ships without a subsidy as long as they had a hope of getting a subsidy. I believe if that hope had been dispelled some time ago, American capital would already have begun the work of building ships.

Right in this connection and on that very point I wish to have read a statement of Mr. W. E. Kay, who appeared before the Merchant Marine Commission, of which the Senator from New Hampshire was the chairman. I ask the Secretary to read the extracts I have marked.

The VICE-PRESIDENT. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

Mr. GOODYEAR. There is a gentleman here who has been a part of Brunswick, a part of its growth and development since his boyhood, with whom I have never agreed on anything, with one exception, and that is in loving him. I want to hear from W. E. Kay.

Senator MARTIN. The Commission will be delighted to hear from Mr. Kay.

Mr. KAY. Mr. Chairman and gentlemen, I know as little of this question as any gentleman who has spoken. [Laughter.] I would not consume the time of this Commission by discussing the possible growth of our southern ports, for that cuts no figure in the great national question, Shall the American merchant marine be upbuilt, and how? The great fathers of this Republic thought it wise and proper to put upon the statute book, as a part of the American system, restriction upon the introduction into this country of foreign-built vessels, but they failed, when they wrote those laws upon the statute book, to put in a corresponding inducement in the shape of bounties on tonnage or premiums upon mileage or mail subsidies, to counteract what I consider to be the baleful effect of such legislation.

I am speaking only for myself. But how is it possible to have an American merchant marine, all steel-built vessels, in competition with foreign-built vessels, under the varying conditions, as they exist, of higher prices of labor in this country, coupled with a protective system which puts up the price of the material that goes into the ship, and then expect that in the great markets of the world the American ship, built at a higher price, at a higher rate of wages, and at a higher cost of provisioning and operating, can compete with the cheaper-built ship, the cheaper manned, and the cheaper provisioned foreign ship?

* * * * * * *

Under our protective system we can not build ships in this country as cheaply as they can be built abroad, and yet we wonder that American ships do not fill the seas. How can we expect that American tonnage will enter foreign ports in competition with the cheaper class of foreign ships unless we put our ships upon the same basis on which the foreigner puts his ships which are in competition with ours?

OPPOSED TO THE PROTECTIVE SYSTEM.

Shall it be that the protective tariff will be removed from the materials that enter into the construction of a ship, or shall we have the privilege of seeing the American flag upon American ships in the oceans of the world by reason of a bounty per mile? Shall a great nation add to the cost of the ship and load down its tonnage charge and charter parties with the extra cost that the protective system of tariff necessarily implies—taxes addtional to those under which it is suffering—for the purpose of carrying its cargo in American bottoms?

I, for one, think the people of the United States have been taxed to a point almost beyond endurance in the matter of creating industries, and although it be a discordant note in this assembly, I would not respect myself if I did not declare here and now the sentiment that the competition in commerce upon the seas must be carried on like the competition in every other business. The ship which can carry at the lowest price will get the business. When these people are loaded down with taxes, are additional levies to be put upon them to create an American merchant marine to add to the burden under which they are already suffering? I, for one, would prefer that the German flag should float on the German ship and the English flag on the English ship, and that those ships should carry our cotton from southern ports to the United Kingdom and foreign ports if for the proud privilege of waving the American flag upon the bottom that is to carry our cotton across the seas each and every humble citizen in this country is to be taxed upon every element of food that enters his mouth, or every element of clothing he puts upon his back, to pay for a bounty upon shipping in order that this country may have a merchant marine.

DESTROY THE TARIFF.

These sentiments are not popular; they may not appeal to my hearers, but the issue is squarely presented to the American people: Shall the Government, in order to attempt to enable our people to compete in a field where business sense tells them they can not compete on ordinary principles, by the exercise of the power of taxation put upon the people such a burden in the shape of bounties or mail subsidies or otherwise as will enable the nation to have its ships float upon the seas, as a result not, Mr. Chairman, of the direct competition between might and worth, but rather because it is a bounty-fed proposition; or will they, on the other hand, in order that equality may be brought about, repeal the protective system that the fathers threw about American shipping, or the protective tariff that makes it almost impossible to build in this country a ship at such a price that it may navigate the seas in contradistinction to foreign vessels?

As I say, the sentiments I am uttering may not appeal to my audience, but the question is there, and it is a practical question. You can not have American-built steel ships under the present system, and you must, under the present system, have one of two things. You must either enact free shipping laws and let the foreign-built vessel come under the American flag and compete in the markets of the world, or you must tax your people, as you are now taxing them through the protective tariff, the amount of the duty laid upon the steel plates and the steel shapes and everything else that enters into the construction of vessels, and add that and load down the charter-party rates and have the Government pay it in order that we may have American-built vessels flying the American flag.

The materials may, by a system of rebates, be admitted free. You may call it an element entering into the cost, but it is not the whole cost. At last the labor and every other element, except the sheets and plates, that enter into the construction of a vessel are protected by law as against the foreign-built vessel. You must go further. Not only by your legislation must you relieve shipbuilders of the duty upon the raw material, but you must open the construction of vessels to the competition of the whole world if you are going to have it so that the world can bid upon shipping. [Applause.] I am glad to answer the question.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from New Hampshire?

Mr. CARMACK. With pleasure.

Mr. GALLINGER. I dislike to interrupt the Senator, but he is so kindly disposed that I will venture to make an observation in connection with what has just been read. It was not my privilege to meet with the members of the Merchant Marine Commission at southern ports, but I have read carefully all the testimony which was taken there.

Now, Mr. President, this gentleman speaks of the tax that will be imposed upon the American people because of this legislation. If this legislation should go through, as I trust it will, it will result in building twenty-two ships in American shipyards of 6,000 tons burden or over, giving employment to American workmen and likewise using up a great deal of the products of the forests and the mills of the United States. That $2,600,000 would be a tax of just about 3 cents on each man, woman, and child in the United States. So this tremendous tax that has been pictured is really not worth very much consideration.

Now, let me paint another picture. We have spent $12,000,000 on the harbor of Galveston. Twelve million dollars have been taken from the Treasury and the American people have paid it in one form or another in the way of taxation to deepen that harbor and to remove obstructions. All of the enormous commerce carried out of that harbor is carried in foreign vessels, with one exception, and that is an American schooner of 300 tons burden. All the products of the fields and factories of the South that find their outlet at Galveston are carried in foreign steamships, with the exception of that one lone schooner, and we have spent $12,000,000 of the people's money in deepening and widening the channel for the accommodation of foreign steamships.

If the Senator thinks that is a desirable condition of things, I can not agree with him, nor do I believe the American people approve of it.

I want to thank the Senator for permitting the interruption.

Mr. CARMACK. I am glad to yield to the Senator.

Mr. President, I think the argument of the Senator from New Hampshire, with all due respect to him, is entirely fallacious. What has it to do with the question of commerce in the harbor of Galveston or any other harbor? It is carried in foreign vessels if carried more cheaply in foreign vessels than in American vessels and if it pays the American people to have products carried in foreign vessels instead of carrying them in their own.

I have heard the argument made over and over again that we pay great subsidies to foreign shipowners because they are carrying American trade and because they are doing so large a part of our carrying trade. It seems to me that this argument is entirely fallacious. You might as well say that the tailor pays a subsidy to the shoemaker for making his boots instead of doing the work for himself. You might as well say that the people of Maine pay a subsidy to the fruit growers of California and that they ought to be repaid by a system of subsidized hothouses.

We have been paying other people to do our carrying because we found it more economical to let them do it than to do it ourselves. So long as we sell abroad we must take the work of other people in paying for our surplus products. There is no article that we import from any country that does not represent so much work which we permit other people to do for us, instead of doing it for ourselves. There is no more subsidy in taking pay for our agricultural or manufacturing exports in

transportation than there is in taking pay for goods that are brought in. So long as the service is rendered for a fair compensation there is no subsidy, but whenever more than a fair price is exacted by a law which takes from all the people to give to a few it is a subsidy.

Mr. McLAURIN rose.

Mr. CARMACK. I yield to the Senator from Mississippi.

Mr. McLAURIN. Along this line, Mr. President, I will say to the Senator that this House bill, which is called "an amendment," but which really has never been referred to any committee of the Senate, provides that a subsidy shall be paid to corporations when a majority of the stock is held by citizens of the United States. Now, if 50½ per cent of the stock in one of these corporations is held by citizens of the United States and 49½ per cent by foreigners, this bill of the House, never referred to the Committee on Commerce or any other committee of the Senate, proposes not only to provide these magnificent harbors for ships for foreigners, but to pay those foreigners a subsidy.

Mr. CARMACK. The point is well taken, Mr. President. The bill proposes to pay foreigners not only the 49½ per cent, but there may be a great deal of fraud with respect to the 50½ per cent. A large majority of the stock might possibly be owned by foreigners, and they may be drawing subsidies from the American Treasury.

Mr. LATIMER rose.

Mr. CARMACK. I yield to the Senator from South Carolina.

Mr. LATIMER. Mr. President, I want to ask the Senator from Tennessee, or the Senator from New Hampshire, if they can give me the information, what proportion of the $200,000,000 paid to foreign shipowners is really paid to Americans who own ships that are sailing under a foreign flag?

Mr. CARMACK. Perhaps the Senator from New Hampshire can answer that better than I can.

Mr. GALLINGER. I have no knowledge of any company of Americans owning any ship that flies a foreign flag. There are undoubtedly some Americans who own stock in those ships to a limited extent. I can not definitely answer the Senator's question.

Mr. LATIMER. I want to know what proportion of the stock is so held.

Mr. GALLINGER. The Senator is asking an impossible question.

Mr. LATIMER. It is claimed by those who are advocating this legislation that we are paying out tremendous sums of money to foreign shipowners for carrying American commerce.

Mr. GALLINGER. We are paying, approximately, $200,000,000 a year to foreigners who are carrying our commerce, and that is distributed abroad, while, if we had American ships, it would be distributed in the United States.

Mr. LATIMER. The point I am after is what amount of that money really goes to Americans who own stock in foreign ships?

Mr. GALLINGER. I presume they get a little something by way of dividends. They have relatively a very small amount of stock.

Mr. SIMMONS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. CARMACK. Certainly.

Mr. SIMMONS. I discover that the Senator from Tennessee has given very deep study to the subject under consideration. I have been very much interested in his brilliant and illuminating discussion and analysis of this important question. I have no doubt the Senator in the course of his investigation has had occasion to consider the method of subvention of our American merchant marine by the application of a discriminating duty. Several methods have been suggested as means of restoring our merchant marine, but of all suggested methods for the accomplishment of this great object, I think the most equitable and just is that of discriminating duties.

I believe that a rebate of 10 per cent of the duties on all imports brought to this country in American bottoms will do more toward restoring our merchant marine to its old-time prestige and prosperity than the scheme of subsidies and bounties provided in this bill, and I am certain it will be far more just to the taxpayers of this country. While restoring our merchant marine, it would to some extent relieve the people of the present unjust burdens of tariff taxation. If the bill now under consideration shall reach a vote, I shall propose a substitute for it providing in substance, that hereafter all dutiable articles of foreign production brought into this country in vessels built and registered in this country the rate of duties to be levied, collected, and paid to the United States shall be reduced 10 per cent of the rates leviable against such articles under our tariff laws.

Mr. LODGE. Mr. President——

The VICE-PRESIDENT. Does the Senator from North Carolina yield to the Senator from Massachusetts?

Mr. SIMMONS. Certainly.

EXECUTIVE SESSION.

Mr. LODGE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After thirty minutes spent in executive session the doors were reopened, and the Senate (at 6 o'clock p. m.) took a recess until 8.30 o'clock p. m.

## EVENING SESSION.

The Senate reassembled at the expiration of the recess.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

The VICE-PRESIDENT. The pending question is upon the motion of the Senator from New Hampshire [Mr. GALLINGER] to concur in the amendment proposed as a substitute by the House of Representatives.

Mr. CARMACK. Mr. President——

Mr. DUBOIS. Will the Senator from Tennessee yield to me?

Mr. CARMACK. I shall be glad to yield to the Senator from Idaho.

Mr. KEAN. I trust the Senator from Idaho will not interrupt the Senator from Tennessee just at the moment he is beginning his remarks.

The VICE-PRESIDENT. The Senator from New Jersey is out of order. The Senator from Tennessee yields to the Senator from Idaho.

Mr. DUBOIS. Mr. President, I think I notice the lack of a quorum.

The VICE-PRESIDENT. The Senator from Idaho suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and after a little delay the following Senators had answered to their names:

| | | | |
|---|---|---|---|
| Allison | Dick | Kean | Perkins |
| Bailey | Dillingham | Kittredge | Pettus |
| Berry | Dubois | Lodge | Piles |
| Blackburn | Flint | Long | Rayner |
| Burnham | Frazier | McCumber | Scott |
| Burrows | Fulton | McLaurin | Smoot |
| Carmack | Gallinger | Mallory | Taliaferro |
| Clapp | Gamble | Millard | Tillman |
| Clay | Hale | Mulkey | Warner |
| Culberson | Hansbrough | Newlands | Whyte |
| Cullom | Heyburn | Overman | |
| Daniel | Hopkins | Patterson | |

The VICE-PRESIDENT. Forty-six Senators have answered to their names. A quorum is present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 25812) to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania.

The message further announced that the House had passed the following joint resolutions, in which it requested the concurrence of the Senate:

H. J. Res. 219. Joint resolution providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency;

H. J. Res. 229. Joint resolution to provide for the printing of 250,000 copies of the Special Report on the Diseases of the Horse;

H. J. Res. 255. Joint resolution providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session;

H. J. Res. 256. Joint resolution authorizing the Attorney-General to print 850 copies of the Session Laws; and

H. J. Res. 257. Joint resolution authorizing the Secretary of the Treasury to print 1,000 additional copies of the Annual Report of the Director of the Mint.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

S. 360. An act to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.;

S. 6249. An act to provide for the establishment of an agricultural bank in the Philippine Islands;

S. 8189. An act granting to the St. Louis, Iron Mountain and Southern Railroad Company, a corporation, the right to construct, maintain, and operate a single-track railway across the lands of the United States in the southeast quarter of the northeast quarter of section 21, township 14 north, range 6 west of the fifth principal meridian, in the county of Independence and State of Arkansas, reserved for use in connection with the construction of Lock No. 1, upper White River, Arkansas; and

S. 8299. An act to confer certain civic rights on the Metlakahtla Indians of Alaska.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 6, 8, 11, 12, 19, 20, 21, 25, 61, 64, 65, and 74.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 7, 9, 10, 13, 14, 15, 16, 17, 18, 22, 24, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 60, 62, 63, 66, 68, 69, 70, 71, 72, 73, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, and 129, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$15,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$5,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: After the matter inserted by said amendment insert, as a separate paragraph, the following:

"That the accounting officers of the Treasury be, and they are hereby, authorized and directed to relieve John W. McHarg from a charge of $622.68, which was made against him while he was serving as acting commissary of subsistence in Cuba in 1899 and 1900, and which was due to the embezzlement of one Gomez, a Cuban interpreter."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: Add after the word "dollars," at the end of said amendment, the following: "; and the salaries of said clerks are fixed at $4,000 per annum each, and for such increased salaries there is appropriated for the fiscal year 1908 $1,000 each;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To pay William B. Turner for preparing an index to the report of the French Venezuelan Claims Commission, $200."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$6,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: Strike out the matter inserted by said amendment, and on page 62, in line 4, of the bill, after the word "fifty-six" insert: ", and in Senate Document Numbered Three hundred and sixty-nine;" and the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
HENRY M. TELLER,
*Managers on the part of the Senate.*

LUCIUS N. LITTAUER,
JAMES A. TAWNEY,
STEPHEN BRUNDIDGE, Jr.,
*Managers on the part of the House.*

Mr. McLAURIN. Yesterday, Mr. President, some astonishment seemed to be manifested because of an amendment I offered to pay a sum to the remonstrants who remonstrated against the seating of the senior Senator from Utah. I did not at that time know that there was any precedent, but it seemed to me from an innate sense of justice that if the protestee in that case was to be paid his necessary expenses, the same treatment ought to be accorded to those who remonstrated against the seating of the Senator from Utah.

My investigation has led me to find a precedent for the payment of the expenses of remonstrants as well as of the protestee. It is the case of the Hon. NATHAN B. SCOTT, of West Virginia.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

The report was agreed to.

IMMIGRATION COMMISSION.

The VICE-PRESIDENT. Some days ago the Chair appointed as a member of the commission authorized by the act to regulate immigration of aliens into the United States, which was approved by the President on the 20th of February, the Senator from Mississippi [Mr. McLAURIN]. That Senator is unable to accept the appointment, and the Chair appoints the Senator from South Carolina [Mr. LATIMER] as a member of the commission.

COMMITTEE SERVICE.

Mr. CLAPP. Mr. President, owing to the pressure of other duties, I feel constrained to ask to be excused from further service on the Joint Committee on the Revision of the Laws.

The VICE-PRESIDENT. The Senator from Minnesota asks to be excused from further service on the Joint Committee for the Revision of the Laws. In the absence of objection, the request will be granted.

THE MERCHANT MARINE.

The Senate resumed consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. CARMACK. Mr. President, a good deal has been said here in the way of reproach——

Mr. DUBOIS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Idaho?

Mr. CARMACK. I yield to the Senator from Idaho.

Mr. DUBOIS. Mr. President, I address the Senator from New Hampshire [Mr. GALLINGER], and suggest that he cease pressing the consideration of the pending bill. I differ somewhat from my friend from Tennessee [Mr. CARMACK] in regard to filibustering. I think he has established very fully from Webster the definition of filibustering; but I am content to accept the definition which appears in the Century Dictionary, as offered by the Senator from New Hampshire. I think he ought to permit us to proceed in an orderly way and at leisure and allow Senators to have bills passed to which there is no particular objection, without keeping the Senate here in almost continuous session.

Under existing circumstances a filibuster is justified and should be resorted to, but there never has been a successful filibuster, according to the definition offered by the Senator from New Hampshire through the Century Dictionary, which is the opposition of a minority to the majority, unless there has been a majority not only of the Senate, but of the people behind the filibuster.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from New Hampshire?

Mr. DUBOIS. I do.

Mr. GALLINGER. Will the Senator from Idaho test his statement that a majority of the Senate is back of the filibuster by agreeing to vote now?

Mr. DUBOIS. I will not, because of the superb organization of the other side of the Chamber, which superb organization may be our undoing, for my relations with the other side of the Chamber have been such, and I am glad to say they are such now, that I know that side of the Chamber as well as I do this side of the Chamber, and there are not one-third of the members on that side of the Chamber who want this bill to pass, yet every one of them, through the superb organization of the Republican party, would vote for this bill if it were presented to the Senate.

Mr. CLAPP. Mr. President——

The VICE-PRESIDENT. Does the Senator from Idaho yield to the Senator from Minnesota?

Mr. DUBOIS. I do.

Mr. CLAPP. I can hardly let that statement pass unchallenged. For one I would vote against this bill or any other equally important measure of this kind that came as late to this body as this bill has come.

Mr. DUBOIS. Mr. President, I do not want to say, and I must not in the closing hours of my service say, to the Senate anything that would be offensive to anyone in this body. I do not intend to do that; but I know, and I know from private conversations with Senators on the other side, that they do not want this bill to pass. My friend from New Hampshire on principle is in favor of ship subsidies. He has made a splendid fight for them for years, and he would accept this as in a measure carrying out his wishes. There are two or three other Senators—I think not more than two or three—on that side who are so intensely in favor of ship subsidies that they would vote for this measure as a stepping stone to something additional in the future. The great majority, however, and the great majority who voted for the bill of the Senator from New Hampshire, do not accept with any complaisancy at all the bill as amended by the House. They do not want it, and I should think, after the very great fight the Senator from New Hampshire has made, that he would be better contented, having gotten some public sentiment more than ever before in favor of ship subsidy, to wait until the next session of Congress, and then have passed again his original bill, have the other House agree to that, and have it become a law.

Mr. President, I have been engaged in some filibustering. I recall very well just before I became a member of this body, when I was a Member of the other House, the force bill. That bill had passed the House and was pending in this Chamber. There was a determined filibuster organized against it, and it was fought out for months. Finally the bill was displaced and beaten. There is not a Senator on that side, there is no one in the country, who is not glad that it was beaten. That was a thoroughly organized filibuster, and it was proper and right, as the event demonstrated.

Immediately after that, when I became a member of this body, in 1891, there was an organized filibuster against the repeal of the silver-purchasing clause of the Sherman Act. I was designated by the Democrats and the Republicans—I being a Republican then—to lead that filibuster. I know most of you recall how determined it was. It continued for months, with night sessions, and every tactic was resorted to which we could think of. Behind those of us who were filibustering was the united support of our own people, yet in the end we had to succumb. The majority of this body was determined to repeal the silver-purchasing clause of the Sherman act; the people of the country had made up their minds that it must be repealed, and at the end, although we were supported by our united constituency, we were forced to quit. I recall very well the time and the occasion when we abandoned our fight.

There never has been a filibuster in this body which was successful unless it was supported by a majority of the Senate, backed by a majority of the people, and this filibuster—for that is what it is—is supported by a majority of the Senate. The Senator from New Hampshire could pass this bill if he had behind him the earnest, active support of his own party. He has made his record, and I ask him to stand on his record, and to come back at the next session of Congress with his own bill, and have it passed again through the Senate, as he succeeded in getting it passed in the first session of this Congress. The people of the country having become more and more educated to the idea they will induce the House of Representatives to support his bill if it is worthy.

The Senator knows and that side knows that the House of Representatives is not in favor of this bill. They would not accept the bill as originally drawn and as it passed the Senate; but by a bare margin they accepted a bill which they sent over here in the closing days of the session, knowing that we would kill it. They knew that perfectly well. They had the bill in that House for months, and there can be, in my judgment, no justification for the Senator from New Hampshire insisting further on the passage of this bill. In the interest of all of us, and in his own interest, I ask him if he will not yield, withdraw the bill, and allow the different Senators who have private measures which are not objectionable an opportunity to secure their passage? It goes without saying, because the Senator from New Hampshire knows it full well, that there is such an organization here that we can talk the bill out. There is no attempt to disguise the fact on this side that this bill shall not become a law, and it seems to me that the Senator from New Hampshire has had a test of strength sufficient to justify him in accepting the situation as it is.

Mr. CARMACK. Mr. President, I wish to say something in line with what has been so well said by the Senator from Idaho [Mr. DUBOIS].

Mr. SIMMONS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from North Carolina?

Mr. CARMACK. I will yield to the Senator in just a little while.

We have been reproached several times in the course of this discussion with the charge that we were resorting to improper methods to delay action upon this bill. The truth is, Mr. President, that we have not been trying to prevent, but we have been trying to secure consideration for this bill. By no other means, except by those to which we have resorted, would it have been possible to have secured for this measure anything like a full and fair and deliberate consideration. You may say it was for purposes of delay, but it was also, Mr. President, for purposes of deliberation.

The Senator from Minnesota [Mr. CLAPP] said—and I think he announced a very correct rule and principle of conduct—that he would not vote for any important measure that came to this body as this measure has come in the closing days of the session. This bill has come here, Mr. President, without having been considered by any committee of the Senate, without being reported by any committee of the Senate, practically a new measure, and here in the very closing hours of this session we are expected to take up the bill and rush it through to a vote without anything like a fair and full consideration. The tactics to which we have resorted have been only for the purpose of giving the Senate an opportunity to do what it would not otherwise have the opportunity to do.

I do not believe in filibustering as a general principle. I have never been eager and ready to resort to dilatory tactics, and I do not believe that such tactics should ever be resorted to for purposes of delay, except in the case of some measure of very extreme importance or for the purpose of securing such delay as will be necessary to fair deliberation upon the question at issue.

The Senator from Idaho referred to the filibuster conducted here against the bill to repeal the purchasing clause of the Sherman Act. If I remember rightly, Mr. President, there were two sets of filibusterers in that case. The opponents of the bill were the first filibusterers. If the vote had been taken when that measure was first presented to Congress, it would have been defeated; but the supporters of that measure protracted and delayed its consideration until they obtained a majority of both Houses of Congress and then pressed it to a vote. The other side then filibustered until, while I believe a majority of the people were really behind them, a majority of the people and the majority of both Houses of Congress did not continue to support any further protraction of the dilatory tactics.

We saw dilatory tactics resorted to on the other side of the Chamber in the consideration of the statehood bill. I believe every Senator in the Chamber knows and recognizes the fact that Senators upon the other side of the Chamber, especially the New England Senators, making a majority of the Republicans on the other side of the Chamber, were against that bill; but a minority of the Republicans united with the Democrats, making a majority for the bill, and a majority of Senators upon the other side of the Chamber united in what was practically a filibuster, in speaking and continuing to speak and resorting to all methods for the purpose of delay in order to put the bill over until another session of Congress. That was no violent crime on their part. I was not in sympathy with the Senators who were conducting that movement, and yet I could not feel that they were committing any great crime. They were simply postponing the question for full and further deliberation. If they had conducted it indefinitely to defeat the bill, it would have been very wrong, and public sentiment would have forced a discontinuance of such tactics.

I remember further, Mr. President, that the distinguished

Senator from Montana [Mr. CARTER] conducted a filibustering speech in this Chamber for I do not know how many hours, until he had succeeded in killing the river and harbor bill.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Montana?

Mr. CARMACK. With pleasure.

Mr. CARTER. Do I understand the Senator to use the word "filibuster" in its vulgar sense, or in the sense that Webster defines it? [Laughter.]

Mr. CARMACK. Mr. President, since my friend from Idaho has deserted me on the dictionary proposition, I have yielded upon that, and accept the vulgar definition, as I see the Senators upon the other side of the Chamber are determined to hold to it in that sense.

Mr. CARTER. That, then, has become the Tennessee idea. [Laughter.]

Mr. CARMACK. For the present. [Laughter.]

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Tennessee yield to the Senator from Nevada?

Mr. CARMACK. I yield.

Mr. NEWLANDS. If the Senator will yield to me for a moment, I desire to say to the Senator from New Hampshire that just before the recess was taken he made some very interesting observations regarding the purpose and the effect of this bill. I understood him to say that the maximum number of ships employed on the subsidized lines would be about twenty-six. Am I correct in my recollection?

Mr. GALLINGER. I would say to the Senator, Mr. President, that the number of new ships, of 16 knots speed and of 6,000 tons and upwards, expected to be constructed, provided this bill becomes a law, is twenty-two.

Mr. NEWLANDS. Twenty-two. May I ask the Senator what would be the probable cost of those ships?

Mr. GALLINGER. Mr. President, I am unable to state that definitely. I have stated the tonnage, and the Senator can figure that himself, if he has any knowledge of the subject.

Mr. NEWLANDS. My recollection is that in the debate of a year ago it was assumed that a ship of 6,500 tons, running at a speed of 14 knots, would cost about $900,000 or $1,000,000. I assume that a 16-knot ship would cost more. Can the Senator inform us how much more?

Mr. GALLINGER. I can not. I have no expert knowledge. I think it is safe to say that each one of the ships would cost a little over a million dollars.

Mr. NEWLANDS. Will the Senator also inform us as to whether these ships would receive the maximum subsidy called for by this bill or the minimum? As I understand, the minimum subsidy is about $1,750,000 each year and the maximum $3,500,000.

Mr. GALLINGER. The Senator has not been as diligent as he usually is in reading bills. The minimum is for a monthly service, the maximum for a fortnightly service. The amount is the same for each voyage.

Mr. NEWLANDS. The maximum, the Senator says, is for a fortnightly service.

Mr. GALLINGER. It is.

Mr. NEWLANDS. And the minimum is for a monthly service?

Mr. GALLINGER. That is correct.

Mr. NEWLANDS. Then, am I correct in saying that the fortnightly service will cost about $3,750,000 per annum?

Mr. GALLINGER. For the four lines, does the Senator mean?

Mr. NEWLANDS. For all the lines.

Mr. GALLINGER. Precisely $2,600,000.

Mr. NEWLANDS. That would be the maximum cost, then, under this bill?

Mr. GALLINGER. For a fortnightly service.

Mr. NEWLANDS. For a fortnightly service?

Mr. GALLINGER. Yes.

Mr. NEWLANDS. And that running for ten years would make $26,500,000?

Mr. GALLINGER. The Senator's mathematics is correct, but it would be years before all those ships could be built.

Mr. NEWLANDS. I am very much indebted to the Senator for getting my mathematics right.

Mr. GALLINGER. There is no charge for the information.

Mr. NEWLANDS. Unless my figures are right, I am afraid my remarks would fall to the ground.

Mr. President, it appears that we are to pay in ten years——

Mr. OVERMAN. I will ask the Senator from Nevada how much it will cost to carry out the last section of the bill?

Mr. NEWLANDS. The Senator from North Carolina is desirous of more information, and I should like to ask the Senator from New Hampshire as to what would be the cost under the last section of the bill relating to the naval reserve.

Mr. GALLINGER. I have not figured it out, I will say to the Senator, but it is an inconsequential amount.

Mr. NEWLANDS. It provides for 10,000 men.

Mr. GALLINGER. The maximum.

Mr. NEWLANDS. The maximum.

Mr. GALLINGER. Yes.

Mr. NEWLANDS. Can the Senator state what is the average amount paid to each man?

Mr. GALLINGER. It is stated in the bill. The Senator can read it for himself.

Mr. NEWLANDS. I have not an opportunity of reading it just now, and I supposed the Senator had it within his knowledge.

Mr. GALLINGER. The Senator's time is not any more valuable than mine.

Mr. NEWLANDS. My inquiry has been of service in one direction at least, and that is it indicates that the Senator in charge of this bill has about as little information in regard to its purpose and effect as the rest of us have.

Mr. GALLINGER. If I had as little as the Senator from Nevada has, I would not press the bill any further.

Mr. NEWLANDS. It is very evident that the Senator has very little, for he is unable to answer my question.

Mr. GALLINGER. Oh, yes; the Senator is able to answer it.

Mr. NEWLANDS. The Senator referred me to the bill itself——

Mr. GALLINGER. Certainly.

Mr. NEWLANDS. And I assumed that the Senator referred me to the bill because he was unable to give me the information.

Mr. GALLINGER. No; I was afraid the Senator would not think I was accurate, whereas if he read the bill he would know that he has accurate information. I want to help the Senator.

Mr. NEWLANDS. The Senator can help me by giving information without compelling me to read through the bill at the present time. I imagine very few Senators have been able to read through the bill or make the mathematical calculations necessary, and it is customary for the Senator in charge of a great bill of this kind, affecting the economics of the whole country, requiring a large expenditure of money, to be able to respond to the reasonable requests of Senators for information, and it seems to me it is all the more incumbent upon the Senator, when this bill is brought in in the closing days of the session, to fortify the bill with the answers required by Senators regarding it.

Mr. GALLINGER. If the Senator will permit me right here, it has been openly announced this evening that a Democratic filibuster is being conducted against this bill. The Senator must not expect me to supply him with intelligence to continue the filibuster.

Mr. NEWLANDS. I am very glad, then, to know that the purpose of the Senator is to suppress information with a view to facilitating and speeding rapid action upon this bill. I assume, therefore, that he wishes the country to be as ignorant of this bill as the Senate now is. It only illustrates the contention we have all made, that in the closing hours of the session it is unwise for a great party in control of the Government to push upon the consideration of the Congress of the United States by mere brute force a bill involving not only questions of great policy, but matters of large expenditure running through a series of years.

Mr. President, the Senator has given me sufficient information, however, to enable me to present a few objections to this bill. The Senator states that under this bill twenty-two steamers, costing an average of about a million dollars each, will be required to conduct this fortnightly service, the maximum service provided for by the bill. That means that the total expenditure will be about $22,000,000 for the construction of the ships necessary for this service. Those ships are to be constructed in American shipyards, at a cost 25 or 30 per cent above the cost of similar ships in foreign shipyards. It is assumed that a subsidy of $2,600,000 annually, running over a period of ten years and yielding in the aggregate $26,000,000, will induce Americans, full of enterprise and energy, to order the construction of ships costing $22,000,000.

It seems to me very safe to assume that it will encourage such construction, for upon the very face of the statement it appears that within ten years the men who order these ships constructed will receive $4,600,000 more than the ships cost, and it seems to me that that will be a pretty profitable operation.

Mr. BACON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Georgia?

Mr. BACON. Will the Senator permit me to call the attention of the Senator from New Hampshire to the question that the Senator from Nevada has already propounded to him as to the cost of the naval reserve, if I do not interrupt the Senator unduly?

Mr. NEWLANDS. Not at all. Proceed.

Mr. BACON. I desire to suggest to the Senator from New Hampshire that he is entirely justified in not answering the question of the Senator from Nevada not for the reason stated by the Senator, but because nobody can take the bill and make an estimate of what the cost of the naval reserve will be, for the reason which, if I may be permitted by the Senator from Nevada, I will now state.

I desire to say, however, before doing so that I do not make this statement in the line of what the Senator from New Hampshire suggests, of a desire to consume time, but for the purpose of stating what I think is a substantial objection to the bill. There is a part of the bill, so far as the general principle of it is concerned, that I would myself favor if it were correct in its details, and that is the part of the bill which looks to the establishment of lines of steamships between ports of the United States and ports in South America where we now have no lines. I am willing that there should be liberal mail compensation for the purpose of the establishment of such lines. I do not, however, favor the principle of a ship subsidy based on tonnage or length of voyage or time, where there is no reference to developing trade where none now exists between other countries and the United States.

Some Senators at least will recall that when the bill was before the Senate last year I gave my voice then in favor of a provision which would give liberal mail compensation to establish lines between this country and other countries where we now have none—such, for instance, as South America—and I have not changed my mind. I think it would be worth while and important for the United States, by the use of liberal mail compensation, to undertake to establish lines between this country and ports in South America where we now have none. It would build up an important and valuable trade between South America and the United States where there is now unfortunately so little.

But when it comes to the question of the naval reserve, about which the Senator from Nevada made the inquiry, that is an altogether different proposition. The proposition as to the naval reserve is that officers and men engaged in the service of private individuals who have steamship lines shall be paid certain amounts annually not for service rendered to the United States Government, but while they are exclusively in the service of such private individuals. The point I want to call attention to is that the provisions of the bill are such that no one can answer the question that the Senator from Nevada asked of the Senator from New Hampshire.

Mr. GALLINGER rose.

Mr. BACON. The Senator will pardon me for just a moment, in order that I may make my proposition clear.

After going on to provide for the enrollment of officers and men in what shall be known as a "naval reserve," and in a subsequent part of the bill limiting that number to 10,000, there is an enumeration of the various classes of officers and men who will be paid an annual amount by the United States Government while they are thus in the service of private shipowners; and I will read now, in order that what I suggest as to the impossibility of estimating what it will cost may be properly understood, the provision as to the payment of these officers and men.

Beginning on page 5, line 19, there is a specification of the amounts thus to be paid, as follows:

> For each officer of the line or Engineer Corps having the rank of lieutenant in the Naval Reserve, $110; for each officer of the line or Engineer Corps having the rank of lieutenant (junior grade) in the Naval Reserve, $90; for each officer of the line or Engineer Corps having the rank of ensign in the Naval Reserve, $80; for each man with a rating of chief petty officer, $70; for each man with a rating of petty officer, first class, $60; for each man with a rating of petty officer, second class, $48; for each man with a rating of petty officer, third class, $40; for each seaman, first class, $36; for each seaman, second class, $30; for each seaman, third class, $24.

While there is thus an enumeration of the amount to be paid each of these several classes, there is no provision which says what proportion of the 10,000 shall be represented in either one of these classes. In other words, there is nothing which says how many officers there shall be of those who shall receive $110, or how many there shall be of those who shall receive $90, or how many there shall be of those who shall receive $80, or how many there shall be of those who shall receive $70, or how many there shall be of those who shall receive $60, or how many there shall be of those who shall receive $48, or $40, or $36, or $30, or $24.

With an utter absence of any regulation as to how many of each class there shall be, there being a difference in the amount to be paid to each class, how is it possible for anyone to estimate how much the Naval Reserve is to cost?

Now, I say I think the Senator from New Hampshire was justified in declining to make an estimate upon the subject because of the fact of the uncertainty of the bill and not because of his want of desire to enlighten the Senator from Nevada.

Mr. MALLORY. Will the Senator from Georgia pardon me for a moment?

Mr. BACON. Certainly.

Mr. MALLORY. The Senator from New Hampshire, on a similar bill based on pretty much the same facts, a year ago did make an estimate. He estimated that the cost of the naval volunteer retainers would be $150,000 the first year; the second year would be $300,000; the third year would be $400,000; the fourth year would be $500,000; and it would remain at $500,000 until the tenth year. The only difference between the provision in that bill and the provision here is that instead of designating them by naval titles that bill provided:

> For each master or chief engineer of a vessel of the United States of 5,000 gross tons or over, $100; for each master or chief engineer of a vessel of the United States of 1,000 gross tons or over, but of less than 5,000 gross tons, $85.

And so on down the whole list.

Mr. BACON. That of course gives an estimate, but an estimate based upon probabilities and not upon any specific provisions in the bill. In other words, everything is left to the absolute discretion of the Secretary of the Navy. While, if the Secretary of the Navy were to follow the rule which the Senator from New Hampshire adopted in making his estimate, the amount thus consumed might follow the same line and amount to what the Senator from New Hampshire thus estimated, it is within the power of the Secretary of the Navy to double that amount. It is absolutely within the power of the Secretary of the Navy so to distribute these various classes which will be thus enrolled as to double the amount estimated by the Senator from New Hampshire.

Therefore the Senator from New Hampshire is entirely justified in declining to say what will be the cost under this bill, because no man can tell what will be the cost unless he knows what a future Secretary of the Navy may determine in his discretion to do.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from New Hampshire?

Mr. NEWLANDS. Certainly.

Mr. GALLINGER. Mr. President, the Senator from Georgia is correct when he says that no actual figures can be given. The estimate made last year when this bill was under consideration, and which was debated at great length, was, I am frank to say, an approximate estimate. The British Government with its enormous navy and enormous merchant marine has had a law precisely similar to this, and during the last quarter of a century has succeeded in enrolling only about 30,000 of these officers and seamen. The presumption is that, having fixed the maximum in the pending bill at 10,000, with our limited material of officers and men, it would take a great number of years to get even half that number.

Mr. BACON. The Senator, I think, will recognize the fact that it will be very much easier to get the officers than the men; and if the officers are in excess, the amount expended will be very much larger.

Mr. GALLINGER. The trouble on that point is that the officers do not exist. They are a very small proportion, and a great many of them would not take service of this kind.

The Senator from Georgia is always fair in debate. I have never known him to be otherwise.

Mr. BACON. I thank the Senator very much.

Mr. GALLINGER. And I am gratified to make answer to the criticisms the Senator from Georgia has made on this section of the bill in the same spirit in which his criticisms or suggestions were made.

Mr. BACON. I endeavored to show my absolute good faith——

Mr. GALLINGER. Yes.

Mr. BACON. By saying to the Senate that so far as the other part of the bill is concerned, its general principle, I indorsed it, and would favor it by my vote if this feature were not connected with it.

Mr. GALLINGER. The Senator said that same thing when a similar bill was under debate a year ago, and I then expressed the hope, and I have felt the hope at the present time, that the

Senator will see his way clear to vote for the bill as it came from the House. The Senator will observe, if the 10,000 men were all officers, and a very small proportion of them will be officers, receiving a hundred dollars each, it would amount to only a million dollars when we got the 10,000.

Mr. BACON. The Senator will pardon me. I do not intend to be understood as limiting my objection to this feature of the bill to the fact that it may cost a much larger amount than is contemplated by those who now favor the bill. I object to that feature upon the ground that I do not think it is a correct principle for the United States Government to take money out of the Treasury of the United States and pay wages to those who are not employed in the service of the United States, but who are exclusively in the employ of private individuals running private ship lines.

Mr. GALLINGER. That is the Senator's view. I think it is a very wise provision. It has been found wise in Great Britain, where they have built up a great navy and an enormous mercantile marine, and I think we would act wisely to follow the example that Great Britain has set in that respect.

The Senator will observe that the officers being comparatively few in number and the seamen constituting the bulk of them, the rates running down from $110 to $24, the probabilities are that the average would not be above $30 each, $50 at the maximum. And it will take a great many years to get the 10,000 men. So I was absolutely within the limits of correct statement when I said that the amount would be inconsequential. Probably it might cost a couple hundred thousand dollars a year. I do not think it would cost more.

But if the Senator bases his objection upon the broader ground that it is bad legislation, of course I have no controversy with him.

Mr. BACON. I base it on both grounds.

Mr. GALLINGER. It is a mere difference of opinion.

Mr. BACON. I think the principle is wrong and that the provision in its details is wrong.

Mr. GALLINGER. I am sure it could not have been worked out in any different way, and if the Senator should undertake it, I think he would come to the same conclusion I did, that there was no other method of solving the problem than the method adopted in this bill.

Mr. NEWLANDS rose.

Mr. GALLINGER. Will the Senator from Nevada permit me on one other point just a word?

Mr. NEWLANDS. Certainly.

Mr. GALLINGER. The Senator spoke about this enormous subsidy, and I want to call the Senator's attention to one fact, and then I think I will not interrupt him further.

We will take, for instance, the line to Argentina, a very desirable line. The President says we ought to have it. Secretary Root says we ought to have it. The country, through the newspapers, largely has said we ought to establish lines to South America to develop our trade with those sister republics. That line would cost under this bill $800,000 for a fortnightly service. We will take, then, the line to Brazil, to establish which would cost $600,000, or $1,400,000 for those two lines. The Senator speaks of other nations, and says we ought to be able to compete with them; that we ought to have genius and enterprise and ability enough to build ships and compete with the other nations of the world for the trade of the world.

Mr. President, we can not build ships as cheaply as those countries can. We pay higher wages to our mechanics. Everybody admits that. We pay more for the food on our ships than any other country in the world. We pay more for the officers, for the reason that they are compelled to be Americans, and their salaries are twice those of the officers of foreign steamships.

In addition to that, what does the German Government do? The German Government pays to the North German Lloyds, under a fifteen-year contract, not a ten-year contract, $1,330,000 a year for a fortnightly mail service in 15-knot steamers via the Suez Canal to the East Indies. They pay more to the North German Lloyds for that one service with inferior steamers than we propose to pay these two lines, one to Argentina and the other to Brazil.

Let us see what the British Government does. I will take a line that everybody knows about, the Royal Mail Company. The British Government pays that company $1,350,000 a year to maintain a mail service to the West Indies, Brazil, and Argentina, almost as much as we propose to pay to our two lines of superior ships.

Mr. CARMACK. Permit me to ask the Senator from New Hampshire a question.

Mr. GALLINGER. If the Senator will permit me, I wish to make just one further observation.

The British Government pays the Peninsular and Oriental Company $1,600,000 a year for mail service to the East Indies. Does the Senator really think that, inasmuch as it costs us in this country 30 or 35 per cent more to build steamships than it does in Great Britain, we can compete with Great Britain unless we pay some subvention to our steamships, when Great Britain and Germany and Japan are paying enormous subventions to their steamships? I do not think the Senator will insist on that contention.

Mr. CARMACK. I will have something to say about that a little later. What I want to ask the Senator now is, what proportion of British vessels engaged in the carrying trade receive any subsidy from the British Government?

Mr. GALLINGER. A very large proportion, I think, do not; but there are certain great lines that do, and we will be in competition with those lines if we run our steamships to South America.

Mr. CARMACK. Is it not the fact that an overwhelming majority of them receive no subsidy or aid from the Government at all?

Mr. GALLINGER. A very large proportion of them do not, that is true; but all of their great lines do.

Mr. CARMACK. Only a very small percentage of them receive any.

Mr. GALLINGER. The lines that are to come in competition with us receive enormous subventions.

Mr. BACON. Before the Senator takes his seat, with the permission of the Senator from Nevada, the Senator from New Hampshire will remember that when this bill was before the Senate last spring or summer I then urged upon the Senator to content himself with a bill which should make provision for liberal mail compensation for lines between ports of the United States and other ports where we now have no lines, and that there should be abandoned the effort which was then made to incorporate in the bill and which was incorporated in the bill passed by the Senate, the provision for tonnage bounty, and the provision about the naval reserve, which, while having a high-sounding name, at last is a provision by which parties engaged in the business for their own profit of running ship lines were aided to the extent of having a part of the compensation of their crews paid by the United States Government.

I offered an amendment striking out from the bill everything except that which related to the payment of mail compensation to these particular lines of steamships between ports of the United States and the points where we now have no steamship lines. That amendment offered by me was defeated. The bill went to the House. It comes back to us very nearly in the condition it would have been in if my amendment had carried. It unfortunately has upon it this, to me, very objectionable feature of the so-called "naval reserve."

Mr. GALLINGER. Now, will the Senator——

Mr. BACON. If the Senator will pardon me just a moment, I do not desire to participate at length in this debate to-night, and I just want to say to the Senator and to those who are so much interested in this class of legislation I do not know what is going to be the fate of the pending bill in this Congress. Of course it is a very late hour for the completion of legislation of this kind. But I believe that the country at large and all sections of the country recognize the importance of the establishment of lines between ports of the United States and ports, especially in South America, where we now have no lines; and if the Senator and those who are acting with him can rid themselves of the desire to incorporate upon such a bill these other features which look not to the simple fact of the establishment of commerce between this country and others where we practically have none and will limit themselves to this latter purpose and throw off all extraneous features and will bring to this Congress a measure which will look to that as the great and the sole purpose, I believe they will find that they will be met in a most liberal spirit by all Senators in this Chamber.

But I do not think as long as there is incorporated in such bills any features which look to the advancement of private interests at the public expense they will find that these efforts will be crowned with success.

Mr. GALLINGER. Will the Senator from Navada permit me a word?

Mr. NEWLANDS. I yield to the Senator from New Hampshire.

Mr. GALLINGER. If I move to strike from this bill the naval-reserve feature, can the Senator from Georgia give me assurance that we can have a vote upon the bill to-night?

Mr. BACON. I can not. I can only give the Senator the assurance that I will vote for it. I can not speak for any other Senator than myself.

Mr. GALLINGER. Can the Senator from Tennessee receive assurance from the other side that if that provision goes out of the bill we can have a vote on the bill to-night?

Mr. SPOONER. What provision is that?

Mr. GALLINGER. The naval-reserve provision.

Mr. CARMACK. I do not feel justified in giving that assurance. I can not do it.

Mr. GALLINGER. I greatly regret that I can not have that assurance.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H. R. 25672) to amend an act entitled "An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River."

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

H. R. 3208. An act granting a pension to Isabel T. Borthwick;

H. R. 12623. An act granting a pension to Minnie C. O'Connor;

H. R. 16235. An act authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.;

H. R. 24655. An act to authorize the legislature of Oklahoma to dispose of a certain section of school lands; and

H. R. 24815. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908.

DISEASES OF THE HORSE.

Mr. WHYTE. I am instructed by the Committee on Printing to ask unanimous consent for the passage of several joint resolutions providing for printing which have come from the House. House joint resolution 229 is the first one that I desire to have put upon its passage. It will take but a few minutes.

The VICE-PRESIDENT. The Chair will lay the joint resolutions before the Senate in their order.

The joint resolution (H. J. Res. 229) to provide for the printing of 250,000 copies of the Special Report on the Diseases of the Horse was read the first time by its title and the second time at length, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That there be printed and bound in cloth 250,000 copies of the Special Report on Diseases of Horses, with accompanying illustrations, the same to be first revised and brought to date under the supervision of the Secretary of Agriculture, 175,000 for the use of the House of Representatives, 60,000 for the use of the Senate, and 15,000 for the use of the Department of Agriculture.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

Mr. BEVERIDGE. Mr. President, may I ask the Senator from Maryland what the cost of this printing would be?

Mr. WHYTE. The original document was reprinted in 1903. It is probably the most popular document that has emanated from Congress. There have been none printed since 1903.

Mr. BEVERIDGE. What I was asking the Senator was what would be the cost of printing the number proposed of this document?

Mr. WHYTE. I am explaining to the Senator that the cost would be much less now than it was originally. All the plates are at the Printing Office. It is a reprint of the antecedent publication on diseases of the horse down to the present day. The House of Representatives passed the joint resolution almost unanimously, I think. Certainly it was presented to the House at the instance of about 100 Members of the House of Representatives in the petition which I hold in my hand, and which the chairman of the Committee on Printing of the House of Representatives sent to me. It will cost about $125,000.

Mr. BEVERIDGE. That is the information I wanted.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SECOND-CLASS MAIL MATTER.

The joint resolution (H. J. Res. 255) providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session, was read the first time by its title and the second time at length, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That there be printed and bound in paper covers 5,000 copies of House document No. 651, Fifty-ninth Congress, second session, relating to second-class mail matter, 1,000 copies for the use of the Senate, 2,000 copies for the use of the House of Representatives, and 2,000 copies for distribution by the Post-Office Department.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

SESSION LAWS.

The joint resolution (H. J. Res. 256) authorizing the Attorney-General to print 850 copies of the Session Laws was read the first time by its title and the second time at length, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Attorney-General be, and he is hereby, authorized to have printed, for distribution by the Department of Justice, 850 copies of the Session Laws and of the Statutes at Large, in lieu of 500 copies of each as now provided by law.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REPORT OF DIRECTOR OF THE MINT.

The joint resolution (H. J. Res. 257) authorizing the Secretary of the Treasury to print 1,000 additional copies of the Annual Report of the Director of the Mint was read the first time by its title and the second time at length, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he is hereby, authorized to have printed 1,000 additional copies of the annual report of the Director of the Mint on the operations of the mint and assay offices for the fiscal year ended June 30, 1906, with appendices, and 1,000 additional copies of the annual report of the Director of the Mint on the production of precious metals for the calendar year 1905, with appendices, and that hereafter there may be printed, in the discretion of the Secretary of the Treasury, for distribution by the Treasury Department, 2,000 copies of said reports, instead of 1,000 copies as heretofore.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

REPORT OF COMPTROLLER OF THE CURRENCY.

The joint resolution (H. J. Res. 219) providing for an increase in the number of copies to be printed of the annual report of the Comptroller of the Currency was read the first time by its title and the second time at length, as follows:

*Resolved, etc.,* That section 73 of an act "Providing for the public printing and binding, and the distribution of public documents," approved January 12, 1895, be, and the same is hereby, so amended as to authorize the printing annually hereafter of 10,000 copies of the Annual Report of the Comptroller of the Currency, for distribution by the Comptroller of the Currency, instead of 7,000 copies, as heretofore.

There being no objection, the joint resolution was considered as in Committeee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRANSFER OF DOCUMENTS OF INDUSTRIAL COMMISSION.

The joint resolution (H. J. Res. 211) authorizing the transfer of the files, books, and pamphlets of the Industrial Commission was read the first time by its title and the second time at length.

Mr. HANSBROUGH. I ask for the consideration of the joint resolution.

The VICE-PRESIDENT. Is there objection to the present consideration of the joint resolution?

Mr. KEAN. From what committee does the resolution come?

The VICE-PRESIDENT. It has come from the House of Representatives.

Mr. KEAN. Has it been reported by a committee?

The VICE-PRESIDENT. It has just come from the House of Representatives, and it has been laid before the Senate.

Mr. KEAN. Was present consideration asked for it?

The VICE-PRESIDENT. The Senator from North Dakota [Mr. HANSBROUGH] requested present consideration. Is there objection?

Mr. KEAN. I ask the Chair from what committee it has come?

The VICE-PRESIDENT. The Chair advises the Senator from New Jersey that it has not been reported from a committee.

Mr. HANSBROUGH. I make the report from the Committee on the Library.

Mr. KEAN. It has not been referred to any committee.

The VICE-PRESIDENT. Does the Senator from New Jersey object to its being presently considered?

Mr. HANSBROUGH. A like resolution exactly——

Mr. LODGE. Let it be read for the information of the Senate.

The VICE-PRESIDENT. The joint resolution will be again read, at the request of the Senator from Massachusetts.

The Secretary again read the joint resolution.

Mr. BEVERIDGE. Mr. President, if the Senate is going to stop upon this——

Mr. LODGE. I desire to make an inquiry in regard to the joint resolution.

Mr. BEVERIDGE. Then I yield to the Senator from Massachusetts for that purpose, but I desire to obtain the floor afterwards.

Mr. LODGE. I desire to make an inquiry. There is no report with the joint resolution. I do not understand why these books should be taken from the Library, where they were deposited by act of Congress, and placed in the Department of Commerce and Labor, which has no building of its own as yet and no place adapted for the care and preservation of books. Why should they be taken from the Library of Congress and handed over to that Department? I can not see any use in doing it.

Mr. HANSBROUGH. Mr. President, a similar joint resolution was introduced in the Senate and referred to the Committee on the Library, and while there are only two members of the committee in the Chamber at this time, they have agreed to the report, I understand.

Mr. MALLORY. I should like to inquire if this is a message from the House, or is it a Senate joint resolution?

Mr. LODGE. The joint resolution has never been referred.

Mr. HANSBROUGH. It is a joint resolution from the House. I stated that a similar joint resolution had been before the Committee on the Library. This is frequently done here, especially in the closing hours of a session. Furthermore, I will make this statement: The Librarian of Congress, Mr. Putnam, is very anxious that this transfer should be made. The Department of Commerce and Labor is willing that the documents should be transferred to that Department.

I have no interest in the matter in the world; and if the Senator from Massachusetts and the Senator from New Jersey think they know more about it than the Librarian and the Committee on the Library of the Senate, I am perfectly willing that they should object, and let it go over.

Mr. LODGE. I object.

The VICE-PRESIDENT. Objection is made.

Mr. BEVERIDGE obtained the floor.

Mr. CARMACK. Mr. President, I rise to a question of order.

The VICE-PRESIDENT. The Senator from Tennessee rises to a question of order.

Mr. CARMACK. The Senator from Nevada has the floor by my consent, and I do not see how all these proceedings can be had unless the Senator who has the floor yields for that purpose.

The VICE-PRESIDENT. The Senator from Indiana was recognized and is entitled to the floor.

Mr. BEVERIDGE. Mr. President, I do not intend to say anything upon this matter which has been discussed by the Senator from North Dakota and the Senator from New Jersey and the Senator from Massachusetts. I rose immediately after the passage of the joint resolution the consideration of which was asked by the Senator from Maryland [Mr. WHYTE], in view of the answer to my question as to the cost of the document, to make one or two very brief observations, the sum of which is to congratulate the Senator from Maryland and our friends upon the other side of the Chamber, all of whom voted for the joint resolution, upon their progress in paternalism, because, having been informed that we were spending $125,000 of the nation's money to publish a book to educate the farmers of the nation upon the diseases of the horse, not much more can be left in the practical application of the doctrine of paternalism which I have heard so fiercely denounced upon the other side at this session.

We had heretofore supposed that the question of the education of the people, as well as of the children, was exclusively for the State. But Senators have unanimously voted $125,000 of the nation's money to educate the farmers upon diseases of the horse. Of course, Mr. President, if that can be done, in principle the Senators can also appropriate the nation's money to furnish the children of the Republic with schoolbooks, and upon this final violation——

Mr. CARTER. Do I understand the Senator from Indiana to contend that there is a horse on the other side? [Laughter.]

Mr. BEVERIDGE. It remained for the Senator from Montana, with his vivid western and picturesque language, to appropriately describe the condition of the other side upon this question, for it is very plain that State rights, the last bulwark of liberty, has been deliberately violated here to-night, stabbed to death, as it were, by the willful appropriation of $125,000 of the people's money for the education of the farmers of the entire Republic upon the diseases of the horse.

Mr. PETTUS. Mr. President, without expressing any deep gratitude to the Senator from Indiana [Mr. BEVERIDGE] on account of his lecture, we accept it very meekly because of his wisdom and long experience.

As to the wit of the Senator from Montana [Mr. CARTER], I think, of all the men on earth, he is the last man who should talk about filibustering. If there is a man on earth who has got no right to talk about it, he is the man. [Laughter.] I recollect very well one occasion on which that Senator spoke as long as twenty-four hours to defeat one bill. Of course he was not filibustering. A great Republican like him would not do it. Oh, no; not at all!

Mr. President, there is an old maxim that some people ought to remember, that men who live in glass houses ought not to throw stones.

COMMISSION ON REVISION AND CODIFICATION OF THE LAWS.

The VICE-PRESIDENT. The Chair appoints under the provisions of the joint resolution to create a joint committee to consider the revision and codification of the laws of the United States the Senator from Idaho [Mr. HEYBURN], the Senator from Utah [Mr. SUTHERLAND], the Senator from Washington [Mr. PILES], the Senator from Mississippi [Mr. MCLAURIN], and the Senator from Arkansas [Mr. CLARKE].

COAL-LAND LAWS IN ALASKA.

Mr. HANSBROUGH submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under coal-land laws applicable to Alaska, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments.

H. C. HANSBROUGH,
THOMAS H. CARTER,
FRED T. DUBOIS,
*Managers on the part of the Senate.*

JOHN F. LACEY,
FRANK W. MONDELL,
JOHN L. BURNETT,
*Managers on the part of the House.*

The report was agreed to.

PERSONAL EXPLANATION—SANTO DOMINGO TREATY.

Mr. CLARK of Montana. Mr. President, I rise to make an explanation of a matter personal to myself. It relates to the ratification of the treaty with San Domingo ten days ago. I do this solely for the purpose of removing some misapprehension throughout the country concerning my position upon that very important proposition.

When the vote was taken I was temporarily absent from the Senate. The report sent out by the Associated Press concerning the vote giving the yeas and nays and the names of Senators who were paired wound up with the statement that Senator CLARK of Montana did not vote and was not paired.

I thought little about this matter until I received several letters upon the subject. As we all know, this great question, which had been pending before the Senate for some two years or more, has aroused a great deal of interest over the country and caused heated discussions, and I feared the inference that might be drawn from the published report would be that I had evaded a vote upon the question.

I have never attempted to evade a vote upon any question. I have always been ready to meet fairly and squarely any question submitted here for consideration and action.

I have a general pair with the senior Senator from Indiana [Mr. BEVERIDGE]. In all the deliberations on this question in the Committee on Foreign Relations I have asserted my objection to the treaty. When it was finally passed upon in that committee, my vote was recorded in opposition to it.

It has been intimated by some persons, who obviously did not understand the situation clearly, that I might be charged with the responsibility of failure to prevent the ratification of the treaty because of my not voting or in not being properly paired, and I will present the following statement to correct that impression and to show that, no matter whether I voted

or not or was or was not paired, the treaty would have been ratified:

There were 43 votes for the treaty and 19 votes against it, making 62 votes in all.

There were 18 Senators paired for the treaty and 9 Senators paired against it, making 27 Senators paired.

Two-thirds of the Senators who voted would be 41⅓. Had I been present there would have been 20 votes cast against the treaty, making 63 votes all together, two-thirds of which are 42, leaving still 1 majority for the treaty.

Had my pair been observed by Mr. BEVERIDGE in my absence and had I been paired with one other Senator, the vote would have been 41 for the treaty and 19 against it.

Sixty votes in all would have been cast, two-thirds of which are 40, or still 1 vote more than necessary to ratify the treaty.

To summarize, had my pair been observed, and if I had been paired with one other Senator, there would have been cast 41 votes for the treaty; 20 Senators would have been paired in favor of the treaty, making 61 for the treaty; there would have been cast 19 votes against the treaty; 10 Senators would have been paired against it, making 29 against the treaty, still leaving 1 vote over the two-thirds necessary to ratify it, thus showing, Mr. President, that through no action of mine could the final result have been changed.

The vote took place here late at night, and I was absent. I did not suppose that the treaty would come up at that late hour. No notice had been given whatever of the matter.

Mr. BEVERIDGE. Mr. President, I am very glad the Senator from Montana [Mr. CLARK] has so clearly demonstrated that his absence and my failure to observe the pair did not change the result on the vote on the Santo Domingo treaty, for the Senator has demonstrated that, and demonstrated to the entire country that any blame which attaches for the success of that matter, if anyone considers it a blame, does not in any wise rest on his shoulders, since the result would have been the same, according to the Senator's undeniable figures, in any event. Nevertheless, Mr. President, that does not relieve me from the necessity, and indeed a duty, of explaining to the Senator from Montana the nonobservance of the pair, which he had a right to expect would be observed, and which heretofore during our seven years of mutual service has always been observed by each of us.

The Senator from Montana during the present session has, as all the Senate knows, been so regular and constant in attendance on the sessions of the Senate and in the discharge of the duties of his office, and there have been so many votes when we were both present that I did not observe on that day that the Senator was not in his seat. At the last meeting of the Foreign Relations Committee, as indeed at all prior meetings, he had been present, as he had, I think, on the occasion of every vote that has been taken on every question during the present session; and not until to-day was I aware that the Senator was absent on that particular occasion. Of course, the Senator knows, because he has seven years of proof, and it ought not even to require the assertion, that had I known the Senator was absent I would have withheld my vote.

I remember very well on that occasion that immediately afterwards I was called out of the Chamber; and I say to the Senator and to the Senate that not until to-day was I aware that the Senator had been absent, much less was I aware that any criticism had been made of the Senator for the defeat of the measure. I am particularly glad to make this acknowledgement to the Senator, and also to congratulate the Senator upon the fact that, regardless of the pair, he has demonstrated to the Senate and to his colleagues on that side that his presence or even the observance of the pair would not have affected the result.

There is this one thing which I think it fair to say, and I say it without any more criticism of the Senator than he has made of me—which has been none at all—that I think on a matter of such importance, when the Senator had been at all times present during the session and knew that he was to be absent on that occasion, it was only fair to let me know of the Senator's contemplated absence, so that I would have been in no danger of not observing the pair. That has occurred between both the Senator and myself on at least three or four other critical matters.

Mr. President, I think I have nothing more to say. The exact accuracy of the statements, both of the Senator and myself, will be recognized by all.

Mr. CLARK of Montana. Mr. President, just a word in reply to the Senator from Indiana [Mr. BEVERIDGE]. I did not for a moment think the Senator from Indiana would disregard knowingly and willfully his pair with me. I have too much respect and esteem for him to believe that he would be capable of doing such a thing, and I endeavored to set out in my few remarks clearly that my object was not in the least to criticise his action, but simply to place myself clear upon this question to which I have always been unalterably opposed.

### W. D. CLAY AND OTHERS.

Mr. PETTUS. I ask unanimous consent for the present consideration of House bill 22182, in reference to certain lands in Alabama.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 22182) to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs, which had been reported from the Committee on Public Lands with an amendment, on page 1, line 8, after the word "lands," to insert "in the State of Alabama;" so as to read:

That William D. Clay, James W. Clay, and Maggie Click, heirs of James W. Clay, deceased, be, and they are hereby, authorized to select in lieu of lands heretofore erroneously patented by the Government to their father, James W. Clay, and lost by said heirs, any other 80 acres of nonmineral, unappropriated surveyed public lands in the State of Alabama subject to homestead entry.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

### ALASKAN RAILROADS, ETC.

Mr. BEVERIDGE submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

*Resolved*, That the chairman of the Committee on Territories be, and he is hereby, authorized and directed to appoint a subcommittee, consisting of five members of the Committee on Territories, to sit during the recess of the Senate at such times or places as the subcommittee may deem wise, to consider all proposed legislation relating to the survey and construction of railroads in the district of Alaska, and whose duty it shall be to ascertain and report upon the feasibility of the different proposed routes, the cost of construction and operation, the advantage of such roads to the inhabitants of Alaska and to the Government of the United States, the present cost of transportation of merchandise and mails, the probable reduction thereof to the individual and to the Government if railroads are established, the advantage to be derived by the manufacturers and merchants of the United States from the establishment of railroads in American territory from the coast to the interior, the feasibility of operating railroads by electricity generated by water power on the public domain, and such other and further information bearing upon the proposition named as may to said subcommittee seem important. Such subcommittee is authorized to send for such persons or papers, take testimony, employ a stenographer, and the expenses incurred shall be paid from the contingent fund of the Senate upon vouchers to be approved by the Senate to audit and control the expenses of the Commission.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 24043) to authorize the sale of timber on certain of the land reserved for the use of the Menominee tribe of Indians in the State of Wisconsin; asks a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. LACEY, Mr. BURKE of South Dakota, and Mr. ZENOR managers at the conference on the part of the House.

The message also announced that the House had passed the following bills and joint resolution:

S. 6447. An act to authorize the appointment of Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy;

S. 8230. An act for the relief of Harold D. Childs;

S. 8012. An act to erect a monument on the Tippecanoe battle ground, in Tippecanoe County, Ind.;

S. 8092. An act providing for the completion by the Secretary of the Navy of a monument to the memory of the American soldiers who fell in the battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor;

S. 8568. An act granting an increase of pension to Rosanna A. May;

S. 8585. An act for the relief of Charles W. Spalding; and

S. R. 98. Joint resolution granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany.

The message further announced that the House had passed the following bill and joint resolution with amendments; in which it requested the concurrence of the Senate:

S. 1032. An act to aid in the erection of a statue of Commodore John D. Sloat, United States Navy, at Monterey, Cal.; and

S. R. 29. Joint resolution authorizing the selection of a site

and the erection of a pedestal for the Stephenson Grand Army memorial in Washington, D. C.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

H. R. 13304. An act to provide a suitable memorial to the memory of Christopher Columbus; and

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

ENROLLED BILLS SIGNED.

The message announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the Vice-President:

H. R. 24640. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes; and

H. R. 25812. An act to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania.

MENOMINEE INDIAN LAND IN WISCONSIN.

Mr. CLAPP. I ask that House bill 24043 may now be laid before the Senate.

The VICE-PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 24043) to authorize the sale of timber on certain of the land reserved for the use of the Menominee tribe of Indians, in the State of Wisconsin, and asking for a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CLAPP. I move that the Senate insist on its amendments, agree to the conference asked by the House, and that the conferees on the part of the Senate be appointed by the Chair.

The motion was agreed to; and the Vice-President appointed as the conferees on the part of the Senate Mr. CLAPP, Mr. WARNER, and Mr. CLARK of Montana.

STATUE OF COMMODORE JOHN D. SLOAT.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the bill (S. 1032) to aid in the erection of a statue of Commodore John D. Sloat, United States Navy, at Monterey, Cal.; which were, on page 1, line 6, to strike out "erection and;" on page 1, line 6, to strike out "statue of" and insert "monument to commemorate the taking possession of the Pacific coast;" on page 1, line 7, to strike out all after the word "Navy" down to and including "same" in line 8; on page 1, line 9, to strike out "statue" and insert "monument," and on page 2, line 3, to strike out "statue and pedestal" and insert "monument."

Mr. PERKINS. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

STEPHENSON GRAND ARMY MEMORIAL.

The VICE-PRESIDENT laid before the Senate the amendment of the House of Representatives to the joint resolution (S. R. 29) authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army Memorial in Washington, D. C.; which was, on page 2, line 5, to strike out all after the word "appropriated" down to and including the word "memorial," in line 7.

Mr. WARNER. I move that the Senate concur in the House amendment.

The amendment was agreed to.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. NEWLANDS. Mr. President, when I was interrupted by the colloquy between the Senator from Georgia [Mr. BACON] and the Senator from New Hampshire [Mr. GALLINGER] I was calling attention to the fact that twenty-two ships called for by this bill would cost $4,000,000 less than the subsidy provided for by the bill; and the inquiry naturally arises why, if the United States Government is to expend $26,500,000 on ships intended to promote the commerce of the United States, it should not itself build and own these ships, instead of turning them over to subsidized corporations? It is perfectly clear that if it built the ships itself it would have for an expenditure of $22,000,000 twenty-two ships, and if it expended $26,500,000 in subsidy it would have nothing. I ask what kind of business arrangement it is upon the part of the Government to expend $26,500,000 and have nothing, when by the expenditure of $22,000,000 on its own account it would have the valuable asset of twenty-two ships worth $1,000,000 apiece?

But, it may be inquired, to what use could the Government put these ships? The reports of these committees indicate to what use they can be put. One of the grounds upon which this subvention is based is the claim that if the United States were to engage in war it would lack the transports, the colliers, and the scouts necessary to supplement our Navy in actual warfare. It appears that thus far we have spent hundreds of millions of dollars in creating a navy ostensibly for the purpose of protecting a merchant marine, and yet we have no merchant marine in existence, and so poverty stricken are we in this regard that if war should break out we could not get from private shipowners in this country the necessary ships as transports, scouts, colliers, dispatch boats, etc., to supplement our Navy. So that it appears we have an imperfect navy; that we have the fighting ships without the transport ships. A navy under such conditions is just as feeble and imbecile as an army would be without guns, or as an army would be without a commissary, or as an army would be without a quartermaster's department and without transportation. If, then, we are to make our Navy effective in case of war——

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from New Hampshire?

Mr. NEWLANDS. I do for a question. I am anxious to get on.

Mr. GALLINGER. The Senator from Nevada is now touching upon a very important phase of this discussion, and I want to ask if he has observed in the bill under consideration that these ships, if built, can be impressed by the Government in time of war, and if that is not a very wise provision in view of the fact that we are short of transports, colliers, and other necessary auxiliary vessels for the Navy in time of war?

Mr. NEWLANDS. Mr. President, in reply to the Senator from New Hampshire I have to say that if this subvention is granted it is of course wise to provide that these ships shall be available to the Government to be used as scouts, transports, and colliers in case of naval warfare; but I think the purpose can be accomplished in a better way. The General Staff of the Army, in a report filed some time ago regarding the requirements of our Navy in case our insular possessions should be attacked, stated that we would require 228 such vessels, at an average cost of $1,000,000 apiece; so that it seems that in order to make our Navy effective in case of war with any great power—for of course our insular possessions would be immediately attacked—it will be necessary for us to have, in addition to our fighting ships, 228 vessels, at a cost of a million dollars apiece, or a total cost of $228,000,000.

If, then, it is proposed that we shall subsidize the merchant marine of this country to the extent of $228,000,000 in order to provide for the necessities of war, it seems to me we should hesitate a long time before we enter upon such a policy, and it would be wise, at least if we propose to provide twenty-two ships, which in case of emergency can be used for scouts, colliers, and transports, that they should be built by the United States Government as a part of our existing Navy. All could join in such an appropriation, for it would not have the purpose of subvention or subsidy, but simply the patriotic purpose of providing in part the auxiliary ships which our Navy requires.

It may be said that in time of peace these ships would be useless. Well, if we had no naval use for them during that time, the Government of the United States could let them out to private companies at a reasonable rental and with proper restrictions. It could man each ship with a part of the naval reserve provided for by this bill and officer each ship with a naval officer, and then let the naval reserve cooperate with a commercial force in manning and administering these ships.

If these twenty-two ships were built upon the Government account they would not necessarily be built in the Government yards; they could be built in the private shipyards of the country, and would in that way advance the shipbuilding interests, which the Senator from New Hampshire is anxious to promote.

Mr. PATTERSON. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Colorado?

Mr. NEWLANDS. I yield.

Mr. PATTERSON. Mr. President, I only want to occupy a very few moments. The debate this evening has been quite instructive, and I am unwilling that it shall close, as I understand it is likely to close soon, without, in connection with the speech of the Senator from Nevada [Mr. NEWLANDS], who is discussing the matter of the Government proprietorship of vessels, calling

attention to a report that was made to the Senate twenty-one years ago, in which the question of the ownership of railroads was discussed. I want to read from the report of the select committee, which is the report that led to the first legislation upon the subject of railroad regulation, and of which committee the present distinguished and most honored Senator from Illinois [Mr. CULLOM] was the chairman. I want to call the attention of the Senate to the membership of that committee before I read a very short sentence from one of the ablest reports that was ever made to this body upon a great economic subject.

As I have said, the present Senator from Illinois [Mr. CULLOM] was chairman of the committee. Warner Miller, of New York; Senator Platt, of Connecticut; Isham G. Harris, of Tennessee, and Senator Gorman, of Maryland, were the other members of the select committee. The last three, composing the majority of the committee, have already passed over to the majority, but they have left behind them in this report a monument of patriotism and wisdom. Reading from the report, I call the attention of the Senate to the language used by these distinguished men. Speaking of railroad regulation and the State ownership of railroads—

> Regulation through state ownership has been practically unknown in the United States. It is of foreign origin and is foreign to the character of our institutions. The time may come when the people of the United States will be forced to consider the advisability of placing the railways of the country completely under the control of the General Government, as the postal service is, and as many believe the telegraph service should be. This would seem to be the surest method of securing the highest perfection and greatest efficiency of the railroad system in its entirety and the best method of making it an harmonious whole in its operation and of bringing about that uniformity and stability of rates which is the greatest need of trade and commerce.

Mr. HANSBROUGH. What is the date of that report?

Mr. PATTERSON. January 18, 1886, and that was the report that led to the first legislation by Congress upon the subject of the regulation of railways. Later on in this report the committee gives reasons why that system should not be immediately adopted; that is, that the experiment of railroad regulation should be tried before the country should be compelled perforce to enter upon the state ownership of railroads in order that the results referred to might be brought about.

Mr. NEWLANDS. Mr. President, the report which the Senator has read constitutes a part of his very interesting exposition of the advantages of government ownership of railroads, but I am anxious to differentiate between the suggestion which I am making and the government ownership of railroads.

The construction of the twenty-two ships to which I have referred means simply the securing of ships that are essential to our Navy and without which the fighting vessels of the Navy would be powerless in case of war. My suggestion is that if the merchant marine of this country can not be sustained by private capital, and for that reason in case of war the Navy can not secure the necessary colliers, transports, scouts, and dispatch boats, it is essential that we should proceed to construct them upon our own account; and I have shown that, constructed, as they would be, in the private shipyards of the country, they would advance private shipbuilding, which is one of the contentions of the Senator from New Hampshire.

I have also shown that in time of peace the ships might be used in the various services now contemplated by this bill. I would not expect the Government to operate them. A business arrangement could be made with American shipping companies by which these vessels could be turned over. Then, at a moderate rental, the private shipping companies to run the ships, the Government to own them and aid in manning them with the naval reserves, with the right to take them back under its own control in case of war.

Mr. MALLORY. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Florida?

Mr. NEWLANDS. Yes.

Mr. MALLORY. I should like to call the attention of the Senator to the fact that it has been testified before the Merchant Marine Commission by a gentleman who has had considerable experience in the owning and operating of ships that if he were to be presented with a fully equipped ocean-going ship, the expense of maintenance and operation would be so much in excess on the American ship over what it is on a foreign ship that he could not compete with the foreign-owned vessel. Whether that is true or not I do not pretend to say, but I think the circumstances certainly justify us in believing that it approximates to the truth.

Mr. NEWLANDS. Assuming that the cost of the administration of an American ship is so great as to forbid a private owner entering upon such administration, even with the free gift of the ship, yet the naval-reserve system provided for by the pending bill would aid in the administration of the ship.

### LEONARD MARTIN COX.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 25883) to reinstate Leonard Martin Cox in the corps of civil engineers of the Navy; which was read twice by its title, and referred to the Committee on Naval Affairs.

Mr. PERKINS subsequently said: I am directed by the Committee on Naval Affairs, to whom was referred the bill (H. R. 25883) to reinstate Leonard Martin Cox in the corps of civil engineers of the Navy, to report it favorably without amendment and to recommend its passage. I call the attention of the senior Senator from Kentucky to it.

Mr. BLACKBURN. I will state in support of the report of the Senator from California from the Committee on Naval Affairs that the passage of this bill is very earnestly urged by the Navy Department, from the Secretary down. There are seven vacancies, to one of which it is proposed to reappoint this young officer. His value as an officer is attested by the Department, and his reappointment, as provided for in the bill, is very earnestly urged. I ask that it may be considered now.

By unanimous consent, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. NEWLANDS. Mr. President, the Senator from Florida states, from the testimony before the Commission, that if these ships were turned over to private shipowners as a free gift, the cost of administering them would be so great as to be prohibitory of this service.

Mr. MALLORY. As compared with foreign ships.

Mr. NEWLANDS. As compared with foreign administration. That may be true, but it must be recollected that this bill has a twofold purpose. It has in view, first, turning over to the shipowner a sufficient subvention to pay for the ships, and then it has in view, further, the establishment of a naval reserve which will aid the shipowner in the administration of those ships.

Mr. CARTER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Montana?

Mr. CARTER. Will the Senator from Nevada yield to me for a moment?

Mr. NEWLANDS. I wish to yield the floor entirely in a few moments, and I should like to close.

Mr. CARTER. I realize the anxiety of the Senator to conclude his remarks, but this is a matter of current importance, and will not require much time. It is a motion to reconsider.

Mr. NEWLANDS. I yield.

### CLAIMS OF POSTMASTERS IN THE STATES AND TERRITORIES.

Mr. CARTER. Yesterday Senate resolution 171 was passed. I move to reconsider the vote by which it was adopted.

The VICE-PRESIDENT. The Senator from Montana enters a motion to reconsider the vote by which Senate resolution 171 was passed.

Mr. BACON. What does the resolution relate to?

Mr. CARTER. It directed a statement of the accounts of postmasters between 1864 and 1874. The Post-Office Committee is informed by the Department that it will require the services of twenty $1,400 clerks about one year to state the account, and that the account will probably involve a cost to the Treasury of the United States of about $2,000,000.

Mr. PENROSE. The resolution never was referred to the committee.

Mr. CARTER. The resolution was not referred to any committee of the Senate. I am informed that other matters of similar character have been referred to the Committee on Post-Offices and Post-Roads and have been uniformly adversely reported by the committee.

Mr. PENROSE. I may add that I am informed as chairman of the committee that the majority of these claims are in the hands of claim agents, and that the nominal beneficiaries will never receive any particular advantage if the claims are paid. It has been the policy of the Committee on Post-Offices and Post-Roads carefully to guard this matter and to refuse to take favorable action without looking further into it.

That this resolution should have been passed by the Senate

without reference to the committee strikes many members of that committee as being highly irregular and improper. I earnestly hope the motion to reconsider will prevail.

Mr. DICK. I move to lay the motion of the Senator from Montana on the table.

Mr. NEWLANDS. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield further?

Mr. NEWLANDS. I decline to yield further.

Mr. CARTER. I enter the motion to reconsider.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. NEWLANDS. I was remarking when the Senator from Montana interrupted me that this bill not only provides for furnishing the shipowners with the money to enable them to build the ships, so that the ships themselves are practically free ships, but it also furnishes aid in the shape of a naval reserve for the administration and operation of the ships.

Now, what is the necessity of a naval reserve, so far as the Government itself is concerned? The necessity is this: We have no merchant marine which is training sailors to be employed upon the ships that are being constructed for the Navy and in case of war. We need a naval militia just as we need an Army militia, as a source from which the Government can recruit in case of war. This bill contemplates a naval reserve of 10,000 men, and I do not think the number asked for is excessive. England has a naval reserve of 30,000 men. But I insist upon it that we should not have a sham reserve. We should have a real reserve; that if we have this reserve it should be officered by naval officers; it should be drilled and disciplined, so that when war arises these forces will be available.

Mr. President, I am requested by the Senator from Tennessee, who has the right to the floor, to yield to the Senator from Montana.

CLAIMS OF POSTMASTERS IN THE STATES AND TERRITORIES.

Mr. CARTER. Referring to resolution No. 171, directing the Secretary of the Treasury to state an account, I will say that the resolution was not referred to any committee of the Senate. It relates to a matter concerning which the position of the Committee on Post-Offices and Post-Roads of this body has been firmly fixed, and I believe is in perfect harmony with the views of the Senate. As I have heretofore stated, the Treasury Department announces that the resolution will require the services of twenty fourteen-hundred-dollar clerks for one year to make the statement, and that the statement when made will probably involve a charge against the Treasury of the United States of $2,600,000.

As stated by the chairman of the Committee on Post-Offices and Post-Roads, these claims are said to be held by power of attorney and otherwise by certain claim agents in the city of Washington. Concerning that I can only speak from hearsay. But wheresoever the claims may be held, I insist that the resolution should be reconsidered and properly referred to a committee of the Senate having jurisdiction over the subject-matter, to the end that it may go through the ordinary processes to which all these matters are subjected in the course of our legislative proceedings.

I move that the vote by which the resolution was passed be reconsidered, and later I will ask that the resolution be referred.

The VICE-PRESIDENT. The Senator from Montana moves that the vote by which Senate resolution No. 171 was passed be reconsidered.

Mr. DICK. I renew the motion to lay on the table the motion of the Senator from Montana.

The resolution to which the Senator refers was introduced in the first session of this Congress, has been before the Senate all these months, and during this entire session has appeared daily upon its Calendar. The resolution is in precise terms like one which the Senate adopted, presented by the senior Senator from Colorado [Mr. TELLER], some time in March, and reported upon by the Department in April.

The resolution which was adopted yesterday seeks to furnish to the Senate precisely the same information, which is whether the Government owes these postmasters anything or not, and, if it owes these men anything, how much? It does not carry with it a dollar of appropriation. If the claims are large or small, if they are unreasonable or otherwise, can be considered when the information is at hand.

Whether these claims are in the hands of claim agents or not I do not know, and I do not care. If the Government of the United States owes these old servants a dollar, it ought to pay it, and there ought not to be an effort on the part of the Government, certainly not on the part of the Senate, to keep away or cover up information so vital to the very question at issue—whether anything is owing these men. If nothing is owing, let us know it. If something is owing, let us know that. I do not believe it is fair or honest to retain information which deals with what the Government owes for services, and a Senate resolution asking for information so pertinent to so vital a question, it seems to me, is fairly answerable by the Department, and whether it entails labor or cost is not a matter of so much moment, it seems to me, as fair dealing with our public servants.

Mr. CARTER. I realize that the motion of the Senator from Ohio precludes debate, if the rule be strictly enforced.

The VICE-PRESIDENT. Without objection, the Senator from Montana will proceed.

Mr. CARTER. The purpose of the Committee on Post-Offices and Post-Roads in attempting to forestall the opening of this question in this manner does not cast any reflection upon the person introducing or anyone pressing the resolution.

To begin with, as a matter of ordinary respect for parliamentary procedure, no resolution should pass the Senate of such vital import as this without reference to a committee of the Senate. The amount involved in securing the information is very large. The period of time covered by the transactions referred to reaches back to a point in the early fifties. The first of these claims, I think, originated about 1854. It does not appear in the resolution that these claims of 1854 are to be inquired into, but the resolution will, in its effect, go as far back as 1854.

The Treasury Department announcing that the sum of $2,600,000 rests at the other end of the line, the statement made that these claims have been collected together by claim agents who have industriously sought to gather them together, seem to put the Senate upon guard with reference to the propriety of instituting the inquiry. I do not know of a single claimant, a postmaster, who served between 1854 and 1874 who is here asking any relief from Congress, or who is now alive, for that matter.

Mr. GALLINGER. Mr. President——

The VICE-PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. CARTER. Certainly.

Mr. GALLINGER. I will say to the Senator that there are just some such postmasters in my State who have been denied by the Government of the United States money that they honestly earned.

Mr. CARTER. I am perfectly satisfied that the Senate will cheerfully vote to reimburse any individual who comes here with an honest claim, thoroughly proven, for services rendered. But this placing of a premium upon the collection of stale claims seems to me an ill-advised policy, and I think it ought to be stopped at once.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from Ohio [Mr. DICK] to lay on the table the motion of the Senator from Montana [Mr. CARTER].

The motion was not agreed to.

The VICE-PRESIDENT. The question recurs on agreeing to the motion made by the Senator from Montana to reconsider the vote by which Senate resolution 171 was agreed to. [Putting the question.] By the sound the ayes seem to have it.

Mr. DICK. I ask for the yeas and nays.

The yeas and nays were not ordered.

The motion to reconsider was agreed to.

Mr. CLAY. I move to refer the resolution to the Committee on Post-Offices and Post-Roads.

The motion was agreed to.

HIGHWAY IN THE DISTRICT OF COLUMBIA.

Mr. GALLINGER, from the Committee on the District of Columbia, to whom was referred the bill (S. 67) for the opening of a connecting highway between Water Side drive and Park road, District of Columbia, submitted an adverse report thereon; which was agreed to, and the bill was postponed indefinitely.

MEMORIAL TO CHRISTOPHER COLUMBUS.

The VICE-PRESIDENT laid before the Senate the bill (H. R. 13304) to provide a suitable memorial to the memory of Christopher Columbus; which was read twice by its title, and referred to the Committee on the Library.

Mr. HANSBROUGH subsequently said: I am directed by the Committee on the Library, to whom was referred the bill (H. R. 13304) to provide a suitable memorial to the memory of Christopher Columbus, to report it favorably without amendment, and I ask unanimous consent for its present consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes that there shall be erected in the city of Washington, D. C., a suitable memorial to Christopher Columbus, and for that purpose proposes to appropriate $100,000.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. NEWLANDS. Mr. President, if a naval reserve is to be used as a recruiting force for naval ships hereafter constructed, or for regular sailors and men upon the ships in case of war, it is essential that the naval reserve should be a real reserve and not a sham reserve. The difficulty with this bill is that the naval reserve will probably be a sham reserve, whereas, under the suggestion I make, the naval reserve will be a genuine force, under discipline, under the direction and control of naval officers, and will be available as a trained body of men in case of war.

Under this bill we are to operate twenty-two ships. It is probable that upon each one of those ships there will be from 100 to 150 men belonging to the naval reserve. The pay which they receive from the United States Government will, while the ships are being used for commercial purposes, diminish the burden upon the company which operates the ships, and thus the company operating the ships will be relieved of a considerable portion of the expense of administration which would otherwise devolve upon it. At the same time the naval reserve upon each ship would be under the command of a trained officer, and would have the discipline necessary to make it useful in case of war.

Mr. President, if we are to enter upon two lines of expenditure with a view to promoting our merchant marine and promoting commercial intercourse with the countries which those lines connect with this country, and if the Government of the United States is to spend $26,000,000 toward this cost of vessels and is also to maintain upon those vessels a naval reserve as a contribution toward the expenses of the operation, I contend that the steamships should belong to the United States; that they should be leased to private companies in time of peace; that they should be in part manned by the Naval Reserve under the command and discipline of trained naval officers, and that we would thus have ships which, whilst used for commercial purposes in time of peace, would be immediately available, with disciplined and trained men and officers, in case of war.

In time of peace, when these vessels are used for commercial purposes, it might be as well to have civilian captains and civilian mates, as well as civilian sailors, but even that would not be necessary. I believe that these great lines, conducted by ships owned by the National Government but operated by private companies, might well be manned and officered entirely by the Naval Reserve. It is quite customary for officers in the French navy to accept service in the merchant marine. That kind of service is favored by the Government, for it keeps in full activity a body of men who otherwise would be likely to go to rust. I have myself traveled upon French commercial ships which were officered by men who were officers of the French navy, and I am sure no more capable officers could be found even in commercial transactions.

Mr. President, the purpose of this bill is to make these ships the pioneers of commerce with those countries with which at present we have almost no commercial relations; the purpose is to establish a postal service; the purpose is to establish a transportation service for our goods to those countries and their goods in return, and the purpose also is to maintain these ships and construct them or aid in their construction, so that the Government can call upon them in case of war for use in a supplementary way to our Navy.

England, with her vast body of mariners, has been compelled to establish such a reserve. She has now 30,000 men in her service. We should have a similar reserve. These men should be made useful in times of peace, and I can imagine no better way of making them useful than employing them during times of peace in this pioneer work of establishing these commercial lines, in the expectation that later on unsubsidized capital will take up the work so commenced.

But, Mr. President, there is another weakness in this bill, and that is that it proposes to subsidize companies which may incorporate under the laws of the States. It seems to me that if any system of subsidy is entered upon the system should embrace aid only to those corporations that are organized under the laws of the United States, and that no subsidy should be given to a corporation organized under the law of any State.

The regulation of foreign and interstate commerce is under the Constitution intrusted to the National Government. A corporation formed to engage in interstate or foreign commerce should be an instrumentality of the nation for this purpose, and should be created by it with proper restrictions as to capitalization, published statements, etc. We have gone too far in permitting the corporations created by the States to exercise functions which belong to the nation. We will have to correct this by putting the railroad combinations under national charter. We should not aggravate the difficulties resulting from the abuse of national functions by permitting State charters for corporations engaged in foreign commerce. I believe in maintaining the reserved powers of the States, but I also believe that true democracy demands that the nation should exercise to the full its delegated powers.

Mr. HALE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Nevada yield to the Senator from Maine?

Mr. NEWLANDS. With pleasure.

Mr. HALE. The honorable Senator yields to me for public business.

Mr. NEWLANDS. I will state to the Senator from Maine I am very glad that private business should give way to public business.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. HALE submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 12 and 87.

That the House recede from its disagreement to the amendments of the Senate numbered 68; and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the words "of said building" and insert in lieu thereof "for said building not to exceed one million eight hundred thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment, and in line 2 of the matter inserted by said amendment strike out the words "coin including fractional silver coin" and insert in lieu thereof the word "dollars;" and in lines 3 and 4 strike out the sum named and insert in lieu thereof "fifty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: At the end of the amended paragraph, after the word "available," insert the following: "*Provided*, That no part of this appropriation shall be expended for the employment of any person in making said investigation who is not now in the employ of the Government or hereafter regularly appointed after competitive examination and certification through the Civil Service Commission;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 117, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The Spanish Treaty Claims Commission is directed to ascertain as soon as may be what has been the average cost per page of taking testimony for use in cases before said Commission by dividing the whole amount expended from appropriations under this head by the total number of pages of testimony heretofore taken. The claimant in all cases before said Commission not already finally disposed of shall hereafter be required to pay in the first instance the expense of taking his testimony, including the cross-examination of his witnesses at the rate per page so found, and to secure the payment thereof shall within ninety days from the passage of this act deposit with the clerk of said Commission the average cost of taking the claimant's testimony in cases heretofore disposed of at the rate per page aforesaid, and upon failure to make such deposit within the time fixed his case shall be dismissed with prejudice. Whenever any case is disposed of by the Commission in

favor of the claimant his said deposit shall be returned to him by the clerk, but if the case is disposed of in favor of the Government so much of his deposit as is required to pay the costs of taking his testimony shall be covered into the Treasury, and the balance, if any, shall be returned to the claimant."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 126, and agree to the same with an amendment as follows: Strike out the matter inserted by said Senate amendment, leaving both propositions out of the bill; and the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
JAMES H. BERRY,
*Managers on the part of the Senate.*
J. A. TAWNEY,
WALTER I. SMITH,
GEORGE W. TAYLOR,
*Managers on the part of the House.*

The report was agreed to.

Mr. GALLINGER. Mr. President, we have had a very interesting discussion this evening. I have during the evening, as during the day, been ready at any time to yield to any Senator who had a bill in which he was interested and for which he desired to have consideration. I have had no disposition at any time to keep the Senate here in the discussion of the shipping bill after the announcement had been made that it was not to be allowed to come to a vote. The conference report on the sundry civil appropriation bill having been agreed to, I am now, so far as I am concerned, quite willing that the Senate should take a recess, which the Senator from Maine has risen to move.

Mr. HALE. I desire to move that the Senate take a recess, but I yield for the moment to the Senator from Colorado [Mr. PATTERSON].

Mr. PATTERSON. Mr. President, I was not paying attention when the conference report on the sundry civil appropriation bill was agreed to. It was my purpose to have made a few remarks about one of the items in the bill over which the conferees had been in dispute. It is an item put into the bill by the Senate committee for a public building in Denver. As originally in the bill, the amendment of the committee, without fixing any amount, directed the Secretary of the Treasury to prepare plans and specifications for a general public building in Denver. It was my extreme desire that the amendment should be passed in that form, and I want now to thank the members of the conference on the part of the Senate for the generous kindness they displayed in inserting the amendment in a way that satisfied me and my colleague, and for the splendid manner in which they sought to induce the conferees of the House to acquiesce in it. They yielded to the demand of the conferees on the part of the House, who first opposed the amendment, but in the end agreed to allow it to remain, after fixing a limit of $1,800,000.

Mr. HALE. For the building.

Mr. PATTERSON. I want to say, Mr. President, that it is a sum that I consider quite inadequate for a public building in the great and growing and magnificent city of Denver. While I feel very, very grateful indeed to the Senate conferees for the splendid, generous spirit they displayed in dealing with it and in seeking to retain the amendment in the bill as it was originally placed there, I hope that when the appropriation shall be made after the plans and specifications are prepared both the Senate and the House will see their way clear to give to Denver a building that will cost not less than $3,000,000.

Denver is becoming what may be called the "show city of the West." It is a city that those who visit believe is next to Washington in beauty and in everything that goes to make up a city that is lovable and attractive. Before many years it will be the one great city between St. Louis and San Francisco or Los Angeles; and if there is a city on the continent that is deserving of a public building that should stand as a memorial of the generosity of the General Government and that will be a pride and glory to the nation, that city is Denver.

I only wanted to say so much in order that I might express my thanks to the conferees on the part of the Senate for the splendid part they have played in connection with the matter.

Mr. GALLINGER. Mr. President, I wish to add to what I said a moment ago that I indulge the hope that after the Senators who have been opposing the very reasonable and desirable bill I have been in charge of may have had the peaceful rest that I trust they may have between now and the time to which we will take a recess, they will persuade themselves that it is but right and proper that they should permit a vote to be taken on the bill. I shall ask for such a vote to-morrow.

Mr. HALE rose.

Mr. CARMACK. Is the Senator going to move a recess?

Mr. HALE. Yes.

Mr. CARMACK. Mr. President, I merely wish to say that while I hardly think it is fair to cut me off right in the beginning of my remarks, yet I realize the convenience of the Senate and of Senators. I understand that they should have some rest for the remainder of the evening, and I will not insist upon continuing to-night, although there are some arguments made by the Senator from New Hampshire that I should like to have an opportunity to answer.

Mr. HALE. I move that the Senate take a recess until to-morrow morning at half past 9.

The motion was agreed to; and (at 11 o'clock and 42 minutes p. m., Sunday, March 3) the Senate took a recess until 9 o'clock and 30 minutes a. m., Monday, March 4.

## NOMINATIONS.

*Executive nominations received by the Senate March 2, 1907.*

### POSTMASTERS.

ALABAMA.

Walter W. Harkins to be postmaster at Fayette, in the county of Fayette and State of Alabama. Office became Presidential January 1, 1907.

ARIZONA.

Oregon D. M. Gaddis to be postmaster at Kingman, in the county of Mohave and Territory of Arizona, in place of Oregon D. M. Gaddis. Incumbent's commission expires March 10, 1907.

CALIFORNIA.

Fred M. Kelly to be postmaster at Needles, in the county of San Bernardino and State of California, in place of Fred M. Kelly. Incumbent's commission expired February 16, 1907.

Samuel S. Wood to be postmaster at Rialto, in the county of San Bernardino and State of California. Office became Presidential January 1, 1907.

Warren A. Woods to be postmaster at Suisun City, in the county of Solano and State of California, in place of Warren A. Woods. Incumbent's commission expired February 26, 1907.

GEORGIA.

Augusta Glover to be postmaster at Monticello, in the county of Jasper and State of Georgia, in place of Edward Y. Swanson, resigned.

INDIAN TERRITORY.

Lyman F. Beard to be postmaster at Madill, in District 22, Indian Territory, in place of Richard H. Everett. Incumbent's commission expired December 15, 1906.

IOWA.

Eric P. Dalander to be postmaster at Madrid, in the county of Boone and State of Iowa, in place of Eric P. Dalander. Incumbent's commission expired January 7, 1907.

LOUISIANA.

Raoul J. Bienvenu to be postmaster at St. Martinville, in the parish of St. Martin and State of Louisiana, in place of Raoul J. Bienvenu. Incumbent's commission expired February 26, 1907.

MISSISSIPPI.

Seth W. Collins to be postmaster at McComb, in the county of Pike and State of Mississippi, in place of Seth W. Collins. Incumbent's commission expired April 2, 1906.

MISSOURI.

William A. Ulery to be postmaster at Elsberry, in the county of Lincoln and State of Missouri, in place of William A. Ulery. Incumbent's commission expired February 28, 1907.

NEW HAMPSHIRE.

Bertha L. Martin to be postmaster at Goffstown, in the county of Hillsboro and State of New Hampshire. Office became Presidential October 1, 1906.

NEW JERSEY.

Frank E. De Graw to be postmaster at South Amboy, in the county of Middlesex and State of New Jersey, in place of Bernard Roddy, deceased.

NEW YORK.

Herbert J. Curtis to be postmaster at Red Hook, in the county of Dutchess and State of New York, in place of Herbert J. Curtis. Incumbent's commission expired January 22, 1907.

Abram Devendorf to be postmaster at Fort Plain, in the county of Montgomery and State of New York, in place of Abram Devendorf. Incumbent's commission expires March 16, 1907.

Seneca D. Zeh to be postmaster at Hillsdale, in the county of Columbia and State of New York. Office became Presidential January 1, 1907.

NORTH CAROLINA.

William J. Leary, sr., to be postmaster at Edenton, in the county of Chowan and State of North Carolina, in place of Leroy L. Brinkley, resigned.

John R. Mobley to be postmaster at Williamston, in the county of Martin and State of North Carolina, in place of Joseph M. Sitterson, removed.

NORTH DAKOTA.

Thomas Jones to be postmaster at Linton, in the county of Emmons and State of North Dakota. Office became Presidential January 1, 1907.

H. C. Plumley to be postmaster at Fargo, in the county of Cass and State of North Dakota, in place of Ernest C. Eddy. Incumbent's commission expired February 4, 1907.

Frank Sims to be postmaster at Willow City, in the county of Bottineau and State of North Dakota, in place of Frank Sims. Incumbent's commission expired January 29, 1907.

Ole Roland to be postmaster at Bottineau, in the county of Bottineau and State of North Dakota, in place of Ole Roland. Incumbent's commission expired January 29, 1907.

OHIO.

H. H. Baird to be postmaster at Pataskala, in the county of Licking and State of Ohio, in place of William S. Needham. Incumbent's commission expires March 3, 1907.

George E. Canning to be postmaster at Mount Vernon, in the county of Knox and State of Ohio, in place of George E. Canning. Incumbent's commission expired January 16, 1906.

Herman C. Glander to be postmaster at West Alexandria, in the county of Preble and State of Ohio. Office became Presidential January 1, 1907.

Mary S. Hill to be postmaster at Berlin Heights, in the county of Erie and State of Ohio. Office became Presidential January 1, 1907.

William B. Jones to be postmaster at Delaware, in the county of Delaware and State of Ohio, in place of William B. Jones. Incumbent's commission expired February 4, 1907.

OKLAHOMA.

C. H. Eldred to be postmaster at Alva, in the county of Woods and Territory of Oklahoma, in place of William C. Douglass. Incumbent's commission expired January 21, 1906.

PENNSYLVANIA.

Caleb S. Brinton to be postmaster at Carlisle, in the county of Cumberland and State of Pennsylvania, in place of Caleb S. Brinton. Incumbent's commission expired March 2, 1907.

David S. Kern to be postmaster at Pennsburg, in the county of Montgomery and State of Pennsylvania, in place of David S. Kern. Incumbent's commission expired January 26, 1907.

George W. Torrence to be postmaster at Smithton, in the county of Westmoreland and State of Pennsylvania. Office became Presidential January 1, 1907.

RHODE ISLAND.

Albert S. Wood to be postmaster at Hope Valley, in the county of Washington and State of Rhode Island. Office became Presidential January 1, 1907.

TEXAS.

Laura Martin to be postmaster at Bonham, in the county of Fannin and State of Texas, in place of Harry Martin, deceased.

VERMONT.

Edward W. Bisbee to be postmaster at Barre, in the county of Washington and State of Vermont, in place of Edward W. Bisbee. Incumbent's commission expired January 22, 1907.

WEST VIRGINIA.

Wilbur C. Baxter to be postmaster at Sutton, in the county of Braxton and State of West Virginia, in place of James H. Dunn. Incumbent's commission expired February 26, 1907.

WISCONSIN.

Edwin F. Ganz to be postmaster at Alma, in the county of Buffalo and State of Wisconsin, in place of Edwin F. Ganz. Incumbent's commission expired January 23, 1907.

Thomas W. Morefield to be postmaster at Elkhorn, in the county of Walworth and State of Wisconsin, in place of Thomas W. Morefield. Incumbent's commission expired June 19, 1906.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate March 2, 1907.*

COLLECTOR OF CUSTOMS.

Charles F. Leach, of Ohio, to be collector of customs for the district of Cuyahoga, in the State of Ohio.

POSTMASTERS.

CALIFORNIA.

Clyde F. Baldwin to be postmaster at Whittier, in the county of Los Angeles and State of California.

Oliver H. Duvall to be postmaster at Claremont, in the county of Los Angeles and State of California.

Fred. M. Kelly to be postmaster at Needles, in the State of California.

Samuel S. Wood to be postmaster at Rialto, in the State of California.

MISSOURI.

James H. Turner to be postmaster at Weston, in the county of Platte and State of Missouri.

MASSACHUSETTS.

George Abbott to be postmaster at East Douglass, in the county of Worcester and State of Massachusetts.

Frederick H. Greene to be postmaster at Ashburnham, in the county of Worcester and State of Massachusetts.

NEBRASKA.

Joseph W. McClelland to be postmaster at Fullerton, in the county of Nance and State of Nebraska.

Isaac S. Tyndale to be postmaster at Central City, in the county of Merrick and State of Nebraska.

NEW HAMPSHIRE.

Bertha L. Martin to be postmaster at Goffstown in the State of New Hampshire.

NEW JERSEY.

Charles C. Cowperthwait to be postmaster at Mount Holly, in the county of Burlington and State of New Jersey.

Frank E. De Graw to be postmaster at South Amboy, in the State of New Jersey.

Thomas C. Elvins to be postmaster at Hammonton, in the county of Atlantic and State of New Jersey.

Arthur Winner to be postmaster at Palmyra, in the county of Burlington and State of New Jersey.

NEW YORK.

Herbert J. Curtis to be postmaster at Red Hook, in the State of New York.

Abram Devendorf to be postmaster at Fort Plain, in the State of New York.

Seneca D. Yeh to be postmaster at Hillsdale, in the State of New York.

NORTH DAKOTA.

Thomas Jones to be postmaster at Linton, in the State of North Dakota.

Frank Sims to be postmaster at Willow City, in the State of North Dakota.

H. C. Plumley to be postmaster at Fargo, in the State of North Dakota.

Ole Roland to be postmaster at Botteneau, in the State of North Dakota.

PENNSYLVANIA.

Clara E. Fessenden to be postmaster at Roulette, in the county of Potter and State of Pennsylvania.

George W. Torrence to be postmaster at Smithton, in the county of Westmoreland and State of Pennsylvania.

RHODE ISLAND.

Albert S. Wood to be postmaster at Hope Valley, in the county of Washington and State of Rhode Island.

VERMONT.

Edward W. Bisbee to be postmaster at Barre, in the county of Washington and State of Vermont.

WEST VIRGINIA.

Wilbur C. Baxter to be postmaster at Sutton, in the county of Braxton and State of West Virginia.

WISCONSIN.

Thomas W. Morefield to be postmaster at Elkhorn, in the county of Walworth and State of Wisconsin.

## REJECTION.

*Executive nomination rejected by the Senate March 2, 1907.*

POSTMASTER.

FLORIDA.

William H. Northup to be postmaster at Pensacola, in the county of Escambia and State of Florida.

## HOUSE OF REPRESENTATIVES.

### SUNDAY, *March 3, 1907.*

[*Continuation of legislative day of Saturday, March 2, 1907.*]

The recess having expired, the House was called to order by the Speaker at 11 o'clock a. m.

APPOINTMENTS BY THE SPEAKER.

The SPEAKER announced the following appointments:

Temporary Committee on Accounts: Mr. CASSEL, Mr. HUGHES, Mr. BARTLETT.

Commission under the immigration act: Mr. HOWELL of New Jersey, Mr. BENNET of New York, Mr. BURNETT.

Visitors to the Military Academy: Mr. HULL, Mr. DWIGHT, Mr. HAY.

Visitors to the Naval Academy: Mr. DAWSON, Mr. HINSHAW, Mr. PADGETT.

Postal Commission authorized by post-office appropriation bill: Mr. OVERSTREET of Indiana, Mr. GARDNER of New Jersey, Mr. MOON of Tennessee.

Trustee, Reform School, District of Columbia: Mr. JENKINS.

House committee under joint resolution No. 240, constituting a joint committee for revision of laws: Mr. MOON of Pennsylvania, Mr. PARSONS, Mr. DENBY, Mr. SHERLEY, Mr. HOUSTON.

RECESS.

Mr. MACON rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. MACON. Mr. Speaker, I move that the House do now take a recess until to-morrow morning at 9 o'clock.

The SPEAKER. The question is on the motion of the gentleman from Arkansas, that the House do take a recess until to-morrow morning at 9 o'clock.

The question was taken; and on a division (demanded by Mr. MACON) there were—ayes 11, noes 50.

Mr. MACON. Mr. Speaker, I make the point of no quorum.

The SPEAKER. A quorum is not present. The doorkeepers will close the doors, the Sergeant-at-Arms will bring in absentees, and the roll will be called. Those in favor of taking a recess will, as their names are called, answer "aye;" those who are opposed will answer "no;" those not voting will answer "present." The Clerk will call the roll.

The question was taken; and there were—yeas 41, nays 153, answered "present" 14, not voting 169, as follows:

YEAS—41.

| | | | |
|---|---|---|---|
| Adamson | Gill | Patterson, S. C. | Southall |
| Aiken | Glass | Rainey | Spight |

| Dunwell | Kelliher | Rhinock | Young |
| Dwight | Kennedy, Ohio | Rhodes | |
| Edwards | Kinkaid | Richardson, Ky | |
| Ellis | Kitchin, Claude | Rives | |

So the motion to take a recess was rejected.

The Clerk announced the following additional pairs:

Until further notice:

Mr. JENKINS with Mr. CLARK of Florida.

Mr. FOSS with Mr. GUDGER.

For the vote:

Mr. LONGWORTH with Mr. TAYLOR of Alabama.

Mr. TAWNEY with Mr. UNDERWOOD.

Mr. WASHBURN with Mr. CANDLER.

Mr. COUSINS with Mr. CLAYTON.

Mr. GARDNER of Massachusetts with Mr. THOMAS of North Carolina.

The SPEAKER. On this motion the yeas are 41, the nays are 151, present 5, a quorum, and the motion to take a recess fails. The Doorkeeper will open the doors.

CORRECTION OF THE RECORD.

Mr. HINSHAW rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. HINSHAW. To correct the RECORD. On page 4538, on the vote in regard to the shipment of silver, I voted "no." I am recorded as not voting.

The SPEAKER. Without objection, the correction will be made.

There was no objection.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to reports of committees of conference on the disagreeing votes of the two Houses on the amendments of the House of Representatives to bills of the following titles:

S. 7247. An act to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, a public building; and

S. 8327. An act to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 6704) to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing

votes of the two Houses on the amendments of the Senate to the bill (H. R. 13605) to satisfy certain claims against the Government arising under the Navy Department.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24815) making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908.

The message also announced that the Senate had passed the following resolutions:

*Resolved*, That the Senate has heard with profound sorrow of the death of Hon. WILLIAM H. FLACK, late a Representative from the State of New York.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

The message also announced that the Senate had heard with profound sorrow the announcement of the death of the Hon. JOHN H. KETCHAM, late a Representative from the State of New York.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to the memory of the deceased.

The message also announced that the Senate had heard with profound sorrow the announcement of the death of Hon. HENRY C. ADAMS, late a Member of the House of Representatives from the State of Wisconsin.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

The message also announced that the Senate has heard with profound sorrow of the death of Hon. JOHN F. RIXEY, late a Representative from the State of Virginia.

*Resolved*, That the business of the Senate be now suspended in order that a fitting tribute may be paid to his memory.

The message also announced that the Senate had passed with amendments bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 17415. An act to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 23221. An act for the erection of a public building at the city of Athens, in the State of Ohio;

H. R. 25885. An act to extend the time for building a bridge across Red River at Shreveport, La.; and

H. R. 23988. An act to authorize a patent to be issued to Martha Sanders, widow of Levi B. Sanders, for certain lands therein described.

The message also announced that the Senate had passed with amendments bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 25812. An act to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes, disagreed to by the House of Representatives, had agreed to the conference asked for by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HALE, Mr. ALLISON, and Mr. TELLER as the conferees on the part of the Senate.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills and joint resolution:

H. J. Res. 236. Joint resolution authorizing the Secretary of the Navy to furnish metal for a bell;

H. R. 3268. An act for the relief of Henry O. Bassett, heir of Henry Opeman Bassett, deceased;

H. R. 8699. An act for the relief of James A. Carroll;

H. R. 10095. An act making certain changes in the postal laws;

H. R. 10305. An act to provide for the repayment of certain customs dues;

H. R. 11401. An act granting an increase of pension to William Kling;

H. R. 13418. An act for the relief of W. S. Hammaker;

H. R. 15859. An act ceding certain lands to Colorado State Agricultural College;

H. R. 19500. An act for the relief of Indian traders Marion Wescott, F. F. Green, and J. A. Leige, assignee of Joseph F. Gauthier, a Menominee Indian trader with the Menominee Indians of Wisconsin;

H. R. 19751. An act to authorize the Natchez Electric Street Railway and Power Company to construct and operate an electric railway along the national cemetery roadway at Natchez, Miss.;

H. R. 21091. An act authorizing and directing the Secretary of the Treasury to enter on the roll of Capt. Orlando Humason's Company B, First Oregon Mounted Volunteers, the name of Hezekiah Davis;

H. R. 22588. An act for the relief of homestead entrymen who have paid more than the lawful purchase money;

H. R. 24816. An act to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906;

H. R. 24833. An act for the relief of the Louisiana Molasses Company (Limited) and the Louisiana Distilling Company;

H. R. 25437. An act to grant American registry to the German bark *Mariechen;*

H. R. 25474. An act to amend sections 5 and 6 of an act entitled "An act to authorize the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same;"

H. R. 25739. An act to authorize the Cairo and Tennessee River Railroad Company to construct bridges across Cumberland River;

H. R. 25801. An act granting an honorable discharge to Seth Davis;

H. R. 25811. An act to authorize the Monroe, Farmerville and Northwestern Railway Company to construct a bridge over the Ouachita River and one over the D'Arbonne River, in Louisiana;

H. R. 25832. An act to authorize Herman L. Hartenstein to construct a dam across the St. Joseph River near the village of Mottville, St. Joseph County, Mich.; and

H. R. 25849. An act permitting the building of a dam across the Savannah River at Cherokee Shoals.

AMENDING SECTION 591 OF THE REVISED STATUTES.

Mr. JENKINS. Mr. Speaker, I ask unanimous consent for the consideration of the Senate bill which I send to the Clerk's desk.

The SPEAKER. Is the bill on the Calendar?

Mr. JENKINS. The bill is on the Calendar.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent for the present consideration of the bill which the Clerk will report.

The Clerk read as follows:

An act (S. 7812) to amend section 591 of the Revised Statutes of the United States relative to the assignment of district judges to perform the duties of a disabled judge.

*Be it enacted, etc.*, That whenever in the case contemplated and provided for in section 591 of the Revised Statutes it shall be certified by the circuit judge, or in his absence, of the circuit justice of the circuit in which the district lies, that for any sufficient reason it is impracticable to designate and appoint a judge of another district within the circuit to perform the duties of such disabled judge, the Chief Justice may, if in his judgment the public interests so require, designate and appoint the judge of any other district in another circuit to hold said courts and to discharge all the judicial duties of the judge so disabled, during such disability.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to know what the bill accomplishes. We can not tell from hearing the bill read.

Mr. JENKINS. Mr. Speaker, I will say to the gentleman from Illinois, in answer to his question, that under the present law if a district judge is incapacitated for any reason the circuit judge or circuit justice can order any other district judge in that circuit to act. This bill extends the law so if a judge can not be found in the district the Chief Justice of the Supreme Court of the United States can order any other district judge outside of the circuit to perform the duties. It is a very necessary bill, I will say to the gentleman. It has passed the Senate, is urged upon us by the Department of Justice, and our attention has been called to many places throughout the United States where they are really suffering to-day for the want of the presence of a judge and can not have him because under the law an assignment can not be made.

Mr. MANN. Does the bill so read that they can order a judge from one circuit to another only in case of the incapacitation of the circuit judge?

Mr. JENKINS. That is all.

Mr. SULZER. In other words, if this bill becomes a law it will expedite the administration of justice.

Mr. MANN. That is a question whether it does or not. There is not a single dollar of increase of expenditure, because the man gets the extra money all the time.

Mr. JENKINS. No; I think the gentleman will withdraw

that statement when he stops to think. In a great many places our attention is called to the fact persons are held in jail when they could be tried if it was possible to get a judge to try the case. It would be certainly for the benefit of the Government. It is an administrative matter which has been urged upon us by the Department of Justice, and the committees of both Houses have unanimously reported upon it.

Mr. OLMSTED. Is there any additional compensation or other expense to judges going from other districts?

Mr. JENKINS. None whatever.

Mr. SULZER. It seems to me that this is a good bill and it ought to pass.

Mr. MANN. I see the gentleman from New York is especially interested in it. Are there any judges expected to be incapacitated in New York or elsewhere?

Mr. SULZER. I am always interested in justice.

Mr. JENKINS. I can not answer the gentleman, but I am presenting a good measure.

Mr. MANN. The fact the gentleman from New York is in its favor persuades me to withdraw my objection.

Mr. SULZER. The gentleman from New York is always in favor of justice—to all men.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to be read the third time; was read the third time, and passed.

On motion of Mr. JENKINS, a motion to reconsider the last vote was laid on the table.

### CHALMETTE MONUMENT.

Mr. MEYER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8292) providing for the completion by the Secretary of War of a monument to the memory of American soldiers who fell in the battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor.

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the sum of $25,000 be, and the same is hereby, appropriated, or so much thereof as may be necessary, out of any money in the Treasury of the United States not otherwise appropriated, for the completion of a monument to the memory of the soldiers who fell in the battle of New Orleans in the war of 1812, said monument to be completed under the direction and approval of the Secretary of War: *Provided*, That the State of Louisiana shall cede and transfer its jurisdiction to the property on which said monument is to be completed in accordance with the provisions of act No. 41 of the legislature of that State, approved July 19, 1902: *Provided further*, That when said monument is completed the responsibility of maintaining the same and keeping the grounds surrounding it shall remain with the United Daughters of 1776 and 1812, free of any expense or responsibility on the part of the Government of the United States.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. MEYER. Mr. Speaker, I move to suspend the rules.

The SPEAKER. The Chair contemplated submitting for unanimous consent five monument bills on the Calendar, namely, the Chalmette Monument Place, St. Bernard, La.; Christopher Columbus monument; John D. Sloat monument, at Monterey, Cal.; the Stephenson Grand Army monument, Washington, D. C., and Tippecanoe battle ground, Tippecanoe County, Ind. These are bills on the Calendar, and the Chair intended to submit these five with that statement. Is there objection to the consideration of the bill?

Mr. LEVER. Mr. Speaker, reserving the right to object, I would suggest to the Chair that he might add one more, namely, to erect a monument to John Thomas Sumter, of South Carolina. The bill was reported in the Fifty-seventh Congress by the Committee on the Library.

The SPEAKER. It is not on the Calendar now.

Mr. LEVER. And I have made diligent efforts to have it reported this session.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The Chair takes it that one objection will cover the other four.

### CHANGE OF COURT JURISDICTION IN OKLAHOMA.

The SPEAKER laid before the House the bill (S. 8498) entitled "An act to amend sections 16, 17, and 20 of an act entitled 'An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States,' approved June 16, 1906, and for other purposes," a similar bill being upon the Union Calendar, which was read, as follows:

*Be it enacted, etc.*, That section 16 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, be, and the same is hereby, amended so as to read as follows:

"SEC. 16. That all civil causes, proceedings, and matters pending in the supreme or district courts of Oklahoma Territory, or in the United States courts or United States court of appeals in the Indian Territory, arising under the Constitution, laws, or treaties of the United States, or affecting ambassadors, ministers, or consuls of the United States, or of any other country or state, or of admiralty, or of maritime jurisdiction, or in which the United States may be a party, or between citizens of the same State claiming lands under grants from different States; and all cases where there is a controversy between a citizen of either of said Territories prior to admission and a citizen of any State, or between a citizen of any State and a citizen or subject of any foreign state or country, in which cases of diversity of citizenship there shall be more than $2,000 in controversy, exclusive of interest and costs, shall be transferred to the proper United States circuit or district court established by this act, for final disposition, and shall therein be proceeded with in the same manner as if originally brought therein: *Provided*, That said transfer shall not be made in any such case where the United States is not a party, except on application of one of the parties, in the court in which the cause is pending, at or before the second term of such court after the admission of said State, supported by oath, showing that the case is one which may be so transferred. The proceedings to effect such transfer, except as to time and parties, shall be the same as are now provided by law for the removal of causes from a State court to a circuit court of the United States. Cases transferred from appellate courts shall go to the circuit courts of the United States in such State, which courts, for the purpose of hearing such cases, are hereby vested with all the powers of such Territorial appellate courts. If the circuit court shall affirm the judgment, it shall, if the case be one then originally cognizable in the district court, remand it to that court for carrying into effect the judgment of the trial court; but if the case be one then originally cognizable in the circuit court, it shall carry into effect the judgment of the trial court. If the circuit court shall reverse the judgment, it shall, if the case be one then originally cognizable in the district court, remand the case to that court for a new trial; but if the case be one then originally cognizable in the circuit court, it shall set the case down for a new trial therein. All final judgments and decrees rendered in such circuit and district courts in such transferred cases may be reviewed by the Supreme Court of the United States, or by the United States circuit court of appeals, in such cases and in the same manner as is now provided by law with reference to the judgments and decrees of the existing United States circuit and district courts.

"Prosecutions for all crimes and offenses committed within the Territory of Oklahoma or in the Indian Territory, pending in the district courts of the Territory of Oklahoma or in the United States courts in the Indian Territory upon the admission of such Territories as a State, which, had they been committed within a State, would have been cognizable in the Federal courts, shall be transferred to and be proceeded with in the United States circuit or district court established by this act for the district in which the offenses were committed, in the same manner and with the same effect as if they had been committed within a State. Prosecutions for all such offenses committed within either of said Territories and pending in the supreme court of the Territory of Oklahoma, or in the United States court of appeals in the Indian Territory, upon the admission of such Territories as a State, shall be transferred to the United States circuit courts created by this act for the district within which the offense was committed, which courts are hereby vested with the same jurisdiction to hear such cases as is now vested in the appellate courts of such Territories. Upon the affirmance or reversal by the circuit court of a judgment in any such case, like proceedings shall be had, and like appeals and writs of error allowed, as is provided in this section of this act in civil cases."

SEC. 2. That section 17 of said act is hereby amended so as to read as follows:

"SEC. 17. That all causes, proceedings, and matters, civil or criminal, pending in the supreme court of the Territory of Oklahoma, or in the United States court of appeals in the Indian Territory, not transferred to the United States circuit or district courts in said State of Oklahoma shall be proceeded with, held, and determined by the supreme court or other final appellate court of such State as the successor of said supreme court of the Territory of Oklahoma and of the United States court of appeals in the Indian Territory, subject to the same right to review upon appeal or writ of error to the Supreme Court of the United States now allowed from the supreme or final appellate court of a State under existing laws."

SEC. 3. That section 20 of said act is hereby amended so as to read as follows:

"SEC 20. That all causes, proceedings, and matters, civil or criminal, pending in the district courts of Oklahoma Territory, or in the United States courts in the Indian Territory, at the time said Territories become a State, not transferred to the United States circuit or district courts in the State of Oklahoma, shall be proceeded with, held, and determined by the courts of said State, the successors of said district courts of the Territory of Oklahoma, and the United States courts in the Indian Territory; with the right to prosecute appeals or writs of error to the supreme or appellate court of said State, and also with the same right to prosecute appeals or writs of error from the final determination in such cases made by the supreme or appellate court of such State to the Supreme Court of the United States, as is provided by law for appeals and writs of error from the supreme or final appellate court of a State to the Supreme Court of the United States. All criminal cases pending in the United States courts in the Indian Territory not transferred to the United States circuit or district courts in the State of Oklahoma shall be prosecuted to a final determination in the State courts of Oklahoma under the laws now in force in that Territory."

SEC. 4. That original sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and Arizona to form a constitution

and State government and be admitted into the Union on an equal footing with the original States," and all other laws in conflict herewith are hereby repealed.

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I would like to know what the bill provides for, Mr. Speaker.

Mr. HAMILTON. Mr. Speaker, perhaps the report of the House Committee on Territories would give a better explanation than I could give in the brief time that I can consume, but the condition is simply this: The enabling act for the creation of the proposed State of Oklahoma provided, in effect, that all Federal causes should be transferred to the Federal courts provided for in the enabling act. Now, in Indian Territory, I think, there are eight so-called "district courts." Their calendars are congested with small cases, many of them criminal cases, and the Department of Justice advises that something should be done to relieve the Federal courts from the congestion incident to the transfer of these cases to the Federal courts provided for by the enabling act; that is, the Federal courts for the eastern and western districts of the proposed State of Oklahoma. Therefore, this bill in effect provides that all causes which are properly cognizable in said courts shall be cognizable in State courts, and those which are properly cognizable in Federal courts shall be triable in the Federal courts proposed to be created. This is advised by the Department of Justice. The bill has passed the Senate and a similar bill has been reported out by the Committee on Territories of this House.

Mr. MANN. The gentleman says "properly cognizable in the Federal courts." Does he mean by that cases above $2,000?

Mr. HAMILTON. Yes.

Mr. MANN. And that is the only distinction?

Mr. HAMILTON. There are other distinctions, but that covers the matter.

Mr. BURLESON. What Senate committee considered this bill and reported it.

Mr. HAMILTON. The Committee on Territories.

Mr. BURLESON. It was never referred to the Judiciary Committee of the Senate?

Mr. HAMILTON. Certainly not. It was referred to the Committee on Territories of the Senate and reported by that committee, and passed by the Senate. A similar bill was reported by the House Committee on the Territories.

Mr. STEPHENS of Texas. I would like to ask the gentleman if the judges or the State Bar Association of Oklahoma and Indian Territory recommended the passage of this bill?

Mr. HAMILTON. I do not think that has been presented to our committee, but the Department of Justice has been very much interested in this matter and sent a letter to the committee.

Mr. STEPHENS of Texas. Recommending the passage of this bill?

Mr. MANN. Will the gentleman yield to a question?

Mr. HAMILTON. Certainly.

Mr. MANN. Does this bill change the jurisdiction in Federal cases?

Mr. HAMILTON. It changes the jurisdiction; sending many of the cases to the State courts.

Mr. MANN. Then it changes the jurisdiction?

Mr. HAMILTON. There are eight district courts there, and in the present condition of the Indian Territory, all kinds of cases are tried in those courts.

Mr. MANN. I understand that.

Mr. HAMILTON. All those cases that are now pending would be triable in the Federal courts.

Mr. MANN. The criminal and fine cases now pending?

Mr. HAMILTON. Yes.

Mr. MANN. I am surprised that the gentleman did not cover that in the enabling act.

Mr. HAMILTON. We did not cover them all; but nobody could guard against the gentleman's surprise.

Mr. MANN. I thought the gentleman would have guarded against that at least.

Mr. HAMILTON. We did not have an opportunity to consult the gentleman about our enabling act; but some matters have developed since we passed it.

Mr. MANN. What provision is there in this bill for appeals in criminal and other cases?

Mr. HAMILTON. There is no provision in it, but there will be the usual appeal that would be usual in a State case. It simply transfers those cases to State courts.

Mr. MANN. Where there are appeals from the trial courts pending in a higher court, civil or criminal, what becomes of those cases?

Mr. LLOYD. They remain in the higher court.

Mr. MANN. The higher court will remain the same? Is there no provision for any higher court to take these cases?

Mr. HAMILTON. Not in this.

Mr. WALDO. Will the gentleman yield to a question?

Mr. HAMILTON. Certainly.

Mr. WALDO. Do I understand that the result of this legislation, if passed, will be that the cases now pending before the Territorial courts of Oklahoma and the Indian Territory will be divided into two classes, and those properly within the Federal jurisdiction will be transferred to the new Federal courts, and those properly within the jurisdiction of the State courts will be transferred to the new State courts?

Mr. HAMILTON. That is it, in effect.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

On motion of Mr. HAMILTON, a motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was ordered to lie on the table.

TOBE HOLT.

The SPEAKER laid before the House the bill (H. R. 16659) to correct the military record of Tobe Holt, with a Senate amendment, which was read.

Mr. CAPRON. I move that the House concur in the Senate amendment.

The motion was agreed to.

DONATION OF CONDEMNED CANNON.

Mr. LOUD. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 16235.

The Clerk read as follows:

A bill (H. R. 16235) authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.

*Be it enacted, etc.*, That the Secretary of War is hereby authorized to deliver to the city of Petoskey, Mich., two brass field pieces (formerly located at Fort Brady, Mich., and now at Rock Island Arsenal, condemned to be converted into scrap brass), with their carriages and implements, the same to be taken care of by said city, and be subject at all times to the order of the Secretary of War.

The amendments recommended by the committee were read, as follows:

In line 3, after the word "to," insert "loan and."
In line 7 strike out the words "with their carriages and implements."
Add to the bill the following:
"*Provided*, That no expense shall be incurred by the United States in the delivery of said cannon."

The SPEAKER. Is there objection?

Mr. STAFFORD. Reserving the right to object, there is one cannon already located at Petoskey, Mich. I desire to know if there are any other abandoned cannon at Petoskey, Mich.?

Mr. LOUD. No; I think not.

The SPEAKER. Is there objection? [After a pause.] The Chairs hears none.

The amendments were agreed to.

The bill as amended was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

On motion of Mr. LOUD, a motion to reconsider the vote by which the bill was passed was laid on the table.

FOYS FLATS, TRENT RIVER, NORTH CAROLINA.

Mr. BURTON of Ohio. Mr. Speaker, I ask unanimous consent for the present consideration of the joint resolution which I ask the Clerk to read.

The Clerk read as follows:

House joint resolution No. 253, relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

*Resolved, etc.*, That the Secretary of War is authorized to expend such portion of the appropriation made in the river and harbor act of this session for the Neuse and Trent rivers, North Carolina, as may be necessary for securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The joint resolution was ordered to be engrossed for a third reading; and being engrossed it was accordingly read the third time, and passed.

On motion of Mr. BURTON of Ohio, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

CIRCUIT AND DISTRICT COURTS AT DAYTON, OHIO.

Mr. NEVIN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill which I send to the Clerk's desk.

The Clerk read as follows:

A bill (H. R. 25889) to provide for sittings of the United States circuit and district courts of the southern district of Ohio at the city of Dayton, in said district.

*Be it enacted, etc.*, That from and after the passage of this act there shall be held at the city of Dayton, in the southern district of Ohio, a

term of both the circuit and district courts of said district on the first Monday in May and November of each year.

SEC. 2. That grand and petit jurors summoned for service at such terms of either of the courts aforesaid may be residents of any part of this said southern district of Ohio.

SEC. 3. That prosecutions for crimes or offenses hereafter committed in any part of the said district shall be congnizable at the terms aforesaid of either of the said courts having jurisdiction thereof.

SEC. 4. That all suits which, under existing law, may be brought within the said southern district, or any division thereof, may be instituted, prosecuted, tried, and determined at the said terms of court so to be held in the said city of Dayton.

SEC. 5. That any judge of the United States holding court in the southern district of Ohio in pursuance of existing laws may transfer any suit now pending in the court wherein he shall be so, as aforesaid, sitting to the next term of the circuit or district court, as the case may be, whichever shall have jurisdiction of the same, next to be held at the said city of Dayton, in accordance with the terms of this act.

SEC. 6. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed to the extent of such inconsistency, but not otherwise.

Mr. MANN. Reserving the right to object, I would like to have an explanation of the bill.

Mr. NEVIN. At this session of the House we have already passed a bill for that purpose. It passed the Senate and went to the Attorney-General; but it turns out that in the bill which we drew, and which was recommended by the Judiciary Committee and passed the House and Senate, we failed to provide that they might draw jurors anywhere in both subdivisions. To cure that defect is the sole purpose of this amendment, and this takes the place of the other bill; nothing else.

Mr. MANN. Let me ask the gentleman: We passed a bill a short time ago for a new judge in Ohio?

Mr. NEVIN. Yes.

Mr. MANN. Is this the same bill?

Mr. NEVIN. No; this is simply a bill providing for the holding of court at Dayton, Ohio, a city of over 100,000 people. The bill that passed both this body and the Senate went to the President for his approval and was referred to the Attorney-General, and the Attorney-General simply said, "You can not draw jurors under the law dividing the district into two sections."

Mr. MANN. I have no objection.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

On motion of Mr. NEVIN, a motion to reconsider the last vote was laid on the table.

### RECORDS OF THE INDUSTRIAL COMMISSION.

Mr. McCLEARY of Minnesota. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution No. 211, authorizing the transfer of the files, books, and pamphlets of the Industrial Commission.

The joint resolution was read, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That all official minutes and files of correspondence of the Industrial Commission deposited with the Librarian of Congress by the joint resolution of February 21, 1902, be transferred to the Department of Commerce and Labor, to become the property of said Department. The Librarian of Congress is hereby authorized to select from the volumes and pamphlets constituting the library of the Industrial Commission such publications as may be needed for the uses of the Library of Congress, which books shall become the property of the Library of Congress, and to turn over the residue of such volumes and pamphlets to the Department of Commerce and Labor, to become the property of the said Department.

Mr. SULZER. Mr. Speaker, reserving the right to object, we should like to have some explanation of this resolution.

Mr. McCLEARY of Minnesota. Mr. Speaker, I have here a letter from the Secretary of Commerce and Labor, which will probably make the explanation desired by the gentleman.

The Clerk read as follows:

DEPARTMENT OF COMMERCE AND LABOR,
OFFICE OF THE SECRETARY,
*Washington, February 7, 1907.*

COMMITTEE ON THE LIBRARY,
*House of Representatives, Washington, D. C.*

GENTLEMEN: I desire to call your attention to House joint resolution No. 211, authorizing the transfer of the files of the Industrial Commission to the Department of Commerce and Labor. Such a transfer would, in my judgment, be of decided advantage to this Department. I am informed by the late secretary of the Commission that its files contain correspondence, statements, papers, statistics, and miscellaneous material collected by the Commission in connection with its work. While doubtless the important results of the Commission's investigations were all published, there is little doubt that some valuable information of a detailed character, or information tending to explain some of the published material, remains in the files unpublished. Inasmuch as the larger part of the field of investigation covered by the Industrial Commission has to do with subjects falling within the jurisdiction of the Department of Commerce and Labor, it would seem that there would be no way in which this material could be made more useful than by transferring it to the files of this Department.

I am informed further that the files of the Industrial Commission are not extensive in bulk, and that they are already so arranged and indexed that they could be transferred to the files of this Department with little difficulty or expense.

You will note that the resolution provides that the publications constituting the library of the Industrial Commission shall, in general, become the property of the Library of Congress. The only exception contemplated is the possible one of a few books which may be directly connected with the testimony or material in the manuscript files.

Very respectfully,

OSCAR S. STRAUS, *Secretary.*

The SPEAKER. Is there objection?

Mr. SULLIVAN. Mr. Speaker, will the result of the passage of this joint resolution be to transfer these files and documents from a place where they are now available to the public to a place where they will not be available to the public?

Mr. McCLEARY of Minnesota. In answer to the inquiry of my friend from Massachusetts I will say no. When the Industrial Commission finished its work and its term of office expired, they were temporarily stored in the building of the Library. This is the material from which they made their report. The Department of Commerce and Labor desires that original material to be in its possession.

Mr. MANN. And the Library wants to be rid of it. I will say to the gentleman that I objected to the proposition when it came up before, and then saw the Librarian of Congress, and he said they had no use for the material; that they wanted to get rid of it; that it was often consulted by the Department of Commerce and Labor, and that they thought it ought to go over there, but that they proposed to retain the books.

Mr. SULLIVAN. The only question is whether experts not connected with the Government service wishing to make an investigation of the original data may be able to make that investigation hereafter when these documents and files are transferred to the Department of Commerce and Labor.

Mr. MANN. The material will go over to the librarian of the Department of Commerce and Labor and will be accessible just the same.

Mr. SULLIVAN. When placed in the library of that Department, will the data be available to the public?

Mr. McCLEARY of Minnesota. Just the same as now.

Mr. SULLIVAN. You are certain about that?

Mr. McCLEARY of Minnesota. There is no question about that.

Mr. MANN. It will be open to the public.

The SPEAKER. The Chair hears no objection.

The joint resolution was ordered to be engrossed and read a third time, and was accordingly read the third time, and passed.

On motion of Mr. McCLEARY of Minnesota, a motion to reconsider the last vote was laid on the table.

### AGRICULTURAL BANK IN THE PHILIPPINES.

Mr. CRUMPACKER. Mr. Speaker, I move to suspend the rules and pass the Senate bill that I send to the Clerk's desk, with the amendments recommended by the Committee on Insular Affairs.

The bill was read, as follows:

An act (S. 6249) to provide for the establishment of an agricultural bank in the Philippine Islands.

*Be it enacted, etc.*, That for the purpose of aiding in the establishment and operation of such an agricultural bank in the Philippine Islands as the general government thereof may hereafter specifically authorize the Philippine government is empowered to guarantee an income of not exceeding 4 per cent per annum upon cash capital actually invested by individuals or corporations in such agricultural bank; such guaranty shall be granted by an act of the Philippine Commission which shall contain, among others, the following provisions:

First. The guaranty shall be made to a company organized under the laws of the Philippine Islands, with its principal office in Manila and with branches in such parts of the islands as may be designated by the Philippine Commission.

Second. The bank shall not grant loans except to those engaged in agriculture and with the sole purpose of assisting agriculture in the Philippine Islands.

Third. No loan exceeding in amount $5,000 shall be made except upon the written authorization of the secretary of finance and justice of the Philippine Islands.

Fourth. Interest charged on loans shall not exceed 10 per cent per annum: *Provided*, That in no event shall the total annual contingent liability under the guaranties authorized by this act at any time exceed $200,000, and no such guaranty shall continue for a longer period than twenty-five years.

For the further security of the Philippine government said government shall provide by the aforesaid act proper rules, including those for determining the cash capital actually invested in such bank and the net income actually received on said capital so invested, and shall provide for supervision by said Philippine government, through the auditing and other appropriate bureaus thereof, of the conduct of the business of the bank.

The bank shall make such reports from time to time as to its receipts and expenditures in such form and substance and sworn to by such officials as may be prescribed by the Philippine government, and its books and accounts shall be at all times open to inspection by any authorized agent of the Philippine government.

SEC. 2. That money paid by the Philippine government pursuant to the aforementioned guaranty shall be a liability of the bank of the Philippine government, and, as such, shall constitute a lien upon and be paid out of the annual net profits of the bank, subject only to the right of the stockholders to receive therefrom 4 per cent dividends per annum upon the bank's cash paid-up capital stock. No dividends above

4 per cent shall be paid, and no profits credited to the surplus fund, either during the period of the government's guaranty or subsequent thereto, until the Philippine government shall have been repaid in full all sums advanced to the bank under said guaranty.

Obligations of the bank to the Philippine government arising from advances made pursuant to the aforementioned guaranty and existing at the time when the bank shall go into liquidation shall constitute a lien on the bank's assets, subject only to the payment of the bank's legitimate debts and the repayment to the stockholders of the par value of the bank's duly authorized cash paid-up capital stock: *Provided*, That nothing in this section shall be interpreted as a guaranty on the part of the Philippine government to the stockholders of the bank of the par value of the bank's cash paid-up capital stock when the bank shall go into liquidation.

SEC. 3. That the bank shall not be permitted to hold real estate beyond that required for business premises: *Provided*, That the temporary acquisition of land as the result of foreclosure, or otherwise, on account of a debt, shall be permitted on condition that land so acquired shall be sold within ten years from the date of acquisition, and all said land not so alienated in good faith shall be forfeited to the Philippine government.

Mr. SULZER. Mr. Speaker, reserving the right to object——

The SPEAKER. Is a second demanded?

Mr. SULLIVAN. I demand a second.

Mr. RUCKER. I demand a second.

The SPEAKER. The gentleman from Massachusetts demands a second.

Mr. CRUMPACKER. I ask unanimous consent that a second be considered as ordered.

Mr. SHACKLEFORD. Mr. Speaker, the gentleman from Massachusetts was not on the floor when the gentleman from Missouri demanded a second.

The SPEAKER. The gentleman from Massachusetts is on the committee.

Mr. SHACKLEFORD. So is the gentleman from Missouri.

Mr. RUCKER. Mr. Speaker, I have no objection to the Speaker recognizing the gentleman from Massachusetts——

The SPEAKER. The Chair had recognized the gentleman from Massachusetts before the Chair knew that the gentleman from Missouri desired to demand a second.

Mr. RUCKER. But I placed myself directly in front of the Chair, hoping that I might be seen.

Mr. SULLIVAN. I am perfectly willing, Mr. Speaker, to yield all the time to the gentleman from Missouri that he desires.

Mr. RUCKER. I demand a second.

The SPEAKER. The gentleman from Massachusetts, on the committee, was recognized by the Chair——

Mr. SHACKLEFORD. But the gentleman from Massachusetts is not on the committee.

The SPEAKER. Is the gentleman from Missouri opposed to the bill?

Mr. RUCKER. Unquestionably.

The SPEAKER. The Chair will recognize the gentleman from Missouri to demand a second.

Mr. CRUMPACKER. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. The gentleman from Indiana asks unanimous consent that a second may be considered as ordered. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Indiana is entitled to twenty minutes and the gentleman from Missouri [Mr. RUCKER] is entitled to twenty minutes.

Mr. GARRETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GARRETT. Will it be in order at any time while the matter is pending to move to substitute the minority bill?

The SPEAKER. It will not be in order. This is a motion to suspend all rules and pass the bill with the amendment.

Mr. ZENOR. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman from Indiana rise?

Mr. ZENOR. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ZENOR. An amendment could be offered by unanimous consent, could it not?

The SPEAKER. It could by unanimous consent, provided the party in charge of the elephant obtained recognition. [Laughter.]

Mr. CRUMPACKER. Mr. Speaker, the purpose of this bill is to authorize the government of the Philippine Islands to create an agricultural bank, a bank that will be permitted to make loans for agricultural purposes only. The bill prescribes the character of loans and limits the amount of loans that are to be made. It is purely for the purpose of promoting agriculture in the Philippine Islands. The bill is somewhat general in its terms, conferring upon the Philippine government power to organize or create a bank with the peculiar features that are outlined in the bill.

There can be no doubt of the necessity of some relief to the small farmers in the Philippine Archipelago. They are, under existing conditions, the prey of the loan sharks, of the usurer; they are not a provident people, and when planting time comes many find themselves without means to procure seeds and the necessary farm implements. They are compelled to borrow and compelled to pay 25, 40, 50, and even as high as 100 per cent for loans they are able to make. And, more than that, the money lender in many instances exacts a contract requiring the borrower to sell his crop to the lender at prices often ruinously low.

Mr. SULZER. Will the gentleman permit a question?

Mr. CRUMPACKER. I prefer to explain the bill, but I will yield to the gentleman for one question.

Mr. SULZER. In paragraph 4 I see it says in the bill that the interest charged for loans shall not exceed 10 per cent. Does not the gentleman think that is too high?

Mr. CRUMPACKER. Oh, no.

Mr. SULZER. No Territorial bank charges such a high rate of interest.

Mr. CRUMPACKER. The question is whether the provisions of the bill are sufficiently liberal to induce men with means to organize a bank under it. A maximum rate of 10 per cent to farmers in the Philippine Islands would be a great relief and do as much as anything I can conceive of in the way of legislation, if it can be accomplished that way, toward promoting the welfare of the farmer and increasing the prosperity of the archipelago generally.

The bill is recommended earnestly and insistently by the Philippine Commission—able, patriotic men, who are on the ground and who are thoroughly familiar with the characteristics of the Philippine people and who are familiar with existing conditions. It is earnestly recommended by the Secretary of War, who is personally acquainted with the situation there. Before this bill was prepared, special representatives of the Philippine government visited Egypt with a view of studying the Egyptian agricultural bank, a bank that was established there for the purpose of making agricultural loans under the recommendations and at the prompting of Lord Cromer, perhaps the most conspicuous and most successful colonial administrator in the world to-day. This bill proposes to create a bank after the fashion of the Egyptian Agricultural Bank. Many of the features of that bank are embodied in the bill, and that bank, after about eight or ten years of operation, has proved an unqualified success. It has greatly promoted the welfare of the Egyptian farmers, has increased the output of farm products, and has multiplied the prosperity of that country.

Mr. ZENOR. Mr. Speaker, will the gentleman yield?

Mr. CRUMPACKER. I yield for a question.

Mr. ZENOR. I want to inquire of the gentleman whether this bill proposes a system of banking as was proposed in Egypt?

Mr. CRUMPACKER. This bill provides for the creation of a bank with branches—branches for the purpose of making loans. If an agricultural loan bank is to accomplish any useful purpose in the Philippine Islands, it must have loan offices in all the various communities, so that it can bring its benefits to the very door of the people it is intended to assist.

Mr. ZENOR. Just one more question.

Mr. CRUMPACKER. I beg the gentleman's pardon, but my time is so short that I can not yield any more. Criticism has been made of the bill, Mr. Speaker, because it guarantees a 4 per cent dividend on the capital that is actually invested. Any money that the Government is required to expend under that dividend guaranty is a lien upon the assets of the bank, and must be paid currently out of its profits, over and above the 4 per cent, which will be applied to the stock, as long as there is any liability to the Government. I want to impress upon the minds of the gentlemen of this House that while this kind of a bank would not be adapted to conditions in this country—and if it were to be proposed for America I would oppose it—yet if we undertake to establish American standards as our criterion to guide us in enacting legislation for the Philippine Islands, I do not hesitate to say now that our administration of that great trust will be a dismal failure. We must in a large measure trust to the judgment and wisdom and the integrity of the men the Administration selects to represent it in the execution of that trust. Members of this House are not prepared to determine whether a bill of this character is adapted to conditions in the Philippine Islands or not. Because it may not be suitable for the purpose of the people here, a highly and intensely civilized country, is no reason why it is not adapted to conditions that exist in the Philippine Archipelago. Mr. Speaker, I reserve the balance of my time.

Mr. RUCKER. Mr. Speaker, I yield three minutes to the gentleman from Massachusetts [Mr. SULLIVAN].

Mr. SULLIVAN. Mr. Speaker, I simply want the time in order to address one or two questions to the gentleman from Indiana, if he will answer them.

Mr. CRUMPACKER. Mr. Speaker, I shall be glad to answer any questions that I can.

Mr. SULLIVAN. As I read this bill, it imposes an obligation which may ultimately fall upon the United States to pay $5,000,000. That is to say, the amount of the contingent liability may not exceed $200,000 in any one year, and the guaranty shall not continue for a longer period than twenty-five years. Now, under this provision the United States Government would have, in the event of the failure of the bank to meet its expenses, to pay the expenses of the bank and then pay in addition a 4 per cent income upon this capital.

Mr. CRUMPACKER. Oh, no; the gentleman misinterprets the bill. In the first place, the Government of the United States assumes no kind of liability. In the next place, the revenues of the Philippine Islands yield over a million and a half of surplus, and the maximum liability is limited to $200,000 a year upon the part of the Philippine government. A few years' experience will demonstrate whether the bank will be a success or not; and the highest amount that the government can pay in any one year is $200,000, and that only in the way of guaranties of dividends. The government does not guarantee the solvency of the borrowers; it does not guarantee the collectibility of the loans; it simply guarantees when there is not profit enough to pay 4 per cent that it will see to it that the dividend of 4 per cent is paid—that is, the Philippine government guarantees that, not the Government of the United States. This Government assumes no kind of responsibility at all.

Mr. SULLIVAN. Well, that sounds to me more like a prediction than a statement of facts. Suppose, for example, the revenues of the islands are insufficient to maintain the guaranty fund, will not the balance have to be made up out of the Treasury of the United States?

Mr. CRUMPACKER. Most certainly not. There is no provision or feature of the bill that contingently or remotely or impliedly creates any liability, legal, moral, or speculative, on the part of the United States Government.

Mr. SULLIVAN. One more question. If this proposition is enacted, does the gentleman anticipate that it will be very long before the farmers in the United States will ask to have agricultural banks established, and that the National Government shall guarantee their income?

Mr. CRUMPACKER. It is possible the farmers——

The SPEAKER. The time of the gentleman has expired.

Mr. RUCKER. Mr. Speaker, I yield one more minute to the gentleman from Massachusetts.

Mr. SULLIVAN. I desire to ask the gentleman if we have not already heard in this country similar demands from the farmers' organizations?

Mr. CRUMPACKER. That may be; but that illustrates the proposition I laid down awhile ago, that if American standards shall be the criterion for legislation in the Philippine Islands, if we can not trust to the judgment and the integrity of our representatives there, our administration will be a sorry and a signal failure. We can not refuse to adopt a policy for those islands under existing conditions because it would not be suitable here. Does the gentleman stand for that general policy of administration and legislation for the archipelago?

Mr. SULLIVAN. No; but I anticipate that representatives of farming districts may cite this law as a precedent in making a demand upon this Congress for similar legislation here. The gentleman states that high rates of interest are charged upon loans now in the Philippine Islands. That seems to indicate that the banking business may be carried on profitably without any guaranty from the Philippine government.

Mr. CRUMPACKER. I did not get the gentleman's statement.

Mr. SULLIVAN. The gentleman's statement that loans are made at high rates of interest, sometimes at a hundred per cent, would seem to indicate that banking business might be carried on profitably in the Philippine Islands without any aid from the Government.

Mr. CRUMPACKER. These loans are small and are made in the interior—five, ten, and twenty-five dollar loans—and the securities are not as stable in the islands as they are here.

The SPEAKER. The time of the gentleman has expired.

Mr. RUCKER. Mr. Speaker, I yield five minutes to my colleague [Mr. ZENOR].

Mr. ZENOR. Mr. Speaker, I agree with much that has been said by my colleague from Indiana [Mr. CRUMPACKER] in regard to the necessity of some system of loaning to the people of the Philippine Islands money to conduct their agricultural operations. This bill, however, seems to me to be objectionable in most of its features. My friend the gentleman from Indiana suggests that it is founded upon the idea of what is known as "the Bank of Egypt," which he has well said has been very successful in its operations. It is true that we had a professor of Cornell University, Mr. Kemmerer, who visited Egypt under the instructions of the Philippine government, to make an examination of a similar system of banking of that country, with a view to establishing an agricultural bank in the Philippine Islands, but this bill possesses but very few, if any, of the vital features recommended by the professor of Cornell University, Mr. Kemmerer, based upon his observations of the working of this Egyptian agricultural bank. The system of banking in Egypt, under the provisions of the government, provides limitations and restrictions of the bank to the extent of fixing the capitalization of the bank, and to limit the interest upon the loans made to the agricultural people and a restriction of loans to those who were engaged exclusively and strictly in agricultural business.

That fixed the rate of interest at 10 per cent upon the loan. That bank fixed the maximum as well as the minimum loans to be made, as well as the maximum rates of interest to be paid and upon a gradual reduction thereof. It provided for a reduction of the interest whenever the profits of the bank exceed a certain per cent of the paid-up capital stock. Then, again, it is provided under certain regulations that the "Bank of Egypt" shall reduce the interest from 10 per cent to 9 and so on automatically down to 6 per cent as the profits of the bank should increase and its surplus accumulated. There is no provision in this bill by which this bank, if successful, shall at any time reduce the rate of interest to the people who borrow this money. It is fixed by the provisions of this bill at 10 per cent, and that is the limit authorized to be fixed by the Philippine Commission. In other words, this act simply authorizes the Philippine government to establish an agricultural bank in the Philippine Islands. It does not pretend to fix the capitalization; it leaves it absolutely in the discretion of the Philippine government. And what is the Philippine government? Of whom is it composed? It is the Philippine Commission, and the Philippine Commission has a majority of American citizens, and they would be legislating for the 8,000,000 people in the Philippine Islands. They absolutely will control the form of this bank. We have a substitute that we desired to offer. It is true that this whole business smacks somewhat of the characteristics of paternalism, but there seems to be a necessity by which the people over there should be furnished some money, that some suitable arrangement should be made by the Philippine government to enable the poorer people of those islands engaged in farming to secure loans at reasonable rates of interest. They pay enormous rates of interest. The usurer is abroad in the land, and, with that insatiable greed that always characterizes that class of men, they extort from the Philippine people, compel them to pay anywhere from 25 to 100 per cent. There are no interest laws in the Philippine Islands, and it is a mere matter of contract. This bill ought to provide for a reduction of the rate of interest in the event that the profits of this bank justify such a reduction. If it is meant to conform this proposed bank to the Egyptian bank—a system of providing loans to the Egyptian peasants—it should be made to include similar provisions to that bank and required to reduce the interest upon its loans as its surplus accumulates.

The Philippine government is not limited in the amount of capital at which this bank is to be established. It proposes to authorize a corporation or a company organized under the laws of the Philippine government without any restrictions upon it in these respects. It guarantees, and that is another offensive feature of this bill—the government of the Philippine Islands guarantees the payment of 4 per cent on the amount of cash paid-up capital. The original bill reported by the Committee on Insular Affairs provided that the guaranty of the government of 4 per cent should only apply to the amount of actual money invested in loans. I think that is a wise provision and ought to be incorporated as an amendment in this bill. Why? Simply because the government of the Philippine Islands guarantees the payment of 4 per cent upon the amount of the capital, and this guaranty as a safeguard to the government should be restricted to the amount of cash capital loaned rather than the amount of cash capital paid up. They might have a large amount of capital that is not loaned to the Philippine people. They might organize a company there and they, being secured in a 4 per cent dividend on the amount, might have a paid-up capital far in excess of the demands of borrowers and not loan it out to the people, and yet the government is compelled to pay 4 per cent as a guaranty to the stockholders. It is true

that this restricts the liability of the Philippine government to $200,000 annually. This may operate to limit the liability of the Philippine government in the amount of money upon which it shall pay this 4 per cent guaranty, but yet this limit may be far beyond the demands for loans and compel the government to pay interest upon a surplus idle capital.

The SPEAKER. The time of the gentleman has expired.

Mr. RUCKER. Mr. Speaker, how much time has the gentleman from Indiana remaining?

The SPEAKER. The gentleman from Indiana [Mr. CRUMPACKER] has twelve minutes, and the gentleman from Missouri has eleven minutes.

Mr. RUCKER. I yield three minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, the principal argument that has been made in favor of this bill is that an agricultural bank established by the Government of Great Britain has been successful in Egypt. If we shall, as a precedent, establish a bank in the Philippine Islands upon the wrong principle, because a like bank has been successful in Egypt, how long will it be before we are asked to establish the same character of banks in this country and the precedent in the Philippine Islands pointed out to us?

The gentleman from Indiana [Mr. CRUMPACKER] in his report says that the plan is somewhat speculative. Why should we enter upon speculative plans like this with the certainty that we are creating a precedent which will come back to us? The gentleman further says that they charge a high rate of interest in the Philippine Islands. Well, they charge 3 per cent a month in this town. They charge 3 per cent a month in New York and in Chicago. And they charge 3 per cent a month in every Southern State and in every State in the Union when they loan small sums of money upon poor security. And if we would establish a bank in the Philippine Islands and guarantee the income because they charge a high rate of interest there, how can we say that we will not do the same thing for our own people here? I warn this side of the House that if this proposition be enacted into law, the first time hard times overtake the country we will be overwhelmed by the demands of the people here that they should be treated as well by the Government as the Filipinos are.

Mr. PARSONS. Will the gentleman yield for a question?

Mr. MANN. I will be very glad to.

Mr. PARSONS. Would the gentleman prefer the plan of the minority bill, which provides that the money shall be loaned by the Government direct?

Mr. MANN. Well, Mr. Speaker, I am not called to vote on the minority bill. But I am not sure that I would prefer to guarantee the interest on the money instead of loaning it direct. If the Government is to stand the loss, in case there be loss, why should they require the Filipinos to pay 10 per cent instead of 4? But as for me, I am in favor of neither project. The gentleman may be in favor of either, but I am unwilling to have the Government committed to such rash methods of financing.

Mr. PARSONS. Will the gentleman yield for another question?

Mr. MANN. I always yield to the gentleman.

Mr. PARSONS. Have we not a precedent for this guaranty in the guaranty that we allow on the railroads in the Philippine Islands?

Mr. MANN. Well, Mr. Speaker, there is a very instance. Because we guarantee on the railroads—a doubtful thing to begin with—therefore the gentleman wants to go another step, and when we go that other step the gentleman will want to take another long stride toward paternalism. It is time to stop when the project comes up.

The SPEAKER. The time of the gentleman has expired.

Mr. RUCKER. Will the gentleman from Indiana yield some of his time?

Mr. CRUMPACKER. Mr. Speaker, I yield to the gentleman from Kentucky [Mr. SHERLEY] three minutes.

Mr. SHERLEY. Mr. Speaker, one proposition is apparent to every man's mind, and that is that what would be absolutely unjustifiable legislation for the United States may be proper legislation for the Philippine Islands. The conditions are in no sense analogous. What would be rank paternalism without justification here may be proper legislation there.

Now, as showing the sentiment of the committee having in charge this matter, I call the attention of the House, and particularly the gentlemen on my side, to the fact that the minority report is not a report against the paternalism involved in this scheme, but it is a report carrying that paternalism to a further extent than is proposed in the bill of the majority.

The proposition of the minority of the committee is that the Government shall establish and own the bank. I say there is less danger of paternalism, less danger of building up a political machine of the wrong sort, by fixing the extent that the Government shall interfere, as this bill does, than by creating a bank that from its inception would be likely to be political. The effect of this bill is simply to guarantee 4 per cent interest, and it requires, after 4 per cent of profits shall have been made by the bank, that whenever any more is earned it must be used in paying off the indebtedness to the Philippine government, if any exists, before any extra dividend is paid. Now, that is paternalistic, unquestionably; but the situation in the islands, known to men who have been there and those who heard the testimony before the committee, warrants us in taking this step. The minority in this matter have offered a proposition that does not strike at the principle involved, but simply carries that principle to a further extent, and, in my judgment, to a worse extent. We have signally neglected our duty to the Philippine Islands. The Filipinos are going to judge us not by words, but by deeds, and this Congress owes it to them to enact remedial legislation. This is the first opportunity we have had of passing a bill that would be of benefit to them that we know will become law. While I do not like everything in it, I believe in its main features and shall vote for the bill. And again, gentlemen on my side, if they vote against the bill, must vote against the principle rather than for anything that is said by the minority of the committee, because the minority of the committee in their report favor a more paternalistic plan. [Applause.]

Mr. CRUMPACKER. I yield one minute to the gentleman from Ohio [Mr. LONGWORTH].

Mr. LONGWORTH. Mr. Speaker, I simply desire to put myself on record in favor of the passage of this bill. As the gentleman from Kentucky [Mr. SHERLEY] has said, this Congress has signally failed to do its plain duty to the Philippine people. We have adopted a policy treating them in many respects as American citizens, and in other respects denying them the privilege of American citizens. The Philippine tariff bill should be law to-day. As it is not law, let us give them one crumb of comfort. Let us pass this bill. [Applause.]

Mr. CRUMPACKER. I yield one minute to the gentleman from Connecticut [Mr. HILL].

Mr. HILL of Connecticut. Mr. Speaker, there is not a cent of liability assumed by the United States under the provisions of this bill. I can not in a minute give you my views on the subject. During the past week I spent an entire evening studying this bill and reading the testimony before the committee, and can confidently state that it only gives to the Philippine people, in effect, the same privileges which the State of Connecticut gives its people to organize mutual savings banks, except so far as the guarantee is concerned. But not one penny of liability will necessarily be placed on the Philippine government because of that guaranty. Their people will have an opportunity to put their savings into the capital of this bank, and, starting as it will on a small scale, the hope is that it will grow as like institutions have elsewhere, so that great benefit will come to the small farmers and relieve them from the exactions of the usurer and foreign traders who now control their crops. Why should we not allow them to help themselves in this way? There is no commercial feature in this bank. It is simply a farmer's proposition; nothing more nor less.

Mr. CRUMPACKER. I yield one minute to the gentleman from Ohio [Mr. GROSVENOR].

Mr. GROSVENOR. Mr. Speaker, I of course in a minute of time will not undertake to discuss the merits or demerits of the bill. My position is taken in this way: We have treated the Filipinos with more reprehensible wrongdoing than did the Spanish Government before us. That was a nation raised and bred in the belief of the Divine right of kings to oppress. We profess to be a Christian people, in favor of liberty. Men who understand this situation absolutely, and have been in touch with the whole Philippine question from the beginning, indorse this measure. If we pass this measure they will be held responsible for its operation; if we refuse to pass the measure we shall put ourselves in the attitude of being unwilling to do anything for the relief of the suffering people in the Philippine Islands. This is the first opportunity we have had, and I beg the House to stand by the proposition.

Mr. CRUMPACKER. I yield one minute to the gentleman from Iowa [Mr. HEPBURN].

Mr. HEPBURN. Mr. Speaker, I can only say in that one minute I am heartily in favor of this bill. I believe that all the people who are interested want the bill, that it is necessary to meet their condition, and therefore I hope the bill will pass.

Mr. CRUMPACKER. I yield one minute to the gentleman from Missouri [Mr. DE ARMOND].

Mr. DE ARMOND. Mr. Speaker, I should like it very much if it were possible to vote for the bill recommended by the

minority of this committee. I should like it very much if there were greater opportunity for consideration of the general subject. I am satisfied, however, that for the Filipino people some remedial legislation is practically a matter of life and death. There are a good many things about this bill which I do not like, but between this bill and nothing, viewing it, as I am trying to do, from the standpoint of the interest of the people of the Philippine Islands, I intend to vote for the bill. Those people are absolutely subject to our control, as things are. I wish they were not. I would gladly give them control of their own affairs, and entirely cut loose, but while we do assume and exercise control over them, certainly, in humanity, they are entitled to a chance to make a living, and a chance to get the means with which to make that living. I do not think there is any difference of opinion in the Philippine Islands—however much they divide up into classes and sects and sections with reference to other matters, and however widely apart they are upon some other questions, I do not believe there is a difference of opinion among the Filipinos as to the necessity of some legislation providing for an agricultural bank. [Applause.]

[Here the hammer fell.]

Mr. CRUMPACKER. I ask that the gentleman from Missouri [Mr. RUCKER] exhaust his time. I think there are four minutes left to this side.

Mr. RUCKER. Mr. Speaker, the only pretense of excuse for this un-Democratic, un-Republican, un-American legislation is the deplorable condition, gentlemen say, into which we have plunged the people of the Philippine Islands through our administration. If the testimony before the people may be relied upon, after nearly ten years of American administration there, the condition of the people has grown rapidly worse and worse, until to-day the representatives of the American people are asked to do that which, in my judgment, is a shock to the intelligence and patriotism of every Member of this House.

Mr. Speaker, I want to say that the minority of the Committee on Insular Affairs did not expect sympathy from all gentlemen on this side of the Chamber. We are conscious of the fact that one of the most powerful and influential individuals in the United States, a man of great persuasive powers, the Secretary of War, is behind this bill, and we anticipated that gentlemen who have heretofore accepted the hospitalities and courtesies of the Secretary of War would possibly be in sympathy with his wishes in this matter. [Applause on the Democratic side.]

Mr. PARSONS. Will the gentleman yield for a question?

Mr. RUCKER. I will yield for one short question, although I have no time.

Mr. PARSONS. I think the gentleman should explain to the House what he means by the hospitalities of the Secretary of War.

Mr. RUCKER. Oh, the gentleman accepted them and knows what I mean. He is too intelligent to have any doubt about it.

Mr. PARSONS. Will the gentleman yield for another question?

Mr. RUCKER. Well, now, I can not take up all my time—but once more.

Mr. PARSONS. Did not the Secretary of War urge Members of this House and of the Senate to go to the Philippine Islands, just so that they could intelligently legislate on these matters?

Mr. RUCKER. I want to say that, so far as I know, few knew anything about the trip. I am not going to talk about that. I want to say that while no Democrat advocated, as an original proposition, the minority views as expressed here, we do think they are decidedly better than the bill reported by the majority. We believe that if these people must be exploited it is better that it be done by their own people than by Americans clothed with authority by the United States Government. Not only that. In the views of the minority is expressed the hope of ultimate deliverance from that great incubus which to-day is bearing down the public of the United States. From year to year this legislation will haunt us and grow more odious in the estimation of all liberty-loving people.

Mr. Speaker, I shall, perhaps, extend my remarks in the RECORD, but will not consume more time, as I desire to yield now to the gentleman from Mississippi [Mr. WILLIAMS] the remainder of my time.

Mr. WILLIAMS. Mr. Speaker, the gentleman from Missouri [Mr. RUCKER] was exactly right when he said that this legislation is un-Democratic, un-Republican, and un-American. Mr. Speaker, it is but another illustration of the fact that it is impossible to bring into harmony the spirit of Americanism, which is republicanism, and a crown colonialistic system. Go on with this mad experiment in crown colonialism, denying and defying the very birth principle as well as the life principle of the Republic, and every now and then you will find yourselves seemingly forced to resort to schemes like this. The old Populist scheme of a subtreasury was an angel in white in comparison with this scheme. [Applause on the Democratic side.]

Here you are, going out to the Philippine Islands and guaranteeing a profit of 4 per cent to financiers who desire to engage in the banking business. These subtreasuryites never asked that; they merely asked that they be loaned the money at 2 per cent on the deposit of excellent security. You are proposing to pay bankers 4 per cent to guarantee them against loss in a business of their choice, to guarantee that they shall earn 4 per cent as an inducement for engaging in a private business that they can keep out of if they want to. One of two things is true—either this banking scheme is a profitable scheme, or it will be a losing one. If it is a profitable scheme, then the Filipino government ought to have nothing to do with it; its interference is unnecessary. These people can carry it on by themselves. If it be a losing scheme, there is no reason why the poor, destitute Filipino people, plowing with forked sticks, should be taxed in order to pay 4 per cent dividends to a lot of American capitalists who wish to financially assimilate them. [Applause.]

Why, Mr. Speaker, I do not know what the word "democracy" means if this is democracy. The gentleman from Kentucky says that this bill is better than the minority bill which was offered as a substitute. There never was any excuse for the minority bill except that it *was a* substitute. It was a choice between two evils, but, thank God, in the present parliamentary situation we are not reduced to the choice. We are placed where we can beat both evils, and beat both because they are poth paternalistic, highly crown colonialistic, highly un-American, and highly undemocratic. [Applause.]

The birth principle of Americanism was a protest against crown colonialism. But you say that you have got yourselves into a fix. You have fallen into crown colonialism and therefore you are bound to govern according to crown-colonialistic principles. In trying to get out of it you fall deeper into the mire. If you really want to get out of it, get out, and if you are going to stay there, for God's sake make the experiment of Americanism in the Orient and see how far it will go before you claim that it would end in failure.

Mr. Speaker, I will never vote at any time that any government for which I legislate, the American Government or the Filipino government, shall guarantee to self-seeking, profit-hunting capitalists 4 per cent upon their capital, provided they carry on a banking business which will bring perhaps incidental benefits to somebody, but certainly direct benefits and sought-for benefits to themselves. [Applause.]

Mr. SLAYDEN. Mr. Speaker, I would like to submit a request to the gentleman from Indiana [Mr. CRUMPACKER] who has charge of the bill, and through him to the House, that the debate on this matter be extended, by unanimous consent, for five minutes on a side.

Mr. MANN. Would the gentleman be willing to make it so as to give all of the Taft party a chance to speak? [Laughter.]

Mr. CRUMPACKER. Mr. Speaker, I now yield two minutes to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, I wish every Member of the House had been in the Philippine Islands and seen the actual conditions there. If they had, there would be very few votes against this bill. [Applause.] I met a banker at Zamboanga who has a capital of $25,000, and he told me that he loaned his entire capital the year round at 3 per cent a month, and had the best of security, because he owned their crops and never lost a dollar. Now, how can you carry on farming at such a rate of interest?

The gentlemen talk about their establishing their own banks. Why, they have lived there for four hundred years and they have never put a dollar in the bank, and you could not get American capital to go in unless you guaranteed something to pay them for the investment. It is so in building railroads, and the Philippine government is to guarantee them 4 per cent on the capital stock put into these banks that we may reduce the rate of interest paid by these farmers to 10 per cent. If gentlemen could only see things as they are there, if they could hear the intelligent Filipino people, who to a man are in favor of this banking system and who believe it is the only hope for the farmer, they would not hesitate to vote for this bill. Two things these people have wanted. One was the tariff bill and the other was the banking bill; but they said, "For God's sake give us the banking bill anyway." That is the reason I am for it. I believe it will help those people. I believe it will help them to build up agriculture, and I believe it will aid in making them prosperous. I believe it will make our rule there a blessing to these people instead of a burden. [Applause.]

Mr. CRUMPACKER. Mr. Speaker, I yield the balance of my time to the gentleman from Pennsylvania [Mr. OLMSTED].

Mr. OLMSTED. Mr. Speaker, the Philippine government desires to incorporate an agricultural bank—a private bank—in the Philippines, restricting the rate of interest charged to 10 per cent and the loans to $5,000 as a maximum, and permitting them to be made only to people engaged in agriculture and for the purpose of encouraging agriculture. In consideration of these restrictions, and to encourage private capital to engage in the enterprise under these limitations, that government proposes to give its own guaranty to the amount of 4 per cent of the amount invested for twenty-five years. If the Philippine government stood by itself it would do this thing without asking our permission, but owing to the relation between that government and ours it can not act without the consent of Congress. So far as we are concerned, this bill, as wittily described by a writer in the New York Sun, amounts to nothing more than dropping a button into the contribution box. It costs us nothing. If we may judge from the experience of the Egyptian agricultural bank, it will cost the Philippine government nothing. But so far as the Filipinos are concerned, their government is asking us to push the necessary button to enable them to do the rest. The prosperity of the Philippines depends almost entirely upon the success of agriculture. Those people, in restocking their little farms with cattle, procuring the necessary implements, and buying seed, are in the clutches of the money sharks, who charge them anywhere from 25 to 100 per cent interest. I hope there is common sense enough and patriotism enough in this body to pass this bill. Give them the opportunity they desire to reduce the interest of the usurer and increase the interest of agriculture in the Philippines. [Applause.]

The SPEAKER. The question is on suspending the rules, agreeing to the amendment, and passing the bill.

Mr. RUCKER. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 188, nays 69, answered "present" 5, not voting 115, as follows:

YEAS—188.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The Clerk announced the following additional pairs:

For the vote:

Mr. HAMILTON with Mr. GOULDEN.

Mr. GRAHAM with Mr. SPARKMAN.

Mr. BEDE with Mr. LAMAR.

Until further notice:

Mr. PRINCE with Mr. SPIGHT.

Mr. BABCOCK with Mr. JONES of Virginia.

Mr. POWERS with Mr. GAINES of Tennessee.

Mr. ACHESON with Mr. BURGESS.

The result of the vote was announced as above recorded. [Applause.]

SUNDRY CIVIL APPROPRIATION BILL.

Mr. TAWNEY. Mr. Speaker, I desire to present a conference report on the sundry civil appropriation bill. I also submit a statement, and I ask unanimous consent that it be read in lieu of the report.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none, and the Clerk will read the statement.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

The message also announced that the Senate had passed with amendment bill of the following title; in which the concurrence of the House of Representatives was requested:

An act (H. R. 25672) to amend an act entitled "An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River."

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 23650) to quiet title to lands on Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made and to dispose of the merchantable timber, and for other purposes.

The message also announced that the Senate had passed without amendment bills of the following titles:

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 20490. An act for the relief of Frank J. Ladner;

H. R. 12623. An act granting a pension to Minnie C. O'Connor;

H. R. 3208. An act granting a pension to Isabel T. Borthwick;

H. R. 24655. An act to authorize the legislature of Oklahoma to dispose of a certain section of school land; and

H. R. 25889. An act to provide for sittings of the United States

circuit and district courts of the southern district of Ohio at the city of Dayton, in said district.

COAL LANDS IN ALASKA.

Mr. LACEY. Mr. Speaker, I ask the gentleman to yield to me long enough to put a bill in conference—the Alaska coal-land bill—if that can be done by unanimous consent. Otherwise I will not press it.

The SPEAKER. If there be no objection, the Chair lays before the House the following House bill with Senate amendment.

The Clerk read as follows:

A bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska.

The Senate amendments were read.

Mr. MANN. I ask to have the substitute read.

The Clerk began the reading of the substitute.

Mr. MANN. I withdraw my request.

The SPEAKER. The Chair hears no objection. The Chair announces the following conferees.

The Clerk read as follows:

Mr. LACEY, Mr. MONDELL, and Mr. BURNETT.

SUNDRY CIVIL APPROPRIATION BILL.

The SPEAKER. The Clerk will read the statement in regard to the sundry civil appropriation bill in lieu of the report.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 80, 82, 96, 97, and 98.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: "*Provided*, That the Secretary of the Treasury is hereby authorized, in his discretion, to expend not to exceed one hundred and twenty-eight thousand dollars, instead of seventy-five thousand dollars, authorized by act of June 30, 1906, for the purchase of additional land for a site for said United States subtreasury;" and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the matter stricken out by said amendment insert the following: "To enable the Secretary of the Treasury to have prepared plans, specifications, and estimate of cost for construction of a new building for the Bureau of Engraving and Printing, together with an estimate of the cost of a suitable site for said new building; and also plans, specifications, and estimate of cost of remodeling present buildings and construction of additional necessary building or buildings of land adjoining the present site of said Bureau, and an estimate of cost of acquiring necessary adjoining land for such additional building or buildings, five thousand dollars, or so much thereof as may be necessary;" and the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "one million four hundred and forty-five thousand and twenty dollars;" and the Senate agree to the same.

Amendment numbered 99: That the House recede from its disagreement to the amendment of the Senate numbered 99, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "eight hundred and forty-one thousand eight hundred and seventy-five dollars;" and the Senate agree to the same.

On amendments numbered 4, 12, 22, 68, 69, 87, 117, and 126 the committee of conference have been unable to agree.

J. A. TAWNEY,
WALTER I. SMITH,
GEORGE W. TAYLOR,
*Managers on the part of the House.*

W. B. ALLISON,
EUGENE HALE,
JAMES H. BERRY,
*Mangers on the part of the Senate.*

The statement was read, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 25745) making appropriations for the sundry civil expenses of the Government for the fiscal year 1908, submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying report, namely:

On amendment numbered 10: Increases the amount that may be expended for additional land for site for a subtreasury at San Francisco from $75,000 to $128,000.

On amendment numbered 11: Appropriates $5,000 to enable the Secretary of the Treasury to prepare plans and specifications and estimates of cost for a new building and site for the Bureau of Engraving and Printing, and also plans and specifications and estimates of cost for remodeling present building and for additional building or buildings for said Bureau, and estimate of cost of additional land for the same.

On amendments numbered 80, 82, and 83, relating to the Geological Survey: Strikes out the appropriation proposed by the Senate of $25,000 for investigation of the black sands and appropriates $300,000, as proposed by the House, instead of $350,000, as proposed by the Senate, for topographical surveys.

On amendments numbered 96, 97, 98, and 99: Appropriates $841,875, instead of $541,875, as proposed by the House, and $1,000,000, as proposed by the Senate, for buildings at military posts.

The committee on conference have been unable to agree upon the following amendments of the Senate, namely:

On amendment numbered 4, concerning public building at Denver, Colo.;

On amendment numbered 12, appropriating $3,000,000 for buildings for Departments of State, Justice, and Commerce and Labor;

On amendment numbered 22, appropriating $125,000 for transportation of silver coin;

On amendments numbered 68 and 69, striking out the provision of the House requiring the statistics as to women and child labor to be taken by the Census Office;

On amendment numbered 87, to establish a national park in Idaho;

On amendment numbered 117, relating to the Spanish Treaty Claims Commission; and

On amendment numbered 126, striking out the provision proposed by the House relating to the purchase of supplies for Executive Departments and inserting, by the Senate, appropriations for purchase of certain parks in the District of Columbia.

J. A. TAWNEY,
WALTER I. SMITH,
GEO. W. TAYLOR,
*Managers on the part of the House.*

Mr. TAWNEY. Mr. Speaker, I move the adoption of the report.

The SPEAKER. The gentleman from Minnesota moves the House agree to the conference report.

The question was taken; and the report was agreed to.

Mr. TAWNEY. Now, Mr. Speaker, I will call attention briefly to the few amendments that still remain in disagreement between the two Houses. The first is the one authorizing the construction of a public building in the city of Denver. Another is the amendment numbered 12, appropriating $3,000,000 for the purchase of three squares south of Pennsylvania avenue, upon which is to be constructed a great departmental building for the Departments of State, Commerce and Labor, and the Judiciary, and on that amendment the conferees on the part of the House thought they were justified, in view of the action taken upon this proposition in this Congress, to further resist its adoption. The next amendment in disagreement is amendment numbered 22, transportation of silver coin, and the amendment striking out the provision adopted by the House for the standardizing of miscellaneous supplies, giving a legislative definition to miscellaneous supplies, and providing for a uniform method of furnishing such supplies, and inserting, as the Senate did, a provision for the purchase of four tracts of land in the District of Columbia for park purposes, and appropriating $1,140,000. Those are the only amendments in disagreement, except the one in respect to the investigation of woman and child labor. That amendment is still in disagreement, and the Senate amendment in regard to a park in Idaho. The amendments that are agreed on are indicated in the statement which has been read to the House. All other amendments that were in disagreement, some ten or twelve, when the House agreed to the conference asked for by the Senate had been agreed to. The one in regard to the appropriation of money for barracks and quarters is agreed

to by increasing the amount appropriated for under the House provision about $200,000 and reducing the amount proposed on the part of the Senate about $150,000. The Senate amendment in regard to the San Francisco building is agreed to with an amendment fixing the limit of cost upon the site for the subtreasury at $128,000. The Senate recedes from its amendment numbered 80, authorizing a scientific investigation into the matter of black sand and an investigation of the processes for the electric smelting of iron ore.

Those are the principal amendments that have been agreed to. The ones I have mentioned are those still in disagreement. Now, Mr. Speaker, I move that the House further insist upon its disagreement to all of these amendments unless there is a demand for a separate vote.

The SPEAKER. The gentleman from Minnesota [Mr. TAWNEY] moves that the House do further insist upon its disagreement to the Senate amendments indicated and ask for a conference.

Mr. MANN. Mr. Speaker, I wish to have a separate vote on a certain proposition. I would like to have a separate vote on the amendment providing for the new Department building and for the last amendment.

The SPEAKER. Upon No. 12 and upon what other amendment?

Mr. MANN. The last amendment.

The SPEAKER. Is there any other amendment?

Mr. MANN. The last amendment is the park amendment.

Mr. WANGER. Mr. Speaker, I desire to have a separate vote upon amendment No. 87.

The SPEAKER. Is there any other?

Mr. BARTHOLDT. I would like an expression on the park proposition.

Mr. TAWNEY. That is already asked for.

Mr. WANGER. I ask that there may be a separate vote on amendment No. 22.

Mr. MANN. On the last amendment—the park amendment.

Mr. CLARK of Missouri. Mr. Speaker, I demand a separate vote on that child-labor business, whatever it is, on the question as to who shall make that investigation. They are amendments Nos. 68 and 69.

Mr. WANGER. Mr. Speaker, I ask for a separate vote on No. 22.

Mr. TAWNEY. No. 68 strikes out "Census Office" and No. 69 "under the Census Office."

The SPEAKER. The amendments on which a separate vote is demanded are Nos. 12, 22, 69, 87, and 126.

Mr. KEIFER. Mr. Speaker, I was not in at the moment this matter was taken up. I understand there was a disagreement on No. 22 as to the transportation of fractional silver coin.

The SPEAKER. A separate vote is asked on No. 22. There are only three amendments left. Without objection the House will insist upon its disagreement to the three remaining amendments, not specified. [After a pause.] The Chair hears no objection. The Clerk will report amendment No. 12.

The Clerk read as follows:

Buildings for the Departments of State, Justice, and Commerce and Labor: To enable the Secretary of the Treasury, in his discretion, to acquire, by purchase, condemnation, or otherwise, the whole of squares Nos. 226, 227, 228, 229, and 230, in the city of Washington, and toward the erection of one or two buildings thereon, $3,000,000. That part of C street, Ohio avenue, D street, and E street lying between the squares named herein is hereby made a part of the site authorized by this act. That should the Secretary of the Treasury decide to institute condemnation proceedings in order to secure any or all of the land herein authorized to be acquired, such proceedings shall be in accordance with the provisions of the act of Congress approved August 30, 1890, providing a site for the enlargement of the Government Printing Office (26 Stat. L., 837). That a commission, to be composed of the Secretary of State, the Secretary of the Treasury, the Attorney-General, the Secretary of Commerce and Labor, and the Superintendent of the Capitol Building and Grounds, which is hereby created, shall report to Congress preliminary plans and an estimate of cost for one or two buildings to be erected on said site, for the use of the Departments of State, Justice, and Commerce and Labor, and for other governmental purposes, said preliminary plans and estimate of cost to be paid for out of the appropriation herein made.

Mr. TAWNEY. Mr. Speaker, I move that the House further insist upon its disagreeing vote to the amendment just read.

Mr. MANN. Mr. Speaker, I ask for a separate vote on this, and I now ask the gentleman that if anybody in the House desires to favor the proposition that he yield time to him.

Mr. TAWNEY. Mr. Speaker, I do not care to discuss it. It has already been discussed at great length, but if there is any gentleman here who wishes to favor the proposition, I will yield him time for that purpose. If not, I will call for a vote. [Cries of "Vote!"]

The SPEAKER pro tempore (Mr. SHERMAN in the chair). The gentleman from Illinois [Mr. MANN] demands what?

Mr. MANN. I asked for a separate vote on this proposition.

The SPEAKER pro tempore. That is what is being taken. The question is on the motion of the gentleman from Minnesota [Mr. TAWNEY] in reference to amendment No. 12, to further insist upon the disagreement.

The question was taken; and the Chair announced that the ayes seemed to have it.

Mr. MANN. I ask for a division, Mr. Speaker.

The House divided; and there were—ayes 111, noes 4.

So the motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment, No. 22.

The Clerk read as follows:

On page 49 strike out:

"Transportation of fractional silver coin: For transportation of fractional silver coin, by registered mail or otherwise, $50,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, fractional silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation."

And insert in lieu thereof the following:

"Transportation of silver coin: For transportation of silver coin, including fractional silver coin by registered mail or otherwise, $125,000; and in expending this sum the Secretary of the Treasury is authorized and directed to transport from the Treasury or subtreasuries, free of charge, silver coin when requested to do so: *Provided*, That an equal amount in coin or currency shall have been deposited in the Treasury or such subtreasuries by the applicant or applicants. And the Secretary of the Treasury shall report to Congress the cost arising under this appropriation."

Mr. TAWNEY. Mr. Speaker, this matter was fully debated on yesterday, and the House by a very large majority voted in favor of adhering to our disagreement.

Mr. BURLESON. I will state to the gentleman from Minnesota [Mr. TAWNEY] that since then I have heard many gentlemen state that they voted under a misapprehension. I believe that if this were again submitted to the House and all understood exactly what was involved, they would vote for the amendment as originally proposed.

Mr. TAWNEY. If there is any Member who voted under misapprehension on yesterday, after all the debate we had on this subject, I do not believe that any further debate would remove that misapprehension.

Mr. BURLESON. The trouble was that a number of the gentlemen were in the cloakroom at the time the debate was going on, and they came out, and, without knowing all that had occurred, of course, voted to sustain the committee.

Mr. TAWNEY. I yield two minutes to the gentleman from Pennsylvania.

Mr. KEIFER. I desire to make a motion.

Mr. WANGER. Mr. Speaker, I have no desire to discuss this proposition. I want to move that the House recede from its disagreement to the Senate amendment with further amendments, to wit: In line 15 strike out the words "and twenty-five;" so that it will read "$100,000" instead of "$125,000;" and in line 17 strike out the words "and directed;" so that that will read "the Secretary of the Treasury is authorized to transport from the Treasury," etc.

The SPEAKER pro tempore. The Clerk will report the amendment of the gentleman from Pennsylvania.

The Clerk read as follows:

Amend the amendment, in the second line, by striking out the words "and twenty-five;" and in line 5 of the amendment strike out the words "and directed."

The SPEAKER pro tempore. The motion of the gentleman from Pennsylvania is to recede and concur with an amendment.

Mr. BURLESON. What would be the effect of leaving the words "and directed" out?

Mr. WANGER. Leaving it in the discretion of the Secretary of the Treasury to determine whether or not the requests are bona fide or whether they are part of a scheme to ship a lot of coin backward and forward.

Mr. BURLESON. In the interest of the express companies?

Mr. WANGER. Well, in the interest of anybody; I do not care who.

Mr. BURLESON. You do not mean in the interest of the people?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TAWNEY. I yield one minute to the gentleman from Ohio.

Mr. KEIFER. Mr. Speaker, I only wish to state, so that there may be no doubt about the present attitude of the matter, that I am in favor of the motion of the gentleman from Pennsylvania. It reduces the amount specified in the amendment from $125,000 to $100,000; the Secretary of the Treasury estimated it would require $125,000. And this strikes out the words "and directed." I am not sure that it makes any sub-

stantial change, but if it does, and the Secretary of the Treasury feels that it is necessary to discriminate, I see no objection to that. I hope the motion of the gentleman from Pennsylvania will prevail.

Mr. TAWNEY. Mr. Speaker, just one word. If we are to continue this service, $100,000 will be $20,000 less than the service will cost. We have been appropriating for this service for several years $100,000 a year, and this would simply result in creating a deficit in this appropriation. Now, the purpose of reducing it to $100,000 is to make it a little more popular than it was on yesterdey. I want the House to understand that if they vote in favor of the $100,000 proposition, that that amount will have to be supplemented at the next session of Congress with a deficiency appropriation of from twenty to thirty thousand dollars.

Mr. BURLESON. Now, right on that point. Would that be true? Would there be any necessity for that deficiency if the discretion was vested in the Secretary of the Treasury, and he should ascertain that some of these requests had been instigated by express companies, and turn them down?

Mr. TAWNEY. I do not think that the striking out of the words "and directed" will restrict the discretion that the Secretary of the Treasury now has or that it will result in the saving to the Government of a red cent in the transportation of silver dollars. I want the Members of the House to understand one thing, and that is that the House proposition provides amply for the transportation of fractional silver coin and other minor coin. This proposition is to continue paying $2.15 a thousand dollars for the transportation of silver dollars for the benefit of bankers, department stores, and express companies.

Mr. POWERS, Mr. CLARK of Missouri, and Mr. BURLESON rose.

Mr. TAWNEY. It has been suggested by my colleague on the conference committee, what are the House conferees to do if on one day the House supports their position in opposition to Senate amendments and then upon the following day recedes? What confidence can the conferees have in the House?

Mr. POWERS. I want to ask the gentleman a question and nothing more.

The SPEAKER pro tempore. To whom does the gentleman yield?

Mr. TAWNEY. I yield to the gentleman from Maine.

Mr. POWERS. I want to know if I am correct. Was there not one year ago a deficiency arising from the fact of this appropriation being exhausted, and this House refused to appropriate in the deficiency bill for that deficiency?

Mr. TAWNEY. It did; and subsequently the House appropriated for that deficiency.

Mr. POWERS. Not for that deficiency.

Mr. TAWNEY. For that deficiency, when the general deficiency appropriation bill passed at the end of the session. The next session of Congress continued the service, and after we continued the service it was necessary to make an appropriation, and it went in the general deficiency appropriation bill; we put into it the $10,000 which was omitted in the urgent deficiency bill at the beginning of the session.

Mr. POWERS. Now, one more question. Why should they continue to send it after the appropriation had been exhausted without any direction and when there was no law for it?

Mr. TAWNEY. Well, Mr. Speaker, they did continue to send it, and they were afterwards reimbursed, or the Treasury was reimbursed for the amount by the deficiency appropriation.

Mr. WANGER. And at that time the law required the Secretary of the Treasury to ship the coin.

Mr. CLARK of Missouri. I want to ask the chairman of the Appropriations Committee what has gone with that celebrated statute that you passed here a year or two ago making it a criminal offense for the Departments to create a deficiency?

Mr. TAWNEY. In respect to this deficiency, the antideficiency law which the gentleman refers to was not then upon the statute books.

Mr. CLARK of Missouri. I am not talking about what has happened. I am talking about what you say is going to happen.

Mr. TAWNEY. If the Secretary of the Treasury is authorized to make this expenditure, it is not one of the matters covered by the antideficiency law.

Mr. CLARK of Missouri. Why didn't you make that statute cover all of them?

Mr. TAWNEY. There are some that can not be covered. Where the law creates an obligation that must be met, and the amount appropriated is not sufficient to meet the obligation, that is a deficiency arising not because of any profligate expenditure of the public money, but because Congress failed to appropriate an amount equal to meet the obligation required by law.

Mr. CLARK of Missouri. The Secretary of the Treasury ought to have sense enough to quit when the $100,000 runs out.

Mr. TAWNEY. Mr. Speaker, I ask for a vote.

The SPEAKER pro tempore. The question is on agreeing to the motion of the gentleman from Pennsylvania.

The question being taken, on a division (demanded by Mr. KEIFER) there were—ayes 25, noes 81.

Accordingly the motion was rejected.

The SPEAKER pro tempore. The question now recurs on the motion of the gentleman from Minnesota [Mr. TAWNEY].

The motion was agreed to.

The SPEAKER pro tempore. If there be no objection, amendments 68 and 69 will be considered as one. Is there objection?

There was no objection.

Mr. GROSVENOR. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GROSVENOR. I should like to know how long it will be before Congress will be again compelled to vote on the question of transporting silver coin?

The SPEAKER pro tempore. The Chair is afraid it will be after the gentleman from Ohio has an opportunity to vote upon it. [Laughter.]

The Clerk read as follows:

Amendment No. 68: Page 92, line 5, strike out "Census Office."

Amendment No. 69: Page 92, lines 5 and 6, strike out "under the Census Office."

Mr. TAWNEY. Mr. Speaker, I yield to the gentleman from Missouri [Mr. CLARK] five minutes.

Mr. CLARK of Missouri. I want to make a motion to recede and concur.

The SPEAKER pro tempore. The gentleman has a right to make that motion.

Mr. CLARK of Missouri. I do not want to make any remarks about it.

Mr. TAWNEY. That was also voted on yesterday, and I hope the motion will be voted down.

The question being taken, on a division (demanded by Mr. CLARK of Missouri) there were—ayes 25, noes 86.

Accordingly the motion was rejected.

Mr. TAWNEY. I now move to further insist on the disagreement.

The SPEAKER pro tempore. The Clerk will report the next amendment.

The Clerk read as follows:

Amendment No. 87:

"That the following subdivisions now embraced in the Coeur d'Alene Indian Reservation, in Idaho, to wit: Sections 1, 2, and 12, township 46 north, range 4 west, Boise meridian; sections 35 and 36, township 47 north, range 4 west, Boise meridian; all of those portions of sections 2, 3, 4, 5, 6, 7, 8, 9, 10, and 11, township 46 north, range 3 west, Boise meridian, lying south and west of the St. Joe River, in said township; all of those portions of sections 31 and 32, township 47 north, range 3 west, Boise meridian, lying south and west of the St. Joe River, in said township, is reserved and withdrawn from allotment and settlement and dedicated and set apart as a public park or pleasuring ground for the benefit and enjoyment of the people: *Provided*, That the Coeur d'Alene tribe of Indians shall be paid the appraised value of said lands, and all persons who locate or settle upon or occupy any part of the land thus set apart as a public park, except as provided in the following section, shall be considered trespassers and removed therefrom.

"SEC. 2. That such public park shall be under the exclusive control of the Secretary of the Interior, whose duty it shall be, as soon as practicable, to make and publish such regulations as he may deem necessary or proper for the care and management of the same. Such regulations shall provide for the preservation from injury or spoliation of all timber, mineral deposits, natural curiosities or wonders within the park, and their retention in their natural condition. The Secretary may, in his discretion, grant leases for building purposes, for terms not exceeding ten years, of small parcels of ground at such places in the park as may require the erection of buildings for the accommodation of visitors, all of the proceeds of such leases and all other revenues that may be derived from any source connected with the park to be expended under his direction in the management of the same and the construction of roads and bridle paths therein. He shall provide against the wanton destruction of the fish and game found within the park and against their capture and destruction for the purposes of merchandise or profit. He shall also cause all persons trespassing upon the same to be removed therefrom; and, generally, is authorized to take all such measures as may be necessary or proper to fully carry out the objects and purposes of this section."

Mr. FRENCH. I move that the House recede, and concur in the Senate amendment.

The SPEAKER pro tempore. The gentleman from Idaho moves that the House recede, and concur in the Senate amendment.

Mr. FRENCH. Mr. Speaker, I want to say a few words on this proposition. It is for the purpose of creating a park in what is now the Coeur d'Alene Indian Reservation, in Idaho. The necessity for the immediate passage of this amendment to the bill lies in the fact that this Congress has already passed a bill providing for the opening of the Coeur d'Alene Indian Reservation. The bill was passed in the last Congress. The survey work is now practically completed. The work of allotting the land to the Indians should be completed within a few months,

and if so, the reservation will be opened to settlement possibly before the convening of another Congress. If that should occur, then under the provisions of the law this land will fall into the hands of private owners, and it will be impossible for the park to be created by legislation of Congress. In view of this, I urge that the Congress at this time pass this amendment.

Mr. MANN. Is the Government required to purchase any land?

Mr. FRENCH. I think there are something like 6,000 acres included within this proposed park. I would be glad, however, if the committee could see fit to concur in a smaller number of acres than that, although I think it would be well to concur in the amendment just as it is. There will be a nominal price put upon the land by the board of appraisers.

Mr. MANN. What does the gentleman mean by "a nominal price?"

Mr. FRENCH. The price will be fixed by a board appointed by the Department of the Interior for the purpose of classifying and appraising the value of the land.

Mr. MANN. Can the gentleman tell what price is put upon it?

Mr. FRENCH. No; I could not do that.

Mr. MANN. Does the gentleman expect us to embark upon a scheme to purchase land when he can not tell anything about the probable cost?

Mr. FRENCH. I think there is no question but that the amount involved will not be any large amount.

Mr. MANN. But I asked the gentleman what the land would cost, and the gentleman declines to state.

Mr. FRENCH. I could not give the probable value that may be placed upon the land.

Mr. MANN. Then how does the gentleman expect us to favor a *proposition which* might cost the Government a very great sum?

Mr. FRENCH. That could be taken care of later by Congress if it should develop that such was the case. This land is rugged land lying at the junction of the beautiful St. Jo River with Chatcolet Lake, a little lake near Lake Coeur d'Alene, one of the most beautiful spots in Idaho, and which would not have at this time, before the reservation shall be opened, any unreasonable value in a monetary sense, but would have a splendid value for park purposes, because it would be preserved as a beauty spot to which visitors could come from all the Northwest and, in fact, from our whole country.

Mr. BURKE of South Dakota. I would like to ask the gentleman a question.

Mr. FRENCH. I will yield to the gentleman.

Mr. BURKE of South Dakota. Is this on an Indian reservation?

Mr. FRENCH. It is, and it is authorized that it be opened to settlement.

Mr. BURKE of South Dakota. Is it proposed that the proceeds shall be paid to the Indians?

Mr. FRENCH. The proceeds of the sale would be paid to the Indians. The income from the park from leases or from the sale of timber that may be ripe and sold would be used for the purpose of building roads and maintaining the park in a beautiful condition.

Mr. BURKE of South Dakota. Did I understand the gentleman to say that the Interior Department would determine at what price the lands should be paid for?

Mr. FRENCH. Under the provision of the law that has passed it is provided that the land shall be classified and appraised by the Department.

Mr. MANN. What is the number of this amendment?

Mr. FRENCH. Eighty-seven. I would state further, as I have only a moment left, that this amendment has the approval of the Indian Department and the approval of the Secretary of the Interior. The question has been asked by the chairman of the committee why the State can not purchase the land. Under the law as it now is there is no provision whereby the State could purchase the land. It must go to the individual homesteader, who will enter upon the land as soon as it shall be opened to settlement. The only way the State can obtain it would be by buying land from the individual who would acquire title to it directly from the Government.

Mr. BURKE of South Dakota. Would this land be taken for homesteads?

Mr. FRENCH. Yes.

Mr. BURKE of South Dakota. It is of such a class of land that that is possible?

Mr. FRENCH. Yes; it is possible that it could be taken for homesteads. I believe that is all, Mr. Speaker, that I have time to say, and I trust my motion may prevail.

Mr. TAWNEY. Mr. Speaker, just one word. This simply means starting upon another national-park proposition. If the cost was only the initial cost to the Government the question might not be so serious, but when we once get one of these national parks we know from experience that it requires anywhere from $10,000 to $75,000 or $100,000 a year to maintain it and to improve it; and until Congress has had sufficient opportunity to investigate first the feasibility of converting this land into a park, the probable cost of improving and maintaining it when improved, I think that we ought not to authorize the segregation of this land for that purpose.

Mr. JONES of Washington. Mr. Speaker, I would like to ask the gentleman from Minnesota if it is not possible for the conferees to arrange a division by means of which this land might be reserved for such an investigation as that suggested here, so that if it is advisable it may be held for park purposes?

Mr. TAWNEY. Why, I suggest that we better let that matter come before the proper committees of the House, and then let the committees investigate. The conferees in the closing hours of a session have not time to investigate a proposition that involves a large future expenditure.

Mr. JONES of Washington. I desire to suggest to the gentleman that the difficulty about that is that this land, as I understand it, will be allotted possibly during the coming summer.

Mr. TAWNEY. Then why did they delay so long in bringing this in, when they knew, as they must have known long ago, that these lands were to be allotted?

Mr. JONES of Washington. The thing has been agitated all winter.

The SPEAKER pro tempore. The question is on agreeing to the motion of the gentleman from Idaho, to recede and concur in the Senate amendment.

The question was taken; and the motion was rejected.

Mr. TAWNEY. Mr. Speaker, I now move to further insist upon a disagreement.

The question was taken; and the motion was agreed to.

The SPEAKER pro tempore. The Clerk will read the next amendment.

The Clerk read as follows:

Strike out all of section 11 and insert the following:

"SEC. 11. For acquiring pieces or parcels of land for parks in the District of Columbia, as follows:

"For those pieces and parcels of land lying east of Massachusetts avenue extended, north of Rock Creek and west of Woodley Park, containing 99 acres, more or less, $375,000.

"For the several parcels of ground included between Euclid street, Columbia avenue or Fifteenth street, W street or Florida avenue, and Sixteenth street extended, containing 437,000 square feet, more or less, $475,000.

"For the several parcels of ground lying near the intersection of Branch avenue and Pennsylvania avenue SE., known as the Carpenter tract and the Pennsylvania Avenue Heights tract, containing 122 acres, more or less, $150,000.

"For the tract of land known as Montrose, lying immediately north of road of U street and east of Lovers Lane, on Georgetown Heights, containing 16 acres, more or less, $140,000: *Provided*, That one-half of the above-named sums, or so much thereof as may be expended, shall be reimbursed to the Treasury of the United States out of the revenues of the District of Columbia in four equal annual installments with interest, at the rate of 3 per cent per annum upon the deferred payments.

"And the Commissioners of the District of Columbia are hereby authorized and directed to acquire said park or parks by purchase at such sum or sums as they deem reasonable, not to exceed in any case the respective sums above provided for each park."

Mr. TAWNEY. Mr. Speaker, I move that the House further insist in its disagreement.

Mr. MANN. Mr. Speaker, I move to recede and concur, and I ask for two or three minutes.

Mr. TAWNEY. I yield to the gentleman.

Mr. MANN. Mr. Speaker, I make the motion to recede and concur for the purpose of testing the sense of the House. The House inserted in the bill a provision very much in the interest of economy in the Departments in the city of Washington. The Senate by amendment has stricken that out and inserted a provision for the purchase of four different pieces of ground at prices fixed in the amendment. While personally I am in favor of enlarging the park system in the city of Washington, while I do not believe that the city has parks enough, while those portions of the ground named in the bill with which I am familiar seem to me entirely suitable for park purposes, I do not believe for myself that this is the way to get at it, or that this is the method that should be pursued by us if we desire to purchase the parks. I hope that we may have an expression of the House on the subject.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Missouri [Mr. BARTHOLDT].

Mr. BARTHOLDT. Mr. Speaker, as a member of the Committee on Public Buildings and Grounds, which has had these propositions to establish parks in the city of Washington under consideration for several years, perhaps I am in a position to give some information to the Members of the House on this

subject. The proposition is to establish four parks, one of which is to be at Georgetown. The people of Georgetown have no park at all. Another park is to be established on the top of Sixteenth street, on beautiful Meridian Hill, which, in my judgment, should have been purchased by the Government ten years ago for whatever purposes it might be needed—a park, a botanic garden, an art museum, or a new White House. Whatever the purpose may be, the ground should have been purchased by the Government, in my judgment, long ago. Then there is to be a park in Anacostia, across the Eastern Branch of the Potomac, which would accommodate and satisfy the people east of the Capitol, who have been clamoring for park facilities for years, and then there is the proposition to enlarge Rock Creek Park by the purchase of 100 acres. I want to say that the prices for these different parcels have been fixed by the Commissioners of the District of Columbia, and the Senate in the original bills which they passed had seen fit to accept, whether with or without investigation I do not know, the price fixed by the District Commissioners. When these several bills came to the House the Committee on Public Buildings and Grounds instituted an investigation and found that possibly the price in each instance might be properly reduced, so that the Rock Creek Park proposition was reduced from $423,000 to $375,000, Meridian Hill was reduced from $550,000 to $475,000, the Anacostia proposition was reduced from $210,000 to $150,000, and the Georgetown park from $150,000 to $140,000. Since these reductions have been made by the Committee on Public Buildings and Grounds—and this is a matter that has had consideration by a proper committee, and a bill providing for the purchase of all these four parks is now pending on the Calendar—since, I say, the committee has made the reductions in price, none of the owners of these different parks has been seen or heard from, and consequently we had a right to infer that these reductions were satisfactory to the owners of these different parcels of land.

Mr. MANN. Will the gentleman yield?

Mr. BARTHOLDT. Yes.

Mr. MANN. If the reductions have been made by the Commissioners or the committee without the consent of the owners and the owners have not been heard from, and the bill provides only for purchase and not for condemnation, how does the gentleman know whether we will get the parks?

Mr. RODENBERG. If we do not get them, then there is no harm done.

Mr. BARTHOLDT. We were all against condemnation, because our experience in the city of Washington has been that when condemnation proceedings are instituted, the prices are usually higher than those that may be obtained by purchasing outright.

Mr. MANN. Would it not be easy to say condemnation, and then insert a provision that the price should not exceed a certain amount named in the bill?

Mr. BARTHOLDT. I would be perfectly satisfied to have an amendment of that kind. I want to say in conclusion that as to the necessity of more park facilities in the city of Washington, I believe there can be no doubt. They are needed for the health and comfort of the people, and the utility principle ought in this instance to give way to considerations of welfare of the present and future generations.

The old city of Washington is fairly provided with parks and circles and breathing spots, but the new city of Washington, the part of the city which has been built up on top of Meridian Hill and Mount Pleasant, is to-day without a park of any kind. In other words, the children will have no breathing spots to go to. All that ground has been carved up into lots, and unless Congress acts at the present time and secures these sites for park purposes no park can be had there in the future.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman a question.

Mr. BARTHOLDT. Yes, sir.

Mr. CLARK of Missouri. If you get these parks, are you going to let the children play in them or not?

Mr. BARTHOLDT. Yes, sir.

Mr. CLARK of Missouri. Well, they do not allow them to play in the rest of them.

The SPEAKER pro tempore. The time of the gentleman from Missouri has expired.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. BANKHEAD].

Mr. BANKHEAD. Mr. Speaker, I desire to say a word here in reference to the matter now under consideration. It will be remembered by the House perhaps that during the last session of Congress a Commission was appointed, consisting of three Members of the House and three of the Senate, and this Commission was charged with the duty of inspecting and reporting upon the question of additional parks for the District of Columbia. That Commission met, it visited and inspected every piece of property included in this Senate amendment, and they unanimously agreed that all of these parks were necessary and should be purchased, and should be purchased now because they believed that the price was lower now than it would perhaps ever be again. The Committee on Public Buildings and Grounds considered this whole matter. They reported a bill including these four parks. That has been on the Calendar of the House for quite a while, and I might add perhaps, Mr. Speaker, that this bill passed the Senate after this Commission made their report, came over here, was referred to the Committee on Public Buildings and Grounds of the House, and in their deliberations they thought perhaps this property could be bought cheaper than the price named in the Senate bill; therefore it reduced very materially the prices that had been fixed by the Senate. Now, I want to say one more word, Mr. Speaker, in reference to this park question. I am totally indifferent, so far as I am concerned, as to the passage of this bill. It is a matter for the House to determine; but I do want to insist upon this one proposition, that if these parks are to be bought—any of them—then I hope that this House will insist that they all be included. Now, there is a large portion of the District of Columbia that is entirely without parks. Georgetown has none at all. The whole District of Columbia east of the Capitol has no parking privileges. There is where the people live, Mr. Speaker, who have no powerful influence behind them here to come and insist upon the purchase of these parks for their benefit.

My friend from Missouri [Mr. CLARK] asked the question if the children will be permitted to play in these parks. I certainly trust they will, and he well states the proposition when he says in these small parks here in the District of Columbia on every corner and every square you see a sign posted, "Keep off the grass." Now, what we want is for the children of the District, and the mothers in the District of Columbia when they find an opportunity to get out for the day with their children, to have the opportunity to go, and a convenient opportunity, where the children can be turned loose to roam over the hills and enjoy the day while they are out. [Applause.]

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask my friend a question. What assurance have we that they will not have this sign "Keep off the grass" posted on the others?

Mr. BANKHEAD. Well, Mr. Speaker, I do not know how we could give any assurance except we must rely sometimes upon the good sense and management and judgment of the parking system.

Mr. MANN. Will the gentleman yield for a question?

Mr. BANKHEAD. Certainly.

Mr. MANN. If they should accidentally leave off the sign "Keep off the grass," would there not be posted up everywhere a penalty even for touching a twig, as we find all through Rock Creek Park?

Mr. BANKHEAD. Well, perhaps so; but, Mr. Speaker, some regulations must be made. Of course you could not allow, and the people of the District of Columbia would not expect, to go upon the parks and break and carry away the flowers and the shrubs that are intended to beautify them, but these parks in Georgetown and Anacostia and Meridian Hill are large parks—not a square—but they are large and can accommodate——

The SPEAKER. The time of the gentleman has expired.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Iowa [Mr. CONNER].

Mr. CONNER. Mr. Speaker, I desire to be consistent as well as honest. I do not intend to take any position that can be construed as discourteous to the committee of which I am a member, the Committee on Public Buildings and Grounds, but I think when I favor standing by the conferees on this proposition I am consistent. This matter comes into the House in an extraordinary manner; not on the recommendation of a committee, but attached by the Senate to an appropriation bill. It is true that this proposition was before our committee, and we gave it extended consideration. First, it came up on a recommendation of a commission composed of members of the House and Senate that had been appointed to purchase the property and who reported in favor of its purchase at a certain price, and after some deliberation we concluded that we would make an investigation on the part of our committee, and a subcommittee was appointed to investigate the matter, and that subcommittee turned the proposition down at the price the commission recommended, and when final action was taken on the several propositions the price that our committee fixed on this property was $200,000 less than the commission recommended.

Now, it seems that the owners of the property are quite as

willing to sell for $200,000 less than they were when the commission made its report. The truth is that while our committee made the recommendation to purchase the property at the reduced price, it does not follow that all of the members of the committee were in favor of the proposition. My judgment is that this property can be purchased for a less amount if we have got to purchase it. I have not found any great demand on the part of the people of the city of Washington in favor of purchasing the property outside of a coterie of real estate people.

Mr. NORRIS. Will the gentleman permit a question?

Mr. CONNER. Yes.

Mr. NORRIS. I would like to ask the gentleman if the price in the conferees' agreement for these different pieces of property is higher or lower, or the same as agreed upon by our committee when we were deliberating upon the same subject?

Mr. CONNER. The price the Senate fixed, and which was reported in the sundry civil bill by the Senate, is the same as is fixed by our committee.

Mr. NORRIS. By our committee?

Mr. CONNER. Yes.

Mr. NORRIS. Are all the four propositions——

Mr. CONNER. The four propositions are in at the price fixed by the majority of our committee. Now I say, if for no other reason, I am against this proposition because there does not seem to be any demand for it.

Mr. BARTHOLDT. Will the gentleman permit an interruption here? As to the original price, is it not true that the commission consisting of three Senators and three Members of the House reported in favor of the price the District Commissioners recommended?

Mr. CONNER. I do not criticise the commission in any manner, because they followed the recommendations of the District Commissioners. Take this proposition in Anacostia. The people of Anacostia have not demanded it. This so-called park is a mile and a half from Anacostia, and the children of that city will never have an opportunity to play in this park, even if we should permit them to play there, as they could not get to it and back home the same day. And the objection that exists to the Anacostia proposition exists as to the others. I think if we will wait and bide our time we can buy this property much cheaper than it is proposed to buy it now; I know that some of the property is a good deal cheaper now than it was five or ten years ago. If we will wait, in my judgment, we will be able to buy it cheaper than the Senate bill provides the price shall be.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Tennessee [Mr. SIMS].

Mr. SIMS. Mr. Speaker, I have made comments on this proposition before which I am not going to repeat, but after the Committee on Public Buildings and Grounds have reported a bill to this House, embracing these lands, which must be considered in the Committee of the Whole, with opportunity to investigate and go to the bottom of it, with opportunity to amend, why is it brought in here in this fashion? Establish such a precedent as this, and we will have such a performance in every Congress. Washington is a city that has already more shade, more parks, than any other city in the United States, either in proportion to area or population, as I am informed. Now, through a new amendment it is proposed to dragoon this proposition through the House, at a cost that exceeds the value of almost any State capitol in the Union, without consideration.

Mr. BOWERS. Will the gentleman yield to a question?

Mr. SIMS. If the gentleman will be quick about it. I have only five minutes.

Mr. BOWERS. Did the gentleman examine a little before making the statement that this city has more park area than any other city in the United States in proportion to its population?

Mr. SIMS. Yes; or area.

Mr. BOWERS. Has the gentleman compared the park area of this city with that of the cities of Richmond, Va., and Louisville, Ky.?

Mr. SIMS. No; I have not.

Mr. BOWERS. Then I will inform the gentleman that they have more park area in proportion than this city has, and the expense is not only not borne by the State or the United States, but their own city.

Mr. SIMS. Then they have more than they need. I will inform the gentleman——

Mr. BOWERS. I am inclined to disagree with the gentleman.

Mr. SIMS. That one half of this appropriation is going to be paid by the taxpayers of the United States, of whom your constituents form a part.

Mr. BOWERS. They are willing to pay it.

Mr. SIMS. I will further inform the gentleman that for all time to come this money is to be paid one half by your constituents or mine and the other half by the District of Columbia; half of it to be paid by State taxpayers outside of this city. Confine your park expenses to the people who live here.

Mr. BOWERS. My constituents are willing to pay their part.

Mr. SIMS. I have never heard a more unjustifiable proposition in my life than to force upon the taxpayers of the United States, who are not consulted, to pay for and maintain parks here, where there are more parks than are used. Take the gentleman from Iowa, Mr. CONNER'S, statement. They want a park a mile and a half away from the people of Anacostia, where they can not use it. It smacks of jobbery very strong. What else? I am told, Mr. Speaker, that the population of Anacostia and that neighborhood are largely old-fashioned southern negroes, who prefer sunshine any day to shade, so much so that when they build a house in a forest the first thing they do is to cut down every tree around it. If we buy Meridian Hill, which is covered with houses, we will have to tear them down to plant the trees in order to have a breathing space out there. Who has lost his breath in this town for the want of breathing places? The people only work from 9 o'clock until 4, most of them. Who has lost his breath here for want of fresh air? [Laughter.] We are lobbied to death! There are real-estate agents behind all such stuff as this. This House should vote to sustain the conferees without a dissenting voice.

My friend from Alabama, General BANKHEAD, believes in improving and maintaining public roads at the national expense. Let him take half of the $1,140,000 and put it in good roads, if he believes in it, instead of free shade and free sunshine for people who are not asking it and who do not want it. This House will simply respond to an active and vigorous lobby that has been working for years and will continue to do so as long as there is an unsold foot of territory in the District of Columbia that can not be sold to a private party. The price, too, is going down. Even the committee reporting this reports that prices are going down. Why hurry to buy it? Are we afraid we will not be able to buy it before it gets too low? Is that good economy?

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TAWNEY. I yield five minutes to the gentleman from Florida.

Mr. CLARK of Florida. Mr. Speaker, consulting my own feelings, I would not say anything on this question. But if two of these items do not smell to heaven of graft, there never was any graft in the District of Columbia. I have not investigated two of these items in this Senate amendment. I have investigated the two others. I will ask the Clerk to read a letter which I send to the desk, as I am suffering from an intense attack of neuralgia, but I do want these facts laid before the House.

The Clerk read as follows:

OFFICE OF THE ASSESSOR, DISTRICT OF COLUMBIA,
*Washington, February 16, 1907.*

Hon. FRANK CLARK,
*Committee on Claims, House of Representatives,*
*Washington, D. C.*

DEAR SIR: In response to your inquiry of the 15th instant, as to the assessed value of certain property included in Senate bills Nos. 54 and 6322, to provide for the purchase of certain land for public parks in the District of Columbia, I take great pleasure in sending you the following information:

The land contemplated in Senate bill 54, "to provide a public park on Georgetown Heights," contains 16 acres, which, for the triennial assessment of 1905–1908, is assessed at 8 cents per square foot, making a total assessed value of $55,756.80, or an approximate true value of $83,635.20. Under the new triennial assessment for 1908–1911, which is now in course of preparation, the assessed value of the land in question will be placed at $83,635.20. Under the rule of an assessed value of not less than two-thirds of the true value, the latter, in this case, would be $125,452.80.

The land contemplated in Senate bill 6322, providing for the purchase of a reservation for a public park in the District of Columbia, aggregates about 121 acres, which, for the triennial assessment of 1905–1908, is assessed at $100 per acre, making a total assessed value of $12,141, or an approximate true value of $18,211.50. Under the new triennial assessment for 1908–1911, the assessed value of the land in question will be placed at $300 per acre, or $36,423. Under the rule of an assessed value of not less than two-thirds of the true value, the latter, in this case, would be $54,634.50.

In response to your further inquiry of the 16th instant, as to the assessment for prior years against the land contemplated in Senate bill 6322, I would state that for the years 1903, 1904, and 1905, parcels 206/1 and 207/8 were assessed at $100 per acre, the same as the present rate, or $5,286 and $2,180, respectively. For the years 1900, 1901, and 1902 the rate was $70 per acre, or $3,700.20 and $1,526, respectively. For the years 1903, 1904, and 1905, and also for 1900, 1901, and 1902, parcels 207/9 and 206/2 were assessed at $70 per acre, or $1,012.90 and $2,259.60, respectively.

Complying with your request for a statement as to the date upon which William Andrew Clark and the United States Realty Company, of Washington, D. C., took title to parcels 206/1 and 207/8, I would state

that this property, which was formerly known as 74.66 acres, Naylor road, was conveyed by deed, dated August 6, 1903, recorded August 24, 1903, by William Andrew Clark and Arthur E. Randle to William A. Clark and the United States Realty Company, of Washington, D. C.

Kindly advise me if I can be of any further assistance to you in this matter.

Respectfully,

E. W. W. GRIFFIN,
*Assessor District of Columbia.*

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. TAWNEY. Mr. Speaker, I desire to yield to the gentleman from Iowa, who desires to call up a matter, and I will yield to the gentleman from Florida later.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment joint resolution (H. J. Res. 253) relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 8230. An act for the relief of Harold D. Childs.

The message also announced that the Senate had insisted upon its amendments to the bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. HANSBROUGH, Mr. CARTER, and Mr. DUBOIS as the conferees on the part of the Senate.

The message also announced that the Vice-President had appointed Mr. PENROSE, Mr. CARTER, and Mr. CLAY members of the joint committee on the part of the Senate to make an investigation into the entire business system of the Post-Office Department and the postal service, as authorized in the post-office appropriation bill for the fiscal year ending June 30, 1908.

SIXTEEN-HOUR BILL.

Mr. HEPBURN. Mr. Speaker, I desire to call up a message from the Senate. The Senate has disagreed to the report of the conference committee on the bill (S. 5133) to promote the safety of employees and travelers on railroads by limiting the hours of service of employees thereon, and have asked for a conference. I move that the House adhere to its amendment to the Senate bill and ask for a conference.

The SPEAKER. The Clerk will report the title of the bill.

Mr. HULL. The gentleman moves to adhere. That will take the bill out of conference entirely. The gentleman really desires to further insist.

Mr. HEPBURN. To insist upon our amendment.

Mr. DAVEY of Louisiana. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The Clerk will report the title of the bill.

The Clerk read as follows:

A bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

The SPEAKER. One moment. This conference report is rejected by the Senate; therefore it is no conference report. It is exactly in the same situation as the sundry civil bill is now in, I take it, up to this time. Possibly the sundry civil bill——

Mr. TAWNEY. It was not my intention to yield to the gentleman from Iowa to postpone the sundry civil bill for another conference report. I understood he just wanted to make a motion in regard to the matter.

The SPEAKER. The gentleman submits a motion for unanimous consent that the House do further insist upon its amendment and agree to the conference. Is there objection?

Mr. DAVEY of Louisiana. Mr. Speaker, I desire, at the proper time, to offer a motion to instruct.

The SPEAKER. But this is a request for unanimous consent, and if unanimous consent is given it will put the matter back into conference.

Mr. BARTLETT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BARTLETT. Will the Speaker permit me to call his attention to the situation?

The SPEAKER. The Chair understands the situation exactly. Now, with the sundry civil bill pending exactly as this bill, the sixteen-hour bill, is pending, the gentleman from Minnesota [Mr. TAWNEY] yielding for that purpose, the gentleman from Iowa [Mr. HEPBURN] asks unanimous consent that the House do insist on its amendments and agree to the conference, and that the conferees be immediately appointed.

Mr. RYAN. Mr. Speaker, a parliamentary inquiry. If unanimous consent is granted, would it be in order then to offer a motion instructing the conferees——

The SPEAKER. No; not if unanimous consent is given.

Mr. UNDERWOOD. Then, Mr. Speaker, I demand the regular order.

The SPEAKER. The gentleman from Alabama demands the regular order. The gentleman from Minnesota is recognized to proceed with the consideration of the sundry civil appropriation bill.

SUNDRY CIVIL APPROPRIATION BILL.

Accordingly the House resumed consideration of the sundry civil appropriation bill.

Mr. TAWNEY. Mr. Speaker, I yield five minutes to the gentleman from Florida [Mr. CLARK], and I give notice that at the conclusion of his remarks I shall endeavor to close the debate.

Mr. CLARK of Florida. Mr. Speaker, I ask for order. I am very weak and can not readily make myself heard.

If gentlemen will investigate, they will find that the 16-acre tract of land in Georgetown is estimated by the tax assessor to be worth the amount which he states in his letter, and that if you deduct his estimate of the real valuation from the sum named in the bill you will see that these parties are making a profit on this sale to the Government of $25,000 on 16 acres of land in Georgetown.

Mr. BARTHOLDT. Will the gentleman permit me?

Mr. CLARK of Florida. I have not time. I hope I may be permitted to finish my statement, and then if I have time I will yield.

If you will examine the figures with reference to the Anacostia tract, in which, by the way—and I am making no reflections or charges, although I do not believe in the Government trading with Government officials—if you will examine the title, you will find that a Senator of the United States owns one-half interest in the Anacostia property. The other half is owned by the United States Realty Company, which, as I understand it, makes a business of buying up all the worthless lands in the District of Columbia and unloading them upon Congress. When they can not find a purchaser anywhere else, they come to Congress and unload these old ditches and gullies.

If you will examine the figures now as to the Anacostia tract, which comprises 121 or 122 acres, you will find that the tax assessor gives his opinion of the real value, not the assessed value. Deducting that from the price named in the bill, this United States Senator and the United States Realty Company will make a profit of $147,000 on 121 acres of gullies in Anacostia.

Mr. TAWNEY. In justice to the gentleman to whom he refers I ought to say that it was stated this morning in the conference that the Senator referred to by the gentleman knew nothing about this proposition when it was originated and that he demanded that it go out on the very ground that the gentleman has stated in criticising the Senator.

Mr. CLARK of Florida. I think the Senator's wish ought to be complied with by this House, and that it ought to go out. [Applause.]

Mr. BANKHEAD. The gentleman has just stated that the profit in this transaction was $147,000. Now, the price of the whole property is only $150,000 in this bill.

Mr. CLARK of Florida. I beg the gentleman's pardon; it is $210,000.

Mr. BANKHEAD. Oh, no; it has been reduced to $150,000.

Mr. CLARK of Florida. If you reduce the Anacostia property to that figure, then they will still be making a profit of $90,000.

Mr. BANKHEAD. I do not see how you figure that out.

Mr. CLARK of Florida. I figure it out on the opinion of the tax assessor as to what it is worth. His opinion is stated in the letter which I have put in the RECORD. He gives the assessed valuation, and then he gives his opinion of its real value. Deducting that, after you have cut it down to $150,000—they started out at $210,000—there is still a profit of over $90,000 on these 121 acres.

I know nothing about the other two propositions, because I have not investigated them, but there is no need of hurry about this thing. As has been said, there are plenty of parks in Washington, and in the District of Columbia, and there is no necessity for hurry. I have been over to Anacostia, and I tell you there are some ditches there, if the correct land was pointed out to me, that you could put the Capitol into, and you could hardly see the Dome.

Mr. TAWNEY. I now yield two minutes to the gentleman from Maryland [Mr. MUDD].

Mr. MUDD. I only wish to say a word or two. I had never known until I heard the statement made a moment ago just who were the owners of this land. I have no feeling of interest whatever in the matter of the ownership of the land or the price

to be paid for it to any further extent than that the Government shall not pay too high a price. I arose, however, chiefly to correct the statement made by the gentleman from Tennessee [Mr. SIMS], who would not, I am sure, intentionally make an erroneous statement.

He is entirely wrong as to the character of the population of Anacostia. It is a small village of a very worthy and respectable population. It is not made up, as the gentleman states, of "old-fashioned colored people." It consists mostly of white people. For aught I know, they may be "old-fashioned southern white people," who are as much entitled to consideration in the way of provisions for parks as the new-fashioned people, or the "old-fashioned people" either, who make up the northwestern portions of this city.

Mr. SIMS. Then I have been misinformed.

Mr. MUDD. I feel sure of that. Now, Mr. Speaker, it is not the fact that this park is desired mainly for Anacostia. Anacostia is but a small settlement and is practically all built up, or very fairly built up, and, of course, you would not expect to buy land for park purposes just there. The land referred to in the bill is, so far as my information goes, the nearest vacant land suitable for the purposes in the portion of the District across the river bordering on Anacostia, and this land, I may say, is nearer to this Capitol than most of the land that is proposed to be utilized for parks in other sections of the city.

One other word. I, of course, want the Government to pay no more than a reasonable price for any land that is to be acquired for such purposes; but it is not right that this House should be "rattled," so to speak, with the cry of "lobby," as to the price, when it has just been stated here by a member of the committee that the price to be paid for the land has been fixed by the committee itself.

Now, as to the matter of assessment, which has been referred to by the gentleman from Florida.

The Members of the House who are familiar with the method of taxation in the District of Columbia understand that there is a decided difference in the manner of assessment of unproductive lands, sometimes referred to as agricultural lands, from that of land in the built-up sections of the city.

It is not the practice to tax unproductive lands at anything like their real value while they are so unproductive.

As to whether or not this is the proper time to provide parks for the city and District is for the House to say. I trust that it shall be considered fair that when we shall make general provision for parks, as provided in this amendment, we shall not pass by that section of the District in the east and southeast which has no parks at all.

Mr. TAWNEY. I yield two minutes to the gentleman from Mississippi [Mr. BOWERS].

Mr. BOWERS. Mr. Speaker, with reference to the area of parks in this city as compared with other cities in the Union, I want to further correct the statement of my friend from Tennessee [Mr. SIMS] by saying that in addition to the two cities I named when I interrogated him a few moments ago the city of Columbus, Ohio, and the city of Los Angeles, Cal., have a much larger park area in proportion to their population than this city has.

Mr. GROSVENOR. I want to say to the gentleman from Mississippi that the city of Cleveland has one park larger than all the parks of the city.

Mr. BOWERS. I thank the gentleman for the reminder, in which I concur.

Mr. SIMS. Let me ask the gentleman from Mississippi if the United States Government maintains any portion of these parks for anybody?

Mr. BOWERS. I do not see what figure that cuts in this matter. The parks have got to be maintained in some way, and if it is our duty to maintain the parks, I for one shall not shirk my duty.

There is another proposition in reference to the location of the Anacostia park. The statement has been made that it is a mile and a half from Anacostia. This proceeds upon the theory that the park is designed entirely for the use of the people of Anacostia and nobody else; while, as matter of fact, it is designed to furnish a large park for the great population here in east, northeast, and southeast Washington. It is nearer to them than it is to the people of Anacostia, and it is designed for their use and their convenience as well as for the use and convenience of the people of Anacostia.

My information is that is is admirably located, that the green cars that pass along Pennsylvania avenue will take you right into this particular park.

There is one other point I want to notice and then I am through. That is the matter of value. The desirability of these parks was investigated by a joint commission of the Committees on Buildings and Grounds of the Senate and of the House, and that joint commission reported unanimously in favor of it. The commission investigated the value of this property and, as I am informed, took the opinion of the Commissioners of the District of Columbia on that point, and that opinion was given in favor of the purchase of this land at the prices named. I have here in my hand, that I have not time to read, statements of sales, for years back and recently, of lands forming originally a part of these same tracts, and certainly contiguous to them, at prices which are as great or greater than the reduced prices provided for in the bill as reported from the House Committee on Buildings and Grounds.

The SPEAKER. The time of the gentleman has expired.

Mr. BOWERS. Mr. Speaker, I will ask the gentleman to give me one minute more.

Mr. TAWNEY. Mr. Speaker, I regret that I can not yield any further time. This bill must go back to conference. The Senate is now waiting for a conference on the general deficiency bill, and I desire to say one word only in concluding the debate.

Mr. THOMAS of North Carolina. Will the gentleman yield to me for a minute or two?

Mr. TAWNEY. No; I have not the time. This proposition is a proposed appropriation of $1,140,000. It comes to the House from the Senate as an amendment to a proposition passed by the House providing for the purchase of miscellaneous supplies in the several departments. It comes in such form that the Senate has taken our proposition out and substituted for it the park proposition; and therefore if we recede from our disagreeing vote to that amendment, we also lose our purchase proposition, or the proposition for the purchase of miscellaneous supplies. But there is a more serious objection to it than that. Much as I might desire to have the Government of the United States purchase these parks as proposed, if the land can be purchased at a reasonable price, much as I may desire to enlarge the park area of the city of Washington, I do not believe in the proposed method for obtaining it. This proposition comes from the Senate as a new proposition. It is not authorized by law. The Senate has no power to originate an appropriation of this kind; therefore the House should not consider it, regardless of its merits.

Mr. THOMAS of North Carolina. Will the gentleman allow me to ask him a question?

Mr. TAWNEY. Certainly.

Mr. THOMAS of North Carolina. If we sustain the conferees, will the effect of that be to permit the bill as reported from the House Committee on Public Buildings and Grounds to come up regularly?

Mr. TAWNEY. It will not prevent the bill from being considered in the House. The appropriation for the purchase of these parks or for anything else, for that matter, pertaining to the Government should originate in the House of Representatives.

Mr. THOMAS of North Carolina. I mean by that question to ask the gentleman if we sustain the conferees, would not that put an end to the park proposition?

Mr. TAWNEY. I think it will be ended; yes.

Mr. THOMAS of North Carolina. Not necessarily.

Mr. TAWNEY. Oh, not necessarily.

Mr. THOMAS of North Carolina. But it simply eliminates it from the sundry civil bill. Is that right?

Mr. TAWNEY. Certainly. Mr. Speaker, I call for a vote. I will remind the House that the question is on the motion of the gentleman from Illinois to recede and concur. I hope the motion will be voted down.

The SPEAKER. The question is on the motion of the gentleman from Illinois to recede and concur.

The question was taken; and on a division (demanded by Mr. MANN) there were—ayes 19, noes 145.

So the motion was rejected.

Mr. TAWNEY. Mr. Speaker, I now move that the House further insist on its disagreement to this amendment.

The SPEAKER. The question is on the motion of the gentleman from Minnesota to further insist.

The question was taken; and the motion was agreed to.

The SPEAKER announced the following conferees on the part of the House: Mr. TAWNEY, Mr. SMITH of Iowa, and Mr. TAYLOR of Alabama.

SIXTEEN-HOUR BILL.

Mr. HEPBURN. Mr. Speaker, I call up the conference report on the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, and for other purposes, with House amendments thereto, and I move that the House do further insist on its amendment to the Senate, and agree to the conference asked.

The SPEAKER. The question is on the motion of the gentle-

man from Iowa, that the House do further insist on its amendment and agree to a conference.

Mr. DAVEY of Louisiana. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. DAVEY of Louisiana. I desire to know at what time I can offer instructions to the conferees.

The SPEAKER. After the conference is agreed to and before the conferees are appointed.

The motion was agreed to.

Mr. DAVEY of Louisiana. Mr. Speaker, I offer the following resolution, which I send to the Clerk's desk.

The SPEAKER. The gentleman from Louisiana offers the following resolution, which the Clerk will report.

The Clerk read as follows:

That the conferees on the part of the House be instructed to insist on the insertion in Senate bill 5733 the following provision:

"*Provided*, That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches, reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four hour period on not exceeding three days in any week."

Mr. HEPBURN. I would like to ask my colleague if this is the language of the House amendment?

Mr. DAVEY of Louisiana. This is virtually the House amendment, with the word "consecutive" stricken out where it occurs.

Mr. HEPBURN. I would say, then, Mr. Speaker, I do not care to enter into any discussion about the subject, but the information of the conferees and the information of the committee, so far as we have any information, is that under the provisions of these instructions it will be utterly impossible to secure within the limits of the United States the necessary telegraphers. That is the information that comes to us. I have no ability to controvert the fact. I am told by those who assume to know that it will require the addition of 30,000 to the telegraphers' force; that not that number or any number approaching it can be had in the country; that there is a scarcity of this kind of labor; that there is a provision in the constitution of the unions that prohibits them from teaching their art to students or apprentices, and therefore there is a limited number, and that they to-day are in the employ of the railroad companies. That is the information that comes to me. Whether it is truthful or not I do not know, but it is made by respectable gentlemen upon their authority as truthful men.

Mr. UNDERWOOD. Will the gentleman from Iowa allow me to ask him a question?

Mr. HEPBURN. Certainly.

Mr. UNDERWOOD. Is it not a fact that it only requires a few months' work on the part of a young man to learn to be a telegrapher?

Mr. HEPBURN. Mr. Speaker, one of the objections to the present method and one of the things that demand this legislation is that the companies are said to employ men before they are fitted for the proper discharge of their duties, and we have heard the complaint that disaster results because insufficiently skilled boys are frequently employed. I do not know whether that is true or not, but I know the newspapers are full of statements of that kind, and I know that the proponents of this particular legislation have repeated it over and over again.

Mr. UNDERWOOD. Now will the gentleman allow me to ask him another question?

Mr. HEPBURN. Certainly.

Mr. UNDERWOOD. Is not that due to the fact that telegraphers are not paid sufficient salaries to insure the employment at all times of full-grown, responsible men?

Mr. HEPBURN. I am not able to state that; I do not know. I know that the information that came to us is to the effect that the lowest wages that are paid—this is by the Pennsylvania Company—are $44 a month, and from that up to $165 a month. What the actual facts are, I do not know.

Mr. MURPHY. That was east of Pittsburg.

Mr. HEPBURN. Yes, sir; east of Pittsburg, and that is the only information on the subject——

Mr. MURPHY. And the $163 was only to two men who were train dispatchers.

Mr. HEPBURN. I think that is true.

Mr. STERLING. I notice from the reports of the conferees that the limitation of one year was made in regard to prosecutions.

Mr. HEPBURN. Yes, sir.

Mr. SHERLEY. What was the purpose of the conference committee in changing that?

Mr. HEPBURN. Simply there was no one I know of who objected to it, and it was thought that under the peculiar circumstances of this kind of employment and the possibilities that surrounded the situation that one year was ample time to institute a prosecution. It is a matter I care very little about myself, whether it is one or three.

Mr. RICHARDSON of Alabama. Will my colleague allow me to ask him a question? The gentleman has one hour of time allowed, and how much of it will he give to our side?

Mr. HEPBURN. I will yield to the gentleman.

Mr. RICHARDSON of Alabama. I ask it in order to answer the argument the gentleman is making.

Mr. HEPBURN. Does the gentleman want ten minutes?

Mr. RICHARDSON of Alabama. You have sixty minutes.

Mr. HEPBURN. I will divide it with the gentleman and make it thirty minutes on a side.

Mr. DAVEY of Louisiana. Mr. Speaker, I yield five minutes to the gentleman from Alabama [Mr. RICHARDSON].

Mr. RICHARDSON of Alabama. The instructions asked by my colleague from Louisiana [Mr. DAVEY] is the position that the minority will not recede from, which reads as follows:

*Provided*, That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four-hour period on not exceeding three days in any week.

We would rather see the bill defeated, if such will be its fate in the Senate, than to fail to get those instructions carried out by the conferees. This bill, Mr. Speaker, has a singular and interesting history on the floor of this House. I am not allowed, as I understood from a suggestion made on the floor the other day, to state how it was that this paragraph relating to telegraphers came into the original bill while the bill was under consideration before the Commerce Committee. I will repeat that, as I understood the other day, it was suggested that a member of a committee was not allowed to make reference to what occurred upon a call of the vote or a record vote in the committee. I shall not be persuaded to infringe on any rule or custom of this House, let it be what it may, but I can not understand, Mr. Speaker, why a record should be made in the committee and no reference be allowed to it on the floor of the House. What good does a record vote do on any matter or subject?

Mr. Speaker, we are contending for the instructions asked by my colleague, because if there is anything of vital importance in this bill, if there is anything that the public welfare is concerned in, it is to adopt such safe and reasonable legislation as will prevent telegraphers and train dispatchers from being overworked. The grave and vital importance to the safety of the public depends more on telegraphers and train dispatchers than on engineers and other trainmen connected with the movements of trains. The instructions asked remove the misleading classification that would permit a telegrapher to be kept on duty more than twelve hours. But my distinguished friend from Iowa [Mr. HEPBURN] indulged in some humor a few days ago when this subject was before the House, Mr. Speaker, when speaking of the minority members of the Interstate and Foreign Commerce Committee. He said (RECORD, February 23):

When they devote themselves to the game of politics, however, they sometimes blunder, and have recently done that, and have induced their colleagues—the minority of this Chamber—to follow them in that blunder.

And in connection with his remarks he said to our distinguished leader [Mr. WILLIAMS], who merely concurred with the minority members of the Interstate and Foreign Commerce Committee in this matter, who had nothing to do with shaping it in any way or form, and a leader that we are willing, so far as I know, to follow under all conditions and circumstances—said the distinguished gentleman from Iowa [Mr. HEPBURN]:

Again the bill reads:

"In all prosecutions under this act the common carrier shall be deemed to have due knowledge of all the acts of its duly authorized agents."

Did he know that that was in the bill?

How puerile his objections now seem to be *when the attention of the House is called to the provisions of the bill.* I called special attention to what I said was a dangerous provision still left in the bill as reported by the conferees of the House on the 23d of the month, and that was the words in the above paragraph, which the gentleman from Iowa [Mr. HEPBURN] called attention to, that the common carriers were only responsible "for all the acts of its duly authorized agents." I

said then that these words were obstacles and impediments in the way of enforcing the law.

And yet I pick up the conference report, with the name of the gentleman from Iowa [Mr. HEPBURN] signed to it, and notwithstanding the fact that he said that our objections at best were "puerile," he has stricken out the very language that the minority contended would be an obstacle in the enforcement of this law, when it said that the railroad or the common carrier alone would be responsible for the acts "of its authorized agents." I notice that the gentleman from Iowa [Mr. HEPBURN] has stricken out the words "authorized agents," and it stands to-day, as the minority of the Interstate and Foreign Commerce Committee has contended from the beginning of this legislation in December, merely that the common carrier is responsible for all the acts of its agents and its officers.

And, Mr. Speaker, I go a little further. We have struggled in the Interstate and Foreign Commerce Committee, earnestly desiring to procure legislation that would protect the public and the lives of the employees of the common carriers, and not to allow them to be worked more than sixteen hours.

But the gentleman from Iowa says that the minority while playing politics have blundered. The record shows affirmatively that the Republicans have been driven from every position they contended for in this legislation. Is this "playing politics?" If so, why the vital concessions made to us by the Republicans? No, Mr. Speaker; the minority of the Interstate and Foreign Commerce Committee and this side of the Chamber have stubbornly refused to consent to the sham and evasive legislation that the Republicans sought to foist on the country in this important and grave question involving the lives of the people who travel on railroads. If that is "playing politics," for one I accept the gentle impeachment.

The fact is, we have caught the Republicans slyly "playing politics" and we have unearthed them, and the public understands their attitude on this subject.

Now we present instructions to the conferees to stand unalterably by the paragraph relating to telegraphers and train dispatchers and all who transmit, receive, or issue telegraph orders. This is the vital feature of the bill. Without this the public would find but little security in this legislation. We assume our responsibility without hesitancy, and say rather than have the telegraphers, as embraced by our instruction, left out of the bill we would rather see the bill defeated. We believe we are right, and we declare this to be our ultimatum. We are ready to go to the country on this issue.

Mr. HEPBURN. I do not desire to interrupt the gentleman in the middle of a sentence, but I would like to ask him a question.

Mr. RICHARDSON of Alabama. I am perfectly willing to answer the question.

The SPEAKER. The gentleman's time has expired.

Mr. RICHARDSON of Alabama. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Alabama [Mr. RICHARDSON] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DAVEY of Louisiana. Mr. Speaker, I yield to the gentleman from Georgia [Mr. BARTLETT] five minutes.

Mr. BARTLETT. Mr. Speaker, it is to be hoped that in the consideration of this conference report in the House, and that in expressing the desire that this important legislation on this subject may be evolved before this Congress adjourns, there may be put upon the statute book not only a requirement that will amply protect the telegraph operators engaged by the railroads in transmitting their orders and operating it, but protect the lives of the public as well, which, at last, is its chief object.

I have not the time, if I had I could read from the statistics and the accounts of railroad accidents which I hold in my hand, furnished not only by the newspapers, but by the official bulletins from the Interstate Commerce Commission, that accident after accident has occurred, horror after horror has shocked the people by reason of the fact that the men who handle the telegraph orders governing the movement of trains have not been able, by reason of overwork, to attend to that duty as they should. Now, we have passed this bill and sent it to the Senate, and the conferees have undertaken to do what? They have said in the amendment which they agreed to, and which the Senate has rejected, what employees shall only work eight hours—the train dispatcher and other like employees. He does what? He issues the orders pertaining to and affecting train movements. A train dispatcher can only work eight hours. The man who gives the orders to the train dispatcher can only work eight hours.

The man whose intelligence and experience is taxed to properly transmit these orders from the train dispatcher is permitted and can be permitted to work twelve hours. It seems to me that the men who are permitted and required to work, if anyone is, twelve hours ought to be the men who issue the orders; and if there is anyone who should not be permitted to work over eight hours, it should be the men who have to work the telegraph wires, use the key, and whose intelligence and alertness are required for the safety of the transportation of the people traveling on these great roads. Therefore we have thought it proper to offer these instructions to these conferees. This House has been flooded, I apprehend, in a way it has seldom been done in the past, with the requests and the demands of these railroad telegraph operators—the telegraph operators and not the train dispatchers—asking us to give them a nine-hour day of work. For myself, I have answered these requests with the statement, "I would vote for a nine-hour day in the case of the telegraph operators," and for one I propose to keep that promise and give to these people a nine-hour day, and no longer, and give to the people who travel and the employees who are engaged in this great transportation business protection from men who are overworked as telegraph operators.

Mr. HEPBURN. Will my colleague permit me to ask him a question?

Mr. BARTLETT. Certainly.

Mr. HEPBURN. Do you know of any authenticated case in the last five years when any railroad accident has occurred because of the overwork of an operator?

Mr. WANGER. One is said to have resulted in the death of President Spencer.

Mr. HEPBURN. Oh, not at all. I have ascertained that that man had been on duty but six hours.

Mr. BARTLETT. What was the question?

Mr. HEPBURN. Do you know of any properly authenticated case where a railroad disaster has been traced directly to the overwork of any operator?

Mr. BARTLETT. I do not know of my own knowledge of any case, but I have the bulletins of the Interstate Commerce Commission, and I have newspaper accounts of the one which occurred at Lawyers, on the Southern Railroad, and one that occurred at Tacoma Park in December.

Mr. HEPBURN. Do you say that either one of those is imputed to the overwork of an operator?

Mr. BARTLETT. I do. I do not mean to say I know it. I say I have here the accounts that state that to be the fact. That is all I know. I am looking at them. Here is the last article published in the last Ridgway, and I have here one of the bulletins of accidents which I would read if I had the time.

Mr. HEPBURN. I have endeavored to find out, and I have not yet found one authenticated case.

Mr. BARTLETT. Well, I have a statement of authenticated cases made by the Interstate Commerce Commission. Of course I was not present and do not know it and can not testify as a witness, but these bulletins, called "accident bulletins, contain a number of cases of railroad accidents in which it is stated that the casualties were occasioned by the negligence of men who had been worked flagrantly long hours.

Mr. DAVEY of Louisiana. Mr. Speaker, I yield to the gentleman from New York [Mr. RYAN].

Mr. RYAN. Mr. Speaker, I am in favor of the adoption of the instruction to the committee on conference proposed by Mr. DAVEY for the reason that a failure to instruct is an indorsement of the bill as reported by the House conferees and is a backward step from that taken by this House the other day, when by an almost unanimous vote they decided that telegraph operators engaged in handling train orders might not work more than nine hours a day. This conference report is very ingeniously drawn. It says that the man who issues the orders pertaining to or affecting train movements—that is, the train dispatcher—shall not work more than eight hours per day. Mr. Speaker, no train dispatcher in this country works more than eight hours a day now. Further, this report says that all tower men and all operators who, by use of telephone or telegraph, transmit, receive, or deliver orders affecting train movements shall be permitted to work twelve hours a day. This increases the number of hours per day that this class of employees may work and is an indorsement of a twelve-hour workday, and I am opposed to it.

Mr. Speaker, in view of the fact that accidents are of daily occurrence in this country, some of them undoubtedly caused by the carelessness of telegraph operators or by the inefficiency which comes from too long hours of service, is there a man on the floor of the House who is willing to legalize a twelve-hour workday in these lines of duty? If there is, I am not that man. [Applause.] I believe in saying in this bill, in language that no one can mistake, just exactly what we mean, and I believe

the majority of the Members of this House are in favor of a short workday for men engaged in receiving, transmitting, or delivering train orders. It has been said by the chairman of the committee, the gentleman from Iowa [Mr. HEPBURN], that if this provision is placed in the bill, a sufficient number of operators can not be obtained; that there are not enough of them in the country. Why, sir, this bill does not go into effect for twelve months. Thousands of men can be taught the business in that time; and if a demand for any class of labor is created in this country, that class of labor will be supplied.

Mr. STERLING. I should like to ask the gentleman a question. Is it not true that there are schools of telegraphy all over the United States, teaching young men telegraphy all the time?

Mr. RYAN. Undoubtedly.

Mr. STERLING. Who are seeking places?

Mr. RYAN. Undoubtedly; and more schools would start if it were necessary. Mr. Speaker, if the railroads of this country will pay proper wages and require only reasonable hours of work, they can secure the services of all the men they want. Why, sir, this House yesterday by a very decisive majority decided in favor of a 3-cent car fare on the street car lines in the District of Columbia. Why? One reason, because sufficient cars have not been provided and some have had to stand up once in a while in the cars. Is the inconvenience of the people of the District of greater importance than the lives of the traveling public and employees of the railroads in this country? I do not think so, and I do not believe the House thinks so, and I believe that the House will adopt the instructions proposed by the gentleman from Louisiana [Mr. DAVEY]. I hope the House will stand by its former action; that it will stand firmly for a shorter workday for men engaged in such occupations. If they do otherwise, they will do what I believe to be wrong. [Applause.]

Mr. DAVEY of Louisiana. Mr. Speaker, I yield five minutes to my colleague, the gentleman from Pennsylvania [Mr. WANGER].

Mr. WANGER. Mr. Speaker, a few days ago, when this measure was before the House, the gentleman from Ohio [Mr. GROSVENOR] forcefully pointed out that the most important provision of the bill was that relating to telegraph operators receiving and transmitting train orders, and he taunted gentlemen on the other side because they were willing to support a bill without any provision with respect to those same operators, and therein claimed superior virtue for this side of the House for having formulated the proposition which we sent to the Senate.

Now, we have an opportunity to decide whether that was an idle boast or whether it was done with sincerity and upon the merits of the proposition. [Applause.]

Mr. Speaker, it has been said that this measure has been demanded by certain labor organizations that are desirous of increasing the pay of their members and at the same time shortening their hours of labor. I know nothing about that. I know that before any proposition was introduced into this House touching telegraphers I received a communication from an esteemed constituent, who is one of the operators at a junction station on one of the great trunk lines between this city and New York, saying that the operators work twelve hours per day, there being only two shifts. Now, there is not an hour of any day or night probably in which several swift trains do not rush by that station at highest speed, some of them being switched to the right and some to the left. We expect the men who are held at their post twelve hours on each of the seven days in the week to protect our lives and limbs and those of all travelers by their consistent and persistent attention to their duty.

I say it is beyond the reasonable capacity of ordinary men to expect that. [Applause.] I say that it is our own lives and limbs and those of our fellow-travelers on railways, no less than those of railway employees, and the compensation and health of the latter, that are involved in this proposition.

It is said that the railroad companies can not get telegraph operators for three shifts per day in all-day-and-all-night offices. What is there so difficult in the art of telegraphy that it can not be learned by intelligent Americans? It only requires sufficient money inducement to get the men, and to get the very best men that can be had for the places, men of experience as well as capacity, and then with such men you will not have so large a number of catastrophies as the list which I published in the RECORD a few days ago, resulting either from the inexperience or the overwork of telegraph operators, contains. Why, recall that catastrophe in Colorado a little more than a year ago, when an express train went rushing by a station where the operator was asleep after too many hours of duty voluntarily undertaken by himself. It does not do to leave this question of how many hours a telegraph operator shall work either to himself or to the railway company. [Applause.]

It is said that the following telegram has been sent each member of another legislative body:

CHICAGO, ILL., *February 26, 1907.*

_____,

*United States Senator, Washington, D. C.:*

House amendment to sixteen-hour bill restricting telegraph operators who transmit or receive messages affecting train movements to nine hours' service would impose great hardship on railway companies, requiring three men at local stations instead of two. The work is not hard, and the supply of operators is insufficient to furnish three for each telegraph station. Labor unions undoubtedly secured insertion of amendment in order to create demand for operators, with view to higher wages. Train dispatchers, who direct movement of trains, work only eight hours, and if amendment is to be adhered to it should be limited to dispatchers.

GARDINER LATHROP,
*General Solicitor, the A., T. and S. F. Rwy. Co.*

My brief recitals, I hope, refute every one of Mr. Lathrop's material assertions. The latter part of his message shows how inadequate is the provision recommended by the conferees.

Mr. SMITH of Kentucky. Mr. Speaker, I want to say to the gentleman——

The SPEAKER pro tempore (Mr. LITTLEFIELD). The time of the gentleman from Pennsylvania has expired.

Mr. HEPBURN. I will yield to the gentleman two minutes more.

Mr. WANGER. I thank my colleague from Iowa for his courtesy.

Mr. SMITH of Kentucky. I want to say by way of confirmation of what the gentleman from Pennsylvania has said, that the operator in Colorado to whom he refers was a constituent of mine, and I learned from his family that he had been on continuous duty for nineteen hours.

Mr. WANGER. I thank the gentleman from Kentucky. His statement confirms the report of the frightful catastrophe as given in Accident Bulletin No. 19, being case No. 29. Thirty-four men and women were killed, twenty-four injured, and the damage to engines, cars, and roadway was $51,249. The report says:

Collision No. 29, causing the death of thirty-one passengers and a money loss (besides the damages paid on account of deaths and personal injuries) of over $50,000, was due to the nondelivery of a meeting order sent by the train dispatcher. The collision occurred about 2 a. m., and a blinding snowstorm prevailed at the time. Immediately after the collision the wreck took fire, and eight cars—passenger, mail, and baggage—were burned up. A portion of the deaths were caused by the fire. The west-bound train ran past the meeting point which had been fixed by the dispatcher, for the reason, as before stated, that the meeting order was not delivered. The west-bound train, running from A to G, had been ordered to meet the east-bound at E, but it was found that the east-bound train was gaining time over the west-bound, and it was decided to change the meeting point to D, and an order to this effect was sent to the east-bound train at F and to the west bound at C. The nondelivery of the order was due to the fact that the telegraph operator at C accepted it from the dispatcher after the train had passed. The dispatcher, depending on the station operators for knowledge as to the whereabouts of all trains, inquired of the operator at C if the west-bound train (No. 3) had passed. The operator replied that it had not, and the dispatcher at once instructed him to display his stop signal. But it turned out that the train had passed while the operator had been asleep, and the information given by him to the dispatcher after he awoke was, therefore, false. This operator had been on duty all day the day before and then served at night in place of the regular night operator—nineteen hours in all, except for the time occupied at meals. It is estimated that he had been asleep only about one minute. He had worked an excessive length of time to accommodate his fellow-operator and without the permission or knowledge of his superintendent. He had been in service at C one week, for this company two months, and for other companies nearly two years. He is reported as being proficient and habitually attentive to duty.

Mr. Speaker, a correspondent writes me:

Your amendment to the Esch bill, if passed and becomes a law, will release a great many thousand men who are slaving their lives away for the railroad companies for a mere living.

A majority of the train dispatchers are now only working eight hours in the twenty-four, but the men who hold the next responsible position on a railroad, which are the operators out on the road, compelled to work twelve and occasionally as many as twenty-four hours receiving telegraphic train orders by dots and dashes over possibly a poor wire, and probably one mistake of a letter or figure means loss of lives, "and for this responsible position they pay us the magnificent sum of from 13 to 16 cents per hour of twelve-hour shifts, Sundays included, and often months without a relief day." These same companies pay the engine driver 45 and 50 cents per hour for his services, and actually these men are under our guidance continually. We receive their orders by wire. The intense nervous strain which is caused by the long hours and great responsibility soon impairs a man's constitution so that he is not capable of rendering the least of service for the companies.

You and every gentleman in the two Houses must fully concur that it is not the laborious work, but the nerve strain that counts in any kind of business. We are, as a rule, quite an intelligent class of men and compelled to look neat while on duty. I presume the argument the railroad companies will put forth will be they are already short of operators, but that has little foundation; it is simply a case that thousands of good operators have been driven out of the business on account of low wages and poor conditions. There is a sufficient supply of operators to man every office if the inducements are put out by the companies. There is possibly forty or forty-five thousand railroad operators in the United States to-day, and it would be safe to say they enjoy less freedom from duty than any class of railroad employees and hold some of the most responsible positions.

Now, let the railways pay anything like the wages that they pay the engine driver and they will have capable and experienced telegraphers, and that within a very brief period.

[Applause.]

Mr. Speaker, I ask leave to extend my remarks in the RECORD.

The SPEAKER pro tempore. The gentleman from Pennsylvania asks permission to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DAVEY of Louisiana. I now yield three minutes to the gentleman from Alabama [Mr. UNDERWOOD].

Mr. UNDERWOOD. Mr. Speaker, I am in favor of this entire bill. There is no civilized nation on the globe except ours that does not regulate the hours of labor of the railroad employees on the trains and the railroad telegraphers. The result is shown that that legislation is effective, because in all of these countries where the hours of labor are regulated within reasonable limits the number of accidents that occur are greatly less than we have in this country. There is no question but that this class of legislation can be put into effect and can be carried out by the railroad companies if they are forced to do so. It has been effective in other countries, and it will prove as efficacious here. But what I do say, Mr. Speaker, is that this legislation is necessary to protect human life, to protect people who are traveling on these trains every day, and it is a question that this Congress can not afford to compromise with.

In a great deal of the legislation that passes Congress we recognize that we must reach compromises in order to pass the legislation. But, so far as this bill is concerned, it is a bill to protect the traveling public of our country, and I am in favor of no compromise. I say it is the duty of this House to pass this instruction, send the conferees back to the Senate with instructions that they must agree on this bill in an effective way, and let them know if that kind of a bill is not passed we will not pass any. [Applause.] Let them know that we will wait until the next Congress to do what is right. They might as well recognize that and have it understood that if we can not get effective legislation to protect the public of the United States, then do not let us have any at all and stop right here. [Applause.]

Mr. DAVEY of Louisiana. I now yield three minutes to the gentleman from Illinois [Mr. STERLING].

Mr. STERLING. Mr. Speaker, the provisions of the bill as it went from the House to the conference committee provided, in relation to telegraph operators, that in offices operating day and night the operators should be limited to nine hours' labor, and in offices that are operated only in the daytime they should be limited to thirteen hours' labor. This report of the conferees limits the hours of labor in offices operated only in the daytime, and in the daytime and nighttime, both to twelve hours, leaving the situation, as I understand it, substantially as it is all over the country at the present time, so far as railroad telegraph operators are concerned. It does limit the day for train dispatchers and telegraph operators in the offices of train dispatchers to eight hours, and that is the situation throughout the United States as it is at the present time, so that the entire provision of this proposition as it comes from conference committees leaves it just as the railroad companies have already fixed it throughout the entire country. It affords no relief to anyone.

Mr. Speaker, I desire to call the attention of the House to another provision in the report of the conference committee. By means of changes which the committee has made in the hours of labor for railroad trainmen it provides that no employee who has been on duty sixteen hours in the aggregate in any twenty-four-hour period shall be required or permitted to continue or again go on duty without having had at least eight consecutive hours off duty. Let me illustrate. Suppose at the end of the twenty-third hour the eight hours' rest has expired, then the railroad operator, the engineer, the conductor, the fireman, after one hour's labor is compelled again to take eight hours of rest, making two periods of rest of eight hours, which, with only one hour of labor between them, is a hardship both on the railroad company and on the railroad men, and that provision certainly ought to be changed and the bill put in its original form. Mr. Speaker, I now send to the Clerk's desk a letter from Mr. Fuller, a representative of railway trainmen, which I ask to have read in my time.

The Clerk proceeded with the reading of the letter.

During the reading,

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. STERLING. Mr. Speaker, I would like to have the letter completed. May I have one minute? I will ask the gentleman from Iowa that the letter may be read in one minute of his time.

Mr. HEPBURN. I have no objection to that.

The SPEAKER pro tempore. The gentleman from Iowa yields one minute. The Clerk will proceed.

The Clerk again proceeded with the reading of the letter.

During the reading,

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. STERLING. Mr. Speaker, may I ask if the letter is completed now?

The SPEAKER pro tempore. No; it is about half done.

Mr. STERLING. Mr. Speaker, I ask unanimous consent to insert the rest of the letter in the RECORD and to extend my remarks.

The SPEAKER pro tempore. Is there objection?

Mr. HEPBURN. I object.

So much of the letter as the Clerk read is as follows:

WASHINGTON, D. C., *March 2, 1907.*

Hon. J. A. STERLING, M. C.

DEAR SIR: I respectfully submit to you the following criticisms of the bill limiting the hours of service of railroad employees (S. 5133) as reported by the conference committee, and on behalf of the railroad employees who are seeking this legislation to express the hope that it will be returned to conference with the view of remedying these defects.

The provision relative to aggregate time in section two, as reported by the conferees, arbitrarily requires an employee to take eight consecutive hours off duty immediately after the twenty-four-hour period, notwithstanding the fact that he had already had eight hours off duty within such twenty-four-hour period, and possibly there may have been only one hour's service between the two eight-hour-rest periods. Thus, to force an arbitrary eight-hour-rest period after only one hour's service would not only cause great inconvenience to the employees and unnecessarily keep them away from their homes, but it would also impede the movement of traffic where the immediate service of these employees was desired.

The proviso in section 2 which permits a carrier to work a telegraph operator twelve hours would specifically countenance by law the working of twelve hours a class of men a great number of whom are now only working eight hours. We fear that this would encourage carriers to increase rather than decrease the number of hours of telegraphers. Then, too, the fact that Congress had by law specifically recognized a twelve-hour day for this class of men would, we fear, put into the hands of the carriers a weapon, or at least an argument, to combat the present efforts of telegraph operators and other classes of railroad employees to decrease their hours of service by contract.

The provision in section 3 which reduces to one year the time within which suit can be brought is, in our minds, made without good cause. If individuals can not plead the statute of limitation in less than three years, we do not believe a corporation should be permitted to plead it in one year. The only argument so far advanced for making the period one year is that it is necessary in order to prevent the blackmail of railroad officers by railroad employees. This is a reflection on the railroad employees as a class. Out of nearly one thousand actions which have been brought against the carriers for violations of the safety-appliance law there has not been one case where a railroad employee has been accused of blackmail. All criminal law can be used as a means of blackmail; therefore there is no good reason why a discrimination should be made in a law of this character.

Mr. HEPBURN. Mr. Speaker, I do not think that my colleague on the committee from Alabama [Mr. RICHARDSON] ought to reprobate me in the serious manner that he does for the offense that I have committed. According to his own statement, my offense is that I now agree with him. I submit that it may make me liable to serious charge, but it ought not to come from the gentleman. [Laughter.]

Mr. Speaker, I want to call the attention of the House to the present situation of this proposed legislation. A bill came to us from the Senate. It did not contain one word with regard to telegraph operators. That bill without that provision in it has received the indorsement of the Democratic side of this House. Later it was shown to their satisfaction that its limitations were such and that it applied to such an inconsiderable number of employees—only those that were connected with a train that was carrying foreign or interstate freight or passengers, and none others—that they became convinced that it was not wise, although they had so heartily indorsed the measure, to continue to give it their favor.

I want to call attention to the further fact that no proposition, so far as I know, has been introduced to this House with regard to the class of employees that gentlemen are now so solicitous about—the telegraphers—until the 19th day of last January, and that the bill that was afterwards insisted upon and from which my friend from Pennsylvania has derived his inspiration was not introduced until the 28th day of January. I want to call attention further to the fact that no man, no society, no organization has by petition or otherwise asked for this legislation. I want to call attention further to the fact that when the gentleman who introduced the two bills that embodied this legislation distinctly appeared before the committee he utterly disclaimed that he represented anybody else than himself. He disclaimed speaking for anyone but himself. Mr. Speaker, isn't it singular that this matter should so suddenly have grown into one of such intense importance? This general legislation embodied in the Senate bill that we have amended has been pending before this Congress during the greater part of both of its sessions. The legislation proposed by the House has been con-

sidered month after month, meeting after meeting, and until within the last few days, less than a fortnight, no gentleman, so far as I now recall, has sought the legislation that our Democratic brethren are now so intent upon.

The bill that they gave their adhesion to, the bill that they reprobated us, the majority of the committee and the majority of this House, for not accepting did not contain one word upon this all-important subject. Why is it that there was such dereliction of duty? Why is it that there was such forgetfulness of this transcendent interest for all these weeks and months, and that now at last these gentlemen have become so intensely solicitous?

Mr. RICHARDSON of Alabama. Will the gentleman permit an interruption?

Mr. HEPBURN. I yield for a question.

Mr. RICHARDSON of Alabama. The gentleman read, I know, the minority report, and we accepted in that minority report the La Follette bill with certain amendments. We thought we could perfect the La Follette bill. I tell the gentleman this, that it meant the telegraphers' feature.

Mr. LITTLEFIELD. That did not say so.

Mr. HEPBURN. It is possible that that is what the gentleman meant.

Mr. RICHARDSON of Alabama. And we say that we accepted it.

Mr. HEPBURN. Much of what the gentleman says is open to infinite interpretation, and he may have said that; but, Mr. Chairman, that report did not propose an amendment to broaden and widen the scope of the main purpose of the bill, so as to take in any other employees engaged in the management of trains except those that "were engaged in the management of a train carrying interstate or foreign passengers or freights." They are content with that. That is all they asked. They proposed to go before the country on that and make the issue. We have saved them. We have saved them from the humiliation of pretending to give bread and offering only a stone, and my friend reprobates me because I have agreed with him upon some minor matters of inconsiderable difference, that I have agreed to in order to secure some kind of legislation. I have not seen a bill yet that entirely meets my approval, but I recognize the fact that in legislation we have to give and take. I can not expect to have my views as I would express them spread upon the statute books. I must modify my views so as to meet and conserve the wishes of other gentlemen. That is always the manner in which important legislation is secured—concession, compromise.

Now, Mr. Speaker, I again say that during all of this controversy, during all of the talk and argument pro and con, during all of the admission of proof that shows this legislation to be necessary, no man yet has presented an authenticated case where one human being upon a train of cars has lost his life because of the overworking of a telegrapher, and when I have challenged gentlemen to bring forward an instance upon this floor they are as dumb as though they never had the gift of speech.

Mr. RYAN. Will the gentleman permit a question?

Mr. HEPBURN. Certainly.

Mr. RYAN. Does the gentleman from Iowa believe that if that condition he suggests was so, that we ought to wait until a serious wreck occurred before we closed that door?

Mr. HEPBURN. Mr. Speaker, I do not believe it is wise and proper to inaugurate any legislation that may seriously disturb the great transportation industries of this country without there is some proof that that legislation is necessary. I do not believe in attempting to remedy an evil until we have some proof that the evil exists. As long as it is confined to the imaginations of men, as long as it exists only in the necessity of certain gentlemen under the stress and pressure of political exigency to get up a political issue, I am not going to respond to that until I know that the remedy that they seek is the righting of a wrong that is known to exist. Now, Mr. Speaker, the proposition of the conferees is to prohibit any dispatcher or his assistant or a person who issues orders for the management of trains continuing to labor for a longer period than eight hours. The proposition of the gentlemen in opposition extends that to nine hours. That is seemingly an extension only, because they work in three shifts, and eight hours will be the maximum. Those are the men charged with grave responsibilities; those are the men who suffer from the anxiety of having great responsibilities resting upon them. They are the men who are liable to make mistakes. Here is a train sheet involving the movement perhaps of fifty trains. They have to know the location and retain in their memories the location of each one of those trains. It is a great mental strain. The responsibility is great. The conference committee have subserved the interests of the public by seeing to it that these men do not labor for a longer period than eight hours.

Mr. MARTIN. Will the gentleman yield for a question?

Mr. HEPBURN. Certainly.

Mr. MARTIN. In practical operation, now, does any train dispatcher who issues orders work over eight hours?

Mr. HEPBURN. I think not.

Mr. MARTIN. Then we are not legislating on any real evil in that respect?

Mr. HEPBURN. We are not. We are simply enacting into law that which is to-day merely usage.

Mr. MARTIN. Is it not a fact in some of these instances which have been cited upon the floor the accidents have resulted from telegraph operators in some inferior position working overtime?

Mr. HEPBURN. I do not know of a single authenticated one; does the gentleman?

Mr. MARTIN. I understood the gentleman from Pennsylvania [Mr. WANGER] to cite a Colorado case, where a man was asleep at his post after working over eight hours.

Mr. WANGER. That was on the Denver and Rio Grande Railroad, a little over a year ago.

Mr. MARTIN. I understand, also, that the gentleman from Pennsylvania stated once upon the floor that he published a list of the accidents in connection with his remarks the other day, where the telegraph operators were working overtime.

Mr. HEPBURN. I have never yet, gentlemen, seen one authenticated case. The gentlemen take newspaper statements. They take the loose statements of agitators upon this subject. There is a great difference, it seems to me, between that kind of proof and the kind we ought to have when we are proposing to legislate. We ought to know something about its character.

Mr. MARTIN. Will the gentleman yield for another question?

Mr. HEPBURN. If it is in connection with this matter. If it is simply to gratify the gentleman's curiosity, I do not care to do so.

Mr. MARTIN. It is not my curiosity, but it is a desire upon my part—and I think it is quite common among the Members—to know the precise state of facts. Do I understand the position of the gentleman from Iowa, the chairman of this committee, to be that there is no danger of men in the position of telegraph operator working overtime, and no real difficulty for us to meet?

Mr. HEPBURN. There is no difficulty, in my judgment, that has been proven in any formal way, that I could cite. I know of no such cases. If the gentleman knows of one, I would like to have him testify now.

Mr. MARTIN. Mr. Speaker, the gentleman refers to me. I am not on that committee, and I have not been investigating these facts, but I supposed it was quite common knowledge.

Mr. HEPBURN. No knowledge of that kind has come to the committee.

Mr. MARTIN. I will say that while I have not knowledge to give I have opinions on the subject. I do not think any man who is required as part of his duties to pass dispatches for the control of trains, whether he originates or transmits these orders, ought to work over eight hours a day.

Mr. HEPBURN. Mr. Speaker, I do not know of any way by which we can legislate against the negligence and carelessness of the human agencies that must be used in these great transportation movements. We can not compel men to be diligent. We can not compel men to cease to be negligent. And I want to say here, Mr. Speaker, that I am not prepared to say, from the experiences that we have had, that legislation does produce the result that all of us desire to have produced. At last you have to rely upon the individual. It is not the corporations that are guilty of negligence; it is the servitor, it is the employee, that is always guilty of the negligence.

Mr. GAINES of Tennessee. Mr. Speaker——

Mr. HEPBURN. Mr. Speaker, I can not yield now.

We have engaged in much of legislation looking to the safety of the traveling public and of the employees through statutes that require the application of safety appliances to railways. I believe that that legislation was wise. I believe it ought to have resulted in benefit; and yet if gentlemen will investigate the reports they will find that the accidents, notwithstanding all of these safety appliances, increase from year to year in a more rapid ratio than does the increase in the business. It seems as if every effort made by the statutes to give men a greater measure of security relaxes their own watchfulness and makes them less and less diligent and careful. Whether that is an impulse incident to human nature I submit to you. But I state it as a fact, and the reports will bear me out in that statement.

After all, Mr. Speaker, we must rely upon the man himself and upon diligence, upon his idea of responsibility to his employer, to his business, to society. It is useless to legislate without we can invoke that spirit, and if it is true that under certain systems there is a constant relaxation of the feeling of responsibility, if the individual man is dying out under our systems, if he is less and less an individual, relying less upon himself and more and more a factor or a part of a social organization and relying upon it for his sustenance, his support, the maintenance of his position, I submit that those are questions worthy of consideration and for your consideration. I want to say further, Mr. Speaker, that under the provision as reported by the committee you will find this recommendation in addition to what I have read:

That no employee who by the use of a telegraph or telephone transmits, receives, or delivers orders pertaining to or affecting train movements, excepting those who issue train orders, or who is charged with the operation of signals or switches from towers, offices, or stations shall be required or permitted to be or remain on duty for a longer period than twelve hours in the aggregate in any twenty-four-hour period.

Now, that includes all of those men who are engaged at the important stations, where there are many trains passing, where there are many orders being received and transmitted. A great majority, the large majority, nearly all of those who are intrusted with the transmission of important orders are within the provisions of the bill. Then there is another class, not provided for in the bill as recommended by the conferees, but is included in the proposition of instruction. That is all of those men who are at the little stations where trains infrequently stop, or on the feeder roads, small roads, where they are but infrequently called upon to perform duties. There are in the county in which I live eleven of those stations. It so happens that in a great majority of them there is an early train and a late train—6 o'clock in the morning and 9 o'clock at night. There is but one man there. Yet he is not employed five hours a day, although he is required to be there. On some of those roads, at some of those stations, there are usually but two or three freight trains and two or three passenger trains pass the station each way in each twenty-four hours. Is it wise to compel the people to pay—for they pay in the end—for an extra man there? These men are never oppressed by labor; they never become incompetent because of excessive hours, and yet the proposition would require that there shall be a second man to help that man perform five hours of duty in each twenty-four. I ask for a vote.

Mr. DAVEY of Louisiana. I yield to my colleague on the committee [Mr. ADAMSON].

Mr. ADAMSON. The essential difference between us is as to the classification of the train dispatchers and operators in their treatment as proposed in this legislation. The conference report fixes eight hours for the train dispatcher and those in his office and twelve hours for the men at the stations along the line. That is ridiculous folly. These officers are responsive to one another; their duties are reciprocal. For the train dispatcher and his operator to be asked to send messages along the line to men who are overworked and asleep and can neither receive nor answer messages is a consummation of folly.

I admit, Mr. Speaker, that it is not cross-ties, iron, nor charters of corporations that are wrong, but human nature that must be controlled. Avarice operates upon workmen just as on stockholders and bondholders, and the way to protect the safety and lives of travelers is to put the strong arm of the law upon the corporation in the form of taking away some of the profit accruing to the human nature that owns the stocks and bonds through the wrongs the corporations are permitted to do. If you limit the hours at all, it should apply alike to the train dispatchers and the operators all along the line of traffic—the men who handle the messages which control the trains and the safety of passengers and of the operatives. In that way, and in that way only, can we secure effective legislation, and that is what we are trying to secure and not prevent.

Mr. DAVEY of Louisiana. I yield to the gentleman from Missouri.

Mr. MURPHY. Mr. Speaker, the gentleman from Iowa says that no society or organization has asked for or demanded this legislation. I want to ask him if, as Representatives of the people, we are to wait for them to send us an invitation on a silver platter asking for the legislation that the people of this country ought to have? Look at the accident reports. The last of the bulletins of the Interstate Commerce Commission that have been issued, officers of this Government, show that 179 people have been killed and 782 have been injured as the mistakes of telegraph operators. Then tell me that the Congress of the United States ought not to sit up and take notice! Yet the gentleman says there is no record of any operator having worked overtime and caused a wreck by having worked overtime. Why have we not any records? It is because the railroad companies have failed or refused to give the number of hours to the Interstate Commerce Commission that an operator works. Let me call your attention to the fact that the last accident in the last bulletin issued by the Interstate Commerce Commission shows that seventeen were killed and fifty-six injured by "confusion of orders, mistake of a telegraph operator." Let me tell you, sir, as I was coming on here to Congress, at 3.40 a. m. I went into a telegraph office in Missouri. The operator had two train orders lying upon his table. As he sat there the engineer gave four blasts of his whistle from a train approaching the station to attract the attention of the operator, as required. The engineer must see the semaphore move from an angle of 45° to an angle of 15° or see the red light change to a clear light. He gives four blasts of the whistle and the operator manipulates the signal. The operator was sitting in his chair. I did not notice that he was asleep. He jumped and pulled in the signal and I went and threw it out myself, having had eight years experience as an operator and knew what it meant.

Mr. HEPBURN. Permit me to ask the gentleman if he was on duty at the time?

Mr. MURPHY. He was on duty. He had been for eight months, from 7 o'clock at night until 2 o'clock in the morning. When that train came in he delivered one of those orders and left the other one on the table. I called his attention to the fact, and he gave them the other order, and went out on the platform, loaded his baggage and express, and then hallooed at the conductor and said: "I have got two orders in there for you." He did not know that he had delivered the orders to him. And he is an honest, upright, sober man, 23 or 24 years of age.

Mr. HEPBURN. And he had been on duty eight hours?

Mr. MURPHY. He had been on duty twelve hours every night for eight long months. Let me tell you of my own experience as an operator. I was at a place handling forty or fifty orders each night. Along in the morning about 4 o'clock, overcome by weariness, I let a passenger train out without delivering two orders for that train, when the orders lay upon my table. There would have been a collision except for the fact that without notifying the dispatcher I called up the next station and stopped the train, and then told the dispatcher about it. An operator working under me, while manager of an office, on duty twelve hours a night, let out a passenger train going west out of Springfield, Mo., at 5 o'clock in the morning, having been on duty since 7 at night, causing a collision between the passenger train and a freight train.

[Here the hammer fell.]

The SPEAKER. The question is on agreeing to the motion of the gentleman from Louisiana [Mr. DAVEY].

The question being taken, the motion was agreed to.

The SPEAKER announced as conferees on the part of the House Mr. HEPBURN, Mr. WANGER, and Mr. ADAMSON.

### ANNUAL REPORT OF THE DIRECTOR OF THE MINT.

Mr. CHARLES B. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 257, authorizing the Secretary of the Treasury to print 1,000 additional copies of the annual reports of the Director of the Mint.

The joint resolution was read, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he is hereby, authorized to have printed 1,000 additional copies of the Annual Report of the Director of the Mint on the operations of the mint and assay offices for the fiscal year ended June 30, 1906, with appendices, and 1,000 additional copies of the Annual Report of the Director of the Mint on the production of precious metals for the calendar year 1905, with appendices, and that hereafter there may be printed, in the discretion of the Secretary of the Treasury, for distribution by the Treasury Department, 2,000 copies of said reports instead of 1,000 copies as heretofore.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

### SESSION LAWS.

Mr. CHARLES B. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 256, authorizing the Attorney-General to print 850 copies of the session laws.

The joint resolution was read, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Attorney-General be, and he is hereby, authorized to have printed, for distribution by the Department of Justice, 850 copies of the Session Laws, and of the Statutes at Large, in lieu of 500 copies of each as now provided by law.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

ANNUAL REPORT OF COMPTROLLER OF THE CURRENCY.

Mr. CHARLES B. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 219, providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency.

The joint resolution was read, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That section 73 of an act "Providing for the public printing and binding, and the distribution of public documents," approved January 12, 1895, be, and the same is hereby, so amended as to authorize the printing annually hereafter of 10,000 copies of the Annual Report of the Comptroller of the Currency, for distribution by the Comptroller of the Currency, instead of 7,000 copies as heretofore.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time; and was accordingly read the third time, and passed.

SECOND-CLASS MAIL MATTER.

Mr. CHARLES B. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution No. 255, providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session.

The joint resolution was read, as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That there be printed and bound in paper covers 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session, relating to second-class mail matter, 1,000 copies for the use of the Senate, 2,000 copies for the use of the House of Representatives, and 2,000 copies for distribution by the Post-Office Department.

Mr. MANN. Mr. Speaker, reserving the right to object, I should like to ask the gentleman what this is?

Mr. CHARLES B. LANDIS. I yield to the gentleman from Indiana [Mr. OVERSTREET].

Mr. OVERSTREET of Indiana. Mr. Speaker, this proposes the printing of additional copies of the report compiled under authority of Congress of the weighing which occurred during the six months ending December 31, when the second-class mail matter was weighed. It is a very important tabulation and it is demanded by the public throughout the country.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 16235. An act authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.

The message also announced that the Senate had passed joint resolution and bills of the following titles; in which the concurrence of the House of Representatives was requested:

S. R. 98. Joint resolution granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany;

S. 1796. An act granting an increase of pension to Edith Burt Trout;

S. 6175. An act granting an increase of pension to Neoline H. Ash; and

S. 7845. An act granting a pension to Lola B. Hendershott and Louise Hendershott.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 8189) granting to the St. Louis, Iron Mountain and Southern Railway Company, a corporation, the right to construct, maintain, and operate a single-track railway across the lands of the United States in the southeast quarter of the northeast quarter of section 21, township 14 north, range 6 west of the fifth principal meridian, in the county of Independence and State of Arkansas, reserved for use in connection with the construction of Lock No. 1, Upper White River, Arkansas; and

S. 6249. To provide for the establishment of an agricultural bank in the Philippine Islands.

The message also announced that the Senate had passed with amendments bill of the following title; in which the concurrence of the House of Representatives was requested:

H. R. 24043. An act to authorize the sale of timber on certain of the land reserved for the use of the Menominee tribe of Indians, in the State of Wisconsin.

DISEASES OF HORSES.

Mr. CHARLES B. LANDIS. Mr. Speaker, I ask unanimous consent for the present consideration of House joint resolution 229, to provide for the printing of 250,000 copies of the special report on the diseases of horses.

The Clerk read the joint resolution, as follows:

*Resolved, etc.*, That there be printed and bound in cloth 250,000 copies of the special report on diseases of horses, with accompanying illustrations, the same to be first revised and brought to date under the supervision of the Secretary of Agriculture, 175,000 for the use of the House of Representatives, 60,000 for the use of the Senate, and 15,000 for the use of the Department of Agriculture.

The SPEAKER. Is there objection?

There was no objection.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

BOUNDARIES OF NAVAL RESERVE, PORTO RICO.

Mr. DAWSON. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8119) to readjust the boundaries of naval reserves in Porto Rico, established in pursuance of the act of July 1, 1902.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the President be, and he is hereby, authorized and empowered, by proclamation giving specific description thereof by metes and bounds or otherwise, to cede, transfer, and convey to the government of Porto Rico, to be held and disposed of for the use and benefit of the people of said island, such portions as are not needed for naval purposes of the tract of 80 acres of public land lying along the Caguas road, city of San Juan, P. R., heretofore, by paragraph marked 1 of the Executive proclamation of June 26, 1903, reserved for the use of the United States in pursuance of the provisions of the act of July 1, 1902: *Provided*, That before such cession shall be made the government of Porto Rico shall, by proper authority, cede, convey, release, and transfer to the United States the following tracts of land, together with all buildings and improvements thereon: That tract or parcel of land, containing about 11 acres, extending east from the new wireless station, between the north line of the survey heretofore made by the Navy Department and the south line of the military reservation, to the tract of 4.59 acres belonging to and reserved by the insular government for jail or penitentiary purposes; also, that triangular tract or parcel of land containing 0.7 of an acre, lying to the northward of the western portion of the present naval hospital reservation, extending to the Army reservation line, also, all public lands of Porto Rico south of the scarp wall on the Barrio de la Puntilla.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. DAWSON, a motion to reconsider the last vote was laid on the table.

PENSION APPROPRIATION BILL.

Mr. GARDNER of Michigan. Mr. Speaker, I call up the conference report on the pension appropriation bill.

The SPEAKER. The gentleman from Michigan calls up the conference report on the pension appropriation bill. The Clerk will read the report.

The Clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 24640) making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendments of the Senate with a further amendment as follows: After the word "dollars," on page 4, line 6 of the bill, insert the following:

"*Provided*, That the Secretary of the Interior shall make inquiry and report to Congress at the beginning of its next regular session the effect of a reduction of the present pension agencies to one such agency upon the economic execution of the pension laws, the prompt and efficient payment of pensioners, and the inconvenience to pensioners, if any, which would result from such reduction.

"This provision shall not be construed as interfering with or limiting the right or power of the President under existing law

in respect to reduction or consolidation of existing pension agencies."

And the Senate agree to the same.

P. J. MCCUMBER,
N. B. SCOTT,
JAS. P. TALIAFERRO,
*Managers on the part of the Senate.*

WASHINGTON GARDNER,
W. P. BROWNLOW,
JOHN A. SULLIVAN (dissenting),
*Managers on the part of the House.*

Mr. GARDNER of Michigan. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The question is on the motion of the gentleman from Michigan that the conference report be agreed to.

Mr. MANN. Mr. Speaker, will the gentleman tell us what the report is, whether the House backs down or not?

Mr. GARDNER of Michigan. Mr. Speaker, the report involves a number of amendments, most of which grew out of the enactment of the so-called "McCumber law." There was an addition made because of that law of $8,000,000, making the sum total $145,000,000, to which the conferees of the House assented. Another amendment resulting from that law was the reduction of $100,000 from the appropriation to pay pension examining surgeons, as it was believed that the enactment of the law named would result in a very material decrease in the number of pensioners receiving medical examination for increase. Another very important amendment to the pension appropriation bill, which was overlooked by the author of the McCumber law, makes pensionable under the provisions of that law certain classes of persons who would otherwise be ruled out—for instance, men who served in the Confederate army and subsequently served for ninety days or more in the Union army, enlisting before the 1st of January, 1865. Another was that men who served in the Mexican war and subsequently in the Confederate army should be beneficiaries under the McCumber law; another, relating to certain militia in the State of Missouri and the State of Arkansas who were not pensionable under the original law pensioning Mexican war veterans who did not serve in Mexico neither with the Army nor with the Navy, nor were en route to Mexico, but who were sent to the frontier and served there during a portion of that war and by such service released regulars who did go to Mexico because of the service of this militia, and these are given a pensionable status under this law by an amendment.

Mr. WANGER. Is that the same as the law has been under the act of 1890 as amended?

Mr. GARDNER of Michigan. Yes; another was the Missouri State Militia, never mustered into the United States Army, but who did good service during the civil war as militia and who served ninety days or more in the Union Army.

Mr. STERLING. May I ask the gentleman a question?

Mr. GARDNER of Michigan. Certainly.

Mr. STERLING. Why is that limited to the militia of Missouri? There were militia in a number of States that served, I have no doubt, just as faithfully, and I see no reason for the distinction between the militia of Missouri and any other State.

Mr. GARDNER of Michigan. The only reason I can allege is this: That this militia named from Missouri are all pensionable under laws that are now upon the statute books, and are simply transferred, or rather made eligible, as beneficiaries of the so-called "McCumber law."

Mr. MANN. The gentleman does not want to state that all Missouri militia were provided for under the existing pension laws?

Mr. GARDNER of Michigan. Militia that has already been recognized and that are now receiving pensions under laws previously enacted in this House.

Mr. MANN. A large portion of them have never been recognized in that way. Does this extend the law to them?

Mr. GARDNER of Michigan. Oh, no.

Mr. KEIFER. I wish to suggest that the militia that is recognized as pensionable in the State of Missouri does not include all of the militia of the State of Missouri, but only such as performed service in the field and within the limits of the theater of war and for the period of time mentioned.

Mr. STERLING. Were there any militia in other States that did active service?

Mr. KEIFER. Oh, Ohio, Pennsylvania, and everywhere.

Mr. STERLING. Did actual service in the field?

Mr. KEIFER. Well, we had what we called the Morgan raid militia and all that in Ohio, but they did not come within the rule. They were called out for a particular occasion. They did not come within the same rule that has been applied all along to these Missouri militia. They were entitled to have been mustered in, and in a certain way, but it was neglected, and they went into the field and performed their service like other volunteer soldiers. We have been making the distinction right along with reference to those and, I think, some from Arkansas who performed similar service.

Mr. LACEY. Will the gentleman from Michigan yield to a suggestion in that connection? There were three kinds of Missouri militia—the Provisional Missouri Militia, the Enrolled Missouri Militia, and the Missouri State Militia. The service of the Missouri State Militia was practically the same as the service of any volunteer soldier in the field, and that particular class has been always recognized the same as the Michigan volunteers or the Ohio volunteers.

Mr. KEIFER. The other militia of that State does not come in under this?

Mr. LACEY. No; there were a few others who had temporary service and paid through the Hawkins Taylor Commission, and where they were paid by the Government through the Hawkins Taylor Commission more than ninety days they came under the act of June, 1890.

Mr. KEIFER. In that special case; but they were not in the general militia called out.

Mr. BURLESON. Did I understand the gentleman from Michigan to say under the provisions of this appropriation bill that a class of soldiers that have not heretofore had a pensionable status are given a pensionable status?

Mr. GARDNER of Michigan. No, sir; it does not give any soldiers or bring them within the possibility of being pensioned who are not now on the pension roll or may be if they apply.

Mr. CAMPBELL of Kansas. May I ask the gentleman from Michigan a question? What was done with the matter of the consolidation of the pension agencies?

Mr. GARDNER of Michigan. I am coming to that.

Mr. KEIFER. You have spoken of Arkansas.

Mr. GARDNER of Michigan. Arkansas was covered in with the Missouri troops. Mr. Speaker, the only point of serious difference between the conferees of the two Houses, and over which we had a number of protracted conferences, was upon the consolidation of the pension agencies. It will be remembered by gentlemen of the House that for the greater part of two legislative days that matter was quite thoroughly discussed and that finally by a very large majority this House decided to reduce the agencies to one, but did not, I may say in passing, decide that that one agency should be located in the city of Washington, as has been alleged elsewhere. That is an inference that might possibly be made from the discussion or from some things said by Members on the floor of the House; but there was no statement in this bill as passed as to where that agency should be located. One of the objections on the part of the conferees of the coordinate body was against consolidating Federal business in this city where it could be avoided. We owe it to the House to make this word of explanation. The contention of the conferees on the part of the House was purely in line with the discussion here and with the action of the House, basing that upon the fundamental principle, first, it appeared to us that consolidation could be made without seriously impairing the efficiency of the service; that while the pensioners might, in the process of readjustment and in receiving their first payment, suffer a little delay, that after the first payment they would get their pensions as regularly and as promptly in the intervals of time as they do now.

The second affirmative contention on the part of the House was that this consolidation would result in a material saving in the administration of the pension agencies, reasoning that if in the largest agency we have—namely, at Topeka, Kans.—it cost but little more than half as much to pay the pensioners in that agency as it does to pay them at Augusta, Me., the smallest agency, that therefore if you consolidate all the agencies in one you can pay the whole from a central agency cheaper than you could pay them from eighteen different agencies.

Mr. KEIFER rose.

Mr. GARDNER of Michigan. Allow me to make my statement and then I will hear you. We based our contention upon hearings with the Pension Commissioner, who is plainly in evidence that there would be an annual saving in the neighborhood of $200,000 by this consolidation. The conferees of the other body put up the negative contention, first, that it would materially inconvenience the pensioner, particularly those who made an error in executing their vouchers, and delay in sending the vouchers to the central agency, wherever it might be located, and in returning them corrected, and for that reason it was not advisable, from the standpoint of convenience to the pensioners, to consolidate the agencies. The next negative contention was that it would

not result in a material saving. Indeed, it was asserted it would not result in any saving at all by a portion of the conferees, and they based that upon this declaration, that the cost of the clerical force in the city of Washington would be so much greater than the cost of the clerical force in the smaller cities of the country that the difference in the payment of these clerks would more than make up the difference in the saving from having but one agency.

And there we rest, so far as those two are concerned.

Now, there was another element which entered into the discussions of the conferees. Because of the passage of the so-called "McCumber law" on the 7th of February, having had consideraton and passage in this House after the passage of the pension appropriation bill, it was contended on the part of the conferees of the other body that that law injected a new element into the discussion since we had our hearings in the House and that it would not only very materially increase the work of the Pension Bureau, but that it would very materially increase the work at the several agencies. In support of that, the number of applicants coming in under that law, I am credibly informed, runs from 10,000 to 20,000 per day. More than a hundred thousand are lodged here now. On newspaper authority I make the statement that there are at this time 60,000 unopened letters down at the Pension Bureau. What is the effect of that upon the pension agents? That is the first consideration in this discussion. All the pension agents have to do is to change the amount on the pensioner's record from what he receives now to twelve or fifteen or twenty per month, as the case may be. A reasonably industrious clerk could make the change in a thousand of those names in a single day. It was contended that the law of February 7, 1907, would materially increase the aggregate number of pensioners. Yesterday the Pension Commissioner said that so far as they had now received applications under that law the increase would be very small; that the per cent would probably not go beyond 3. That is, it shows that what is called the "unknown army" of nonpensioned soldiers is at this time very small. These were the material points in dispute. The House conferees maintained that it would not greatly increase the work at the agencies, while it was granted it would materially increase the work at the Bureau, which had nothing to do with that at the agencies.

Mr. KEIFER. I want only a minute or two.

Mr. GARDNER of Michigan. I have not gotten through yet. Now, we harmonize the points of difference by this amendment, namely, that the Secretary of the Interior should between now and the first session of the next Congress present a carefully prepared statement as to the probable, if any, saving by the consolidation of the agencies into one. Secondly, a carefully prepared statement as to the probable inconvenience to the pensioners, so that we will have the economy of administration and the convenience or inconvenience of the pensioners presented officially by the Secretary of the Interior under the amendment insisted upon by the House conferees and accepted by the conferees of the other body. That, gentlemen, is substantially the report of the House.

Mr. KEIFER. I wanted a minute or two.

Mr. GARDNER of Michigan. And I may say, pending that report from the Secretary of the Interior the agencies will remain as they are now.

Mr. KEIFER. The gentleman has stated the fact that is all important at the last. It is not in this conference report, as I understand it.

Mr. GARDNER of Michigan. How much time does the gentleman want?

Mr. KEIFER. Two or three minutes, and not more.

The gentleman has stated they propose to restore the agencies. There is nothing in the conference report of that kind, as I understand, except that we appropriate the money to pay the eighteen agencies as before—the President having the right now to reduce the number if he chooses—leaving it as it is. This House, in one of its peculiar ebullitions, when it was not satisfied with the report of the Committee on Appropriations which proposed to report an appropriation of $36,000 for nine instead of eighteen agencies—some gentlemen in the House wanted to save their agencies—voted to appropriate only for one, and that is all we did, and we did not mean to do that, for we were not in favor of it at the time, as everybody well remembers. And I congratulate the conference committee in doing what they have done, and which should have been done, perhaps, in the first place.

Mr. GARDNER of Michigan. Mr. Speaker, I yield time to the gentleman from Massachusetts [Mr. SULLIVAN], the minority member of the committee of conference.

The SPEAKER. How much time does the gentleman yield?

Mr. GARDNER of Michigan. Such time as he may choose up to a half hour.

Mr. SULLIVAN. Mr. Speaker, I desire, on behalf of some Members of this body who are constitutionally opposed to plunder and graft, to record my protest against the adoption of this conference report. The conference report, if it be adopted by the House, will not change the present situation. It will add no powers to those already possessed by the President for the consolidation or reduction of these agencies; neither will it take from him any power which he now possesses. It simply clothes the Secretary of the Interior with authority to make inquiry and to report the facts of the situation to Congress for its action at its next session. But the folly of the legislation, it seems to me, consists in this: That we are to investigate a subject upon which we know the facts now. We know that they have been given to us by the highest authority in the country, by the Government expert who is at the head of the Bureau charged with the duty of executing the law. The Secretary of the Interior is the Commissioner of Pensions for the purpose of ascertaining the facts and reporting them to Congress. No one believes that the Secretary of the Interior will make an independent investigation apart from the Pension Commissioner, and all must concede that the Pension Commissioner will ascertain and report the facts to the Secretary of the Interior, who in turn will report these facts to the Congress.

Now, the facts have been ascertained. They have been submitted by the Pension Commissioner, and his conclusions upon those facts have been submitted to Congress in two successive years. In order that this House may get a full view of the foul and loathsome figure of graft which is brought into this body in the shape of this conference report, I will ask the House to bear patiently with me while I read the recorded statements of the Pension Commissioner upon this question.

In the first place, one year ago, on the 19th of January, 1906, the Pension Commissioner appeared before the Committee on Appropriations and was asked by the chairman of the subcommittee this question:

Mr. GARDNER. I would like to ask, Mr. Commissioner, what is the necessity of having eighteen pension agencies?

Mr. WARNER (the Commissioner). None whatever; they ought to be reduced to six. That could be done by an Executive order.

Again, the question was asked:

What is the necessity of having two agencies in the State of Pennsylvania, two in the State of New York, when these two pay less than a single agency in Ohio, and much less than a single agency at Topeka, Kans.?

The COMMISSIONER. If I had the power I would decrease the number of agencies in the United States to six.

Again, in answer to another question, the Commissioner said:

The Chicago agency could take the place of five or six agencies out there in the West.

Then Mr. GARDNER of Michigan made this contribution:

Take for instance the pension agencies. Here Boston, Mass., disburses $7,000,000; Augusta, Me., $2,000,000.

Then, asked Mr. GARDNER of Michigan, who submits this conference report to-day—

What is the use of paying a man $4,000 in Augusta to pay out $2,000,000, when the Boston man could do it just as well?

There is no need of a pension agency at Augusta.

Mr. WARNER. No; about twelve of them ought to be knocked out.

Again, Mr. LIVINGSTON, of the committee, asked that a footnote be appended to the record that the agencies should be reduced to six.

Mr. Warner replied:

Six is not too big a cut.

Then a motion was made at this juncture to reduce these agencies by act of Congress, and the suggestion was made that it would be better to confer with the President, inasmuch as he had the power to effect a consolidation without the aid of Congress. That suggestion was acted upon. The President was consulted; the Congress adjourned, and the President failed to consolidate these agencies.

Now, that is the record of last year. A year passed by and the Commissioner of Pensions came again before the Committee on Appropriations. The chairman of the committee [Mr. GARDNER], in his opening question, said:

I would like to have any general statement as to the work and condition of the Bureau, or any suggestions you may have to make concerning the work of your Bureau, and what you would like to have brought before Congress, if anything.

Mark you, gentlemen, this is one year after the Commissioner had stated solemnly that these agencies might be reduced to six without impairing the efficiency of the service or taking from the convenience of the soldier.

The Commissioner answered:

I have not anything to say with reference to the work of the Bureau. It has been very satisfactory during the last year. We are getting the work up to date; everything is going along smoothly. I have no complaint to make of the organization or laws or anything else, so far as that is concerned. *There is only one point; that is the question of the agencies for the payment of pensions throughout the United States.*

This was the single suggestion of paramount importance made by the responsible officer of the Government to the committee having the power to appropriate in the premises. He goes on to say:

That is within the control of the President as to the number of them. There are now eighteen, and I think it would be good policy to reduce the number to nine anyway.

Mr. GARDNER. Yes; we had that matter under advisement a year ago. Have you any recommendation to make in that respect?

Now I ask the House to pay attention to the answer of the Commissioner, because it is a very illuminating one. Perhaps it discloses the reason for the surrender of principle upon this question by the Congress of the United States:

Mr. WARNER. It is entirely within the control of the President. I would recommend that the number be reduced from eighteen to nine, but of course it is an embarrassing proposition. There are eighteen agents, at $4,000 salary each, scattered around over the United States, and Senators and Representatives are interested in them, etc. *You do not have to tell a Member of Congress what that means.* I think it would be economy in policy to reduce the number to nine. It could be reduced to six.

There, gentlemen, you have in two successive years the grave assertion by the Commissioner that these agencies could be reduced to six. So much for the question of economy.

Now I come to the second important consideration—that of efficiency. Mr. BROWNLOW, a member of the committee, asked concerning the proposed reduction:

Do you think that would improve the efficiency of the service?

Mr. WARNER. I think it would *benefit the efficiency of the service*, because you can do business better with *one man than with three*, and you can do business better with *nine than eighteen agencies. You can enforce policies better with nine than with eighteen.* You do not have so many people to communicate with. The checks and vouchers would be made all the same then. As it is now, we have separate checks for each agency with the agent's name printed in them, and a separate voucher for each agency. That is eighteen. If there were nine we would only have to have nine different forms. If there was *only one* we would *only have one form*, and save expense in printing and in every way.

Now, the answers of the Commissioner have made clear two things upon which the action of Congress should depend. First, the economy; second, the efficiency under the plan of reduction. I now come to the third consideration, which is the final and ought to be the controlling one. The Commissioner was asked by Mr. KEIFER, a veteran of two wars, always extremely solicitous for the welfare of the old soldier, this question:

How about the question of convenience to the pensioners?

Mr. WARNER. It would make very little difference. The first payment would be delayed probably in some cases. The pensioners are paid every three months. I estimate a saving of at least $100,000 a year if you consolidate them into nine agencies. They could be consolidated into six, but nine would probably be low enough.

Mr. KEIFER asked the further question, because he is deeply solicitous for the convenience of the old soldier:

How would you change the date of paying the pensions? Is not that provided for in the service?

Mr. Warner meets this objection in this way:

We would fix the localities so that the agency would pay them at the same time as they are paid now.

Then he goes on to explain the manner, and in a letter which he was invited to submit to the committee, he unfolded a scheme of consolidation which would reduce the number to nine. In that letter he reiterates his former statement. I will read briefly:

It is believed that the number of pension agencies could be reduced one-half anyway.

So much, gentlemen, for the record of the answers of the responsible Republican official who is charged with the duty of executing this law so as to promote the convenience of the soldiers and save the money of the taxpayers of the United States. They disclose complete evidence that the reduction would make for economy and efficiency without inconvenience to the pensioners.

Now, because of the answers of that official, the Appropriations Committee recommended a reduction of nine agencies. It would have made an attempt to consolidate all into one if it had felt sufficient faith in the House to warrant it in engaging in that enterprise, but it felt it would encounter the opposition of Representatives from the States where these agencies were located, and that the opposition would be diminished if some of the agencies were permitted to stand. But the committee was mistaken in its strategy. It discovered on the floor that many Members who were unwilling to have any economy effected would prefer, rather than lose their own agencies, to strike down the remaining agencies, so that all would stand on the same plane and none be discriminated against. And so the House almost unanimously voted to consolidate these agencies into one.

Now, what happened to change the verdict of this House, founded upon two days of careful deliberation and full discussion and upon the record of two years' hearings containing the statements of an official whose integrity and ability and knowledge in the premises have never before been successfully impeached? The bill left this Chamber, it went to the Senate Committee on Pensions, and they stated to us in conference that the Pension Commissioner did not appear before them. There is not a single line of printing which discloses any hearing before that Pension Committee. The Pension Committee of the Senate reported the bill to the Senate without one word of debate, and these agencies which we proposed to strike out were placed back in the bill, and the Senatorial patronage was preserved to that honorable body. [Applause.]

Now, then, I say that no argument was addressed to the House conferees. Excuses were made, but they could not be dignified by calling them arguments. The reflect no credit upon the intellectual integrity of the gentlemen who stooped to utter them and sought to have them prevail as arguments addressed to the intelligence of honest men. The excuse advanced was that the McCumber pension bill would add new pensions to the list, and that we ought not to inconvenience and delay the old soldiers by consolidating these agencies at this time. It was pointed out to the Senators that they were confused as to the duties of the Pension Bureau and the pension agency, but instead of acknowledging their error when it was made manifest they clung to the subterfuge that it would cause delay and inconvenience to the old soldiers.

But if we take their argument at its face value—that new men would be put upon the list—it would follow from that only that new clerks would have to be provided; it would not follow that they would have to be placed in eighteen separate agencies, but it would follow that they could do that work in Washington in a single agency. It is not the pension agent who performs the clerical work which will be added by reason of the extension of the list under the service-pension law; it is the clerk who will perform that work. And, mark in that connection an answer by the Pension Commissioner before the Appropriations Committee where he says that it would make for efficiency, that you could do the work better and more promptly in one agency than you could do it in eighteen.

Now, if we attached any value to the argument that the old soldier would be delayed if seventeen agencies were abolished, it would seem that in the interest of economy some suggestion would proceed from the gentlemen on the other side of the Capitol to cut down some of the agencies—that we would leave them standing at nine at most—because no man can assert that even with the additional work nine agencies could not perform the whole of it successfully. But not one single suggestion of compromise in the direction of economy proceeded from that side of the conference. How does it happen, Mr. Speaker, that the very principles upon which this Government must depend if it is to endure, the principles of economy and efficiency in the public service, are disregarded so lightly by men who sit at the other end of this Capitol? I think I know the reason. There are eighteen agencies in question, and seventeen are sought to be abolished. They are located in sixteen States of the Union. These States are represented by thirty-two Members—that is, more than one-third of the total representation and more than one-half of the number who voted upon the proposition—and it was because of the large proportion of that body that was interested in preserving the integrity of their political machines at home that the vote of the House was disregarded in the Senate without one jot or tittle of debate.

Now, Mr. Speaker, appropriation bills leave this House and they go to the Senate where, with scanty or no debate, millions are added upon the ipse dixit of this man or that man who sits in that Chamber, and the House is continually compelled to submit and acknowledge in shame and humility its inferiority to the other branch of the legislature.

Without violating any secret of the conference committee, I must say candidly that the House was treated with contumely from the beginning; that the statement was boldly made that there would be no recession, that we must take the Senatorial mandate, and thus has this House had forced upon its unwilling

membership the stern decree of a compact body that determined at all hazards to preserve its patronage.

Now, in the light of these events, how can reform in the public service ever be accomplished if the House will continue supinely to submit to the mandate of the gentlemen who sit at the other end of the Capitol? I maintain that no question has been submitted in this Congress in which so plainly an economy was shown to be possible as in this particular case.

The House committee proposed something which would save to this Government $259,000 a year if we abolished seventeen of these agencies. It would save $104,000 a year if we abolished only nine of them. Yet we are compelled, as representatives of the people, charged under the Constitution with the duty of conserving the money of the taxpayers of the nation—compelled by another body, without debate or deliberation, to violate our oaths of office and squander the money of the people in order that honorable gentlemen at the other end of the Capitol may maintain the loathsome carcass of Federal patronage through the destruction of every decent principle of honesty and efficiency upon which the edifice of this Government was reared and in the observance of which only this Government can be maintained. [Applause.]

Mr. Speaker, I have made this address, which, I suppose—such is my faith in the desire of certain Members here to preserve the Senatorial patronage undiminished—will be regarded as purely academic.

I am sorry for the taxpayers of the nation that while there is yet power to save $250,000 an honest, sober argument of a man who is in earnest must, perforce, be treated as an academic discussion, but I will give at least to some conscientious Members of this body an opportunity to record their protest against the most infamous grab at the public funds which has been attempted during the sessions of the Fifty-ninth Congress, and to that end I call upon those who are still faithful to the great majority out of whom the taxes are collected, who do not believe that government should find its origin and its end in the obedience to the wishes of a few Federal officials who desire to retain their salaries, to stand up to-day for honesty and good conscience, to vote down this conference report, to ask for a new conference, and let the House then give proper instructions to its conferees asserting its dignity and its power once more for the purpose of preserving the principles of honest government. [Prolonged applause.]

I append hereto a copy of a letter from Commissioner Warner to the gentleman from Michigan [Mr. GARDNER]:

DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
*Washington, January 18, 1907.*

Hon. WASHINGTON GARDNER,
*Chairman Subcommittee on Appropriations,*
*House of Representatives.*

MY DEAR MR. GARDNER: Replying to your request for a statement relative to the annual cost of paying pensions under the present system of eighteen agencies, and whether the number of agencies may be reduced, and what economy would result from said reduction, I have the honor to advise you as follows:

The total annual cost of paying pensions under the present system of eighteen agencies is as follows:

| | |
|---|---|
| Salaries 18 agents, at $4,000 each | $72,000 |
| Clerk hire | 435,000 |
| Rent | 4,500 |
| Contingent expenses | 30,000 |
| Vouchers, roll books, and other incidental expenses | 20,000 |
| Total | 561,500 |

Under the present system the average annual cost of payment is about 53 cents per pensioner. This cost varies in accordance with the number of pensioners paid at each agency. At the Topeka agency—which is the largest in the United States—the annual cost is about 40 cents per pensioner, while at the Concord agency—which is the smallest—the cost is 74 cents per pensioner. The number of clerks required at the Topeka agency is 39, or an average of one clerk to every 2,900 pensioners, while at the Augusta agency the proportion is one clerk to every 1,477 pensioners. Payments are made as promptly at the larger as at the smaller agencies. During quarterly payment, on an average, 14,000 pensioners are paid each day at the larger agencies, such as Topeka.

It is believed that the number of pension agencies could be reduced one-half without any inconvenience to any pensioner or prejudice to the service in any way. This reduction might be brought about by abolishing the following agencies: Augusta, Concord, Des Moines, Detroit, Knoxville, Louisville, Milwaukee, New York City, and Pittsbrug.

By this arrangement the Augusta and Concord agencies are consolidated with the Boston agency, and all pensioners paid at Boston; the Buffalo and New York City agencies are consolidated and all pensioners paid at Buffalo; the Des Moines and Topeka agencies are consolidated and all pensioners paid at Topeka; the Detroit and Indianapolis agencies are consolidated and all pensioners paid at Indianapolis; the Knoxville, Louisville, and Washington agencies are consolidated and all pensioners paid at Washington; the Milwaukee and Chicago agencies are consolidated and all pensioners paid at Chicago, and the Pittsburg and Philadelphia agencies are consolidated and all pensioners paid at Philadelphia. Under this plan the northern counties of New Jersey, which are now paid by the New York City agency, would be transferred to the Philadelphia agency, and all Navy pensioners in the State of Kentucky, who are now paid by the Chicago agency, would be transferred to the Washington agency.

Under this consolidation there would be the following agencies, districts to be paid, and number of pensioners paid:

| Agency. | District. | Number of pensioners. |
|---|---|---|
| Boston | Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont. | 94,229 |
| Buffalo | New York, Porto Rico | 101,500 |
| Chicago | Illinois, Minnesota, North Dakota, South Dakota, Wisconsin, and all Navy pensioners in Columbus, Indianapolis, and Topeka districts. | 126,107 |
| Columbus | Ohio (all Navy pensioners paid at Chicago) | 98,068 |
| Indianapolis | Indiana, Michigan (all Navy pensioners paid at Chicago). | 103,856 |
| Philadelphia | Pennsylvania, New Jersey | 105,182 |
| San Francisco | California, Idaho, Montana, Nevada, Oregon, Utah Washington, Wyoming, Alaska, Arizona, Hawaii, Philippines, Guam, and Samoan Islands. | 42,514 |
| Topeka | Colorado, Kansas, Missouri, Iowa, Nebraska, New Mexico, Indian Territory, and Oklahoma (all Navy pensioners paid at Chicago). | 167,548 |
| Washington | Delaware, Maryland, Virginia, West Virginia, District of Columbia, Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Kentucky, and all foreign pensioners. | 146,967 |

It is shown by experience that the larger the agency the more economical the administration. By this consolidation there would be the following saving:

| | |
|---|---|
| Rent | $4,500 |
| Salaries 9 pension agents | 36,000 |
| Clerk hire, stationery, printing, and other incidental expenses (estimated) | 64,000 |
| Total | 104,500 |

This estimate is based upon the pension laws as they now exist.

The proposed reduction is believed to be in the interest of economy and efficiency.

Very respectfully, V. WARNER, *Commissioner.*

Mr. GARDNER of Michigan. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. PAYNE].

Mr. PAYNE. Mr. Speaker, I voted for this amendment to abolish these pension agencies. As a matter of legislation I have not changed my mind. I am still in favor of the abolition of these agencies. I never have allowed myself in anything I have said in the House to refer to the Senate as the higher body, as did the gentleman from Massachusetts [Mr. SULLIVAN], nor to refer to the House as the lower body. We are the equal coordinate branch of the Legislature of the nation, and I have always tried to maintain that, and I have been instrumental in sending back, with the nearly unanimous concurrence of the House, some legislation in which the Senate was attempting to infringe upon the prerogatives of the House. But it has been a wise rule of the House of Representatives, as of the Senate, that an appropriation bill is no vehicle, no proper vehicle, for general legislation. True, the practice of either House has been to put such legislation upon bills, but we have the rules of the House, rules which have been enforced whenever invoked, preventing the putting of legislation upon appropriation bills, and they are wise rules. There are other committees organized for the purpose of considering legislation in detail, and when bills come involving legislation they are sent, not to the Committee on Appropriations, but to the committee having charge of that particular branch of legislation.

And so it has come about and has been the recognized rule from time immemorial that whenever one House proposes legislation upon an appropriation bill and the other House refuses to concede, however much effort might be made in conference, however much effort might be made by amendment between the two Houses by voting up or down the proposition, that in the last analysis the House which proposes the legislation shall in the end concede to the other House, because the legislation is improperly upon an appropriation bill. So in this case, you have sent over your conferees, and after repeated conferences in which they have stood up for the legislation which the House has sought to ingraft upon this bill, and with which I am in entire sympathy, we have come to this point where in order to obey the time-honored rules as to conferences between the two Houses, one or the other House must back down. Now, it is in order for the House asking the legislation—because it requires legislation to abolish a pension agency already authorized by law—that the House asking this legislation must yield to the other House; and we may sit here until 12 o'clock to-morrow and that will be the result, and the House that proposes the legislation must yield to the other. Therefore, Mr. Speaker, I hope that the House will sustain the committee in its report in this matter and close up this pension appropriation bill; and in the next Congress we may look into the subject, refer it to an appropriate committee, and, I hope and trust, secure this legislation which will abolish the pension agencies. [Applause.]

Mr. SOUTHARD. Will the gentleman yield for a question?

Mr. PAYNE. Certainly.

Mr. SOUTHARD. That is not a rule with the Senate, that the House should not legislate upon an appropriation bill.

Mr. PAYNE. Oh, the gentleman has been here long enough and knows what the rule is as to a conference on appropriation bills; and he has seen, as I have seen, year after year and time after time, when either House has sought to ingraft legislation upon appropriation bills, if the other House resists the House proposing it always has finally to yield, as in this case.

Mr. GARDNER of Michigan. Mr. Speaker, how much time have I left?

The SPEAKER. The gentleman has ten minutes remaining.

Mr. GARDNER of Michigan. I yield two minutes to the gentleman from Ohio [Mr. GROSVENOR].

Mr. GROSVENOR. Mr. Speaker, I have been in sympathy with the idea of a reduction of the number of these pension agencies. I thought and I think now that in the long run at the proper time the whole business will be transacted in the city of Washington, but I do not believe that the time has come when we can have intelligent action upon this question. We have just made a change in our pension laws. We have taken in, by the report of this conference committee, a large number of new cases, all of which are proper and right, and it seems to me that under the circumstances it would be far better to let the matter of the reduction of the pension agencies go over for another year, and give the Department an opportunity to make a report that they will be compelled to make based upon the facts in the case. It seems to me, therefore, that the position of our conferees is the proper one, and we ought to stand by them.

Mr. GARDNER of Michigan. Mr. Speaker, in the closing hours of this Congress I desire to testify to the fidelity, the patriotic purpose, and the splendid ability of my honored conferee representing the minority on the committee, and Republican as I am, and partisan as I do not deny, I hope his voluntary retirement from this body will be only temporary. [Applause.] I shall rejoice because of the pride I have in this great legislative assembly when he comes back again and dedicates his splendid intellectuality and lofty devotion to duty, as he sees it, to the service of his country in the Congress of the United States. But there are some things in the gentleman's statement to which I would like to call attention. I do not deny that as Republicans we like patronage. A lucrative office is desired on the part of Republicans. An appropriation from the Treasury of the United States is usually appreciated by the Republicans. I have been in this House eight years, and for the life of me I can not see the difference between a Democrat and a Republican in these respects. [Applause.] The only observable differences are that our friends on the other side are out and want to get in and possess the patronage that is now ours by virtue of our being in the majority.

Does not the gentleman know that when the last President of the United States representing the Democratic party was in office, he issued an Executive order, which he had the right to do, to consolidate these eighteen agencies into nine, but that he made the date when that order was to take effect to come after his retirement from office? I tell you, a political plum that has annually $4,000 of financial remuneration in it is loved by the Democrats quite as well as by the Republicans.

Mr. JAMES. Will the gentleman allow me a question?

Mr. GARDNER of Michigan. Certainly.

Mr. JAMES. Still that is no good argument why the taxpayers should be looted by continuing it. [Applause on the Democratic side.]

Mr. GARDNER of Michigan. I am not speaking of it now as an argument; it is simply a "deadly parallel," that is all, and to remind the gentleman from Massachusetts that in this respect both parties are alike. Now, to the point in issue, the gentleman is right in the statement of facts in nearly every proposition he puts forth, but granting, as he alleges, that the conferees of the other body had not had hearings, in a sense, that is a reason why they should be permitted to have an investigation made. They were reluctant to accept this amendment. Time after time we met and finally against their express will and purpose they accepted the amendment proposed by the House conferees. And what does it mean? It means between now and the beginning of the next Congress that the Secretary of the Interior, who officially has charge of the administration, among other things, of the whole Pension Bureau and agencies in all their ramifications, shall make a careful and thorough investigation from an economical standpoint as to whether under consolidation the pensioners can not be paid at less expense than now.

Secondly, will such consolidation work to the material inconvenience of the pensioner? Gentlemen, the whole argument turns upon those two propositions. The amendment of the House conferees will bring from the highest possible authority a complete statement of the whole situation and enable both the Senate and the House to act intelligently.

Mr. Speaker, I move the adoption of the conference report.

The SPEAKER. The gentleman from Michigan moves the adoption of the conference report.

The question was taken; and the Speaker announced that the ayes seemed to have it.

Mr. SULLIVAN. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 144, nays 82, answered "present" 6, not voting 145, as follows:

YEAS—144.

So the conference report was agreed to.

The Clerk announced the following additional pairs:

For the session:

Mr. SHERMAN with Mr. RUPPERT.

Mr. WANGER with Mr. ADAMSON.

Until further notice:

Mr. MAHON with Mr. SMITH of Texas.

Mr. FORDNEY with Mr. PUJO.

Mr. PEARRE with Mr. JOHNSON.

Mr. LILLEY of Connecticut with Mr. SPARKMAN.

Mr. WACHTER with Mr. SMALL.

Mr. SNAPP with Mr. JONES of Virginia.

Mr. CALDER with Mr. RHINOCK.

Mr. ROBERTS with Mr. PATTERSON of South Carolina.

Mr. BURKE of Pennsylvania with Mr. BRANTLEY.

Mr. HASKINS with Mr. CANDLER.

Mr. HOWELL of Utah with Mr. MAYNARD.

Mr. MARSHALL with Mr. PAGE.

Mr. RODENBERG with Mr. PATTERSON of North Carolina.

Mr. SCOTT with Mr. LAMAR.

Mr. STEVENS of Minnesota with Mr. WALLACE.

For the vote:

Mr. GARDNER of Massachusetts (in favor of pension agencies) with Mr. FASSETT (against pension agencies).

Mr. SMITH of Iowa with Mr. GUDGER.

Mr. HEPBURN with Mr. DAVEY of Louisiana.

Mr. KNAPP with Mr. TOWNE.

Mr. SMITH of Illinois with Mr. MACON.

The result of the vote was announced as above recorded.

On motion of Mr. GARDNER of Michigan, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

VALLEY FORGE PARK.

The SPEAKER laid before the House the bill (H. R. 25812) to authorize the Secretary of War to loan and deliver certain brass pieces to the Valley Forge Park Commission of the State of Pennsylvania, with the following Senate amendments, which were read, as follows:

Line 6, strike out "ten" and insert "twenty-five."
Line 6, after "pieces," insert "with their carriages and equipments."

Mr. PARKER. Mr. Speaker, I notice that strikes out "ten" and inserts "twenty-five." The committee has made no such report as that. Is that Valley Forge?

The SPEAKER. It is.

Mr. OLMSTED. Mr. Speaker, I move to concur in the Senate amendments.

Mr. PARKER. I move to disagree to the Senate amendments and ask for a conference. We have settled that in committee.

The SPEAKER. The motion to concur takes precedence.

Mr. PARKER. I hope it will be voted down, because the committee settled that these cannons were worth $200 apiece. We gave ten of them. We generally give two.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PARKER. Division!

The House divided; and there were—ayes 76, noes 14.

So the Senate amendments were agreed to.

On motion of Mr. OLMSTED, a motion to reconsider the vote by which the Senate amendments were concurred in was laid on the table.

REFUND OF SALARY.

Mr. POLLARD. Mr. Speaker, I would like to ask unanimous consent for a reprint of Report No. 8064, to accompany the bill (H. R. 25771) to authorize the Treasurer of the United States to receive $1,861.84 from ERNEST M. POLLARD, a Member of Congress from Nebraska, for salary paid him without authority of law.

The SPEAKER. The gentleman asks unanimous consent for a reprint of the report mentioned. Is there objection? [After a pause.] The Chair hears none.

REFUND OF CERTAIN MONEYS TO HAWAII.

Mr. McGAVIN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 10103.

The Clerk read as follows:

A bill (H. R. 10103) to refund to the Territory of Hawaii the amount expended in maintaining light-house service on its coasts from the time of the organization of the Territory until said light-house service was taken over by the Federal Government.

*Be it enacted, etc.*, That the sum of $23,393.69 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to be paid to the Territory of Hawaii to reimburse said Territory for money paid, laid out, and expended by said Territory in maintaining light-houses, bell buoys, and light-house service on its coasts from the time said Territory became territory of the United States until said light-houses, bell buoys, and light-house service were transferred to and taken under the management and control of the Light-House Board.

The SPEAKER. Is there objection?

Mr. WILLIAMS. Reserving the right to object——

Mr. LIVINGSTON. Reserving the right to object, I want to know where that comes from.

Mr. McGAVIN. Our committee reported the bill here. The bill was originally passed upon by the Committee on Claims, and it was taken up for consideration at the last claims day in the House. It was objected to by my colleague from Illinois [Mr. MANN], who has since looked over the bill, and it has met with his approval, as well as the approval of the Secretary of Commerce and Labor, and also of Commissioner Eustice, who went there.

Mr. LIVINGSTON. Was it a unanimous report from the Committee on Claims?

Mr. McGAVIN. Yes, sir.

Mr. WILLIAMS. How did this bill get to the Committee on Claims?

Mr. McGAVIN. By reference of the Speaker. It is a claims bill transferred from the Private Calendar to the House Calendar.

The SPEAKER. To the Union Calendar.

Mr. WILLIAMS. Mr. Speaker, I understand this involves a claim.

Mr. McGAVIN. A claim for money expended by the Territory of Hawaii from June 14, 1900, until January 1, 1904. While we were collecting the revenues from the island we were compelling them to maintain——

Mr. PAYNE. It is not a private claim; it is a claim from the Territory of Hawaii and went to the Union Calendar.

Mr. WILLIAMS. I understand that. Nor is the captured and abandoned property bill a private claim. It is the claim of a whole community and a whole class—more than this one. Now, what is the character of this legislation?

Mr. McGAVIN. The character of the claim is simply this: That from the time we acquired the Hawaiian Islands until the light-houses and bell buoys were taken over to the Light-House Board the Territory of Hawaii was forced to expend money for the maintenance of their own light-houses and bell buoys. A report of the itemized accounts was kept that they were compelled to expend, and the names of the parties to whom the money was paid.

Mr. LIVINGSTON. Does the gentleman not think that ought to go on one of the appropriation bills?

Mr. McGAVIN. I think not.

Mr. LIVINGSTON. My recollection is that we have considered that matter.

Mr. McGAVIN. I think not.

Mr. MANN. If the gentleman will yield to me for a moment, I wish to say for the benefit of the gentleman from Mississippi that this bill originally was put on the Private Calendar, but was taken off the Private Calendar and put on the Union Calendar because it was not a private bill. Now, these are the facts in the case. The Government of the United States ordinarily maintains the light-houses, and works in connection with the light-houses established, out of the general Treasury. When we acquired the Hawaiian Islands there was no order issued immediately by the President transferring the light-house establishment in the Hawaiian Islands to the Light-House Board. The Territorial government continued to maintain the light-house establishment in the Hawaiian Islands, paying the expense out of the Territorial treasury. After that these light-houses and buoys were turned over to the Light-House Board. They are now being maintained out of the general Treasury. Whatever the merits of this proposition, it is simply to repay to the Territorial government the money which ought in the first place to have been paid out of the general Treasury.

Mr. WILLIAMS. Mr. Speaker, whatever may be the merits or demerits of this claim, they are no higher than the merits of a trust fund in the United States Treasury, declared by the Supreme Court to be a trust fund, and not the property of the United States; and until some consideration can be obtained for the repayment of that trust fund to the people to whom it

belongs, when the bills of lading are right there showing from whom the property was taken, I shall object to the consideration of any bill in the form of a claim. I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted—

To Mr. STEVENS of Minnesota, for the remainder of the session, on account of a death in his family.

To Mr. HAUGEN, for the remainder of the session, on account of illness.

LEAVE TO EXTEND REMARKS.

By unanimous consent, leave was granted to Mr. SHEPPARD to extend his remarks in the RECORD.

JAMESTOWN EXPOSITION.

The SPEAKER announced as the committee to attend the opening of the Jamestown Exposition Mr. SHERMAN, Mr. HOWELL of Utah, Mr. WOODYARD, Mr. POLLARD, Mr. MCKINNEY, Mr. TAWNEY, Mr. WATSON, Mr. TAYLOR of Ohio, Mr. LEGARE, Mr. GOLDFOGLE, Mr. KLINE, Mr. LLOYD, and Mr. HARDWICK.

Mr. PAYNE. Mr. Speaker, I move that the House take a recess until 9.30 o'clock this evening.

The motion was agreed to.

Accordingly (at 6 o'clock and 5 minutes p. m.) the House took a recess until 9.30 o'clock p. m.

## EVENING SESSION.

The recess having expired, the House at 9.30 p. m. resumed its session.

OX BOW POWER COMPANY, OF SOUTH DAKOTA.

The SPEAKER laid before the House the bill (H. R. 25672) to amend an act entitled "An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River, with a Senate amendment thereto.

Mr. BURKE of South Dakota. I move to concur in the Senate amendment.

The motion was agreed to.

GENERAL DEFICIENCY APPROPRIATION BILL.

Mr. LITTAUER. Mr. Speaker, I present a conference report on the general deficiency appropriation bill, a complete agreement, and ask unanimous consent that the statement be read in lieu of report.

The SPEAKER. Is there objection to the request of the gentleman from New York, that the statement be read in lieu of the report?

There was no objection.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 6, 8, 11, 12, 19, 20, 21, 25, 61, 64, 65, and 74.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 7, 9, 10, 13, 14, 15, 16, 17, 18, 22, 24, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 60, 62, 63, 66, 68, 69, 70, 71, 72, 73, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, and 129, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$15,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$5000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows: After the matter inserted by said amendment insert, as a separate paragraph, the following:

"That the accounting officers of the Treasury be, and they are hereby, authorized and directed to relieve John W. McHarg from a charge of $622.68, which was made against him while he was serving as acting commissary of subsistence in Cuba in 1899 and 1900, and which was due to the embezzlement of one Gomez, a Cuban interpreter."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment as follows: Add after the word "dollars," at the end of said amendment, the following: "; and the salaries of said clerks are fixed at $4,000 per annum each, and for such increased salaries there is appropriated for the fiscal year 1908 $1,000 each;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"To pay William B. Turner for preparing an index to the report of the French Venezuelan Claims Commission, $200."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$6,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment as follows: Strike out the matter inserted by said amendment, and on page 62, in line 4, of the bill, after the word "fifty-six," insert: ", and in Senate Document Numbered Three hundred and sixty-nine;" and the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
HENRY M. TELLER,
*Managers on the part of the Senate.*

LUCIUS N. LITTAUER,
JAMES A. TAWNEY,
STEPHEN BRUNDIDGE, Jr.,
*Managers on the part of the House.*

The statement was read as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25851) making appropriations to supply deficiencies, submit the following written statement in explanation of the effect of the action agreed upon and submitted in the accompanying conference report on said amendments, namely:

The bill as finally agreed upon appropriates $10,528,535.36, being $733,840 less than as it passed the Senate and $609,836.62 more than as it passed the House.

The principal items inserted by the Senate which it has been agreed by the conference committee shall be excluded from the bill are as follows:

| | |
|---|---|
| Additional amount for constitutional convention in Oklahoma | $135,240 |
| Additional amount proposed by the Senate for regular supplies of the Quartermaster's Department | 500,000 |
| For printing and binding for the Interior Department | 48,000 |
| Printing and binding for the Census Office | 10,000 |

Among the chief items inserted by the Senate which have been agreed to are the following:

| | |
|---|---|
| For International Maritime Exposition at Bordeaux, France | $15,000 |
| For digest of international law | 8,000 |
| To pay claims for property taken from Confederate officers and soldiers as authorized by law | 40,000 |
| For expenses of United States troops at the Jamestown Exposition | 10,000 |
| Care of the insane of Alaska | 23,000 |
| Additional district judges for Alabama, Ohio, and Nebraska | 24,000 |
| Expenses of the Joint Committee on Printing | 12,000 |
| For contingent expenses of the Senate | 60,000 |
| For expenses of inquiries ordered by the Senate | 60,000 |

The remaining sums added by the Senate and agreed to by the House are legitimate deficiencies, judgments of the courts,

and audited claims certified to Congress since the passage of the bill by the House.

LUCIUS N. LITTAUER,
JAMES A. TAWNEY,
*Managers on the part of the House.*

Mr. LITTAUER. Mr. Speaker, I move the adoption of the conference report.

Mr. WILLIAMS. What is the motion?

Mr. LITTAUER. To adopt the conference report on the general deficiency appropriation bill—a complete agreement.

The question being taken, the motion was agreed to.

MENOMINEE TRIBE OF INDIANS.

The SPEAKER laid before the House the bill (H. R. 24043) to authorize the sale of timber on certain land reserved for the Menominee tribe of Indians, with a Senate amendment thereto.

Mr. NELSON. Mr. Speaker, I am not familiar with this bill——

The SPEAKER. The Chair will state to the House that if anybody in the House may be considered as responsible for the paternity of this bill it is the gentleman from Wisconsin [Mr. BROWN], who has gone home. It is proper for the Chair to state that the Chair examined this bill a short time ago. On this reservation there is a township or two of timber that was badly damaged by a cyclone, and this is to authorize the disposition of the damaged timber. If the gentleman from Wisconsin [Mr. NELSON] will move to concur, the gentleman from South Dakota [Mr. BURKE] can perhaps answer questions in reference to it.

Mr. NELSON. I move that the House concur in the Senate amendments.

Mr. BURKE of South Dakota. I think the gentleman from Wisconsin [Mr. ESCH] is more familiar with the matter than I am, especially as to these amendments. If the Speaker will let it go over for a little while, I will have a chance to inquire into it.

Mr. MANN. A parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state it.

Mr. MANN. It was impossible to hear the reading of the amendment, and whether it is an amendment that ought to go to the Committee of the Whole, entirely changing the scope of the bill, I do not know.

Mr. BURKE of South Dakota. I ask that the matter be passed over temporarily.

Mr. MANN. Without prejudice?

Mr. BURKE of South Dakota. Without prejudice.

Mr. PRINCE. I desire to say, Mr. Speaker, that I understand the Speaker has examined it; that it is remedial in its effect.

The SPEAKER. The Chair did examine it in its passage through the House. The Chair recollects taking it up with the gentleman from Wisconsin [Mr. BROWN].

Mr. PRINCE. I move that the House concur in the Senate amendment.

Mr. BURKE of South Dakota. I shall object to that.

The SPEAKER. The gentleman from South Dakota asks that it be passed without prejudice. Is there objection?

There was no objection.

MONUMENT TO THE MEMORY OF AMERICAN SOLDIERS AT CHALMETTE, LA.

Mr. MEYER. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8292) providing for the completion by the Secretary of War of a monument to the memory of American soldiers who fell in the battle of New Orleans, at Chalmette, La., and making necessary appropriation therefor.

The Clerk read the bill.

The SPEAKER. Will the gentleman from Louisiana state where the Senate bill is?

Mr. MEYER. I think it is on the Speaker's desk.

The SPEAKER. It is not on the Speaker's desk, and the bill will be passed without prejudice until the gentleman can secure the Senate bill.

MEMORIAL TO THE MEMORY OF CHRISTOPHER COLUMBUS.

Mr. GOULDEN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 13304) to provide a suitable memorial to the memory of Christopher Columbus.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That there shall be erected in the city of Washington, in the District of Columbia, a suitable memorial to the memory of Christopher Columbus.

SEC. 2. That for the purpose of carrying out the provisions of this act a commission, consisting of the chairman of the Senate Committee on the Library of the Fifty-ninth Congress, the chairman of the Committee on the Library of the House of Representatives of the Fifty-ninth Congress, the Secretary of State, the Secretary of War, and the Supreme Knight of the Order of the Knights of Columbus, shall be created, with full authority to select a site and a suitable design, and to contract for and superintend the construction of said memorial.

SEC. 3. That for the purpose of carrying out the provisions of this act the sum of $100,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury of the United States not otherwise appropriated.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. MANN. Mr. Speaker, reserving the right to object, I wish to say this: I did object to one and did propose to object to all of these monument propositions. Under this resolution the commission can locate the monument at any place it sees fit. We are now in a condition where the Grant Memorial Commission proposes to locate the Grant memorial in the Botanic Garden, evidently with a view of having a line of monuments by the roadway to be constructed through the Mall at some future time. While I shall make no objection to resolutions to-night, I want the commission to understand that, as far as I am concerned, unless I feel assured that these monuments will not be erected in that place, I shall make objection.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. GOULDEN, a motion to reconsider the last vote was laid on the table.

STATUE OF COMMODORE JOHN B. SLOAT.

Mr. SMITH of California. Mr. Speaker, in the absence of my colleague [Mr. NEEDHAM], I ask unanimous consent for the present consideration of the bill (S. 1032) to aid in the erection of a statue to Commodore John B. Sloat, United States Navy, at Monterey, Cal.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the sum of $10,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to aid in the erection and completion of a statue of the late Commodore John D. Sloat, United States Navy, together with a pedestal and foundation for the same, and for the preparation of the site for said statue, selected under authority of the War Department on the military reservation at Monterey, Cal., which sum shall be expended under direction of the Secretary of War: *Provided*, That the money hereby appropriated shall be drawn from time to time only as may be required during the progress of the work and upon the requisition of the Secretary of War: *And provided further*, That no part of the money hereby appropriated shall be expended until the design for said statue and pedestal shall be approved by the Secretary of War.

The Clerk read the following amendments, recommended by the committee:

Amend the title so as to read: "An act to aid in the completion of a monument at Monterey, Cal., to commemorate the taking possession of the Pacific coast by Commodore John D. Sloat, United States Navy."

Page 1, line 6, strike out the words "erection and."

Page 1, line 6, strike out the words "statue of" and insert in lieu thereof the words "monument to commemorate the taking possession of the Pacific coast by."

Page 1, lines 7 and 8, strike out the words "together with a pedestal and foundation for the same."

Page 1, line 9, strike out the word "statue" and insert in lieu thereof the word "monument."

Page 2, line 2, strike out the words "statue and pedestal" and insert in lieu thereof the word "monument."

The SPEAKER. Is there objection to the present consideration of the bill?

There was no objection.

The amendments were agreed to.

The bill was ordered to be read a third time, was read the third time, and passed.

The title was amended.

On motion of Mr. SMITH of California, a motion to reconsider the last vote was laid on the table.

STEPHENSON GRAND ARMY MEMORIAL.

The SPEAKER. The Chair will recognize the gentleman from Pennsylvania, Mr. MOORE.

Mr. MANN. Mr. Speaker, the gentleman from Pennsylvania, [Mr. MOORE] had a monument bill similar to those we have passed, for the erection of a monument to the enlisted men of the Grand Army. I told him that I would object to its consideration, but as I have withdrawn the objection to the others, I shall not object to this. I therefore ask unanimous consent for the present consideration of the Senate joint resolution No. 29, authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army memorial, in Washington, D. C., which is the bill I refer to, and which I send to the Clerk's desk and ask to have read.

The Clerk read as follows:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the chairman of the Committee on the Library of the Senate, the chairman of the Committee on the Library of the House of Representatives, the Secretary of War, and the secretary and the treasurer of the Stephenson memorial committee of the Grand Army of the Republic are hereby created a commission and authorized to select a site upon the property belonging to the United State in the city of Washington, other than the

Capitol and Library grounds, for the erection of the Stephenson Grand Army memorial, to be presented by the Grand Army of the Republic to the people of the United States.

SEC. 2. That for the preparation of the site so selected and the erection of a pedestal upon which to place the said memorial, under the direction of the Commission hereby created, the sum of $10,000, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated: *Provided*, That any part of this sum not required for the site and pedestal may be used and expended for the completion of the memorial.

SEC. 3. That the joint resolution "granting permission for the erection of a monument or statue in Washington City, D. C. in honor of the late Benjamin F. Stephenson, founder of the Grand Army of the Republic," approved May 3, 1902, is hereby repealed.

With the following amendment:

Page 2, section 2, strike out the proviso.

The SPEAKER. Is there objection?

Mr. FINLEY. Mr. Speaker, reserving the right to object, I would ask the gentleman from Illinois what the effect is of repealing that previous act mentioned in the joint resolution.

Mr. MANN. Mr. Speaker, the original act was for the erection of a monument to Stephenson, who was the originator of the Grand Army of the Republic. This is to erect a monument to the enlisted men of the Grand Army of the Republic by the Stephenson Association.

Mr. FINLEY. It will be erected by the members of the association and not by the United States?

Mr. MANN. There are $10,000 contributed for the pedestal. The rest is to be paid for by the association.

The SPEAKER. The Chair hears no objection. The question is on agreeing to the amendment.

The amendment was agreed to.

The joint resolution was ordered to be read a third time, was read the third time, and passed.

MENOMINEE TRIBE OF INDIANS.

Mr. BURKE of South Dakota. Mr. Speaker, I now ask unanimous consent to take from the Speaker's table the bill H. R. 24043, with Senate amendments thereto, and disagree to the Senate amendments, and ask for a conference.

The SPEAKER. The gentleman from South Dakota asks unanimous consent to take from the Speaker's table the bill referred to, the Senate amendments to which have been read, and to disagree to the same and ask for a conference. Is there objection? [After a pause.] The Chair hears none. The Chair appoints the following conferees on the part of the House: Mr. LACEY, Mr. BURKE of South Dakota, and Mr. ZENOR.

ROSANNA A. MAY.

Mr. CHANEY. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (S. 8568) granting an increase of pension to Rosanna A. May, which I send to the desk and ask to have read.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws, the name of Rosanna A. May, widow of John T. May, late of Company A, Second Battalion District of Columbia Volunteer Infantry, and pay her a pension at the rate of $16 per month in lieu of that she is now receiving.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, read the third time, and passed.

The SPEAKER. Without objection, the Chair will have the Calendar as to those bills which were passed without prejudice and covered by the special order known as the "Dalzell order"——

Mr. MANN. The Chair said "without objection." Well, is it in order?

The SPEAKER. It is in order to move it. The Clerk will report the first bill passed without prejudice.

GRANTING LAND TO UNIVERSITY OF OKLAHOMA.

The Clerk read as follows:

A bill (H. R. 17431) granting to the regents of the University of Oklahoma section No. 36, township No. 9 north, of range No. 3 west, of the Indian meridian, in Cleveland County, Okla.

Mr. MANN. Mr. Speaker, a similar bill to that has been passed. We passed a bill conveying that land.

The SPEAKER. The Clerk will report the next bill.

DONATING LANDS IN OKLAHOMA FOR EDUCATIONAL PURPOSES.

The Clerk read as follows:

A bill (H. R. 18850) donating lands in Oklahoma Territory for educational purposes.

The SPEAKER. This bill has already been read.

Mr. LACEY. I understand the bill was put on the Indian appropriation bill. I think that bill is already a law.

The SPEAKER. Without objection, the bill will be passed by without prejudice.

There was no objection.

The SPEAKER. The Clerk will report the next bill.

ESTATE OF WILLIAM B. TODD, DECEASED.

The Clerk read as follows:

A bill (S. 2138) for the relief of the estate of William B. Todd, deceased.

Mr. MANN. Mr. Speaker, we had that bill read before, and I object.

Mr. PAYNE. I will object, Mr. Speaker.

Mr. SULZER. And I object.

The SPEAKER. Objection is heard. The Clerk will report the next bill.

HAROLD D. CHILDS.

The Clerk read as follows:

A bill (H. R. 22027) to place Harold D. Childs on the retired list of the United States Navy.

The amendment, in the nature of a substitute, was read, as follows:

*Be it enacted, etc.*, That the President be, and he is hereby, authorized to nominate and, by and with the advice and consent of the Senate, to appoint Harold D. Childs, late midshipman, an ensign in the United States Navy, and to place him upon the retired list as such, with three-fourths the pay of his grade.

Mr. MANN. I raise the point of order, Mr. Speaker, on the bill, under the rule.

The SPEAKER. What is the point of order?

Mr. MANN. The point of order is the bill has already been objected to under the rule.

Mr. FOSTER of Vermont. Mr. Speaker, it was passed, as I understand, without prejudice. I had no chance to present an explanation of it. I ought to have my day in court and a chance to explain the purpose of the bill.

The SPEAKER. The Chair is under the impression——

Mr. MANN. As far as that bill is concerned I have no objection to the gentleman making his explanation, but I wish to reserve the point of order as to the right to call up these bills a second time under the rule.

The SPEAKER. The gentleman from Illinois does not object, at least, to an explanation of the bill?

Mr. MANN. I do not.

Mr. FOSTER of Vermont. Mr. Speaker, this bill, I will say in explanation, is for the purpose of placing Harold D. Childs, late a midshipman at Annapolis, upon the retired list at three-quarters pay. The facts of the case are these: He was a strong, healthy young man when he entered the academy. He was a strong, healthy young man at the end of the four years. He then took the two years' cruise and broke down under the strain of those two years of hard work and exposure. The bill was drafted by the Navy Department. It has the unanimous support of the Committee on Naval Affairs of the House. I want to read the letter of the Navy Department with reference to the matter. They say this:

NAVY DEPARTMENT,
*Washington, January 14, 1907.*

SIR: I have the honor to acknowledge the receipt of your letter of the 7th instant, inclosing, with request for the views and recommendations of the Department thereon, a bill (H. R. 22027) to place Harold D. Childs on the retired list of the United States Navy.

Mr. Childs entered the Navy September 12, 1898, as a naval cadet, which title was subsequently changed by law to midshipman. After the usual four years' course of study at the Naval Academy he was sent to sea, serving on the *Olympia*, *Biddle*, and *Raleigh*. In September, 1903, while on the last-named vessel, he was found to have acute pulmonary consumption. There is good evidence that this disease originated in the line of duty from exposure incident to the service. He was treated for it at the naval hospitals at Yokohama, Japan, and Mare Island, Cal., and at the Army General Hospital, Fort Bayard, N. Mex.

In February, 1905, soon after discharge from the Fort Bayard hospital, Mr. Childs was examined at the Naval Academy preliminarily to final graduation and consequent promotion to the grade of ensign. His physical condition proving unsatisfactory, he was granted sick leave for six months. Further medical examinations were held in September and October, 1905, as a result of which Mr. Childs was reported to be physically disqualified for appointment as ensign by reason of chronic tuberculosis of the lungs. He was then allowed to resign from the service, his resignation being accepted to take effect January 1, 1906. For the more particular information of the committee there is inclosed a statement of the record of service of Mr. Childs, including his medical record.

The Department is of opinion that midshipmen who become disabled in line of duty while serving as officers at sea should have the benefit of the retirement laws in the same manner as other officers of the Navy, and accordingly it looks with favor upon the passage of a measure for Mr. Child's relief. The pending bill, however, is regarded as objectionable in point of form in that in directing the appointment of a particular person to a position on the retired list it appears to trench upon the prerogatives of the executive branch of the Government. There is inclosed a draft of a measure which is suggested as a substitute for the pending bill. This measure authorizes the President to appoint Mr. Childs an ensign in the Navy, after nomination to and confirmation by the Senate, and to retire him as such on three-fourths pay. The provision for three-fourths pay is deemed advisable, as in

the absence of it the beneficiary would probably be held entitled to but one-half the pay of his grade.

Very respectfully, V. H. METCALF, *Secretary.*

Hon. GEORGE EDMUND FOSS,
*Chairman Committee on Naval Affairs,*
*House of Representatives.*

This young man's father was a distinguished officer in the civil war. The family is a patriotic family. This boy, the patriotic son of a patriotic father, devoted four years to preparing for his work in the Navy of his country, and then he went upon this cruise of two years, during which he lost his health. It seems to me that it is a case that is worthy of the favorable consideration of this House.

Mr. MANN. Mr. Speaker, I ask unanimous consent for two minutes.

The SPEAKER. The Chair recognizes the gentleman.

Mr. MANN. Mr. Speaker, the fact is that this young man was educated at the expense of the Government. He was taken ill; he has consumption, as a great many other people have consumption who have not been educated at the expense of the Government. If he were subject to retirement at all under the law, he would be given half pay. This bill proposes, in addition to giving him the right to retirement, to give him three-fourths pay. It is simply an enlargement of the retirement list, with no special reason in this case whatever over any other person who is taken with consumption.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. Is there another objection?

Mr. FOSTER of Vermont. Mr. Speaker, I ask for a vote.

The SPEAKER. It requires three objections.

Mr. FOSTER of Vermont. I ask that the Senate bill be substituted for the House bill.

The SPEAKER. Is there objection?

Mr. MANN. I object.

Mr. FOSTER of Vermont. Then I ask for a vote on the House bill.

The SPEAKER. The question is on agreeing to the amendment to the House bill.

The question was taken; and the amendment was agreed to.

Mr. MANN. Mr. Speaker, I withdraw my objection to the substitution of the Senate bill for the House bill.

The SPEAKER. The question is on agreeing to the Senate bill as amended.

The bill was ordered to be read a third time, was read the third time, and passed.

On motion of Mr. FOSTER of Vermont, a motion to reconsider the vote by which the bill was passed was laid on the table.

A similar House bill was ordered to lie on the table.

LANDS GRANTED TO BEAVER LODGE, I. O. O. F., OF EKALAKA, MONT.

The next business upon the Private Calendar was the bill (S. 6165) granting to Beaver Lodge, Independent Order of Odd Fellows, of Ekalaka, Mont., certain land for public cemetery purposes.

The SPEAKER. Is there objection?

Mr. FINLEY. Mr. Speaker, reserving the right to object, I would like to ask the gentleman in charge of this bill if the House did not pass a bill the other day that granted substantially the same thing?

Mr. LACEY. Mr. Speaker, we passed a general bill a few days ago which will cover the purpose of this bill fully.

The SPEAKER. Without objection, this bill will be passed over.

There was no objection.

PETER H. BRODIE, ALIAS PATRICK TORBETT.

The next bill on the Private Calendar was the bill (S. 2400) to correct the naval record of Peter H. Brodie, alias Patrick Torbett.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, are we not entitled to have an explanation of the bill?

The SPEAKER. The gentleman who has charge of the bill not being present, without objection, the bill will be passed without prejudice.

There was no objection.

ASST. SURG. GEORGE R. PLUMMER, U. S. A.

The next business on the Private Calendar was the bill (S. 6447) entitled "An act to authorize the appointment of Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy."

The SPEAKER. The Clerk will report the bill.

The Clerk read as follows:

*Be it enacted, etc.*, That the President be, and he is hereby, authorized, by and with the advice and consent of the Senate, to appoint Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy with the rank of lieutenant (junior grade), to take rank and position at the foot of the list, whenever, before the expiration of his present acting commission, he shall successfully pass the examination prescribed by law for the appointment of medical officers of this grade.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had agreed to the conference report on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska.

The message also announced that the Senate had passed without amendment joint resolutions of the following titles:

H. J. Res. 257. Joint resolution authorizing the Secretary of the Treasury to print 1,000 additional copies of the Annual Report of the Director of the Mint;

H. J. Res. 256. Joint resolution authorizing the Attorney-General to print 850 copies of the Session Laws;

H. J. Res. 255. Joint resolution providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session;

H. J. Res. 219. Joint resolution providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency; and

H. J. Res. 229. Joint resolution to provide for the printing of 250,000 copies of the Special Report on Diseases of the Horses.

CHARLES W. SPALDING.

The next business on the Private Calendar was the bill (S. 8585) for the relief of Charles W. Spalding.

The bill was read, as follows:

A bill (S. 8585) for the relief of Charles W. Spalding.

*Be it enacted, etc.*, That Charles W. Spalding shall hereafter be held and considered to have been honorably discharged from the military service of the United States on the 25th day of April, 1864, as first lieutenant of Company C, Twentieth Illinois Volunteer Infantry: *Provided*, That no pay, bounty, or other emoluments shall become due or payable by virtue of the passage of this act.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

The bill was ordered to a third reading, read the third time, and passed.

LEONARD MARTIN COX.

The next business on the Private Calendar was the bill (H. R. 25883) reinstating Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

The bill was read, as follows:

A bill (H. R. 25883) to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

*Be it enacted, etc.*, That the President be, and he is hereby, authorized to restore, by and with the advice and consent of the Senate, Leonard Martin Cox, formerly a civil engineer in the United States Navy, to the Corps of Civil Engineers of the Navy, to take rank next after Civil Engineer Fred Thompson: *Provided*, That said Leonard Martin Cox shall establish to the satisfaction of the Secretary of the Navy, by examination pursuant to law, his physical, mental, moral, and professional fitness to perform the duties of that grade: *And provided further*, That the said Leonard Martin Cox shall be carried as an additional to the number of the grade to which he may be appointed under this act, or at any time thereafter: *And provided further*, That the said Leonard Martin Cox shall not by the passage of this act be entitled to back pay of any kind.

The SPEAKER. Is there objection?

Mr. MANN. I object.

The SPEAKER. The gentleman from Illinois objects. Is there a second? If there be no other objection——

Mr. PAYNE. Unless we shall have some explanation of this bill I shall object.

Mr. SHERLEY. I am perfectly willing to make an explanation. This is a bill to reinstate Mr. Cox in the United States Navy. He was an engineer in the Navy, having come in from civil life. He served in the Navy for seven years, and retired from the Navy on account of his father's ill health. The Navy is very anxious to secure his service, and he is willing to reenter the service. He was in charge of the construction of the Cavite floating dock and the construction work on the dry dock at the New York Navy-Yard.

Mr. PAYNE. I have no objection.

The SPEAKER. The Chair hears no objection.

The bill was ordered to be engrossed for a third reading; and being engrossed, it was accordingly read the third time, and passed.

On motion of Mr. SHERLEY, a motion to reconsider the vote by which the bill was passed was laid on the table.

MONUMENT TO AMERICAN SOLDIERS AT CHALMETTE, LA.

The SPEAKER. The enrolled copies of the Senate monument bills are now at the desk.

The SPEAKER laid before the House the bill (S. 8292) providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the battle of New Orleans at Chalmette, La., and making necessary appropriation therefor.

The bill was read, as follows:

*Be it enacted, etc.*, That the sum of $25,000 be, and the same is hereby, appropriated, or so much thereof as may be necessary, out of any money in the Treasury of the United States not otherwise appropriated, for the completion of a monument to the memory of the soldiers who fell in the battle of New Orleans in the war of 1812, said monument to be completed under the direction and approval of the Secretary of War: *Provided*, That the State of Louisiana shall cede and transfer its jurisdiction to the property on which said monument is to be completed in accordance with the provisions of act No. 41 of the legislature of that State, approved July 19, 1902: *Provided further*, That when said monument is completed the responsibility of maintaining the same and keeping the grounds surrounding it shall remain with the United Daughters of Seventeen hundred and seventy-six and Eighteen hundred and twelve, free of any expense or responsibility on the part of the Government of the United States.

The SPEAKER. The gentleman from Louisiana asks unanimous consent to discharge the Committee on the Library from the further consideration of the bill and consider the Senate bill at this time. Is there objection?

Mr. PRINCE. Reserving the right to object, I would like to have an explanation. I would like to know whose property this will become in case the transfer is made.

Mr. MEYER. It will become the property of the United States. The gentleman will understand that it has heretofore belonged to the State of Louisiana. By an act of the legislature thereof approved June 19, 1902, it ceded to the United States all of its jurisdiction and possession. My colleague from Louisiana [Mr. BROUSSARD], here present, was at the State capitol at the time and actively encouraged the legislation. On January 9 last I spoke fully in behalf of this bill, and trust that my arguments brought favorable conviction to the minds of my fellow-Members.

Mr. PRINCE. I withdraw the objection.

The SPEAKER. The Chair hears no objection.

The bill was ordered to a third reading, and was accordingly read the third time, and passed.

MONUMENT AT TIPPECANOE, IND.

The SPEAKER also laid before the House the bill (S. 8012) to erect a monument on the Tippecanoe battle ground, in Tippecanoe County, Ind.

The bill was read, as follows:

*Be it enacted, etc.*, That the sum of $12,500, or so much thereof as may be necessary, is hereby appropriated out of any money in the Treasury not otherwise appropriated, to be expended with the sum hereinafter named, under the direction of the Secretary of War, in procuring and erecting a monument upon Tippecanoe battle ground, in Tippecanoe County, Ind., in honor of Gen. William Henry Harrison and the soldiers who composed the American army in the battle of Tippecanoe on the 7th day of November, 1811: *Provided*, That this appropriation is made upon the condition that the State of Indiana shall provide a like sum, to be expended for said purpose under the direction of the Secretary of War, in connection with the sum herein appropriated; and no part of the sum herein appropriated shall be available until said sum to be provided by the State of Indiana shall have placed at the disposal of the Secretary of War.

SEC. 2. That the Secretary of War shall appoint one person who, with the governor of the State of Indiana and the president of the Tippecanoe Battle Ground Memorial Association, a voluntary association in Tippecanoe County, Ind., shall constitute a commission, whose duty it shall be to select a suitable design for said monument, with such emblems and inscriptions as will properly commemorate the valor and sacrifices of the American army at the battle of Tippecanoe, subject to the approval of the Secretary of War.

SEC. 3. That it shall be the duty of said commission to select a site for said monument, which shall be on the battle ground, to superintend the erection thereof, and to make all necessary and proper arrangements for the unveiling and dedication of the same when it shall have been completed. Said commissioners shall serve without compensation, and the State of Indiana shall make due provision for the protection and preservation of said monument without expense to the Government of the United States.

The SPEAKER. The gentleman from Indiana [Mr. CRUMPACKER] asks unanimous consent to discharge the Committee on the Library from further consideration of the Senate bill and consider it now.

Mr. CLARK of Missouri. I reserve the right to object. I would like to ask the gentleman one or two questions. Has there ever been a monument built by Congress outside of Washington?

Mr. CRUMPACKER. Oh, yes; a number of them. There were several ordered last session of Congress—one at Kings Mountain and one or two ordered to-night.

Mr. CLARK of Missouri. How much does this one cost?

Mr. CRUMPACKER. The cost is to be $25,000. The bill carries $12,500 on the condition that the State contribute $12,500; and the State, by a recent act of the legislature, made an appropriation of that amount, to meet a like amount, if Congress should make the appropriation.

Mr. CLARK of Missouri. It is not the beginning of a system?

Mr. CRUMPACKER. Oh, no!

The SPEAKER. The Chair hears no objection.

The bill was ordered to a third reading, read the third time, and passed.

TRUSTS ENGAGED IN INTERSTATE COMMERCE.

Mr. JENKINS. Mr. Speaker, I move that the Committee on the Judiciary be discharged from the further consideration of House resolution 834; and pending that motion, I ask that a letter of the Department of Commerce be read in my time as a justification of the motion.

The SPEAKER. The resolution will first be read.

The Clerk read as follows:

House resolution No. 834.

*Resolved*, That the Secretary of Commerce and Labor be, and he is hereby, directed to transmit to the House of Representatives, before the expiration of the present session of Congress, the names of all industrial trusts or corporations engaged in interstate commerce, whether such trust be a corporation, a so-called holding company, or an aggregation of corporations combined together or controlled or directed by a corporation or by one or more persons or by a definite group of persons by reason of total or partial stock ownership or by a stock-voting agreement or by an agreement or arrangement of any other character, together with the total capitalization and the bonded or other secured indebtedness of such trusts, corporations, or combinations, the number and names of the original and the present constituent or subsidiary companies, the State or States under whose laws said trusts, corporations, or combinations are organized; also the names or an accurate description of all combinations or associations other than incorporated bodies formed, existing, or operating for the purpose of affecting, controlling, or regulating the prices or the production of any article or articles of commerce which enter into interstate commerce.

The SPEAKER. The question is on discharging the Committee on the Judiciary from the further consideration of the House resolution.

Mr. MANN. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. How does this resolution come before the House now?

The SPEAKER. It is a privileged motion to discharge the Committee on the Judiciary.

Mr. MANN. Unless I misunderstood the reading of the resolution, it is directed to the Interstate Commerce Commission.

Mr. KEIFER. Does not this provide for a report to this Congress?

The SPEAKER. The point having been made, the Chair will state to the gentleman that the resolution is not privileged. It is directed to the Secretary.

Mr. MANN. I made no objection.

The SPEAKER. If there be no objection——

Mr. MANN. Reserving the right to object, I would like to have an explanation of it.

The SPEAKER. The gentleman from Wisconsin [Mr. JENKINS] was about to have a letter read.

Mr. JENKINS. The letter has been read, Mr. Speaker. I desire to yield fifteen minutes to the gentleman from New York [Mr. FITZGERALD].

COAL LAND IN ALASKA.

Mr. LACEY. Mr. Speaker, I desire to call up a conference report.

The SPEAKER. A conference report is always in order. The gentleman from Iowa calls up a conference report, which will be read by the Clerk.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 17415) to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

JOHN F. LACEY,
F. W. MONDELL,
JOHN L. BURNETT,
*Managers on the part of the House.*

H. C. HANSBROUGH,
THOS. H. CARTER,
FRED T. DUBOIS,
*Managers on the part of the Senate.*

The question being taken, the conference report was agreed to.

On motion of Mr. LACEY, a motion to reconsider the last vote was laid on the table.

TRUSTS ENGAGED IN INTERSTATE COMMERCE.

The House resumed consideration of House resolution 834.

Mr. JENKINS. Mr. Speaker, I yield fifteen minutes to the gentleman from New York [Mr. FITZGERALD].

The SPEAKER. In order to be entirely candid with the House the Chair will state that, after all, perhaps this proceeding had better be by unanimous consent. The gentleman from Illinois [Mr. MANN] reserves the right to object; but the gentleman from New York [Mr. FITZGERALD] desires to address the House for fifteen minutes, and the Chair understands that the gentleman from Florida [Mr. CLARK] desires to address the House for ten minutes. The House does not seem to have much to do while waiting for the sundry civil bill, and if there be no objection the time will be so occupied.

There was no objection.

Mr. FITZGERALD. Mr. Speaker, in case the House may desire to consider other and privileged matters before I conclude, I shall ask in advance unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection to the gentleman's request?

There was no objection.

Mr. FITZGERALD. Mr. Speaker, this resolution is designed to obtain useful information of an important character. It was prompted by certain official utterances and recommendations of recent date, and as a result of a superficial investigation made by myself in the limited time available for such a purpose during a short session of Congress. It seeks to obtain from the proper official of the Government, in an appropriate manner, information which he can readily obtain, and which it is reasonable to assume is easily accessible to him by reason of the powers vested by the Congress in his Department.

The President, in his annual message to Congress at this session, treats at some length of corporations engaged in interstate commerce, the legislation enacted by this Congress to regulate such corporations, the effect of such legislation, and the defects, or the supposed defects, in certain laws in force for a number of years.

The present Congress has taken long strides—

He says—

in the direction of securing proper supervision and control by the National Government over corporations engaged in interstate business—*and the enormous majority of corporations of any size are engaged in interstate business.* The passage of the railway rate bill, and only to a less degree, the passage of the pure-food bill, and the provision for increasing and rendering more effective national control over the beef-packing industry, mark an important advance in the proper direction. * * *

It must not be supposed, however, that with the passage of these laws it will be possible to stop progress along the line of increasing the power of the National Government over the use of capital in interstate commerce. * * * In some method, whether by a national-license law or in other fashion, we must exercise, and that at an early date, a far more complete control than at present over these great corporations—a control that will among other things prevent the evils of excessive overcapitalization, *and that will compel the disclosure by each big corporation of its stockholders and of its properties and business, whether owned directly or through subsidiary or affiliated corporations.*

An examination of the information called for by the resolution discloses that it is in strict accord with this recommendation, excepting that it is limited to such information and facts as can be easly obtained by the Secretary of Commerce and Labor through the Bureau of Corporations. The more inaccessible information, to wit, the stockholders of every industrial corporation, trust, or combination of the character described in the resolution, is not sought, as it is apparent that under the existing condition of the law it would undoubtedly be an impossible task for the Department of Commerce and Labor.

That there may be no doubt as to the power of the Secretary of Commerce and Labor to obtain this information, I shall call attention to the act approved February 14, 1903, known as the "Department of Commerce and Labor act."

Section 6 of that act, after providing for the creation of the Bureau of Corporations, provides:

The said Commissioner [of Corporations] shall have power and authority to make, under the direction and control of the Secretary of Commerce and Labor, diligent investigation into the organization, conduct, and management of the business of any corporation, joint stock company, or corporate combination engaged in the commerce among the several States and with foreign nations, excepting common carriers subject to an act to regulate commerce, approved February 4, 1887, and to gather such information and data as will enable the President of the United States to make recommendations to Congress for legislation for the regulation of such commerce, and to report such data to the President from time to time as he shall require; and the information so obtained, or as much thereof as the President may direct, shall be made public.

In order to accomplish the purposes declared in the foregoing part of this section, the said Commissioner shall have and exercise the same power and authority in respect to corporations, joint stock companies, and combinations subject to the provisions hereof, as is conferred on the Interstate Commerce Commission in said act to regulate commerce and the amendments thereto in respect to common carriers so far as the same may be applicable, including the right to subpœna and compel the attendance and testimony of witnesses and the production of documentary evidence and to administer oaths. All the requirements, obligations, liabilities, and immunities imposed or conferred by said act to regulate commerce and by an act in relation to testimony before the Interstate Commerce Commission, etc., approved February 11, 1893, supplemental to said act to regulate commerce, shall also apply to all persons who may be subpœnaed to testify as witnesses or to produce documentary evidence in pursuance of the authority conferred by this section.

It shall also be the province and duty of said Bureau, under the direction of the Secretary of Commerce and Labor, to gather, compile, publish, and supply useful information concerning corporations doing business within the limits of the United States as shall engage in interstate commerce or in commerce between the United States and any foreign country, including corporations engaged in insurance, and to attend to such other duties as may be hereafter provided by law.

It is reasonable to assume that if the Bureau of Corporations has acquired any information since its establishment in 1903, just four years ago, it is the general information regarding trusts, combinations, and corporations engaged in interstate commerce sought to be acquired by the pending resolution.

The powers conferred upon the Commissioner of Corporations to enable him to acquire information of the character desired are similar in all respects to those conferred upon the Interstate Commerce Commission in respect to common carriers. Without undertaking to state those powers in detail, which can be ascertained by an examination particularly of section 12 of the act approved February 4, 1887, as amended March 2, 1889, and February 10, 1891, and entitled "An act to regulate commerce," it will suffice to say that the powers are as broad and as comprehensive as the skill and ingenuity of able lawyers could devise.

I refer to these powers at this time in order to answer some objections that have been urged to the passage of this resolution.

The chairman of the Committee on the Judiciary sent this resolution to the Secretary of Commerce and Labor, requesting his opinion as to the advisability of adopting the resolution.

The Secretary has expressed in emphatic language his opposition to its adoption. The chairman of the Judiciary Committee has called my attention to the letter of the Secretary, and through the chairman's courtesy I have a copy of the letter, which I shall read at this time:

DEPARTMENT OF COMMERCE AND LABOR,
OFFICE OF THE SECRETARY,
*Washington, February 15, 1907.*

Hon. JOHN J. JENKINS,
*United States House of Representatives.*

MY DEAR CONGRESSMAN: Your letter of the 14th instant was received, submitting resolution No. 834 and requesting my views thereon, with certain specific questions to which you desire answer.

You ask, first, whether I am willing that the resolution should be adopted. I desire to emphasize my very strong opinion against its adoption.

You ask, second, whether it would be very expensive for me to do the work. This I would answer as emphatically in the affirmative.

You again ask whether it can be done before the House adjourns March 4. It most certainly can not.

The work involved in answering the questions propounded in the resolution is of so vast and indefinite a character that no approximate estimate can be made of its extent. I doubt if the entire force of the Bureau of Corporations could do this work in five years, if, indeed, it could be done at all by anyone in any period.

As to the expense, any estimate would be equally indefinite, but it would certainly involve the use of the entire Bureau funds for several years and many hundreds of thousand of dollars. And when the work was completed, if such conditon should ever be reached, the results would be substantially worthless, because most of it would be antiquated and of no current interest.

Very respectfully, OSCAR S. STRAUS, *Secretary.*

While I have no desire to engage in useless controversy with the Secretary, yet it seems to me that he is unnecessarily alarmed. It is very possible that the information sought can not be compiled before the 4th of March of this year. It seems to me, however, with my information, which I admit is somewhat limited, that it is incredible that the information can not easily and without any very great expenditure be obtained and compiled by the next session of Congress. I shall assume that the information is concededly of a character useful, important, and valuable to the Congress, and that therefore, if it can be obtained without extraordinary exertion, it should properly be compiled and sent to the Congress.

As I have already stated, I have made some slight investigation in the limited time at my disposal during the hurry of this short session of Congress. An examination of Moody's Manual, a well-known statistical compilation, has made it possible for me to obtain a list of 374 industrial trusts, controlling 2,701 subsidiary or constituent companies. I have the States wherein these companies have been organized, and I have the capitalization of the controlling companies, which aggregates the sum of $5,686,167,830. With the available force of the Bureau of Corporations, with such compilations as Moody's

Manual, and the information compiled in similar works and to be found in commercial compilations like Dun's and Bradstreet's, and with the practically unlimited powers of the Bureau to verify the information contained in such compilations, it seems to me that the Department of Commerce, within a reasonable time and by a very moderate expenditure, could furnish the House with the information desired. Its report might not be exhaustive, but it could be so complete as to make it of great value to the Congress.

The gentleman from Maine [Mr. LITTLEFIELD] compiled much information of this character in 1903, published in the CONGRESSIONAL RECORD of February 16, 1903. It is much more comprehensive than this list which I have, and it has been of some use. But it is not an official list—the information is unofficial—and so not as valuable as if obtained as is sought by this resolution.

If this information could be had, it might, as the President says in his message, "*tend to put a stop to the securing of inordinate profits by favored individuals at the expense whether of the general public, the stockholders, or the wageworkers.*" If the compiling of this information by the proper department of the Government will tend to work such beneficial results, it would appear to most men that the sooner it were done the more effective and lasting would be the action of the Government.

There are other, and to me equally imperative, reasons for the adoption of the resolution.

The President stated in his same message that—

> The actual working of our laws has shown that the effort to prohibit all combination, good or bad, is noxious where it is not ineffective. Combination of capital like combination of labor is a necessary element of our present industrial system. It is not possible completely to prevent it; and if it were possible, such complete prevention would do damage to the body politic. What we need is not vainly to try to prevent all combination, but to secure such rigorous and adequate control and supervision of the combinations as to prevent their injuring the public, or existing in such form as inevitably to threaten injury—*for the mere fact that a combination has secured practically complete control of a necessary of life would under any circumstances show that such combination was to be presumed to be adverse to the public interest.* IT IS UNFORTUNATE THAT OUR PRESENT LAWS SHOULD FORBID ALL COMBINATIONS, INSTEAD OF SHARPLY DISCRIMINATING BETWEEN THOSE COMBINATIONS WHICH DO GOOD AND THOSE COMBINATIONS WHICH DO EVIL. Rebates, for instance, are as often due to the pressure of big shippers (as was shown in the investigation of the Standard Oil Company and as has been shown since by the investigation of the tobacco and sugar trusts) as to the initiative of big railroads. Often railroads would like to combine for the purpose of preventing a big shipper from maintaining improper advantages at the expense of small shippers and of the general public. Such a combination, instead of being forbidden by law, should be favored. In other words, it should be permitted to railroads to make agreements, provided these agreements were sanctioned by the Interstate Commerce Commission and were published.
>
> With these two conditions complied with it is impossible to see what harm such a combination could do to the public at large. It is a public evil to have on the statute books a law incapable of full enforcement because both judges and juries realize that its full enforcement would destroy the business of the country; for the result is to make decent railroad men violators of the law against their will, and to put a premium on the behavior of the willful wrongdoers. Such a result in turn tends to throw the decent man and the willful wrongdoer into close association, and in the end to drag down the former to the latter's level; for the man who becomes a lawbreaker in one way unhappily tends to lose all respect for law and to be willing to break it in many ways. *No more scathing condemnation could be visited upon a law than is contained in the words of the Interstate Commerce Commission when, in commenting upon the fact that the numerous joint traffic associations do* TECHNICALLY *violate the law, they say:* "The decision of the United States Supreme Court in the Trans-Missouri case and the Joint Traffic Association case has produced no practical effect upon the railway operations of the country. Such asociations, in fact, exist now as they did before these decisions, and with the same general effect. In justice to all parties we ought probably to add that it is difficult to see how our interstate railways could be operated with due regard to the interest of the shipper and the railway without concerted action of the kind afforded through these associations."
>
> This means that the law, as construed by the Supreme Court, is such that *the business of the country can not be conducted without breaking it.* I recommend that you give careful and early consideration to this subject; and if you find the opinion of the Interstate Commerce Commission justified, that you amend the law so as to obviate the evil disclosed.

I quote this entire paragraph from the President's message so that there may be no misunderstanding and no possibility of a charge of twisting the President's language. I desire to call particular attention to several parts, however, and show the importance of the information sought by the resolution as a result of the language quoted.

The President says, "It is unfortunate that our present laws should forbid all combinations, instead of sharply discriminating between those combinations which do good and those combinations which do evil."

The existing laws do not forbid all combinations. The statutes were drawn with care and with deliberation so that only "those combinations which do evil," and which are deemed detrimental to the public welfare, are prohibited, and which by a proper enforcement of the laws are made impossible. The Trans-Missouri case and the Joint Traffic Association case mentioned in the extract from the report of the Interstate Commerce Commission and quoted with apparent approval by the President were both instituted under the Sherman antitrust act, approved July 2, 1890.

That act does not forbid all combinations; it does, if I may be permitted to say it, "sharply discriminate between those combinations which do good and those combinations which do evil." In terse language the proscribed combinations are specifically described therein. It declares "every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations * * * to be illegal." It provides that every person who shall make any such contract or engage in any such combination shall be guilty of a misdemeanor, and prescribes punishment therefor. It further declares that "every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor," and punishment is provided for those convicted of such a crime.

Another section prohibits the same acts in the Territories and the District of Columbia, or as affecting commerce between any such Territory and others, or between the Territories and the States.

Two classes of acts are prohibited by the law—contracts, combinations in the form of trusts or otherwise, or conspiracies in restraint of trade; and monopolies or attempts to monopolize or combinations or conspiracies to monopolize any part of the trade or commerce among the several States, or with foreign nations, or in the Territories and the District of Columbia, or between the Territories and States. Every form of combination is not prohibited, as asserted by the President, nor are all forms of combination condemned. Those that are prohibited have been, it may be said, universally recognized, except by those desiring to profit by the existence of such combinations, as detrimental to the public.

The only other statute that forbids combinations, excepting the interstate-commerce act, approved February 4, 1887, and the acts amendatory thereof, is section 73 of the Wilson Act (act approved August 27, 1894). It declares illegal and void as contrary to public policy "every combination, conspiracy, trust, agreement, or contract made by or between two or more persons or corporations either of whom is engaged in importing any article from any foreign country into the United States, and when such combination, conspiracy, trust, agreement, or contract is intended to operate in restraint of lawful trade, or free competition in lawful trade or commerce, or to increase the market price in any part of the United States of any article or articles imported or intended to be imported into the United States, or of any manufacture into which such article enters or is intended to enter."

This statute does not forbid all combinations; but the prohibited combinations are such as have been universally agreed to be detrimental to the public. The most conclusive evidence in support of that contention is that while the Wilson Act was passed by a Democratic Congress, this particular paragraph was saved from repeal by an express provision in the Dingley Act (approved July 24, 1897), passed by a Republican Congress.

The decisions mentioned in the quotation from the Interstate Commerce Commission's report, quoted with apparent approval by the President, are familiar to all who have given any attention to the efforts of the Federal Government to prevent contracts, combinations, and conspiracies in restraint of trade.

The Trans-Missouri case (United States *v.* Trans-Missouri Freight Association, 53 Fed. Rep., 440; 58 Fed. Rep., 58; 166 U. S., 290) was a bill in equity to enjoin the operations of a combination of railroads engaged in interstate commerce, alleged to have been formed for the purpose of maintaining "just and reasonable rates" and preventing unjust discriminations. The bill, filed January 6, 1892, was dismissed by the circuit court, whose decision was affirmed by the circuit court of appeals. The Supreme Court reversed the case, holding that the antitrust act applied to railroad carriers and embraced all contracts *in restraint of trade and commerce* among the several States and with foreign nations, and was not confined to those in which the restraint was unreasonable.

The combination was shown and held to be in restraint of trade, and that was the gravamen of the action.

The Joint Traffic Association case (United States *v.* Joint Traffic Association, 76 Fed Rep., 895; 89 Fed. Rep., 1020; 171 U. S., 505) was a bill in equity to enjoin the alleged violation of the antitrust act by a combination of railroad companies. Thirty-one railroad companies engaged in transportation between Chicago and the Atlantic coast formed themselves into

an arrangement known as the "Joint Traffic Association" to control competitive traffic, fix railroad rates, etc. The circuit court dismissed the bill and the court of appeals affirmed the action of the circuit court. These judgments were reversed by the United States Supreme Court upon the authority of United States *v.* Trans-Missouri Freight Association (166 U. S., 290), and the case was remanded for further proceedings in conformity with its opinion by which the combination was adjudged illegal.

The President says, and I quote again from his message:

No more scathing condemnation could be visited upon a law than is contained in the words of the Interstate Commerce Commission when, in commenting upon the fact that the numerous joint traffic associations do TECHNICALLY violate the law, they say: "THE DECISION OF THE UNITED STATES SUPREME COURT IN THE TRANS-MISSOURI CASE AND IN THE JOINT TRAFFIC ASSOCIATION CASE HAS PRODUCED NO PRACTICAL EFFECT UPON THE RAILWAY OPERATIONS OF THE COUNTRY. SUCH ASSOCIATIONS, IN FACT, EXIST NOW AS THEY DID BEFORE THESE DECISIONS, AND WITH THE SAME GENERAL EFFECT."

To which the President added, as I have already pointed out, that the meaning of this statement of the Interstate Commerce Commission is that the law is such that the business of the country can not be conducted without breaking the law.

These statements are somewhat surprising. Since when did the operations of such associations as are condemned by the Supreme Court in the two cases mentioned become merely TECHNICAL violations of the law? Whose hand has been so powerful as to protect them from prosecution? What influence has prevented the same procedure with regard to the existing criminal associations as was followed in the two cases carried to a successful conclusion. The statement sounds almost as a wail of regret that the court arrived at the conclusion it did, that every combination *in restraint of trade is unlawful.*

It seems, too, to be a somewhat astounding discovery to be made at this late day. The Trans-Missouri case was decided by the United States Supreme Court March 22, 1897; the Joint Traffic Association case, October 28, 1898. The law has been settled—definitely settled—regarding such associations for more than nine years, yet the President now asserts "that the business of the country can not be conducted without breaking it."

It might be assumed in light of these facts that the President framed that statement without mature consideration and as the result of an overmastering impulse. In view of other facts existing at the time, however, that hardly seems to be probable.

The extract quoted by the President from the Interstate Commission and certain language used by the Attorney-General in his annual report for 1906 are sufficient at least to create a suspicion that modern methods of business are believed in some places to be more controlling than the law of the land. Speaking of the Sherman antitrust act, the Attorney-General says:

One main purpose of the law—that competition shall not by agreements be suppressed—*runs counter to the tendencies of modern business.*

The tendencies of modern business that run counter to the Sherman antitrust act, as construed by the United States Supreme Court, are criminal tendencies. The doing of those things forbidden by that law are crimes, so declared in the law itself. No official is required to condone crimes nor to apologize for the law nor to justify its violation. Nor should the eyes of those selected to enforce the law be closed to its violations. The duty of the executive branch of the Government is to enforce the law as it is. It can easily rest content in the assumption that the law-making branch of the Government is as keenly aware of modern business methods and conditions as the executive branch, and perhaps views in a different light even TECHNICAL violations of law by constant lawbreakers.

The Attorney-General further states that—

The Department of Justice is without organization for the investition of suspected offenses, though general appropriation for the enforcement of this and laws of like character made by Congress in 1903 has to some extent supplied this deficiency.

This is a reference to the appropriation of $500,000 in the act approved February 25, 1903, to enable the Attorney-General to enforce the interstate-commerce act and the Sherman antitrust act, and the provisions of the Wilson Act heretofore mentioned. And I might add that the sundry civil appropriation bill which recently passed the House carries $250,000 additional, together with the unexpended balance of the original appropriation for the same purpose.

Nevertheless—

He continues—

It is true, in the main, that proceedings instituted by the Department have had their origin either in a complaint by some interested person or in the investigation of some other Department of the Government. These reasons—the uncertainty of the meaning of the law, *its conflict with the tendencies of business,* and the insufficient means of detecting offenses—have made its enforcement slow and difficult, *and obedience to its provisions far from universal.*

I have already stated that the tendencies of business which conflict with the law are criminal tendencies. No consideration should be given such tendencies in determining whether the law should be enforced rigorously.

As to the law being uncertain the Attorney-General says in his report:

Although decisions of the Supreme Court have shed much light upon the meaning of the words used in the law to express the acts prohibited, yet the exact limits of the meaning of "restraints" and "monopolization" have not been ascertained with precision. Moreover, although the conception of commerce among the States and with foreign nations is well defined, its application to the complex conditions of business often raise questions whether given transactions are foreign or interstate trade which are not easy of solution.

This is merely another and more confusing way of stating that the general principles are well settled, but that every case is likely to have its own peculiar features and must be decided accordingly, and that some cases will present really difficult, if not close, questions for solution.

The Attorney-General points out that the decisions of the Supreme Court make clear the following in reference to the Sherman antitrust act:

(1) That the law is constitutional. (United States *v.* Joint Traffic Association, 171 U. S., 505.)

(2) That a combination of manufacturers to restrain or monopolize manufacture or production which only incidentally and indirectly affected interstate commerce was not within the prohibition of the act because not a restraint or monopolization of interstate commerce. (United States *v.* E. C. Knight Co., 156 U. S., 1.)

(3) That a combination of manufacturers fixing prices and suppressing competition in the sale of their products in interstate commerce was forbidden by the act. (United States *v.* Addyston Pipe and Steel Company, 175 U. S., 211.)

(4) That a combination among competing interstate railways by which rates and fares are established and maintained is forbidden by the law, although the rates in themselves may not be unreasonable or excessive. (United States *v.* Trans-Missouri Freight Association, 166 U. S., 290; United States *v.* Joint Traffic Association, 171 U. S., 505.)

These decisions justify the statement that the intent of the Sherman law is well understood and settled, and that the only difficulty that may arise from its enforcement is one common to the enforcement of all law—the determination as to whether particular cases come within the law.

As I have already stated, I have a list, not believed to be exhaustive, of 374 industrial trusts, corporations, or combinations which are engaged in interstate commerce.

The Attorney-General in his report for 1906 states that since the beginning of President Roosevelt's Administration twenty-three proceedings have begun under this law, seven of which have been concluded and sixteen are pending.

It would seem to the casual observer that a more efficient administration of the law would have resulted in a larger number of proceedings. Since the passage of the Elkins Act in 1903, which, as the Attorney-General says, "very much strengthened the hands of the Government in dealing with discriminatory practices of railroads," the Government in 1905 has undertaken to enforce the law rigorously. As a result, since then seventy-seven indictments have been returned, and the Government has been active and thus far successful in the prosecutions.

But why should all of the efforts of the Administration be devoted to the enforcement of the laws to prevent rebates and discriminations? Unquestionably the public has suffered grievously from such practices. Serious as have been the results of such practices, however, the harm to the public from them has never even approximated the positive evil that has resulted from the existence and operations of those combinations whose chief and, indeed, only aim is to enhance prices and to control the production of articles necessary to the people in their everyday life and which enter into interestate commerce.

It has been asserted time and again from all sides that publicity is one of the best means to mitigate the evils of the operations and exactions of the unlawful combinations that are preying upon the public. The information sought by the resolution introduced by me, compiled officially by that Department of the Government charged with such duties, might possibly of itself result in the discontinuance of the more flagrant violations of the law. The others could then be proceeded against in an orderly and proper manner without apology, without excuse, with no feeble plea on behalf of those defying the law "that it is impossible to conduct business without breaking it," but with a resolute determination to compel all the business of the country to be conducted in strict accordance with the law.

It will not do to permit anyone, however exalted his position, to select some of those combinations or contracts that violate the law to continue unmolested upon the specious plea that they are beneficial rather than detrimental to the country. To do

so will be to thwart the purpose of the law and eventually bring it into contempt, so that it will be ineffective for any purpose.

For these reasons I regret that the Committee on the Judiciary, although it believes the information requested valuable, refuses to recommend the adoption of the resolution and feels constrained to have it laid upon the table. I shall indulge the hope that the contribution that I am able to make to the available information on the subject may at least be of some service.

*Unofficial list of industrial trusts.*

| Company. | Capital. | Number of constituent or subsidiary companies. | Where organized. |
|---|---|---|---|
| Acme Cement Plaster Co | $1,000,000 | 3 | Illinois. |
| Æolian-Weber Piano and Pianola Co | 10,000,000 | 8 | New Jersey. |
| Alabama Consolidated Coal and Iron Co. | 3,750,000 | 2 | Do. |
| Allegheny Ore and Iron Co | 3,000,000 | 2 | Virginia. |
| Allentown Rolling Mills | 1,000,000 | 2 | Pennsylvania. |
| Allis-Chalmers Co | 50,000,000 | 5 | New Jersey. |
| Alpha Portland Cement Co | 2,000,000 | 3 | Do. |
| Amalgamated Sugar Co | 4,000,000 | 3 | Utah. |
| American Axe and Tool Co | 2,000,000 | 6 | Pennsylvania. |
| American Dyewood Co | 2,894,000 | 2 | Do. |
| American Malt Co | 15,000,000 | 22 | New Jersey. |
| American Agricultural Chemical Co | 40,000,000 | 30 | Connecticut. |
| American Machine and Ordnance Co | 10,000,000 | 2 | New Jersey. |
| American Asbestos and Fireproofing Co. | 16,500,000 | 2 | Virginia. |
| American Beet Sugar Co | 20,000,000 | 4 | New Jersey. |
| American Book Co | 5,000,000 | 5 | Do. |
| American Box and Lumber Co | 500,000 | 5 | Do. |
| American Brake Shoe Foundry Co | 4,500,000 | 5 | Do. |
| American Brass Co | 20,000,000 | 6 | Connecticut. |
| American Can Co | 88,000,000 | 75 | New Jersey. |
| American Caramel Co | 2,000,000 | 3 | Pennsylvania. |
| American Car and Foundry Co | 60,000,000 | 17 | New Jersey. |
| American Cement Co | 4,100,000 | 4 | Do. |
| American Chicle Co | 9,000,000 | 6 | Do. |
| American Coal Co | 1,500,000 | 4 | Do. |
| American Coal Products Co | 15,000,000 | 2 | Do. |
| American Colortype Co | 4,000,000 | 3 | Do. |
| American Cotton Oil Co | 34,799,400 | 16 | Do. |
| American Electric Telephone Co | 750,000 | 3 | Do. |
| American Felt Co | 5,000,000 | 5 | Do. |
| American Finance and Securities Co | 5,000,000 | 4 | Do. |
| American Fork and Hoe Co | 4,000,000 | 13 | Do. |
| American Glue Co | 2,400,000 | 3 | Massachusetts. |
| American Graphophone Co | 10,000,000 | 4 | West Virginia. |
| American Hardware Corporation | 7,500,000 | 4 | Connecticut. |
| American Hide and Leather Co | 35,000,000 | 22 | New Jersey. |
| American Hominy Co | 3,750,000 | 10 | Do. |
| American Ice Securities Co | 20,000,000 | 2 | Do. |
| American Iron and Steel Manufacturing Co. | 5,550,000 | 5 | Pennsylvania. |
| American-La France Fire Engine Co | 2,000,000 | 3 | New York. |
| American Linseed Co | 50,000,000 | 42 | New Jersey. |
| American Lithographic Co | 6,500,000 | 9 | New York. |
| American Locomotive Co | 50,000,000 | 10 | Do. |
| American Oak Leather Co | 3,500,000 | 2 | Ohio. |
| American Oil Engine and Shipbuilding Co. | 6,000,000 | 2 | Maine. |
| American Patent Kid Co | 400,000 | 2 | New Jersey. |
| American Pipe Manufacturing Co | 5,000,000 | 18 | Do. |
| American Pneumatic Service Co | 15,000,000 | 7 | Delaware. |
| American Radiator Co | 10,000,000 | 4 | New Jersey. |
| American Rolling Mill Co | 1,400,000 | 2 | Do. |
| American Screw Co | 3,250,000 | 6 | Rhode Island. |
| American Seating Co | 4,000,000 | 25 | New Jersey. |
| American Seeding Machine Co | 15,000,000 | 7 | Do. |
| American Sewer Pipe Co | 8,000,000 | 32 | Do. |
| American Shipbuilding Co | 30,000,000 | 6 | Do. |
| American Smelting and Refining Co | 100,000,000 | 14 | Do. |
| American Smelters Securities Co | 77,000,000 | 2 | Do. |
| American Soda Fountain Co | 3,750,000 | 4 | Do. |

SIXTEEN-HOUR BILL.

Mr. HEPBURN. Mr. Speaker, I desire to call up the conference report on the bill S. 5133, and I ask that the statement may be read in lieu of the report.

The SPEAKER. The gentleman from Iowa calls up the con-

ference report on the bill S. 5133, known as the "sixteen-hour" bill, and asks unanimous consent that the statement be read in lieu of the report. Is there objection?

There was no objection.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the House amendment, and agree to the same with amendments as follows:

In line 3, page 1, strike out the word "and" and insert "or" in said amendment.

In line 13, page 1, strike out the word "corporation" and insert in lieu thereof the words "common carrier" in said amendment.

In line 13, page 2 of said amendment, after the word "continue," insert "or again go;" and in the same line strike out the four concluding words of said line, reading "or go on duty."

In line 14, page 2 of said amendment, after the word "eight," insert the word "consecutive."

In lines 14 and 15, page 2, strike out the words "within such twenty-four-hour period."

In line 15, page 2, strike out the concluding word "operator."

In line 16, page 2, after the word "dispatcher," insert the words "or dispatcher's operator in the dispatcher's office."

In lines 17 and 18, page 2, strike out "dispatches, reports, transmits, receives, or delivers" and insert in lieu thereof "issues."

In line 20, page 2, strike out the word "nine" and insert in lieu thereof the word "eight."

In lines 21, 22, 23, and 24, page 2, strike out the words "in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime" and insert in lieu thereof "and that no employee who by the use of the telegraph or telephone transmits, receives, or delivers orders pertaining to or affecting train movements (excepting those who issue train orders) or who is charged with the operation of signals or switches from towers, offices, or stations shall be required or permitted to be or remain on duty for a longer period than twelve hours in the aggregate in any twenty-four-hour period."

In line 9, page 3, after the word "suits," insert the words "to be."

In line 13, page 3, strike out the word "verified."

In line 15, page 3, strike out the words "three years" and insert "one year."

In line 21, page 3, after the word "of," insert the word "all;" and in the same line strike out the words "duly authorized" and insert in lieu thereof the words "officers and."

In line 24, page 3, after the word "its," insert the words "officer or."

In lines 1 and 2, page 4, strike out the words "with the exercise of reasonable prudence."

Strike out all of lines 7 and 8, page 4, and insert in lieu thereof "and all powers granted to the Interstate Commerce Commission are hereby extended to it in the execution of this act."

And the Senate agree to the same.

W. P. HEPBURN,
J. S. SHERMAN,
*Managers on the part of the House.*
BOIES PENROSE,
FRANK P. FLINT,
*Managers on the part of the Senate.*

The Clerk read the statement as follows:

STATEMENT.

The Senate receded from its disagreement to the House amendment to this bill, with amendments.

The House amendment struck out all of the Senate bill after the enacting clause and inserted in lieu thereof what is best known as the "Esch bill" of the House.

The amendments which have been agreed to in conference and are recommended to the House are, first, to strike out the word "and" and insert "or;" so that the first clause of the bill will read "engaged in the transportation of passengers or property" instead of "passengers and property."

The second amendment agreed to strikes out the word "corporation" and inserts in lieu thereof the words "common carrier." The argument of those asking for this amendment was that by the use of the word "corporation" rather than "common carrier" the act would not apply to a common carrier while in the hands of a receiver.

The next amendment is to insert the words "or again go." This is largely phraseological, because the amendment as it passed read: "To continue on duty or go on duty." The amendment emphasizes the idea of having once been on duty by use of the expression "again go on duty."

The next amendment inserts the word "consecutive," making the eight hours off duty "consecutive hours."

The amendment striking out "within such twenty-four-hour period" was striking out words which seemed to be superfluous, as the twenty-four-hour is expressed two lines before.

The amendment to insert in section 3 the words "to be" was inserted to make more definite the thought that this provision related to suits not yet commenced.

The amendment striking from the amendment the word "verify" leaves it so that it is the duty of the district attorney to bring suits when information satisfactory to him is lodged, even though that information is not verified.

The amendment striking out the words "three years" and inserting in lieu thereof "one year" limits to one year the period in which suits can be brought for violation or infraction of the statutes.

The next amendment, changing the wording of the amendment as it passed the House from the reading "common carrier shall be deemed to have knowledge of all acts of its duly authorized agents" so that it shall be "had knowledge of all its officers and agents." The meaning of this is perfectly clear.

The next amendment, which strikes from the amendment "with the exercise of reasonable prudence," was made because the words were considered superfluous.

The amendments changing section 4 are in part phraseological, but in effect they enlarge the powers of the Interstate Commerce Commission and make certain that it has the right to exercise all of the authority now vested in it in reference to sending for persons, papers, etc.

The amendments to section 2, relating to telegraph operators, tower men, etc., taken together, changed the reading of the House bill from "*Provided*, That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches, reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period, in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime," and inserts in lieu thereof "that no train dispatcher or dispatcher's operator in the dispatcher's office who, by the use of telegraph or telephone, issues orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than eight hours in any twenty-four-hour period; and that no employee who by the use of the telegraph or telephone transmits, receives, or delivers orders pertaining to or affecting train movements (excepting those who issue train orders), or who is charged with the operation of signals or switches from towers, offices, or stations, shall be required or permitted to be or remain on duty for a longer period than twelve hours in the aggregate in any twenty-four-hour period."

The main difference between these two provisions is this: First, that it limits the time within which the train dispatcher or his operator may be employed during any twenty-four hour period to eight hours instead of nine. Second, that it limits the period within which the other class of operators named in the original House amendment, or Esch bill, could be employed during any twenty-four hours to twelve hours instead of thirteen, except by the use of the words in the closing line of the amendment to the amendment, "in the aggregate," it makes it possible for a corporation at a minor office, where the operator is actually employed considerably less than twelve, or, probably, less than eight hours a day, to assign what his hours of employment shall be, so that the operator may be at his post of duty during the hours when the very few trains pass his station.

The amendment agreed to in conference also brings within the provisions of the law all tower men and interlocking switchmen who do not operate either through the telephone or the telegraph and yet whose duties are important. This amendment, it is believed, broadens the operation of the proposed bill so far as the individuals to be covered by it are concerned, lessens the hours of labor for those occupying the more arduous and responsible positions, at the same time making it possible for

the common carrier to operate, within its provisions, the outlying minor offices.

W. P. HEPBURN.
J. S. SHERMAN.

I concur with the majority of the managers on the part of the House, except as to amendments offered to section 2 of the bill, relating to telegraph operators, tower men, etc. The amendment offered does not change the conditions as to operators, but leaves them in exactly the same position they now occupy.

R. C. DAVEY.

The conferees on the part of the House on the disagreements between the two Houses on Senate bill 5133 make reference to the statement made by such conferees on March 1 and printed above. The report herewith made is identical with report heretofore made by conferees, except that, agreeably to the instructions of the House to the conferees, they insisted upon the elimination from the recommendations made in the report heretofore made of all the language following the word "*Provided*," in line 15, page 2, of the House amendment, down to and including the word "daytime," in line 24, and the insertion of the language contained in the resolution of instruction of the House this day passed, which was agreed to with the following language added: "*Provided further*, The Interstate Commerce Commission may, after full hearing in a particular case and for good cause shown, extend the period within which a common carrier shall comply with the provisions of this proviso as to such case." The proviso above explains itself and needs no further statement.

W. P. HEPBURN,
IRVING P. WANGER,
*Managers on the part of the House.*

We have insisted and secured compliance with instructions of the House as to the proviso touching the various classes and grades of telegraphers. The added condition investing the Interstate Commerce Commission with discretion to extend in particular cases on cause shown is not inconsistent with those instructions, though not required by them. It was offered as a condition to agreeing to the insistence of the House, and I have concurred in accepting that condition, not because I approved or desired it, but because it appeared to be absolutely necessary to secure this legislation. It is late in the session, and I am not willing to jeopardize other valuable features of the bill by refusing to accede to that condition, being satisfied that its rejection might prevent any legislation and hoping the condition would not prove harmful.

W. C. ADAMSON.

Mr. HEPBURN. Mr. Speaker, the report that we have made on the previous occasion is identical with the agreement of to-day, or the recommendations we have made to-day, except in the one particular contained in the instructions of the House. That has been agreed to, and it is inserted in the bill with the additional proviso giving to the Interstate Commerce Commission, in part, the power with regard to this particular branch of the public transportation service as it has in all of these cases that may arise under the legislation known as the "safety-appliance law."

It simply authorizes them to suspend the operation in a given case upon a showing and hearing had to the satisfaction of the Interstate Commerce Commission that that would be in the interest of transportation of the public.

I will reserve the balance of my time and yield five minutes to the gentleman from Missouri [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, the Interstate Commerce Commission, or the gentleman who is on that committee and connected with this legislation, has shown his hostility to any character of legislation along these lines, and if I correctly understood this afternoon, Mr. Clark, of that Commission, drew the amendment that was adopted by the conference committee. Therefore I regret that little will be done in relation to this law, although at this late hour of the session we will be compelled to accept it rather than to deny to thousands of trainmen throughout this country the rights that they ought to have and that the people ought to have by legislation through this body. Not only that, but I want it to go to this House and to the country that the Secretary of the Interstate Commerce Commission, Mr. Moseley, has hovered about this Capitol day in and day out trying to insert jokers into each provision—the trainmen's division and the operator's division—that would make the law absolutely ineffective. In private he has hugged us about the neck and told us how much he loved the railroad men and how he wanted to make the hours shorter, told us that he hated to ask for these amendments, but that he represented the President of the United States and he had to do it, and then he would go in public and deny that he ever made that statement.

Therefore, Mr. Speaker, I have little hopes of any relief from these gentlemen who have been opposing this legislation so far as the operators of this country are concerned. But I shall vote for the conference report in justice, as I say, to the trainmen of this country and the people.

Mr. HEPBURN. Mr. Speaker, just a moment. It is due to the gentleman that has been assailed here to say that Mr. Moseley did not say, when he was before the conferees, that he represented the President of the United States. He did not say it.

Mr. MURPHY. I know the gentleman does not want to misrepresent me. I said that he said it in private.

Mr. HEPBURN. I understood the gentleman to say that he did——

Mr. MURPHY. These are the words I used, "that he hugged me about the neck, and that is what he told me and Mr. Fuller."

Mr. HEPBURN. It was stated in the public prints that he made that statement, and yet, as a matter of fact, he made no such statement, and when the gentleman asked him whom he represented he gave him his name in full and said that he represented that person.

Mr. MURPHY. But I said he had done this in private, not before the conference committee.

Mr. HEPBURN. Mr. Speaker, I now yield five minutes to my colleague on the committee, the gentleman from Pennsylvania [Mr. WANGER].

Mr. WANGER. Mr. Speaker, I regret very much that my colleague from Missouri [Mr. MURPHY] has uttered the expressions that he has. I care not who drew the proviso which was sought to be engrafted upon the provision which the House directed us to secure. It was a mere transcript of section 7 of the safety-appliance act. That was not accepted, because it empowered the Interstate Commerce Commission to extend the time when the provision should go into effect as to common carriers. Our further proviso is that only in a particular case, after hearing and for cause shown, the Interstate Commerce Commission may extend the time as to that particular case, not as to any railway line or system and not as to any carrier.

I congratulate the House and the country that there is, by the action of the conferees, the assurance of the legislation that the House insisted upon. I have been enthusiastically in favor of the provision relating to telegraphers, and, without vaunting, I may justly claim that because of my insistence in season and out of season since the subject was brought to my notice there is a provision upon this subject in the legislation which, I trust, we are now about to write upon the statute books.

I can not consider this great question dispassionately, because I believe it involves the lives of the traveling people of this country, and that we are protecting them and railway trainmen in this legislation. But I realize that we are entering upon an unexplored country in this legislation, and none of us can fairly foresee what difficulties may be encountered. Upon first consideration it was thought that the amendment proposed by the gentleman from Missouri [Mr. MURPHY] was a proper provision. Upon further consideration there were certain inadequacies and objectionable features discovered in it which were recognized as potent. Then the amendment drawn by the gentleman from Wisconsin [Mr. ESCH] was taken up, and several amendments were engrafted upon it. It came to the House. The Committee on Rules adopted further amendments. You now have still further amendments. I believe that this legislation covers every phase of the question as thoroughly and as completely as the Congress can safely provide at this time. I believe it forces the three tours, or "tricks," of duty during the day in all the day-and-night railway offices in the United States. I believe that it leads to a reasonable and proper limitation of hours.

I believe it fairly protects the country and gives notice to the railway companies that they must have sufficient operators in every one of their stations where any order respecting the movements of trains is to be given to train men; and I hope that without a dissenting voice this conference report will be adopted. The table of statistics that I printed in the RECORD was furnished to me on my request by Secretary Moseley. He has never asked me as to any provision which should be ingrafted into the legislation or made any suggestion to me whatever as to how this legislation should be formulated, but earnestly urged the importance of the subject. I believe that he is a faithful friend of the people of the country, whether they be workingmen or whether they be other people. [Applause.] I believe that this legislation is a long step in the right direction, the longest step we can now safely take, and I therefore hope for the unanimous adoption of the report.

Mr. HEPBURN. Mr. Speaker, I now yield to my colleague on the conference committee the gentleman from Georgia [Mr. ADAMSON].

Mr. ADAMSON. Mr. Speaker, I will state to the gentleman that I would like to have some time yielded to myself and then a few minutes more, which I may grant to other gentlemen over here.

Mr. HEPBURN. Mr. Speaker, I yield twenty minutes to the gentleman.

Mr. ADAMSON. Mr. Speaker, the condition read from the desk in connection with the report was urged in the conference committee as a condition to the acceptance of the insistence of the House on its instructions. It was not required by the instructions of the House, yet in my judgment is in no wise inconsistent therewith. The instruction of the House was that we should restore the distinction and classification between the various grades and classes of telegraphers, as contained in the substitute passed by the House, but altered by the conferees in the previous report.

Being enabled to secure compliance with the instruction of the House as to the restoration of that provision, I did not feel at liberty to jeopardize the many valuable features proposed in this bill by refusing concurrence in a condition not inconsistent with the instructions of the House, and which could not prove very harmful in itself. In fact, Mr. Speaker, if there were nothing in the bill about the telegraphers, there are so many good features in it that I would not consent to its destruction at this stage.

Mr. RICHARDSON of Alabama. Mr. Speaker——

Mr. ADAMSON. Certainly, after having secured the very terms required by the House I would not then consent to kill the bill because I could not induce gentlemen at the other end of the Capitol to accede to our demands, without some slight concession to them.

Mr. RICHARDSON of Alabama. Will the gentleman allow me to ask him a question?

Mr. ADAMSON. With pleasure.

Mr. RICHARDSON of Alabama. Were not the instructions given by the House this afternoon to the conferees very plain and needing no construction?

Mr. ADAMSON. Yes, sir.

Mr. RICHARDSON of Alabama. And did not need any explanation?

Mr. ADAMSON. They certainly were.

Mr. RICHARDSON of Alabama. Have you complied with them?

Mr. ADAMSON. We certainly have.

Mr. RICHARDSON of Alabama. Why are you making an explanation, then?

Mr. ADAMSON. I am not making an explanation. I am making a speech on this conference report. [Applause.]

Mr. RICHARDSON of Alabama. May I ask the gentleman a further question?

Mr. ADAMSON. Certainly.

Mr. RICHARDSON of Alabama. I would like to ask the gentleman if it was not said that the minority on the Interstate and Foreign Commerce Committee, as well as the minority on this side, would not surrender and would not give up under any conditions that feature of the bill relating to the telegraphers and train dispatchers?

Mr. ADAMSON. It was, and we stood flat-footed and won every inch of our contention.

Mr. RICHARDSON of Alabama. Then I do not see why you are explaining so much.

Mr. ADAMSON. I am not explaining at all. The gentleman asked me a question and I am trying to answer it, which I take pleasure in doing when I can. He is so affable and courteous——

Mr. RYAN. Will the gentleman permit a question——

Mr. ADAMSON (continuing). That I am glad to have my distinguished friend help me at any time.

Mr. RYAN. Are you in favor, as a general proposition, of giving power to any administrative branch of the Government to postpone or suspend a legislative act?

Mr. ADAMSON. I am not.

Mr. RYAN. Would you have agreed to this except for the fact that you considered you could obtain otherwise no legislation at all?

Mr. ADAMSON. I agreed to it not because I wanted it or believed it necessary, but because I was practically told that there would be no legislation if I did not agree to it.

Mr. RICHARDSON of Alabama. You do not indorse it?

Mr. ADAMSON. I would not put it in if——

Mr. RICHARDSON of Alabama. Do you indorse it?

Mr. ADAMSON. I simply accept that as a condition upon which the other end of the Capitol accepts our instructions.

Mr. RICHARDSON of Alabama. You are not answering the question as a conferee from this side. Do you indorse what you have done?

Mr. ADAMSON. Well, I do not know what you mean by indorsing. [Applause.] I did not originate. I did not believe in it, I would not have proposed or would not have voted for it. I agreed to concur in the report with the distinct understanding that it was a sine qua non to secure this legislation. By agreeing to it we succeeded in securing compliance with the very instructions of the House. When this conference report is adopted there will be registered upon the statute books every solitary demand that the minority made in its fight and in the minority report. [Applause on the Democratic side.]

Mr. RYAN. Will the gentleman yield for another question? A similar power to this proposed by this act was given to the Interstate Commerce Commission in connection with the safety-appliance law when it was passed. Do you know of your own knowledge of any case where this power was improperly exercised?

Mr. ADAMSON. I have heard gentlemen say there were many cases where it was improperly exercised, and I have heard other gentlemen deny it. There are differences of opinion about it. But the gentleman from New York and I believed it worked very harmfully. I am of the opinion that there were delays and disasters attributable to the fact the Interstate Commerce Commission listened with too lenient ears to the appeals for postponement. That may be so again, but shall we jeopardize all the important provisions of this legislation at this hour of the session because we are afraid to trust the Interstate Commerce Commission, that has jurisdiction over all our commercial questions, because we are afraid to trust them in this one matter of the postponement of the operation of the law as to telegraphers in specific cases alone? I could not justify my refusal to concur, and you could not.

Mr. RYAN. I will state that I fully agree with the gentleman, but I wanted to bring the position of the minority members of this committee out fully.

Mr. ADAMSON. Mr. Speaker, I do not wish to consume all the time. I wish to yield to other gentlemen. I now yield four minutes to the gentleman from Georgia [Mr. BARTLETT].

Mr. BARTLETT. Mr. Speaker, we have here another instance where the conferees of the House and of the Senate are superior to both Houses. We have here to-night a report of conferees not in accordance with instructions of the House, because the views of the House upon this subject are not subject to such construction. The views of the House upon the subject of how long telegraph operators should be required to work in the operation of railways in this country is not subject to two opinions. When the question was here to-day there was but one vote that I heard against the motion to instruct the conferees to agree.

We have here now a conference report in which one of the conferees informs us that unless this addition to what the House instructed its conferees to-day is agreed to by the House this important legislation, demanded by almost the entire country, demanded by all of the organizations of railway trainmen and employees, is to fail and be defeated. I realize and recognize the position that we are in, and I for one want to raise my protest against this kind of legislation. I am at no time willing, when I can help myself, to intrust in the hands of any Department the right to say when and where the will and the law enacted by Congress shall be carried out. We have had an experience in the law which placed in the discretion of the Interstate Commerce Commission as to when the safety-appliance act should go into operation, and we know that for years and years they did not enforce it, and finally they appealed to Congress to extend the time. We know that when these cases are to be heard before the Railroad Commission, pressed as they must be for time, hurried as they are by innumerable cases of complaints against the railroads for excessive charges, when a case is put before that Commission it may be months and years before it is decided.

Why, this bill in its last section enacts that it shall not go into effect for twelve months from its passage, and you propose now to place in the hands of the Interstate Commerce Commission the right to suspend it for one year, for two years, for five years, and for an unlimited number of years.

I shall vote to adopt the report of the conference committee, not because I favor the addition to the House amendment, but because I do not desire the entire legislation to fail. I would not vote for it now if we had time to remain here and compel these conferees to carry out the will and the demands of this House as it was their duty. But realizing that the hours of the session are fast passing away, and if we are to have any legislation at all we must agree to the conference report, I submit to "this hold-up" on the part of the conferees. [Applause.]

Mr. ADAMSON. Mr. Speaker, I yield to the gentleman from Alabama [Mr. RICHARDSON] for five minutes.

Mr. RICHARDSON of Alabama. Mr. Speaker, I disagree with the Democratic conferee on this subject, and I do not disagree with him without reflection and without study. I do not disagree with him capriciously at all, but I think that if we will stop and reflect for one moment about the legislation in connection with this subject and the great advantage—and I say it now from a partisan standpoint—the Democrats have gained in this kind of legislation over the Republicans when they were playing politics over us and with us from the time this matter was first discussed in the Interstate and Foreign Commerce Committee from the 1st of December up to date, we are yielding in the concession that is made here this evening every political and economic advantage that we have gained.

That is my judgment as a Democrat; and as to the end that I have sought and have tried to secure, I have never seen a position since I have been here in Congress where the Democrats had a stronger position than they have had on this subject of the sixteen-hour labor question as to the employees of railroads. We know the position the Republican party is in, and I am now talking politics. We have been taunted often in this discussion that the minority were "playing politics." While this is not true, yet by the concession proposed we are surrendering the advantage we have secured.

Mr. FINLEY. Will the gentleman permit a question?

Mr. RICHARDSON of Alabama. Certainly.

Mr. FINLEY. How long before this bill will go into effect?

Mr. RICHARDSON of Alabama. A year from now.

Mr. FINLEY. If the bill is not satisfactory to the House, would it not be better to let it go until we can perfect it?

Mr. RICHARDSON of Alabama. But we are legislating now as for the present, and so under the instructions that were voted, practically unanimously—there was but one dissenting vote here this afternoon—that instruction gave to our conferees the proposition of the Democratic minority, coming from the minority of the Interstate and Foreign Commerce Committee, and indorsed by the Democrats of this House, instructions given to them to vote absolutely and unconditionally for this telegraphers' feature and train dispatchers. I say that this provision that the Democratic conferees reported here is departing from the spirit and the letter of that principle.

Mr. FINLEY. I agree with the gentleman.

Mr. RICHARDSON of Alabama. And no man can deny it.

Mr. FINLEY. I agree in the gentleman's conclusion, that there has been a departure from the instructions.

Mr. RICHARDSON of Alabama. Do you admit it is a departure?

Mr. FINLEY. I do.

Mr. RICHARDSON of Alabama. Then we ought to stop right there.

Mr. FINLEY. Having agreed it is a departure from the instruction, would we be in a worse condition, considering the fact that this bill does not go into operation for a year, if no legislation was had at this session of Congress?

Mr. RICHARDSON of Alabama. There is the first trouble in the matter. This is what the Democratic party has got to do. We come in here and say if we can not assert our views we are going to accept your views. This has been the paralyzing effect on the policies of the Democratic party for the last two years in this House. [Applause.] I am opposed to it. I am in favor of standing fairly and squarely by what I believe to be right, and go to the country on that issue and stand up for it.

Mr. GAINES of Tennessee. The gentleman is right.

Mr. RICHARDSON of Alabama. Then you will be with me on this.

Mr. GAINES of Tennessee. I am all the time with the people and against any railroad Senate coming here and terrorizing this body.

Mr. RICHARDSON of Alabama. I am glad that the gentleman is with us. We have this instruction from the Democrats on this side, and I believe the Republicans on the other side who voted for this instruction will gladly accept this compromising proposition. I am not surprised at that.

Mr. ELLIS. Will the gentleman allow me to ask him a question?

Mr. RICHARDSON of Alabama. Certainly.

Mr. ELLIS. I understand the gentleman to say he is talking politics now.

Mr. RICHARDSON of Alabama. Well, they have charged us—my dear, distinguished friend from Iowa [Mr. HEPBURN]—with "playing politics" all the time, and I said that if the Democrats play in politics, and we have defeated your purposes—you Republicans—that we ought to hold you and not give anything away.

Mr. ELLIS. Now, I understand on this that this proposition carried by practically a unanimous vote—only one voice against it.

Mr. RICHARDSON of Alabama. That was all that I heard.

Mr. ELLIS. Then the Members of the minority agreed with the majority in that vote?

Mr. RICHARDSON of Alabama. Yes.

Mr. ELLIS. I am perfectly willing to concede that the minority is right when it votes with the majority; but is that ground on which to claim a victory when you happen to vote with the majority?

Mr. RICHARDSON of Alabama. That might apply on general principles; but when you get to know who it was that inaugurated this principle about the telegraphers your question will not apply. [Applause.]

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had insisted upon its amendments to the bill (H. R. 24043) to authorize the sale of timber on certain of the land reserved for the use of the Menominee tribe of Indians, in the State of Wisconsin, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CLAPP, Mr. WARNER, and Mr. CLARK of Montana as the conferees on the part of the Senate.

The message also announced that the Senate had passed with amendment bill of the following title; in which the concurrence of the House of Representatives was requested:

An act (H. R. 22182) to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs.

SENATE BILL REFERRED.

Under clause 2, Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 5951. An act to repeal section 3480 of the Revised Statutes of the United States—to the Committee on the Judiciary.

SIXTEEN-HOUR BILL.

Mr. ADAMSON. Mr. Speaker, I wish to know if the gentleman from Iowa wishes to use some of his time now, or does he wish that we should proceed?

Mr. HEPBURN. Proceed, if you please.

Mr. ADAMSON. I have ten minutes remaining. The gentleman from Iowa has kindly given me five minutes more time. I wish the Chair to take note of that fact. I yield so much of my remaining ten minutes as the gentleman from Mississippi desires to use.

Mr. WILLIAMS. Mr. Speaker, this is the parliamentary situation which confronts the House. We were brought face to face with the alternative whether we should kill this legislation by refusing this condition to the telegrapher proviso, or whether, declining to take that responsibility, we should accept that condition. This side of the House has been struggling, and with signal and remarkable success, to attain certain substantive legislative results. We have attained them. We have inserted in the instruction of the House to the conferees the very exact language which we on this side of the Chamber had insisted should be in the bill. We defeated the motion to suspend the rules, and when the legislation came back procured the insertion of that proviso. After we had procured it, we procured instructions from this House to the conferees to insert that proviso in the legislation.

Mr. RICHARDSON of Alabama. Will you allow me to ask you a question?

Mr. WILLIAMS. If you will allow me to finish this statement, you may if I have the time.

To-day the House did instruct the conferees in favor of this exact proviso, and the conferees have obeyed the instructions of the House by obtaining the consent of the Senate to the proviso. Now, the House instructed its conferees to procure the consent of the Senate to that proviso. The House did not instruct its conferees not to consent to anything else. The House did not prohibit its conferees from adding anything else provided it was not inconsistent with the instruction to obtain the insertion of that proviso.

Mr. RICHARDSON of Alabama again rose.

Mr. WILLIAMS. I can not yield. I told you I would yield if you would allow me to finish this statement. You insist upon interrupting me at the wrong time, and I can not yield at all.

Now, the conferees have obtained the consent of the Senate

with this proviso. For Heaven's sake let us see what this proviso is and what it means, and let us not lose our heads owing to any sort of excitement from any sort of cause. The proviso is, after inserting the telegraphers' provision, that the Interstate Commerce Commission shall have discretion, in a particular case, upon good cause shown after a full hearing, to postpone the operation of the law in that particular case, a case made before this tribunal, argued in this tribunal, the evidence presented, and a full hearing had. Now, Mr. Speaker, one of two things is true. Either we can or we can not trust the Interstate Commerce Commission. If you can trust the Interstate Commerce Commission, then it will not grant an extension except when there has been good cause shown by evidence upon a full hearing.

If you can not trust the Interstate Commerce Commission; if this instrumentality, erected by Congress for the purpose of exercising powers like this, and this power amongst them, is rotten, corrupt, and untrustworthy, then all of your laws upon the statute books on the subject of the regulation of interstate commerce are absolutely worthless. The lex scripta, if it were written by the pen of an angel, would amount to nothing in the court of a corrupt judge. Every argument here ex abusa, founded on the idea that the Interstate Commerce Commission can not be trusted as a tribunal, after hearing the evidence, to do what is, in its opinion, just and right, is an argument based upon the assumption that Congress can not erect a tribunal which is above the power of the railroads to corrupt. Now, that I do not believe. [Applause.]

Mr. GAINES of Tennessee. Why should you have any commission act in the matter at all?

Mr. WILLIAMS. Why should you have any commission at all, the gentleman asks me. Because you think you can trust it; and if you can not trust it, you had better abolish it. Now I will yield to the gentleman from Alabama.

Mr. RICHARDSON of Alabama. Do you not admit that the instructions given here this afternoon did not contemplate nor embrace any conditions or agreement whatever?

Mr. WILLIAMS. The instructions given here this afternoon contemplated simply the subject-matter of the instructions. The instructions were that the conferees should secure a certain proviso. The instructions did not prohibit the conferees from agreeing to anything else, provided that something else was not contradictory of or inconsistent with the instructions themselves.

I did not want the condition. It was I who stood with others to the very last ditch, until we were convinced that we could not get the legislation without agreeing to this condition. We do not want it. I would rather not have it. I would rather have the law written in so many words, with no power in the hands of anybody to suspend its operation for one week or one minute, but when the gentleman wants to throw upon me, and wants to throw upon the Democratic party, the responsibility of defeating this legislation, demanded by the general public in the interest of limb and life and demanded by the laboring men in the interest of labor, demanded by telegraphers in their own interest and in the interest of life and limb, the gentleman asks something which I for one have not the courage or the folly, whichever it may be, to incur. [Applause.] It is a responsibility that I for one would decline to take.

Mr. RICHARDSON of Alabama. One more question to our minority leader, if you please.

Mr. WILLIAMS. Well!

Mr. RICHARDSON of Alabama. Are you not one of the men that stood with us on the proposition that we should never consent to surrender the telegraphers' provision?

Mr. WILLIAMS. I am; and we have not surrendered it. [Applause.] On the contrary, in a matter unprecedented in the history of the House, a minority has made a motion to secure this very identical proviso, protecting the telegraphers in their hours of labor, and we have secured it, and we secured an instruction from a Republican House to the conferees to do that very identical thing. [Appaluse.]

And it is done, and if this legislation passes it is in the bill, and there has been neither variation nor shadow of variation from that. The only modification, the only addition is to give somewhat of a discretion to your own sworn tribunal, that you and I believe in the honor and justice and honesty of, because you and I have been trying for years to give it more power, and you never would have voted to give it more power unless we believed it was incorruptible. [Applause.]

[Here the hammer fell.]

Mr. FINLEY. Will the gentleman from Iowa yield one minute more to the gentleman from Mississippi?

Mr. HEPBURN. Certainly.

Mr. FINLEY. I want to ask the gentleman from Mississippi a question.

Mr. WILLIAMS. Very well.

Mr. FINLEY. The gentleman admits that this proviso that is tacked on the conference report gives the Interstate Commerce Commission the right to suspend the operation of this law in a proper case. Now, I ask the gentleman from Mississippi if he can give this House an instance of any proper case where this law should be suspended; can he give us an illustration?

Mr. WILLIAMS. I can not give an illustration, but I can imagine a case might arise; but if a case could not arise, and if the gentleman from South Carolina is correct in supposing it could not arise, and if the Interstate Commerce Commission is honest and faithful to its duty, then the Interstate Commerce Commission never will suspend the operation of the law.

Mr. FINLEY. Then is not this true? If the gentleman does not know of a proper case and the House does not know of any proper case, is not the proviso giving the Interstate Commerce Commission the power to suspend it utterly useless?

Mr. WILLIAMS. Oh, I can imagine a hundred cases, that in an emergency, a great catastrophe or something of that kind, might require a suspension. Now I will ask the gentleman from Iowa to yield three minutes to the gentleman from Missouri [Mr. CLARK].

Mr. HEPBURN. I will yield three minutes to the gentleman from Missouri.

Mr. CLARK of Missouri. I wish the gentleman would give me five if he is going to give me any.

Mr. HEPBURN. I will yield five minutes to the gentleman.

Mr. CLARK of Missouri. Mr. Speaker, this is the first time I have ever said a word in this House on the subject of legislation about interstate travel and commerce. I have refrained from saying anything about it by painfully realizing the fact that I didn't know much about it. [Laughter.]

I have stood here in season and out of season as the friend of the laboring people in the United States, because I have been a laborer from my earliest recollection. The situation about this thing is this: It doesn't make any difference what your theory is; it is a condition that confronts us, and a serious one. This bill goes into effect twelve months from now. I would not put this particular proposition into a bill if I were drawing the bill and had carte blanche to do as I pleased; but I have had some experience with conferences. I forced three propositions out of four into the Chinese-exclusion bill in a conference, but it took me three weeks to do it, and if I had three weeks to fight this in I should be opposed to agreeing to this qualification here to-night. The only reason I had for giving in on the fourth proposition on the Chinese question was that we had come within about twenty-four hours of the time when the Chinese law expired by limitation. Now we are within twelve hours and thirty-three minutes of the end of Congress.

We have secured substantially everything that has been asked for in behalf of this legislation. This bill, as reported from the conference committee, is better than the La Follette bill was. Everybody in the United States of right thinking wants to put an end to the destruction of human life, the maiming of citizens, and the overworking of employees and telegraph operators—every one of them. I am unwilling to sacrifice so much to gain so little. We know that, willingly or unwillingly, we must accept this qualification or get no bill.

For one, I am not willing to jeopardize the good that may come out of this bill by erecting in my own mind and the minds of other Members here a difficulty that may never occur. [Applause.]

I was prosecuting attorney a long time, and no law is of any account if the prosecuting attorney is of no account, and all the laws that we could pass between now and the day of judgment on the subject of railroad transportation and telegraph will not be worth the paper on which they are written unless some confidence is placed in the Interstate Commerce Commission.

If we find that they do not enforce the law in good faith, we can put them out of office, or make it so hot for the President of the United States that he will put them out of office. [Applause.]

### MESSAGE FROM THE SENATE.

A further message from the Senate, by Mr. PARKINSON, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

The message also announced that the Vice-President had appointed Mr. HEYBURN, Mr. SUTHERLAND, Mr. PILES, Mr. MCLAURIN, and Mr. CLARKE of Arkansas members of the joint special committee on the part of the Senate, as authorized by joint resolution of the House of Representatives No. 240, "To create

a joint committee to consider the revision and codification of the laws of the United States."

The message also announced that the Senate had agreed to amendments of the House to Senate bills of the following titles:

S. 1032. An act to aid in the erection of a statue to Commodore John D. Sloat, United States Navy, at Monterey, Cal.; and

Senate joint resolution authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army memorial, in Washington, D. C.

The message also announced that the Senate had passed, without amendment, the following House bills:

H. R. 13304. An act to provide a suitable memorial to the memory of Christopher Columbus; and

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy.

SIXTEEN-HOUR BILL.

Mr. HEPBURN. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. MANN].

The SPEAKER pro tempore. The House will be in order. All gentlemen will cease conversation. Gentlemen in the aisles will be seated.

Mr. MANN. Mr. Speaker, I wish to pay a word of tribute to the gentleman from Wisconsin [Mr. ESCH] and the gentleman from Pennsylvania [Mr. WANGER]. I think it may be well for a moment for us to pause and really reflect upon where credit is due.

The gentleman from Wisconsin [Mr. ESCH], more than a year ago, in the Committee on Interstate and Foreign Commerce, forced this question to the front. That bill for a long time last session was an active question in the committee. It was reported out of the committee, and then subsequently there came to us the bill from the Senate, known as the "La Follette bill," which our friends to the left sought to have enacted into law, and which contained no provision in regard to telegraphers. I do not complain to them about that. The whole subject has been a matter of growth. We have all been gaining information. We have been adding amendment after amendment, crossing out this word and adding that word, taking out this clause and adding that clause in the effort to obtain a law in the end which will be effective and which will be just.

Mr. Speaker, I do not think that I should have taken so much of the time of the House, even now, except for the fact that my friend from Missouri [Mr. MURPHY] made what seemed to me a very unjustifiable assault upon a man who could not answer for himself. For ten years I have served on the Committee on Interstate and Foreign Commerce. I have come frequently in contact with the secretary of the Interstate Commerce Commission, much more often disagreeing with him than agreeing with him, and I suppose that will not seem strange to the Members of the House. [Laughter.] Many more times have I declined to take his opinion than I have taken it, but from the start, in reference to this question of sixteen hours, Mr. Moseley has been devoting his best efforts to have some legislation enacted. He has frequently spoken to me upon the subject, not for the purpose of changing the form of the legislation, but to urge the necessity of some legislation; and when the gentleman from Missouri, in the heat of the moment, because of his intense personal interest, has seen fit to personally assault Mr. Moseley, he has done a grave wrong to that gentleman.

Mr. GAINES of Tennessee. Will the gentleman yield?

Mr. MANN. Yes.

Mr. GAINES of Tennessee. How long and with what success was the Interstate Commerce Commission enforcing the car-coupler provision? And why the delay, if any?

Mr. MANN. That is another story. The car-coupler provision has been enforced as rapidly as possible.

Mr. GAINES of Tennessee. How many years?

Mr. MANN. To provide the new couplers for the cars has taken some time. I am not able to tell the gentleman just how many years.

Mr. GAINES of Tennessee. It was a number of years?

Mr. MANN. It was a number of years, the requirement being made constantly that an additional number of cars should be provided with safety appliances and with the car couplers. I do not wish the gentleman to lead me off on that subject.

Mr. GAINES of Tennessee. I did not want any delay in enforcing this law to save life and limb.

Mr. MANN. Ah, Mr. Speaker, it is a great talk we have always from the other side of the House to have no delay. In order to get quick action they would kill the bill. That is just Democratic policy. In all my experience I may say it has seemed the policy of the Democratic side to kill a measure in order to expedite it, and I am proud to-night to also pay tribute to the Democratic leader of the House, the gentleman from Mississippi [Mr. WILLIAMS], whom I believe to be patriotic as well as partisan. [Applause.]

Mr. HEPBURN. Mr. Speaker, it is little singular that the opposition to this report should be based entirely or largely by gentlemen upon this provision that gives some power in connection with its operation to the Interstate Commerce Commission. I want to remind gentlemen who support that provision of the law that intrusted that Commission with the enforcement of the safety-appliance laws, that gave to that Commission power with regard to the time when it should become operative very much further than this goes—I want to remind them of the exact phraseology of that statute:

> That the Interstate Commerce Commission may from time to time upon full hearing and for good cause extend the period within which any common carrier shall comply with the provisions of this act.

With regard to the operations of a particular carrier under the provisions of that law they were given power of postponement, of determining when the act should become operative. In the proposition now before us the provision is:

> The Interstate Commerce Commission may, after full hearing in a particular case and for good cause shown, extend the period within which a common carrier shall comply with the provisions of this proviso as to said case.

No sweeping, general provision giving power of postponement over the whole line controlled by a given carrier, but in a given case where it is shown there ought to be postponement we have given them that power. It is strange the gentlemen should just now distrust the Interstate Commerce Commission. Last session there was no power that they were willing to withhold from the Commission over the whole transportation question. Last year they were willing to give them the initiative with regard to fixing every rate for every ton of freight over every mile of railroad within the very limits of the United States. This ample power over $13,000,000,000 of property, this ample power over the whole internal commerce of the United States, they were willing to put then for certain particular purposes in the hands of the Interstate Commerce Commission. Now, when it is proposed to give them the power in a given case with regard, we will say, to a branch railway as to when the act shall go into effect, some of these gentlemen who were then so furious for the more ample legislation I have called attention to now turn away from the idea in holy terror. [Applause on the Republican side.] "Ah, we can not trust the Interstate Commerce Commission," these gentlemen say now.

What is the purpose? I charge that these men do not want any legislation. They want this law hung up; they want to have the power or privilege to use it in another campaign; they do not want any legislation. [Applause on the Republican side.] They are like some of these labor leaders who want no legislation, who are insisting upon impossible things in order that they may safely be able to hold the jobs they now have.

Mr. Speaker, I ask for a vote. I ask the previous question upon the conference report.

Mr. ADAMSON. Mr. Speaker, on behalf of this great Democratic measure I demand the yeas and nays.

The SPEAKER. The question is on agreeing to the conference report.

The yeas and nays were ordered.

Mr. CLARK of Missouri. Mr. Speaker, a parliamentary inquiry. Is this vote on the previous question or on the resolution?

The SPEAKER. It is on agreeing to the conference report, and the Clerk will call the roll.

The question was taken; and there were—yeas 235, nays 0, answered "present" 2, not voting 140, as follows:

YEAS—235.

H. R. 25627. An act to authorize the county of Armstrong, in the State of Pennsylvania, to construct a bridge across the Allegheny River in Armstrong County, Pa.;

H. R. 25671. An act to authorize the construction of a bridge across the Grand Calumet River, State of Illinois;

H. R. 25691. An act to authorize the construction of a bridge across the Monongahela River, in the State of Pennsylvania, by the Liberty Bridge Company;

H. R. 25716. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River above the village of Monticello, Wright County, Minn.," approved June 14, 1906;

H. R. 25717. An act to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Clearwater, Wright County, Minn.," approved June 14, 1906;

H. R. 25758. An act amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the purchase of sites for public buildings, to authorize the erection and completion of public buildings, and for other purposes," and for other purposes;

H. R. 25769. An act to amend an act entitled "An act to authorize the Fayette Bridge Company to construct a bridge over the Monongahela River, Pennsylvania, from a point in the borough of Brownsville, Fayette County, to a point in the borough of West Brownsville, Washington County," approved April 23, 1906;

H. R. 25773. An act permitting the building of a dam across the Savannah River at McDaniel Shoals;

H. R. 25774. An act permitting the building of a dam across the Savannah River at Turner Shoals;

H. R. 25776. An act permitting the building of a dam across the Savannah River at Middleton Shoals;

H. R. 25795. An act to authorize the Pensacola and Northeastern Railroad Company, a corporation existing under the laws of the State of Florida, to construct a bridge over the Escambia River between the counties of Santa Rosa and Escambia, in the State of Florida;

H. R. 25846. An act permitting the building of a dam across the Savannah River at Calhoun Falls;

H. R. 25847. An act permitting the building of a dam across the Savannah River at Hattons Ford;

H. R. 25848. An act permitting the building of a dam across the Savannah River at Andersonville Shoals; and

H. R. 25850. An act permitting the building of a dam across the Savannah River at Trotters Shoals.

On March 1:

H. R. 22580. An act making appropriations for the current and contingent expenses of the Indian Department, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1908;

H. R. 24134. An act providing for the granting and patenting to the State of Colorado desert lands formerly in the Southern Ute Indian Reservation, in Colorado;

H. R. 25513. An act extending the time for making final proof in certain desert-land entries;

H. R. 5666. An act for the relief of L. L. Arrington and L. S. Arrington;

H. R. 1561. An act authorizing the Secretary of the Navy to grant a discharge to Peter O'Neil;

H. R. 15027. An act to remove the charge of desertion against Cornelius O'Callaghan; and

H. R. 19493. An act to reimburse Oscar Fulgham, ex-sheriff of Madison County, Ala., for judgment and costs rendered against him when acting in the service of the United States.

On March 2:

H. R. 19932. An act for the relief of John Lavine;

H. R. 12840. An act for the relief of L. Biertempfel;

H. R. 23821. An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes; and

H. R. 24537. An act making appropriations for the support of the Military Academy for the fiscal year ending June 30, 1908, and for other purposes.

### ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 25851. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes;

H. R. 25672. An act to amend an act entitled "An act to authorize the Ox Bow Power Company, of South Dakota, to construct a dam across the Missouri River;"

H. J. Res. 219. Joint resolution providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency;

H. J. Res. 257. Joint resolution authorizing the Secretary of the Treasury to print 1,000 additional copies of the Annual Report of the Director of the Mint;

H. J. Res. 255. Joint resolution providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session;

H. J. Res. 229. Joint resolution to provide for the printing of 250,000 copies of the special report on the diseases of horses;

H. J. Res. 256. Joint resolution authorizing the Attorney-General to print 850 copies of the session laws;

H. R. 25812. An act to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania;

H. R. 24640. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 16235. An act authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.;

H. R. 12623. An act granting a pension to Minnie C. O'Connor;

H. R. 3208. An act granting a pension to Isabel T. Borthwick;

H. R. 24655. An act to authorize the legislature of Oklahoma to dispose of a certain section of school land;

H. R. 24815. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908;

H. R. 25889. An act to provide for sittings of the United States circuit and district courts of the southern district of Ohio at the city of Dayton, in said district;

H. J. Res. 253. Joint resolution relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern;

H. R. 13605. An act to satisfy certain claims against the Government arising under the Navy Department;

H. R. 20490. An act for the relief of Frank J. Ladner;

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 23988. An act to authorize a patent to be issued to Martha Sanders, widow of Levi B. Sanders, for certain lands therein described;

H. R. 25885. An act to extend the time for building a bridge across Red River at Shreveport, La.;

H. R. 23221. An act for the erection of a public building at the city of Athens, in the State of Ohio;

H. R. 13566. An act to amend the national banking act, and for other purposes;

H. R. 16659. An act to correct the military record of Tobe Holt;

H. R. 13122. An act to correct the military record of John Allen;

H. R. 25692. An act to provide for an additional district judge for the northern district of California;

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain municipal bonds for the purchase of the plant of the Phoenix Water Company and to extend and improve said plant;

H. R. 23650. An act to quiet title to lands on Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made and to dispose of the merchantable timber, and for other purposes; and

H. R. 23556. An act prohibiting the purchase or procurement, sale, gift, or disposition of intoxicating liquors to or for the use of minors by unlicensed persons.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 8119. An act to readjust the boundaries of the naval reserve in Porto Rico, established in pursuance of the act of July 1, 1902;

S. 6704. An act to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905;

S. 360. An act to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.;

S. 6249. An act to provide for the establishment of an agricultural bank in the Philippine Islands;

S. 8189. An act granting to the St. Louis, Iron Mountain and Southern Railway Company, a corporation, the right to construct, maintain, and operate a single track railway across the lands of the United States in the southeast quarter of the northeast quarter of section 21, township 14 north, range 6 west, of the fifth principal meridian, in the county of Independence and State of Arkansas, reserved for use in connection with the construction of Lock No. 1, upper White River, Arkansas;

S. 8299. An act to confer certain civic rights on the Metlakahtla Indians of Alaska;

S. 8622. An act granting an increase of pension to William N. Bronson;

S. 7812. An act to amend section 591 of the Revised Statutes of the United States relative to the assignment of district judges to perform the duties of a disabled judge;

S. 8327. An act to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building;

S. 7247. An act to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building;

S. 8526. An act permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 on said river; and

S. 8498. An act to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, and for other purposes.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 13122. An act to correct the military record of John Allen;

H. R. 13566. An act to amend the national banking act, and for other purposes;

H. R. 16659. An act to correct the military record of Tobe Holt;

H. R. 23221. An act for the erection of a public building at the city of Athens, in the State of Ohio;

H. R. 23988. An act to authorize a patent to be issued to Martha Sanders, widow of Levi B. Sanders, for certain lands therein described;

H. R. 25039. An act to enable the city of Phoenix, in Maricopa County, Ariz., to use the proceeds of certain bonds for the purchase of the plant of the Phoenix Water Company and to extend and improve said plant;

H. R. 23556. An act prohibiting the purchase or procurement, sale, gift, or disposition of intoxicating liquors to or for the use of minors by unlicensed persons;

H. R. 25692. An act to provide for an additional district judge for the northern district of California;

H. R. 25885. An act to extend the time for building a bridge across Red River at Shreveport, La.;

H. R. 13605. An act to satisfy certain claims against the Government arising under the Navy Department;

H. R. 25889. An act to provide for sittings of the United States circuit and districts courts of the southern district of Ohio at the city of Dayton, in said district;

H. R. 25719. An act to provide for the establishment of an immigration station at Charleston, in the State of South Carolina, and the erection in said city, on a site to be selected for said station, of a public building;

H. R. 20490. An act for the relief of Frank J. Ladner;

H. J. Res. 253. Joint resolution relating to securing a channel of 6 feet depth over Foys Flats in the Trent River, North Carolina, about 4 miles above Newbern;

H. R. 24815. An act making appropriations for the Department of Agriculture for the fiscal year ending June 30, 1908;

H. R. 23650. An act to quiet title to lands on Jicarilla Reservation, and to authorize the Secretary of the Interior to cause allotments to be made, and to dispose of the merchantable timber, and for other purposes;

H. R. 3208. An act granting a pension to Isavel T. Borthwick;

H. R. 24655. An act to authorize the legislature of Oklahoma to dispose of a certain section of school land;

H. R. 12623. An act granting a pension to Minnie C. O'Connor; and

H. R. 16235. An act authorizing the Secretary of War to deliver condemned brass fieldpieces to the city of Petoskey, Mich.

SUNDRY CIVIL BILL.

Mr. TAWNEY. Mr. Speaker, I submit the conference report and statement on the sundry civil appropriation bill, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the statement.

The conference report and statement are as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses

of the Government for the fiscal year ending June 30, 1908, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 12 and 87.

That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: In line 6 of said amendment strike out the words "of said building" and insert in lieu thereof "for said building not to exceed one million eight hundred thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment as follows: Restore the matter stricken out by said amendment, and in line 2 of the matter inserted by said amendment strike out the words "coin including fractional silver coin" and insert in lieu thereof the word "dollars;" and in lines 3 and 4 strike out the sum named and insert in lieu thereof "fifty thousand dollars;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 69, and agree to the same with an amendment as follows: At the end of the amended paragraph, after the word "available," insert the following: "*Provided*, That no part of this appropriation shall be expended for the employment of any person in making said investigation who is not now in the employ of the Government or hereafter regularly appointed after competitive examination and certification through the Civil Service Commission;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 117, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"The Spanish Treaty Claims Commission is directed to ascertain as soon as may be what has been the average cost per page of taking testimony for use in cases before said Commission by dividing the whole amount expended from appropriations under this head by the total number of pages of testimony heretofore taken. The claimant in all cases before said Commission not already finally disposed of shall hereafter be required to pay in the first instance the expense of taking his testimony, including the cross-examination of his witnesses at the rate per page so found, and to secure the payment thereof shall within ninety days from the passage of this act deposit with the clerk of said Commission the average cost of taking the claimant's testimony in cases heretofore disposed of at the rate per page aforesaid, and upon failure to make such deposit within the time fixed his case shall be dismissed with prejudice. Whenever any case is disposed of by the Commission in favor of the claimant his said deposit shall be returned to him by the clerk, but if the case is disposed of in favor of the Government so much of his deposit as is required to pay the costs of taking his testimony shall be covered into the Treasury, and the balance, if any, shall be returned to the claimant."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 126, and agree to the same with an amendment as follows: Strike out the matter inserted by said Senate amendment, leaving both propositions out of the bill; and the Senate agree to the same.

EUGENE HALE,
W. B. ALLISON,
JAMES H. BERRY,
*Managers on the part of the Senate.*

J. A. TAWNEY,
WALTER I. SMITH,
GEORGE W. TAYLOR,
*Managers on the part of the House.*

The Clerk read the statement, as follows:

STATEMENT.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments to the bill (H. R. 25745) making appropriations for the sundry civil expenses of the Government for the fiscal year 1908 submit the following written statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of said amendments, namely:

On amendment No. 4, concerning the public building at Denver, Colo. Limits the estimates for cost of said building to not exceeding $1,800,000.

On amendment No. 12: Strikes out the appropriation of $3,000,000, proposed by the Senate, for buildings for the Departments of State, Justice, and Commerce and Labor.

On amendment No. 22: Appropriates $50,000, as proposed by the House, for transportation of fractional silver coin, and $50,000 instead of $125,000, as proposed by the Senate, for the transportation of silver coin.

On amendments Nos. 68 and 69, relating to the investigation of woman and child workers: Strikes out the requirement proposed by the House that the work shall be done in the Census Office, and adds a provision requiring that no person shall be employed out of the appropriation, other than those now employed by the Government or hereafter regularly appointed after competitive examination and certification through the Civil Service Commission.

On amendment No. 87: Strikes out the provision proposed by the Senate establishing a national park in Idaho.

On amendment No. 117, relating to the Spanish Treaty Claims Commission: Restores to the bill substantially the provision proposed by the House with reference to the payment of costs by claimants in cases before the Commission, adding thereto a provision for refund of deposits of such costs to successful claimants and the excess of such deposits over actual costs to unsuccessful claimants.

On amendment No. 126: Strikes out of the bill the provision proposed by the House regulating purchase of supplies for the Executive Departments at Washington, and also strikes out the appropriations proposed by the Senate for acquiring land for parks in the District of Columbia.

J. A. TAWNEY,
WALTER I. SMITH,
GEO. W. TAYLOR,
*Managers on the part of the House.*

Mr. TAWNEY. Mr. Speaker, I move the adoption of the conference report.

The question was taken; and the conference report was agreed to.

COMMERCE BETWEEN UNITED STATES AND GERMANY.

Mr. RANDELL of Texas. Mr. Speaker——

The SPEAKER. For what purpose does the gentleman rise?

Mr. RANDELL of Texas. I wish to bring up a privileged matter. It is a question of privilege.

Mr. PAYNE. Mr. Speaker, I rise to a privileged question.

Mr. WILLIAMS. Mr. Speaker, I submit that the gentleman from Texas [Mr. RANDELL] has a right to state the matter so that the Chair may determine whether it is privileged or not.

The SPEAKER. There are two privileged motions.

Mr. RANDELL of Texas. I have one, Mr. Speaker. [Laughter.] Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his question of privilege.

Mr. RANDELL of Texas. I wish to propound a parliamentary inquiry first, to ask the Speaker whether or not it is in order for me to call up a privileged resolution and move its passage?

The SPEAKER. It is in order for the gentleman to present any question of privilege.

Mr. RANDELL of Texas. Mr. Speaker, I call up privileged resolution No. 829, and move its passage.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolution No. 829.

Whereas it is currently reported that negotiations have been entered into by the Executive Department of the United States, and under its direction, with the Government of the German Empire affecting the commerce between Germany and the United States and the tariffs and regulations on and concerning the same, thereby changing the conditions of trade between these countries and affecting the revenues of this Government received from import duties without the action of Congress; therefore, be it

*Resolved*, That the President of the United States is hereby requested, if not incompatible with the public interest, to direct the Secretary of State to report to him for the information of the House:

First. What agreement or agreements, if any, have been entered into between the authorities of the United States and the German Government, or their agents or representatives, affecting the commerce of the two countries in reference to imports, or the tariff on or regulations thereof, which directly or indirectly affect the revenues or import duties of this Government.

Second. What propositions, if any, have been made by either party or its agents looking to any change in the tariff charges or trade regulations between Germany and the United States affecting, either directly or indirectly, the revenues of this Government or its trade relations with Germany.

Third. That all papers and documents, correspondence, or regulations on the matter herein inquired about in possession of the State Department be furnished for the information of the House.

Mr. WATSON. Mr. Speaker, I make the point of order that this is not a privileged question and that the preamble itself destroys the very idea of privilege because it compels a vote.

Mr. DALZELL. Mr. Speaker, a parliamentary inquiry. Was not this same resolution reported from the Committee on Ways and Means and laid upon the table?

Mr. RANDELL of Texas. Mr. Speaker, I claim the floor.

The SPEAKER. Well, the gentleman can not have the floor until the point of order is disposed of.

Mr. RANDELL of Texas. Mr. Speaker——

The SPEAKER. The Chair is ready to rule. It has been frequently held that a preamble to a resolution of inquiry that makes an alleged statement of fact destroys the privilege, although the balance of the resolution might be privileged. That has been frequently held by many Speakers and was ruled by the present Speaker at the last session of Congress on a resolution presented by the gentleman from New York [Mr. COCKRAN]. Clearly this is not privileged, and the Chair sustains the point of order.

Mr. RANDELL of Texas. Mr. Speaker, may I be heard?

The SPEAKER. After all, it is in the discretion of the Chair, and it is so well established by repeated decisions from various Speakers, including the present Speaker, that at the hour of ten minutes past 12 o'clock the Chair does not desire to hear anything touching the point of order.

Mr. PAYNE. Mr. Speaker, I move that the House do now take a recess until 9.30 o'clock this morning.

Mr. RANDELL of Texas. Mr. Speaker, I respectfully appeal from the decision of the Chair.

The SPEAKER. Pending the appeal, the Chair entertains the privileged motion, namely, that the House do now take a recess until to-day at 9.30 o'clock.

The motion was agreed to.

Accordingly (at 12 o'clock and 12 minutes a. m., Monday, March 4, 1907) the House took a recess until 9.30 o'clock a. m.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the chief justice of the Court of Claims, requesting the return to the court of the papers submitting to Congress the findings in the case of Irving McCoy against the United States—to the Committee on War Claims, and ordered to be printed.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bill and memorials of the following titles were introduced and severally referred as follows:

By Mr. BRICK: A bill (H. R. 25890) to amend the laws of the United States relating to the registration of trade-marks—to the Committee on Patents.

By Mr. GRONNA: Memorial from the legislature of North Dakota, praying Congress to pass a law giving to each respective State of the Union the right to ditch into, alter, modify, or destroy, if need be, part or the whole of any meandered lakes or navigable streams—to the Committee on the Judiciary.

Also, memorial from the legislature of North Dakota, recommending a constitutional amendment to prohibit polygamy and to secure uniform divorce laws—to the Committee on the Judiciary.

By the SPEAKER: Memorial from the legislature of North Dakota, recommending a constitutional amendment to prohibit polygamy and to secure uniform divorce laws—to the Committee on the Judiciary.

## PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills of the following titles were introduced and severally referred as follows:

By Mr. WILLIAMS: A bill (H. R. 25888) for the relief of Samuel Phillips—to the Committee on Military Affairs.

By Mr. CLAYTON: A bill (H. R. 25891) to relieve George W. Black and J. R. Wilson from a certain judgment in favor of the United States, and to relieve George W. Black, J. R. Wilson, and W. M. Newell of a certain judgment in favor of the United States—to the Committee on the Judiciary.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committee was discharged from the consideration of bill of the following title; which was thereupon referred as follows:

A bill (H. R. 25487) for the relief of Andrew B. Baird and James S. Baird, and to confirm all sales and dispositions heretofore made by the United States out of the confiscated land of the late Spruce M. Baird, their father, known as Baird's ranch, in the Territory of New Mexico—Committee on War Claims discharged, and referred to the Committee on the Public Lands.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. FOSTER of Vermont: Petition of Rev. A. C. Brown and others, of Essex, Vt., for passage of the Littlefield bill—to the Committee on the Judiciary.

Also, petition of F. S. Yager and 2,000 other citizens of California, asking for modification of the Chinese-exclusion law—to the Committee on Foreign Affairs.

By Mr. HOWELL of Utah: Petition of citizens of the State of Utah, against certain features of the proposed new copyright law—to the Committee on Patents.

By Mr. NORRIS: Petition of Solon R. Town, M. D., Robert H. Wolcott, and other citizens of Nebraska, asking passage of bill S. 5888—to the Committee on Military Affairs.

By Mr. STEPHENS of Texas: Petition of farmers of Donley County, Tex., asking for legislation to suppress gambling in futures on farm products—to the Committee on the Judiciary.

# SENATE.

## MONDAY, *March 4, 1907.*

[*Continuation of legislative day of Saturday, March 2, 1907.*]

At the expiration of the recess (at 9.30 a. m., March 4) the Senate reassembled.

### RECESS.

Mr. HALE. I move that the Senate take a recess until a quarter after 10 o'clock.

The motion was agreed to; and at the expiration of the recess (at 10.15 a. m.) the Senate reassembled.

### INDIAN AND FREEDMEN ENROLLMENT CASES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of the 28th ultimo, certain information relative to the number of Indian and freedmen enrollment cases pending before the Commissioner to the Five Civilized Tribes on February 25, 1907, and also in the office of the Commissioner of Indian Affairs on review, and before the Department of the Interior, etc.; which was referred to the Committee on Indian Affairs, and ordered to be printed.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

### ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the Vice-President:

H. R. 25672. An act to amend an act entitled "An act to authorize the Ox Bow Power Company, of South Dakota, to construct a dam across the Missouri River;"

H. R. 25851. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes;

H. J. Res. 219. Joint resolution providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency;

H. J. Res. 229. Joint resolution to provide for the printing of 250,000 copies of the Special Report of the Diseases of Horses;

H. J. Res. 255. Joint resolution providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session;

H. J. Res. 256. Joint resolution authorizing the Attorney-General to print 850 copies of the Session Laws; and

H. J. Res. 257. Joint resolution authorizing the Secretary of the Treasury to print 1,000 additional copies of the Annual Report of the Director of the Mint.

### PETITIONS AND MEMORIALS.

Mr. HANSBROUGH. I present a joint memorial of the legislature of North Dakota, which I ask may be printed in the RECORD and referred to the Committee on Agriculture and Forestry.

The memorial was referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Memorial offered by Mr. Stade.

Whereas numerous "meandered lakes and navigable streams" located in North Dakota, by reason of higher altitudes or of obstructions made by silt or other materials, thus holding back the water, are made to overflow and annually flood and keep in a state of moisture many thousands of acres of swamp or semiswamp lands; and

Whereas by virtue of large spring freshets many of such lakes, streams, or rivers overflow and inundate vast areas of land; and

Whereas in order to drain such lands it becomes necessary to ditch into, alter, or destroy such lakes, streams, or rivers, by which means the water can be conducted away and thereby drain such named lakes, fitting them for tillage or agricultural use; and

Whereas by such method of drainage the wealth of the people of North Dakota can be increased millions of dollars, and the taxable property of the State can be equally multiplied; now,

Therefore, the legislative assembly of the State of North Dakota hereby passes a joint memorial to the Congress of the United States of America, praying that body to pass a law giving to each respective State of the Union the right to ditch into, alter, modify, or destroy, if need be, part or the whole of any "meandered lakes or navigable streams," if the same shall be necessary to drain any swamp or semiswamp lands within their respective borders: *Provided*, Said drainage, alterations, or modifications of such lakes, streams, or rivers shall be done under the sanction of or in cooperation with national commissioners or agents who shall be appointed or detailed under law for such purposes: Therefore, be it

*Resolved by the legislative assembly of North Dakota*, That engrossed copies of the joint memorial be at once sent to the North Dakota Senators and Representatives in Congress, and they be instructed to draw up and introduce a bill in Congress that shall cover in a clear and comprehensive manner the different features or phases herein named of the question of drainage in the different States of the nation.

R. S. LEWIS,
*President of the Senate.*
JAMES W. FOLEY,
*Secretary of the Senate.*
TREADWELL TWICHELL,
*Speaker of the House.*
P. D. NORTON,
*Chief Clerk of the House.*

I, James W. Foley, secretary of the senate, do hereby certify that the foregoing memorial originated in and was adopted by the senate of the tenth legislative assembly of the State of North Dakota and was concurred in by the house of representatives.

JAMES W. FOLEY,
*Secretary of the Senate.*

Mr. HANSBROUGH. I present a concurrent resolution of the legislature of the State of North Dakota, which I request may be read at the desk and referred to the Committee on the Judiciary. It is short.

Mr. GALLINGER. I call attention to the fact that my motion to concur in the amendment made by the House of Representatives to the shipping bill is in order.

The VICE-PRESIDENT. That is the pending question.

Mr. GALLINGER. I will ask that the motion be put after the memorial has been read.

The concurrent resolution was read, and referred to the Committee on the Judiciary, as follows:

Concurrent resolution offered by Mr. Buttz.—Memorial to Congress for constitutional amendment.

Whereas the recent investigation made by the Senate of the United States as to the qualifications of one of its members has developed the fact that polygamy exists in several of the States, notwithstanding the laws that exist in said States prohibiting the same; and

Whereas the practice of polygamy is condemned by the law-abiding people of the United States, and there is a sentiment prevailing throughout the country for a more effectual remedy to eradicate the evil complained of by giving the Federal courts jurisdiction over and control of that question as well as that of divorces, at the same time reserving to each State the right to enforce its own laws relating to marriage: Therefore, be it

*Resolved by the house of representatives of North Dakota (the senate concurring)*, That the Congress of the United States is hereby petitioned to take the necessary steps to provide for a constitutional amendment, to be submitted to the several States, whereby polygamy and polygamous cohabitation shall be prohibited by giving the Federal courts jurisdiction to enforce any and all acts of the United States Congress upon the subject of polygamy and polygamous practices, as well as upon uniform divorce laws throughout the several States: Be it

*Further resolved*, That the Secretary of State be, and he hereby is, directed to transmit copies of this memorial to the Senate and House of Representatives of the United States, and to the members of said bodies representing this State therein; also to transmit copies hereof to the legislature of all other States of the United States.

TREADWELL TWICHELL,
*Speaker of the House.*
P. D. NORTON,
*Chief Clerk of the House.*
R. S. LEWIS,
*President of the Senate.*
JAMES W. FOLEY,
*Secretary of the Senate.*

I, P. D. Norton, chief clerk of the house, do hereby certify that the foregoing concurrent resolution originated in and was adopted by the house of representatives of the tenth legislative assembly of the State of North Dakota and was concurred in by the senate.

P. D. NORTON,
*Chief Clerk of the House.*

BISMARCK, N. DAK., *February 26, 1907.*

Mr. WARREN presented a petition of sundry ranchmen in the State of Wyoming, praying for the enactment of legislation providing that actual settlers may lease the Government land contiguous to their patented lands; which was referred to the Committee on Agriculture and Forestry.

Mr. DICK. I present sundry telegrams from telegraph operators in the State of Ohio, relative to the sixteen-hour bill; which I ask may lie on the table and be printed in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered.

The telegrams were ordered to lie on the table, as follows:

From A. J. Zint, of Wapakoneta; W. J. Kroger and J. R. Howser, of Troy; W. V. Van Meter, of Cridersville; B. S. Bowman, of Payne; H. E. Fling, of Payne; C. C. Hamlin, of Rudolph; L. T. Agnew, of Oakwood; T. W. Sullivan, of Arma; J. E. Cross, J. W. Shuster, and O. C. Knight, of Peebles; Edward Gaudern and C. W. Newcomer, of Bryan Depot; Herbert H. Brickett, of Newton; S. E. Klein, H. B. Workman, H. J. Gerlach, J. R. Baxter, and C. E. Lemon, of Circleville; F. P. Reynolds and W. R. Ruckles, of Van Wert; A. J. Tilden and A. H. Bensman, of Columbus Grove; J. E. O'Hara, of West Toledo; A. J. Ebertine, of West Toledo; H. W. Clark, of West Toledo; R. R. Kibler, O. G. Harper, B. E. Baughn, P. W. Heaton, and E. Crassley, of Greenfield; A. A. Delf, of Mansfield; L. C. Ramsey; James Shine, of Sidney; F. E. Marker; S. Cashner, of Wapakoneta; C. D. Blankenbaker, of Wapakoneta; W. V. Saltzman and C. J. Fenstermaker, of Phalanx; C. V. Yezzell, of Cincinnati; H. H. Hess, of Sidney; J. F. Justice; Carter, Moyer, Babcock, Kilnite, Fenstermaker, Holbrook, Taylor, and Lowrie, of Leavittsburg; G. D. Wilson, of Willoughby; S. W. Usher, of Willoughby; from C. H. McCoy, Rose, Vanhorn, Baumgardner, Bratton, Lucas, Hammel, Landis, Brooker, Close, Brice, Blank, Ott, Stafford, Davis, Harper, Weaver, Shaffer, Wood, Rogers, George, and Goodrich, of Massillon; from T. S. Crissing, of Martel; from W. A. Fry, of Columbus; from C. D. Hull, of Sandusky; from Kenny, Mills, Icenhour, Arnold, and Carpenter, of Floodwood; from S. W. Mosier, of Waverly; from G. W. Bell, George F. Corley, S. A. Davis, and J. E. Collins, of Clinton; from O. E. Lewis, of Oxford; from George Farrell and John H. Fitch, of Youngstown; from Ashpaugh, Carpenter, and Burnoon, of Tontogany; from D. J. O'Hara, of Toledo, all in the State of Ohio.

Mr. DICK presented a memorial of Waterford Grange, No. 231, Patrons of Husbandry, of Waterford, Ohio, remonstrating against the passage of the so-called "ship-subsidy bill;" which was ordered to lie on the table.

He also presented a memorial of the Society of Natural History of Cincinnati, Ohio, remonstrating against the enactment of legislation to abolish the Division of Biological Survey in the Department of Agriculture; which was ordered to lie on the table.

He also presented a petition of the Civic Club of Sandusky, Ohio, praying for the enactment of legislation to regulate the employment of child labor; which was ordered to lie on the table.

Mr. FLINT presented petitions of sundry citizens of Ramona, San Diego, and National City, all in the State of California, praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which were referred to the Committee on the Judiciary.

Mr. DEPEW presented the petition of Ernest N. Pattee, of Syracuse, N. Y., and the petition of B. F. Stinson, of Buffalo, N. Y., praying for the adoption of certain amendments to the present denatured-alcohol law; which were ordered to lie on the table.

He also presented a memorial of the executive committee of the Oystermen's Protective Association of the State of New York, remonstrating against the enactment of any legislation to prohibit interstate commerce in opened oysters; which was referred to the Committee on Interstate Commerce.

He also presented a petition of sundry citizens of Corinth, N. Y., praying for the enactment of legislation to regulate the interstate transportation of intoxicating liquors; which was referred to the Committee on the Judiciary.

### JAMES W. KENNEY.

Mr. LODGE. I ask the Senator from New Hampshire to yield to me for a moment in order that I may call up a small bill, which will not take a moment. It is a House bill.

Mr. GALLINGER. I will yield for that purpose.

Mr. LODGE. I ask the Senate to proceed to the consideration of the bill (H. R. 8727) for the relief of James W. Kenney and the Union Brewing Company.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It proposes to pay James W. Kenney, proprietor of the Park Brewery, $337.50, and to James W. Kenney, treasurer of the Union Brewing Company, $440.62, these sums having been paid by said James W. Kenney under an illegal assessment for short-tax beer.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

### TRANSFER OF DOCUMENTS OF INDUSTRIAL COMMISSION.

Mr. HANSBROUGH. I ask that the joint resolution (H. J. Res. 211) authorizing the transfer of the files, books, and pamphlets of the Industrial Commission be laid before the Senate and considered. It was read last night.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ESTATE OF ARCHIBALD D. PALMER.

Mr. GALLINGER. I yield to the Senator from Wyoming [Mr. WARREN] to offer a resolution.

Mr. WARREN submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That the bill (S. 8363) for the relief of Lizzie Dickson, administratrix of Archibald D. Palmer, deceased, with all accompanying papers, be, and the same is hereby, referred to the Court of Claims for a finding of facts under the terms of the act of March 3, 1887, and generally known as the Tucker Act.

REPORT OF A COMMITTEE.

Mr. FLINT, from the Committee on Public Lands, to whom was referred the bill (S. 6626) for the establishment of a drainage fund and the construction of works for the reclamation of swamp and overflowed lands, reported it with amendments, and submitted a report thereon.

BILL INTRODUCED.

Mr. DICK introduced a bill (S. 8627) to make accessible to inventors and manufacturers, manual training, industrial, and scientific schools the files of the Patent Office and scientific bureaus of the several Departments of the Government by the publication of card files of patents and card-subject indexes of the scientific libraries of the Patent Office and of the scientific bureaus of the Government relating to industrial arts and commerce; which was read twice by its title, and referred to the Committee on Patents.

OMAHA NATIONAL BANK.

Mr. GALLINGER. I yield to the Senator from Nebraska [Mr. MILLARD], and then I will not yield further for the present.

Mr. MILLARD submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That the House of Representatives be requested to return to the Senate the bill (S. 171) entitled "A bill for the relief of the Omaha National Bank," and that the same be referred to the Court of Claims, in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, generally known as the Tucker Act. And the said court shall proceed with the same in accordance with the provisions of such act and report to the Senate in accordance therewith.

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

The VICE-PRESIDENT. The question is on agreeing to the motion of the Senator from New Hampshire [Mr. GALLINGER] to concur in the amendment made by the House of Representatives.

Mr. CARMACK rose.

Mr. GALLINGER. Mr. President——

Mr. BERRY. I think the Senator from Tennessee [Mr. CARMACK] has the floor.

Mr. GALLINGER. The Senator from Tennessee can not hold the floor after the recess.

The VICE-PRESIDENT. The Senator from New Hampshire has the floor.

Mr. McLAURIN. Mr. President——

The VICE-PRESIDENT. Does the Senator from New Hampshire yield to the Senator from Mississippi?

Mr. GALLINGER. For what purpose does the Senator rise?

Mr. McLAURIN. I wish to say that the Senator from New Hampshire can certainly not hold the floor on this measure, and thereby prohibit debate.

Mr. GALLINGER. Mr. President, I have the floor.

The VICE-PRESIDENT. The Senator from New Hampshire will suspend while the Senate receives a message from the House of Representatives.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

The message also announced that the House had passed the bill (S. 8614) to amend an act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896.

The message further announced that the House had passed concurrent resolution relative to the enrollment of the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon; in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the Vice-President:

S. 6447. An act to authorize the appointment of Acting Asst. Surg. George Plummer, U. S. Navy, as an assistant surgeon in the United States Navy;

S. 8012. An act to erect a monument on the Tippecanoe battle ground, in Tippecanoe County, Ind.;

S. 8230. An act for the relief of Harold D. Childs;

S. 8292. An act providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the battle of New Orleans, at Chalmette, La., and making the necessary appropriation therefor;

S. 8568. An act granting an increase of pension to Rosanna A. May;

S. 8585. An act for the relief of Charles W. Spalding;

H. R. 13304. An act to provide a suitable memorial to the memory of Christopher Columbus;

H. R. 17415. An act to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska;

H. R. 25745. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy;

S. R. 29. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army memorial in Washington, D. C.; and

S. R. 98. Joint resolution granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany.

HOURS OF LABOR OF RAILROAD EMPLOYEES.

Mr. GALLINGER. Mr. President——

Mr. FLINT. Will the Senator from New Hampshire yield to me?

Mr. GALLINGER. For what purpose?

Mr. FLINT. I wish to present a conference report on Senate bill 5133.

Mr. GALLINGER. Of course I yield for that purpose. I have to do it.

Mr. FLINT submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recedes from its disagreement to the House amendment, and agrees to the same with amendments as follows:

In line 3, page 1, strike out the word "and" and insert "or" in said amendment.

In line 13, page 1, strike out the word "corporation" and insert in lieu thereof the words "common carrier" in said amendment.

In line 13, page 2 of said amendment, after the word "continue," insert "or again go;" and in the same line strike out the four concluding words of said line, reading "or go on duty."

In line 14, page 2 of said amendment, after the word "eight," insert the word "consecutive."

In lines 14 and 15, page 2, strike out the words "within such twenty-four-hour period."

In line 15, page 2, strike out all after the word "*Provided*" to and including the word "daytime," in line 24, and insert the following: "That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches, reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor

for a longer period than thirteen hours in all towers, offices places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four-hour period on not exceeding three days in any week: *Provided further*, The Interstate Commerce Commission may, after full hearing, in a particular case and for good cause shown, extend the period within which a common carrier shall comply with the provisions of this proviso as to such case."

In line 9, page 3, after the word "suits," insert the words "to be."

In line 13, page 3, strike out the word "verified."

In line 15, page 3, strike out the words "three years" and insert "one year."

In line 21, page 3, after the word "of," insert the word "all;" and in the same line strike out the words "duly authorized" and insert in lieu thereof the words "officers and."

In line 24, page 3, after the word "its," insert the words "officer or."

In lines 1 and 2, page 4, strike out the words "with the exercise of reasonable prudence."

Strike out all of lines 7 and 8, page 4, and insert in lieu thereof "and all powers granted to the Interstate Commerce Commission are hereby extended to it in the execution of this act."

And the Senate agree to the same.

BOIES PENROSE,
FRANK P. FLINT,
JNO. W. DANIEL,
*Managers on the part of the Senate.*

W. P. HEPBURN,
IRVING P. WANGER,
W. C. ADAMSON,
*Managers on the part of the House.*

The VICE-PRESIDENT. The question is on agreeing to the report.

Mr. CULLOM. I think it would be well for some member of the conference committee to explain exactly the difference between the report just made and the one previously rejected by the Senate.

Mr. FLINT. The only change which has been made in the report is in reference to the telegraph operators. We have adopted the House provision with a proviso to the effect that in any given case, upon application to the Interstate Commerce Commission and upon a hearing, the Commission may extend the time in that case in which the act shall go into effect.

Mr. NEWLANDS. There was so much confusion in the Chamber it was difficult to hear the statement of the Senator from California. I should like to inquire whether section 2 of the conference report is substantially in the language of the so-called "Murphy amendment" to the House bill?

Mr. FLINT. It is.

Mr. PATTERSON. Mr. President, the new report of the conference committee embraces the provisions for which those who are advocating the cause of the telegraph operators contended, with the modification suggested by the Senator from California, namely, that upon good cause shown the Interstate Commerce Commission may suspend the operation of the act with reference to a particular road for a reasonable period. The theory upon which that change has been made is that a sufficient number of operators may not be immediately obtainable to carry out the provisions of the statute.

The bill as reported is not altogether satisfactory to the friends of the measure representing the wishes of the operators, but in the main it is very satisfactory, and I have no doubt in the world but that within a year or two, when the operations of the act have been put into practical effect, whatever defects or omissions may be disclosed, the amendments that experience will show ought to be made will be adopted by Congress.

There is no reason, so far as I know, from the standpoint of friendship for the measure, why the conference report should not be adopted.

Mr. DANIEL. Mr. President, last night this report was unanimously made by the conferees of both Houses——

Mr. FLINT. Mr. President——

The VICE-PRESIDENT. Does the Senator from Virginia yield to the Senator from California?

Mr. DANIEL. Certainly.

Mr. FLINT. Mr. President, I simply desire to make a statement in reply to a question which was asked by the Senator from Nevada [Mr. NEWLANDS], and that is, if the conference report is the same as the Murphy amendment. I will state that it is, except that an error was made in the report and several words omitted. The House adopted a concurrent resolution correcting the error. It is necessary that this concurrent resolution should be adopted by the Senate. I am very anxious that the conference report should be disposed of so that the concurrent resolution may then be acted on.

Mr. NEWLANDS. I will ask the Senator whether there is danger in the delay of the consideration of this bill?

Mr. FLINT. There is, and that is my reason for calling attention to it at this time.

Mr. DANIEL. Mr. President, this is a unanimous report of the conferees of both Houses. Last night it was promptly taken up by the House of Representatives and agreed to on a roll call by a unanimous vote. It is to be hoped that it will also receive a unanimous vote in this body.

The only change made since the former conference report was made was in pursuance of the instruction of the House of Representatives, and to the amendment thus made to the bill with respect to telegraph operators there is inserted this further proviso:

> The Interstate Commerce Commission may, after full hearing in a particular case and for good cause shown, extend the period within which a common carrier shall comply with the provisions of this proviso as to said case.

This amendment proved to be a solvent of difficulties, and the way is now clear for those who desire a reasonable and just measure on this subject to vote for it.

Mr. McCREARY. I desire to ask the Senator from Virginia a question in regard to this conference report concerning the provision relating to telegraph operators.

Mr. DANIEL. As agreed to it is practically the same as the bill as it passed the other House, with the one change which I have stated.

Mr. McCREARY. As I understand, this report has been agreed to by the other House?

Mr. DANIEL. As I previously stated, it was unanimously agreed to by the other House last night. That is in the RECORD of to-day, and I was over in the House, heard the roll called, and witnessed the procedure.

The VICE-PRESIDENT. The question is on agreeing to the conference report.

Mr. FLINT. On that I ask for the yeas and nays, Mr. President.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from Virginia [Mr. MARTIN], but I transfer that pair to the junior Senator from Iowa [Mr. DOLLIVER] and vote. I vote "yea."

Mr. DEPEW (when his name was called). I am paired with the Senator from Louisiana [Mr. McENERY], but as we are agreed on this question I am at liberty to vote. I vote "yea."

The roll call was concluded.

Mr. ALLISON. I desire to state that my colleague [Mr. DOLLIVER] is necessarily absent. If present, he would vote "yea."

Mr. LONG. I desire to state that my colleague [Mr. CURTIS] is unavoidably absent, but, if present, he would vote "yea."

Mr. McCUMBER. I have a general pair with the junior Senator from Louisiana [Mr. FOSTER], who is necessarily absent. I have been requested to announce that if he were present the Senator from Louisiana would vote "yea," and as I am in accord with him on this question I am at liberty to vote, and I vote "yea."

Mr. FLINT. I have been requested to state that the senior Senator from Pennsylvania [Mr. PENROSE] is necessarily absent from the Chamber this morning, and that if he were present he would vote "yea."

The result was announced—yeas 76, nays 0, as follows:

YEAS—76.

So the report was agreed to.

The VICE-PRESIDENT laid before the Senate the following concurrent resolution of the House of Representatives; which was read:

IN THE HOUSE OF REPRESENTATIVES,
*March 2, 1907.*

*Resolved by the House of Representatives (the Senate concurring)*, That in enrolling the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, the enrolling clerk be directed to correct the engrossed amendment of the House to the Senate bill by striking out all after the word "Provided," in section 2 of said amendment, and inserting "*Provided*, That no operator, train dispatcher, or other employee who, by the use of the telegraph or telephone dispatches, reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four-hour period or not exceeding three days in any week."

The VICE-PRESIDENT. The question is on agreeing to the concurrent resolution of the House of Representatives.

The concurrent resolution was agreed to.

NICHOLAS M. HAWKINS.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying bill, referred to the Committee on Pensions, and ordered to be printed:

*To the Senate:*

In compliance with the resolution of the Senate (the House of Representatives concurring) of the 2d instant, I return herewith Senate bill No. 5623, entitled "An act granting an increase of pension to Nicholas M. Hawkins."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 2, 1907.*

WILLIAM N. BRONSON.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying bill, referred to the Committee on Pensions, and ordered to be printed:

*To the Senate:*

In compliance with the resolution of the Senate (the House of Representatives concurring) of the 2d instant, I return herewith Senate bill No. 7822, entitled "An act granting an increase of pension to William N. Bronson."

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 2, 1907.*

THE MERCHANT MARINE.

The Senate resumed the consideration of the amendment of the House of Representatives to the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. GALLINGER. Mr. President, as this is the last day of the session, I will ask the Senate whether a vote may be taken on the bill that is under consideration?

Mr. CARMACK. Mr. President, I am sorry to say to the Senator from New Hampshire that there will be no vote taken until after considerable debate.

Mr. GALLINGER. I greatly regret that my request is refused. After the two days of rather frivolous debate on this very important bill I feel that it is my privilege as well as my duty in closing the debate to call attention very briefly to a few salient points and to emphasize the fact that, as I see the situation, we ought to have legislation on this very important subject.

In the first place, Mr. President, I desire to ask unanimous consent to have the portion of the ocean mail law of March 3, 1891, which I have marked placed in the RECORD without taking the time to read it.

The VICE-PRESIDENT. In the absence of objection, permission is granted.

THE EXISTING OCEAN MAIL LAW.

The portion of the law referred to is as follows:

The Postmaster-General is hereby authorized and empowered to enter into contracts for a term not less than five nor more than ten years in duration, with American citizens, for the carrying of mails on American steamships, between ports of the United States and such ports in foreign countries, the Dominion of Canada excepted, as in his judgment will best subserve and promote the postal and commercial interests of the United States, the mail service on such lines to be equitably distributed among the Atlantic, Mexican Gulf, and Pacific ports. Said contracts shall be made with the lowest responsible bidder for the performance of said service on each route, and the Postmaster-General shall have the right to reject all bids not in his opinion reasonable for the attaining of the purposes named.

Before making any contract for carrying ocean mails in accordance with this act the Postmaster-General shall give public notice by advertising once a week, for three months, in such daily papers as he shall select in each of the cities of Boston, New York, Philadelphia, Baltimore, New Orleans, St. Louis, Charleston, Norfolk, Savannah, Galveston, and Mobile, and when the proposed service is to be on the Pacific Ocean, then in San Francisco, Tacoma, and Portland. Such notice shall describe the route, the time when such contract will be made, the duration of the same, the size of the steamers to be used, the number of trips a year, the times of sailing, and the time when the service shall commence, which shall not be more than three years after the contract shall be let. The details of the mode of advertising and letting such contracts shall be conducted in the manner prescribed in chapter 8 of Title XLVI of the Revised Statutes for the letting of inland mail contracts so far as the same shall be applicable to the ocean mail service.

The vessels employed in the mail service under the provisions of this act shall be American-built steamships, owned and officered by American citizens, in conformity with the existing laws, or so owned and officered and registered according to law, and upon each departure from the United States the following proportion of the crew shall be citizens of the United States, to wit: During the first two years of such contract for carrying the mails, one-fourth thereof; during the next three succeeding years, one-third thereof; and during the remaining time of the continuance of such contract at least one-half thereof; and shall be constructed after the latest and most approved types, with all the modern improvements and appliances for ocean steamers.

They shall be divided into four classes. The first shall be iron or steel screw steamships, capable of maintaining a speed of 20 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 8,000 tons. No vessel except of said first class shall be accepted for said mail service under the provisions of this act between the United States and Great Britain. The second class shall be iron or steel steamships, capable of maintaining a speed of 16 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 5,000 tons. The third class shall be iron or steel steamships, capable of maintaining a speed of 14 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 2,500 tons. The fourth class shall be iron or steel or wooden steamships, capable of maintaining a speed of 12 knots an hour at sea in ordinary weather, and of a gross registered tonnage of not less than 1,500 tons. It shall be stipulated in the contract or contracts to be entered into for the said mail service that said vessels may carry passengers with their baggage in addition to said mails, and may do all ordinary business done by steamships.

All steamships of the first, second, and third classes employed as above and hereafter built shall be constructed with particular reference to prompt and economical conversion into auxiliary naval cruisers, and according to plans and specifications to be agreed upon by and between the owners and the Secretary of the Navy, and they shall be of sufficient strength and stability to carry and sustain the working and operation of at least four effective rifled cannon of a caliber of not less than 6 inches, and shall be of the highest rating known to maritime commerce. And all vessels of said three classes heretofore built and so employed shall, before they are accepted for the mail service herein provided for, be thoroughly inspected by a competent naval officer or constructor detailed for that service by the Secretary of the Navy; and such officer shall report, in writing, to the Secretary of the Navy, who shall transmit said report to the Postmaster-General; and no such vessel not approved by the Secretary of the Navy as suitable for the service required shall be employed by the Postmaster-General as provided for in this act.

The rate of compensation to be paid for such ocean mail service of the said first-class ships shall not exceed the sum of $4 a mile, and for the second-class ships $2 a mile, by the shortest practicable route, for each outward voyage; for the third-class ships not to exceed $1 a mile, and for the fourth-class ships two-thirds of $1 a mile, for the actual number of miles required by the Post-Office Department to be traveled on each outward-bound voyage: *Provided*, That in the case of failure from any cause to perform the regular voyages stipulated for in said contracts or any of them a pro rata deduction shall be made from the compensation on account of such omitted voyage or voyages; and that suitable fines and penalties may be imposed for delays or irregularities in the due performance of service according to the contract, to be determined by the Postmaster-General: *Provided further*, That no steamship so employed and so paid for carrying the United States mails shall receive any other bounty or subsidy from the Treasury of the United States.

AN EXTENSION OF THE PRESENT ACT.

Mr. GALLINGER. Mr. President, I want to direct the attention of Senators to the fact that the bill now under consideration proposes simply an enlargement and extension of that act, which has been in operation for the last sixteen years, and to which nobody, so far as I know, has ever objected.

It will be observed that the proposed lines are all to run to South America—two from the Atlantic coast, to Brazil and Argentina, respectively; one from the Pacific coast, to Peru and Chile, and one from the Gulf of Mexico, to Brazil.

I regret exceedingly that the House substitute now before us abandons all assistance to lines from the Pacific coast to Japan, China, the Philippines, and Australasia. To my mind that action was most unfortunate, as our future trade, in addition to that with South America, must necessarily come largely from the Orient. If it was earlier in the session I would ask for a conference, in the hope that some additional appropriations for lines to Oriental ports might be secured; but, manifestly, it is too late to accomplish that result, hence the motion has been made to agree to the House amendment. While, as I have suggested, the bill is not what some of us would desire, it is an enlargement of the existing ocean mail law, and as such it is accepted.

THE FOUR PROPOSED LINES.

The bill as amended by the House includes four of the ocean-mail routes contained in the bill framed by the Mer-

chant-Marine Commission, reported from the Committee on Commerce, and passed by the Senate February 14, 1906.

On all of these four lines 16-knot steamers are required, a speed on the average above that of the mail lines from Europe to South America, and yet not so high that the vessels performing the service would be unable to carry large cargoes of general merchandise. Under the terms of the ocean-mail law of 1891, made applicable to this proposed measure, all steamers performing this service on all four routes must be built on designs approved by the Navy Department, and must be held available for Government use in war. I understand they will be of 6,000 tons and upward.

An amendment adopted by the House reserves the proposed subventions exclusively to vessels hereafter built in the United States, so that this mail service can not be performed by existing steamers, and the creation of an entire new ocean-mail fleet is guaranteed—ships of the highest rating known to maritime commerce and of the latest and most improved construction.

The proposed line from the Atlantic coast to Brazil would require at least four steamers for a fortnightly service, and five steamers if the regularity of schedule prescribed by our ocean-mail laws were to be secured beyond question. The line to Argentina would require at least five, and probably six, steamers. The line from the Gulf coast to Brazil would require at least four, and probably five, steamers. The line from the Pacific coast to Peru and Chile would require at least five, and probably six, steamers. There must be, therefore, all told, a fleet of from eighteen to twenty-two new steamships of superior speed, valuable both for commerce and for the national defense, provided these four proposed lines go into full operation.

Provision is made on each route for both a monthly and a fortnightly service. The fortnightly service calls for a maximum compensation of $600,000 a year on the two lines to Brazil, $800,000 on the line to Argentina, and $600,000 on the line from the Pacific coast to Peru and Chile, which line would have the advantage of the protection of the coastwise laws if it touched at the Isthmus of Panama on merchandise shipped via the Isthmus in transit between the Atlantic and Pacific coasts of the United States.

The total subvention to the proposed lines on a basis of monthly sailings would be $1,300,000 a year; on a fortnightly service, $2,600,000. The annual profit which the United States now makes out of its ocean-mail service, as stated by the Postmaster-General, is about $3,000,000 a year; and there seems to be no good reason why this profit should not be devoted to extending our mail service and increasing our commerce.

It will be observed that this bill proposes $600,000 a year for a fortnightly mail service in 16-knot steamers from the Atlantic coast to Brazil and $800,000 a year for a similar service to Argentina, $1,400,000 for both. Now let us see what other nations are doing to aid their merchant marine.

The German Government pays the North German Lloyd, under a fifteen-year contract, $1,330,000 a year for a fortnightly mail service in 15-knot steamers via the Suez Canal to the East Indies.

The British Government paid the Royal Mail Company $1,350,000 a year to establish a mail service to the West Indies, Brazil, and Argentina.

The British Government pays the Peninsular and Oriental Company $1,600,000 a year for a mail service to the East Indies.

Why should not the United States aid its overseas shipping as other maritime nations are doing?

PROFIT FROM OUR OCEAN MAILS.

With the permission of the Senate, Mr. President, I will place in the RECORD a brief table from the report of the Superintendent of Foreign Mails showing the profit for recent years on our ocean mails, from which it appears that last year the profit was $3,043,183.32.

The VICE-PRESIDENT. In the absence of objection, permission is granted.

The table referred to is as follows:

The report of the Superintendent of Foreign Mails shows the following profits for recent years on our ocean mails:

| Year ended June 30— | Surplus or profit. |
|---|---|
| 1906 | $3,043,183.32 |
| 1905 | 2,040,416.60 |
| 1904 | 2,579,338.12 |
| 1903 | 2,608,385.74 |
| 1902 | 1,491,693.02 |
| 1901 | 942,786.45 |

Mr. GALLINGER. On this point, Secretary Root, in his speech of November 20, 1906, before the Trans-Mississippi Commercial Congress, at Kansas City, said:

The actual cost to the Government last year of the ocean mail service to foreign countries other than Canada and Mexico was $2,965,624.21, while the proceeds realized by the Government from postage between the United States and foreign countries other than Canada and Mexico was $6,008,807.53, leaving the profit to the United States of $3,043,183.32; that is to say, under existing law the Government of the United States, having assumed the monopoly of carrying the mails for the people of the country, is making a profit of $3,000,000 per annum by rendering cheap and inefficient service. Every dollar of that three millions is made at the expense of the commerce of the United States. What can be plainer than that the Government ought to expend at least the profits that it gets from the ocean mail service in making the ocean mail service efficient.

FREE IMPORTS FROM SOUTH AMERICA.

I will also ask permission to place in the RECORD, without reading, a table showing the free and dutiable imports from the countries to which these proposed routes would run.

The VICE-PRESIDENT. In the absence of objection, permission is granted.

The table referred to is as follows:

| | Per cent. | Free. | Dutiable. |
|---|---|---|---|
| Imports from all South America | 84.74 | $127,788,000 | $23,006,000 |
| Imports from Brazil | 98.12 | 97,966,000 | 1,876,000 |
| Imports from Argentina | 21.77 | 3,342,000 | [a]12,012,000 |
| Imports from Peru | 54.22 | 1,709,000 | 1,443,000 |
| Imports from Chile | 96.61 | 10,695,000 | 376,000 |

[a] Chiefly hides and wool.

MAIL PAY TO AMERICAN AND FOREIGN SHIPS.

Mr. GALLINGER. I will also ask to place in the RECORD a brief table from page 112 of "Trade and Transportation," by William Eleroy Curtis, showing the relative proportion of the appropriation paid to American and foreign steamship companies for carrying the mails of the United States. From this table it will be seen that in the year 1888 we paid $581,058.55 to foreign steamship companies for carrying our mails and only $86,890.45 to American steamships.

The VICE-PRESIDENT. In the absence of objection, permission is granted to print the table referred to.

The table referred to is as follows:

[From page 112, "Trade and Transportation," by William Eleroy Curtis.]

| Fiscal year. | Total amount paid vessels of all lines. | Amount paid vessels sailing under American flag. |
|---|---|---|
| 1848 | $100,500.00 | $100,500.00 |
| 1849 | 235,086.22 | 235,086.22 |
| 1850 | 619,923.62 | 619,923.62 |
| 1851 | 1,465,818.48 | 1,465,818.48 |
| 1852 | 1,655,240.59 | 1,655,240.59 |
| 1853 | 1,880,273.33 | 1,880,273.33 |
| 1854 | 1,903,286.36 | 1,903,286.36 |
| 1855 | 1,936,714.62 | 1,936,714.62 |
| 1856 | 1,886,765.63 | 1,886,765.63 |
| 1857 | 1,589,152.65 | 1,589,152.65 |
| 1858 | 1,211,061.49 | 1,177,303.01 |
| 1859 | 1,204,569.62 | 1,075,220.09 |
| 1860 | 854,329.93 | 707,244.59 |
| 1861 | 806,885.36 | 570,952.86 |
| 1862 | 374,617.67 | 80,686.04 |
| 1863 | 416,074.07 | 79,397.05 |
| 1864 | 440,440.94 | 64,356.11 |
| 1865 | 475,428.16 | 66,571.50 |
| 1866 | 713,927.70 | 245,600.88 |
| 1867 | 867,202.65 | 411,064.59 |
| 1868 | 1,016,146.19 | 625,239.47 |
| 1869 | 1,101,689.54 | 757,963.90 |
| 1870 | 1,115,333.36 | 799,388.90 |
| 1871 | 975,024.73 | 699,661.37 |
| 1872 | 1,026,891.26 | 805,788.16 |
| 1873 | 1,044,156.92 | 815,400.26 |
| 1874 | 988,398.54 | 750,295.50 |
| 1875 | 976,643.77 | 740,360.69 |
| 1876 | 753,610.02 | 580,062.53 |
| 1877 | 448,896.41 | 286,831.97 |
| 1878 | 199,979.87 | 40,152.44 |
| 1879 | 200,026.45 | 41,251.45 |
| 1880 | 199,809.28 | 38,779.89 |
| 1881 | 240,066.78 | 42,552.13 |
| 1882 | 280,500.67 | 40,645.42 |
| 1883 | 316,358.15 | 48,076.58 |
| 1884 | 332,221.21 | 53,169.92 |
| 1885 | 331,903.33 | 49,048.01 |
| 1886 | 350,882.13 | 43,318.81 |
| 1887 | 429,036.11 | 76,727.28 |
| 1888 | 581,058.55 | 86 890.45 |

JUSTICE FOR THE MERCHANT MARINE.

Mr. GALLINGER. Mr. President, it is a remarkable fact that only 9 per cent of our commerce is carried in American ships, the other 91 per cent being carried in the ships of foreign countries. Two hundred million dollars, or thereabouts, is annually paid to foreign steamships for carrying the imports and exports of the United States. Two hundred million dollars annually is distributed among the people of foreign countries, that, had we American lines to South America and the Orient,

would be largely distributed among the people of our own country, thus giving an impetus to all branches of American industry, and distributing that enormous sum among the people of our own country.

I understand that during this session of Congress we have made appropriations aggregating almost $1,000,000,000. The distinguished Senator from Iowa [Mr. ALLISON] will place in the RECORD a detailed statement of the appropriations, and I think I am within bounds when I say that they will approximate $1,000,000,000.

We have passed a river and harbor bill which carries about $87,000,000. I will ask the Senator from Maine if I am correct?

Mr. FRYE. The Senator is correct.

Mr. GALLINGER. It carries about $87,000,000. We have appropriated for the Navy about $100,000,000; we have appropriated for the Army at this session of Congress $78,000,000, and we have appropriated not one single dollar for the American merchant marine.

On yesterday I called attention to a fact, which is worthy of repetition, that, in addition to the large appropriations made in the river and harbor appropriation bill of this session for the city of Galveston we have spent about $11,000,000 on that single port for the purpose of increasing the depth of and removing obstructions from that harbor, so that the great commerce of that southern city can be carried to foreign countries; and yet, Mr. President, after expending $12,000,000 upon that harbor, there is but one single American ship going out of that port, and that is a lone schooner of 300 tons. Every other ship that leaves Galveston for foreign ports carrying the exports of the United States flies a foreign flag.

Mr. President, we are in hopes that some time in the future we shall have a canal joining the waters of the Pacific and the Atlantic oceans. I do not propose to enter the realm of prophecy, but, in my judgment, that canal will cost the United States $400,000,000; and unless we do something for the American merchant marine, when that great waterway is constructed the flag of the United States will not be seen on a merchant vessel passing through it, except at infrequent intervals. It will doubtless be seen on an occasional battle ship or a yacht of some American millionaire. If the Congress of the United States thinks that that is good policy, if Senators feel that we ought to stand idly here and not raise our hands or our voices to do something for the American merchant marine, so that our flag will in the future be seen, as it was seen in the past, in the ports of the world, I am astounded and surprised. I do not believe that is the conclusion of the American people, whom we are supposed to represent in this Chamber.

I believe that there will be an uprising of the people of this country when they come to know the fact, as in due time they will come to know it, that the United States leads all the nations of the world in wealth, in agriculture, in mining, in manufactures, and in all the great industrial pursuits of life, and yet in this matter of our merchant marine we are lagging behind every maritime nation of the world. This will not always last, and I am profoundly grateful that in the debate which has occupied the past few days the American people have had an opportunity to understand that there are some men in public life who feel that this great question should be seriously considered and that an effort should be made now and hereafter to accomplish the desired result.

Mr. President, I ask to have inserted in the RECORD, without reading, some papers that were compiled by the late Commission on the Merchant Marine, which will give valuable information to any Senator or to any citizen of the Republic who is desirous of getting accurate knowledge on this great question.

The VICE-PRESIDENT. In the absence of objection, permission is granted to print the papers referred to in the RECORD.

The matter referred to is as follows:

DEVELOPMENT OF THE FOREIGN MAIL SERVICE, THE AMERICAN MERCHANT MARINE, AND AMERICAN COMMERCE—MEMORANDA OF THE COMMITTEE ON THE MERCHANT MARINE AND FISHERIES ON THE SUBSTITUTE FOR S. 529—SOUTHERN ADVOCATES OF OCEAN MAIL LINES.

In 1845, on the initiative of southern men in Congress, the first law was passed authorizing mail subsidies for American steamships in the foreign trade. President Polk urged an extension of this system and in 1847 another and a more effective ocean mail law was enacted. These laws created three American steamship lines to Europe—one to Great Britain, one to France, and one to Germany—and several lines from New York and southern ports to the West Indies and the Isthmus of Panama, and also in the Pacific from the Isthmus northward to California and Oregon. About $2,000,000 a year in mail subsidies was paid to these lines when they were established, and by 1851 the United States had 62,320 tons of ocean steamers as compared with Great Britain's 65,921 tons—the American steamers being newer, swifter, more powerful, and especially designed and constructed for war purposes. Their competition had reduced freight rates across the Atlantic from about $35 to $20 per ton.

All through these years southern men in Congress were most earnest supporters of this ocean mail legislation. Not until the slavery quarrel embittered North and South was there any partisan division over the mail-subsidy policy. But most of these ocean mail steamers, as it happened, were built and owned in the North, and finally the legislation was drawn into the sectional controversy of the period, with the result that the ocean mail laws were finally repealed and the trans-Atlantic steamship lines abandoned. Many patriotic southern men, however, supported the mail-steamship policy to the last.

President John Tyler, message to Congress, December, 1844:

"I can not too strongly urge the policy of authorizing the establishment of a line of steamships regularly to ply between this country and foreign ports, and upon our own waters, for the transportation of the mail. The example of the British Government is well worthy of imitation in this respect. The belief is strongly entertained that the emoluments arising from the transportation of mail matter to foreign countries would operate of itself as an inducement to cause individual enterprise to undertake that branch of the task, and the remuneration to the Government would consist in the addition readily made to our steam navy in case of emergency by the ships so employed. Should this suggestion meet your approval the propriety of placing such ships under the command of experienced officers of the Navy will not escape your observation. The application of steam to the purpose of naval warfare cogently recommends an extensive steam marine as important in estimating the defenses of the country. Fortunately this may be attained by us to a great extent without incurring any large amount of expenditure. Steam vessels, to be engaged in the transportation of the mails on our principal water courses, lakes, and parts of our coast, can also be so constructed as to be efficient as war vessels when needed and would of themselves constitute a formidable force in order to repel attacks from abroad.

"We can not be blind to the fact that other nations have already added large numbers of steamships to their naval armaments and that this new and powerful agent is destined to revolutionize the condition of the world. It becomes the United States, therefore, looking to their security, to adopt a similar policy, and the plan suggested will enable them to do so at a small comparative cost."

President Polk said in a message to Congress:

"The enlightened policy by which a rapid communication with the various distant parts of the world is established by means of American-built steamers would find an ample reward in the increase of our commerce and in making our country and its resources more favorably known abroad; but the national advantage is still greater of having our naval officers made familiar with steam navigation, and of having the privilege of taking the ships already equipped for immediate service at a moment's notice, and will be cheaply purchased by the compensation to be paid for the transportation of mail over and above the postage received. A just national pride, no less than our commercial interests, would seem to favor the policy of augmenting the number of this description of vessels."

STEAM MAIL-PACKET SERVICE.

[Speech of Mr. Thomas Butler King, of Georgia, House of Representatives, July 19, 1848.]

Mr. King presented a full statement of the British policy of mail subsidies from 1839 to 1848, and then showed how the American plan of keeping ships of war on the stocks at naval stations in readiness for service had proved a failure. He then went on to say:

"The plan for increasing the Navy which I propose to substitute for the one which we have so long and so unprofitably pursued is, first, to encourage the establishment by private enterprise, under the auspices of the Government, of as many lines of steam mail packets as our commercial intercourse will warrant and sustain. I have no doubt that we may employ in this way from twenty-five to thirty steamers of the largest class, which will be kept in repair by the contractors and be at all times liable to be taken into the service of the Government at a fair valuation. It will be the interest of the contractors to adopt, from time to time, all the improvements which may be made in machinery and the means of propulsion. We shall avoid the expense of mistakes in construction and machinery. These vessels will contribute largely to the extension and increase of our commerce, and will be infinitely more efficient in protecting our coast in the event of war than all the fortifications we have constructed, or may construct, at twenty times their cost. * * *

"In the discussions which have been occasioned by the appropriation asked to meet the contracts for this mail service, it has been argued that it is quite unnecessary for the Government to contribute in any degree to sustain it; that private enterprise, if left untrammeled 'by Government schemes and legal enactments,' would sustain itself against all foreign competition. To show the fallacy of this reasoning it is only necessary to state a few facts connected with the recent voyage of the steamer *United States* to Liverpool. The price of freight from Liverpool to New York, as established by the Cunard Line, is £7 per ton, and the price of passage £30 per head. While the *United States* was in dock at Liverpool the agents of the Cunard Line, to prevent freight and passengers going on her, reduced the price of freight by the *Hibernia* to £4 per ton and £2 10s. by the *Niagara*, and they offered to take passengers as low as £12 each. It was announced at the same time, in Harden's Liverpool Circular, that the old rates would be resumed immediately after the departure of the American ship. The British line, sustained by the Government, was enabled to adopt this course with impunity in competition with a ship sustained by individual enterprise alone.

"And it must, I suppose, be admitted that our own citizens, if not aided in undertakings of this sort by their own Government, would be quite incapable of competing for any considerable time with so powerful an opposition. This being the case, it must be apparent to anyone who will investigate the subject that in a very short time the most valuable portion of our carrying trade would pass into the bottoms of these British mail packets. The steamer *United States* is strictly a private enterprise. She has proved herself the fastest ocean steamer in the world, and has a greater capacity for the accommodation of passengers and for carrying freight than any commercial steamer hitherto constructed; yet, unaided by the Government, and having such powerful rivals to contend against, she must prove a ruinous undertaking to the owners. It was in view of this state of facts that I offered my second resolution."

Hon. Thomas Butler King, of Georgia, in 1848:

"It is sufficient to show that they (the British statesmen) are resolved, as far as practicable, to monopolize the intercourse between these two important points. This movement shows clearly that the time has arrived when we must decide whether we will yield this essential branch of navigation and this indirect means of extending our naval armament to our great commercial rival, or whether we shall promptly extend to our enterprising merchants the necessary

means to enable them to bring American energy, enterprise, and skill in successful competition with British sagacity and capital. Of all the lines of steam packets which cross the Atlantic, not one is owned in Europe, and it is not doubted that American merchants, properly encouraged, will assuredly excel in them as they have done in sailing vessels; and when we reflect that this may be accomplished to the mutual advantage and advancement of our commercial and military marine, it would seem that no statesman ought to hesitate for a moment to give his support to a measure which is demanded alike by prudence and the necessities of our position."

Hon. Thomas Butler King, of Georgia, in 1849:

"Great Britain is thus enabled by combining commercial enterprise with her naval armaments to keep afloat a steam force more than equal to one-half of our ships in commission and to maintain twenty of these powerful steamers in constant and active service at a cost of $1,000,000 annually. By the Cunard and 'West India' lines of mail steamers Great Britain maintains rapid and certain communication with her colonies on this side of the Atlantic, the United States, Mexico, and her fleets in the Pacific Ocean.

"In the event of war she could readily command this force and concentrate it at any point upon our Atlantic or Gulf coast; and our vast commerce, valued at some $200,000,000, would, without suitable preparation on our part, fall a prey to her arms. It is mortifying to reflect that this force, which may become so formidable against us, is in a great degree supported by the intercourse growing out of our own commercial enterprise. While our commercial marine is unrivaled and our sails whiten every ocean and our steam marine at home is superior to that of all other nations, we have been left in the distance and outmaneuvered by our great commercial rival in the employment of steam upon the ocean.

"If it be asked why Great Britain has thus taken the lead of us in ocean steam navigation while we are so greatly superior in domestic steamers and sailing ships, the answer is that she has anticipated us through the extension of her mail system to foreign countries in combination with her naval arrangements, thus rendering it almost impossible for mere private enterprise to enter into competition with her.

"France has also become alive to the importance of this great system, and her minister of finance has been authorized to treat with companies for the establishment of lines of steamers to Brazil, Habana, New York, La Plata, La Guayra, and such ports in the Gulf of Mexico and the Antilles as may be designated by royal ordinance."

Mr. King had been advocating the expenditure of a million dollars a year for ocean mail service—two lines, one from a northern and one from a southern port to Europe, and two lines to the West Indies and the Isthmus of Panama—the steamers carrying the mails to be built on designs approved by the Navy Department and held at the disposal of the Government in war.

Hon. Lewis Cass, of Michigan, in the United States Senate, May 7, 1852:

"If the line we have established between this country and England should be now abandoned, I take it for granted that the business would be done by the British line. In that event the postal treaty would probably be terminated by notice, which each Government has the right to give, and the postage would be raised at least as high as it was before the reduction occasioned by the results of competition. The same freights of valuable goods would be carried as now, but at enhanced rates of transportation. Therefore, in a financial point of view, it seems to me that there are many considerations that weigh against the abandonment of this line."

Hon. George E. Badger, of North Carolina, in the United States Senate, May 6, 1852, in the debate on the Collins and Cunard steamship services:

"Mr. President, the question submitted for the consideration of the Senate is, we all admit, a question of high and controlling importance. It has been said in the course of this discussion that the contest between these two lines is now becoming a national contest between this country and Great Britain. I desire to amend that statement. From the very moment of the institution of the Collins Line it was a national contest. It has not recently assumed that character. It has always borne it. The enterprise was very far indeed from being in fact, or from being regarded by the country, as a mere contest between two rival companies as shipowners. It was one great active contest in that mighty drama for the mastery of the seas—for superiority in everything that belongs to strength, speed, effective power, and success for war and for commercial purposes, which long has been and ever must be the mightiest contest between this country and Great Britain. After having entered upon this peaceful and at the same time most important contest, the question presented to the American Congress now is, whether we shall dishonorably retrace our steps, whether, when the hand is stretched out to seize the crown of victory, we shall voluntarily forget our advantages, retire from the high and eminent position we now occupy in the eyes of all the civilized world, and voluntarily surrender that which to obtain and perpetuate Great Britain would without any hesitation sacrifice a hundred times the amount of money which is involved in the question now before the Senate."

Hon. Thomas J. Rusk, of Texas, in the United States Senate, March 3, 1853:

"I know that this granting of an increased compensation to these vessels has been a fruitful theme for stump speeches all over the United States, but the system has made an advertisement throughout every sea that the Americans are the best shipbuilders in the world and have distanced their rivals. More than that: It has given you twenty-eight or thirty steamships, fit for war purposes, without additional expense to your Navy, for one-tenth of the sum for which you could build and maintain them in your Navy proper. We owe it to American industry and enterprise, to the hardy citizens of our country, to maintain the system. And we owe it to our national defenses, in my opinion, to maintain it."

Hon. James Shields, of Illinois, United States Senate, May 6, 1852:

"While the competition was between the American people and the English people the American people were successful; but when the English Government and the English people, united with the immense capital of their country, have devoted the whole energies of that nation to the building up and monopolizing of the steam power of the world, it is idle to talk about American citizens entering into competition with them. It is out of the question. You will have to bring home your lines and confine yourselves to your own inland trade and to your interior commerce. But never again, in my humble opinion, if you abandon this line, can you enter into competition with Great Britain on the ocean so far as steam navigation is concerned. Her Government and her people and her capital all unite in sustaining her lines."

Hon. Volney B. Howard, of Texas, House of Representatives, July 6, 1852:

"The support of the Collins Line, therefore, is not a mere local question. It is of direct interest to every man who grows a bale of cotton or consumes a pound of foreign goods or produce. The subject of cheap freights is also one of vital importance to the great Southwest and Northwest. It is to determine whether corn, flour, and other provisions can be exported to Europe to any great extent for a series of years when the crops are not short on the other side of the Atlantic. It involves the question of cheap bread to the toiling and starving millions of the Old World in exchange for clothing for the men of the New. It is a question of no ordinary moment to both, and especially to the exporters and producers of provisions in the Western States. Let their Representatives look to it. As soon as the Collins Line is withdrawn the Cunarders will raise freights to the price they bore previous to the competition created by the American steamers.

"Not only is the South especially interested in this subject as a question of freight, but in the continuance of the system, as it affects her own commerce and navigation. There is no doubt that the great eastern cities, if the British Government did not interpose to support English competition, might establish and maintain a line of steamers to Liverpool. But the southern cities have not at present sufficient commerce to enable them to sustain any line of steamers to a foreign port without the mail pay of the Government. Two or three southern lines have been projected, all of great importance to the country if they can be sustained. I allude especially to the one from New Orleans to Veracruz, and from some southern port to the mouth of the Amazon."

Hon. James A. Bayard, of Delaware, in the United States Senate, May 10, 1852, on Collins steamship subsidy:

"Mr. President, free trade, even by those who advocate it to the utmost extent, must be founded upon the doctrine of reciprocity. Reciprocity is the doctrine of our Government. It is true that foreign governments may force you, by their action, into a course of policy which, if they abstained from action, would be unwise on our part. I am willing to trust American skill and American industry in competition with any people on the globe, when they stand nation opposed to nation, without governmental interference. But if the treasury of a foreign nation is pouring into the laps of individuals for the purpose of destroying either the iron interest of my country or for the purpose of building up the commercial marine at the expense of the commerce and prosperity of the United States, I for one will count no cost in countervailing such governmental action on the part of Great Britain or any other foreign power. * * *

"The necessary result, if you refuse this appropriation, will be the abandonment of the line. Its abandonment yields to Great Britain the entire postal service between England and America certainly, and between a great part of the continent of Europe and America; for if this line goes down your other lines of ocean steamers must follow it. Its abandonment yields to her the entire transportation of passengers, except emigrants. It yields to her a tax upon American industry and upon American property in the shape of freight upon light and costly goods. With success just achieved I am not willing to surrender this prize to the English Government, to which they attach so much importance, and which, if not unprotected in the contest, we are just on the eve of dividing with them. I bear no hostility toward England peculiarly, but whenever I find that the honor, the reputation, the pride, and character of my country is concerned, or her interests, I would assert them without regard to cost, and the more certainly against a haughty and overbearing power like England than against a feebler state. Sir, withdraw this appropriation, let this line be abandoned, and can you tell me that it will not pass into the hands of a foreign government? That it will not pass into the hands of your commercial rivals?

"What would be the feelings of Senators who now oppose this appropriation if, at a future day, in the contingency of war, these derided vessels should make their appearance on your coast with the British flag flying at their foremast and aid in the devastation of your country and the destruction of your commerce? Such a thing is entirely within the range, not of imagination, but, I may say, within the range of probability. If you determine that you will abandon this line, you compel the sale of these magnificent steamers, which have been built at so much cost, in pursuance of the policy indicated in your act of 1847, and you know not to whom that sale will be made. It is from these feelings, and because the deliberate result of my own judgment on this appropriation is that it is a national matter, in which the national interests, national honor, national pride, and national reputation are deeply concerned, I am unwilling, for the sake of $300,000 or $500,000, or for any cost, even though it reach millions, to sacrifice them and give the ascendency in this contest to Great Britain. Admitting the amount to be requisite and the principle of relief in accordance with a wise policy, I shall vote for the amendment as reported by the committee."

(In 1856 the mail subsidy system was broken down. By 1858 this repeal of the previous laws was entirely effective. The Collins Line went into bankruptcy. Its ships were laid up. One, the newest, largest, and finest—the *Adriatic*—was bought by a subsidized British company, and for many years held the Atlantic record under the British flag. The other American trans-Atlantic steamship lines were also abandoned. Commodore Vanderbilt and other shipowners tried to run trans-Atlantic steamers without postal subsidies, and failed. They could not compete with the subsidy of nearly $900,000 paid by Great Britain to the Cunard Line. The American flag had practically vanished from the steam routes of the North Atlantic before the breaking out of the civil war.)

SHIP MATERIALS ALREADY FREE.

All materials of every kind required for the construction, equipment, or repair of vessels built in this country for the foreign trade or for the long-voyage coastwise trade between our Atlantic and Pacific seaports are free of duty under sections 12 and 13 of the free list of the Dingley tariff, as follows:

"DINGLEY TARIFF FREE LIST.

"SEC. 12. That all materials of foreign production which may be necessary for the construction of vessels built in the United States for foreign account and ownership, or for the purpose of being employed in the foreign trade, including the trade between the Atlantic and Pacific ports of the United States, and all such materials necessary for the building of their machinery, and all articles necessary for their outfit and equipment, may be imported in bond under such regulations as the Secretary of the Treasury may prescribe, and upon proof that such materials have been used for such purposes no duty shall be paid thereon. But vessels receiving the benefit of this section shall not be allowed to engage in the coastwise trade of the United States more

than two months in any one year, except upon the payment to the United States of the duties of which a rebate is herein allowed: *Provided*, That vessels built in the United States for foreign account and ownership shall not be allowed to engage in the coastwise trade of the United States.

"SEC. 13. That all articles of foreign production needed for the repair of American vessels engaged in foreign trade, including the trade between the Atlantic and Pacific ports of the United States, may be withdrawn from bonded warehouses free of duty under such regulations as the Secretary of the Treasury may prescribe."

Under this law not only steel plates and shapes, but articles of equipment so elaborate and costly as ships' compasses have been imported free of duty for the use of vessels built in this country for the foreign trade and for the coastwise trade between the Atlantic and Pacific.

Nor are there any difficult customs regulations in the way. Arthur Sewall & Co., of Bath, Me., who imported from Great Britain duty free all of the steel plates, shapes, etc., for the construction of a large steel ship, the *Dirigo*, state that so far as the passing of these free materials by the Treasury officials was concerned, there was no trouble whatsoever.

The law is as liberal as it could possibly be made. Nothing which Congress by statute could do to give American shipbuilders the widest freedom of materials for ships for ocean commerce has been left undone. The only criticism which could be made of this free-material legislation is that it is only partially applicable to ships for the coastwise trade—a trade in which American vessels are not subject to competition with foreign ships, because foreign ships are and long have been absolutely prohibited under penalty of forfeiture from carrying freight from one American port to another.

THE COASTWISE RESTRICTION.

But this free-material privilege does apply unconditionally to the important coastwise trade in large and valuable ships between American ports on the Atlantic and American ports on the Pacific Ocean. This coastwise traffic, already a large one, will be increased many-fold by the completion of the Isthmian Canal. Under existing law ships built for this great coast trade through the canal can be constructed, equipped, and repaired entirely with free materials.

Moreover, ships built of free materials can, under existing law, be employed for two months in a year in the general coastwise trade of the United States. This apparent exclusion of free-material ocean ships from the coastwise service for ten months in a year is more of apparent than of real importance. Vessels adapted to ocean service and the long-voyage foreign trade as a rule are not suitable in size, draft, and general arrangement for the ordinary coastwise service, and would not engage in it in any event unless they were driven out of the ocean service for which they were especially designed.

It has happened of recent years in a very few instances that American ocean vessels, forced out of the foreign trade by foreign subsidies or cheap wages, have fallen back upon the coastwise trade, and have found in certain shorter voyages at least that the limitation of two months on free-material ships caused some inconvenience. But if there were a law for the encouragement of American shipping in the foreign trade, like this bill for the establishment of great ocean mail lines, American ocean vessels, having a fair chance in the foreign trade, would not fall back into the shorter coastwise voyages for which they were not designed and are not especially adapted.

"FREE MATERIALS" NOT ENOUGH.

One reason why larger use has not been made in this country of the free-material privilege for ocean shipbuilding is that our laws give no real adequate encouragement to shipowners to employ ocean ships after they are built. Since June, 1901—five years ago—not one order for a steamship for over-seas commerce has been given to any yard in the United States, with the exception of four steamers constructed in the Cramp yard at Philadelphia for the Ward Line to the West Indies and Mexico—a line receiving a moderate mail subvention under the ocean-mail law of 1891. Two of these four steamers, by the way, were built to take the place of two similar liners purchased by the Government.

Yet during all this time, and for years before, any shipowner or builder who desired to send to Scotland for his steel plates and shapes and other materials, not only for the construction but for the equipment and repair of a vessel for the deep-sea trade or for the coastwise trade between our Atlantic and Pacific ports, could have brought in such materials by the shipload, and received a rebate of every penny of the duty. If our ocean fleet has not increased, it has not been for lack of free access to the free materials of the world; it has not been because of the "extortion" of any trust or the "barriers" of a protective tariff.

The truth is that "free materials" alone, as has so often been demonstrated, are not a determining factor in the prosperity of any industry. Take, for example, the manufacture of cotton fabrics. The raw cotton of which they are made is on the free list, for the good and sufficient reason that the United States has had almost a natural monopoly in the production of this important fiber. But nobody has assumed that free cotton was all that was required to make cotton manufacturing prosperous. On the contrary, the cotton manufacturer of New England, the Carolinas, Georgia, and Alabama is protected and encouraged to use this free cotton by tariff duties on the finished product ranging from 25 to 50 per cent ad valorem. But the ocean shipowner has no protection at all.

A PARALLEL INSTANCE.

To put the case in another way: Suppose that the pig iron, the steel, and other materials required for the making of textile machinery were admitted free of duty. Would it be seriously contended that because there were free materials for the making of the machinery of his trade the cotton manufacturer ought therefore to be deprived of all of his tariff protection of 25 to 50 per cent and be compelled to compete under free-trade conditions with the cotton manufacturers of Europe? Dose anybody imagine that if all protection were thus stripped away from the cotton-manufacturing industry there would be much of a demand for new looms, or that very much cotton weaving or spinning machinery would be constructed of free materials or of any other kind of materials in the United States?

The ship is the machinery of the shipowner's trade, just as the loom is the machinery of the trade of the cotton manufacturer. If the manufacturer of cotton were denied all protection and encouragement in this country, he would dismantle his mill and either quit the trade altogether or invest his capital and his skill in manufacturing in Europe.

This is exactly what has been done by some American shipowners. Denied protection at home on their industry of ship sailing and management—that is, on the use of the machinery of their trade—the mere fact that the materials of this machinery can be imported free of duty has proved of absolutely no avail. These shipowners have transferred their capital and their skill to foreign shipping. They have taken advantage of the cheap wages and sometimes of the subsidies of Europe. They are operating ships built, officered, manned, supplied, and repaired by foreigners. Their dividends, if there are any, come to this country, but every dollar expended for labor goes abroad. Their money and their business ability are utilized to develop the shipyards and to strengthen the naval reserves of foreign governments—to create a great alien sea power which could be turned with terrible force against their own country in case of war.

Of course, most of the capital invested in foreign merchant marines is foreign capital, but Americans are part owners in foreign shipping estimated at upward of a million tons. It is a significant fact that the heaviest American owner of foreign ships—the American element in the International Mercantile Marine Company—has been compelled by the British Government to keep these ships beneath the British flag, to build their successors in the United Kingdom, to officer and man them with British subjects, and to maintain the executive control of British tonnage in British hands. Therefore, if a "free-ship" law were passed by the United States it would be entirely ineffective, so thoroughly clinched is this international fleet to its British allegiance.

TO MAKE FREE MATERIALS EFFECTIVE.

In order to make the "free-material" privilege genuinely effective, the United States Government must protect and encourage American shipowners, as it has long protected and encouraged American cotton manufacturers. This can not be done by the tariff, but it can be done, as the history of the whole maritime world demonstrates, by a careful system of ocean-mail subventions, like that proposed in this bill now before the House. It is under such a system as this that Japan has increased her merchant fleet from about 300,000 tons to 1,000,000 tons within a decade. And Japan, unlike the United States, had no shipyards to begin with, no maritime traditions, no experience in long-voyage navigation, no great bodies of skilled labor.

All foreign shipowners, all foreign manufacturers and merchants, all foreign governments, dread the application of the protective principle by the United States to the one great American industry exposed to foreign competition which has thus far remained unprotected. They know well that protection, once adequately applied to American shipowning, will do what it has done for American manufacturing. It is probable that the chief hope of the enemies of the American merchant marine is to obstruct the proposed legislation by exploiting the idea that these subventions, if paid, would largely go to enrich the steel trust, which could charge extortionate prices for the materials of which new American ships were built. Therefore, a thorough understanding of the real facts of the case is of very great importance.

A MISUNDERSTANDING CORRECTED.

There have been some statements that American steel makers were selling ship steel abroad at a lower price than to American shipbuilders. The most explicit and authoritative assertion to this effect was that made on June 28, 1904, by Mr. James C. Wallace, then vice-president of the American Shipbuilding Company (engaged exclusively in lake work) before the Merchant Marine Commission at Cleveland. (Volume II, page 811 of the hearings of the Commission.) Mr. Wallace said:

"Recently one of our largest steel mills sold abroad 100,000 tons of steel plate. They delivered it, I understand, at Belfast at $24 a ton. That would practically mean, with ocean rates as they are, $22 a ton at tide water. They are charging us to-day at Pittsburg $32 a ton."

A little further on:

"Representative GROSVENOR. I want to know who bought the steel you speak of?

"Mr. WALLACE. The Harland & Wolf Company, Belfast.

"Representative GROSVENOR. From whom did they buy it?

"Mr. WALLACE. The United States Steel Corporation."

In one or two other hearings of the Merchant Marine Commission similar statements were made by other persons, but nowhere so definitely as at Cleveland. It has since appeared, however, that all these witnesses were misinformed. On April 11, 1906, Judge Gary, chairman of the board of directors of the United States Steel Corporation, was questioned directly before the House Committee on Merchant Marine and Fisheries as to this testimony of Mr. Wallace. Judge Gary said:

"I notice that Mr. Wallace apparently speaks from information. If he had such information, it was entirely unreliable. The statement is not founded in fact. The companies in which we are interested sold no ship plate in 1905 to Europe, only a little over 3,000 tons in 1904, not any in 1903, and, I think, not any in 1902." (Page 275 of the Hearings before the Committee on the Merchant Marine and Fisheries, April 4 to 13, 1906.)

THE ACTUAL FIGURES.

Further on Judge Gary declared that "the export prices of ship plate at the present time are nearly equal to the domestic prices." There is specific proof of this fact in figures submitted by ocean shipbuilders to Senator J. H. GALLINGER, chairman of the Merchant Marine Commission. While the shipping bill was being considered by the Senate, before its passage, Chairman GALLINGER wrote to two great shipyards on the Delaware River, asking what was the actual difference in cost between American and foreign ship steel, and what proportion this constituted of the cost of the completed vessel.

These were the replies received:

THE WILLIAM CRAMP & SONS SHIP AND ENGINE BUILDING COMPANY,
OFFICE OF THE VICE-PRESIDENT,
*Philadelphia, January 15, 1906.*

DEAR SIR: Referring to your letter of the 11th instant, requesting to be informed as to the number of tons of steel plates and shapes required for the construction of each of four such steamers as we are now building for the New York and Cuba Mail Steamship Company, and how much more the steel would cost if purchased at the ruling prices in this country than if imported from Great Britain, I beg to state as follows:

The amount of steel plates in one vessel is 1,900 tons and the amount of steel shapes in one vessel is 990 tons.

Recently, by reason of the rapid rise in the prices of materials in Great Britain, the foreign builder pays almost as much for plates and

shapes as we do; in fact, the difference in cost between steel purchased in this country and abroad for vessels of this size would be as follows:

| | |
|---|---|
| Plates | $5,328 |
| Shapes | 5,880 |

making a total saving of $11,208 in the material purchased abroad. The steamers referred to will cost complete upward of $900,000 each; so that the difference in the cost of their steel plates and shapes between here and abroad represents only a little more than 1 per cent of the total value of each steamer.

Where vessels have been intended for the foreign trade alone the various steel interests have offered to sell us the materials at the best export prices.

Very truly, yours, EDWIN S. CRAMP, *Vice-President.*

Hon. JACOB H. GALLINGER,
*Chairman Merchant Marine Commission of the United States, Washington, D. C.*

NEW YORK SHIPBUILDING COMPANY,
*Camden, N. J., January 16, 1906.*

SIR: In response to your inquiry of the 11th instant, I beg to say that the last quotation which we have on foreign steel was under date of November 20, 1905, when we obtained prices for the purpose of quoting on a steamer to be built under sections 12 and 13, free list, Dingley law. It was afterwards decided to build the steamer abroad.

The foreign and domestic prices at that date appear below. I may add that the domestic prices of steel are the same at the present time, and I am not advised whether there has been any change in the foreign prices.

[Prices in cents per pound.]

| | |
|---|---|
| Plates: Steel Company of Scotland, f. o. b. Philadelphia, in bond | 1.73¼ |
| Shapes: Steel Company of Scotland, f. o. b. Philadelphia, in bond | 1.64½ |
| Plates: Domestic, f. o. b. Philadelphia | 1.73½ |
| Shapes: Domestic, f. o. b. Philadelphia | 1.83½ |

Difference in cost of plates and shapes for a 500-foot freight and passenger steamer built of foreign and domestic steel at the above prices estimated as follows:

| | Domestic. | | Foreign. | | Difference. |
|---|---|---|---|---|---|
| | Cost per pound. | Total. | Cost per pound. | Total. | |
| | *Cents.* | | *Cents.* | | |
| 8,000,000 pounds plates | 1.73¼ | $138,800 | 1.73½ | $138,600 | $200 |
| 3,000,000 pounds shapes | 1.83½ | 55,050 | 1.64½ | 49,350 | 5,700 |
| Total | | 193,850 | | 187,950 | 5,900 |

We would regard the above as a fair estimate of the amount of steel plates and shapes required in the building of a 500-foot steamer, but the amount, of course, would vary according to the type of vessel. A ship of this size would probably require from 4,500 to 5,000 tons. The completed value in this country of a vessel of this description would be about $800,000 to $900,000.

It is only fair to add that at the time the above foreign quotations were received ship plates and shapes were very high abroad, owing to the great activity there in shipbuilding.

Yours, respectfully, S. M. KNOX,
*Secretary and Treasurer.*

Hon. JACOB H. GALLINGER,
*United States Senator, Washington, D. C.*

In the case of one yard, the difference in the cost of American and foreign material was only a little more than 1 per cent of the entire cost of the completed steamships; in the other yard, about one-half of 1 per cent. Thus both Mr. Cramp and Mr. Knox confirm the statement of Judge Gary that the domestic price and the foreign price of ship steel are very nearly equal. It should be understood that there is an advantage to the shipbuilder in procuring his materials at home, from the fact that he can be in closer touch with the domestic manufacturer a few hundred miles away than with the foreign manufacturer in Scotland, and that changes can be more quickly made and deficiencies rectified. American steel therefore is actually worth a somewhat higher price to American shipbuilders than are foreign materials.

Mr. Cramp, Admiral Bowles, and several other shipbuilders testified at length in April before the House Committee on Merchant Marine and Fisheries, and with the exception of one builder, who acknowledged that he had had no recent experience, these practical men declared that there was little, if any, difference in the price of ship steel between the American and the foreign article.

TESTIMONY OF MR. CRAMP.

Mr. Cramp's evidence on this point was as follows:

"In the case of an ordinary ship, whether it is a cargo boat or a merchant ship, about 33 per cent of its value is in the material that is delivered to the shipyards which the works themselves do not manufacture. That means plates and shapes. We make brass castings, but not the raw pig or the pumps and forgings. Now, in the present condition of prices we can purchase forgings in this country, notwithstanding there is a boom on and notwithstanding that labor is as high as ever it has been in the history of the country—we can buy forgings, steel castings, and such materials in this country for less money than abroad, and we get the other materials for practically the same price.

"Mr. WILSON. What part of the ship's castings and materials can you buy in this country cheaper than abroad?

"Mr. CRAMP. I said the forgings and steel castings.

"Mr. WILSON. What part of the value of the ship does that constitute?

"Mr. CRAMP. Of the materials that enter into the ship I have no details. The forgings represent a certain percentage of the vessel, but we never work it out that way. At present all of the materials that enter into the cost of the construction of a ship can be bought at the same price in this country as abroad. Many details we can buy for less.

"Mr. LITTLEFIELD. Does that mean f. o. b., or delivered here with freight added?

"Mr. CRAMP. That is without the freight added, but that is a very small item, being only about $2.50 or $3 a ton across the ocean.

"Mr. HINSHAW. Please make that plain. You say that a vast majority of the materials which enter into the construction of a ship can be bought in this country as cheaply, at least, as abroad?

"Mr. CRAMP. Yes, sir.

"Mr. HINSHAW. And some cheaper?

"Mr. CRAMP. Yes, sir. A few months ago Senator GALLINGER wrote us a letter and asked what difference it would make had we purchased abroad the materials for some of the Ward Line ships that are going to trade between New York and Cuba and Mexico, and we investigated the matter very carefully, and we found that a ship that would cost us $900,000, the only difference in favor of purchasing abroad at that time was $11,000, and since that time materials have risen over there and practically kept still here.

"Mr. WILSON. According to that there is practically no difference to-day between the cost of foreign-built vessels and American-built vessels?

"Mr. CRAMP. No, sir; the materials that enter into the ship.

"Mr. WILSON. There is no difference in the materials?

"Mr. CRAMP. No, sir.

"Mr. GOULDEN. Does that apply to the coastwise steamers?

"Mr. CRAMP. Yes, sir.

"Mr. GOULDEN. There is no difference whatever?

"Mr. CRAMP. No, sir; but there have been times when the prices went up. For instance, the effect of the steel corporation during the last three or four years has been to steady the price for the market. Previously, in 1896, the price of steel went down under the influence of bad times to 1 cent a pound, the lowest price ever known in this country and very much lower than in England. That was caused by the depression following the panics of 1893 that carried so many steel companies into bankruptcy.

"Mr. GOULDEN. The average cost of the materials that enter into the coastwise steamers is about the same here as abroad?

"Mr. CRAMP. Yes, sir.

"Mr. SPIGHT. At this time the cost of material is no more in this country than in foreign yards.

"Mr. CRAMP. Yes, sir.

"Mr. SPIGHT. And the only difference in the cost of construction in American yards and foreign yards is the labor?

"Mr. CRAMP. Yes, sir; absolutely.

"Mr. SPIGHT. How much is that difference?

"Mr. CRAMP. Practically double.

"Mr. WILSON. What is the cost of the material in a million-dollar ship in this country?

"Mr. CRAMP. It will be from 30 to 35 per cent.

"Mr. WILSON. That is the cost of the material?

"Mr. CRAMP. Yes, sir; and labor is the other two-thirds.

"Mr. HUMPHREY. The material delivered to your yard?

"Mr. CRAMP. Yes, sir. Of course, you must remember that of the 35 per cent we purchase about 95 per cent of that is labor at the other places where they are manufactured."

(Pages 210–211 of the hearings before the Committee on Merchant Marine and Fisheries, April 4 to 13, 1906.)

STATEMENT OF ADMIRAL BOWLES.

Admiral Francis T. Bowles, formerly chief of the Bureau of Construction of the United States Navy, and now president of the Fore River Shipbuilding Company at Quincy, Mass., also made a careful statement as to the cost of materials before the House committee, saying:

"There have been various questions raised here about the influence of the cost of structural steel upon our present situation. I have had an instance within my own knowledge of the building of a vessel in our shipyard from English plans, in which I knew the exact cost of that vessel in an English yard. We took the greatest pains with our ship, not only to keep an accurate account of the cost, but to keep it as low as possible. The actual facts there were that that ship cost us 50 per cent more in our own yard, the cost being kept exactly in the same way as it was on the other side.

"Mr. GOULDEN. How long ago was this? When did this occur?

"Mr. BOWLES. It was for a ship completed last December.

"Mr. GOULDEN. December, 1905?

"Mr. BOWLES. Yes.

"Mr. SPIGHT. I understood you to say a while ago, Admiral, that the difference in the cost of wages and the cost of materials was about equal. Did I understand you correctly?

"Mr. BOWLES. No; I did not make that statement.

"Mr. HINSHAW. This difference of 50 per cent is almost entirely in the wages, is it?

"Mr. BOWLES. I am unable to state exactly, but from what I can find, the wages in our yard are from 50 to 75 per cent higher than they are in the English and Scotch shipyards.

"With regard to materials at the present day, the state of affairs is this: Steel delivered in an English shipyard costs from 15 to 20 per cent less than ours at the present time. On other materials the difference is greater. I want to keep my percentages applied in the same way, so I will say this: The cost of steel delivered in our shipyard is from 15 to 20 per cent greater than the price to-day of steel delivered in an English shipyard.

"Mr. HINSHAW. By English manufacturers?

"Mr. BOWLES. By English manufacturers. For the English steel delivered in our yard the price is almost exactly the same to-day as if we bought it in Pittsburg.

"Mr. GOULDEN. Delivered on the ground?

"Mr. BOWLES. Delivered on the ground.

"Mr. GOULDEN. In both cases?

"Mr. BOWLES. In both cases.

"Mr. WACHTER. What makes that difference, Admiral?

"Mr. GOULDEN. There is not any difference.

"Mr. BOWLES. The difference between the cost——

"Mr. WACHTER. Delivered in London.

"Mr. BOWLES (continuing). Delivered in our yard and delivered in England is covered by the freight and insurance and transfer.

"Mr. WACHTER. But the difference over there, the reason they can deliver it so much more cheaply to the English yard than our manufacturers can to our yards, is because of the difference in the cost of labor, is it not?

"Mr. BOWLES. Yes. Now, the price of steel has not a great influence upon the cost of the vessel, which you can see from the fact that in an ocean-going steamer the proportion of the cost of the structural steel to the whole cost is about 15 per cent. A small variation in the price of steel will, therefore, you see, produce a very small variation in the total cost of the ship.

* * * * * * *

"Mr. SPIGHT. Admiral, did I understand you to say that the cost of English steel in our yards is about the same as the cost of American steel?

"Mr. BOWLES. Yes, sir.

"Mr. SPIGHT. And yet in the British yards English steel costs from 15 to 20 per cent less than ours?

"Mr. BOWLES. Yes.

"Mr. SPIGHT. Now, why is that?

"Mr. BOWLES. That is because that difference to us would be absorbed in freight, insurance, and handling.

"Mr. SPIGHT. It would cost 15 or 20 per cent to get it here?

"Mr. BOWLES. Yes."

(Pages 415, 416, and 417 of the Hearings before the Committee on Merchant Marine and Fisheries, April 4 to 13, 1906.)

These expert witnesses emphasize not only the fact that there is very little difference in cost between the American and the foreign ship steel, but also the fact that the cost of materials is of minor consequence anyway, and that the price of a ship is made up chiefly—two-thirds, Mr. Cramp testified—of the cost of the labor employed in working up the materials and putting them together. To protect and encourage American ocean shipping, therefore, means to benefit American labor and not to enrich the steel trust.

THE REAL DOMINANT FACTOR.

As the Merchant Marine Commission has summed up the question in its memorandum, "Ship materials already free:"

"It is not the price of materials, or only that in relatively small part, which makes an American vessel cost more than a British vessel. The dominating factor is not the materials, but the wages of the skilled workman who fashions the plates, beams, etc., into the finished ship.

* * * * * * *

"Yet this does not mean that American ships will always cost more than British ships. There was a time when American locomotives and railway bridges cost a great deal more than British locomotives and bridges, but that was before locomotive and bridge builders in this country had gathered experience, practiced standardizing, and achieved all the economies of large production. Now we manufacture locomotives and bridges and sell them in competition all over the world. When, by firm and adequate encouragement to shipping, we develop shipbuilding also to a manufacturing business, high wages paid to workmen in constant, not spasmodic, employment will not prevent a steady output of ships as low in cost as they are efficient and economical in operation."

---

THE FARMERS AND AMERICAN SHIPPING.

NATIONAL GRANGE, PATRONS OF HUSBANDRY,
*Concord, N. H., January 26, 1907.*

SIR: I regret the duty which devolves upon me to advise you, on behalf of the great national organization of farmers which I have the honor to represent, that the farmers of the nation are for the first time unitedly and steadfastly opposed to the legislative recommendations you have made to Congress in your recent message favoring ship subsidies. For ten consecutive years the Patrons of Husbandry in their national and State conventions have registered their opposition to such legislation. That we have in this opposition the support of a very large majority of the manufacturing and business interests of the nation was evident from the overwhelming defeat which the advocates of ship subsidies met in their efforts to commit the recent convention of the Association for the Advancement of Foreign Commerce of the United States to an indorsement of their ideas. The vote in favor of ship subsidies in that convention, when a standing vote was demanded, was only 41 in a total of over 300 voting delegates present.

We believe it would be impossible for the measure now before Congress to pass the House without the influence of your support. If it is to become a law, we would respectfully submit that the principle of the "square deal," with which your name is so honorably associated, requires that an amendment should be added providing for enforced public accounting of any business or corporation for which such subsidies or subventions are asked, and that no moneys should be paid out of the public Treasury for such purposes without such public accounting and which such public accounting did not show such assistance was necessary to make the business profitable.

We protest most urgently against any future payments of the public funds to any private firm or corporation for any purpose whatsoever without safeguarding such payments by such public accounting of the business of the person, firm, or corporation to whom such payments are to be made, and we most respectfully urge that such public accounting be made a part of any such bill before it receives your approval.

Respectfully submitted.

N. J. BACHELDER,
*Master National Grange Patrons of Husbandry.*

The PRESIDENT, *Washington, D. C.*

---

CHAIRMAN GROSVENOR'S REPLY.

DEAR SIR: The President has brought to my attention your letter of January 27, protesting, on behalf of the National Grange, against the shipping bill which has been reported favorably to the House of Representatives by the Committee on Merchant Marine and Fisheries, of which I am chairman.

This is a bill to protect and encourage a part at least of our merchant marine exactly as the Dingley tariff protects and encourages American farmers. I believe in this policy and so, I assume, does a Republican ex-governor of New Hampshire. I believe that a very great majority of the members of the National Grange approve it. Free traders twenty-five years ago used to urge that American farmers needed no protection and could not be benefited by protection. That argument is dead. If the shipowners and sailors of Boston, Philadelphia, or San Francisco came before Congress to demand free wool from Australia and Argentina, free flour from Manitoba, and free dairy products, vegetables, meats, and cattle from Ontario, Quebec, and Nova Scotia, the master of the National Grange, with American farmers solidly behind him, would denounce this as egregious selfishness, and so it would be.

Now, American ship builders and owners and the men who work for them in their shipyards and on their ships have just as good a right to their share in the protective policy as you or I have. Their calling is just as dear to them. They are as absolutely dependent on it for their livelihood. Unfortunately they can not be protected by the tariff, and as a result those of them engaged in the deep-sea trade—one of the manliest, most noble, and most indispensable of all callings—have been left unprotected for half a century by our Republican Government. As a result, this is the only industry which has declined, as it has done almost to the point of destruction.

Now, apparently you would go further and annihilate it by absolutely denying all protection and encouragement. You would make a waste place of our last shipyard and drive our last shipowners and seamen and shipyard mechanics to choose between the poor house and foreign lands. How would you like it if, because of national neglect, American farmers, who were supplying 90 per cent of the farm products consumed by this country, were, through foreign subsidies, bounties, cheap wages, and the neglect of their own Government, brought down to a miserable 10 per cent? How would you like it if the Dingley tariff duties on agricultural products were removed and Canadian farmers, with their cheap labor and cheap lands, supplied the markets of Boston and other New England cities and bankrupted nine out of ten of your New Hampshire farmers? And if when the President of the United States recommended legislation that in some degree would relieve this situation and restore your industry the people of Boston and Portland and other towns who live by and on the sea should send a protest to the President and Congress against this and demand a continuance of the free-trade policy which had destroyed you?

That is exactly what you are doing now against your brethren, the ship owners and builders, the shipyard workmen and sailors, of New England and America.

You are doing it doubtless without intending to do so, and through a sheer misapprehension of the facts. You are permitting your prejudice against former shipping bills to warp you against this one. This is not a general ship-subsidy measure. It is a bill to extend our present inadequate policy of postal payments to regular steamship lines, so that we shall have ocean mail lines of our own to South America, Australia, Japan, China, and the Philippines. To the Orient we have a few ships running, but in most cases the complete lines provided for by this bill will have to be established from the beginning, and as many as twenty-five or thirty new steamships will have to be built under the inspection of the Navy Department as auxiliary cruisers, their owners contracting to turn them over to the Government in war. There is nothing experimental about this. It is the policy of all nations, including free-trade England.

It is the policy of our own nation as embodied in the ocean mail law of 1891, which has created American lines to Europe, the West Indies, etc., but not on the long routes to South America and the Orient.

These lines of American steamers proposed in this bill will benefit the farmers of the National Grange relatively more than any other class of Americans except the shipowners, builders, and seamen, because you supply the greatest proportion of our exports to foreign lands. This makes all the more incomprehensible your opposition to such a policy. There has been evidence before our committee that a foreign steamship trust was ousting our farmers from our markets in Brazil and elsewhere, and was substituting for their products the flour of Austria-Hungary and Argentina.

Because foreign nations have ships and we have almost none Australian farmers are enabled to drive us out of the flour market of the Orient. In other words, these foreign steamship monopolists are deliberately robbing the farmers of America, exactly as they did in the Boer war, when they took their best steamships out of our ports to carry troops out to crush the struggling republics of South Africa, or as when they turned their fast steamers over to Spain to "burn, sink, and destroy" our commerce in 1898. It is these foreign steamship companies, drawing a revenue of $200,000,000 a year from our carrying trade, besides their own enormous subsidies, who are the real bulk of the opposition in this country to the American merchant marine. Why the National Grange should side with these foreigners, who are despoiling them, in fighting against American shipping is something which nobody has ever been able to understand in Washington.

I believe that if all the facts of the case were laid before the farmers of America and they were made to understand the character and purpose of this present shipping bill they would stand by the President, support the Administration, and indorse this bill by an overwhelming majority. But they do not yet know the facts. Naturally the business of ocean shipowning and sailing is as strange and unfamiliar to them as the great industry of agriculture is to the Pennsylvania shipbuilder or the New England seaman. There is absolutely no reason why the farmers of this country should look upon this question differently from the manufacturers or merchants or business men in general.

You say in your letter to the President that in opposing the shipping bill you have the support of "a very large majority of the manufacturing and business interests of the nation." You are absolutely mistaken. There are in the files of the House Committee on Merchant Marine and Fisheries and in the public records of Congress reiterated and emphatic declarations from the greatest commercial bodies of the country in favor of national aid to the merchant marine, and specifically in favor of much broader and more liberal measures than that now pending in the House of Representatives. These declarations have come from the National Association of Manufacturers, the National Board of Trade, the American Bankers' Association, the American Cotton Manufacturers' Association, the Trans-Mississippi Commercial Congress, and from commercial associations of both seaboards and the interior cities. Only the other day the Massachusetts State Board of Trade explicitly approved this present measure by number and by title.

And that very convention for the promotion of foreign commerce which you state as having denounced ship subsidies actually indorsed the bill reported from my committee in these words:

"We believe it imperative that the American merchant marine should be reestablished, and that new steamship lines of direct and speedy communication should be opened, especially with South and Central American and Asiatic ports, for the proper extension of our commerce. To this end we recommend liberal compensation from the Government to American-built and American-manned ships for all services rendered, including the carriage of mails and the right to use the ships in time of war."

This was intended to be, and is, a specific description and indorsement of the bill ordered favorably reported on the previous day by the House Committee on Merchant Marine and Fisheries. This is the bill which President Roosevelt advocates in his special message to Congress. It is the only shipping bill before Congress and the country.

It is simply an extension of existing law. That law has been tried for fifteen years. It has sufficiently protected the interests of the Government. There is no need of forcing American shipowners to show their books and prove their poverty. That fact is notorious. While agriculture, like all other protected industries, has increased enormously, shipping in overseas trade has shrunk to a third of the tonnage of 1861. This is a disgrace to the Republican party, the one great Republican failure, the one deepest blot on Republican Administrations.

President Roosevelt and his Administration and the Republican majority in Congress have set themselves to the task of righting this error

and restoring the American merchant marine. They have begun by a cautious, well-considered measure of ocean mail legislation. The National Grange ought to support the President and stand by the Government in this great and patriotic undertaking, and I am convinced that if you will study the facts and get them fairly before your people the farmers of America will recognize that President Roosevelt is as brave and right in this as he has been in other acts which have made his Administration memorable.

Very truly, yours,

C. H. GROSVENOR,
*Chairman Committee on Merchant Marine and Fisheries, House of Representatives.*

Hon. N. J. BACHELDER,
*Master National Grange, Patrons of Husbandry, Concord, N. H.*

---

HOW A FOREIGN STEAMSHIP TRUST DOMINATES OUR SOUTH AMERICAN COMMERCE.

Not one American steamship and only fourteen American sail vessels took cargoes from our whole Atlantic coast for Brazil and Argentina in the first six months of 1906.

So far as steamships are concerned this important American trade is now, and for several years has been, monopolized by a foreign shipping trust or combination, whose weapons are rebates, discriminations, and boycotting, and whose policies are dictated from Liverpool and Hamburg.

Consul-General Seeger, at Rio de Janeiro, spoke thus of this foreign steamship combination in a report in 1903:

"The united steamship companies which control the carrying trade between the United States and Brazil—the Lamport & Holt Line, the Prince Line, the Robert M. Sloman Line, and the Chargeurs Reunis—have agreed to raise their rates on coffee from Santos and Rio de Janeiro from 30 cents and 5 per cent primage per bag of 133 pounds to 35 cents and 5 per cent. This rate will go into force in October, but as the cargoes for the steamships *Byron, Catania, Bellarden,* and *Soldier Prince* have already been in large part purchased, these steamers, leaving in the early part of October, have been excepted from this tariff and will carry their cargoes at the old rate."

Before this, in an earlier report, the consul-general had stated:

"Since last August the freights have been raised and lowered and lowered and raised again to suit the purpose of the trust till they have reached their present level. * * * The trust has an agreement with coffee shippers here to pay them a rebate of 5 per cent at the end of every six months from the date of the agreement on all freights collected; provided, however, that this rebate is forfeited in case the shippers give freight to any vessel not belonging to the trust during the period stipulated. Through this arrangement the trust controls the shippers, and American vessels go home in ballast."

A writer and traveler, Julian Haugwitz, in American Trade, has thus described the situation:

"Our commerce with Brazil and the River Plata countries is at the mercy of such a shipping combine. Ostensibly four lines are competing in 'serving' the route between New York and Pernambuco southward, viz, the Lamport & Holt Line, Prince Line, Norton Line, all British, and the R. M. Sloman Line, which is German. In reality, however, the management of these services is centralized in Liverpool, the freights are pooled, and the spoils divided.

"At the head of this syndicate stands Lamport & Holt, of Liverpool, a powerful firm, owning and managing over a hundred vessels. The ships engaged in the New York-South American service are mostly slow and obsolete, steaming 8 to 10 knots, and yet the rates of freight levied on American cargo are nearly double those charged by the speedy, modern, elegant ships plying between Europe and the east coast of South America. Not a case of kerosene or a bag of coffee can escape paying toll to this freight ring, and there was more truth than comedy in the facetious request sent by a Rio shipper to the syndicate's agents at that port asking for a permit to ship some coffee on an outside vessel over their ocean. Numerous tramps or outsiders have been willing in Brazilian ports to take coffee to New York for 20 cents a bag instead of 40 cents, as now exacted. But whenever such a vessel has been placed on the berth the syndicate has promptly lowered its freight to 10 cents, besides boycotting the shippers patronizing the intruder.

A POLICY OF EXCLUSION.

"Another way by which the syndicate tightens its grip on its victims is to offer them a graduated return on the freights paid at the end of the year, provided no case of infidelity has occurred. An example illustrative of the combine's methods of persuasion and the shippers' liberty of trade happened last fall when a large coffee firm in Santos received an order for 20,000 bags of coffee from New York. The syndicate's freight charge was 40 cents a bag plus 5 per cent, but several outsiders were anxious to carry this cargo at 20 cents, which meant a saving of $4,000 to the exporter on this lot alone, and in the same proportion an economy of $1,000,000 to American coffee drinkers on the 5,000,000 bags imported from Brazil last crop year. The firm in question, having the freight room on hand at 20 cents, asked the syndicate to take the coffee at the same rate, and on the latter's refusal advanced its offer to 30 cents. The combine insisted on its full pound of flesh, and when the exporter accepted the tramp's charter, the former dropped its rates to 15 cents and later to 10 cents for all other shippers, debarring this firm and one or two other strikers from shipping on the combined boats except at the full old rates.

"The enormous advantages enjoyed by their less independent competitors, thanks to the combine's bounty, and worth thousands of dollars a day in a business worked on close margins and daily cable offers, soon brought the insurgents to terms, capitulation followed, and the former rates were restored. One over-conscientious agent at Santos demurred to boycotting his neighbor, and his scruples cost him the loss of the Sloman Line agency."

A New York merchant, familiar with the Brazilian trade, wrote thus on August 19, 1905, in the New York Journal of Commerce:

"I beg leave to call your attention to the very important fact, evidently overlooked by Special Agent Hutchinson and Consul Furniss, that merchants dealing with Brazil have valid and just causes for complaint owing to the fact that all the steam transportation companies carrying freight between United States ports and Brazil formed a combination some years ago, and as they monopolize the trade their rates of freight are so high as to be prejudicial to the business interests of those who are unfortunately obliged to patronize these companies.

"Any independent merchant in this city (New York) or in Brazil—whether importer or exporter—knows that the Lamport & Holt, Prince and Sloman lines, plying between this and Brazilian ports, from Pernambuco southward, exact exorbitantly high rates of freight on merchandise carried either way. In the coffee trade it is a well-known fact that these monopolists, notably Lamport & Holt, discriminate in favor of some of the large importers of coffee by making them substantial concessions in freight, which, of course, is detrimental to the smaller importers. This disgraceful state of affairs certainly calls for a drastic remedy. As a merchant and shipper long connected with Brazil, I most heartily and unqualifiedly indorse Consul Furniss's recommendation concerning the need for an American steamship line between the United States and Brazil. Practically the entire trade between the United States and Amazon ports and Maranham and Ceara is monopolized by the Booth Steamship Company of Liverpool, which, owing to arrangements concluded with other steamship companies, dictates rates, conditions, etc., to suit itself, but always at the expense of the interests of this country. I hope the consul's appeal will result in the establishment of a new line of steamers, which I am positive would speedily secure a very large share of the business between this country and Brazil."

Consul Furniss, at Bahia, alluded to above, said in his annual report for 1904:

"I have to reiterate my oft-repeated report of the need for an American steamship line. The mail service between the United States and this section of Brazil during the year just past has become much worse than heretofore, due to the withdrawal of one or two monthly boats. As a result of the cargo offering here for the United States and the frequent call of vessels to get it, coupled with the fact that Brazil requires all steamers to take mail, there have been frequent calls of vessels to get mails from here, but there is only one regular boat bringing mails from New York. Between times letters are sent hither from New York by various roundabout ways. This has virtually paralyzed the mail service. For this reason it is frequently the case that mail sent from New York in the middle of a month arrives here days after the mail leaving New York on the first of the ensuing month. This causes great prejudice to business, as the mails arriving last often have bills of lading and custom-house documents for goods arriving by the prior steamer, necessitating extra expense, vexatious delays, and great trouble to withdraw from the custom-house here, which seriously hurts our trade.

"It is impossible to maintain trade without frequent and rapid mail service. With the lack of this to contend with and the high freight charges out of New York, it is not to be wondered at that year by year our trade with this section is growing less, while the balance of trade in favor of Brazil is increasing. The present lines from New York seem to prefer high freight and little business, and make up by sending their vessels on a triangular course, viz, from Brazil to the United States, from the United States to Europe, and then from Europe, with European goods, to Brazil, with only a few vessels going and coming between Brazil and the United States direct. The German steamship lines are making preparations for an increased service with Brazil. With the aid given by these lines German trade has increased even more rapidly than ours is decreasing, and with the contemplated further increase in its fleet the outlook for German trade is even brighter than heretofore.

"The manner in which the trade interests of the United States are made to suffer by reason of the inadequacy of the transportation service between this country and South American ports is nothing short of a crime, which must be laid at the doors of Congress. Religiously protecting our interests in every other way, fostering and encouraging our manufacturers and developing home industries for domestic consumption, it makes no provisions for markets for surplus products, and thus paves the way for future industrial stagnation. In the meantime other countries reap the benefits of the trade demands of these nations by establishing steamship lines and commercial agencies in every important city. Is it any wonder that Mr. Lincoln Hutchinson, who is now in Brazil making a study of the conditions there, exclaims: 'The mass of the people scarcely know that such a country as the United States exists!'"

In 1904 Hon. John Barrett, then minister to Argentina, said in an address on our South American trade before the Merchant Marine Commission:

"I wish to explain a little in regard to this point. The question arises, If the business is there, why do not men go into it? Let me remind you that Europe has become established in this trade in the first place, and that she controls it at the present time. All the steamship lines that undertake this business are European steamship lines, and wishing to build up the trade with Europe rather than with America they form combinations and use their influence against the establishment of American lines. You see that in the agreement of the Lamport & Holt Line, which runs a line of passenger to Rio, but does not go on to Buenos Ayres. Because of an agreement with the Royal Mail Steamship Company of England they agree that they will not run their passenger steamers farther than Rio, and yet I was informed in New York and Philadelphia that an American company was already organized that would be willing to undertake to put on a line of steamers between New York and Buenos Ayres, provided they could receive enough money for carrying the mails to insure them against loss while they were establishing a regular trade and traffic."

Mr. Anderson, the present consul-general at Rio de Janeiro, speaks of the foreign steamship combination in the Daily Consular and Trade Reports of September 29, 1906:

"Merchants complain that the high freight rates obtaining on goods from the United States to Brazil generally continue to act as a deterrent to trade in general. The conference rates (the conference is the European steamship trust) on goods from the United States to this part of South America are nearly twice as high as freight rates from Asiatic ports to the United States."

Ambassador Griscom, at Rio de Janeiro, in a report to the State Department, published in the Daily Consular and Trade Reports of October 1, 1906, says:

"The English company of Lamport & Holt have been running a monthly service (between Rio and New York) with a practical monopoly, and without competition the freights have been prohibitive. It is hoped that we are entering upon a new era more favorable to merchants who may desire to reach out for trade with Brazil. The crying need of our relations with Brazil is better steamship communication. Inquiry among our leading financiers and merchants indicates that encouragement by our National Government in the form of a small postal or other subvention would quickly bring about the establishment of a good line of American steamers between New York and Rio. Given a few facilities our trade with Brazil must inevitably go ahead with leaps and bounds."

The Brazilian Government has lately subsidized a small steam line of its own to New York to break this European monopoly. Consul-General Anderson states that the facilities provided by these Brazilian craft "are not such as to offer any improvement over present service," but even such feeble competition has shaken the European steamship

trust as disclosed in this report from Mr. Anderson in the Daily Consular and Trade Reports of December 10, 1906:

"The steamship *Goyaz*, the ship of the Lloyd Brazileiro, which inaugurated a regular service between Brazil and the United States about the latter part of August, took a cargo of coffee at 20 cents per bag, as compared with the price of 35 cents charged by the conference ships, the latter of course being subject to the rebate agreed upon, which is made at the end of the year and is proportionate to the amount of coffee shipped. In addition to this cut in the market made by the Brazilian line, one of the largest shippers of coffee in Rio chartered a ship and furnished her total cargo the past week, making quite a cut in the cargoes expected for several conference ships. The result of the opposition to the ship combine is uncertain, but it seems to be generally agreed that the conference rate is too high.

"Freights between the United States and Brazil are much higher than those obtaining in the rest of the world, the rate from New York to Rio de Janeiro being about twice what the rate is from Hongkong to New York. American exporters are vitally interested in this matter, for even assuming that the rates from Europe to Brazil and from the United States to Brazil are practically the same—a fact which is not yet established—it is yet to be noted that the high freight rates shut American exporters out of markets which otherwise they might have. Low freight rates, for instance, would enable American millers to ship American flour to ports in Brazil far south of their present limit. Freight rates from New York to Brazil similar to those obtaining between New York and the Far East would mean largely increased sales of American flour. What is true of flour is true of other things. The rebate system adopted by the shipping combine also works directly and materially against small shippers, among the latter being most American exporters selling to the Brazilian trade."

A strong American steamship service to South America could utterly smash this European combination against American ships and commerce. As the Merchant Marine Commission said in a memorandum presented by Senator GALLINGER:

"It is possible that if there were American steamship companies in our trade with South America they might form a combination of their own. But in that event, as American companies organized in the United States, they could be held responsible by our Government, while it would be very much more difficult to prosecute and break a combination "in restraint of trade" by foreign companies, which can not so readily be reached by American laws.

"Moreover, if there were American steamship companies, their stock or bonds would be owned or controlled in large measure by American merchants and manufacturers and other business men, who would have a great deal of interest in maintaining favorable rates for our export trade to South America. On the other hand, the foreign steamship companies, whose inferior vessels now run in the South American trade, are owned and controlled primarily in the interests of merchants and manufacturers of Europe."

BRITISH MAIL LINES TO SOUTH AMERICA.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF NAVIGATION,
*Washington, February 1, 1907.*

MY DEAR GENERAL: Referring to your letter of the 27th ultimo on the subject of subsidies paid to British lines to South America, I inclose herewith a complete statement taken from the annual reports of the British postmasters-general.

Sincerely, yours,

E. T. CHAMBERLAIN, *Commissioner.*

Hon. C. H. GROSVENOR,
*House of Representatives.*

*Subsidies paid to British lines to South America.*

| Year. | Royal Mail. | | | | Pacific Steam Navigation Co.; Pacific and West Indies, Callao, Valparaiso, and Panama. |

[b] Steamers from Liverpool and Southampton both treated as regular steamers.

BRITISH STEAMSHIPS EMPLOYED.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF NAVIGATION,
*Washington, January 28, 1907.*

MY DEAR GENERAL: Referring to my letter of this date, I inclose a list of all the steamers of the Royal Steam Packet Company and the Pacific Steam Navigation Company (British) over 14 knots. The Pacific Steam Navigation Company until last year was engaged in trade with Asia through the Suez Canal as far as Colombo and thence to Australia, as well as maintaining its South American services. The company is now practically devoted entirely to South American trade, east and west coasts.

The Royal Mail Steam Packet Company last year made an arrangement by which it carries on some business with Australia, as well as the trade with the West Indies, Colon, Brazil, and Argentina, which it has maintained for about sixty-five years.

Very truly, yours,

E. T. CHAMBERLAIN,
*Commissioner.*

Hon. CHARLES H. GROSVENOR,
*House of Representatives, Washington, D. C.*

*List of vessels of the Pacific Steam Navigation Company.*

PROFITS OF FOREIGN STEAMSHIP COMPANIES.

It is often asserted that the ocean shipping trade as carried on by foreigners pays no more, on the average, than 2 or 3 per cent, and that even with the aid of postal payments to regular lines it would

not be profitable for American capital to engage in ocean carrying. This assertion is in conflict with the facts as to the average dividends of the chief foreign steamship companies. These dividends, for certain representative postal lines, as stated by the Commissioner of Navigation in his annual report for 1902 (pp. 87, 88), averaged on the common, not on the preferred stock, as follows:

| Name of company. | Average dividend, 1896–1901. | Name of company. | Average dividend, 1896–1901. |
|---|---|---|---|
| BRITISH. | | FRENCH. | |
| | *Per cent.* | | *Per cent.* |
| Peninsular and Oriental | 11.8 | Messageries Maritimes | 4.7 |
| Union-Castle | 5.5 | Compagnie Générale Transatlantique | 2.5 |
| Pacific Steam | 5.3 | Chargeurs Réunis | 6.2 |
| Cunard (without the new $1,100,000 subsidy) | 4.2 | Average | 4.5 |
| Royal Mail | 5.0 | | |
| Union, of New Zealand | 6.3 | | |
| Orient | 3.8 | OTHER FOREIGN. | |
| Average | 6.0 | Lloyd Austriaco | 3.7 |
| | | Navigazione Generale Italiana | 3.3 |
| GERMAN. | | Compañía Trasatlántica (Spanish) | 6.9 |
| Hamburg-American | 7.7 | Nederland America | 6.6 |
| North German Lloyd | 6.3 | Nippon Yusen (Japanese) | 11.0 |
| Hamburg-South American | 10.3 | | |
| German-Levant | 7.0 | Average | 6.3 |
| German-East Africa | 4.7 | | |
| Average | 7.2 | General average | 6.1 |

A large part of the period from 1896 to 1901 was a period of low freights and of high cost of coal, so that there is nothing unusually favorable in these figures. All of the steamship lines above enumerated perform ocean mail service for their respective governments. The Hamburg-American, which is often said to be unsubsidized, receives pay for carrying the mails, and shares with the other German steamship companies in the benefits of the general imperial policy of encouraging the merchant marine by all manner of legislative expedients. The German Levant Line is especially protected by discriminating railway rates on through merchandise.

The Hamburg-American Line declared a dividend of 11 per cent for 1905, and of 10 per cent for 1906, as against 9 per cent for 1904. The Nippon Yusen Kaisha declared a dividend for the half year ending September 30, 1905, of 12 per cent on its line to Australia. The Messageries Maritimes, one of the great French companies, earned a 5 per cent dividend in 1905, as compared with 4 per cent in 1904. For the half year ending March 31, 1906, the Nippon Yusen Kaisha, on its lines in general, declared a 15 per cent dividend.

Foreign steamship property is profitable enough to have attracted more than $100,000,000 of American capital. This great sum of American money is now invested in shipping under foreign flags, chiefly in the International Mercantile Marine Company, the Morgan combination. But it is a significant fact that the great American investors in foreign ships, when asked by the Merchant Marine Commission in 1904 whether they would bring their foreign vessels under the American flag if a "free ship law" were recommended, all declared that they would not do so. They could not afford to give up the advantage of cheap foreign wages and, in some cases, of foreign subsidies.

AMERICAN SHIPS FOR AMERICAN COMMERCE.

[From pages 555–560 of Hearings Before the Committee on Merchant Marine and Fisheries, April 4–13, 1906.]

One of the most important features of the voluminous testimony taken all over the country by the Merchant Marine Commission was the insistence of practical men of business—merchants and manufacturers and bankers—not themselves interested in any way in shipowning or shipbuilding, that the lack of American ships prevented us from securing an adequate market abroad for the products of American manufacturing, mining, and agriculture.

These practical business men were familiar with the argument of academic free traders and of foreign steamship managers against encouragement to the American merchant marine, that foreigners were carrying our ocean commerce cheaply for us, and that therefore they ought to have a perpetual monopoly of it. But these manufacturers, merchants, and bankers interested in our export trade know, first, that foreign steamship companies do not carry our own products as cheaply as they carry the products of their own countries if they can help it, and that in a great many instances the foreigners do not supply ships to carry our trade at all, or furnish only worn-out, uneconomical vessels, discarded from their own service and sent over here as good enough for the United States, which is helpless because it has no shipping of its own.

These facts are well understood in the seaboard States. They are also understood by the practical business men of the interior, as is demonstrated by the following testimony of middle-western business men before the Merchant Marine Commission.

Mr. James A. Patton, of the Chicago Board of Trade:

"I would be heartily in favor of granting a subsidy to ships sailing from our ports to South America, because our manufacturers have no facilities for shipping there, and we could in that way increase our manufactures all over the country. The shipments of agricultural implements alone from the city of Chicago are enormous."

Mr. Charles L. Pack, of Cleveland, lumberman (at Cleveland, June 28, 1904):

"Most of you know that the region of greatest lumber production in the whole country is the Southern States. The production of lumber there in 1903 was over 10,000,000,000 feet, which is an enormous quantity. If this southern lumber alone were loaded on cars, with the normal load to a car, the train would extend all the way from New York to San Francisco.

"About one-tenth of that lumber is exported. About 1,000,000,000 feet were exported in 1903, and the export trade from the southern ports have been the safeguard of the lumber business in the South for the last twenty years, for the reason that it has taken a good deal of production that we could not well use at home, and the foreign demand has often been good when our demand at home was very poor.

"This export business is very much handicapped because it has to be done to a large extent in tramp steamers. That 1,000,000,000 feet of lumber goes to a very large portion of the world. Last year the exports from the Southern States went to over 150 different foreign ports in Europe, in Asia, as far east as the Straits Settlements, and to both coasts of Africa, and the export would have been very much increased if we had had line steamers running from the southern ports rather than having to depend on occasional tramps as we could pick them up. It often happens that at times we can get more steamers than we have need of, and then there will be weeks and sometimes even months when it is very difficult to get sufficient tonnage to fill the orders. Oftentimes orders are canceled for lack of regular shipping facilities."

Mr. Grasselli, of Cleveland, president of the Grasselli Chemical Company:

"Bear in mind that in order to make shipments to South American ports, with some few exceptions, Americans are compelled to forward the goods to some European port, from which it is sent on to South America. The handicap to American industry becomes a very serious question, and when it is considered that foreign steamship lines are owned and controlled by corporations favorable to the countries to whom they belong and interested in their exports and in their own products, they do not give to the export of the American product the same careful handling and consideration that they naturally do their own; this resulting in the American goods arriving in more or less damaged condition, due to repeated and careless handling, thus causing another serious obstacle in our export business. Besides, with our own flag flying over her, the American ship, in a sense an extension of our own territory, and with her own officers, entering into foreign countries, brings us in physical contact with these countries, insuring our exports in reaching their destination."

Mr. S. A. Upson, of Cleveland, president of the Upson Nut and Bolt Company:

"I want to call your attention very briefly to the fact that a few years since we saw the necessity of increasing our export business, and I concluded that I would take some observations in South America. I found on investigation that in order to get there in any comfort and within a reasonable time I must go by way of England. I found in England two lines of steamers, subsidized by the English Government, being paid liberally for carrying the mail. The two lines ran alternately, so that a fast steamer sailed every week alternately from Southampton and from Liverpool.

"On reaching South America I found English, German, Italian, and French steamers touching semimonthly at nearly all the principal ports, bringing up in Argentina, at the city of Buenos Ayres. In the harbor of Buenos Ayres were many hundreds of ships from all nations, and they have there the finest docks in the world, except, possibly, at Liverpool. This will give you some idea of the immensity of the shipping ariving at that point.

"I learned, on trying to canvass the trade to see what we could do with American goods, that the greatest obstacle to our selling goods was, first, the difference in exchange of about 2 per cent between New York and Liverpool or London. I found also that it was almost an impossibility to expect to get business there on account of the very slow facilities for transportation.

"There were nothing but tramp steamers running between New York and South American ports at that time. These were advertised to leave on perhaps the 1st or the 10th of the month, and they would sail any time within a week or two weeks later, very seldom sailing at the time advertised, while the mail steamers to other countries were all running on regular schedule time, semimonthly, excepting to England, where they were running weekly, and the merchants said that in consequence of the very slow facilities for getting freight and mail to the United States there would be very little use in their trying to do business with the United States. They always knew when they could mail letters to Europe or England particularly and when they could get their replies, as there were steamers going on regular schedule time, while letters sent to the United States would be a month or six weeks en route. In fact, if they wanted to expedite either letters or merchandise they sent them by way of England."

Representative GROSVENOR:

"Mr. Upson, if it does not interrupt your line of thought, do you believe that if a line of fine steamers should be inaugurated from New York to Buenos Ayres it would divert to the United States a large or a considerable part of the business that now goes to Europe?"

Mr. Upson:

"I think it would, for this reason: If we had a regular line of good, first-class, speedy steamers carrying the mail regularly from New York to Buenos Ayres and intermediate ports semimonthly, so that the people of the United States and the people of Argentina and other countries could know that they could get their goods and their mail forwarded promptly, I believe the business would grow very rapidly. I think a great many of our Americans who now visit Europe would take trips to South America, partly as a matter of recreation and partly as a matter of business, and the results would be very great."

Mr. F. F. Prentiss, of the Cleveland Twist Drill Company:

"I want to call your attention to the conditions in South America. I was there several years ago, and the conditions impressed me very strongly. I had to go via Europe to reach South America. The first port at which I stopped—Bahia—and the situation was the same at Rio Janeiro, Montevideo, Buenos Ayres, and at every city where I attempted to market my goods or inquire about the condition of business—I ran against the transportation problem. It was the serious thing that handicapped me in my business, and it handicapped others whose volume would be ten times mine if they had proper facilities.

"While I look, as a manufacturer, at the commercial side of it, I also wish to represent the artisan and the tiller of the soil, who contribute toward the products that we can ship to South America, and we can ship them to other parts of the world, if we have the direct connection, even better than we do to-day. I lay particular stress, however, on the conditions down there, which are due to the lack of transportation facilities."

Mr. Walter D. Sayle, president of the Cleveland Punch and Shear Works Company and president of the Manufacturers' Association:

"It might be proper for me to state to you that I am neither a builder of ships nor to any extent a shipper, nor have I a dollar invested in any of the great steel carrying ships that touch our shores, but I am greatly interested as a citizen, a manufacturer, and a banker, and as one who has given some little thought to this subject.

"One of the commonest arguments of those who are indifferent to the condition of our merchant marine is that it makes no difference in what manner our trade goes abroad, so long as we enjoy rates as low as our competitors.

"This, to my notion, is only a half view of the subject. If we are to regard the mere crossing of the ocean as all, it really makes no difference whatever whether the goods go in American bottoms or in

foreign bottoms, provided they go as cheaply; but if we are to consider the multiplication of American houses in foreign ports, the promotion of American trade in foreign countries, the loss of trade to our own steel and machinery manufacturers, the establishment of American banks in all the quarters of the world, if we are to have within ourselves the means of over-sea transportation in times of war, then we must look to it that American exports go abroad in American ships.

"We can not hope to establish American trade through foreign branch houses and branch banks in foreign countries until the avenues of transportation between the parent houses and their offsprings are entirely independent, absolutely American, and not subject to either the sanction or the forbearance of any nation."

Col. J. J. Sullivan, president of the Central National Bank of Cleveland, ex-president of the Cleveland Chamber of Commerce, and president of the National Board of Trade:

"Blood is thicker than water, and, given the opportunity, a British ship will work for a British house in preference to that of any other nation. Thus it is that the British manufacturer can beat us in the South American markets—a part of our own continent. The great need of South America is agricultural machinery, yet every American reaper and every American harvester must first be dumped on Liverpool docks before it can reach the South American consumer. What chance do you suppose it will stand over there if it comes in competition with a similar product of British manufacture?

"Therefore, I say this question of over-sea shipping is one which concerns us as merchants and manufacturers and business men. We should keep our export trade as nearly as we can within our own hands for the benefit of our own merchants and manufacturers."

Mr. David Harlowe, of Milwaukee, traffic manager of the Allis-Chalmers Company:

"To South America the vessels run very irregularly, possibly at periods of once a month or every six weeks.

"The CHAIRMAN. And they are all foreign steamships?

"Mr. HARLOWE. They are all foreign steamships. The same condition applies to the west coast of America. There are very few vessels sailing from New York or from any other Atlantic port to the west coast of America, and from San Francisco there is only one line of steamers coasting as far as Panama, but none south of Panama. It seems to me that there should be a line of steamships from Pacific coast ports to the west coast of South America, and that there should be steamers sailing oftener than at present from New York and other Atlantic ports to the east coast of South America.

"It appears to me that there would be considerable advantage in having a large American merchant marine by reason of the fact that at present most of the vessels sailing from our ports are owned by foreign capital, and these foreign owners are interested in lines to the same ports from Europe. Consequently they will make no rates from United States ports lower than those that apply from European ports.

"If we could have a marine of our own, it would be cut away from all foreign entanglements, and our steamship agents would be in a position to make a rate to help the home manufacturer as against the foreign manufacturer. Competition is very keen in all manufactured articles, I presume. It is the case in ours, and especially in shipments from England and Germany. We should have a marine of our own that would pay no attention to the rates which are promulgated from the other side, but just go on and enable us to meet competition in the delivery price at destination. I think that point should be borne in mind, gentlemen.

* * * * * * *

"Representative MINOR. You think if we had ships running direct from a few ports in the United States to those ports in South America we would get better dispatch and more regular service?

"Mr. HARLOWE. Yes, sir; and we would be building up a trade as well as taking care of it. Also please bear in mind that there should be service from the Pacific coast to the west coast of South America."

Hon. John Barrett, now minister to Panama, formerly minister to Argentina (at Chicago, June 24, 1904):

"The business men of Buenos Ayres can write to Europe and receive a reply easily in fifty days. It is very seldom that they can ever communicate with New York and Chicago and get an answer in less than eighty days. Anyone who is familiar with business methods and the importance of good mail exchange realizes what a handicap this is to the extension of American commerce. I have heard scores of South American merchants and bankers complain of the wretched mail arrangements between the United States and Argentina. If there were direct and regular service between Buenos Ayres and New York, there is no doubt in my mind that four-fifths of the southern South Americans who travel to the Northern Hemisphere, on either business or pleasure, would come or return via the United States.

* * * * * * *

"The principal reason that we do not have direct steamship communication now of the class which I mention is that no company is willing to undertake it as an experiment or venture unless they can receive a compensation for carrying the mail which will insure them against primary or temporary loss. I have talked with leading steamship men in Buenos Ayres, Paris, Hamburg, and London, as well as in New York, and they have all told me that it would be impossible to initiate a great and important undertaking of this kind unless they could receive sufficient support from the United States and the South American republics to protect them while they were building up sufficent traffic and travel to maintain the line on a paying basis."

APPROVED BY ILLINOIS MANUFACTURERS.

Reading these declarations of middle western men of business that national aid to the American merchant marine is demanded in order that the manufacturers and farmers of Ohio, Indiana, Michigan, Illinois, Wisconsin, and other Middle Western States may secure fair freight rates and adequate shipping facilities to build up their export trade to South America and other foreign markets, it is easy to understand why the Illinois Manufacturers' Association, on April 13, 1906, through its board of directors, formally indorsed the shipping bill of the Merchant Marine Commission and urged the House of Representatives to pass it. The members of the Illinois Manufacturers' Association desire the enactment of this legislation, not as shipowners or shipbuilders, but as American producers, having a surplus which they must sell abroad in competition with the manufacturers of foreign countries whose governments, by subsidy or otherwise, provide ample shipping facilities for them.

STATEMENTS OF AMERICAN REPRESENTATIVES ABROAD.

The declarations of these middle western business men that the failure of our Government to protect and encourage American shipping prevents the manufacturers of the Middle Western States from securing their fair share of the world's markets have been confirmed time and time again by American ministers, consuls, and special commercial agents in foreign countries. About a year ago Special Agent Hutchinson, sent out by the Department of Commerce and Labor, stated in a report, after a brief stay in Brazil, that he did not think that more commercial shipping lines were necessary to South America, though he did think that there was urgent need of an improved mail service. This early report of Mr. Hutchinson, based on brief observation and experience, was eagerly caught up and exploited by those opposed to national aid to the American merchant marine in this country and in Europe. But it is very significant that the farther Mr. Hutchinson traveled in South America and the more he saw and learned the more completely he has come into accord with the opinions of other official observers. In his later reports, based on a fuller understanding of the question, he very frankly declares that our American export trade to South America is seriously hampered by the lack of an American merchant marine and of direct lines of communication.

Thus Mr. Hutchinson states, in a report published on March 23, 1906, by the Department of Commerce and Labor:

"There is no direct passenger service to Chile or the River Plata from the United States. Passengers from New York, for example, wishing to get to Buenos Ayres must either take passage to Rio de Janeiro and there transship to one of the European lines touching at that port en route to the South, or they must cross the Atlantic and transship in some European port to a steamer sailing to Buenos Ayres. If they wish to get to Chile, they may go via the Isthmus of Panama, suffering the inconvenience of transfer to the Panama Railroad and to one of the west coast steamship lines, or they may go to Rio de Janeiro or Montevideo and there transship to a steamer of the Pacific Steam Navigation Company's lines running through the Straits of Valparaiso, or they may go to Liverpool or Hamburg and there take steamer direct to Valparaiso. The passenger from Europe, on the other hand, wishing to go to the River Plata, has the choice of half a dozen first-class lines and several inferior ones. If his destination is Valparaiso, he has at least two direct lines."

This has come about from the liberal policy of European governments, which, by subsidy or state aid in other form, have provided excellent mail and shipping facilities for their manufacturers and merchants.

OUR WRETCHED MAIL SERVICE.

Special Agent Hutchinson adds:

"As in Brazil, so in Chile and the River Plata, there is universal complaint that the mail service to and from the United States is inadequate. If the trouble were only in the length of time required for the delivery of mails, the inconvenience would be sufficiently great, but far more serious is the irregularity, infrequency, and uncertainty of the service."

Speaking of South America in general and of the methods of the foreign steamship companies, Mr. Hutchinson says:

"There is abundant reason for believing that this granting of 'special rates' in actual practice reduces the European rates on many important classes of goods to below the American rates, and that the general impression that our freight charges are somewhat higher than the European is justified. Just what the extent of this excess is it is impossible to say, but the more conservative business men of Valparaiso, for example, place it at about 25 per cent."

Summing up his observations in South America, Special Agent Hutchinson declares:

"The passenger service from the United States is greatly inferior in all respects to that from Europe, and the American people have little inducement to visit and get personally acquainted with commercial and industrial conditions existing in these South American countries. This will remain true until direct lines of first-class passenger steamers ply between New York and the River Plata and a quicker and better service is inaugurated on the west coast from Panama southward to Valparaiso."

As to the American mail service on both the east and west coasts, Mr. Hutchinson says that it is "extremely unsatisfactory."

As to the important matter of cargo steamship service he declared:

"Freighting facilities from New York to Chile and the River Plata are inferior to those from Europe both as regards frequency, regularity, and time required for delivery, and as to rates."

And he concludes:

"Improvements in the interest of new connections, especially in Chile, would be effected by the establishment of a new line doing a strictly shipping business."

AMERICAN SHIPS ALMOST UNKNOWN.

Our pitiable share of the shipping trade of the most important country on the west coast of South America is thus stated, in the Daily Consular and Trade Reports for February 10, 1906, by Consul Mansfield, at Valparaiso:

"In the total number of ships entering and clearing at the several ports of Chile those flying the Chilean flag numbered 5,684, of which 5,041 were steamers and 643 sailing vessels. Of the foreign nations Great Britain represented nearly one-half the total tonnage, with 8,422,000 tons. Germany was second, with 3,000,000 tons. American shipping interests were represented by 33 steamers and 6 sailing vessels, with a tonnage of 131,879 and 3,728 tons, respectively. The total tonnage of all vessels entered was 17,700,000 tons; of the vessels cleared, 17,320."

What is true of Chile is also true of Ecuador. Hon. Archibald J. Sampson, American minister at Quito, states:

"I was informed recently by a prominent merchant here that he would like to deal with New York, but that the freight rates from that city on some of his purchases were fivefold greater when received at Guayaquil than like freight from Hamburg, which was a practical prohibition on American trade."

Germany has steamship lines under her own flag encircling South America. The United States has none at all.

THREE PRESIDENTS SPEAK FOR AMERICAN SHIPPING—BENJAMIN HARRISON.

Our great competitors have established and maintained their lines by government subsidies, until they have now practically excluded us from participation. In my opinion, no choice is left to us but to pursue, moderately at least, the same lines.

WILLIAM M'KINLEY.

I am satisfied the judgment of the country favors the policy of aid to our merchant marine, which will broaden our commerce and markets and upbuild our sea-carrying capacity for the products of agriculture and manufacturing.

THEODORE ROOSEVELT.

Ships work for their own countries, just as railroads work for their terminal points. * * * From every standpoint it is unwise for the United States to continue to rely upon the ships of competing nations for the distribution of our goods. It should be made advantageous to carry American goods in American-built ships.

Three successive Republican Presidents—two from the Middle West and one from the great commercial State of New York—have urged in the strongest terms, throughout their Administrations, the upbuilding of American shipping in the foreign trade.

One of the three was Benjamin Harrison, of Indiana, who was elected in 1888 on a platform declaring:

"We earnestly recommend that prompt action be taken by Congress in the enactment of such legislation as will best secure the rehabilitation of our merchant marine, and we protest against the passage by Congress of a free ship bill as calculated to work injustice to labor by lessening the wages of those engaged in preparing the materials, as well as those directly employed in our shipyards."

President Harrison, in his first inaugural message to Congress, March 4, 1889, thus proclaimed his devotion to the cause of the American ship:

"We should encourage the establishment of American steamship lines. The exchanges of commerce demand stated, reliable, and rapid means of communication, and until these are provided the development of our trade with the states lying south of us is impossible."

PRESIDENT HARRISON TO CONGRESS.

In his first annual message to Congress, on December 3, 1889, President Harrison enlarged upon this theme with growing emphasis:

"There is nothing more justly humiliating to the national pride and nothing more hurtful to the national prosperity than the inferiority of our merchant marine compared with that of other nations whose general resources, wealth, and seacoast lines do not suggest any reason for their supremacy on the sea. It was not always so, and our people are agreed, I think, that it shall not continue to be so. * * *

"FOREIGN LINES ARE SUBSIDIZED.

"That the great steamship lines sailing under the flags of England, France, Germany, Spain, and Italy, and engaged in foreign commerce, were promoted and have since been and now are liberally aided by grants of public money in some form or another is generally known. That the American lines of steamships have been abandoned by us to an unequal contest with the aided lines of other nations until they have been withdrawn or, in the few cases where they are still maintained, are subjected to serious disadvantages is matter of common knowledge.

"MUST NOW GO VIA ENGLAND.

"The present situation is such that travelers and merchandise find Liverpool even a necessary intermediate point between New York and some of the South American capitals. The fact that some of the delegates from South American states to the conference of American nations, now in session at Washington, reached our shores by reversing that line of travel is very conclusive of the need of such a conference and very suggestive as to the first and necessary step in the direction of fuller and more beneficial intercourse with nations that are now our neighbors upon the lines of latitude, but not upon the lines of established commercial intercourse.

"LIBERAL AID FOR AMERICAN LINES.

"I recommend that such appropriations be made for ocean mail service in American steamships between our ports and those of Central American, China, Japan, and the important islands in both of the great oceans as will be liberally remunerative for the service rendered and as will encourage the establishment and in some fair degree equalize the chances of American steamship lines in the competition which they must meet. That the American states lying south of us will gladly cooperate in establishing and maintaining such lines of steamships to their principal ports I do not doubt.

"OUR NEED OF A NAVAL RESERVE.

"We should also make provision for a naval reserve, to consist of such merchant ships of American construction and of a specific tonnage and speed as the owners will consent to place at the use of the Government in case of need as armed cruisers. England has adopted this policy, and as a result can now, upon necessity, at once place upon her naval list some of the fastest steamships in the world. A proper supervision of the construction of such vessels would make their conversion into effective ships of war very easy.

"BLIND AND FALSE ECONOMY.

"I am an advocate of economy in our national expenditures, but it is a misuse of terms to make this word describe a policy that withholds an expenditure for the purpose of extending our foreign commerce. The enlargement and improvement of our merchant marine, the development of a sufficient body of trained seamen, the promotion of rapid and regular mail communication between the ports of other countries and our own, and the adaptation of large and swift American merchant steamships to naval uses in time of war are public purposes of the highest concern.

"A BENEFIT TO ALL THE PEOPLE.

"The enlarged participation of our people in the carrying trade, the new and increased markets that will be found for the products of our farms and factories, and the fuller and better employment of our mechanics which will result from a liberal promotion of our foreign commerce, insure the widest possible diffusion of benefit to all the States and to all the people. Everything is most propitious for the present inauguration of a liberal and progressive policy upon this subject, and we should enter upon it with promptness and decision."

HARRISON SPEAKS AGAIN.

President Harrison, in his second message to Congress, on December 1, 1890, made the merchant marine again the subject of a most earnest and emphatic recommendation:

"I desire to repeat with added urgency the recommendations contained in my last annual message in relation to the development of American steamship lines. The reciprocity clause of the tariff bill will be largely limited, and its benefits retarded and diminished, if provision is not contemporaneously made to encourage the establishment of first-class steam communication between our ports and the ports of those nations as may meet our overtures for enlargement of commercial exchanges.

"A FIRST CONDITION OF FOREIGN TRADE.

"The steamship, carrying the mails statedly and frequently, offering to passengers a comfortable, safe, and speedy transit, is the first condition of foreign trade. It carries the order or the buyer, but not all that is ordered or bought. It gives to the sailing vessels such cargoes as are not urgent or perishable, and, indirectly at least, promotes that important adjunct of commerce. There is now both in this country and in the nations of Central and South America a state of expectation and confidence as to increased trade that will give a double value to your prompt action upon this question. * * *

"LINES TO SOUTH AMERICA.

"The South Atlantic and Gulf ports occupy a very favored position toward the new and important commerce which the reciprocity clause of the tariff act and the postal shipping bill are designed to promote. Steamship lines from these ports to some northern port of South America will almost certainly effect a connection between the railroad systems of the continents long before any continuous line of railroads can be put into operation. The very large appropriation made at the last session for the harbor of Galveston was justified, as it seemed to me, for these considerations. The great Northwest will feel the advantage of trunk lines to the south as well as to the east, and of the markets found for their surplus food products and for many of their manufactured products."

A NEW LAW PASSED AND SIGNED.

Before another annual message was written President Harrison on March 3, 1891, had the satisfaction of signing a new law, the direct fruit of his earnest and patriotic recommendations, extending national aid to lines of American steamers. But unfortunately the original rates of compensation proposed in this measure, which had been fixed by expert authority at an amount just sufficient for the purpose, were cut down one-third on the solicitation of a few middle western men when the bill passed the House of Representatives. This seriously crippled the efficiency of the new measure so far as South America was concerned.

Though this legislation did create one American line to Europe, two to the West Indies, one to Venezuela, and finally one to Australasia, the experience of fifteen years has now demonstrated that the hasty reduction in the rate of mail subventions was a deplorable error, justifying the remonstrances of the friends of the measure, who predicted that, thus heavily reduced, the law would prove a disappointment.

SOME GOOD RESULTS.

The immediate result, however, was beneficial in creating new lines to near-by markets, and President Harrison was enabled to sound a note of congratulation in his message to Congress on December 6, 1892:

"Ever since our merchant marine was driven from the sea by the rebel cruisers during the war of the rebellion the United States has been paying an enormous annual tribute to foreign countries in the shape of freight and passage moneys. Our grain and meats have been taken at our own docks and our large imports there laid down by foreign shipmasters.

"DIVIDENDS TO FOREIGNERS.

"An increasing torrent of American travel to Europe has contributed a vast sum annually to the dividends of foreign shipowners. The balance of trade shown by the books of the custom-houses has been very largely reduced and in many years altogether extinguished by this constant drain. In the year 1892 only 12.3 per cent of our imports were brought in American vessels. These great foreign steamships maintained by our traffic are, many of them, under contracts with their respective governments by which in time of war they will become a part of their armed naval establishments. Profiting by our commerce in peace, they will become the most formidable destroyers of our commerce in time of war.

"A CHANGE OF POLICY.

"I have felt, and have before expressed the feeling, that this condition of things was both intolerable and disgraceful. A wholesome change of policy and one having in it much promise, as it seems to me, was begun by the law of March 3, 1891. Under this law contracts have been made by the Postmaster-General for eleven mail routes. The expenditure involved by these contracts for the next fiscal year approximates $954,123.33. As one of the results already reached, sixteen American steamships of an aggregate tonnage of 57,400 tons, costing $7,400,000, have been built or contracted to be built in American shipyards. * * *

"SUBSIDIES ARE INDISPENSABLE.

"No subject, I think, more nearly touches the pride, the power, and the prosperity of our country than this of the development of our merchant marine upon the sea. If we could enter into conference with our competitors and all would agree to withhold government aid, we could perhaps take our chances with the rest, but our great competitors have established and maintained their lines by government subsidies until they now have practically excluded us from participation. In my opinion no choice is left to us but to pursue, moderately at least, the same lines."

PRESIDENT M'KINLEY'S COUNSEL.

The next Republican President, William McKinley, of Ohio, was known as a strong champion of the American merchant marine long before his election to this great office. In the debate on the new tariff bill that bore his name, on May 7, 1890, in the House of Representatives, Chairman McKinley had said:

"If the United States would give the same encouragement to her merchant marine and her steamship lines as is given by other nations to their ships, this commerce on the seas under the American flag would increase and multiply. When the United States will spend from her Treasury from $5,000,000 to $6,000,000 a year for that purpose, as do France and Great Britain to maintain their steamship lines, our ships will plow every sea in successful competition with the ships of the world. [Loud applause on the Republican side.] Will you gentlemen join us in encouraging our merchant marine? [Renewed applause on the Republican side.]"

BOTH BUSINESS AND PATRIOTISM.

Holding these earnest opinions, President McKinley avowed them in his first inaugural address, on March 4, 1897:

"Congress should give prompt attention to the restoration of our American merchant marine, once the pride of the seas on all the great ocean highways of commerce. To my mind, few more important subjects so imperatively demand its intelligent consideration. The United States has progressed with marvelous rapidity in every field of enterprise and endeavor until we have become foremost in nearly all of the great lines of inland trade, commerce, and industry. Yet, while this is true, our American merchant marine has been steadily declining until it is now lower, both in the percentage of tonnage and the number of vessels employed, than it was prior to the civil war.

"Commendable progress has been made of late years in the upbuilding of the American Navy, but we must supplement these efforts by providing as a proper consort for it a merchant marine amply sufficient for our own carrying trade to foreign countries. The question is one that appeals both to our business interests and the patriotic aspirations of a great people."

PROGRESS ON THE SEAS.

President McKinley reiterated these views in his first annual message to Congress, on December 6, 1897, and he expressed himself even more positively and at greater length on December 5, 1899, after the illuminating experience of the Spanish war:

"The value of an American merchant marine to the expansion of our commercial trade and the strengthening of our power upon the sea invites the immediate action of the Congress. Our national development will be one-sided and unsatisfactory so long as the remarkable growth of our inland industries remains unaccompanied by progress on the seas. There is no lack of constitutional authority for legislation which shall give to the country maritime strength commensurate with its industrial achievement and with its rank among the nations of the earth.

"IN THE LIGHT OF THE WAR.

"Last year American vessels transported a smaller share of our exports and imports than during any former year in all our history, and the measure of our dependence upon foreign shipping was painfully manifested to our people. Without any choice of our own, but from necessity, the Departments of the Government charged with military and naval operations in the East and West Indies had to obtain from foreign flags merchant vessels essential for those operations.

"OTHER NATIONS DO NOT HESITATE.

"The other great nations have not hesitated to adopt the required means to develop their shipping as a factor in national defense and as one of the surest and speediest means of obtaining for their producers a share in foreign markets. Like vigilance and opportunity on our part can not fail but improve our situation, which is regarded with humiliation at home and with surprise abroad. Even the seeming sacrifices, which at the beginning may be inevitable, will be offset later by more than equivalent gains.

"THE EXPENSE AS NOTHING.

"The expense is as nothing compared to the large object achieved. The reestablishment of our merchant marine involves in a large measure our continued industrial progress and the extension of our commercial triumphs. I am satisfied the judgment of the country favors the policy of aid to our merchant marine, which will broaden our commerce and markets and upbuild our sea-carrying capacity for the products of agriculture and manufacturing, which, with the increase of our Navy, means more work and wages to our countrymen, as well as a safeguard to American interests in every part of the world."

AMERICAN SHIPS FOR AMERICAN TRADE.

In his fourth and last message to Congress, on December 3, 1900, after his triumphant reelection, President McKinley said:

"American vessels during the past three years have carried about 9 per cent of our exports and imports. Foreign ships should carry the least, not the greatest, part of American trade. The remarkable growth of our steel industries, the progress of shipbuilding for the domestic trade, and our steadily maintained expenditures for the Navy have created an opportunity to place the United States in the first rank of commercial maritime powers.

"WILL REDUCE FREIGHT CHARGES.

"Besides realizing a proper national aspiration this will mean the establishment and healthy growth along all our coasts of a distinctive national industry, extending the field for the profitable employment of labor and capital. It will increase the transportation facilities and reduce freight charges on the vast volume of products brought from the interior of the seaboard for export, and will strengthen an arm of the national defense upon which the founders of the Government and their successors have relied. In again urging immediate action by the Congress on measures to promote American shipping and foreign trade, I direct attention to the recommendation on the subject in previous messages, but particularly to the opinion expressed in the message of 1899:

"THE COUNTRY FAVORS.

"'I am satisfied the judgment of the country favors the policy of aid to our merchant marine, which will broaden our commerce and markets and upbuild our sea-carrying capacity for the products of agriculture and manufacturing, which, with the increase of our Navy, means more work and wages to our countrymen, as well as a safeguard to American interests in every part of the world.'"

M'KINLEY'S LAST WORDS.

In his very last words to his fellow-countrymen, on that fateful September 5, 1901, at the Pan-American Exposition, just before the bullet of the assassin struck him, President McKinley coupled his memorable plea for wider markets with a fervent demand for an American merchant marine:

"Then, too, we have inadequate steamship service. New lines of steamers have already been put into commission between the Pacific coast ports of the United States and those of the western coast of Mexico and Central and South America. These should be followed up with direct lines between the eastern coast of the United States and South American ports.

"One of the needs of the times is direct commercial lines from our vast fields of production to the fields of consumption that we have but barely touched. Next in advantage to having the thing to sell is to have the convenience to carry it to the buyer. We must encourage our merchant marine. We must have more ships. They must be under the American flag, built and manned and owned by Americans. These will not only be profitable in a commercial sense; they will be messengers of peace and amity wherever they go."

PRESIDENT ROOSEVELT'S APPEAL.

President Theodore Roosevelt, of New York, in this as in so many other things, followed loyally in the course of his beloved predecessor, his enthusiasm for the Navy inspiring naturally this exhortation of his first annual message on December 3, 1901:

"The condition of the American merchant marine is such as to call for immediate remedial action by the Congress. It is discreditable to us as a nation that our merchant marine should be utterly insignificant in comparison to that of other nations which we overtop in other forms of business. We should not longer submit to conditions under which only a trifling portion of our great commerce is carried in our own ships. To remedy this state of things would not merely serve to build up our shipping interests, but it would also result in benefit to all who are interested in the permanent establishment of a wider market for American products and would provide an auxiliary force for the Navy.

"SHIPS WORK FOR THEIR COUNTRY.

"Ships work for their own countries just as railroads work for their terminal points. Shipping lines, if established to the principal countries with which we have dealings, would be of political as well as commercial benefit. From every standpoint it is unwise for the United States to continue to rely upon the ships of competing nations for the distribution of our goods. It should be made advantageous to carry American goods in American-built ships.

"AMERICAN SHIPPING HANDICAPPED.

"At present American shipping is under certain great disadvantages when put in competition with the shipping of foreign countries. Many of the fast foreign steamships, at a speed of 14 knots or above, are subsidized, and all our ships—sailing vessels and steamers alike, cargo carriers of slow speed and mail liners of high speed—have to meet the fact that the original cost of building American ships is greater than is the case abroad; that the wages paid American officers and seamen are very much higher than those paid to officers and seamen of foreign competing countries, and that the standard of living on our ships is far superior to the standard of living on the ships of our commercial rivals.

"Our Government should take such action as will remedy these inequalities. The American merchant marine should be restored to the ocean."

URGING A COMMISSION.

In his message of December 3, 1903, President Roosevelt offered this specific recommendation:

"A majority of our people desire that steps be taken in the interest of American shipping, so that we may once more resume our former position in the ocean carrying trade. But hitherto the differences of opinion as to the proper method of reaching this end have been so wide that it has proved impossible to secure the adoption of any particular scheme. Having in view these facts, I recommend that the Congress direct the Secretary of the Navy, the Postmaster-General, and the Secretary of Commerce and Labor, associated with such a representation from the Senate and the House of Representatives as the Congress in its wisdom may designate, to serve as a commission for the purpose of investigating and reporting to the Congress at its next session what legislation is desirable or necessary for the development of the American merchant marine and American commerce, and incidentally of a national ocean mail service of adequate auxiliary naval cruisers and naval reserves. While such a measure is desirable in any event, it is especially desirable at this time, in view of the fact that our present governmental contract for ocean mail with the American Line will expire in 1905.

"LINES OF CARGO SHIPS.

"Our ocean mail act was passed in 1891. In 1895 our 20-knot trans-Atlantic mail line was equal to any foreign line. Since then the Germans have put on 23-knot steamers, and the British have contracted for 24-knot steamers. Our service should equal the best. If it does not, the commercial public will abandon it. If we are to stay in the business it ought to be with the full understanding of the advantages to the country on the one hand, and on the other with exact knowledge of the cost and proper methods of carrying it on. Moreover, lines of cargo ships are of even more importance than fast mail lines, save so far as the latter can be depended upon to furnish swift auxiliary cruisers in time of war. The establishment of new lines of cargo ships to South America, to Asia, and elsewhere would be much in the interest of our commercial expansion."

THE ROOSEVELT PLATFORM.

Congress responded with the act of April 28, 1904, creating the Merchant Marine Commission of five Senators and five Representatives. For nearly two years thereafter this Commission was pursuing its appointed work. Meanwhile, in the autumn of 1904, Theodore Roosevelt was elected President on a platform declaring:

"While every other industry has prospered under the fostering aid of Republican legislation, American shipping engaged in foreign trade, in competition with the low cost of construction, low wages, and heavy subsidies of foreign governments, has not for many years received from the Government of the United States adequate encouragement of any kind. We therefore favor legislation which will encourage and build up the American merchant marine, and we cordially approve the legislation of the last Congress, which created the Merchant Marine Commission to investigate and report upon this subject."

Before the inquiry of the Commission was entirely completed, in his message of December, 1904, to Congress, President Roosevelt said:

"I especially commend to your immediate attention the encouragement of our merchant marine by appropriate legislation."

THE COMMISSION AND ITS WORK.

Finally the report and recommendations of the Merchant Marine Commission in comprehensive form were laid before Congress, and in his message of December 5, 1905, President Roosevelt said:

"To the spread of our trade in peace and the defense of our flag in war a great and prosperous merchant marine is indispensable. We should have ships of our own and seamen of our own to convey our goods to neutral markets, and in case of need to reenforce our battle line. It can not but be a source of regret and uneasiness to us that the lines of communication with our sister republics of South America should be chiefly under foreign control. It is not a good thing that American merchants and manufacturers should have to send their goods and letters to South America via Europe if they wish security and dispatch. Even on the Pacific, where our ships have held their own better than on the Atlantic, our merchant flag is now threatened through the liberal aid bestowed by other governments on their own steam lines. I ask your earnest consideration of the report with which the Merchant Marine Commission has followed its long and careful inquiry."

The Senate has duly considered the report of the President's Commission, and, under the leadership of Senator GALLINGER, chairman of the Commission, has passed the bill and sent it to the House of Representatives.

Now the House has in turn its opportunity and its duty to heed the counsel and fulfill the appeals of Harrison, McKinley, and Roosevelt.

Mr. GALLINGER. Mr. President, having said these few words, and without any feeling of hostility or unkindness to

those who have, as I think, unwisely filibustered this bill to death, I am content to let the matter rest for the present. But I want here and now to give notice to my associates in this Chamber and to any citizen of this Republic who cares to know the fact that so long as I am privileged to remain in public life I shall not be quiescent while this condition of things exists, but in the future I will exert myself to the utmost to secure legislation on this most important subject.

I am gratified to have assurances from certain Senators on the other side of the Chamber that they will cooperate with those of us on this side who desire legislation in bringing about the passage of a bill on substantially the same lines upon which the bill under consideration is framed. I have hopes of a satisfactory result in the next Congress, and I know that I shall have the cooperation of some distinguished Senators who have heretofore been in opposition in securing the passage of wise and just legislation for the purpose of rehabilitating the American merchant marine.

I beg to request that the message of the President of the United States to Congress of January 23, 1907, and the address of Secretary Root before the Trans-Mississippi Commercial Congress of November 20, 1906, be inserted in the RECORD without reading.

The VICE-PRESIDENT. Without objection, it is so ordered.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES, CALLING ATTENTION TO THE GREAT DESIRABILITY OF ENACTING LEGISLATION TO HELP AMERICAN SHIPPING AND AMERICAN TRADE BY ENCOURAGING THE BUILDING AND RUNNING OF LINES OF LARGE AND SWIFT STEAMERS TO SOUTH AMERICA AND THE ORIENT.

*To the Senate and House of Representatives:*

I call your attention to the great desirability of enacting legislation to help American shipping and American trade by encouraging the building and running of lines of large and swift steamers to South American and the Orient.

The urgent need of our country's making an effort to do something like its share of its own carrying trade on the ocean has been called to our attention in striking fashion by the experiences of Secretary Root on his recent South American tour. The result of these experiences he has set forth in his address before the Trans-Mississippi Commercial Congress, at Kansas City, Mo., on November 20 last, an address so important that it deserves the careful study of all public men.

The facts set forth by Mr. Root are striking, and they can not but arrest the attention of our people. The great continent to the south of us, which should be knit to us by the closest commercial ties, is hardly in direct commercial communication with us at all, its commercial relations being almost exclusively with Europe. Between all the principal South American ports and Europe lines of swift and commodious steamers, subsidized by their home governments, ply regularly. There is no such line of steamers between these ports and the United States.

In consequence, our shipping in South American ports is almost a negligible quantity; for instance, in the year ending June 30, 1905, there entered the port of Rio de Janeiro over 3,000 steamers and sailing vessels from Europe, but from the United States no steamers and only seven sailing vessels, two of which were in distress. One prime reason for this state of things is the fact that those who now do business on the sea do business in a world not of natural competition, but of subsidized competition. State aid to steamship lines is as much a part of the commercial system of to-day as state employment of consuls to promote business. Our commercial competitors in Europe pay in the aggregate some twenty-five millions a year to their steamship lines—Great Britain paying nearly seven millions. Japan pays between three and four millions. By the proposed legislation the United States will still pay relatively less than any one of our competitors pays. Three years ago the Trans-Mississippi Congress formally set forth as axiomatic the statement that every ship is a missionary of trade, that steamship lines work for their own countries just as railroad lines work for their terminal points, and that it is as absurd for the United States to depend upon foreign ships to distribute its products as it would be for a department store to depend upon wagons of a competing house to deliver its goods. This statement is the literal truth.

Moreover, it must be remembered that American ships do not have to contend merely against the subsidization of their foreign competitors. The higher wages and the greater cost of maintenance of American officers and crews make it almost impossible for our people who do business on the ocean to compete on equal terms with foreign ships unless they are protected somewhat as their fellow-countrymen who do business on land are protected. We can not as a country afford to have the wages and the manner of life of our seamen cut down; and the only alternative, if we are to have seamen at all, is to offset the expense by giving some advantage to the ship itself.

The proposed law which has been introduced in Congress is in no sense experimental. It is based on the best and most successful precedents, as, for instance, on the recent Cunard contract with the British Government. As far as South America is concerned, its aim is to provide from the Atlantic and Pacific coasts better American lines to the great ports of South America than the present European lines. The South American republics now see only our warships. Under this bill our trade friendship will be made evident to them. The bill proposes to build large-sized steamers of 16-knot speed. There are nearly 200 such steamships already in the world's foreign trade, and over three-fourths of them now draw subsidies—postal or admiralty or both. The bill will encourage our shipyards, which are almost as necessary to the national defense as battle ships, and the efficiency of which depends in large measure upon their steady employment in large construction. The proposed bill is of importance to our Navy, because it gives a considerable fleet of auxiliary steamships, such as is now almost wholly lacking, and also provides for an effective naval reserve.

The bill provides for fourteen steamships, subsidized to the extent of over a million and a half, from the Atlantic coast, all to run to South American ports. It provides on the Pacific coast for twenty-two steamers subsidized to the extent of two millions and a quarter, some of these to run to South America, most of them to Manila, Australia, and Asia. Be it remembered that while the ships will be owned on the coasts, the cargoes will largely be supplied by the interior, and that the bill will benefit the Mississippi Valley as much as it benefits the seaboard.

I have laid stress upon the benefit to be expected from our trade with South America. The lines to the Orient are also of vital importance. The commercial possibilities of the Pacific are unlimited, and for national reasons it is imperative that we should have direct and adequate communication by American lines with Hawaii and the Philippines. The existence of our present steamship lines on the Pacific is seriously threatened by the foreign subsidized lines. Our communications with the markets of Asia and with our own possessions in the Philippines, no less than our communications with Australia, should depend not upon foreign, but upon our own steamships. The Southwest and the Northwest should alike be served by these lines, and if this is done they will also give to the Mississippi Valley throughout its entire length the advantage of all transcontinental railways running to the Pacific coast. To fail to establish adequate lines on the Pacific is equivalent to proclaiming to the world that we have neither the ability nor the disposition to contend for our rightful share of the commerce of the Orient; nor yet to protect our interests in the Philippines. It would surely be discreditable for us to surrender to our commercial rivals the great commerce of the Orient, the great commerce we should have with South America, and even our own communications with Hawaii and the Philippines.

I earnestly hope for the enactment of some law like the bill in question.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *January 23, 1907.*

ADDRESS BY HON. ELIHU ROOT BEFORE THE TRANS-MISSISSIPPI COMMERCIAL CONGRESS, KANSAS CITY, MO., TUESDAY, NOVEMBER 20, 1906.

Mr. PRESIDENT AND GENTLEMEN OF THE CONGRESS:

A little less than three centuries of colonial and national life have brought the people inhabiting the United States, by a process of evolution, natural and with the existing forces inevitable, to a point of distinct and radical change in their economic relations to the rest of mankind.

During the period now past the energy of our people, directed by the formative power created in our early population by heredity, by environment, by the struggle for existence, by individual independence, and by free institutions, has been devoted to the internal development of our own country. The surplus wealth produced by our labors has been applied immediately to reproduction in our own land. We have been cutting down forests and breaking virgin soil and fencing prairies and opening mines of coal and iron and copper and silver and gold, and building roads and canals and railroads and telegraph lines and cars and locomotives and mills and furnaces and schoolhouses and colleges and libraries and hospitals and asylums and public buildings and storehouses and shops and homes. We have been drawing on the resources of the world in capital and in labor to aid us in our work. We have gathered strength from every rich and powerful nation and expended it upon these home undertakings; into them we have poured hundreds of millions of money attracted from the investors of Europe. We have been always a debtor nation, borrowing from the rest of the world, drawing all possible energy toward us and concentrating it with our own energy upon our own enterprises. The engrossing pursuit of our own opportunities has excluded from our consideration and interest the enterprises and the possibilities of the outside world. Invention, discovery, the progress of science, capacity for organization, the enormous increase in the productive power of mankind, have accelerated our progress and have brought us to a result of development in every branch of internal industrial activity marvelous and unprecedented in the history of the world.

Since the first election of President McKinley the people of the United States have for the first time accumulated a surplus of capital beyond the requirements of internal development. That surplus is increasing with extraordinary rapidity. We have paid our debts to Europe and have become a creditor instead of a debtor nation; we have faced about; we have left the ranks of the borrowing nations and have entered the ranks of the investing nations. Our surplus energy is beginning to look beyond our own borders, throughout the world, to find opportunity for the profitable use of our surplus capital, foreign markets for our manufactures, foreign mines to be developed, foreign bridges and railroads and public works to be built, foreign rivers to be turned into electric power and light. As in their several ways England and France and Germany have stood, so we in our own way are beginning to stand and must continue to stand toward the industrial enterprise of the world.

That we are not beginning our new rôle feebly is indicated by $1,518,561,666 of exports in the year 1905 as against $1,117,513,071 of imports, and by $1,743,864,500 exports in the year 1906 as against $1,226,563,843 of imports. Our first steps in the new field indeed are somewhat clumsy and unskilled. In our own vast country, with oceans on either side, we have had too little contact with foreign peoples readily to understand their customs or learn their languages; yet no one can doubt that we shall learn and shall understand and shall do our business abroad, as we have done it at home, with force and efficiency.

Coincident with this change in the United States the progress of political development has been carrying the neighboring continent of South America out of the stage of militarism into the stage of industrialism. Throughout the greater part of that vast continent revolutions have ceased to be looked upon with favor or submitted to with indifference; the revolutionary general and the dictator are no longer the objects of admiration and imitation; civic virtues command the highest respect; the people point with satisfaction and pride to the stability of their governments, to the safety of property, and the certainty of justice; nearly everywhere the people are eager for foreign capital to develop their natural resources and for foreign immigration to occupy their vacant land. Immediately before us, at exactly the right time, just as we are ready for it, great opportunities for peaceful commercial and industrial expansion to the south are presented. Other investing nations are already in the field—England, France, Germany, Italy, Spain; but the field is so vast, the new demands are so great, the progress so rapid, that what other nations have done up to this time is but a slight advance in the race for the grand total. The opportunities are so large that figures fail to convey them. The area of this newly awakened continent is 7,502,848 square miles—more than two and one-half times as large as the United States without Alaska, and more than double the United States including Alaska. A

large part of this area lies within the Temperate Zone, with an equable and invigorating climate, free from extremes of either heat or cold. Farther north in the Tropics are enormous expanses of high table-lands, stretching from the Atlantic to the foothills of the Andes, and lifted far above the tropical heats; the fertile valleys of the western Cordilleras are cooled by perpetual snows, even under the equator; vast forests grow untouched from a soil of incredible richness. The plains of Argentina, the great uplands of Brazil, the mountain valleys of Chile, Peru, Ecuador, Bolivia, and Colombia are suited to the habitation of any race, however far to the north its origin may have been. Hundreds of millions of men can find healthful homes and abundant sustenance in this great territory.

The population in 1900 was only 42,461,381, less than six to the square mile. The density of population was less than one-eighth of that in the State of Missouri, less than one-sixtieth of that in the State of Massachusetts, less than one-seventieth of that in England, less than 1 per cent of that in Belgium.

With this sparse population the production of wealth is already enormous. The latest trade statistics show exports from South America to foreign countries of $745,530,000, and imports of $490,858,600. Of the five hundred millions of goods that South America buys we sell them but $63,246,525, or 12.6 per cent. Of the seven hundred and forty-five millions that South America sells we buy $152,092,000, or 20.4 per cent—nearly two and one-half times as much as we sell.

Their production is increasing by leaps and bounds. In eleven years the exports of Chile have increased 45 per cent, from $54,030,000 in 1894 to $78,840,000 in 1905. In eight years the exports of Peru have increased 100 per cent, from $13,899,000 in 1897 to $28,758,000 in 1905. In ten years the exports of Brazil have increased 66 per cent, from $134,062,000 in 1894 to $223,101,000 in 1905. In ten years the exports of Argentina have increased 168 per cent, from $115,868,000 in 1895 to $311,544,000 in 1905.

This is only the beginning; the coffee and rubber of Brazil, the wheat and beef and hides of Argentina and Uruguay, the copper and nitrates of Chile, the copper and tin of Bolivia, the silver and gold and cotton and sugar of Peru, are but samples of what the soil and mines of that wonderful continent are capable of yielding. Ninety-seven per cent of the territory of South America is occupied by ten independent republics living under constitutions substantially copied or adapted from our own. Under the new conditions of tranquillity and security which prevail in most of them their eager invitation to immigrants from the old world will not long pass unheeded. The pressure of population abroad will inevitably turn its streams of life and labor toward those fertile fields and valleys. The streams have already begun to flow; more than 200,000 immigrants entered the Argentine Republic last year; they are coming this year at the rate of over three hundred thousand. Many thousands of Germans have already settled in southern Brazil. They are most welcome in Brazil; they are good and useful citizens there, as they are here; I hope that many more will come to Brazil and every other South American country, and add their vigorous industry and good citizenship to the upbuilding of their adopted home.

With the increase of population in such a field, under free institutions, with the fruits of labor and the rewards of enterprise secure, the production of wealth and the increase of purchasing power will afford a market for the commerce of the world worthy to rank even with the markets of the Orient as the goal of business enterprise. The material resources of South America are in some important respects complementary to our own; that continent is weakest where North America is strongest as a field for manufactures; it has comparatively little coal and iron. In many respects the people of the two continents are complementary to each other; the South American is polite, refined, cultivated, fond of literature and of expression, and of the graces and charms of life, while the North American is strenuous, intense, utilitarian. Where we accumulate, they spend. While we have less of the cheerful philosophy which finds sources of happiness in the existing conditions of life, they have less of the inventive faculty which strives continually to increase the productive power of man and lower the cost of manufacture. The chief merits of the peoples of the two continents are different; their chief defects are different. Mutual intercourse and knowledge can not fail to greatly benefit both. Each can learn from the other; each can teach much to the other, and each can contribute greatly to the development and prosperity of the other. A large part of their products find no domestic competition here; a large part of our products will find no domestic competition there. The typical conditions exist for that kind of trade which is profitable, honorable, and beneficial to both parties.

The relations between the United States and South America have been chiefly political rather than commercial or personal. In the early days of the South American struggle for independence the eloquence of Henry Clay awakened in the American people a generous sympathy for the patriots of the South as for brethren struggling in the common cause of liberty. The clear-eyed, judicious diplomacy of Richard Rush, the American minister at the Court of St. James, effected a complete understanding with Great Britain for concurrent action in opposition to the designs of the Holy Alliance, already contemplating the partition of the Southern Continent among the great powers of continental Europe. The famous declaration of Monroe arrayed the organized and rapidly increasing power of the United States as an obstacle to European interference and made it forever plain that the cost of European aggression would be greater than any advantage which could be won even by successful aggression.

That great declaration was not the chance expression of the opinion or the feeling of the moment; it crystallized the sentiment for human liberty and human rights which has saved American idealism from the demoralization of narrow selfishness, and has given to American democracy its true world power in the virile potency of a great example. It responded to the instinct of self-preservation in an intensely practical people. It was the result of conference with Jefferson and Madison and John Quincy Adams and John C. Calhoun and William Wirt—a combination of political wisdom, experience, and skill not easily surpassed. The particular circumstances which led to the declaration no longer exist; no Holy Alliance now threatens to partition South America; no European colonization of the west coast threatens to exclude us from the Pacific. But those conditions were merely the occasion for the declaration of a principle of action. Other occasions for the application of the principle have arisen since; it needs no prophetic vision to see that other occasions for its application may arise hereafter. The principle declared by Monroe is as wise an expression of sound political judgment to-day, as truthful a representation of the sentiments and instincts of the American people to-day, as living in its force as an effective rule of conduct whenever occasion shall arise, as it was on the 2d of December, 1823.

These great political services to South American independence, however, did not and could not in the nature of things create any relation between the people of South America and the people of the United States except a relation of political sympathy.

Twenty-five years ago Mr. Blaine, sanguine, resourceful, and gifted with that imagination which enlarges the historian's understanding of the past into the stateman's comprehension of the future, undertook to inaugurate a new era of American relations which should supplement political sympathy by personal acquaintance, by the intercourse of expanding trade, and by mutual helpfulness. As Secretary of State under President Arthur he invited the American nations to a conference to be held on the 24th of November, 1882, for the purpose of considering and discussing the subject of preventing war between the nations of America. That invitation, abandoned by Mr. Frelinghuysen, was renewed under Mr. Cleveland, and on the 2d of October, 1889, Mr. Blaine, again Secretary of State under President Harrison, had the singular good fortune to execute his former design and to open the session of the first American conference at Washington. In an address of wisdom and lofty spirit, which should ever give honor to his memory, he described the assembly as—

"an honorable, peaceful conference of seventeen independent American powers, in which all shall meet together on terms of absolute equality; a conference in which there can be no attempt to coerce a single delegate against his own conception of the interests of his nation; a conference which will permit no secret understanding on any subject, but will frankly publish to the world all its conclusions; a conference which will tolerate no spirit of conquest, but will aim to cultivate an American sympathy as broad as both continents; a conference which will form no selfish alliance against the older nations from which we are proud to claim inheritance—a conference, in fine, which will seek nothing, propose nothing, endure nothing that is not, in the general sense of all the delegates, timely, wise, and peaceful."

The policy which Blaine inaugurated has been continued; the Congress of the United States has approved it; subsequent Presidents have followed it. The first conference at Washington has been succeeded by a second conference in Mexico, and now by a third conference in Rio de Janeiro; and it is to be followed in years to come by further successive assemblies in which the representatives of all American States shall acquire better knowledge and more perfect understanding and be drawn together by the recognition of common interests and the kindly consideration and discussion of measures for mutual benefit.

Nevertheless, Mr. Blaine was in advance of his time. In 1881 and 1889 neither had the United States reached a point where it could turn its energies away from its own internal development and direct them outward toward the development of foreign enterprises and foreign trade, nor had the South American countries reached the stage of stability in government and security for property necessary to their industrial development.

Now, however, the time has come; both North and South America have grown up to Blaine's policy; the production, the trade, the capital, the enterprise of the United States have before them the opportunity to follow, and they are free to follow, the pathway marked out by the far-sighted statesmanship of Blaine for the growth of America, North and South, in the peaceful prosperity of a mighty commerce.

To utilize this opportunity certain practical things must be done. For the most part these things must be done by a multitude of individual efforts; they can not be done by government. Government may help to furnish facilities for the doing of them, but the facilities will be useless unless used by individuals. They can not be done by resolutions of this or any other commercial body; resolutions are useless unless they stir individual business men to action in their own business affairs. The things needed have been fully and specifically set forth in many reports of efficient consuls and of highly competent agents of the Department of Commerce and Labor, and they have been described in countless newspapers and magazine articles; but all these things are worthless unless they are followed by individual action. I will indicate some of the matters to which every producer and merchant who desires South American trade should pay attention:

1. He should learn what the South Americans want and conform his product to their wants. If they think they need heavy castings he should give them heavy castings and not expect them to buy light ones because he thinks they are better. If they want coarse cottons he should give them coarse cottons and not expect them to buy fine cottons. It may not pay to-day, but it will pay to-morrow. The tendency to standardize articles of manufacture may reduce the cost and promote convenience, but if the consumers on the River Plate demand a different standard from the consumers on the Mississippi, you must have two standards or lose one market.

2. Both for the purpose of learning what the South American people want and of securing their attention to your goods you must have agents who speak the Spanish or Portuguese language. For this there are two reasons: One is that people can seldom really get at each other's minds through an interpreter, and the other is that nine times out of ten it is only through knowing the Spanish or Portuguese language that a North American comes to appreciate the admirable and attractive personal qualities of the South American and is thus able to establish that kindly and agreeable personal relation which is so potent in leading to business relations.

3. The American producer should arrange to conform his credit system to that prevailing in the country where he wishes to sell goods. There is no more money lost upon commercial credits in South America than there is in North America, but business men there have their own ways of doing business; they have to adapt the credits they receive to the credits they give. It is often inconvenient and disagreeable, and it is sometimes impossible, for them to conform to our ways, and the requirement that they should do so is a serious obstacle to trade.

To understand credits it is, of course, necessary to know something about the character, trustworthiness, and commercial standing of the purchaser, and the American producer or merchant who would sell goods in South America must have some means of knowledge upon this subject. This leads naturally to the next observation I have to make.

4. The establishment of banks should be brought about. The Americans already engaged in South American trade could well afford to subscribe the capital and establish an American bank in each of the principal cities of South America. This is, first, because nothing but very bad management could prevent such a bank from making money; capital is much needed in those cities, and 6, 8, and 10 per cent can be obtained for money upon just as safe security as can be had in Kansas City, St. Louis, or New York. It is also because the American bank would furnish a source of information as to the standing of the South American purchasers to whom credit may be extended, and because American banks would relieve American business in South America from the disadvantage which now exists of making all its financial transactions through Europe instead of directly with the United States. It

is unfortunately true that among hundreds of thousands of possible customers the United States now stands in a position of assumed financial and business inferiority to the countries through whose banking houses all its business has to be done.

5. The American merchant should himself acquire, if he has not already done so, and should impress upon all his agents, that respect for the South American to which he is justly entitled and which is the essential requisite to respect from the South American. We are different in many ways as to character and methods. In dealing with all foreign people it is important to avoid the narrow and uninstructed prejudice which assumes that difference from ourselves denotes inferiority. There is nothing that we resent so quickly as an assumption of superiority or evidence of condescension in foreigners; there is nothing that the South Americans resent so quickly. The South Americans are our superiors in some respects. We are their superiors in other respects. We should show to them what is best in us and see what is best in them. Every agent of an American producer or merchant should be instructed that courtesy, politeness, and kindly consideration are essential requisites for success in the South American trade.

6. The investment of American capital in South America under the direction of American experts should be promoted, not merely upon simple investment grounds, but as a means of creating and enlarging trade. For simple investment purposes the opportunities are innumerable. Good business judgment and good business management will be necessary there, of course, as they are necessary here; but, given these, I believe that there is a vast number of enterprises awaiting capital in the more advanced countries of South America, capable of yielding great profits, and in which the property and the profits will be as safe as in the United States or Canada. A good many such enterprises are already begun. I have found a graduate of the Massachusetts Institute of Technology, a graduate of the Columbia School of Mines, and a graduate of Colonel Roosevelt's Rough Riders smelting copper close under the snow line of the Andes; I have ridden in an American car upon an American electric road, built by a New York engineer, in the heart of the coffee region of Brazil, and I have seen the waters of that river along which Pizarro established his line of communication in the conquest of Peru harnessed to American machinery to make light and power for the city of Lima. Every such point is the nucleus of American trade—the source of orders for American goods.

7. It is absolutely essential that the means of communication between the two countries should be improved and increased.

This underlies all other considerations and it applies both to the *mail*, the passenger, and the freight services. Between all the principal South American ports and England, Germany, France, Spain, Italy lines of swift and commodious steamers ply regularly. There are five subsidized first-class mail and passenger lines between Buenos Ayres and Europe; there is no such line between Buenos Ayres and the United States. Within the past two years the German, the English, and the Italian lines have been replacing their old steamers with new and swifter steamers of modern construction, accommodation, and capacity.

In the year ending June 30, 1905, there entered the port of Rio de Janeiro steamers and sailing vessels flying the flag of Austria-Hungary 120, of Norway 142, of Italy 165, of Argentina 264, of France 349, of Germany 657, of Great Britain 1,785, of the United States no steamers and 7 sailing vessels, 2 of which were in distress.

An English firm runs a small steamer monthly between New York and Rio de Janeiro; the Panama Railroad Company runs steamers between New York and the Isthmus of Panama; the Brazilians are starting for themselves a line between Rio and New York; there are two or three foreign concerns running slow cargo boats, and there are some foreign tramp steamers. That is the sum total of American communications with South America beyond the Caribbean Sea. Not one American steamship runs to any South American port beyond the Caribbean. During the past summer I entered the ports of Para, Pernambuco, Bahia, Rio de Janeiro, Santos, Montevideo, Buenos Ayres, Bahia Blanca, Punta Arenas, Lota, Valparaiso, Coquimbo, Tocopilla, Callao, and Cartagena—all of the great ports and a large proportion of the secondary ports of the Southern Continent. I saw only one ship, besides the cruiser that carried me, flying the American flag. The mails between South America and Europe are swift, regular, and certain; between South America and the United States they are slow, irregular, and uncertain. Six weeks is not an uncommon time for a letter to take between Buenos Ayres or Valparaiso and New York. The merchant who wishes to order American goods can not know when his order will be received or when it will be filled. The freight charges between the South American cities and American cities are generally and substantially higher than between the same cities and Europe. At many points the deliveries of freight are uncertain and its condition upon arrival doubtful. The passenger accommodations are such as to make a journey to the United States a trial to be endured, and a journey to Europe a pleasure to be enjoyed. The best way to travel between the United States and both the southwest coast and the east coast of South America is to go by way of Europe, crossing the Atlantic twice. It is impossible that trade should prosper or intercourse increase or mutual knowledge grow to any great degree under such circumstances. The communication is worse now than it was twenty-five years ago. So long as it is left in the hands of our foreign competitors in business we can not reasonably look for any improvement. It is only reasonable to expect that European steamship lines shall be so managed as to promote European trade in South America rather than to promote the trade of the United States in South America.

This woeful deficiency in the means to carry on and enlarge our South American trade is but a part of the general decline and feebleness of the American merchant marine, which has reduced us from carrying over 90 per cent of our export trade in our own ships to the carriage of 9 per cent of that trade in our own ships, and dependence upon foreign shipowners for the carriage of 91 per cent. The true remedy and the only remedy is the establishment of American lines of steamships between the United States and the great ports of South America, adequate to render fully as good service as is now afforded by the European lines between those ports and Europe. The substantial underlying fact was well stated in the resolution of this Trans-Mississippi congress three years ago:

"That every ship is a missionary of trade; that steamship lines work for their own countries just as railroad lines work for their terminal points, and that it is as absurd for the United States to depend upon foreign ships to distribute its products as it would be for a department store to depend upon wagons of a competing house to deliver its goods."

How can this defect be remedied? The answer to this question must be found by ascertaining the cause of the decline of our merchant marine. Why is it that Americans have substantially retired from the foreign transport service? We are a nation of maritime traditions and facility; we are a nation of constructive capacity, competent to build ships; we are eminent, if not preeminent, in the construction of machinery; we have abundant capital seeking investment; we have courage and enterprise shrinking from no competition in any field which we choose to enter. Why, then, have we retired from this field in which we were once conspicuously successful?

I think the answer is twofold:

1. The higher wages and the greater cost of maintenance of American officers and crews make it impossible to compete on equal terms with foreign ships. The scale of living and the scale of pay of American sailors are fixed by the standard of wages and of living in the United States, and those are maintained at a high level by the protective tariff. The moment the American passes beyond the limits of his country and engages in ocean transportation he comes into competition with the lower foreign scale of wages and of living. Mr. Joseph L. Bristow, in his report upon trade conditions affecting the Panama Railroad, dated June 14, 1905, gives in detail the cost of operating an American steamship with a tonnage of approximately 3,500 tons, as compared with the cost of operating a specified German steamship of the same tonnage, and the differences aggregate $15,315 per annum greater cost for the American steamship than for the German; that is, $4.37 per ton. He gives also in detail the cost of maintaining another American steamship, with a tonnage of approximately 2,500 tons, as compared with the cost of operating a specified British steamship of the same tonnage, and the differences aggregate $18,289.68 per annum greater cost for the American steamship than for the British; that is, $7.31 per ton. It is manifest that if the German steamship were content with a profit of less than $15,000 per annum and the British with a profit of less than $18,000 per annum the American ships would have to go out of business.

2. The principal maritime nations of the world, anxious to develop their trade, to promote their shipbuilding industry, to have at hand transports and auxiliary cruisers in case of war, are fostering their steamship lines by the payment of subsidies. England is paying to her steamship lines between six and seven million dollars a year. It is estimated that since 1840 she has paid to them between two hundred and fifty and three hundred millions. The enormous development of her commerce, her preponderant share of the carrying trade of the world, and her shipyards crowded with construction orders from every part of the earth indicate the success of her policy. France is paying about $8,000,000 a year; Italy and Japan, between three and four millions each. Germany, upon the initiative of Bismarck, is building up her trade with wonderful rapidity by heavy subventions to her steamship lines and by giving special differential rates of carriage over her railroads for merchandise shipped by those lines. Spain, Norway, Austria-Hungary, Canada, all subsidize their own lines. Is is estimated that about $28,000,000 a year are paid by our commercial competitors to their steamship lines.

Against these advantages to his competitor the American shipowner has to contend; and it is manifest that the subsidized ship can afford to carry freight at cost for a long enough period to drive him out of business.

We are living in a world not of natural competition, but of subsidized competition. State aid to steamship lines is as much a part of the commercial system of our day as state employment of consuls to promote business.

It will be observed that both of these disadvantages under which the American shipowner labors are artificial; they are created by governmental action—one by our own Government in raising the standard of wages and living, by the protective tariff; the other by foreign governments in paying subsidies to their ships for the promotion of their own trade. For the American shipowner it is not a contest of intelligence, skill, industry, and thrift against similar qualities in his competitor; it is a contest against his competitors and his competitors' governments and his own Government also.

Plainly these disadvantages created by governmental action can be neutralized only by governmental action, and should be neutralized by such action.

What action ought our Government to take for the accomplishment of this just purpose? Three kinds of action have been advocated:

1. A law providing for free ships—that is, permitting Americans to buy ships in other countries and bring them under the American flag. Plainly this would not at all meet the difficulties which I have described. The only thing it would accomplish would be to overcome the excess in cost of building a ship in an American shipyard over the cost of building it in a foreign shipyard; but since all the materials which enter into an American ship are entirely relieved of duty, the difference in cost of construction is so slight as to be practically a negligible quantity and to afford no substantial obstacle to the revival of American shipping. The expedient of free ships, therefore, would be merely to sacrifice our American shipbuilding industry, which ought to be revived and enlarged with American shipping, and to sacrifice it without receiving any substantial benefit. It is to be observed that Germany, France, and Italy all have attempted to build up their own shipping by adopting the policy of free ships, have failed in the experiment, have abandoned it, and have adopted in its place the policy of subsidy.

2. It has been proposed to establish a discriminating tariff duty in favor of goods imported in American ships—that is to say, to impose higher duties upon goods imported in foreign ships than are imposed on goods imported in American ships. We tried that once many years ago and have abandoned it. In its place we have entered into treaties of commerce and navigation with the principal countries of the world expressly agreeing that no such discrimination shall be made between their vessels and ours. To sweep away all those treaties and enter upon a war of commercial retaliation and reprisal for the sake of accomplishing indirectly what can be done directly should not be seriously considered.

3. There remains the third and obvious method—to neutralizing the artificial disadvantages imposed upon American shipping through the action of our own Government and foreign governments by an equivalent advantage in the form of a subsidy or subvention. In my opinion this is what should be done; it is the sensible and fair thing to do. It is what must be done if we would have a revival of our shipping and the desired development of our foreign trade. We can not repeal the protective tariff; no political party dreams of repealing it; we do not wish to lower the standard of American living or American wages. We should give back to the shipowner what we take away from him for the purpose of maintaining that standard; and unless we do give it back we shall continue to go without ships. How can the expenditure of public money for the improvement of rivers and harbors to promote trade be justified upon any grounds which do not also sustain this proposal? Would anyone reverse the policy that granted aid to the Pacific railroads, the pioneers of our enormous internal commerce,

the agencies that built up the great traffic which has enabled half a dozen other roads to be built in later years without assistance? Such subventions would not be gifts. They would be at once compensation for injuries inflicted upon American shipping by American laws and the consideration for benefits received by the whole American people—not the shippers or the shipbuilders or the sailors alone, but by every manufacturer, every miner, every farmer, every merchant whose prosperity depends upon a market for its products.

The provision for such just compensation should be carefully shaped and directed so that it will go to individual advantage only so far as the individual is enabled by it to earn a reasonable profit by building up the business of the country.

A bill is now pending in Congress which contains such provisions; it has passed the Senate and is now before the House Committee on Merchant Marine and Fisheries; it is known as Senate bill No. 529, Fifty-ninth Congress, first session. It provides specifically that the Postmaster-General may pay to American steamships, of specified rates of speed, carrying mails upon a regular service, compensation not to exceed the following amounts: For a line from an Atlantic port to Brazil, monthly, $150,000 a year; for a line from an Atlantic port to Uruguay and Argentina, monthly, $187,500 a year; for a line from a Gulf port to Brazil, monthly, $137,500 a year; for a line from each of two Gulf ports and from New Orleans to Central America and the Isthmus of Panama, weekly, $75,000 a year; for a line from a Gulf port to Mexico, weekly, $50,000 a year; for a line from a Pacific coast port to Mexico, Central America, and the Isthmus of Panama, fortnightly, $120,000 a year. For these six regular lines a total of $720,000. The payments provided are no more than enough to give the American ships a fair living chance in the competition.

There are other wise and reasonable provisions in the bill relating to trade with the Orient, to tramp steamers, and to a naval reserve; but I am now concerned with the provisions for trade to the south. The hope of such a trade lies chiefly in the passage of that bill.

Postmaster-General Cortelyou, in his report for 1905, said:

"Congress has authorized the Postmaster-General, by the act of 1891, to contract with the owners of American steamships for ocean mail service and has realized the impracticability of commanding suitable steamships in the interest of the postal service alone by requiring that such steamers shall be of a size, class, and equipment which will promote commerce and become available as auxiliary cruisers of the Navy in case of need. The compensation allowed to such steamers is found to be wholly inadequate to secure the proposals contemplated; hence advertisements from time to time have failed to develop any bids for much-needed service. This is especially true in regard to several of the coutries of South America with which we have cordial relations and which, for manifest reasons, should have direct mail connections with us. I refer to Brazil and countries south of it. Complaints of serious delay to mails for these countries have become frequent and emphatic, leading to the suggestion on the part of certain officials of the Government that for the present and until more satisfactory direct communication can be established important mails should be dispatched to South America by way of European ports and on European steamers, which would not only involve the United Stafes in the payment of double transit rates to a foreign country for the dispatch of its mails to countries of our own hemisphere, but might seriously embarrass the Government in the exchange of important official and diplomatic correspondence.

"The fact that the Government claims exclusive control of the transmission of letter mail throughout its own territory would seem to imply that it should secure and maintain the exclusive jurisdiction, when necessary, of its mails on the high seas. The unprecedented expansion of trade and foreign commercee justifies prompt consideration of an adequate foreign mail service."

It is difficult to believe, but it is true, that out of this faulty ocean mail service the Government of the United States is making a large profit. The actual cost to the Government last year of the ocean mail service to foreign countries other than Canada and Mexico was $2,965,624.21, while the proceeds realized by the Government from postage between the United States and foreign countries other than Canada and Mexico was $6,008,807.53, leaving the profit to the United States of $3,043,183.32; that is to say, under existing law the Government of the United States, having assumed the monopoly of carrying the mails for the people of the country, is making a profit of $3,000,000 per annum by rendering cheap and inefficient service. Every dollar of that three millions is made at the expense of the commerce of the United States. What can be plainer that that the Government ought to expend at least the profits that it gets from the ocean mail service in making the ocean mail service efficient. One quarter of those profits would establish all these lines which I have described between the United States and South and Central America and give us, besides a good mail service, enlarged markets for the producers and merchants of the United States who pay the postage from which the profits come.[a]

In his last message to Congress President Roosevelt said:

"To the spread of our trade in peace and the defense of our flag in war a great and prosperous merchant marine is indispensable. We should have ships of our own and seamen of our own to convey our goods to neutral markets, and in case of need, to reenforce our battle line. It can not but be a source of regret and uneasiness to us that the lines of communication with our sister republics of South America should be chiefly under foreign control. It is not a good thing that American merchants and manufacturers should have to send their goods and letters to South America via Europe if they wish security and dispatch. Even on the Pacific, where our ships have held their own better than on the Atlantic, our merchant flag is now threatened through the liberal aid bestowed by other governments on their own steam lines. I ask your earnest consideration of the report with which the Merchant Marine Commission has followed its long and careful inquiry."

The bill now pending in the House is a bill framed upon the report of that Merchant Marine Commission. The question whether it shall become a law depends upon your Representatives in the House. You have the judgment of the Postmaster-General, you have the judgment of the Senate, you have the judgment of the President; if you agree with these judgments and wish the bill which embodies them to become a law, say so to your Representatives. Say it to them individually and directly, for it is your right to advise them and it will be their pleasure to hear from you what legislation the interests of their constituents demand.

The great body of Congressmen are always sincerely desirous to meet the just wishes of their constituents and to do what is for the public interest; but in this great country they are continually assailed by innumerable expressions of private opinion and by innumerable demands for the expenditure of public money; they come to discriminate very clearly between private opinion and public opinion, and between real public opinion and the manufactured appearance of public opinion; they know that when there is a real demand for any kind of legislation it will make itself known to them through a multitude of individual voices. Resolutions of commercial bodies frequently indicate nothing except that the proposer of the resolution has a positive opinion and that no one else has interest enough in the subject to oppose it. Such resolutions by themselves, therefore, have comparatively little effect; they are effective only when the support of individual expressions shows that they really represent a genuine and general opinion.

It is for you and the business men all over the country whom you represent to show to the Representatives in Congress that the producing and commercial interests of the country really desire a practical measure to enlarge the markets and increase the foreign trade of the United States, by enabling American shipping to overcome the disadvantages imposed upon it by foreign governments for the benefits of their trade, and by our Government for the benefit of our home industry.

[a] There would be some modification of these figures if the cost of getting the mails to and from the exchange offices were charged against the account; but this is not separable from the general domestic cost and would not materially change the result.

SUCCESS IN THE NEAR FUTURE.

Mr. GALLINGER. I thank the Senate for listening to me in this closing hour of the session. While I acknowledge defeat to-day, my faith in the good sense and patriotism of the American people leads me to see success in the not distant future. We need American ocean mail lines to South America and other distant markets, and we shall have them. We shall have an American merchant marine and a naval reserve. We shall not go on forever, as we are going now, paying $200,000,000 every year in freight, mail, and passenger money to the shipowners of foreign nations, our rivals in trade and possible enemies in war.

JAMESTOWN TERCENTENNIAL EXPOSITION.

The VICE-PRESIDENT appointed as the members of the committee to attend the opening of the Jamestown Tercentennial Exposition, on the 26th of April next, Mr. DANIEL, Mr. BURROWS, Mr. MARTIN, Mr. FORAKER, Mr. KEAN, Mr. SCOTT, Mr. WARNER, Mr. BRANDEGEE, Mr. BERRY, and Mr. CARMACK.

THE MERCHANT MARINE.

On motion of Mr. GALLINGER, it was

*Ordered*, That 1,000 copies of the Development of the Foreign Mail Service, the American Merchant Marine, and American Commerce be printed for use in the Senate document room.

DEVELOPMENT OF RAMIE FIBER.

On motion of Mr. HEYBURN, it was

*Ordered*, That Senate Report No. 6460, Fifty-ninth Congress, second session, being on the development and encouragement of the ramie-fiber silk, etc., be reprinted as a Senate document, with additional matter, including illustrations.

STATEMENT OF APPROPRIATIONS.

Mr. ALLISON. Mr. President, at this time I ask leave to present tables, carefully prepared by the clerks of the Committees on Appropriations, showing the condition of the appropriation bills at the close of the present session. The tables show all the appropriations made during this session and during the Fifty-ninth Congress and also give comparisons with former Congresses as respects appropriations.

It is worth while, perhaps, for me to say a word or two in connection with the tables.

The total appropriations for the session, available for the fiscal year 1908, are $919,948,679.63. These include, of course, the annual appropriations and also the permanent appropriations which are not made in the annual bills. Of the permanent appropriations, $57,000,000 is to meet sinking-fund obligations for 1908, provided for by statute; also $20,000,000 estimated redemption of national-bank notes in 1908 out of deposits by banks for that purpose. That is a constant fund, replenished from day to day by deposits of the national banks and drawn from as national-bank notes are redeemed. So the $20,000,000 is not a charge upon the revenues of the Government.

There is also included in the $919,948,679.63, $13,439,685.36 of appropriations under deficiency bills, all of which will be expended during the present fiscal year and will not run into the next fiscal year. These items make in all $90,439,685.36 that should be deducted from the $919,948,679.63, making a total appropriation of $829,508,994.27 chargeable to the revenue for the next fiscal year. The estimated revenue from all sources for the next fiscal year is $850,000,000, and if this revenue is realized there will be a surplus of $20,000,000 in round numbers at the end of the fiscal year 1908, and not a deficit.

The increase of appropriations for the year 1908 over the year 1907 amounts to $40,359,494.47. Those increases over the current fiscal year arise chiefly from three or four sources, which I will name. First, the Army appropriations are increased $6,700,000. This may be accounted for by the increase of the Army at the present session by the provision for coast artillery. The fortification bill for the next fiscal year amounts to $1,800,000 in excess of the appropriation for fortifications during the current year. The appropriations for legislative,

executive, and judicial expenses for the next fiscal year have been increased $2,400,000. The increase in the post-office appropriations for next year over the current year amounts to $20,000,000. The pension appropriation bill is increased $5,700,000. The river and harbor appropriation exceeds that of the current year by $37,000,000. That is accounted for by the fact that for the current year we passed no river and harbor bill. It is said, and I have seen it stated, that we appropriate $90,000,000 for rivers and harbors. As a matter of fact, the appropriation bill for rivers and harbors for the next year amounts to $37,183,093. If I am not correct in that statement, the chairman of the Committee on Commerce, the Senator from Maine, will correct me.

Mr. FRYE. Mr. President——

The VICE-PRESIDENT. Does the Senator from Iowa yield to the Senator from Maine?

Mr. ALLISON. Certainly.

Mr. FRYE. It may be as well to state right here that, from a very careful computation made, the expenditure of eighty-six or eighty-seven million dollars carried by the river and harbor bill will not exceed $27,000,000 a year, many of the appropriations running even up to six years.

Mr. ALLISON. In the statement I have included only the appropriations recommended by the Committee on Commerce and embraced in the river and harbor bill, and have excluded the appropriations which are carried for this purpose in the sundry civil bill.

The sundry civil bill carries $12,000,000 more than the sundry civil act of last year, largely accounted for by various items which are not very large individually.

The permanent appropriations this year are increased $9,800,000 in round numbers. These increases are caused, first, by the appropriations for meat inspection of $3,000,000; second, for forest reserves of $1,200,000; and, third, for the Reclamation Service of $4,000,000. The reclamation fund, of course, is a separate and distinct fund and this $4,000,000 will be taken from that fund.

The clerks have made up another table, which I think is worth inserting in the RECORD. It shows the appropriations made by this Congress, now about to expire, as compared with previous Congresses. The appropriations for the Fifty-ninth Congress exceed those for the Fifty-eighth Congress by $198,180,854. It is interesting to note the items that make up this increase—rivers and harbors, $21,200,000; pensions, 5,600,000; post-office appropriations, $50,300,000. I emphasize the latter item to show how rapidly our appropriations for the postal service have increased, amounting to $50,000,000 more for this Congress than for the Fifty-eighth Congress. It may be worth while to note that this increase is not objected to by any Senator, so far as I know, or by the House of Representatives.

The Panama Canal appropriation for the Fifty-ninth Congress also shows an increase of $69,500,000 over the Fifty-eighth Congress. I know of no one who objects to this appropriation; at least the appropriation for the Panama Canal is supposed to be made by the unanimous judgment of both Houses of Congress, with the approval of the American people. It is also worth while to note as I pass, when we hear so much said about a deficit in the Treasury, that by the act of 1902 the policy was entered upon of constructing the canal by means of loans. The cost of construction was not to be paid out of the current revenues of the Government. Therefore, in any statement that is made, the appropriation should not be charged to the current revenues of the Government.

I will not trouble the Senate further in calling attention to the details of these appropriations. I have only done so for the purpose of showing that while apparently they are very large, they all arise from laws which have been passed by the two Houses of Congress and approved by the President as necessary for the purposes of our Government from year to year.

Mr. President, I ask leave to have these tables printed in the RECORD, so that Senators may have an opportunity to examine them more in detail.

The VICE-PRESIDENT. Without objection, permission is granted.

The tables referred to are as follows:

*Chronological history of appropriation bills, second session of the Fifty-ninth Congress; estimates and appropriations for the fiscal year 1907–8, and appropriations for the fiscal year 1906–7.*

[Prepared by the clerks to the Committees on Appropriations of the Senate and House of Representatives.]

| Title. | Estimates, 1908. | Reported to the House. | Passed the House. | Reported to the Senate. | Passed the Senate. | Law, 1907–8. | Law, 1906–7. |
|---|---|---|---|---|---|---|---|
| Agriculture | $7,954,680.00 | $8,125,790.00 | $8,108,010.00 | $8,808,210.00 | $9,457,810.00 | $9,447,290.00 | $9,930,440.00 |

| Deficiency, 1907 and prior years | | 9,847,396.04 | 9,918,698.74 | 10,739,754.36 | 11,262,375.36 | 10,528,535.36 | |
| Total | 761,804,323.68 | 733,457,907.72 | 732,883,384.16 | 785,265,421.03 | 786,200,873.03 | 769,062,359.63 | 712,339,566.15 |
| Miscellaneous | [i] 31,500,000.00 | | | | | 1,000,000.00 | 27,173,299.01 |
| Total, regular annual appropriations | 793,304,323.68 | | | | | 770,062,359.63 | 739,512,865.16 |
| Permanent annual appropriations | [k] 149,886,320.00 | | | | | [k] 149,886,320.00 | 140,076,320.00 |
| Grand total, regular and permanent annual appropriations | 943,190,643.68 | | | | | 919,948,679.63 | [l] 879,589,185.16 |

[a] One-half of the amounts for the District of Columbia payable by the United States, except amounts for the water department (estimated for 1908 at $136,616), which are payable from the revenues of the water department.

[b] Includes all expenses of the postal service payable from postal revenues and out of the Treasury.

[c] This amount is exclusive of $7,439,511.10 to meet contracts authorized by law for river and harbor improvements included in the sundry civil estimates for 1908.

[d] In addition to this amount, the sum of $6,392,730 is appropriated in the sundry civil act to carry out contracts authorized by law for river and harbor improvements for 1908.

[e] No river and harbor act passed for 1907, but the sum of $17,254,050.04 was appropriated in the sundry civil act to carry out contracts authorized by law for river and harbor improvements for 1907.

[f] This amount includes $7,439,511.10 to carry out contracts authorized by law for river and harbor improvements and $25,406,258.73 for construction of the isthmian canal for 1908.

[g] This amount includes $6,392,730 to carry out contracts authorized by law for river and harbor improvements and $27,161,367.50 for construction of the isthmian canal for 1908.

[h] This amount includes $17,254,050.04 to carry out contracts authorized by law for river and harbor improvements and $25,456,415.08 for construction of the isthmian canal for 1907.

[i] This amount is approximated.

[j] This amount includes $16,990,786 for the isthmian canal, which, added to the appropriation of $25,456,415.08 in the sundry civil act for this purpose, makes the total appropriations passed at the first session of the Fifty-ninth Congress for the isthmian canal $42,447,201.08.

[k] This is the amount submitted by the Secretary of the Treasury in the annual estimates for the fiscal year 1908, the exact amount appropriated not being ascertainable until two years after the close of the fiscal year. This amount includes estimated amount of $57,000,000 to meet sinking-fund obligations for 1908 and $20,000,000 estimated redemptions of national-bank notes in 1908 out of deposits by banks for that purpose.

[l] In addition to this amount, contracts are authorized to be entered into, subject to future appropriations by Congress, as follows: By the Army act, $750,000; by the District of Columbia act, $40,000; by the Military Academy act, $1,700,000; by the naval act, $2,750,000; by the sundry civil act, $905,000; by the deficiency act, $270,000; by the urgent deficiency act, $803,700; by the public buildings act, $13,368,500; in all, $20,587,200.

*Comparison of appropriations, Fifty-seventh, Fifty-eighth, and Fifty-ninth Congresses, covering fiscal years 1903, 1904, 1905, 1906, 1907, and 1908.*

| Title of act. | Fifty-seventh Congress. | | Fifty-eighth Congress. | | Fifty-ninth Congress. | |

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had agreed to the amendments of the Senate to the bill (H. R. 22182) to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs.

The message also announced that the Speaker of the House had appointed Mr. CHARLES B. LANDIS, Mr. JAMES B. PERKINS, and Mr. JAMES M. GRIGGS members of the Joint Printing Commission authorized by the legislative appropriation act.

The message further announced that the House had passed a resolution appointing a committee of three members to join a similar committee appointed by the Senate to wait upon the President of the United States and inform him that the two Houses had completed the business of the present session, and were ready to adjourn unless the President has some other communication to make to them.

The message also announced that the Speaker of the House had appointed Mr. PAYNE, Mr. WATSON, and Mr. DE ARMOND members of the joint committee on the part of the House.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolution; and they were thereupon signed by the Vice-President:

S. 1032. An act to aid in the erection of a statue of Commodore John D. Sloat, United States Navy, at Monterey, Cal.;

S. 5133. An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon;

S. 8614. An act to amend an act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896;

H. R. 8727. An act for the relief of James W. Kenney and the Union Brewing Company;

H. R. 22182. An act to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs; and

H. J. Res. 211. Joint resolution authorizing the transfer of the files, books, and pamphlets of the Industrial Commission.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. M. C. LATTA, one of his secretaries, announced that the President had approved and signed the following acts:

On March 2:

S. R. 92. Joint resolution to authorize the Secretary of War to permit José March Duplat to receive instruction at the Military Academy at West Point;

S. 5660. An act for the relief of Capt. William N. Hughes;

S. 6729. An act authorizing the President to appoint Webb C. Maglathlin a second assistant engineer in the Revenue-Cutter Service;

S. 7550. An act for the relief of Harry A. Young;

S. 7840. An act granting an increase of pension to Lewis A. Towne;

S. 8303. An act to establish the Foundation for the Promotion of Industrial Peace;

S. 5869. An act for the relief of Larvan Gordon;

S. 6134. An act providing for the conveyance to the State of North Dakota of certain tracts of lands for the use and benefit of the North Dakota State Historical Society;

S. 8580. An act granting land to Anna Johnson; and

S. 8622. An act granting an increase of pension to William N. Brunson.

On March 4:

S. 7812. An act to amend section 591 of the Revised Statutes of the United States, relative to the assignment of district judges to perform the duties of a disabled district judge;

S. 8427. An act to annul certain titles to land acquired by judicial proceedings in the courts of the United States in Texas, and for other purposes;

S. 8189. An act granting to the St. Louis, Iron Mountain and Southern Railway Company, a corporation, the right to construct, maintain, and operate a single-track railway across the lands of the United States in the southeast quarter of the northeast quarter of section 21, township 14 north, range 6 west of the fifth principal meridian, in the county of Independence and State of Arkansas, reserved for use in connection with the construction of Lock No. 1, Upper White River, Arkansas;

S. 8526. An act permitting the erection of a dam across Coosa River, Alabama, at the place selected for Lock No. 12 on said river;

S. 6249. An act to provide for the establishment of an agricultural bank in the Philippine Islands; and

S. 8498. An act to amend sections 16, 17, and 20 of an act entitled "An act to enable the people of Oklahoma and of the Indian Territory to form a constitution and State government and be admitted into the Union on an equal footing with the original States; and to enable the people of New Mexico and of Arizona to form a constitution and State government and be admitted into the Union on an equal footing with the original States," approved June 16, 1906, and for other purposes.

On March 4:

S. 360. An act to relinquish the interest of the United States in and to certain land in the city of Pensacola, Fla., to the Right Rev. Edwin P. Allen, Catholic bishop of the diocese of Mobile, Ala., and his successors, in trust for the Catholic congregation of Pensacola, Fla.;

S. 1032. An act to aid in the completion of a monument at Monterey, Cal., to commemorate the taking possession of the Pacific coast by Commodore John D. Sloat, United States Navy;

S. 5133. An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon;

S. 6447. An act to authorize the appointment of Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy;

S. 6704. An act to amend an act entitled "An act for the relief of certain homestead settlers in the State of Alabama," approved February 24, 1905;

S. 7247. An act to provide for the establishment of an immigration station at New Orleans, in the State of Louisiana, and the erection in said city, on a site to be selected for said station, of a public building;

S. 8012. An act to erect a monument on the Tippecanoe battle ground in Tippecanoe County, Ind.;

S. 8119. An act to readjust the boundaries of the naval reservations in Porto Rico established in pursuance of the act of July 1, 1902;

S. 8230. An act for the relief of Harold D. Childs;

S. 8292. An act providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor;

S. 8299. An act to confer certain civic rights on the Metlakahtla Indians of Alaska;

S. 8327. An act to provide for the establishment of an immigration station at Galveston, in the State of Texas, and the erection in said city, on a site to be selected for said station, of a public building;

S. 8568. An act granting an increase of pension to Rosanna A. May;

S. 8585. An act for the relief of Charles W. Spalding;

S. 8614. An act to amend the act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896;

S. R. 29. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army memorial in Washington, D. C.; and

S. R. 98. Joint resolution granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany.

ESTATE OF SAMUEL LEE, DECEASED.

Mr. McCUMBER. I ask unanimous consent for the present consideration of the bill (H. R. 850) making appropriation to pay to the legal representatives of the estate of Samuel Lee, deceased, to wit, Samuel Lee, Anna Lee Andrews, Clarence Lee, Robert Lee, Harry A. Lee, and Phillip Lee, heirs at law, in full for any claim for pay and allowances made by reason of the election of said Lee to the Forty-seventh Congress and his services therein.

Mr. LATIMER. I ask that the bill be read.

The VICE-PRESIDENT. The Senator from North Dakota asks unanimous consent for the present consideration of a bill, which will be read for the information of the Senate.

The Secretary read the bill.

The VICE-PRESIDENT. Is there objection to the present consideration of the bill?

Mr. LATIMER. I object.

The VICE-PRESIDENT. Objection is made.

Mr. McCUMBER. I move that the Senate proceed to the consideration of the bill; and I wish to say one word in reference to it.

Twenty-five years ago, in a closely contested election, Samuel Lee was elected from one of the South Carolina districts—at least the House of Representatives so decided after a long contest. After it was determined that he was entitled to his seat a little filibuster was kept up for the remainder of the session, so that it was impossible to swear him in. Twenty-five years have elapsed since that time. Mr. Lee died a poor man in the struggle to get the salary that was due him during that time. The Senator from South Carolina [Mr. TILLMAN] has heretofore objected to the consideration of the bill.

After this number of years, when we have done so much during the present session in the changing of words which are to describe a great war and in many other ways to eliminate entirely from our memory all of the old bitterness which gathered around us during those days of struggle between the two sections of the country, I think it would be an act of justice to pass this bill.

This election occurred while that strife was still very warm indeed, but all feeling has now passed away. The House of Representatives declared that Mr. Lee was entitled to his seat. The House of Representatives twenty-five years thereafter has declared by its vote that the little sum of $10,000 for his salary during the two years, to which he would have been entitled had he been seated, according to the decision of the House, shall at last be paid.

I appeal to the Senator from South Carolina to allow us to crown the last hours of this session by this act of justice long delayed to the heirs of Samuel Lee. It is but a small amount. It is justly due according to all precedents of both Houses, and there can be no just reason for longer delaying it. The Representative himself has been dead for many years. He kept up the struggle, being supported by others, until he died, practically a pauper. His children have kept up the struggle to get what they consider justly and honestly their due. We have granted pensions very freely to the old soldier during this session. We have been liberal in a thousand different ways. Now let us combine our liberality with our sense of justice, and at last, after a quarter of a century, pay to the heirs of Mr. Lee the sum that rightfully belonged under every precedent to their ancestor.

Mr. LATIMER. Is the Senator from North Dakota through?

The VICE-PRESIDENT. Does the Senator from North Dakota yield to the Senator from South Carolina?

Mr. McCUMBER. I yield to the Senator from South Carolina.

Mr. LATIMER. I wish to take the floor in my own right.

Mr. McCUMBER. Let me ask the Senator if he still intends to object to the consideration of the bill?

Mr. LATIMER. I do.

Mr. McCUMBER. I yield to the Senator then, and I should like to reply to him.

Mr. LATIMER. Mr. President, the Senator from North Dakota, in his plea for justice to this contestant, and in the remarks that he has made with regard to the feeling which should exist in the South on account of the treatment of the South by the present Congress, appeals to me with force. But this is a case where, in my opinion, the contestant had no right to the seat. The certificate of election was given to Mr. Richardson, of South Carolina, and he came here and served out the two years as a Member of the House. These contested-election cases in the South have continued since the war until within

the last two or three years largely for the purpose of getting the fee that is given in contested-election cases.

I should like to read to the Senate the speech of the elected Member, Mr. Richardson, delivered on the occasion when the contest was up. Mr. Richardson, of South Carolina, said:

Mr. Speaker, the time for which I was elected to this Congress is about expiring. It is true it would matter but little to me personally whether I continue to hold this seat for a few hours longer or whether you take it from me. It is true it would matter but little to the constituency I represent if you deprive them of their Representative upon this floor for the few remaining hours of this Congress.

Perhaps it might be thought that I could well afford to remain quiet and let this case be decided as you may see proper to decide it. But behind all these considerations there is this question: Is it right to do so? And then there is another question: Is it right to take from this Government $10,000 or $12,000 and pay it to one who is not at all entitled to it?

I therefore come before you almost an utterly impartial advocate in this case. I have no interest except to see that the right is done and that my constituency are not placed in any false light.

Now, Mr. Speaker and gentlemen of the House, this election was had; the election officers ascertained who was elected, and they gave to the contestee the certificate. The contestant filed his complaint, claiming that a number of things had been done which ought not to have been done, by which he had been deprived of a number of votes. What did the contestee do? When the contestant claimed that certain votes and polls which had not been counted should be counted, the contestee's answer was "Count the whole poll in the district; count the last voter who voted, and let the result decide this election." Then the contestant comes up and presents his case. He goes through every box after every poll in the Congressional district had been restored to the count, restored by the consent of the contestee. He goes into the count, and says "These boxes have not been purged as they ought to be," though they were purged according to the law of South Carolina. In purging them, when the contestant comes to add up the result, lo and behold! by his own purging, by his own count, the contestee still has a majority. He who in the outset came to the Elections Committee and said, "Oh, it is wrong to throw out the vote of any freeman, or to throw out any poll," turns from his position and claims that now, in order to give him the seat, you must throw out the vote of Darlington precinct; you must not count it.

I will stop but a moment to call the attention of the House to the methods resorted to by the contestant and by the honorable gentleman who presented the report in his behalf to reach the result that they did. Take, for example, the poll at Timminsville; and this is but one of many. There the vote was some 800 or 900. The election officers in returning the vote returned that there was in that box an excess of only 11 votes. Both the United States supervisors of election signed a report saying that there were only 11 votes in excess in all that box. When that box was purged under the law of South Carolina, which requires that some one blindfolded shall draw from the box the number of votes in excess, only 4 Republican votes were drawn and 7 Democratic votes. The Republican and Democratic United States supervisors certified to this. But there was standing by that box a friend of the contestant, a bystander, who swore on his examination that he was certain there went into that box for the contestant 199 votes, when the count gave him only 75 votes.

I only bring up that case for the purpose of showing that from the count of that box the contestant and the honorable gentleman who makes the minority report deduct 124 votes of the contestee and give that number to the contestant, making a difference of 248 votes. That is the way the result is reached in this case—reducing the vote of the contestee enough to give the seat to the contestant if you throw out the vote of Darlington precinct. I will not waste time in showing the other methods resorted to in order to bring down the vote of the contestant to a point from which, if you deduct the vote of Darlington Court House, the seat will be given to the contestant. I address myself at once to the single question involved in this case. After purging the poll, as has been done, after resorting to such means as I have mentioned to bring down the vote of the contestee, the question then turns, as I am willing to concede, upon the vote at Darlington Court House. What was the vote there? As has been said, it gave the contestee some 1,100 majority. The contestant asked to have it thrown out, not on account of fraud, for no fraud was charged against it.

One word as to the charge in regard to tissue ballots. They were used only in Georgetown County, and the authorities of South Carolina threw out every box in that county but one because there were tissue ballots.

Now, as to the Darlington poll, what is the proof? The proof is that there was not a single gun fired or exhibited. There was no violence threatened. The colored people who met there in the morning, having been accustomed at election after election to have possession of the polls, were incensed because on this occasion the election was held where the law of South Carolina required in so many words that it should be held—in the court-house, instead of at the market-place, where it had been held before. Under these circumstances the order was given to the negroes by their leader that they should go away, and they did go away; they did not vote, or at least only 117 of them voted. There is no proof that they did not vote elsewhere, or at least that most of them did not vote elsewhere. The contestant presents the names of 240 persons who he claimed did not vote there.

Mr. CLAPP. Mr. President——

The VICE-PRESIDENT. Does the Senator from South Carolina yield to the Senator from Minnesota?

Mr. LATIMER. With pleasure.

Mr. CLAPP. Will the Senator yield that I may make a request for the publication of a document?

Mr. LATIMER. I will.

Mr. LODGE. I desire to ask what question is now before the Senate.

The VICE-PRESIDENT. The question is on the motion of the Senator from North Dakota [Mr. McCUMBER] to take up House bill 850.

Mr. LODGE. I make the point of order that a motion to take up a bill is not debatable.

The VICE-PRESIDENT. It is not, except by unanimous consent. Is there objection?

Mr. McLAURIN. I wish to say to the Senator from Massachusetts that the Senator from North Dakota, who made the motion, debated it, and I think it would be but fair to have permission given to the objector.

The VICE-PRESIDENT. The debate is proceeding by unanimous consent.

Mr. McCUMBER. Mr. President——

The VICE-PRESIDENT. Does the Senator from South Carolina yield to the Senator from North Dakota?

Mr. LATIMER. Yes, sir.

Mr. McCUMBER. I simply would like to ask the Senator in all candor whether it is his intention to proceed to talk on the bill, if necessary, until 12 o'clock?

Mr. LATIMER. I think, Mr. President, that this is a measure of sufficient importance to ask that it be postponed until after 12 o'clock.

Mr. McCUMBER. If that is the intention of the Senator, I certainly will not impose the burden upon him of having to do it.

Mr. LATIMER. That is very kind of the Senator.

Mr. McCUMBER. That being the case, I will withdraw the motion.

The VICE-PRESIDENT. The Senator from North Dakota withdraws the motion to proceed to the consideration of the bill.

### ELECTION OF SENATORS.

Mr. CLAPP. I present a paper which is an abstract of the laws relating to the election of United States Senators, and I move that it be printed as a document.

The motion was agreed to.

### AFFAIRS IN INDIAN TERRITORY.

On motion of Mr. CLARK of Wyoming, it was

*Ordered*, That 300 additional copies of Senate Report No. 5013, parts 1 and 2, Fifty-ninth Congress, second session, being the report of the select committee to investigate matters connected with affairs in the Indian Territory, be printed for the use of the select committee.

### NOTIFICATION TO THE PRESIDENT.

Mr. HALE submitted the following resolution; which was considered by unanimous consent, and agreed to:

*Resolved*, That a committee of two Senators be appointed by the Vice-President to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn, unless the President has some other communication to make to them.

The VICE-PRESIDENT appointed Mr. HALE and Mr. PETTUS members of the committee on the part of the Senate.

### PROTECTION OF GAME IN ALASKA.

Mr. BEVERIDGE. I ask unanimous consent for the present consideration of the bill (H. R. 25032) to amend an act entitled "An act for the protection of game in Alaska, and for other purposes," approved June 7, 1902.

Mr. CULBERSON. Let it be read.

The VICE-PRESIDENT. The bill will be read.

Mr. BEVERIDGE. I think the bill has been read once.

The VICE-PRESIDENT. The Senator from Texas requests the reading of the bill.

Mr. BEVERIDGE. Very well.

Mr. CULBERSON. I will ask the Senator from Indiana from what committee the bill comes?

Mr. BEVERIDGE. From the Committee on Territories.

The VICE-PRESIDENT. The bill has been reported from the Committee on Territories.

Mr. CULBERSON. Is it a unanimous report?

Mr. BEVERIDGE. It is a unanimous report, and the bill has been on the Calendar for some days. It is a House bill, I will say to the Senator, and that Senators living in the direction of Alaska whose States are directly interested, as well as the Delegate from Alaska and all the people who have said anything to our committee from that district, urge the very great and immediate necessity of this law for the protection of game there.

Mr. CARMACK. It has passed the House?

Mr. BEVERIDGE. Oh, yes; it has passed the House.

Mr. CULBERSON. Let it be read, Mr. President.

The VICE-PRESIDENT. The Secretary will read the bill.

The Secretary proceeded to read the bill.

Mr. CARTER. Mr. President, I suggest to the Senator from Indiana that it will be quite impossible to have this bill enrolled and presented to the presiding officers of the respective Houses and to the President before the hour of adjournment.

Mr. BEVERIDGE. That is very clear.

Mr. CARTER. While I do not wish to object to the bill, I suggest that it is quite useless to continue the reading. It is

obvious that the bill can not become a law at the present session.

Mr. BEVERIDGE. That is quite true; and when I asked for the immediate consideration of the bill the fact that it had already been read once I thought would obviate the necessity of reading it again. Under those circumstances, of course, the bill could have been passed. Since the Senator from Texas has asked for the reading of the bill, it is clear to everyone that it is quite useless to proceed further.

Mr. NEWLANDS. I should like to inquire whether if the reading were discontinued and the bill should be now passed there would be time to have it enrolled and presented to the President?

Mr. BEVERIDGE. No; that is the very point.

Mr. NEWLANDS. I know the sentiment of the committee was unanimous in favor of the bill, and it was carefully examined with a view to prevent the evil possib. of dilettante sportsmanship in Alaska.

Mr. BEVERIDGE. We now have ten minutes until the time when the present session expires. It is manifestly impossible to enroll the bill and send it to the presiding officers and the President in ten minutes. We might have passed the bill if the additional reading had not been demanded.

Mr. CLAPP. If the Senator will yield, I will state that it would be impossible to pass the bill, for there must be two amendments made to it. It makes no provision for the protection of woodchucks nor for protecting men against the penalty of the law where they kill ducks and prairie chickens in self-defense. [Laughter.]

Mr. BEVERIDGE. I will say to the Senator and to the Senate that that omission was made by the Committee on Territories, but it was an oversight, and it would not have occurred had we had the assistance of the junior Senator from Minnesota.

I withdraw the bill.

The VICE-PRESIDENT. The bill is withdrawn.

BUSINESS OF THE COMMITTEE ON THE DISTRICT OF COLUMBIA.

Mr. GALLINGER. Mr. President, I desire to put in the RECORD a statement of the number of bills referred to the Committee on the District of Columbia during the Fifty-ninth Congress and the action taken on those bills. It is important for the reason that the committee is legislating for this great District, and while the committee has been somewhat criticised I think if the citizens of the District will take the trouble to read this statement they will find that they have been faithfully served. As an illustration, there were 245 Senate bills referred to the committee, 3 Senate resolutions, and 84 House bills, making a total of 332 all told. I ask that the statement may be printed in the RECORD.

The VICE-PRESIDENT. Without objection, it is so ordered.

The statement referred to is as follows:

Statement showing the number of bills referred to the Committee on the District of Columbia during the Fifty-ninth Congress, and the action taken thereon:

| | |
|---|---|
| Senate bills referred | 245 |
| Senate resolutions referred | 3 |
| House bills referred | 84 |
| Total | 332 |
| Senate bills favorably reported | 81 |
| House bills favorably reported | 66 |
| Senate bills adversely reported | 53 |
| Senate bills which have passed the Senate and are pending in the House | 21 |
| Senate and House bills approved by the President | 99 |
| Bills awaiting approval | 7 |

In addition, there have been received and considered by the committee thirty amendments to appropriation bills.

Following are some of the important laws which have been placed on the statute books:

Condemnation of insanitary buildings.

General law governing proceedings relating to condemnation of land for streets.

Providing for compulsory education.

Regulating employment agents and agencies.

Classifying officers and members of the fire department.

Classifying officers and members of the police department.

Reorganizing the public school system.

Creating a juvenile court.

Regulating the abatement of nuisances.

Regulating the practice of veterinary medicine.

Regulating practice of pharmacy and sale of poisons.

Regulating building lines.

NOTIFICATION TO THE PRESIDENT.

Mr. HALE and Mr. PETTUS, the committee appointed to wait on the President, appeared; and

Mr. HALE said: Mr. President, the committee of the Senate, with a like committee of the House, have waited upon the President, have informed him that the business of Congress is at an end, and have asked him if he has any further communications to make, to which he replied that he has no communication to make.

THANKS TO THE VICE-PRESIDENT.

Mr. BLACKBURN. Mr. President, coming to the discharge of my last official act as a Senator, speaking for the minority side of this Chamber, it affords me peculiar pleasure to submit and send to the desk a resolution which expresses fully the experience I have had, and which I am quite sure expresses the sentiment of every Senator, bearing testimony to the courtesy, the fairness, and the ability with which our presiding officer has discharged the functions of his office. In asking for the unanimous approval of the resolution by the Senate, I am sure that I am not taxing the generosity of any Senator.

The PRESIDING OFFICER (Mr. ALLISON in the chair). The Secretary will read the resolution submitted by the Senator from Kentucky.

The resolution was read and unanimously agreed to, as follows:

*Resolved*, That the thanks of the Senate are hereby tendered to Hon. CHARLES W. FAIRBANKS, Vice-President of the United States and President of the Senate, for the dignified, impartial, and courteous manner in which he has presided over its deliberations during the present session.

FINAL ADJOURNMENT.

The Vice-President having resumed the chair, and the hour of 12 o'clock meridian having arrived,

The VICE-PRESIDENT said:

SENATORS: The Chair is sensible of the fact that the resolution you have adopted is a courtesy to the Chair, sanctioned by immemorial usage rather than to the occupant of that exalted station.

If the Chair has been able to convince the Senate of his impartiality in the discharge of the duties which devolve upon him, and which are often delicate and difficult, he is gratified in full measure. He fully appreciates that whatever success may have attended him in the performance of his duties during the session which is now closing has been largely due to the patience and generous cooperation of the members of the Senate, all of which he gratefully acknowledges.

The Chair desires to place upon the permanent records of the Senate his testimony in behalf of those Senators whose service in the Senate is about to terminate for their unwavering devotion to the public interest while here, and to wish them many years of further usefulness to their countrymen.

The Chair wishes for those who remain in the Senate and now enter upon their vacation after their arduous public duty health and a safe return. They have well earned the approving judgment of their large constituencies by their intelligent and complete consecration to the public service.

The Senate of the United States has well vindicated its claim to the popular approval by its wise, careful, and patriotic consideration of many questions of large concern to the Government and the people. Each passing session justifies the wisdom of the fathers, who established the Senate as one of the essential safeguards to American institutions and one of the assurances of the political welfare of the people.

Permit the Chair to thank you, Senators, each and all, for your uniform kindness and to bid you godspeed.

The hour of 12 o'clock, which by law terminates the second session of the Fifty-ninth Congress, having arrived, the Chair declares the Senate adjourned without day. [Applause on the floor and in the galleries.]

## NOMINATIONS.

*Executive nominations received by the Senate March 2, 1907.*

POSTMASTERS.

HAWAII.

George F. Renton to be postmaster at Ewa, in the county of Oahu and Territory of Hawaii. Office became Presidential January 1, 1907.

MARYLAND.

Mary J. Perkins to be postmaster at Hancock, in the county of Washington and State of Maryland, in place of Mary J. Perkins. Incumbent's commission expired January 22, 1907.

OHIO.

Mary M. Carey to be postmaster at Lexington, in the county of Richland and State of Ohio. Office became Presidential January 1, 1907.

PENNSYLVANIA.

Thomas E. Pyatt to be postmaster at Youngwood, in the county of Westmoreland and State of Pennsylvania. Office became Presidential January 1, 1907.

WEST VIRGINIA.

James B. Campbell to be postmaster at New Cumberland, in the county of Hancock and State of West Virginia, in place of James B. Campbell. Incumbent's commission expired February 26, 1907.

## HOUSE OF REPRESENTATIVES.

### MONDAY, *March 4, 1907.*

[*Continuation of legislative day of Saturday, March 2, 1907.*]

The recess having expired, the House was called to order by the Speaker at 9.30 a. m.

PEONAGE IN FLORIDA.

Mr. JENKINS. Mr. Speaker, I ask that the Committee on the Judiciary be discharged from the further consideration of House resolution 886.

Mr. RANDELL of Texas. Mr. Speaker, a parliamentary inquiry. Is it not time to dispose of the appeal pending at the time the recess was taken?

The SPEAKER. The Chair will suggest to the gentleman that on yesterday the gentleman from Wisconsin [Mr. JENKINS] was on the floor and was taken off his feet by a conference report. As the Chair recollects, there was an understanding that the gentleman should have the floor temporarily, and the gentleman from New York [Mr. FITZGERALD] should have fifteen minutes. The gentleman from New York concluded to print. The gentleman from Florida was also to have ten minutes. The Chair would be glad to see that understanding carried out; and the gentleman from Wisconsin desires to yield to the gentleman from Florida ten minutes. There is not yet a quorum. In these closing hours the Chair suggests that the gentleman temporarily wait. This matter may develop a quorum, and the gentleman will be recognized a little later, if that is agreeable.

Mr. RANDELL of Texas. Very well, sir.

Mr. JENKINS. Mr. Speaker, I have asked that the Committee on the Judiciary be discharged from the further consideration of resolution 886, and I ask, Mr. Speaker, that a letter from the Attorney-General with reference to this resolution be read in my time.

Mr. MANN. May we have the resolution reported?

The resolution was reported, as follows:

House resolution No. 886.

*Resolved*, That the Attorney-General of the United States be, and he is hereby, directed to furnish the House of Representatives, at the earliest practicable day, with the following information, namely:

First. How much money has been expended during the present Administration by the Department of Justice in and about the ferreting out and prosecution of alleged peonage cases in the State of Florida?

Second. What connection with the Department of Justice has one Mrs. Quackenboss, who has been prominently connected with the prosecution of these alleged peonage cases in the State of Florida; what official position under the Government does she hold, if any; what salary does she receive, if any; what are her duties; and what instructions, if any, were given her by the Department of Justice?

Third. Why were special attorneys employed to aid in the prosecution of these alleged peonage cases in the State of Florida; why was it necessary to send an Assistant Attorney-General to the State of Florida to assist in the prosecution of these alleged peonage cases; are not the regularly appointed and duly qualified United States attorneys for the two judicial districts of Florida and their assistants amply able to care for the interests of the Government in that State?

Mr. PAYNE. Mr. Speaker, how does this matter come up?

The SPEAKER. The gentleman from Wisconsin calls it up.

Mr. PAYNE. Is that a question of privilege?

The SPEAKER. It was called up yesterday. The Chair calls the attention of the gentleman from New York, as he has called the attention of the gentleman from Texas, to the fact that upon yesterday, as the Chair recollects, there was an understanding that the gentleman from Wisconsin would yield fifteen minutes to the gentleman from New York [Mr. FITZGERALD]. The gentleman from New York occupied a portion of his time, and stated to the Chair that he does not care to occupy further time. And also the understanding, stated in the House, as the Chair recollects, was that the gentleman from Florida [Mr. CLARK] should have ten minutes; and the Chair is trying to carry out that understanding.

Mr. PAYNE. Of course if that understanding was had yesterday it was had when I was not present.

Mr. MANN. Unanimous consent was given.

Mr. PAYNE. That being the case, a point of order would not lie against it; otherwise it would.

The letter was read, as follows:

DEPARTMENT OF JUSTICE,
OFFICE OF THE ATTORNEY-GENERAL,
*Washington, D. C., February 27, 1907.*

MY DEAR MR. JENKINS: Your letter of the 26th instant, inclosing a copy of the resolution submitted by Mr. CLARK of Florida, in relation to the recent and pending prosecutions for peonage in that State, has been duly received. Without of course wishing in any wise to anticipate the action which your committee may take on this resolution, I am very happy to furnish you the following information as to its subject-matter:

It would be impossible to give even an approximately correct answer to the first question without devoting more time to the subject than its importance warrants. The expenses connected with prosecutions for peonage in the State of Florida could not be segregated from the general expenses incurred in the prosecution of all forms of offenses in that State, the same officers being in large part employed in all prosecutions for crime. Moreover, those officers particularly charged with the investigation of offenses against the laws forbidding peonage have been employed in other States besides Florida; and it would be difficult, if not impracticable, to determine in what proportion their compensation should be charged to work of this character in that particular State. Nevertheless, I think it is right to say that the Department has incurred some appreciable expense in connection with prosecutions for peonage in the State mentioned, and that it contemplates further expenditure of public money for the same purpose. The crime in question amounts substantially to selling into or retaining in involuntary servitude persons who fail to pay alleged debts, which pretended debts are often fictitious, extortionate, or fraudulent. Such action not only involves a flagrant violation of the statute law and of constitutional rights, but is repugnant to the enlightened opinion of modern times in all civilized countries. Moreover, the testimony taken in recent cases, and other credible information furnished the Department, show that the treatment of these captives is often brutal and revolting to every instinct of humanity. In view of these facts, the Department has felt confident that it would receive a cordial support from the Congress and from public opinion in doing all that might lie in its power to prevent crimes of this nature and to bring those guilty of them to adequate punishment.

The lady mentioned in the second question embodied in Mr. CLARK'S resolution is Mrs. Mary Grace Quackenbos, who is employed as a special assistant to the United States attorney for the southern district of New York. She is a member of the bar of that State and, according to the information of the Department, a person of independent means. From philanthropic motives she has established an office intended to furnish legal advice to persons too poor to pay adequately for the same in the city of New York, which has grown to large proportions. She thus gained information as to the operations of certain employment agencies in the city of New York which were used to secure helpless and ignorant immigrants as peons in certain Southern States. Criminal proceedings having been begun against one or more of these offenders, Mrs. Quackenbos was employed as special assistant to the United States attorney in that city to aid in their prosecution, the understanding of the Department being that her compensation amounts only to what she is obliged to pay a competent person for taking her place in the office she has established as above described, her own services being rendered gratuitously. In connection with her duties as such assistant she visited Florida, primarily to secure evidence for use in the New York prosecutions, but while there, in accordance with the practice of the Department requiring its subordinates to assist when occasion offers in any of its work, she rendered such services as she could appropriately to Assistant Attorney-General Russell, then engaged in the prosecution of certain cases at Jacksonville. She has since returned to New York.

In answer to the third question, I think it must be left to the discretion of the Department under what circumstances special counsel shall be employed to assist in the prosecution of crimes and what duties, consistent with law, shall be required of the several Assistant Attorneys-General. As a matter of fact, Assistant Attorney-General Russell was designated by the late Attorney-General to exercise a general supervision over prosecutions for peonage, and in the discharge of the duties thus imposed upon him he visited several other States besides Florida. It so happened that during part of his stay in Florida the United States attorney for the southern district of that State, Mr. John M. Cheney, was seriously ill, and Assistant Attorney-General Russell for this reason took part personally in the trials of certain alleged offenders against the peonage laws. It also so happens that the assistant United States attorney for the same district, Mr. Richard P. Marks, is disqualified to take charge of certain prosecutions instituted against officials of a railroad company in Florida, because he has been for some years counsel for the said railroad company, and this fact made it necessary for Mr. Russell to devote personal attention to these particular cases. The Department considers the United States attorneys and their assistants in the two judicial districts of Florida fully qualified to discharge the duties of their respective offices, and the part taken by other counsel in the prosecutions above mentioned involves no more reflection upon these officers than does the similar service of special counsel in New York, Chicago, St. Louis, and numerous other localities with respect to the permanent representatives of the Government in those places.

Pray believe me, as ever,
Yours, very respectfully and truly,
CHARLES J. BONAPARTE,
*Attorney-General.*

Hon. JOHN J. JENKINS,
*Chairman Committee on the Judiciary,*
*House of Representatives.*

Mr. JENKINS. I yield ten minutes to the gentleman from Florida.

Mr. CLARK of Florida. Mr. Speaker, as I will only have ten minutes, I desire to ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. CLARK of Florida. Mr. Speaker, to deal with a "muckraker" is always unpleasant. It is at no time agreeable to engage

in disputation with that product of our present-day civilization known as "yellow journalism," which for a few pennies and an opportunity to keep in the lime light does not hesitate to calumniate an entire community. It is disagreeable because of the fact that the creature in question is generally so lacking in character and so bereft of the essential attributes of real manhood that he will resort to any and every form of falsehood to bolster up his original libel. In submitting to this House and to the American people a few remarks that I shall make upon the subject of "Peonage in Florida," as treated in a recent article in the Cosmopolitan Magazine for March, 1907, and partly copied in the New York Evening Journal of February 25, 1907, I know that I shall bring down on my humble self the relentless fury of the owner of those publications, who happens to be a Member of this body, but who, I do not believe, has occupied his seat for ten full days during the entire life of the Fifty-ninth Congress. But be that as it may, Mr. Speaker, I would be unworthy of the high and honorable position I hold if I should silently sit here and permit a Member of this body, either from his place on this floor or through the columns of his publications, to slander and malign my people. I represent in this great deliberative assembly a constituency which is just as honest, just as intelligent, just as patriotic, just as moral, just as law-abiding, just as liberty loving, and just as God-fearing as any people beneath the shining canopy of heaven. There is hardly a State in all the Union that has not furnished citizens for the great district which I have the honor to represent here; and if you desire to find the robust American citizen in his fullest development, just join me in a journey over the Second Congressional district of Florida. Injustice and wrong can not flourish among such a people; and while I feel that no defense against the attacks of this man through his paid hirelings is really necessary, yet I desire to call attention to some of the falsehoods contained in the article referred to. The article seems to have been written by one Richard Barry. I do not know this man Barry, and I must confess that I never heard of him before. This may be my misfortune; but, without having seen the man, I am constrained to say that he has either been easily duped by some designing person or else he is a right considerable liar himself.

I shall confine my remarks to my own district, only mentioning the fact that the conviction of officers of the Jackson Lumber Company, of Pensacola, in the district of my colleague [Mr. LAMAR], was had in the court presided over by Charles Swayne, whose record as a judge is known of all men.

Here is what this man Barry says:

> It was all proved incontestably in the courts that the men were enticed to their work by glowing and fraudulent representations; that once on the job they were held to it by threats; that when a few of spirit rebelled and tried to run away they were intimidated with firearms; that when some finally did get away they were tracked with hounds and brought back at the point of a pistol; that when the law intervened in the person of the local justice and tried to set them free they were shown to be in debt to their employers and the strenuous incident of their keep justified on the score of an ancient statute which gave a debtor's body to the creditor until the debt was satisfied.

There is no such statute in Florida as permits a creditor to hold the debtor's body until the debt is satisfied. This was a deliberate and unqualified falsehood on the part of the writer, and the fact that he did not take the time to examine the statute law of the State is evidence of the recklessness with which he libels a whole people.

Again I ask you to listen to the words of this adept in the art of libel:

> A dozen tramp immigrants ran away from the O'Hara camp, at Buffalo Bluff, and startled the inhabitants of Palatka with their story of frightful wrongs.

The O'Hara camp he refers to is in my district, and the head of the firm operating it is Mr. F. J. O'Hara, a citizen of character and standing in the State of Florida. Mr. O'Hara and his business associates were indicted for peonage at Jacksonville by the grand jury of the United States court for the southern district of Florida. They were put upon trial last December, and after weeks spent in taking testimony the case was submitted to the jury and a verdict of "not guilty" promptly returned. They were immediately put on trial in the same court on a second indictment, and after several more weeks spent in taking testimony the second jury promptly returned a verdict of "not guilty." This man Barry knew, or should have known, when he penned his infamous libel against our people, that O'Hara and his associates had been vindicated by two different juries in the Federal court at Jacksonville; yet in the face of this he holds up O'Hara and his associates to the whole world as demons in human form. We are blessed in the southern district of Florida with a pure and just judge.

I have known Judge James W. Locke for many years, and no man ever wore the ermine who was more honest, fair, and just than he. We also have an able, fearless, honest district attorney, and with the machinery of the law in such hands the innocent will not suffer. I say the innocent will not suffer, Mr. Speaker, but when I say that I mean that these upright officials will not permit an innocent man to suffer by reason of an unjust conviction; but they will suffer, as O'Hara and his associates have suffered, in loss of time and money in making defense against these false and outrageous accusations, as well as suffering the humiliation of criminal prosecutions. Mr. O'Hara is not a wealthy man, and my information is that in protecting his honor and his liberty in the two cases upon which he has already been tried and acquitted he has had to expend about $15,000 of his earnings. If his persecution is to be continued and he is to be tried on the remaining indictments which stand against him, the probability is that, while he will walk forth from the Federal court a free man, he will be bankrupted by these infamous proceedings. There is some strange but powerful influence behind these cases. What is it? Why should the machinery of the law in this great Government of ours be used to hound down and bankrupt honorable, law-abiding citizens? Two different juries, composed of twenty-four good and lawful men, under the sanction of their solemn oaths as jurors, after listening to all the testimony, the argument of counsel, and the charge of the court, have declared to all the world that O'Hara and his associates were not guilty as charged; yet we are told it is the purpose of Assistant Attorney-General Russell and his assistant, one Mrs. Quackenboss, to again put these people on trial on other indictments making substantially the same charges as these of which they have been acquitted. This Assistant Attorney-General and his female assistant certainly know that these people are not guilty as charged; they know that no honest jury will convict them; they know that it is their sworn duty to protect the innocent; they know that the prosecution of the citizen should not be allowed to sink into a persecution; they ought to know that when a prosecution for alleged crime is persisted in when its only effect is to bankrupt innocent people the Government is dishonored and the pure stream of justice polluted. How many times can a citizen be put in jeopardy upon the same charge? I have always been taught that only once could a citizen, under our benign form of Government, be put in jeopardy on a particular charge; yet we find these extremely zealous officials—one of them a female lawyer from New York and, I understand, from the east side—forcing defendants to trial on indictment after indictment, charging practically the same offense and using substantially the same set of witnesses to establish identically the same set of facts.

I suppose, Mr. Speaker, that this female lawyer from the east side, who seems to be the controlling force in these prosecutions, gets around this question of former jeopardy upon her theory that our people are a barbarous tribe to whom the ordinary principles of law do not apply. She has come from the slums of the east side of New York to prosecute correct ideas into the heads of our benighted people. But who is behind her? Why should the Department of Justice at Washington seemingly ignore our very capable district attorney and turn over to this woman the entire machinery of the law in the southern judicial district of Florida? The honorable Attorney-General of the United States, in his lengthy letter just read to the House by the Clerk, does not tell us, and he evades the question of the cost to the Government of these prosecutions for peonage which I sought in my resolution. He also seeks to convey the impression that this Mrs. Quackenboss is a very philanthropic person, and that she is so moved by pity for persons held in slavery in Florida that she is devoting her time and means as a gratuity for their liberation. But the honorable Attorney-General will not say what salary she is receiving, although he does admit, in the face of his statement as to her great work of charity, that she does get a salary from the Government. How much does she get? The Attorney-General says:

> The understanding of the Department being that her compensation amounts only to what she is obliged to pay a competent person for taking her place in the office she has established as above described, her own services being rendered gratuitously.

Now, Mr. Speaker, it seems to me it would have been an easy thing for the Attorney-General to have told us how much money he was allowing this woman lawyer. Why evade it? Nobody who ever saw this female lawyer believes for one moment that she is working for nothing. No one believes she is working for actual expenses only. Why keep the amount she receives from the Government a secret? Is anyone else paying for her services? Is she employed and paid by some one other than the Government? If so, who is it?

And again I ask, Mr. Speaker, why are our people being so relentlessly pursued in the courts on these unfounded charges?

What is the purpose? Is some one using the courts and the press for the purpose of keeping immigrants from the State of Florida? We have within the State of Florida millions of acres of rich unoccupied lands that can be had by actual bona fide settlers at an extremely low figure per acre. The honest, industrious farmer within a very few years can reach a state of independence by tilling a few acres of our fertile lands; we need the honest, industrious immigrant to help us develop our wonderful State, and our people are now taking steps to acquaint the world with the splendid possibilities of Florida. Can it be that these prosecutions and these libelous stories have a common origin, and that the object is to impress the prospective citizen with the idea that life, liberty, and property are not safe in Florida? Why, Mr. Speaker, there is no State in all this glorious Union that has within her borders a more law-abiding and justice-loving citizenship than you will find beneath the clear blue skies of Florida.

Churches of every denomination stand in every portion of our fair State, their tall spires pointing toward heaven in silent protest against the charge that we are a lawless people; on every hand can be seen a building erected with money appropriated from the taxes cheerfully paid by our people and dedicated to the education of our youth in order to fit them for the duties of citizenship in a Christian State. That in spite of all the precautions taken there are occasional violations of the law no man will deny, but that our people wink at these violations and encourage a system of slavery is as base a calumny as ever was charged against any people, and I hurl it back in the teeth of our detractors as a willful, deliberate, and unvarnished lie.

Mr. Speaker, in the Cosmopolitan article a picture of the governor of Florida is presented, and underneath the picture this "muckraker" states that our governor "is willing but powerless to put an end to peonage in his State." I wired the governor to know if this man had correctly stated his position, and I am in receipt of the governor's answer, in which he flatly denies the assertion of this man, and, on the contrary, declares that the State of Florida is not only willing, but amply able, to enforce all her laws. This man has not only slandered our people, but has deliberately misrepresented the honored chief executive of our State.

Again, Mr. Speaker, this perverter of truth and wholesale "penny-a-line" slanderer places in his libelous communication a picture of Mr. H. M. Flagler, a citizen of Florida and who is president of the Florida East Coast Railway Company, and underneath that picture says:

Henry M. Flagler, of the Standard Oil clique, whose Florida East Coast Railway is largely responsible for slavery conditions in Florida.

Mr. Flagler has builded about 600 miles of railway within the State of Florida, and this system was built through a veritable wilderness; he has builded a system of hotels along his line of road which has made the east coast of Florida the Riviera of America. On the pay roll of his company in the State of Florida to-day are from eight to ten thousand employees, and it is notorious in that State that no man was ever more kind to or considerate of those in his employ than is this man Henry M. Flagler. His enterprises in Florida have been the direct cause of providing happy and contented homes for full 50,000 people, and yet this miserable libel peddler charges him with establishing a system of slavery in the State of Florida.

I thank God, Mr. Speaker, that He gave me the courage in this day of indiscriminate and riotous assault on wealth to deal justly with the rich man. This rich man is now, at the very moment when "yellow journalism" is painting him as a monster, at an expenditure of millions of dollars, engaged in the work of linking the city of Key West to the mainland of Florida with bars of steel, and it will not be many months before under the magic touch of his enterprise the snort of the iron horse will be heard in the Island City of the Gulf.

Well, Mr. Speaker, I have already taken up too much time with this creature Barry and the miserable publications which act as sewers to carry away the "muck rakings" of such as he. I will content myself with attaching to my remarks clippings from certain newspapers in Florida, which show how our people regard the dirty attacks of this irresponsible scribbler.

The Live Oak Democrat, under date of February 28, 1907, speaks as follows on this subject:

The Cosmopolitan Magazine is likely to get into legal trouble because of the malicious and lying article it published in its late issue, reflecting on several prominent Marion County citizens and the county officials. Mr. H. L. Anderson has been retained by some of the citizens whose names were used in the article.—Ocala Star.

That is the way to get at it. Mr. Hearst is used to them, but, nevertheless, the more he has of them the less he likes damage suits. And his hired liar, Barry, who wrote the slanderous article, should be given the hot end of a prosecution for criminal libel. We may set our newspaper columns afire with indignation down here in Florida, but, except to relieve our feelings, it doesn't amount to much. Somebody should go into court and prove the Cosmopolitan Magazine a deliberate and malicious slanderer of Florida and her people, and its tool, Barry, a sneaking, two-faced liar, who purposely sought to create a false and injurious impression in the article he wrote. Barry said things about some of those Ocala people which certainly call for something more than hot air by way of reply.

The Florida Times-Union, under date of February 26, 1907, says:

The Washington Post "does not believe the American people will stand for the settlement" the President has made with Japan. Why not? It is "standing for" other "settlements" made by the President which touch them much nearer—the settlement with the life insurance associations by which a political party holds the money of policyholders; the settlement with Morton for rebates, while others are being prosecuted for "crimes" to which he pleaded guilty; the settlement with "agents," by which business men in Florida are tried for peonage without reasonable evidence, and find themselves ruined in pocket and business when declared innocent. Why not stand for subservience to a foreign power when we stand for these?

The St. Augustine Evening Record, under date of February 28, 1907, thus gives expression to its views of this foul libel:

PROCURING TESTIMONY.

When the Government sought to fasten the crime of peonage upon certain of our fellow-citizens its witnesses were kept in jail, being paid $1 per day as compensation for the confinement. In some instances it is possible that not even confinement was considered sufficiently safe, for some witnesses were sent out of the State and returned when needed at Government expense. Why? If reply be made that the prosecution feared the defense would tamper with them, how unstable or corrupt must be such characters and how little reliance should be placed on their testimony? In these cases the liberty and property of citizens who had lived reputable lives among us for years depended upon the evidence of men the Government was afraid to leave at liberty, however closely watched. They must be jailed. They were not unwilling witnesses, who might put themselves beyond the jurisdiction of the court. The complaints were ostensibly made by them and their interests were supposed to depend upon the verdict to be given. Why could not they be trusted? In every case they were grossly ignorant. In the cases first brought some of them supposed they were working for the East Coast Railway, when they had been sentenced in court and were working out penalties on the chain gang, though they testified they were chained and guarded by their employer's agents. A majority of the witnesses in the Jacksonville peonage cases gave their testimony through an interpreter, being unable to make themselves intelligible in English. What conception did these have of the meaning of their actions or the effects on others of the testimony they gave? One of them swore he had been whipped till has back was scored but recently, and that he had called in a physician to treat his wounds. The physician said he found no wounds and treated the patient for an internal trouble. He was stripped before the jury, and no scars found.

How far is this "care of witnesses" to go? Mr. Jerome "guards and watches his witnesses" in New York while they are waiting to testify in the Thaw case; detectives followed the jurors during the first week of that trial. In all the cities and in many counties officials put persons arrested on suspicion or suspected of criminal knowledge through "the third degree," a torture that frequently means "sweating" in air-tight chambers and often solitary confinement on bread and water till the desired testimony is given. Jones, the valet to Rice, says he gave the testimony which secured the conviction of a lawyer to escape torture and upon threats that he would be prosecuted as principal to the murder if he did not implicate another.

Whose life or reputation is safe when credence is given to witnesses who can not be trusted by their friends or who testify under compulsion? Would an American citizen knowing his rights submit to imprisonment for $1 per diem or to exile from the State? Should not such practices be punished before it is too late? Americans in Cuba say the worst evil in the island is the impotence of the courts growing out of the fact that each witness is expected to "stand by his friend," so that two will swear against another without punishment for perjury. Are we coming to this? The Chinaman new to this country is bound by his oath only if he swears by the head of a white cock; others must be kept in jail to make sure of the right story.

From the Jacksonville Metropolis is clipped the following:

GREAT INJURY TO FLORIDA IS DONE BY IRRESPONSIBLE SCRIBBLER—INEXCUSABLE FALSEHOODS—RICHARD BARRY IN COSMOPOLITAN MAGAZINE LIBELS THIS STATE—THE TAMPA EVENING NEWS IN A FORCEFUL WAY SHOWS UP SOME OF THE LIES THROWN INTO THIS PUBLICATION BY THIS IMAGINATIVE WRITER.

Replying to an unwarranted attack on Florida by an irresponsible scribbler, the Tampa News says:

"His name is Richard Barry. His medium is the Cosmopolitan Magazine. Mr. Barry is a very fanciful gentleman, and he has the art of turning out 'yellow copy' down to a nicety.

"Mr. Barry has been in Florida—'investigating.' He says he has, and the magazine which stands sponsor for his statements corroborates the claim. It is well that the announcement is made, for from a perusal of his articles one at all conversant with Florida would be led to believe that they could have been written just as truthfully in Kamschatka or Iloilo.

"POSITIVELY FALSE.

"Mr. Barry and the Cosmopolitan are engaged in the task of 'showing up slavery.' The 'showing up' is done with all the facilities that a manufactory of lurid sensationalism can afford. In his article in the March Cosmopolitan some striking pictures are used. There is a full page startler representing a convict prostrate, evidently from the exhaustion of a long chase, with bloodhounds about to tear his throat. Mr. Barry's article, as overdrawn, as extravagant, as monstrously untrue as it is, doesn't record the incident which the picture is supposed to represent. Why should he overlook such a horrible incident if he knew of it? Would it not have gone far toward clinching the case he is striving to establish? Evidently he didn't possess the facts; but that did not interfere with the publication of the picture, which, filling a vacant page with a shameful libel on Florida, was doubtless made to order by a 'yellow' artist to heighten the effect of a 'yellow' fabrication.

"Mr. Barry's absolute knowledge of Florida, gained from 'close, personal observation,' is fittingly made manifest in his statement that Orange County is the 'center of the orange growing industry of the

State.' Are all Mr. Barry's declarations based on similar familiarity with this State?

"SURPRISING AUDACITY.

"The audacity of some of Mr. Barry's statements is surprising even to those acquainted with the methods of his stamp of journalists. He gravely assures the readers of the Cosmopolitan that in Marion County negroes who have been arrested for various offenses and bound over for trial are turned over to turpentine operators, who work them in their camps pending their 'day in court.' It only needs a little thought to demonstrate that such a thing would be impossible in this or any other State. No man can be subjected to penal servitude before he is convicted of crime. Should such a thing be attempted the hue and cry that would be raised could not be suppressed by any amount of influence. No such thing happened in Marion County nor in any other county. Its absurdity is patent on its face.

"Not content with the libels which Mr. Barry sends forth into the world under his own name, the editor of the Cosmopolitan prefaces the article with a number of comments, in bold-faced type, in which 'slavery' and 'serfdom' are freely used as descriptive of labor conditions in Florida. All these comments, so destructive to the good name of the State, are based on a few harum-scarum stories told by irresponsible and indolent adventurers and accepted as true by overzealous officials of the Government. As in the two O'Hara trials recently conducted in Jacksonville, these stories fall to the ground when subjected to the test of the courts. But their proven unreliability is immaterial to the Cosmopolitan and its ilk. In the hope of creating a sentiment, however falsely developed, these 'muck rakers' are content to impeach the character of a whole State to embellish their fabrications with lurid pictures, to send forth their conscienceless libels upon their mission of misrepresentation and detraction.

"The people of Florida should have some redress against such gratuitous slanders. There should be some effective means of checking such torrents of abuse."

I call attention to another editorial utterance of the Live Oak Democrat in its issue of February 25, 1907:

Every bum, dead beat, rogue, and swindler in Florida now feels that the Cosmopolitan Magazine is his very own, the true organ of his sentiments and defender of his methods, since it published the defamatory yarn of one Richard Barry about peonage in Florida. The vagabond negroes and degraded whites in this State who obtain money and goods and grub under false pretenses and then "jump" their contracts and laugh in the faces of the "suckers" who trusted them feel that in Barry they have a friend indeed, and in the Cosmopolitan a noble advocate to tell the world of their cruel wrongs and manufacture the public sentiment to justify and protect them in keeping up their rascally practices. The new view of the peonage laws is a direct encouragement to a large class of human vermin with no more moral sense than professional pickpockets, and they make no concealment of their insolent exultation over this unexpected and powerful ally to shield them while they prey upon honest men and avoid all penalty for their knaveries.

Col. Walter P. Corbett, a very prominent and influential citizen of Jacksonville, Fla., recently delivered an address in that city to what is known as the "Florida State Board of Trade," which represents the business life of the State of Florida, and among other things he said:

THE PEONAGE CASES.

And just here I take the liberty of drawing your attention to a matter I consider of vital importance in its bearing upon this question, and directly concerning our citizenship. We have had enough of that class of labor that has been, I may say, "emigrated" at us from New York.

A reputable, honorable, God-fearing citizen of Florida has just gone through the ordeal of trial in the United States court, at a cost estimated by himself at more than $12,000, on this question of peonage. And in the face of the fact that the Government had sent here special officers to gather the facts and to prosecute this man; in face of the fact that, at the advice of its learned counsel, the Government tried this man first on what he believed to be its strongest and its best case; in face of the fact that twelve good men and true, the peers and equals of this defendant and citizens of Florida and the United States, acquitted him of this charge; in face of all this the United States, through its biased representatives, actuated by some cause that is as yet unknown to us, placed him again on trial, heaped upon him an additional expense, confronted him with the same witnesses with only the same stories to tell, charged him with the same facts, imprisoned twelve citizens of this State in a jury box for twenty-one days, demanding that they pass upon the same facts as had a former jury. And these twelve men, like that first twelve, declared this defendant not guilty! [Sustained applause.]

No man can say this is something which does not concern him. No one of us can say, "This is that man's own business, it is nothing to me." It is something to each and every one of you, whether you employ many laborers or one, whether you employ a cook, a coachman, or a gardener. If this practice is to continue, if this principle is to prevail, no man's liberty is safe.

In the Savannah, Ga., News of February 24, 1907, appeared a communication over the signature of Mr. J. H. Benjamin, of Ocala, Fla., and which is as follows:

"FOUNDATION OF FACT WITH SUPERSTRUCTURE OF FICTION"—A FLORIDIAN'S REPLY TO THE COSMOPOLITAN'S "SLAVERY IN THE SOUTH."

OCALA, FLA., *February 23, 1907.*

Considerable comment has been caused here by the March issue of the Cosmopolitan Magazine, which contains an article by Richard Barry entitled "Slavery in the South to-day." It relates to the convict lease system in the South in general and in Florida in particular, and has special interest to Ocala, because this town is at present the headquarters of the State convict system, and many of the parties referred to live here.

From an acquaintance with the people and affairs referred to, I would say that the article has a foundation of fact and a superstructure of fiction. There are certain matters, either grave errors or deliberate untruths, that are obvious to all. For instance, the statement: "This might be all right if it were a business proposition. Instead it is politics, which means graft. Last year the 1,200 convicts were leased to C. H. Barnes & Co., of Jacksonville. Barnes was the only bidder."

WERE HALF A DOZEN BIDDERS.

It is a matter of public record that there were at least half a dozen bidders, some of them among the most prominent men in Florida. One of the firms that bid was the Florida Naval Stores and Commission Company, which held the lease the four years previous and built the Marion Farms Hospital near Ocala. There were several other bidders, and the lease finally went to C. H. Barnes & Co. because their bid was undoubtedly the best. The Morning News files could give enough evidence of that fact to satisfy any reasonable person.

S. A. Rawls & Co., of Ocala, subleased the convicts from C. H. Barnes & Co. By their lease they had to take every convict, man or woman, old or young, sick or well, able-bodied or not, at a high price—how much I have not the figures for, but more than $207.70 per annum. This company does not sublease any but able-bodied convicts. All that are too old or too feeble to do good work are kept on the company's farms near Ocala to do work that is within their ability.

WORK IN THE OPEN FIELDS.

These convicts are in the open fields all day long, where they can be seen by hundreds of people, and no word has ever been heard of inhuman treatment to them. All sick convicts are cared for in the hospital, and the hospital can be seen any day by any respectable person that chooses to visit it. To my personal knowledge scores of intelligent men have visited it and came away speaking highly of the good care and the good food given to the inmates.

Further on Mr. Barry says: "The State inspects its camps; the counties do not have even that formality." Mr. Barry might have learned by asking any ordinary well-informed citizen that it is the duty of the State inspector of convicts to inspect camps of county convicts as well as those of the State, and a little more research would have convinced him that such inspection is often made. When a man is so careless of his facts, is it not reasonable to doubt some of his conclusions?

THE ALLEGED FALSE ARRESTS.

Another statement that seems absolutely foolish is that it is the practice of certain officers to arrest able-bodied men and take them before justices of the peace, by whom they are held for the criminal or circuit court; that some turpentine operator will then come forward, go security for the accused, in consideration of which the negroes work in the turpentine camps without pay until court meets, from six months to a year. Those turpentine negroes know their rights as well as any people on earth. When a man accused is out on bond, he is as free as any man, and no man can make him work against his will.

PICTURES THAT MISREPRESENT.

The article is embellished with a number of pictures, one of which is a group of convict guards. The evident intention of the artist was to hold them up as horrible examples. The fact is that they are all young white men, country boys of a type seen all over America, and it would not occur to anyone that they were anything but decent looking had the picture appeared in an article of different purpose. One of the young men is well known to me, and I can certify that he is as kind-hearted a boy as ever lived.

Another shows Deputies Hutson and Bishop and Policeman Dean, all of Ocala. Hutson is the man referred to as bringing in negroes at $5 a head. Will Hutson has been deputy here a number of years. He has certainly landed a number of evildoers, some of them desperate criminals, behind the bars. Contrary to Mr. Barry's assertion, he does not show any evidence of "expensive tastes" or undue prosperity.

ONE OF THE GUARDS.

Homer Dean is a big, good-natured Cracker boy, who has been night policeman of Ocala for a year or two. He is a very vigilant officer, has arrested many desperate characters, and isn't tender with anyone who resists him, but would protect a woman or child or fight for a friend as quickly as any member of the "finest."

The people who read the Cosmopolitan would look at these pictures differently if they all knew that they were obtained under false pretenses; that the man who took them obtained them by posing as the friend of the men whom he intended to pillory in print.

There may be some truth in the article. I only call attention to these matters I know of from personal observation or the word of those who I believe do know.

J. H. BENJAMIN.

I now desire to call attention to an editorial from the pen of Mr. Claude L'Engle, editor of the Florida Sun, who had a personal interview with this man Barry, and which demonstrates beyond question that Barry knowingly and deliberately lied on the people of Florida:

[The Sun, Saturday, February 23, 1907.]

THE MILD-EYED LIAR BOILS HIS POT.

Well, the "thriller" has appeared.

That mild-eyed young man named Richard Barry, who had the boastful vocabulary of a campaigner and the manner and appearance of a schoolboy, who came to Tallahassee last summer and announced that he had been commissioned by McClure's to write a story about white slavery in the South, has succeeded in getting a publisher to print his stuff.

Like all reachers after the sensational, Mr. Barry has the color of truth with which to save his narrative from rejection as a lie out of whole cloth.

He has some pictures of bona fide citizens of Florida which lend some air of probability to his story. In the middle of the story, which appears in the March Cosmopolitan, is a picture that would do credit to the illustrations that I imagine adorn the pages of that monumental slander on the South, which I have never read, Uncle Tom's Cabin. A white man, mounted on horseback, with a rifle in his hands, and ahead of him a pack of hounds running down two negroes, is shown in this picture.

Now that Mr. Barry has had his say, I think that I am released from any restraint due to professional courtesy, and will let a little more light into the inspiration that sent him to Florida.

Barry confessed while in my office, where he came after paying his visit to the governor, that when Mr. McClure gave him this assignment that he did not doubt there were abuses practiced by employers on their employees in Florida, as well as in other States, but why should he go to Florida for a story of white slavery, when he could write a story about 5,000 white slaves without going outside of New York City?

He said Mr. McClure told him:

"Oh, well, that's very true; you might write a story of white slavery in New York, but it is the picturesque details and the heart interest surrounding the slavery in the South that have the makings of a good magazine article."

Mr. Barry told his story to the governor, but he did not tell it as he wrote it for the Cosmopolitan Magazine. Mr. Barry came to get a story, and he was going to get it.

What he got did not impress the man who sent him, so McClure turned it down, doubtless because he did not think the story worth the space and was not so anxious to publish a "thriller" as to allow it to induce him to do an injustice to a State.

Mr. Barry, therefore, had to go to another market to sell his wares. He found it in one of the places where WILLIAM RANDOLPH HEARST does business.

The whole thing is overdrawn, and the few evils that came to Mr. Barry's attention have been magnified, and with studied design have been made to produce an effect on the minds of northern readers totally different from the one that a calm, straight statement of conditions would make.

There are abuses in Florida, as there are everywhere, but it takes a magazine writer with an atrophied conscience to present them in the shape that Mr. Barry does in his article in the March Cosmopolitan, because his only purpose has been to startle the minds and play on the passions of the people who will read this story without an opportunity of knowing that it is a purposely overdrawn picture.

Sprinkled here and there through the story are lies which stand boldly out, one of which I quote:

"The corruption begins with the convict system. Instead of an expense, her (Florida's) convicts are a source of income. This would be all right if it were a business proposition. Instead it is politics, which means graft. Last year the 1,200 convicts were leased to C. H. Barnes & Co., of Jacksonville. Barnes was the only bidder. He had no competitor. The others knew it was useless."

This statement is wholly untrue. Politics had nothing to do with the leasing of the convicts. It was done by sealed proposals submitted to the board of State institutions, which were opened in the presence of all the bidders. The contract was awarded to Barnes & Jesup, who do not agree in politics with the present administration, thus disproving the imputation of graft made by Mr. Barry. There were many bids besides the one made by the successful one, and competition, instead of being absent, was active, plentiful, and keen.

Another statement of Mr. Barry's, which any "cracker" in the woods knows to be false, is as follows. I quote again: "Laceration from the saw palmetto, when exposed to the dews of the forest, goes into inflammation, sometimes blood poison, even death. There is always intense pain."

Saw palmetto scratches. It doesn't lacerate. It never produces blood poison, unless the person is so diseased that an antiseptic needle would produce gangrene.

It is a clean scratch and never "intensely painful." The rabbit told the fox he was born and bred in the briar patch. Put a "cracker" in a bunch of palmettoes and he is at home, and what won't hurt the "cracker" isn't likely to hurt the Bowery tough, the class of people who told such heartrending tales about being enslaved.

Mr. Barry is willing to put in a fairly good word for Florida. He doesn't want to be too terribly severe. He says in another paragraph: "The horrors of the convict system have become so heartrending in Florida during the past few years that respectable people, of whom there are a goodly number, have at last arisen in revolt."

Thanks for those few kind words, "a goodly number."

The Northern readers of Mr. Barry's article may believe that the people of Florida are terribly wrought up about the evils of the convict system, but no one who knows the true condition is wrought up about it at all. The fact is that Florida's convicts are better treated than the shop girls are in New York, where the Cosmopolitan is printed.

As I said before, Mr. Barry was in my office. He was there several times. I talked "peonage" with him at length, and plied him skillfully with questions. He seemed anxious to impress me with his thorough knowledge of the subject, but he was not able to tell me anything definite about it.

This story is a studied one on the part of a hired man to earn his pay, without any regard for the truth or for the injustice that his biased handling of the few shreds of truth will do a great State, composed of as good people as there are in any State. It is about on a par with the wild stuff that has been printed in western newspapers, and is calculated to do a great deal of harm.

Any condition skillfully worked up can be presented in a bad light if the desire is great and an opportunity to sell it is presented.

If the man Barry who penned this infamous libel, or his "muckraking" boss who published it, had any visible property that could be reached to satisfy judgments, civil suits would undoubtedly be brought. If either of them will come into the jurisdiction of Florida, they will undoubtedly be given an opportunity to establish the truth of the charges they have made. But they have not the courage to face in the courts the people whom they have maligned and libeled. They will hide in a bomb proof, as is the custom of their kind.

Mr. JENKINS. I move that the resolution lie on the table.

The motion was agreed to.

### CORRECTION OF ENROLLED BILL.

Mr. HEPBURN. Mr. Speaker, I present the following resolution, and ask for its present consideration.

The Clerk read as follows:

*Resolved*, That in enrolling the bill S. 5133, "to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon," the enrolling clerk be directed to correct the engrossed amendment of the House to the Senate bill by striking out all after the word "*Provided*," in section 2 of said amendment, and inserting:

"*Provided*, That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in a twenty-four-hour period on not exceeding three days in any week."

The SPEAKER. Is there objection?

Mr. BARTLETT. If the gentleman will yield a moment—I do not want to object. That is the exact language of the instructions that were voted in the House directing the conferees to have this language put in the bill. It is not only the exact language, but the physical paper which was voted on by the House.

The SPEAKER. The Chair hears no objection.

Mr. HEPBURN. In a word of explanation I will say that in the hurry of last night the report of the committee as it was presented reads:

In line 15, page 2, strike out all after the word "*Provided*" to and including the word "daytime," in line 24, and insert the following.

"The following" is that matter.

But instead of saying "strike out all after the word '*Provided*' to and including the word 'daytime,' in line 24," we should have said all of the paragraph following the word "proviso." Now, the matter that we did strike out is this:

Except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours in the twenty-four-hour period of not exceeding three consecutive days in any week.

You will observe that in this order of the House that language is used, with the exception that the word "consecutive" does not appear in the order. As it now stands, we would have a repetition of that language, varying only by the word "consecutive" appearing in one part and being omitted in the other. It would not change the general effectiveness of the law, but it would be an ugly repetition in the statute. I ought to say, in justice to my associates, that it is my blunder and not theirs.

The question being taken, the concurrent resolution was agreed to.

### W. D. CLAY AND OTHERS.

The SPEAKER laid before the House the bill (H. R. 22182) to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs, with a Senate amendment thereto.

Mr. BURNETT. I move to concur in the Senate amendment.

The motion was agreed to.

### MEDICINE AND SURGERY IN THE DISTRICT OF COLUMBIA.

Mr. GREENE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 8614) to amend the act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896.

The bill was read, as follows:

*Be it enacted, etc.*, That section 6 of chapter 313 of the Twenty-ninth Statutes at Large, approved June 3, 1896, be amended so as to read as follows:

"SEC. 6. That each member of said boards of medical examiners of the District of Columbia shall, before entering upon the discharge of his duties, take an oath to administer, fairly and impartially, the provisions of this act. Each board shall elect from its own members a president and a secretary. Each board shall hold a meeting for examination in the city of Washington on the second Tuesday in January, April, July, and October of each year, and continuing so long as may be necessary to examine all applicants, and other meetings shall be held at such times as the board of medical supervisors shall direct. Each of said boards shall examine, at the meeting immediately following the receipt of the proper certificates from the board of medical supervisors, all applicants for licenses to practice medicine and surgery in the District of Columbia so certified.

Mr. WILLIAMS. Mr. Speaker——

Mr. MANN. Reserving the right to object——

Mr. GREENE. I will explain the situation.

Mr. WILLIAMS. What committee does this bill come from?

Mr. GREENE. It would ordinarily go to the Committee on the District of Columbia, but this bill has just passed the Senate, and I will explain the reasons for it.

Mr. MANN. Let me ask the gentleman a question. The District of Columbia has had a day in the House. Now, what injury will there be if this is postponed until it can receive consideration by that committee?

Mr. GREENE. I will explain it if the gentleman will give me the time.

Mr. MANN. Certainly.

Mr. GREENE. The present law provides that the board of examiners shall hold meetings for these examinations in the city of Washington, beginning on the second Thursday in January. This simply substitutes the word "Tuesday" for "Thursday," and it is for the accommodation of a number of Seventh Day Adventists in this community, who will not take the examination upon Saturday. The law provides for four continuous days' sitting of the examiners, and by changing the date to

Tuesday it simply accommodates these gentlemen who have conscientious scruples on the subject.

The SPEAKER. Is there objection?

There was no objection.

The bill was ordered to a third reading; and was accordingly read the third time, and passed.

REAR-ADMIRAL M'CALLA.

Mr. COUSINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table Senate joint resolution No. 98, granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany, which I send to the desk and ask to have read.

The Clerk read as follows:

*Resolved by the Senate and House of Representatives of the United States in Congress assembled*, That permission is hereby granted to Rear-Admiral B. H. McCalla, United States Navy, to accept the China war medal with Peking clasp, tendered to him by the King of Great Britain, and the Order of the Red Eagle with swords, tendered to him by the Emperor of Germany.

The SPEAKER. Is there objection?

Mr. MANN. Mr. Speaker, reserving the right to object, I will ask the gentleman to give us some statement of the matter.

Mr. COUSINS. Mr. Speaker, the officer in whose behalf this resolution was passed this morning by the Senate is now in such precarious health by reason of very great and effective service rendered in the salvation of the city of San Francisco, or what was left of it after the recent earthquake and fire, that his life is despaired of. He is the man who led the marines of the United States a few years ago from the shore to Peking and rescued, if I may say that, the minister and his family, who at that time were and had been in very great danger for many weeks. He is now in serious condition. The late recognition that is proposed by this resolution is merely a recognition by two distinguished nations, two of the then allies—Great Britain and Germany. I should like to have that great and noble man's heart thrilled by this one recognition before he dies. You will all remember when I remind you of his utterance when the marines started for Peking. After the conference of the allies he said:

We seem to have come to no conclusion in this conference, gentlemen, but my minister is in danger at Peking, and I am going there.

[Applause.]

Mr. FINLEY. Does not the gentleman think that if this officer of the United States Government on account of his deeds shall live in the hearts of the American people that that will be sufficient and the greatest recognition and reward that could possibly come to him? Mr. Speaker, I object.

Mr. COUSINS. Then, Mr. Speaker, I move to suspend the rules and pass the joint resolution.

The SPEAKER. The gentleman from Iowa moves to suspend the rules and pass the resolution. Is a second demanded?

Mr. FINLEY. Mr. Speaker, I demand a second.

Mr. COUSINS. Mr. Speaker, I ask unanimous consent that a second may be considered as ordered.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The gentleman from Iowa is entitled to twenty minutes and the gentleman from South Carolina is entitled to twenty minutes.

Mr. COUSINS. Mr. Speaker, I reserve my time for the present.

Mr. FINLEY. Mr. Speaker, all I have to say is this: That without an act of Congress decorations conferred by foreign governments can not be received by an American officer, and I am one of those who believe that the highest honor that can be paid an American citizen is that which is paid to him by his own country and by his own countrymen. I think the framers of the Constitution acted wisely in prohibiting distinctions of this kind. That is why I oppose this resolution. [Cries of "Vote!" "Vote!"]

The question was taken; and in the opinion of the Chair two-thirds having voted in favor thereof, the rules were suspended and the joint resolution was passed.

Mr. ADAMSON. Mr. Speaker, I desire to place in the RECORD the following telegram:

ATHENS, GA., *March 4, 1907.*

Hon. W. C. ADAMSON,
*Member of Congress, Washington, D. C.:*

Please state for record that I left House Friday on account of serious illness of my daughter, and was paired with BOUTELL, of Illinois.

J. M. GRIGGS.

QUESTION OF PRIVILEGE.

Mr. RANDELL of Texas. Mr. Speaker——

The SPEAKER. The gentleman from Texas [Mr. RANDELL] calls up his appeal from the decision of the Chair sustaining a point of order, just before the recess was taken, a little after midnight.

Mr. DALZELL. I move to lay that appeal on the table.

Mr. WILLIAMS. Mr. Speaker, I suggest that the gentleman withhold his motion for about ten minutes.

Mr. DALZELL. For what purpose?

Mr. WILLIAMS. So that the gentleman from Texas may explain the character of his resolution.

Mr. DALZELL. Does he want to withdraw his appeal?

Mr. RANDELL of Texas. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RANDELL of Texas. If this appeal was withdrawn, would it be in order to strike out the preamble, and thus remove the objection to the resolution?

The SPEAKER. No; that would not be in order. The Chair understands the gentleman from Texas only desires ten minutes.

Mr. DALZELL. I understand the gentleman wants ten minutes, and I ask unanimous consent that he may have that time pending my motion to lay the appeal on the table.

The SPEAKER. Is there objection?

Mr. RANDELL of Texas. Mr. Speaker, as I understand, if the appeal is withdrawn, the point of order is withdrawn, and I may speak ten minutes on the resolution.

The SPEAKER. No; the Chair does not understand that the point of order is withdrawn.

Mr. MANN. The proposition is to allow the gentleman from Texas ten minutes on any subject to which he desires to address himself.

The SPEAKER. The gentleman from Pennsylvania moves to lay the appeal on the table, but asks unanimous consent pending that motion that the gentleman from Texas have ten minutes on the resolution. Is there objection?

There was no objection.

Mr. RANDELL of Texas. Mr. Speaker, the object of this resolution was to protect the privileges of this House and the interests of the people of this country. It seems to me that when our forefathers formed this Government and in the Constitution made the legislative, executive, and judicial departments, it was an act of wisdom, and that each department should attend to the duties pertinent thereto and not infringe on the rights or duties of another department of the Government.

We understand from the public prints and from general knowledge that at present there are negotiations going on between the executive department of this Government and the Government of the German Empire relative to tariff duties and tariff regulations directly affecting the commerce and the revenues of this country. This resolution was addressed in good faith, and it seems that when it was referred to the Committee on Ways and Means the chairman of that committee addressed some sort of a communication to the Secretary of State and received the following reply:

DEPARTMENT OF STATE,
*Washington, February 14, 1907.*

MY DEAR MR. PAYNE: I should hardly think it would be useful for the House to pass resolution No. 829, calling for information regarding negotiations with Germany.

No agreements have been made between this country and Germany since the modus vivendi established last year and communicated to Congress. As matters now stand the maximum tariff will take effect as against imports from this country on the 30th of June next unless something is done to prevent it, but it would not be compatible with the public interests at present to make public any of the papers involved in this negotiation.

Very truly, yours, ELIHU ROOT.

Hon. S. E. PAYNE,
*Chairman Committee on Ways and Means,*
*House of Representatives.*

Here we have it admitted from the highest authority of this Administration, the Secretary of State, that the situation is such that unless something is done Germany will impose upon the imports from this country the highest tariff rates. It interferes with all of our trade with Germany, and that trade, as far as our exports are concerned, affects the products of the farmer, the products of the agricultural classes, the products of those that raise grain and live stock, and all those that produce foodstuffs. These people are the ones who get less from legislation in this country and suffer most from class legislation.

When their interests are affected we have this picture before the American people: That the Congress of the United States, not the representatives of the people here in Congress assembled, but the President, the Secretary of State, the executive department itself, handles this question, and our tariff laws must be made, revised, corrected, changed in effect by regulation, by agreement, by stipulation outside of law and by the prostitution of the powers of the Executive; and

this, too, while Congress is in session and the representatives of the people sit here inactive, even ignorant of what is being done. The Administration says it is *against public policy that this House should have the information as to what the status of negotiations are between the countries!* I submit the proposition that the people, through their representatives in the Congress, should have full control and full power in reference to the raising of revenue in this country and of all things that affect the Treasury. [Applause on the Democratic side.]

Where will this thing stop? It is evident—we know it is a matter of public information—that the object of the Republican party is to keep from touching the tariff question. You on that side of the House are afraid to take hold of the tariff question, and therefore you go to the executive department and have it to make regulations affecting the estimates as to the values of goods coming into this country, the estimates as to what shall be the appraised value of imports. Thus you regulate, simply by agreeing to certain new regulations, the rate of duty, a power that should be exercised by the Congress only, or by express law. What right has the executive department, directly or indirectly, to change the tariff?

Mr. Speaker, the country ought to know, and I believe the country does know, that this is simply an attempt on the part of the Republican Administration to avoid the tariff issue, to hold it down and not permit the representatives of the people in the Congress even to consider what action shall be taken in a matter of the greatest importance to our people. Especially is it important to the great agricultural classes in the South, in the West, in the great Mississippi Valley, affecting them to the amount of many millions of dollars annually in addition to the effect on the public Treasury, and yet the Republican machine must hold the reins so tightly that the question can not come up in this House.

Not only that, gentlemen, but you must not know—it is against public policy for you to know—the situation of what is being done! Let the American people understand this. Let the people understand that no longer their representatives control the question of taxation, no longer is the matter of tariff legislation in the hands of Congress, but at the White House, in the State Department, in the Republican party machine. The trusts and the party leaders have the question in hand, and it is solely one of party expediency and class interest.

Who is interested in preventing tariff legislation? Not the people interested in just laws, not the people who pay more for farm implements than foreigners, but class interests that now are robbing the people every year by reason of the tariff, which in many cases is absolutely exclusive and therefore brings in no revenue; but which puts up a tariff wall whereby the favored classes can exact such price from the people for their products as they see proper, limited only by the tariff rate.

Mr. Speaker and gentlemen of this House, I submit to you, and I submit to the people of the country, that the record of this Congress, the record of the Republican Administration during this term of Congress, simply means this, that the tariff in this country shall remain as it is; that the people shall have no corrections from its evils; that you do not propose to correct the iniquities of the tariff until "after the next election;" that then *it is to be done "by its friends;"* and after the next election the same situation will be here; and then you will revise the tariff after the next succeeding election, and that revision *must be by its friends!* [Applause on the Democratic side.]

Mr. Speaker, in order to avoid the creation of another precedent as to the point of order which was raised against my resolution, and having called the attention of the country to the methods of those preventing tariff reform, I withdraw my appeal from the Speaker's decision. [Applause.]

The SPEAKER. The gentleman withdraws his appeal.

Mr. DALZELL. Mr. Speaker, in view of the speech that has been made by the gentleman from Texas [Mr. RANDELL], I ask unanimous consent that the gentleman from Ohio [Mr. GROSVENOR] may have five minutes.

Mr. GROSVENOR. Mr. Speaker, I think under the circumstances the matter better end where it is.

JOHN ALLEN.

The SPEAKER laid before the House the bill (H. R. 13122) to correct the military record of John Allen, with the following message from the President:

*To the House of Representatives:*

I refuse my signature to this bill, on the recommendation of the Secretary of War, for the reasons set forth in the following report of The Military Secretary:

"The official records show that John Allen, private, Company I, Thirty-second Infantry United States Volunteers, was tried and convicted by a general court-martial of the crime of murdering a native Filipino; that he was sentenced to be dishonorably discharged from the service of the United States and to be confined at hard labor for the period of twenty years; that he was dishonorably discharged in accordance with the terms of the sentence; and that upon a review of his case by the War Department it was found that the sentence in this case was void, because, under the requirement that a court-martial sentence in a case of this kind shall not be less than the punishment provided for a like offense by the civil laws in force where the offense was committed, the man should have been sentenced to imprisonment for life, that being the punishment provided for a like offense in the Philippine Islands, where Allen's crime was committed. Allen was accordingly set at liberty after a relatively short term of confinement.

"There seems to be no good reason on which to exercise clemency in the case of this man, who was only relieved from a twenty years' sentence of confinement because that sentence ought to have imposed confinement for life."

It appears that this man, John Allen, was tried and convicted by a general court-martial of the crime of murdering a native Filipino; that he was sentenced to be dishonorably discharged from the service of the United States and to be confined at hard labor for the period of twenty years; that he was dishonorably discharged in accordance with the terms of the sentence, but that the sentence was held void because it was by law required that the court-martial sentence in a case of this kind should not be less than the punishment provided under the civil laws. Under the civil laws the punishment of Allen would have been a life sentence, and he was set free after a relatively short term of confinement simply because he ought to have been condemned to life imprisonment instead of to twenty years' imprisonment. The man is a criminal who should now be serving a life sentence for murder, and it would be a disgrace to the Army to give him an honorable discharge.

THEODORE ROOSEVELT.

THE WHITE HOUSE, *March 4, 1907.*

Mr. CAPRON. Mr. Speaker, I move that the message be referred to the Committee on Military Affairs.

The motion was agreed to.

HON. FRANK C. WACHTER.

Mr. TOWNSEND. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The Clerk read as follows:

*Resolved*, That the House of Representatives hereby expresses its appreciation of the faithful and efficient manner in which Hon. FRANK C. WACHTER has performed the onerous duties of chairman of the Committee on Enrolled Bills.

[Applause.]

The SPEAKER. Is there objection?

There was no objection.

The resolution was unanimously agreed to.

WITHDRAWAL OF PUBLIC LANDS.

Mr. MONDELL. Mr. Speaker, I call up a privileged resolution, No. 835. It has been reported by the Committee on the Public Lands with an amendment, and I ask that it be read as amended.

The Clerk read as follows:

*Resolved*, That the Secretary of the Interior be, and he is hereby, requested to inform the House under what authority of law the orders of July 26, October 10, 15, 27, and 31, and November 12, 1906, were made under which approximately 64,000,000 of acres of public land in the States of Utah, Colorado, Wyoming, Washington, Oregon, North Dakota, and Montana, and the Territory of New Mexico, and all the public lands of the Territory of Alaska were withdrawn from all forms of entry, filing, or selection under the land laws.

Mr. MONDELL. Mr. Speaker, since the orders referred to in this resolution were issued they have been very considerably modified, and I have been led to believe since the introduction of the resolution that the orders would be still further radically modified or entirely rescinded in the near future. Hence I have not heretofore asked for consideration of the resolution.

The Secretary of the Interior under whose authority these orders were issued goes out of office to-day. It would therefore be impossible to secure a response from him to the inquiry contained in the resolution. In view of that fact I shall do nothing more than call attention to the resolution at this time and withdraw it.

The people of the West are hopeful that a change in administration in the Interior Department will bring a reversal of the policy under which orders like those in question were issued.

I addressed the House on February 8, 1907, on the subject of these orders, and expressed the opinion that there was no authority of law for their issuance, and, further, that no condition existed which would warrant their issuance even were there authority for so doing. The effect of these orders was, in the first instance, to prevent and retard development of all kinds under any of the land laws. As the orders were modified, agricultural lands and agricultural entries were relieved from the suspension, but the orders still suspend the coal-land laws over practically all of the coal lands of the country. Surely there is no more authority for suspension of the coal-land laws by Executive order than there would be for suspension of all the land laws or of all or any of the laws of the land.

During the session of Congress which has just closed the Committee on Public Lands of the House of Representatives has had exhaustive hearings on the subject of the coal-land laws, and finally, after lengthy and thorough consideration, reported

a bill. Unfortunately, owing to the congestion of business in the closing hours of the session, it was not possible to secure consideration for this measure. While I do not fully approve all of its provisions, notably that in regard to leasing, it would improve present conditions. I am of the opinion, however, that the present coal-land laws are sufficient to encourage development of the coal industry on the public domain if they are fairly and reasonably administered.

The coal-land law is a law of sale. It was never intended that the Executive Departments should pursue as criminals every man who purchased coal lands, but who did not proceed personally and individually to mine the coal on his land. Congress intended to give every American citizen the right to buy 160 acres of coal land, and after having bought it to use it as he saw fit. To open and develop coal mines in the West it is generally necessary to consolidate a number of entries in a single holding, but the practice of the Department for the last two or three years has been to hamper, harass, and pursue as criminals all those who have endeavored to consolidate coal entries with a view of developing a coal-mining industry.

The Department of the Government whose business it is to encourage and assist in the development of the country through a reasonable and proper enforcement of the land laws has persistently pursued coal entrymen. The rulings of the Department have encouraged fraud, and in fact have made it difficult for entrymen to secure coal lands in accordance with law, and the special agents of the Department have made it their particular business to harass coal entrymen and to hamper and interfere with development of the coal-mining industry.

It is to be hoped that with the incoming of a new administration of the Department we shall see an end of prejudice, muckraking, and hysteria in the administration of the public-land laws, and we shall have substituted therefor a sane and sensible policy under which the laws will be enforced without malice or sensationalism, and with a view of assisting rather than retarding the development of the West.

Mr. LACEY. I ask unanimous consent that I may have five minutes on the resolution which has been withdrawn, in order to explain the situation which the gentleman calls to the attention of the House.

The SPEAKER. The time is very short. Would not one minute do, with leave to print?

Mr. LACEY. One minute will do.

The SPEAKER. The gentleman asks unanimous consent to address the House for one minute. Is there objection?

There was no objection.

Mr. LACEY. Mr. Speaker, I want to say, in justice to the Interior Department, in relation to the withdrawals, they were made immediately following the disclosures drawn out by the Interstate Commerce Commission when examining the coal-land situation in Utah. Subsequently, however, it appears that the frauds in Utah, while they were made for the purpose of obtaining coal lands, were not committed, or very few of them were committed, under the coal-land laws. They were violations of other laws and evasions of the coal-land law. The Department of the Interior felt justified in taking extreme measures in view of the disclosures that were made in that hearing. That hearing has been made public and is in possession of the House.

### AFFAIRS IN PORTO RICO.

Mr. LARRINAGA. Mr. Speaker, almost every Member of this House knows fully well, when the Commissioner of Porto Rico arises here, what he is going to say and what his contention is. Within the short time at my disposal and at this late hour I can not for a moment undertake the task of presenting the arguments to prove that my country has a right to self-government. I will therefore merely improve these few moments allotted to me to say once more that the contention of the people of Porto Rico, for whom I am allowed to speak, not by law, but by a mere act of courtesy of this House in amending Rule XXXIV, that the people whom I represent here in such a peculiar way contend that they have a full right to be represented here in this House, as it was represented thirty-five years in the Spanish Congress. We had there sixteen full-fledged representatives who had to look after the laws regarding Porto Rico. They did pass the most important law that that congress ever passed or will ever pass in centuries to come. It was the Porto Rican delegation, with their votes, that made the law that set 50,000 slaves free in the community. [Applause.] The last provision of that act was that it was to be communicated and made effective by cable on the next day, and these 50,000 slaves arose freemen, thanking God that the Porto Rican freemen knew how to make use of the right given to them by Spain, and which is as yet denied them by this great Congress of the greatest nation in the world. [Applause.]

The actual conditions in Porto Rico may be briefly outlined in a few words.

After eight years' struggling under the most unfavorable conditions the island is at least recovering from economical industrial depression and fairly entering into rather prosperous times. A year after the American occupation, in 1889, the island was swept over by one of the most disastrous hurricanes ever known in its history, which completely ruined the production of coffee, its main staple. The next year the organic act of April 12, 1900, which was given by Congress to the island as the basis of a civil government, carried with it the application of the Dingley tariff to all merchandise coming from foreign countries trading with the island, and as a consequence the canceling of all commercial treaties that Spain had with other nations then trading with the island and buying our coffee, paying for it a very high price, as its superior quality was highly appreciated in those markets. This not only closed their markets to the small reserve of coffee left by the cyclone, but also killed the credit of the planters, who could not get a single dollar at any banking or financial institution to rebuild their plantations destroyed by the hurricane. The people of the island, through their house of delegates, decided to come to the rescue and help the planters, providing them with the means to replace their plantations, rebuild their houses, stores, and machinery, etc., but they were forbidden to do so by the executive council, or upper house of the legislature, created by the organic act.

It was proposed by the lower house, or house of delegates, which is elected by the people, to make a loan of $5,000,000—to lend money, through the existing banks, to the planters who could offer solid collaterals, the loan to be raised with the sole and exclusive credit of the island, which has always enjoyed unlimited credit. This executive council, formed of eleven members appointed by the President, the majority of whom were Americans from the different States of the Union, sternly opposed such measure, under the futile pretext that the Porto Rican planters would use the money to pay their creditors, who, being mostly foreigners, would retire from the country with the cash, leaving the planters with their lands on their hands and powerless to work or improve their plantations. All arguments based on the past history of Porto Rico, which showed that the island had always recovered in one or two years from such calamities, were of no avail, the executive council refusing always to concur. The example furnished by the past economical conditions of Porto Rico, which was always a money-lending country, having in several instances lent money to the Crown treasury, to Santo Domingo, and even to Cuba, which latter country is at present owing two and one-fourth millions of dollars to the treasury of the island, was entirely disregarded by the executive council. The fact that Porto Rico had abolished her slavery and, right after such crisis in the labor problems, had in a few years paid $14,000,000 of capital and interests to the slave owners was also ignored.

The effect of not helping the farmers was that most of the small coffee farms have changed hands, the majority of them having gone into the hands of the wealthy merchants and the banking institutions, who, having foreclosed their mortgages, are now in possession of immense tracts of coffee lands, which in some cases they can not cultivate themselves in their entirety, while many other of these little properties have been during past years sold to meet the pressing needs of the families of the poor farmers or sold at auction to pay taxes and, therefore, have been acquired by the rich people. Thus one of the most beautiful features of the social and economical conditions of the island has almost disappeared, and the way is paved for a coffee trust to step in and monopolize the coffee in the island as soon as conditions are favorable.

When the rivers and harbors bill was being discussed in the House a few days ago I had the opportunity to explain to the House why the battle ship *Louisiana*, that took the President to Panama and Porto Rico, could not enter the port of San Juan. The executive council of Porto Rico had suppressed seven years ago the board of harbor works, that for some time past had been successfully in operation and had already removed the worst shoals in the harbor and had also deepened the most dangerous part of the channel. And for that reason the commerce of San Juan, which is increasing every day, has at the present time neither harbor of sufficient anchorage capacity nor a safe port of refuge to offer to the American Navy in case of necessity.

I will not mention here, Mr. Speaker, all the calamities, misery, and destitution that were the consequences of those conditions of agriculture in such a thickly populated country like Porto Rico. The country laborers and their families had to migrate for the first time in the history of the island to the

Hawaiian Islands, Mexico, and Peru. Men, women, and children starved in their little homes in the mountains or, exhausted by the exertion, dropped on their way to the cities on the coast where they went to beg for a piece of bread. These are undeniable facts, and I challenge contradiction to any one of them; while, on the other hand, it is also a fact that can be proved by official documents in the archives of the Department of State, that while those facts were taking place in Porto Rico the official reports from the island proclaimed the prosperity and happiness of the country. Nor was this work of the executive council of destroying the markets of the country the only calamity then befalling the island. Section 11 of said act provided the exchange of all coins in circulation in the island for coins of the United States. Thus more than 6,000,000 silver coins were reduced to less than 4,000,000 silver coins and silver certificates, when by simply recoining our silver pesos, which were of a superior fineness to the American dollars, the exchange of money could have been done without the loss of a single dollar to the country. Instead of this, our circulating medium was reduced to about $2,000,000 only, as we had to leave part of our silver in the United States to pay for the deficiency of our crops that had been destroyed by the cyclone.

This enormous contraction in our circulating medium is known in financial circles in the island as the "second cyclone." Nothing has been done by Congress to help the country. The effects of such conditions, as can well be imagined, was so disastrous that it has taken seven years of hard toiling to rebuild in some way the economical conditions of the island. While coffee has been unable to recover, sugar and tobacco, helped by free trade with the United States, have largely developed, some capital from the United States, as well as from Europe, having been invested in the island, and although all the profits accruing from such industries go out of the island to the large money combines abroad, yet some benefits have been derived from it, as work has been furnished to the working classes in the island, and therefore life in general is to-day more tolerable to the native toiler. From a financial point of view, judging from the bulk of imports and exports of the island, Porto Rico is doing more business to-day than it ever did before; but a single glance at the figures that make up those totals will soon show that the great exports of the island are being swelled up by the sugar turned out by a few large factories in the island. In the educational part of the administration of the country some good work has been going on from the beginning, as the country, in spite of all, has been furnishing the necessary funds to build up a good system of education. The number of schools has been largely increased, although in the interior districts of the island poverty has, up to the present, hindered the assistance of the children to the schools in numbers sufficient to justify the large expenditure in teachers and schoolhouses.

In the matter of improvements the country has also furnished sufficient funds to keep up the building and maintenance of its good system of roads; but while on the material side of public life the country has worked and done everything that was in its power to do, yet it has always been laboring from the start under the great drawback of a general discontent arising from the unsatisfactory political conditions under which it was placed by the organic act. The government of the island, as before said, has been conducted entirely by the absolute and tyrannical rule of an executive council, or upper house, formed of eleven members appointed by the President, the majority of which are, at the same time, the heads of the different departments. They make the laws, vote our taxes, collect our money, and expend it without any satisfaction being given to the people of the island. Each head of a department may act in the most independent and arbitrary way, without any regard whatsoever to the will of the people. In some instances it seems as if some of them make it a point to show the people of Porto Rico that they do not count for anything in the management of the affairs of the island. It seems to have been a rule that the will of the people should be ignored, and as the members of the council do not in the least depend on the popular vote for their offices, they will probably continue to do as they please so long as they have the approval of the Executive.

Now, Mr. Speaker, I wish it to be distinctly understood that my criticisms of the executive council do not in any manner refer to the personnel forming the present executive council of Porto Rico.

When I speak of the executive council of Porto Rico, I refer to that feature of our organic act which forms our upper house of eleven members, six of whom are at the same time the heads of the departments. It is the system of which I complain.

The present executive council is formed of as good men as you could find for those places. I believe that even those in that body who may commit or may have committed errors mean or meant well, although about some of them I think that even within the rights given to them by the law they might be guided by a better regard for the will of the people than they seem inclined to have.

If it were in my hands to have the President remove them all to-day, I would not do it, as they are, as I have said, as good men as the President would probably find in the country. And as they have already had time to learn something of the country, the new ones would probably not do as well. And in this connection I will mention the fact that, as they are appointed for four years, there should have been no more than twelve different men to fill those offices, for none have died or had to leave on account of health (that I know of), and, instead of twelve, twenty-one different men have passed through those offices. In some of the departments as many as five have filled the same office, so that, not taking into account the time that those officers are substituted by their assistants, which occurs at least once in every year when they come to this country for their vacations, every member in that department has held the office an average term of sixteen months.

And when you consider, Mr. Speaker, that these gentlemen are sent there to make laws for a country they do not know, for a people whose laws, customs, and language they do not know, and this for an average period of seventeen months, you may imagine, Mr. Speaker, the probabilities they have of doing well, even if they were selected from the highest intellects in the country. And thus it happens that a gentleman landing at 8 o'clock in the evening at San Juan, at 9 o'clock next day has taken the oath of office and is seated in his chair making laws, perhaps deciding with his vote very important laws, when he has not practically seen the face of a single Porto Rican.

Now, Mr. Speaker, I wish here to state once more that I have no objection to any of the members of the executive council to-day as far as their personalities are concerned. They are a body of intelligent men, perfect gentlemen. That although I think that some of them are sometimes wrong in their policies toward the people of Porto Rico, even within the narrow limits of our organic act, yet I believe that they are honest.

So, Mr. Speaker, it may be said that we have to-day about as good a government as it could be expected under our political status, but, as I have often said, that status is entirely repugnant to the people of Porto Rico, and I wish here to solemnly protest before Congress and the American people of that feature of our organic act which makes the upper house appointed by the President and not elected by the people.

## MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment bill and joint resolution of the following titles:

H. R. 8727. An act for the relief of James W. Kenney and the Union Brewing Company; and

H. J. Res. 211. Joint resolution authorizing the transfer of the files, books, and pamphlets of the Industrial Commission.

The message also announced that the Senate had passed the following resolution:

*Resolved*, That the House of Representatives be requested to return to the Senate a bill (S. 171) for the relief of the Omaha National Bank, and that the same be referred to the Court of Claims in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, and generally known as the Tucker Act, and said court shall proceed with the same in accordance with the provisions of said act and report to the Senate in accordance therewith.

## ENROLLED BILLS SIGNED.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles; when the Speaker signed the same:

H. R. 22182. An act to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs;

H. R. 8727. An act for the relief of James W. Kenney and the Union Brewing Company;

H. J. Res. 211. Joint resolution authorizing the transfer of the files, books, and pamphlets of the Industrial Commission;

H. R. 25745. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 17415. An act to authorize the assignees of coal-land locations to make entry under the coal-land laws applicable to Alaska;

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy; and

H. R. 13304. An act to provide a suitable memorial to the memory of Christopher Columbus.

The SPEAKER announced his signature to enrolled bills of the following titles:

S. 1032. An act to aid in the erection of a statue of Commodore John D. Sloat, United States Navy, at Monterey, Cal.;

S. 8614. An act to amend an act entitled "An act to regulate the practice of medicine and surgery in the District of Columbia," approved June 3, 1896;

S. R. 29. Joint resolution authorizing the selection of a site and the erection of a pedestal for the Stephenson Grand Army memorial in Washington, D. C.;

S. 6447. An act to authorize the appointment of Acting Asst. Surg. George R. Plummer, United States Navy, as an assistant surgeon in the United States Navy;

S. 8012. An act to erect a monument on the Tippecanoe battle ground, in Tippecanoe County, Ind.;

S. 8568. An act granting an increase of pension to Rosanna A. May;

S. 8585. An act for the relief of Charles W. Spalding;

S. 8230. An act for the relief of Harold D. Childs;

S. 8292. An act providing for the completion by the Secretary of War of a monument to the memory of the American soldiers who fell in the battle of New Orleans at Chalmette, La., and making the necessary appropriation therefor;

S. R. 98. Joint resolution granting permission to Rear-Admiral B. H. McCalla to accept a medal from the King of Great Britain and the Order of the Red Eagle from the Emperor of Germany; and

S. 5133. An act to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

SENATE BILLS AND RESOLUTIONS REFERRED.

Under clause 2, Rule XXIV, Senate bills and resolutions of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

*Resolved*, That the Secretary be directed to return to the House of Representatives, in compliance with its request, the bill (H. R. 1050) for the relief of Edwin S. Hall—

to the Committee on Claims.

Also:

*Resolved*, That the House of Representatives be requested to return to the Senate a bill (S. 171) for the relief of the Omaha National Bank, and that the same be referred to the Court of Claims in pursuance of the provisions of an act entitled "An act to provide for the bringing of suits against the Government of the United States," approved March 3, 1887, and generally known as the "Tucker Act," and said court shall proceed with the same in accordance with the provisions of said act and report to the Senate in accordance therewith—

to the Committee on Claims.

S. 5684. An act for the relief of the Compañia de los Ferrocarriles de Puerto Rico—to the Committee on War Claims.

S. 8420. An act for the relief of the Mille Lac band of Chippewa Indians in the State of Minnesota, and for other purposes—to the Committee on Indian Affairs.

S. 6190. An act authorizing the Omaha tribe of Indians to submit claims to the Court of Claims—to the Committee on Indian Affairs.

S. 7929. An act to provide a temporary home for ex-Union soldiers and sailors in the District of Columbia—to the Committee on Military Affairs.

S. 8542. An act to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs—to the Committee on Private Land Claims.

S. 569. An act granting a pension to Edith A. Hawley—to the Committee on Pensions.

S. R. 95. Joint resolution relating to proceedings to set aside deeds alleged to have been made by Mexican Kickapoos—to the Committee on Indian Affairs.

S. 7845. An act granting a pension to Lola B. Hendershott and Louise Hendershott—to the Committee on Pensions.

S. 6175. An act granting an increase of pension to Neoline H. Ash—to the Committee on Pensions.

S. 1796. An act granting an increase of pension to Edith Burt Trout—to the Committee on Pensions.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. WACHTER, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 25851. An act making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1907, and for prior years, and for other purposes;

H. R. 25812. An act to authorize the Secretary of War to loan and deliver certain brass fieldpieces to the Valley Forge Park Commission of the State of Pennsylvania;

H. R. 24640. An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 25745. An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes;

H. R. 17415. An act to authorize the assignee of coal-land locations to make entry under the coal-land laws applicable to Alaska;

H. R. 13304. An act to provide a suitable memorial to the memory of Christopher Columbus;

H. R. 25883. An act to reinstate Leonard Martin Cox in the Corps of Civil Engineers of the Navy;

H. J. Res. 219. Joint resolution providing for an increase in the number of copies to be printed of the Annual Report of the Comptroller of the Currency;

H. J. Res. 229. Joint resolution to provide for the printing of 250,000 copies of the special report on the diseases of horses;

H. J. Res. 255. Joint resolution providing for the printing of 5,000 copies of House Document No. 651, Fifty-ninth Congress, second session;

H. J. Res. 256. Joint resolution authorizing the Attorney-General to print 850 copies of the Session Laws;

H. J. Res. 257. Joint resolution authorizing the Secretary of the Treasury to print 1,000 additional copies of the annual report of the Director of the Mint;

H. R. 25672. An act to amend an act entitled "An act to authorize the Ox Bow Power Company of South Dakota to construct a dam across the Missouri River;"

H. R. 8727. An act for the relief of James W. Kenney and the Union Brewing Company;

H. R. 22182. An act to authorize W. D. Clay and others to select lands in lieu of lands purchased by the father of said parties from the United States Government and lost by said heirs; and

H. J. Res. 211. Joint resolution authorizing the transfer of the files, books, and pamphlets of the Industrial Commission.

JOINT PRINTING COMMISSION.

The SPEAKER appointed as members of the Joint Printing Commission Mr. CHARLES B. LANDIS, Mr. PERKINS, and Mr. GRIGGS.

On motion of Mr. PAYNE, the House took a recess for fifteen minutes.

GEN. CHARLES H. GROSVENOR.

During the recess Mr. TAWNEY took the chair and called Members to order in convention.

The CHAIRMAN. The House is in recess, but I am requested to preserve order for a few moments. Just what the object of this convention is the Chair is not able to state, but he will recognize the gentleman from Washington [Mr. CUSHMAN].

Mr. CUSHMAN rose. [Applause.]

Mr. CUSHMAN. Mr. Chairman, I rise to a question of personal privilege. Indeed, sir, one of the highest privileges it has ever been my lot to enjoy.

By the grace and the courtesy of *all* my friends and colleagues *on both sides* of this Chamber I am commissioned for a few brief moments to perform in their behalf a most pleasant duty.

Sir, the clock is remorselessly ticking off the seconds, and but a few moments more and the great Fifty-ninth Congress will have passed into history.

And when the gavel falls some men who for years have been distinguished figures in this great House will walk forth from its walls into the sunlight of private life.

As between all the great men who are to-day retiring from this House it is neither necessary nor appropriate that I should attempt to draw any distinctions. I know of *no* man who has served in this House since I have been here whose career is not worthy of good words. I can look about me now and see dear and familiar faces that may not be seen in this Hall again. And among them all, thank God, I see the face of no enemy, but, on the contrary, I behold everywhere a vast legion of friends. [Applause.]

In the eight years that I have been a Member of this House the one thing that has been most deeply and profoundly impressed upon me is the splendid character of the matchless men whose accustomed habitat is this forum. [Applause.]

The friendships which we all make in this Chamber I regard as the most valuable and charming acquisition incident to a Congressional career.

And, sir, these splendid memories will probably constitute the only substantial and indestructible asset that most of us will carry back to the walks of private life when we go forth from this Hall forever. [Applause.]

I trust, sir, that I am not unfair to any other man in this vast body when I say that General GROSVENOR of Ohio [prolonged applause], whose term is about to expire, is one of the most distinguished men that has sat in this House in many years.

*Of* him and *to* him I am for a moment commissioned by his colleagues to speak.

He has served in this House for twenty years—almost continuously. He entered this body as a Member in 1885, more than twenty years ago. He is to-day one of the few but familiar figures in this body whose presence seems to link us with the mighty past.

In this House he has served with McKinley and Dingley and Reed, with Carlisle and Mills and Wilson and Springer, and a host of others who moved among the giants of those days.

Of the mighty contests that have taken place on this floor in the past twenty years he can truthfully say:

All of which I saw, and a part of which I was.

He has been a Member of this House under six different Speakers—two of them Democrats and four of them Republicans.

He has served in this House during part of seven successive Presidential terms and under five different Presidents. And I am violating no state secrets when I say that on this floor in recent years he has been the authorized spokesman for two great Presidents of the United States. [Applause.]

What a splendid record!

And now, at more than three score years and ten, we behold him with his mental powers matchless and unimpaired.

We, his Republican supporters on this side of the Chamber, know that he remembers everything that ever happened. [Laughter and applause.]

But, sir, his political opponents in this body pay to his marvelous memory even a higher tribute. CHAMP CLARK and JOHN SHARP WILLIAMS have frequently asserted that in great political emergencies of his party on this floor he has been able to remember things *that never happened at all.* [Great laughter.]

Sir, what a splendid thing it is to see preserved in one to such a great age a memory perfectly poised, entirely sound, and as accurate as the exigencies of the occasions will permit. [Renewed laughter.]

It was determined by the General's friends on this floor, on both sides of the Chamber, that his departure from this body under these circumstances ought not to be entirely unheralded.

By common consent it was agreed that some token, some testimonial, from all his friends on this floor ought to go with him into private life, to be a perpetual reminder to him of the years of his life spent here and the legion of friends he made here. [Applause.]

After it had been determined to procure some gift for him it was suggested that I should act in this matter as a sort of trustee for his friends and become the temporary repository of a fund created for this purpose.

And this experience, I can testify, was both a novel and refreshing one to me, because it is the first time within my recollection when my colleagues on this floor seemed determined to force money on *me.* [Laughter.]

[Turning toward Congressman GROSVENOR:] General GROSVENOR, the gift which your colleagues selected for you, and which they take pleasure in presenting to you to-day, now stands in yonder lobby.

It is a large mahogany chest filled with a splendid set of solid silver tableware, numbering more than 300 pieces; the pattern is an Old English design, but of American manufacture. [Applause.] Each piece in this set is engraved with an Old English "G," being the initial letter of your historic family. [Applause.]

Upon a silver plate upon the lid of this chest you will find engraved these words:

Presented to
HON. CHARLES H. GROSVENOR,
of Ohio,
by his friends and colleagues of
The National House of Representatives
of the Fifty-ninth Congress,
on March 4th, 1907,
as a token of their personal friendship and
esteem upon his retiring from Congress after
twenty years of conspicuous public service
for his State and Nation.

[Applause.]

And now, with but little of formality, but much of feeling, I deliver to you this gift from your colleagues.

This gift is not insignificant in financial worth, but it is chiefly to be treasured by reason of its associations and the generous impulse that gave it birth.

While it is not distinctly "nominated in the bond," I think I am justified in saying that the men who are bestowing this gift upon you, sir, have also had in mind your dear wife—the sharer of your joys and sorrows. It is the wish of all, sir, that you two may be spared for many years to come and that the use and possession of these articles may bring to you both many happy and historic memories. [Loud applause.]

Neither time nor propriety suggest that I should here attempt to name individually the men who are bestowing this gift upon you. It would virtually be a roll call of this House, and one of the few roll calls where everybody voted "aye." [Applause.]

But I may be pardoned for saying in passing that among those who by means of this beautiful gift wish to furnish to the General a lasting testimonial of their personal regard and esteem I might mention Speaker JOSEPH G. CANNON and JOHN SHARP WILLIAMS, SERENO E. PAYNE and DAVID A. DE ARMOND, JOHN DALZELL and CHAMP CLARK, JAMES A. TAWNEY and OSCAR W. UNDERWOOD, and all the rest of the membership of this great body, equally honorable and almost as distinguished. [Applause.]

It is pleasant to know—ah, yes; it is more than pleasant—it is an inspiration to realize that after all these years of strenuous struggles and bitter contests that one of the great leaders of *one side* of this House can march forth to private life bearing with him not only the respect but the *affection* of both sides of this the greatest legislative body on the planet. [Applause.]

In that sense, Mr. Chairman, this occasion is more than the mere presentation of a gift to a friend.

The nature of this ceremony makes it a tribute to the genius of our institutions and a testimonial to the high character of all the men who are gathered underneath this sunlit roof as the legislative agents of the leading civilized nation of the world. [Applause.]

In times of stress and mighty conflict in this Chamber General GROSVENOR has always been in the forefront of the Republican column—on the firing line, so to speak—

And his old white head shone afar
Like the crested plume of the brave Navarre.

And the Protestant chivalry of France on the embattled plains of Ivry never pressed closer upon the snow-white crest of their best-beloved king than the Republican hosts of this House have followed the lead of that old white head. [Loud applause.]

General GROSVENOR retires from the service of his country poor—poor in finance, I mean. And what a tribute that is to his honor! In the sweep of these mighty years in which he has been a central figure and leading factor mighty fortunes have been amassed by lesser men; but he has given his mental powers and his physical strength to his country.

Poor indeed in finance, but immeasurably rich in a wealth of nobler things—a wealth that rust can never reach and time will never tarnish. [Prolonged applause on the floor of the House and in the galleries.]

Mr. CLARK of Missouri. Mr. Chairman, next to the consoling consciousness of serving one's country well, the most valuable portion of a Congressional life is the forming of pleasant personal associations. It is said that an open confession is good for the soul. Before I came hither I had certain favorites in Congress, and there were certain men here whom I had picked out to dislike. I confess that I entered Congress with a deep-seated prejudice against General GROSVENOR, of Ohio. He was eternally skinning Democrats, and I am not enamored of that sort of a man generally. [Laughter.] But watching him and listening to him, I first came to admire his ability, and after a while I came to feel for him a deep personal, filial affection. [Applause.] The House of Representatives is the most splendid arena for mental pugilism in the world. Its membership, for the purposes of speechmaking, may be roughly divided into three classes—men who can make good set speeches only, men who can take care of themselves in running-fire debate only, and the third class, the few men who can make good set speeches and also take care of themselves in the running-fire debates. The third class come to be the top-notchers in this House, and General GROSVENOR undoubtedly belongs to that class. [Applause.]

I suppose, one way and another, I have had as many debates with him as any living man—some of them here, a great many of them not here. Maj. Joe Bagstock described himself as "Sly, sir—devilish sly; tough, sir—devilish tough." I transfer that description to General GROSVENOR as a debater. [Laughter and applause.] It fits him like a glove. If he has ever refused to meet any comers, or all comers, I have failed to observe it, and only once did I ever see him strike below the belt.

Mr. OLMSTED. When did he hit you?

Mr. CLARK of Missouri. He did not hit me then. Mr. Chairman, twenty years is a long time for a man to serve in this

House. It is really the best part of his life, because it is the prime of his life.

Sometimes when people get mad at the House and have nothing to say specifically bad they lump us all off as a lot of ignoramuses. That is not true at all. The men who rise to high positions here would have achieved eminent success in almost any department of human endeavor. There is another thing about speech making here. The two words in the English language that are used most loosely and most abused are the words "oratory" and "eloquence." Every man who can stand up and speak in public is dubbed an orator. Oratory is one of the rarest qualities known among men. A debater is essentially different from an orator. A man may be both. He is lucky if he is either. General GROSVENOR is not an orator. Once in a while I have heard him rise temporarily to what might be called eloquence, but as a steady all-around debater I give it as my opinion that he has not had a superior in this body since I have been here. [Applause.] There are strong debaters on this side of the House, but I am not talking about them now. There are other men on the other side of the Chamber who hit as hard sometimes as General GROSVENOR does, but to scare them up out of the brush, to meet us Democrats in debate on everything the Republicans ever did or are doing or have any idea of doing, he tops them all. [Applause.]

It is strange and intensely interesting to watch the ebb and flow of individual popularity in this body. I believe it is true that eight years ago the present Speaker of this House could not have been elected Speaker to save his soul. He had thumped and skinned and pummeled too many men. He had killed too many bills, both for Democrats and Republicans, while chairman of the great Committee on Appropriations; and yet the time has come when he is an exceedingly popular man on both sides of this Chamber. [Applause.] He is our "Uncle Joe," closing his second term in the second greatest office in our governmental system, and destined for a third term. When I came here the nearly universal sentiment among Democrats on the floor was one of dislike for General GROSVENOR, and yet I have seen him grow into an extraordinary measure of popularity. He has inflicted wounds on many of us, and we have paid him back in kind; but these wounds do not fester. They are reminders of battles royal hot at the time, but pleasant in the retrospect. He goes out. Whether he will return, I do not know; but if the district is to send a Republican here any more I hope he will come back. [Applause.] My friend "the Abraham Lincoln of the Pacific coast" [Mr. CUSHMAN] [applause] has referred to the fact that though General GROSVENOR has passed the Psalmist's allotment of three-score years and ten, he is still strong and dangerous in a fight, and I join in the sentiment—and so do all of us over here who have tussled with him—that his strength has not abated by reason of his years. He goes forth 73 years of age. I hope he and his estimable wife will live many, many happy years yet, until—

> Old age serene and bright,
> And lovely as a Lapland night,
> Shall lead them to the grave.

[Loud applause.]

Mr. WILLIAMS rose amid great applause.

Mr. WILLIAMS. Mr. Chairman, it is said that an Irishman once carried to a chicken fight a drake upon his arm and insisted upon entering him in the lists, and to the objection that it was not a chicken the Irishman replied: "I don't know anything about thot, but if you will let him into the fight he will bate all of thim, and all the divilment in the world can not thrip him." If I were to characterize the gentleman from Ohio as a participant in what we call in a Pickwickian sense the "deliberations" of this body [laughter], if I were to characterize his performances upon this floor, I would say he was like the Irishman's drake. [Laughter.] For a long time we have tried to "thrip" him and find "it takes all the divilment in the world" to do it. One strength of the gentleman upon his feet is that when he makes an argument upon the assumption of the existence of a fact and is convinced during the course of the argument that the fact does not exist, he can argue on just as well. [Applause and laughter.]

Mr. Chairman, it is needless for me to say that in a certain sense this side of the Chamber rejoices in celebrating the retirement from public life of the gentleman from Ohio [laughter], though a great regret that we have in connection with it in some of our moods is that in private life he will have more time to "figure" than he has had in public life. [Laughter.] The mathematics of the gentleman from Ohio are very much like the Scriptural definition of man, "fearfully and wonderfully made," and yet such has been the uniform good luck of the Republican party and the uniform bad luck of the Democratic party that sometimes his figures have actually approximated correct results. [Laughter.]

Mr. Chairman, men are carpenters, blacksmiths, lawyers, dentists, politicians, Presbyterians, Methodists, Democrats, Republicans, but under all of the outside and secondary things that a man is is the man himself—the human animal.

I have been here a long time, and when I came there were two or three bêtes noires, to my imagination, on that side of the Chamber. One of them was the gentleman from Ohio. I have learned to know this: That he knows how to give and he knows how to take. I like that in a man. He has stood aggressively, constantly, valiantly, and sometimes bitterly, sometimes with vitriol on his tongue, in behalf of his party organization and his ideas of administration and government. But, that all left out of consideration, when you come down to the man under it all he has been kind-hearted, accommodating, and always anxious to do what he could to make the pathway of any man here on either side smooth for him. [Applause.] In all the little matters of local legislation pertaining to one's district he has perhaps extended more aid from that side of the Chamber to men on this side of the Chamber than anybody else. [Applause.]

Of course I do not like his politics, and of course I have had much to say about his politics in the past, and he and I have had our bouts, but with all that there has never been a time when I could not go to him and ask as a personal favor that some liberty be extended to some Member upon this side, and that he use his influence on that side to have it extended, that he has not responded. [Applause.]

We can well, simply as men, regardless of political opinions, regardless of our past turmoils, join heartily and sincerely in presenting to him this testimonial of his colleagues of the feelings which they entertain for him. [Prolonged applause.]

The CHAIRMAN. The gentleman from Iowa [Mr. LACEY] is recognized for a few minutes. [Applause.]

Mr. LACEY. Mr. Chairman, I know that it will be some satisfaction to my colleagues in this House to know that when General GROSVENOR goes into the cold outside world he will have somebody along with him to see that he is properly taken care of. [Laughter.]

A few years ago, when the McKinley statistics were coming in, our friend got the sobriquet of "Old Figgers." I went home on a visit about that time and one of my friends came to me and said: "I want you to carry my regards to that Ohio man, Mr. GROSS-VENOR." I said to him: "That is not his correct name; the letter 's' in his name is silent." Said he: "I did not suppose that anything about him was ever silent." [Laughter.]

In the Fifty-first Congress I became associated with our friend, and whenever anything was needed out in the district in which I have been struggling for so many years, whenever we were in a close place, we always called upon General GROSVENOR, and, unlike my friend the leader on the Democratic side, if there is anything I do like about General GROSVENOR more than anything else, it is his politics; and he never has disguised them. And that is one of the things that makes the Members on the other side of the Hall regard him so kindly, because he is a foeman worthy of any man's steel.

In bidding him good-by in this Congress, after so many years of service, I know I speak for those that are going out as well as those that remain that he and his good wife will carry to Athens not only a new post-office building, but the good wishes of every man that has ever been associated with him in this body. [Loud applause.]

Mr. GROSVENOR. Mr. CUSHMAN, and you, Mr. CLARK, Mr. WILLIAMS, and Mr. LACEY, and you, my colleagues of the House of Representatives, I imagine that by the time I close these few remarks there will be a strong suspicion in the minds of the listeners unacquainted with me that the good words that have been spoken of me as a speaker will be cast aside and classed as doubtful of accuracy. But before I proceed I wish to thank the distinguished and eloquent gentleman from Washington [Mr. CUSHMAN] for the words he has used and the appreciation he has manifested. I never felt more embarrassed than I do at this moment and I never felt less equipped for an occasion of the kind than I do at this time. But to say that I am not interested and that I am not deeply grateful and very proud of the occasion and the surroundings would be to manifest a lack of the ordinary sensibilities of mankind; and yet to attempt to respond in fitting and adequate words under the circumstances is beyond my capacity.

The gentleman from Washington [Mr. CUSHMAN], who spoke so interestingly of the years of my service and the men with whom I have served, brought before me a brilliant panorama of the twenty years of my service in the House of Representatives.

I came to the House of Representatives with more or less of

that feeling that grows up in the country by reason of political contention and political asperity. At the end of twenty years I feel very free to say that there is more of good fellowship, more of good, honest Americanism, more of the real principles of philanthropy and generosity embodied in the membership of the House of Representatives than in any other equal number of men in the world. [Applause.]

The gentleman from Mississippi [Mr. WILLIAMS] said that I had been not only willing to give, but willing to take. I think that is one of the cardinal principles involved in a true system of debate in the House of Representatives. The man who assails the minority, or the other side of the House, as the case may be, and can not take that which follows ought not to make the assault; and sometimes I have felt as I emerged from the contest that I really wished that I had been more considerate and less hasty in making the assault. [Laughter.]

Coming rapidly to the end of the very few remarks that I must make, for I am reminded of the lapse of time and the importance of some things ahead of us, I have never received a blow from the weapons of the enemy on this floor that I did not appreciate as due under all the circumstances. [Laughter.] Ordinary, commonplace debate has no great merit in the House of Representatives, and the Democrat who can not say something severe about the Republican side of this House occasionally does not measure up to the standard he is required to measure up to. [Laughter and applause.] And the Republican that does not answer back, or even make the first aggression against the Democratic party, falls short of his duty to his country. [Renewed laughter and applause.] If I had time, I would run over rapidly and briefly the great men with whom I have served in Congress, and under whose training, as it were, I have lived and developed whatever has come to my credit.

I have served, as it is said, under five Speakers of the House, and I want to say this as I go out. I have served under two Democrats and three Republican Speakers. I have no recollection that on any occasion any one of those distinguished men ever did anything unfair in any ruling, in deciding any question, or in any other way fell below the standard of a judicial officer of a legislative body. [Applause.] I served first under Mr. Carlisle, able, eloquent, great lawyer, profound statesman; but no fairer man ever sat in the chair of the Speaker of the House of Representatives. Absolute justice was the watchword of his administration. Then came Crisp, genial, gentle, lovable, kind, vigorous, and strong, especially honest, equally upright. And then Tom Reed, who has made a mark upon the legislative history of the country that will never be obliterated. Then David B. Henderson, lovable, eloquent, genial, fair, just; and then the Speaker of the House to-day, with more knowledge of the legislation of the country, more knowledge of its wants, its growth, its development, than any other living man of the American people. [Loud applause.] Fair, just, prompt, energetic, one of the very best men in social life that I know; and it would be strange if a body of men presided over by these five great men should fall short of measuring up to the duty that they owe the American people. Have they measured up? I unhesitatingly say yes. I could recapitulate the great men who have appeared upon this floor; but no better class of men from the standpoint of true Americanism was ever here than are here to-day. Therefore, the pride which I feel at the kind good-by I am receiving is enhanced by the fact that I know it comes from men who are just and honest in their expressions of opinion, and so I thank you one and all.

The gentleman from Mississippi, the leader of the minority, has spoken with candor and justice, I hope. I want to say of him that I never asked him for an accommodation that did not interfere with the programme that he had marked out to pursue and that he had assumed that he did not always yield; and so I can say of the gentleman from Missouri [Mr. CLARK]. Each in his individual way and position has worthily stood by the interests of his party, but each has been at all times a gentleman and a fair-minded American citizen.

I came here with a better opinion of the distinguished gentleman from Missouri [Mr. CLARK] than he seems to have formed in advance of the gentleman from Ohio. [Laughter.] I have had an opportunity to study him with a great deal of interest on a great many occasions, and I want to return to him my statement that I have never known a man in public life, much less a Democrat in public life, for whom I had higher regard than I have for the gentleman from Missouri. [Applause.] I have long hoped that I might live to see him a Republican. [Laughter.] I have given him every opportunity to abandon the bad politics of his party, but I announce now to those whom I am leaving behind me that unless your efforts can be more efficacious than mine have been you had better not exert them in that direction. He is a hopeless case. And I want to say, repeating here what I said the other day in a general way to the Democrats on that side of the House, my friend from Missouri is having a hard time. I sympathize very warmly with them. He is a Democrat. He was born a Democrat, he was educated a Democrat, and he is a Democrat now, and the struggle of his life is to remain a Democrat and be a member of the Democratic party. [Laughter.]

Now, what can I say further? I shall go out of this House with the fondest recollections of all of you. I want to say what may seem a little strange perhaps, in view of the knowledge of some of us of what has been going on, that there is not a man in this House, there is not a Member of this House nor an officer nor an employee for whom I do not feel the strongest kind of affection. There is not anywhere in my heart one spot of bitterness toward a single Member of the House of Representatives. [Applause.]

The time is up, Mr. Chairman. I invoke for all of you, I hope for you all the best things that Providence can give to mortal man. [Applause.]

The recess having expired, the House resumed its session.

### HENRY P. M'LEAN.

By unanimous consent, at the request of Mr. BROOKS of Colorado, leave was granted to withdraw from the files of the House, without leaving copies, the papers in the case of the bill (H. R. 400) for the relief of Henry P. McLean, no adverse report having been made thereon.

### PROCEEDINGS DURING THE RECESS.

Mr. KEIFER. Mr. Speaker, I move that the remarks made on the proceedings had in relation to General GROSVENOR during the recess just closed be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PARKINSON, its reading clerk, announced that the Senate had passed without amendment the following resolutions:

*Resolved by the House of Representatives (the Senate concurring)*, That in enrolling the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon, the enrolling clerk be directed to correct the engrossed amendment of the House to the Senate bill by striking out all after the word "*Provided*," in section 2 of said amendment, and inserting "That no operator, train dispatcher, or other employee who by the use of the telegraph or telephone dispatches, reports, transmits, receives, or delivers orders pertaining to or affecting train movements shall be required or permitted to be or remain on duty for a longer period than nine hours in any twenty-four-hour period in all towers, offices, places, and stations continuously operated night and day, nor for a longer period than thirteen hours in all towers, offices, places, and stations operated only during the daytime, except in case of emergency, when the employees named in this proviso may be permitted to be and remain on duty for four additional hours, in a twenty-four-hour period on not exceeding three days in any week."

Also—

That a committee of two Senators be appointed by the President to join a similar committee appointed by the House of Representatives to wait upon the President of the United States and inform him that the two Houses, having completed the business of the present session, are ready to adjourn unless the President has some other communication to make to them.

And that the Vice-President had appointed Mr. HALE and Mr. PETTUS members of the committee on the part of the Senate.

### COMMITTEE TO WAIT UPON THE PRESIDENT.

Mr. PAYNE. Mr. Speaker, I submit the following resolution.

The Clerk read as follows:

*Resolved*, That a committee of three Members be appointed by the Speaker to join a similar committee appointed by the Senate to wait upon the President of the United States and inform him that the two Houses have completed the business of the present session and are ready to adjourn unless the President has some other communication to make to them.

The resolution was agreed to.

The SPEAKER pro tempore (Mr. CLARK of Missouri) appointed as the committee under the resolution just adopted Mr. PAYNE, Mr. DALZELL, and Mr. DE ARMOND.

### THANKS TO THE SPEAKER.

Mr. CLARK of Missouri took the chair as Speaker pro tempore.

Mr. WILLIAMS. Mr. Speaker, another Congress is about to pass into history. It has been an important and in some senses an epoch-making Congress. It has been presided over by one who has presided over a previous Congress of the United

States. It has been a Congress characterized to a large extent by communications from the other end of the Avenue. Mr. Speaker, I read this morning in the Post a paragraph saying that "a number of Senators and Congressmen are going to leave town this week, feeling that they have wasted a great deal of good advice" on the other end of Pennsylvania avenue. There is a compensation for it all. A good deal of good advice has been wasted by the other end of the Avenue on Congress. [Laughter.] But if I had to express a deeper regret it would be for the fact that so much really good advice from the minority side has been wasted upon the majority side of this House. [Laughter.]

Mr. Speaker, there is no place in the world, as far as I know, where a man finds his true level, either rises to it or sinks to it, as quickly and as inevitably as in the House of Representatives. The House puts up with no shams. It wants the real thing. A genuine man may be wrong, but he always has the respect and the confidence of his fellow-men whether he is wrong or whether he is right. Nothing more genuine was ever built by the Almighty than the Speaker of the House of Representatives. [Applause.] He is nearly always wrong [laughter], but there is no sham about him, there is no pretense, there is no hypocrisy. He is just simply plain JOE CANNON, characteristically American, characteristically western, and characteristically southern, for some of his old blood came from there. [Applause.]

Mr. Speaker, he is an integer, one thing; therefore he has integrity, intellectual and moral; he is an integer and not duplex, not double dealing. His integrity is virile, his common sense is virile, his good humor is constant. If it were left to me and we had to have a Republican Speaker of the House, I should vote unhesitatingly for "Uncle JOE." [Applause.] I should do it on the ground that he is not any worse than the balance of you and very much more open about it. [Laughter and applause.] I have just resisted a great temptation. A friend of mine came to me and asked me to word the usual resolution in an unusual way. He told me to thank the Speaker for "the active, energetic, and gesticulatory" manner in which he had presided over the sessions of the House, and you may imagine, those of you who know my temperament, the effort it took to resist that temptation; but instead of that I offer the following resolution:

*Resolved*, That the thanks of the Fifty-ninth Congress are due to the Hon. JOSEPH G. CANNON, its honored and distinguished Speaker, for the intelligent, constant, and impartial manner in which he has presided over its important deliberations.

[Applause.]

The SPEAKER pro tempore. The question is on agreeing to the resolution.

The question was taken; and the resolution was unanimously agreed to.

The SPEAKER pro tempore. The Chair appoints the gentleman from Mississippi, Mr. WILLIAMS; the gentleman from Pennsylvania, Mr. DALZELL, and the gentleman from Minnesota, Mr. TAWNEY, to wait upon the Speaker and inform him of the action of the House and bring him in. [Laughter.]

The committee subsequently appeared accompanied by the Speaker, who resumed the chair.

Mr. WILLIAMS. Gentlemen of the Fifty-ninth Congress, in obedience to your instructions, we have "brought him in." [Laughter.]

The SPEAKER. Word has been received from the Senate that what is known as the "sixteen-hour bill" has not been enrolled, and the Chair would suggest that the House take a recess for fifteen minutes. Without objection, the House will stand in recess for fifteen minutes.

There was no objection.

AFTER THE RECESS.

The recess having expired, the Speaker resumed the chair.

REPORT OF COMMITTEE TO WAIT ON THE PRESIDENT.

The committee appointed to wait upon the President, Mr. PAYNE, Mr. DALZELL, and Mr. DE ARMOND, appeared at the bar of the House.

Mr. PAYNE. Mr. Speaker, the committee appointed by the Speaker to join a like committee on the part of the Senate to wait upon the President of the United States and inform him that the Houses have completed their business and are ready to adjourn, and to ask him if he had any further communication to make, report that they have performed the duty and that the President commends Congress for the good legislation which it has accomplished during the session, and said that he had no further communications to make. [Applause.]

The SPEAKER. Without objection, the House will stand in recess until 3 minutes of 12 o'clock. The Chair hears no objection.

The recess having expired, the House was called to order by the Speaker.

The SPEAKER. I thank you, gentlemen, for your kindness in the deeds and the words of this day; but even more cordially do I thank you for your unwearying and constant friendship during every one of the laborious and eventful days of the Fifty-ninth Congress. Some Congresses have done their work under the stress of national trial and even of national disaster; it has been our good fortune to do our work in a period of prosperity so abounding as to surpass all the imaginings of the past. The statesmen of the days of stress will always have first place in the affections of the people, and rightly so; but the men who with loyalty and devotion strive to keep a mighty nation in the pathway of prudence and common sense while prosperity abounds on every corner have troubles not always understood or sympathized with by the people, but which you well know of. In the two years now closed—years eventful in the precedents set in these legislative halls and, we hope and believe, eventful for the good that may come to the people therefrom—your fidelity to your own duty and your intelligent appreciation of my duty, even when it has crossed some of your cherished purposes, have been my constant encouragement and support. In bidding you farewell I wish to express to you my appreciation of this, and to wish you in the future all success and all usefulness in your chosen walks of life.

And now, in pursuance of the requirements of the Constitution, I declare the House of Representatives of the Fifty-ninth Congress adjourned without day.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several Calendars therein named, as follows:

Mr. McCLEARY of Minnesota, from the Committee on the Library, to which was referred the bill of the House (H. R. 20337) for the erection of a monument to the memory of John Ericsson, reported the same without amendment, accompanied by a report (No. 8172); which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. BURTON of Ohio, from a special committee, submitted a report on the delay in the completion of the lock at Plaquemine, La. (No. 8171); which said report was referred to the House Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bill and memorials of the following titles were introduced and severally referred as follows:

By Mr. BURLESON: A bill (H. R. 25892) pensioning the surviving officers and enlisted men of the Texas volunteers employed in the defense of the frontier of that State against Mexican marauders and Indian depredations from 1855 to 1860, inclusive, and for other purposes—to the Committee on Pensions.

By Mr. MARSHALL: Memorial of the legislature of North Dakota, asking Congress for a constitutional amendment to prohibit polygamy and secure uniform divorce laws—to the Committee on the Judiciary.

By Mr. CHAPMAN: Memorial of the legislature of Illinois, for the relief of Maj. Joseph W. Wham, United States Army—to the Committee on Military Affairs.

## PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills of the following titles were introduced and severally referred as follows:

By Mr. BENNET of New York: A bill (H. R. 25893) granting an increase of pension to Robert Brown—to the Committee on Invalid Pensions.

By Mr. BRUNDIDGE: A bill (H. R. 25894) granting a pension to Calvin B. Chamness—to the Committee on Invalid Pensions.

By Mr. HUFF: A bill (H. R. 25895) granting an increase of pension to John V. S. Minerd—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25896) granting an increase of pension to Samuel Burkhart—to the Committee on Invalid Pensions.

Also, a bill (H. R. 25897) granting an increase of pension to Henry M. Neighly—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BENNET of New York: Paper to accompany bill for relief of Robert Brown—to the Committee on Invalid Pensions.

By Mr. BURTON of Ohio: Petition of Forest City Legion, No. 809, against the bill to codify the laws relating to second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. GRAHAM: Petition of Allegheny Court, No. 2, Tribe of Ben Hur, against bill H. R. 608—to the Committee on the Post-Office and Post-Roads.

By Mr. HUFF: Papers to accompany bills for relief of Samuel Burkhart, Henry M. Neighly, and John V. S. Minerd—to the Committee on Invalid Pensions.

By Mr. KNAPP: Petition of Legion No. 1233, against the bill to codify the statutes relating to the classification of second-class matter—to the Committee on the Post-Office and Post-Roads.

By Mr. LITTAUER: Petition of Waterford Legion, No. 880, against the passage of the bill to amend and codify the laws relating to second-class matter—to the Committee on the Post-Office and Post-Roads.

By Mr. SCHNEEBELI: Petition of the National Convention for the Extension of the Foreign Commerce of the United States, for a dual tariff—to the Committee on Ways and Means.

By Mr. SHERMAN: Petition of Legion No. 715, against the bill to codify and amend the statutes relating to the classification of second-class mail matter—to the Committee on the Post-Office and Post-Roads.

By Mr. SPARKMAN: Petition of the Florida State Board of Trade, for resolutions by Congress for an investigation of the manner in which peonage prosecutions are now being conducted in the South, the amount of funds being expended in this way, etc.—to the Committee on Labor.

By Mr. WOOD: Petition of Trenton Division, No. 85, Order of Railway Telegraphers; H. G. Coates, N. T. Bryson, and T. J. Callahan, for bill limiting hours of telegraph operators—to the Committee on Labor.

# APPENDIX.

APPENDIX

TO THE

CONGRESSIONAL RECORD.

## Keeping Within Our Income.

**Review of Appropriations Authorized by the Last Session of the Fifty-ninth Congress.**

**All Legitimate Needs of the Public Service Carefully and Adequately Provided for, at the Same Time Keeping within the Estimated Revenues by the Safe Margin of $20,000,000.**

SPEECH

OF

## HON. JAMES A. TAWNEY,

OF MINNESOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, March 4, 1907.*

The House having under consideration the general subject of appropriations—

Mr. TAWNEY said:

Mr. SPEAKER: This has been in many respects a remarkable session of Congress. It has been a remarkable session with respect to the importance of the national legislation that has been enacted, but it has been more especially remarkable in the authorizations and proposed authorizations of new services and increased appropriations for existing services. The proposed appropriations were perhaps larger than in any previous session.

These prospective obligations upon the revenues of the Government for the fiscal year 1908 were so enormous that a few weeks ago I thought it my duty to present to the House a statement of the estimates submitted by the Departments at the beginning of this session and a statement of the amounts proposed to be appropriated from the Federal Treasury under the various bills introduced, which had passed one or other of the two Houses or had passed both Houses and become law, imposing additional obligations upon the Treasury and upon the revenues of the Government during the next fiscal year.

At that time, Mr. Speaker, and in view of the prospective result of this session, I took occasion to appeal to my associates on the floor of the House to do all that could possibly be done to eliminate all unnecessary expenditures and all unnecessary authorizations of appropriations, with the hope that the condition then presented to Congress and the country might not be the actual condition presented to-day, at the close of this last session of the Fifty-ninth Congress. It is very gratifying for me to be able to say that, as a result of the work that has been done, by this body especially, with some aid from the other end of the Capitol, we have been able to reduce very materially the appropriations that were then pending, the magnitude of which at that time gave promise of far exceeding the estimated revenues of the fiscal year 1908.

I am glad, therefore, to say, Mr. Speaker, that the House is to be congratulated upon the result which I am able at this time to present in this, the closing hour of one of the greatest sessions of Congress in the history of the Republic. By careful scrutiny, hard work, and persistent effort on the part of the conference committees and the individual members of this House we are able to close this session to-day and send to the country the statement that the aggregate appropriations made by the Fifty-ninth Congress at this, the last session, chargeable upon the revenues of the Government for the fiscal year 1908, will be approximately $20,000,000 less than the estimated revenues for that year. [Prolonged applause on the Republican side.]

The total appropriations made at the present session of Congress aggregate apparently $919,948,679.63, which sum includes $756,622,674.27 for the annual expenditures of the Government for the ensuing fiscal year of 1908, $12,439,685.36 for emergencies and deficiencies on account of the fiscal year 1907 and prior years, $1,000,000 for miscellaneous objects, such as private claims and the like, authorized in special acts, and $149,886,320 for permanent annual appropriations to meet the interest charge on the public debt, the requirements of the sinking fund, expenses of collecting the revenue from customs, redemption of national bank notes, and other purposes.

In order to determine how much of this apparent grand total of appropriations made at this session is on account of operations of the Government for the fiscal year of 1908, and that will be a charge against the revenues of that year, there must be deducted from the permanent appropriations the sum of $20,000,000, estimated as necessary to redeem national bank notes, the deposits made by the banks for that purpose not being treated as a part of the revenues of the Government, and the sum of $57,000,000, estimated to be the amount of the sinking fund requirements for 1908, as it is purely optional with the Secretary of the Treasury how much of the surplus moneys in the Treasury shall be applied to this purpose, and also because the requirements of the sinking fund have already been anticipated or exceeded by an amount considerably in excess of the requirements for next year; also the amount ($12,439,685.36) appropriated for emergencies and deficiencies on account of the current and prior fiscal years, the same being payable from moneys already in the Treasury or out of revenues for the balance of the current fiscal year, and the sum of $1,000,000 estimated for miscellaneous objects, including private claims and other matters of like character that have gone through in special bills, and which are payable prior to the beginning of the next fiscal year.

Mr. LITTLEFIELD rose.

Mr. TAWNEY. I now yield to the gentleman from Maine.

Mr. LITTLEFIELD. I want to inquire of the chairman of the committee whether he understands it is optional with the Secretary of the Treasury as to whether he uses the fifty-seven millions in the sinking fund?

Mr. TAWNEY. It is.

Mr. LITTLEFIELD. Will the gentleman be kind enough to put in his remarks, so it will appear in the RECORD, the law upon which he bases that statement?

Mr. TAWNEY. In that connection I will quote from an annual report of a recent Secretary of the Treasury:

> The act of February 25, 1862, section 5 (12 Stat., 346), provides that all duties on imported goods shall be paid in coin, and that the coin so paid shall be set apart as a special fund and applied, first, to the payment of interest on bonds and notes of the United States; and, second, "to the purchase or payment of 1 per cent of the entire debt of the United States, to be made within each fiscal year after the 1st day of July, 1862, which is to be set apart as a sinking fund, and the interest of which shall in like manner be applied to the purchase or payment of the public debt, as the Secretary of the Treasury shall from time to time direct."

The amounts mentioned aggregate $90,439,685.36, and when deducted from the total appropriations of $919,948,679.63 leaves $829,508,994.27 as probable necessary expenditures for 1908 authorized at this session.

The total revenues of the Government for 1908, according to the best information available, will be as follows:

| | |
|---|---|
| Ordinary revenues from customs, internal revenue, etc., on basis of actual and estimated increase for 1907 over 1906 | $654,000,000 |
| Postal receipts, actual and estimated, for 1907 plus 8 per cent estimated increase for 1908 | 196,000,000 |
| Total | 850,000,000 |

The accompanying chronological history of the appropriation bills, which I wish to submit to the House and have printed as a part of my remarks, affords an interesting study of the subject of Congressional appropriations. In the first column it shows by title of bills and in the aggregate the total amount of recommendations for appropriations which have been requested of Congress by the Executive Departments; the amount of such requisitions that, after careful study on the part of the several committees of the House, was recommended to be appropriated; the amounts passed in the several bills by the House of Representatives; the amounts recommended by the

Senate committees; the amounts passed by the Senate, and finally, the amounts of each of the appropriation acts and their aggregate as they have been enacted.

A further examination of the history of the appropriation bills shows that the estimates under the thirteen regular annual bills were reduced by committee recommendations and by the House itself more than $23,000,000; that the bills as passed by the House were increased on the recommendation of the committees of the Senate and by the Senate in their passage more than $50,000,000.

It is but fair to say that of the total increases made by the Senate in the appropriation bills about $6,000,000 was on account of the law passed at this session increasing the Artillery Corps of the Army, and $8,000,000 was on account of the passage of the new pension law; or, in other words, the Senate piled up the amounts carried by the several regular annual supply bills over and above the two imperative sums named more than $36,000,000; and that the total of the thirteen bills as finally enacted shows a reduction of $16,404,673.40 under their aggregate as passed by the Senate. It will also be observed in examining the table that at the preceding session of Congress no River and Harbor appropriation bill was passed. While at this session we have a River and Harbor improvement act, appropriating specifically $37,183,093 and authorizing in addition thereto contracts requiring in the near future appropriations of nearly $50,000,000, the two sums exceed considerably the whole excess of this session's appropriations over the appropriatioins of last session.

Mr. Speaker, in submitting this statement I want also to call attention to another fact in connection with public expenditures—a fact that is a matter of some satisfaction to the Committee on Appropriations, and which doubtless will be so to the House. Prior to the beginning of the present Congress it was the common practice of the Executive Departments here in Washington to govern their expenditures by the amounts estimated for the service of their respective Departments, regardless of the amounts appropriated for that service. This practice had become so universal that in each session of Congress almost every Executive Department or other governmental establishment here at the seat of government would submit to Congress estimates to cover the deficiencies in the appropriations made for the service of their respective Departments. Following this long-continued practice, acquiesced in by Congress, the Departments reached the conclusion that they, and not Congress, were vested with the power of fixing the standard of public expenditures. Heretofore it was the common practice of heads of some of the Departments, in submitting these deficiency estimates, to declare that they had estimated so much for their services and Congress had appropriated only so much; that the difference between their estimate and the amount of the appropriation was the amount of their deficiency, and that the reason for the deficiency was the failure on the part of Congress to appropriate the amounts asked for. In the Fifty-eighth Congress the Committee on Appropriations recommended to the House and Congress adopted a provision on the urgent deficiency appropriation bill which it was believed would put an end to this practice. That provision required the heads of the Departments to apportion their several appropriations by monthly, quarterly, or other allotments for the entire fiscal year, so as to avoid creating a deficiency. It further provided that such apportionment, when made, should not be waived except by the head of a Department, and then only in writing, stating the reasons therefor. It was soon discovered by the bureau chiefs and the heads of Departments that this provision restricted the bureaus or the Departments only to the extent that those in charge thereof were unwilling to assign reasons for the waiver of the apportionment.

Therefore, at the beginning of the present Congress we were again confronted with large deficiencies. During the first session of this Congress the Committee on Appropriations recommended an amendment to the law referred to requiring the same apportionment of the appropriations for the various branches of the public service, but requiring also that this apportionment when made can not be waived "except upon the happening of some extrarordinary emergency or other unusual circumstance which could not be reasonably anticipated at the time of making such apportionment." The penalties which were imposed for the violation of this law have had a very wholesome effect. This law has resulted in conveying to the Executive Departments of the Government knowledge of the fact that the Congress of the United States and not the Departments must fix the standards of public expenditure, and that when the appropriations are made for the public service they can not be exceeded by the Departments except upon the happening of that which could not reasonably be anticipated either by Congress or the Departments.

The result, as we have seen it during this session, is beneficial, not only in curtailing public expenditures, but especially in restoring to Congress its power and the exercise of its power in the regulation of public expenditures; and it has instilled into the heads of the Departments that respect which the Departments should at all times entertain for the Congress of the United States. Under the operation of this law the deficiencies appropriated for during this session of Congress, outside of those made necessary by emergencies that could not be anticipated when the appropriations were made at the last session, did not exceed $3,000,000, whereas in previous sessions they have reached the enormous sum of $35,000,000.

Now, Mr. Speaker, in conclusion, I respectfully repeat that in view of the splendid showing which we are enabled to present to the country at the close of this session, notwithstanding the dark and gloomy prospects of three weeks ago—in view of the reduction made by the committees of this House in the estimates submitted to Congress by the Departments and of the reduction of the amounts finally appropriated in the thirteen appropriation bills below the amounts carried by them when they came back to the House from the Senate—I respectfully submit that the House of Representatives of the Fifty-ninth Congress is entitled to the commendation and congratulation of the American people for having thus guarded their interests in the authorization of expenditures of public money from the Federal Treasury. [Prolonged and enthusiastic applause.]

*Chronological history of appropriation bills, second session of the Fifty-ninth Congress; estimates and appropriations for the fiscal year 1907-8; and appropriations for the fiscal year 1906-7.*

[Prepared by the clerks to the Committees on Appropriations of the Senate and House of Representatives.]

[a] One-half of the amounts for the District of Columbia payable by the United States, except amounts for the water department (estimated for 1908 at $136,616), which are payable from the revenues of the water department.

[b] Includes all expenses of the postal service payable from postal revenues and out of the Treasury.

[c] This amount is exclusive of $7,439,511.10 to meet contracts authorized by law for river and harbor improvements included in the sundry civil estimates for 1908.

[d] In addition to this amount, the sum of $6,392,730 is appropriated in the sundry civil act to carry out contracts authorized by law for river and harbor improvements for 1908.

[e] No river and harbor act passed for 1907, but the sum of $17,254,050.04 was appropriated in the sundry civil act to carry out contracts authorized by law for river and harbor improvements for 1907.

[f] This amount includes $7,439,511.10 to carry out contracts authorized by law for river and harbor improvements and $25,406,258.73 for construction of the isthmian canal for 1908.

[g] This amount includes $6,392,730 to carry out contracts authorized by law for river and harbor improvements and $27,161,367.50 for construction of the isthmian canal for 1908.

[h] This amount includes $17,254,050.04 to carry out contracts authorized by law for river and harbor improvements and $25,456,415.08 for construction of the isthmian canal for 1907.

*Chronological history of appropriation bills, second session of the Fifty-ninth Congress; estimates and appropriations for the fiscal year 1907–8; and appropriations for the fiscal year 1906–7*—Continued.

| Title. | Estimates, 1908. | Reported to the House. | Passed the House. | Reported to the Senate. | Passed the Senate. | Law, 1907–8. | Law, 1906–7. |
|---|---|---|---|---|---|---|---|
| Urgent deficiency, 1907 and prior years | [a]$16,000,000.00 | $581,500.00 | $581,500.00 | $581,500.00 | $581,500.00 | $581,500.00 | [b]$39,129,035.45 |
| Urgent deficiency, additional, 1907 and prior years | | 329,650.00 | 264,650.00 | 1,329,650.00 | 1,329,650.00 | 1,329,650.00 | |
| Deficiency, 1907 and prior years | | 9,847,396.04 | 9,918,698.74 | 10,739,754.36 | 11,262,375.36 | 10,528,535.36 | |
| Total | 761,804,323.68 | 733,457,907.72 | 732,883,384.16 | 785,265,421.03 | 786,200,873.03 | 769,062,359.63 | 712,339,566.15 |
| Miscellaneous | [a]31,500,000.00 | | | | | 1,000,000.00 | 27,173,299.01 |
| Total, regular annual appropriations | 793,304,323.68 | | | | | 770,062,359.63 | 739,512,865.16 |
| Permanent annual appropriations | [c]149,886,320.00 | | | | | [c]149,886,320.00 | 140,076,320.00 |
| Grand total, regular and permanent annual appropriations | 943,190,643.68 | | | | | 919,948,679.63 | [d]879,589,185.16 |

[a] This amount is approximated.

[b] This amount includes $16,990,786 for the isthmian canal, which, added to the appropriation of $25,456,415.08 in the sundry civil act for this purpose, makes the total appropriations passed at the first session of the Fifty-ninth Congress for the isthmian canal $42,447,201.08. for this purpose, makes the total appropriations passed at the first session of the Fifty-ninth Congress for the isthmian canal $42,447,-201.08.

[c] This is the amount submitted by the Secretary of the Treasury in the annual estimates for the fiscal year 1908, the exact amount appropriated not being ascertainable until two years after the close of the fiscal year. This amount includes estimated amount of $57,000,000 to meet sinking-fund obligations for 1908 and $20,000,000 estimated redemptions of national-bank notes in 1908 out of deposits by banks for that purpose.

[d] In addition to this amount, contracts are authorized to be entered into, subject to future appropriations by Congress, as follows: By the Army act, $750,000; by the District of Columbia act, $40,000; by the Military Academy act, $1,700,000; by the naval act, $2,750,000; by the sundry civil act, $905,000; by the deficiency act, $270,000; by the urgent deficiency act, $803,700; by the public buildings act, $13,368,500; in all, $20,587,200.

## Review of Appropriations.

**Militarism Rampant—Spirit of Emulation Displayed by Committees having Jurisdiction of the Great Money Bills to Surpass Each Other in the Size of their Respective Budgets—A Warning Against the Perils of Extravagance.**

SPEECH

OF

# HON. LEONIDAS F. LIVINGSTON,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, March 4, 1907.*

The House having under consideration the general subject of appropriations—

Mr. LIVINGSTON said:

Mr. SPEAKER: The House, perhaps, is aware of the fact that the great difficulty that the Appropriations Committee has is to hold down appropriations. In the first place, the trouble comes with the estimates of the different Departments of the Government. You will remember that the estimates from the Departments of the Government to this session of Congress were in excess of the law, as it now stands, $72,573,730. Think of it! These estimates come to the various appropriation committees—the Military Committee, the Committee on Naval Affairs, the Post-Office Committee, and other committees handling great supply bills.

There is another trouble that the Appropriation Committee has, and that is that it seems to be the desire and the purpose of committees having charge of supply bills to exceed or excel any other committee in the amounts appropriated for their particular department. This spirit seems to dominate largely the Army and Navy appropriation committees. They do not seem to be satisfied with anything less than the estimate, and then, as the chairman of the committee has just stated, when it crosses the threshold of the door here and goes to the other end of the Capitol they are not satisfied with what the House has done, and they pile up and pile on. And it is one constant struggle on the part of your Appropriations Committee to hold down these expenses. I want to bear testimony with the chairman of the committee that the present committee in the present session has done their very best to do this thing.

And I am sorry to say that this House has not been responsive to that spirit and effort on our part to any great extent. I have seen men on this side as well as on the other side standing up here and voting for appropriations blindly in the face of the opposition of the members of the Appropriations Committee. You do it for a purpose, simply to disagree with the Appropriations Committee. If you can go away and have it said that you fought the Appropriations Committee on some particular bill and increased the expenses of the Government a few millions of dollars you think you have done well. The Appropriations Committee is not perfect. I do not mean to say that you should follow in our footsteps in every instance, but I do mean to say that they know more about the revenues and about the expenses of the Government to match those revenues than the most of you who criticise us so severely at times.

Mr. Speaker, the appropriations made at this session of Congress have reached the unprecedented sum of $919,948,679.73. Gentlemen, this is an increase of $40,359,494.47 over the appropriations for the current year and $57,266,192.57 over the appropriations for the fiscal year of 1899, that covered the entire expense of the war between this country and Spain. Enormous as these appropriations for the next fiscal year are, there should be added to them the further sum of $25,000,000, on account of contracts authorized in the naval bill. That is a debt upon the taxpayers of this country that has got to be met and was not mentioned by the chairman of the committee. That is not all. On account of the contracts authorized in the river and harbor bill, there are $49,829,349 more of authorization. These sums added to the total appropriations makes the tremendous sum of $994,778,028.62 and not $919,000,000. There are other sums authorized not in this total. They are small sums—$20,000, $15,000, $7,000, $6,000, that I have not had the opportunity this morning to gather up and put into this total, and when they are gathered up, the total will be very close to a billion-dollar session.

Mr. CLARK of Missouri. Mr. Speaker, I would like to ask the gentleman if he is going to gather up those odds and ends and put them in this speech?

Mr. LIVINGSTON. I am going to try.

Mr. CLARK of Missouri. I am glad to hear that.

Mr. LIVINGSTON. It is a long, tedious task.

Mr. CLARK of Missouri. I hope the gentleman will get leave to extend his remarks, and put them all in.

Mr. LIVINGSTON. Gentlemen, the highest estimate placed upon the probable revenues from all sources during the coming fiscal year indicates, as the gentleman in charge of these bills stated on the floor a few days ago, one hundred millions of revenue short. I said to you a year ago in my financial statement, and I hope you will reread it, that you are rapidly coming up to a condition of your expenditures exceeding your revenues. I made the statement then, and I wish to repeat it now, that while that is the case the Commitee on Ways and Means seem to be either "asleep or on a journey." They know nothing of this condition or they care nothing for it. Not one single effort has been made by the Committee on Ways and Means to keep the revenues up with the expenditures of the Government, nor has that committee—the majority—been active in trying to keep down expenses. I suppose they will wait and sleep and slumber until not a hundred million, but five hundred million deficit will pile up on you, and then you will have a bond issue. Why

is it that this great committee will thus neglect, if they will pardon the remark, their plain duty?

I will submit in the RECORD a table showing the different totals of appropriation bills, the estimates submitted to Congress by the several Departments of the Government, the appropriations as they have been made this session for the next fiscal year, 1908, and the appropriations made at the last session of Congress for the current fiscal year, 1907.

You will see from the table that Congress is still increasing the expenditures in the Army and Navy bills. What will this war spirit diminish? When will soberness and a desire to promote peace in the upbuilding of the industries of the country, which, at last, is the true measure of greatness in this or any other country, prevail? [Applause.] What! The increase in the Army during the last year was $6,718,117.67.

Mr. SIMS. Mr. Speaker, I would like to have order; this is a very interesting statement.

The SPEAKER. The House will be in order.

Mr. LIVINGSTON. Let me repeat, Mr. Speaker, the increase in the Army appropriations over the last year is $6,718,117.67. Why? There came in the estimates for the Army for 1908 $79,000,000, more than $8,000,000 over the current appropriations for 1907.

The increase in the Navy was $21,867,000, including an authorization of $25,000,000 that you passed through this House the other day over the protest of the chairman of the Committee on Appropriations, and over the protest of many members of the Appropriations Committee. Why should you have $22,000,000 increase in the Navy? Why this military spirit that is running rampant over the country and filling the hearts and minds of men that ought to be engaged about peaceful pursuits? [Applause.] When are you going to stop it?

Mr. SULZER. Will the gentleman allow me to ask him a question?

Mr. LIVINGSTON. Yes.

Mr. SULZER. I observe the gentleman criticises the appropriations for the Army and the Navy. I would like to hear the gentleman criticise the appropriations for rivers and harbors, for public buildings and grounds, the expenditures in our insular possessions, and for the Panama Canal.

Mr. LIVINGSTON. If the gentleman from New York will take the statements I submit with these remarks and study them he will see the criticism that he refers to.

Mr. SULZER. I will read it very carefully.

Mr. LIVINGSTON. In the first place, I am not sufficiently strong to go into the details now, and in the next place, your patience would not stand it.

Let us see about fortifications. Here we are with more than 4,000 miles of seacoast, with millions of brave and willing men to fight, in every nook or corner in this vast country of ours, with no probability of the forces of any nation ever putting their feet upon the soil of this country, or daring to do so, and what was the estimates for fortifications over last year as presented in these various supply bills to those various committees on appropriation? An increase of $15,000,000 demanded at our hands for fortifications, and we gave them an increase of $1,844,000.

There is an increase in pensions of $5,691,000 forty years after the civil war.

Mr. Speaker, the gentleman from New York asked me a moment ago to go into the details of expenditure in the Philippine Islands, in Porto Rico, and in Hawaii; colonies, if you please, that have fallen into our hands on account of this war spirit and this military desire to dominate the world. Why, every dollar spent in the Philippines grows out of this spirit, and, in my opinion, the man does not live who can answer his question, What are the expenditures in the Philippine Islands? Some Senator at the other end of the Capitol asked by resolution for the same thing, and he got no for his answer—no report. You will never, in my opinion, know what the Philippine Islands cost this Government, and in my opinion you will never know what they are worth or ever will be worth to this country. [Applause on the Democratic side.] I wish we could give them away to Japan or some other country that would take them and keep them and take care of them. [Applause on the Democratic side.]

Mr. Speaker, as I stated a moment ago, I will submit a table, and I wish the Members of this House would look at that table closely. It will justify the gentleman from Minnesota [Mr. TAWNEY] in his remarks. It will justify me in my complaints. Look at the appropriations under present law and then see what we have appropriated for 1908. [Applause on the Democratic side.]

The table referred to is as follows:

*Appropriations, Fifty-ninth Congress, second session.*

| | Estimates, 1908. | Law, 1907–8. | Law, 1906–7. |
|---|---|---|---|
| Agriculture | $7,954,680.00 | $9,447,290.00 | $9,930,440.00 |
| Army | 79,301,303.82 | 78,535,282.75 | 71,817,165.08 |
| Diplomatic and consular | 3,254,077.72 | 3,092,333.72 | 3,091,094.17 |
| District of Columbia | 11,598,222.00 | 10,454,118.63 | 10,138,672.16 |
| Fortification | 15,068,559.00 | 6,898,011.00 | 5,058,993.00 |
| Indian | 7,970,168.23 | 9,227,876.15 | 9,260,599.98 |
| Legislative, etc | 31,215,525.80 | 32,094,013.80 | 29,681,919.30 |
| Military Academy | 2,389,283.42 | 1,929,703.42 | 1,664,707.67 |
| Navy | 115,444,950.33 | 98,958,007.50 | 102,091,670.27 |
| Pension | 138,243,000.00 | 145,937,000.00 | 140,245,500.00 |
| Post-office | 205,662,190.00 | 212,129,393.00 | 191,695,998.75 |
| River and harbor | 25,414,231.76 | 37,183,093.00 | |
| Sundry civil | 101,288,131.60 | 110,736,551.30 | 98,538,770.32 |
| Total | 745,804,323.68 | 756,622,674.27 | 673,210,530.70 |
| Deficiencies | 16,000,000.00 | 12,439,685.36 | 39,128,035.45 |
| Total | 761,804,323.68 | 769,062,359.63 | 712,339,566.15 |
| Miscellaneous | 31,500,000.00 | 1,000,000.00 | 27,173,299.01 |
| Total, regular annual appropriations | 793,304,323.68 | 770,062,359.63 | 739,512,865.16 |
| Permanent annual appropriations | 149,886,320.00 | 149,886,320.00 | 140,076,320.00 |
| Grand total, regular and permanent annual appropriations | 943,190,643.68 | 919,948,679.63 | 879,589,185.16 |

## Life and Character of the Late Senator Bate, of Tennessee.

### ADDRESS

BY

### HON. LEMUEL P. PADGETT,

OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, January 20, 1907.*

The House having under consideration the following resolutions:

"*Resolved*, That in pursuance of the special order heretofore adopted the House proceed to pay tribute to the memory of the Hon. W. B. BATE, late Senator from the State of Tennessee.

"*Resolved*, That as a further mark of respect to the memory of the deceased and in recognition of his distinguished career and his great service to his country as a United States Senator, the House at the conclusion of the memorial proceedings of this day, shall stand adjourned.

"*Resolved*, That the Clerk of the House communicate these resolutions to the Senate.

"*Resolved*, That the Clerk of the House be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased."

Mr. PADGETT said:

Mr. SPEAKER: A severe hoarseness, as the result of la grippe, will deny to me the opportunity of speaking at length upon this occasion. Moreover, the very late hour admonishes me that I should be brief. Others, more capable than I, have spoken at length of the achievements and given in detail the life work of this distinguished statesman, and I feel my inability to add much to what has been already so eloquently spoken.

Mr. Speaker, near Castalian Springs, in Sumner County, Tenn., on October 7, 1826, a child was born. In the city of Washington, March 9, 1905, a man died. This period measures the life work of a distinguished and well-beloved son of Tennessee. Senator WILLIAM B. BATE lived to a ripe old age, and died full of years and full of honors. His activities were varied and covered a wide field of action; both in war and in civil life he distinguished himself preeminently. In war he rose from the position of a private to that of major-general, and in civil life he was commissioned by the great State of Tennessee as one of its ambassadors in the Senate of the United States. I shall not attempt to rehearse in detail the particulars of either his military or civic life—that has already been told in language more eloquent than I can hope to employ. The simple statement of his rise to the position of a major-general and for four successive terms a Senator of the United States bespeak sufficiently the merits of the man.

Mr. Speaker, I come not to flatter or to speak extravagantly of the life and character of Senator BATE, and yet I would not be content unless I availed myself of the opportunity of this occasion to bear testimony to the purity of his life, the nobility of his character, and the efficiency of his life work. Senator BATE was tried in many ways and always found true. In the discharge of his duties as a private soldier or as a commanding officer on the field of battle or in camp life; or as a private

citizen in the business affairs of life or as a civic officer, he ever measured up to the fullness of the standard "always present, always prepared."

Senator BATE possessed in an eminent degree all the elements of character, all the qualities of heart and mind essential to a generous and noble manhood. Possessed of a strong and vigorous intellect, he was capable of a comprehensive understanding of the great problems arising in social and political life. A man of splendid courage, his actions measured up to his convictions. But, Mr. Speaker, better than mere intellectuality was the nobility of his character, the charity of his heart, the purity of his life. In all the elements constituting nobility of character, integrity, honor, honesty, and purity he was a Gibraltar; immovable from the right, impregnable to wrong. It was these qualities of his life which so endeared him to the people of Tennessee and gave them such abiding confidence and unshaken faith in him.

Mr. Speaker, Senator BATE was a man of generous impulses and a catholic spirit. He did not limit his sympathies or confine them by narrow jealousies. The generosity of his heart is well expressed in the lines:

He prayest best who loveth best
All things both great and small;
For the dear God who loveth us,
He made and loveth all.

Mr. Speaker, if I rightly understand the aim of his life or correctly interpret the philosophy of life which inspired his life work I think it is aptly expressed in these lines of the poet:

I live for those who love me,
For those who know me true;
For the heaven that smiles above me
And awaits my spirit too;
For all human ties that bind me,
For the task by God assigned me,
For the bright hopes yet to find me,
And the good that I can do.

I live to hold communion
With all that is divine;
To feel there is a union
'Twixt nature's heart and mine.
To profit by affliction,
Reap truth from fields of fiction,
Grow wiser from conviction,
And fulfill God's grand design.

I live for those who love me,
For those who know me true;
For the heaven that smiles above me
And awaits my spirit too;
For the cause that lacks assistance,
For the wrong that needs resistance,
For the future in the distance,
And the good that I may do.

Mr. Speaker, true to his love, in the hour of death he gave the injunction, "Take me back to Tennessee." This was done. His body lay in state in the capitol, and thousands took a last look and did homage to the departed Senator. On the day of his burial many thousands stood reverently to witness the ceremony of placing his body in the grave, "earth to earth, ashes to ashes, dust to dust," to await the resurrection. Then came the impressions of another scene, when the women went early in the morning to the sepulchre of a loved One and found the stone rolled away, and asked the gardener the whereabouts of the loved One whom they found not; and the angel answered, "He is not here." Leaving the flower-covered mound, lifting our vision above the glory of the western sun, we shall expect to find Senator BATE in the company of the true and good of earth in that richer, better, nobler life of which the angel spoke, saying, "He is risen."

## Denatured Alcohol.

SPEECH

OF

# HON. ABRAHAM L. BRICK,

OF INDIANA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, February 7, 1907,*

On the bill (H. R. 24816) to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906.

Mr. BRICK said:

Mr. CHAIRMAN: I advocated and voted for the free denatured alcohol bill at the last session in the hope and desire that it would foster and promote a new industry and add an additional avenue of produce and profit to the farmer as well as introduce an effective competitor to gasoline and the combinations engaged in its manufacture. But it was a new law to this country and, like all new legislation, not entirely perfect and satisfactory in its initiate. I believe the amendment under consideration is necessary to fulfill the hopes of the friends of the law and to carry out the purposes of its enactment.

I believe if this law is reenforced by this amendment, that it will prove as effective as it was intended to be in the hopes and desires of its supporters when passed at the last session of Congress. And if my judgment be correct in this, then I have no doubt whatever but that it will work a revolution in the industries of the country.

It will make a cheap and available solvent in many lines of industry in the manufacture of ether and chloroform, one or the other of which is used as a solvent in the manufacture of countless articles of great usefulness and necessity. Besides that, if the million farmers who have asked for the privileges of this new opportunity are given the uses and benefits of this amendment—that is, farm distilleries—they may add millions to their wealth and the prosperity of the nation generally by using the waste products of the farm or the cullings of their crops by converting it into denatured alcohol; but we find that it will require the amending correction of this bill to give them that chance.

Now, Mr. Chairman, I believe in giving them the chance. It has worked well in other countries. The Commissioner of Internal Revenue tells us it can be practicably done and that it can be regulated to prevent internal revenue frauds without great expense to the taxpayer.

We know by the experience of other countries that it means millions to the wealth and opportunity of the producers. We are sure it will save millions by its competition with oil in cheapened prices to the consumers. Why should we hesitate a single moment to pass a measure that promises so much to the people and costs so little to the Government? I hope the bill will pass.

## Life and Character of the Late Rockwood Hoar.

REMARKS

OF

# HON. MARLIN E. OLMSTED,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, February 10, 1907,*

On the following resolution:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. ROCKWOOD HOAR, late a Member of this House from the State of Massachusetts.

"*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. OLMSTED said:

Mr. SPEAKER: Others, by reason of longer acquaintance, better qualified than I, have already, with kindly thought and great felicity of expression, portrayed the life and character and services of our departed friend, but I can not forbear to add my tribute to the memory of one whom I had learned to love and esteem.

Upon the organization of the Fifty-ninth Congress ROCKWOOD HOAR was assigned to membership upon the Elections Committee, of which I have the honor to be chairman. Mr. HOAR was, I think, particularly pleased with that assignment, as his father, the late distinguished Senator from Massachusetts, had, while in the House, held a similar committee position. In the published work which he has left behind him Senator Hoar takes some credit and expresses considerable pride in having been instrumental in lifting contests for seats in this House out of the reach of partisan control or influence and causing hearings before Eelections Committees to bear resemblance to judicial proceedings, wherein questions of law and fact are determined upon their merits without reference to the political affiliations of the parties thereto. His son was of the same disposition, and upon all matters coming before the committee he brought to bear his clear, unbiased judgment, and aided, by his keen analysis of facts and quick and strong grasp of legal questions, the committee very much in reaching right conclusions. At the time of his death he was a member of a subcommittee charged with investigating and passing upon an important mat-

ter involving many difficult problems in which he was deeply interested and which he was extremely desirous of correctly and justly solving.

We also served together as members of the committee appointed to represent the House of Representatives at the Franklin bicentenary celebration at Philadelphia.

Thrown together constantly by committee association, there sprang up between us almost immediately a warm friendship, which I appreciated and enjoyed and shall ever gratefully remember. We were accustomed after the daily sessions of the House to walk home frequently together, and thus I was enabled to gain greater insight of his life and character. He seemed to me to be as nearly without guile as any man I had known. He had a calm, judicial temperament and viewed all questions from an impartial standpoint. His mind was never fretted nor vexed by malice or hatred. He spoke ill of no man and was ever considerate and kind. While firm in his determination, particularly where any question of right and wrong was involved, he was ever possessed of that sweet and gracious courtesy "which transmutes aliens into trusting friends, and gives its owner passport round the globe."

It seemed to me, Mr. Speaker, that no man ever came to the House with fairer prospect of long, honorable, and distinguished service. But how soon it was ended. When he parted with us at the breaking up of the first session of this Congress he was in the best of spirits and apparently in the best of health. Certainly it never occurred to him, nor to any of us, that before the constitutionally appointed time for reassembling he was to be laid away from mortal eye and another chosen to fill his seat. His untimely taking off in the very prime of life, in the height of his usefulness as citizen and statesman, reminds us once more of the uncertainty of all things here below.

The world can ill afford to lose so good a man, but while his memory endures must be something better for his having lived.

## River and Harbor Appropriation Bill.

SPEECH

OF

# HON. AUGUSTUS P. GARDNER,

OF MASSACHUSETTS,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 5, 1907,*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. GARDNER of Massachusetts said:

Mr. CHAIRMAN: I am very sorry indeed that the Committee on Rivers and Harbors would not accept my amendment to the Sandy Bay item. In order that the Members of the House may fully understand it, I shall read it again.

*Provided*, That in any contract involving the further extension of the rubblestone mound under this paragraph a clause shall be inserted providing that none of the rubblestone furnished by the contractors shall be quarried by laborers working more than eight hours per day.

As the committee would not adopt this amendment, and as it is subject to a point of order, I have introduced a bill covering the same ground. I take this opportunity to explain this proposition, both to the River and Harbor Committee once more and to the membership of this House as a whole.

The Sandy Bay harbor of refuge is protected by a breakwater of two arms or mounds built up from the bottom of the sea by dumping rubblestone quarried on Cape Ann, Massachusetts.

So far as the dumping itself is concerned, the national eight-hour law forbids the employment of men for more than eight hours a day. This, however, is a matter of no importance.

Dumping the rubblestone is labor on a Government undertaking, and therefore comes under the national eight-hour law.

Quarrying the rubblestone, however, is labor on private property for private parties, and comes under the laws of the State of Massachusetts.

Now, until last year the quarries where the rubblestone was produced for the breakwater were eight-hour quarries. They were underbid, however, by an outside company known as the "Federal Construction Company." This organization proceeded to import alien laborers to Cape Ann, to house these aliens in temporary shanties, and with them to open a new quarry on a nine or ten hour basis. It is by no means surprising that the newcomer could underbid the local quarrymen, but the conditions seem one-sided.

I believe the true remedy in the long run is the restriction of immigration, but that will not ameliorate the existing situation.

There is far more reason that the eight-hour law should cover the quarrying of this rubblestone than there is that it should cover the dredging operations in river and harbor work. Dredging often can not proceed in rough weather; so many days are wasted. Yet, in my judgment, the eight-hour law applies to all dredging for the Government, and I expect to see it so decided by the Department of Justice.

I do not, however, think that the eight-hour law applies to the quarrying of this rubblestone. The question is pending before the Attorney-General, but I scarcely expect a favorable decision.

For that reason I ask the committee to report this bill.

## Public Land Frauds.

REMARKS

OF

# HON. JAMES R. MANN,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, March 2, 1907.*

While the sundry civil appropriation bill was under consideration and during the discussion relative to the limitation that was sought to be put upon the appropriation for the investigation of land frauds, in the Committee of the Whole House—

Mr. MANN made the following statement:

Mr. CHAIRMAN: I appreciate the desire of the gentleman from South Dakota and the gentleman from Wyoming to protect the interests of the settlers in their own States. It is a praiseworthy motive to see that the people who have actually gone upon the lands now in their territory shall be protected in their rights. But, Mr. Chairman, the Congress of the United States has a duty also to the people of the rest of the country. I was peculiarly struck by the language of the Secretary of the Interior in his annual report, a portion of which I wish to call to the attention of the House. Following the reading and examination of that report, Mr. Chairman, I made it my duty to make some examination into the facts in regard to the land frauds, and I hope at a little later period in this session to have the privilege at least of putting into the RECORD some evidence so damning in its character that it ought to drive at least away from the confines of civilization some gentlemen now of apparently the highest respectability.

It is time that Congress provided that the stealing of land by rich men away from the poor shall be as much punished as any other theft. The gentlemen who bring in the amendments proposed say that these amendments are in the interest of the poor settlers. It may be that they are so designed. But, Mr. Chairman, the purpose in investigating the land frauds has been to save to the poor man the public domain and to prevent it being taken by the rich men for pasture lands and otherwise. The Secretary of the Interior, whom many gentlemen in the House do not love personally, but who, after all, is entitled to the credit of his position and to help in his work, in referring to this matter in his annual report, says:

The prosecution of all persons conspiring to defraud the Government of its public lands is being continued with vigor, as is shown by the fact that 490 persons have been indicted in the various land States and Territories for the violation of the public-land laws, 89 have been convicted, and indictments are still pending against 401.

I call special attention to these words, now, of the Secretary:

It is to be regretted, however, that the efforts made to release it from the grip of its despoilers have been met by every embarrassment that human ingenuity could devise; powerful influences have been concerned, and have not hesitated to aggressively exert every agency that could be commanded to weaken the hand of the law; even local land-office officials have been subservient to such influences, and the punishment imposed by the courts has, in many cases, been so conspicuously inadequate as to encourage rather than deter violations of the law. Whether this official stagnation is due in any degree to local political influences to which these officials are more or less indebted for their commissions and the retention of their positions is not important to discuss at this time, it being sufficient to state that it is a deplorable fact that such action, or rather inaction, is bringing reproach upon the public service, besides enhancing the difficulties which beset the administration in any efforts that it may make to rescue the public domain from serious peril.

I ask, does the House of Representatives, in the face of the charge of one of the Cabinet officers of the President, that every

influence, political and otherwise, is being exerted to protect the despoilers of the public lands, the thieves of the public lands, propose to set its approval upon these frauds and to protect the thieves and prevent the Secretary of the Interior from investigating the frauds charged?

At the time I made that statement I said that before the close of the session I would submit facts and evidence that would show to some extent, at least, to what degree land frauds are being perpetrated, and now, taking advantage of the order of the House granting leave to extend my remarks, I will submit a few details and statements that will demonstrate beyond any question that the reports of fraud have not been exaggerated and that there have been flagrant violations of the law, and in some instances by men in high station and men of wealth and political prominence. The several gentlemen who took such an interest in endeavoring to have placed upon the appropriation the limitation that finally was placed upon it, it will be observed, are Representatives entirely from the States where frauds have been committed, and while I have no intention of impugning their motives, it is possible that they may have been prompted in their zeal to try and make it appear that there was really no great amount of fraud being committed, by the fact that in doing so they would gratify many of their constituents who possibly would rather not have the facts known that might be disclosed by an investigation of some of their land transactions.

In the limited time which I have had during the closing days of this session I have endeavored to get from the Interior Department information in detail as to the number of indictments that have been secured in connection with land frauds, and to what extent convictions have resulted, and other information. I find that in one State there have been about 150 indictments for conspiracy to defraud, conspiracy to suborn perjury, perjury, unlawful fencing, and unlawful cutting of timber from the public lands, and the convictions in said State include not only the surveyor-general of the State and a Member of this House, but a United States Senator and one who for years had the confidence and esteem of the citizens of his State, as well as his colleagues in the Senate and those of us who knew him.

In the State of Nebraska a number of indictments have been found for offenses before enumerated, and among those convicted is a prominent minister of the Episcopal Church and others of high social, business, and financial standing, and whose conviction was almost impossible by reason of the political and other influences that these parties possessed, and had it not been for the action of the President in removing summarily the United States marshal and United States district attorney of that State, because he believed that they were not diligent enough in prosecuting some of these defendants, it is very doubtful if convictions could have been secured. As I stated the other day, the Secretary of the Interior in his annual report says that 490 persons have been indicted in the various land States and Territories for the violation of the public-land laws, and that 89 have been convicted, and indictments are still pending against 401.

On February 13 the President sent a message to Congress calling attention to certain phases of the public-land situation and suggesting the urgent need of legislation that he deemed necessary to properly protect the remaining public lands, and in his message he gives four specific examples of field examinations in four of the land districts, and summarizing the results he states:

> It appears that in these four districts nearly 2,300 cases were examined, and that in over half the law had not been complied with, the failure being in each case on some essential feature, and in very many cases showing deliberate fraud. In six months ending December 31 last our present insufficient force of special agents secured indictments in 197 actions for fraud, 26 of which have been tried, resulting in 14 convictions and 12 acquittals. In the forest reserves, where we have been able to examine a great number of claims, in about one-third the law was not complied with.

From a limited investigation of the whole subject of land frauds, and after conferences with different land officials, I have come to the conclusion that the amount of actual fraud committed by individual homestead entrymen is very limited, and that in many instances where entries are suspended for fraud it is where the entryman has failed to comply strictly with the requirements of the law rather than a deliberate intention to commit a fraud, and that the flagrant violations of the law have been committed mostly by men representing large cattle interests and by those who have financial or political prominence, or both, and men who seek to shield themselves from detection and prosecution because of their high standing and reputation; and when such persons are suspected or detected, powerful influences are exerted to deter the Department of the Government from prosecuting them, and the experience of the Department has been that attempts even to influence jurors and witnesses have been frequent, and political influences have in some instances made it impossible for indictments to be secured, and in cases where the facts and evidence would seem to justify no conclusion except that the parties charged were guilty.

For the purpose of exemplifying this statement I want to refer to a case that demonstrates conclusively that a man may not only be guilty of crime in connection with the public lands, but that his political influence is so powerful that he can successfully thwart the efforts of the Government to secure an indictment against him and at the same time can conduct a political campaign and succeed in becoming the governor of his State, and for the purpose of showing what the records disclose I will append to my remarks copies of official communications and files in the Department of the Interior relative to this case, which briefly is as follows:

An attorney of prominence and for some years the general attorney of a leading railway company in his State, the owner of a cattle ranch, deliberately hired certain young men to make entries under the homestead laws for Government land inside of his ranch, and it will appear from the record that the entries were made not only for the purpose of obtaining unlawful possession of the lands, but with the intent of fraudulently acquiring title thereto. The lands were within a fence, notwithstanding the law makes it a criminal offense to fence public lands. The record further discloses that this land grabber hired these filings to be made; he paid the filing fees to the land office and all expenses in connection with the entries; in addition thereto he agreed to pay, and did pay, to each of the young men the sum of $100; that he personally conducted these boys to the lands at the time they made their entries; that the entrymen never visited the lands but once afterwards, and then they were accompanied, as on the first trip, by this man, who had induced them to perjure themselves for his profit; that the trips necessitated a railroad journey of some distance from the place where they and this distinguished conspirator actually resided, and that he paid all the expenses of the trips; that upon the lands upon which the young men filed they found already erected on each tract a small board shanty; that they remained upon the land overnight upon the occasion of each trip, sleeping in the shanties, having been supplied with bedding, etc., from the ranch of the party for whom they made the entries.

This case is in line with a large number of cases where indictments have been secured, the motive in such cases usually being a desire on the part of some ranch owner to increase his holdings in order that he may monopolize as much of the public domain as possible and without regard as to how he obtains either possession or title, and the record in this particular case would indicate that had it not been for the public disclosures and exposures relative to the violations of the land laws in other States this party would probably have completed his original scheme to get title to the lands, and would have induced the young men who made the entries to complete same by making final proof and then conveying to him. After obtaining the record of the Interior Department, and it appearing that the case had been referred to the Department of Justice, I called upon that Department to ascertain what the record there disclosed. I was permitted to examine and did examine the files, and I found that upon April 12, 1906, the case, with a full statement of all the facts, was transmitted by the Department of Justice to the United States district attorney, and he was directed to give the same his careful attention, with a view to the institution of criminal proceedings against the offender for conspiracy to defraud the Government of public lands, conspiracy to suborn perjury, subornation of perjury, and for fencing the public lands. It was also stated that it was the desire of the Attorney-General that the evidence in this case be presented to the grand jury at the earliest opportunity; that subsequently the United States district attorney reported to the Attorney-General that the case had been presented to the grand jury and that an indictment failed by a small margin, and that in his opinion the party implicated and his emissaries personally saw members of the grand jury and defeated the indictment. He also stated that the evidence was clear and positive, but expressed the opinion that it would be doubtful about securing an indictment because of the political prominence and influence of the accused. He was not only not indicted, but, following almost immediately the action of the grand jury in failing to indict him, he was nominated for governor of the State and was subsequently elected, and is to-day the governor of South Dakota.

I requested of the Attorney-General that I be furnished with a copy of the record of his Department in this case, in order that I might publish it with my remarks, but I regret that he

decided not to furnish me with a copy of the record for publication, as will appear by his letter of February 27, which is as follows:

OFFICE OF THE ATTORNEY-GENERAL,
*Washington, D. C., February 27, 1907.*

MY DEAR MR. MANN: Referring to your letter of the 25th instant and your personal call to-day in regard to the papers on file in the Department in reference to the cases against Messrs. Blunt and Crawford, I beg to say that I have given the question of permitting the publication in the RECORD of the papers you selected very careful consideration, and am compelled to say that it is my opinion that copies of these papers should not be furnished for publication. I think you will see that the use by you of these papers for your own information might be granted by the Department, while the question of their publication is altogether a different one and presents an entirely new phase of the matter. While, of course, there can be no objection to a general statement which would present the facts of the matter correctly, the correspondence includes so many expressions entirely proper in their present form which would be of doubtful propriety, to say the least, for purposes of publication that I am quite sure it would not be wise to furnish copies for the purpose you suggest.

I regret sincerely that I do not find I am able to comply with your request, but I really do not think the matters should be published in the form in which they appear.

Yours, very truly, CHARLES J. BONAPARTE.

Hon. JAMES R. MANN, M. C.,
*House of Representatives.*

Mr. Chairman, I ask where can there be found a clearer case of a premeditated scheme to defraud the Government of a portion of the public domain? Where can be found a more striking illustration of the miscarriage of justice through political influence? It is such aggravated cases as this that fully justify the vigorous methods of the Secretary of the Interior in dealing with public-land frauds.

I have no interest in the politics of South Dakota, and in referring to this case and publishing the record herewith I do so for no other purpose than to show the methods that are resorted to by men in high station to fraudulently obtain possession of the public lands and to demonstrate how difficult it is to secure successful prosecution for such violations.

In conclusion, I submit that I have shown sufficient to warrant the executive department of the Government in demanding an increased appropriation for the purpose of enlarging the force for the investigation of land entries; and I regret exceedingly that Congress did not see fit to make a larger appropriation, and particularly regret that any limitation whatever was placed upon the appropriation that was made.

---

## APPENDIX.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
*Washington, D. C., February 14, 1906.*

Mr. M. D. MCENIRY,
*Chief of Field Division, Fargo, N. Dak.*

SIR: January 13 and 15, 1906, respectively, the register at Aberdeen, S. Dak., transmitted the final proofs submitted in homestead entry No. 11420, made May 28, 1900, by C. Oliver Peterson for the west half of northeast quarter, north half of the northwest quarter section 12, township 121, range 78 west, and homestead entry No. 13067, made September 6, 1904, by Harry L. Eaton for lots 1 and 2 and the east half of northwest quarter section 19, township 121, range 76, Walworth County, S. Dak., which proofs were suspended because the record failed to show substantial compliance with the law, and you were furnished with notice thereof, as required by the rules. An examination of the record in these cases, together with other cases in the above vicinity heretofore submitted by the local officers, clearly indicates to this office that there exists in said county a systematic effort to fraudulently acquire title to public lands. The proofs are of the stereotyped character—a shack 10 by 12 feet, no absences, fit for grazing only, no improvements, entryman grazing stock on this and adjoining lands, has no property. In one of the entries the entryman only owned one horse; the other ten to sixteen horses upon the land part of the time. The entire record suggests that these entries are made as a cloak for the maintenance of unlawful inclosures in that vicinity. An examination of the entries now of record in this office from said Walworth County supports this inference in that a large number of entries were made at one and the same time, under which commutation proofs are being submitted at the earliest possible moment.

The record further suggests that a large number of these entries are made in the name of Crawford, among others Coe I. Crawford, whose residence is given in the entry papers in his homestead entry No. 12009, made July 1, 1901, for the west half of southeast quarter, northeast quarter of southeast quarter, southeast quarter of the northeast quarter, section 34, township 122, range 76, as Huron, S. Dak. The office is of the opinion that conditions herein are much similar to those heretofore discovered in the Chamberlain and Pierre districts, and the circumstances of the case are such as to call for a thorough and searching investigation, conducted on most discreet and tactful lines. This investigation you will make personally and not delegate it to any other agent, and you will make it at the earliest practicable moment and to the exclusion of all other work not made absolutely special by this office. You will first proceed to Huron, S. Dak., and secure from the surveyor-general such descriptions and plats and other information as he may be able to give you that will enable you to intelligently enter upon your investigation. You will then proceed to the above locality in such a manner as will avoid attracting any notice as to your purpose or plans. You will make your investigations so thorough and complete that your reports thereof will furnish all the information necessary for the successful prosecution of any proceedings that may be required therein.

A list of all entries made in Walworth County, S. Dak., including and since the year 1902, is inclosed herewith, giving numbers, dates, names, and descriptions. The office will furnish you additional data as may present itself.

Acknowledge receipt hereof and keep the office advised of your progress in the matter.

Very respectfully, W. A. RICHARDS, *Commissioner.*

---

FARGO, N. DAK., *February 19, 1906.*

Hon. COMMISSIONER GENERAL LAND OFFICE,
*Washington, D. C.*

SIR: I have the honor to acknowledge receipt of letter P 34928–0, G. F. P., February 14, 1906, relative to homestead entry 11420, made May 28, 1900, by C. Oliver Peterson, for the west half of the northeast quarter, north half of northwest quarter, section 12, township 121, range 78, and homestead entry 13067, made September 6, 1904, by Harry L. Eaton, for lots 1 and 2 and east half of northwest quarter, section 19, township 121, range 76, Walworth County, S. Dak., which proofs were suspended by the register and receiver at Aberdeen, S. Dak., on January 13 and 15, 1906, for investigation by a special agent, with an inclosure containing a list of homestead entries made in Walworth County, S. Dak., during the past three years, including 1902.

I leave to-morrow or Wednesday morning for Mankato, Minn., to attend the hearing of Catlin, Meehan, Hilgendorf, Groth, and Stiles, who are to be arrested this week on the indictments returned at Sioux Falls, S. Dak., last fall, charged with perjury in the making of homestead proofs in the Chamberlain (S. Dak.) district.

From Mankato I go to Sioux Falls, S. Dak., at the earnest solicitation of United States Attorneys Elliott and Porter, to confer with them relative to the dozen or more cases which will be up for trial at the coming term of court there, and the half dozen or more cases which I have requested them to lay before the grand jury for indictment.

From there I go to Huron, S. Dak., to confer with the surveyor-general, as requested in your letter of the 14th instant, and secure from him such descriptions and plats and other information as he may be able to give relative to the work you have laid out in this letter. I expect to be in Walworth County on this work by March 1 or 2, and will make a thorough and searching investigation into this list of entries, with such circumspection and discretion as possible, and continue my investigation to completion to the exclusion of all other work not made special by you.

Very respectfully, M. D. MCENIRY,
*Special Agent in Charge, Tenth District.*

---

FARGO, N. DAK., *February 19, 1906.*

DEAR MR. POLLOCK: I have your letter of the 14th instant and officially acknowledge receipt of same this date. It is a big task, and am glad to have it to do if only to "show" the office how such things should be done.

I don't know whether you know it or not, but the investigation will strike at the head of one of the political factions of the Republican party in that State and at the time, too, when one of the most bitter fights in the history of that party in that State is in full swing.

Coe I. Crawford was the "insurgent" candidate for governor against the republican organization two years ago and controlled about two-fifths of the delegates to the State convention. Prior to that time—a year or more—he was the general attorney for the Chicago and Northwestern Railroad interests in South Dakota, and, with the people of the Chicago, Milwaukee and St. Paul Railroad, dominated the Republican organization in South Dakota for years. He resigned his railroad attorneyship at the time he made the race for governor and has been on the outs with the railroads ever since.

Last fall, when the Republican party organization broke with Senator GAMBLE, United States Attorney Elliott, who was one of the principal leaders of the regular organization in that State, went with GAMBLE—most of the other Federal officers of the State stuck with the organization—and the war began. You know GAMBLE is up for reelection to the Senate, and the organization is fighting him and supporting Congressman MARTIN, of Deadwood, as his successor.

During the past winter GAMBLE and Elliott have formed an offensive and defensive alliance with Crawford and his friends, whereby the former are supporting Crawford for governor and he and his clique are with GAMBLE for the Senatorship. So, you see, you did well when you instructed me in the letter of the 14th "to avoid attracting any notice as to your purpose and plans," and to conduct same on "discreet and tactful lines," if for no other reason than to keep the knowledge of the investigation from United States Attorney Elliott, for he is the principal adviser of both GAMBLE and Crawford.

Elliott has been very prompt in following any suggestions that have been made to him relative to the work of our Department in that State—much more so than the United States attorney in North Dakota—and we will have five perjury cases and several of the twelve fence cases on which indictments were returned last fall on the calendar for trial this coming April. Then there are the big cases against Carl Pitan and John Q. Anderson for conspiracy, perjury, and subornation of perjury to be presented to the next grand jury, with probably half a dozen new perjury cases, and we don't want him to throw us on any of these.

The situation in South Dakota is exactly as I have outlined it in these pages, with each side doing their best to besmirch the other. I saw some of it when in Sioux Falls last fall, and the rest I have picked up in the newspapers since.

Of course this has nothing to do with my duty in these matters contained in the letter of the 14th instant, and if Crawford was concerned in any land-grabbing scheme, he should be exposed the same as the lowliest cowman.

Maybe you know all this, but I thought it best, however, to present the situation down there as I see it, for your information and that of Governor Richards, if you think best to show him this, and at the same time for my own protection, for if there has been any rottenness in the acquiring of land in that country by Crawford or anyone else, I will do my best to get at the bottom of it. And after that, some of their mud batteries will be turned on me and I will be dubbed the creature of this side or the other, whichever one happens to be implicated.

I am not in any way identified or mixed up with either side, nor do I care a snap which end finally comes to the top, and I have stated my only reason above for writing you this. Shall do my best to handle the case as carefully and diplomatically as possible.

I will be at Huron the latter part of this week to get the plats, etc., from Surveyor-General Morris.

Sincerely, yours, M. D. MCENIRY.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
*Washington, D. C., February 26, 1906.*

Mr. W. D. MCENIRY,
*Chief of Field Division, Fargo, N. Dak.*

SIR: Referring to Office letter of February 14, 1906, inclosing a list of all homestead entries made in Walworth County, S. Dak., since and including the year 1902, I am in receipt of your letter of February 19, 1906, stating that you will at once proceed to make the investigation in that county directed by said letter.

In connection therewith it appears that the following persons made homestead entries opposite their names, while at the same time performing the occupations named, being inconsistent with compliance with the law. It would be well to confer with the first three of the persons named and secure from them, if possible, sworn statements as to the actual facts in the case before proceeding further. If proof has been made upon any of said applications, as may be possible, the same has not yet reached this office.

Thomas H. Thompson, clerk, Thompson's clothing store, Huron, S. Dak.; homestead entry No. 12835, made November 11, 1903, for the south half of the northwest quarter, east half southwest quarter, section 34, township 123 north, range 76 west.

Harry C. Lampe, clerk, Robinson's shoe store, Huron, S. Dak.; homestead entry No. 12746, made August 7, 1903, for the northeast quarter of the northeast quarter section 33, north half of the northwest quarter, northwest quarter of the northeast quarter section 34, township 122 north, range 76 west.

James R. Hinman, conductor, Northwestern Railroad, Huron, S. Dak.; homestead entry No. 12833, made November 13, 1903, for the east half northeast quarter, north half of the southeast quarter, section 33, township 122 north, range 77 west.

Julian W. Blount, stenographer for Coe I. Crawford, Huron, S. Dak.; homestead entry No. 12836, made November 16, 1903, for the west half of the northeast quarter, southeast quarter of the northeast quarter, northwest quarter of the southeast quarter, section 33, township 122 north, range 76 west.

Very respectfully, W. A. RICHARDS, *Commissioner.*

---

FARGO, N. DAK., *March 16, 1906.*

Hon. COMMISSIONER GENERAL LAND OFFICE,
*Washington, D. C.*

SIR: See your letter "P," G. F. P., 34928, of February 14, 1906, February 26, 1906, and that of the 9th instant, relative to entries made in Walworth County, S. Dak., during the past three years. In the last dated letter you ask for report of the progress of the investigation.

I have the honor to advise that I arrived in Huron, S. Dak., on the night of February 24, and that during the next three days I put in most of the time looking up the persons who made homestead entries in Walworth County, giving at the time of their filing their residences as Huron, S. Dak. The investigation developed on the start two different schemes to acquire color of title to public lands in that county by fraudulent means.

The first scheme that I chanced onto was by a firm in Mason City, Iowa, known as the Iowa Investment Company, of which W. W. Williams, former train master on the C. and N. W. R. R., at Huron, S. Dak., and one Robert Carr, of Mason City, Iowa, seemed to be the moving spirits.

The Iowa Investment Company, from the information I have derived, is a concern formed for the purpose of conducting a cattle and horse ranch. Several years ago they purchased a quantity of patented lands in townships 121 and 122, range 77. They then commenced selling stock in their corporation to purchase cattle and horses for the ranch. Owing to Mr. Williams's acquaintance among employees of the C. and N. W. R. R. Company quite a lot of this stock was sold to conductors and engineers on that railroad at different points from Huron east, and a number of persons, it seems, of Mason City, Iowa, have also purchased stock in the concern.

Quite a number of the stockholders in this concern were induced by Williams and Carr to file on vacant lands in the vicinity of their ranch, among whom were James R. Hinman, Huron, S. Dak., homestead entry 12833; Martin L. Redmond, Brookings, S. Dak., homestead entry 12797; Eugene Bowen, Mason City, Iowa, homestead entry 12701; Walter W. King, Hawarden, Iowa, homestead entry 12753; William Smith, West Chicago, Ill., homestead entry 12679; George R. Wilson, Wells, Mich., homestead entry 12989; Dennis W. Vroom, Mason City, Iowa, homestead entry 12181, and quite a number of others. The homestead numbers given here all refer to Aberdeen series. I have talked with two of these entrymen and closely questioned them relative to the scheme and the persons who were associated with them. Their stories were both as outlined above.

From the list of entries you sent me and the reference in your letter to the Crawfords, of Huron, S. Dak., I thought perhaps some of these parties might have been interested with Mr. Crawford in lands in Walworth County, but they both denied it, claiming that their lands were some 5 or 6 miles west of the Crawford ranch. I have gone no further with this particular investigation, as, to get at the bottom of the scheme, it would be necessary to go to Mason City, Iowa, where the headquarters of the Iowa Investment Company are located.

While in Huron I found that Harry C. Lampe, homestead entry 12746; Thomas H. Thompson, homestead entry 12835; Julian W. Blount, homestead entry 12876; Coe I. Crawford, homestead entry 12009, and Floyd D. Valentine, homestead entry 12745, Aberdeen series, whose homesteads are located in township 122, range 72, gave as their places of residence Huron, S. Dak., when they filed.

Inquiry at Huron developed that Coe I. Crawford is a leading attorney at law in Beadle County, of which Huron is the county seat, and for a number of years, up to about three years ago was the general attorney for the Chicago and Northwestern Railroad Company in South Dakota. Two years ago he was a candidate for governor in his party, but was defeated for the nomination, and at the present time is one of the leading candidates for the gubernatorial office in South Dakota. All my inquiries and all the information I secured while in Huron were to the effect that Mr. Crawford had maintained his residence in that city for the past ten years or more.

Julian W. Blount, I learned, is a stenographer in Mr. Crawford's office, and has maintained his home at Huron continuously for several years past. Harry C. Lampe is a clerk in a shoe store at Huron, and Thomas H. Thompson is engaged with his father and his father's brother in conducting a men's clothing establishment in Huron, and has been in this line of business for over three years past.

I called on Mr. Thompson and took him down to my room in the hotel, where I talked with him relative to his homestead. He talked frankly on the subject; said he was in business at Huron at the time he filed on his homestead and was so engaged at present; that at the time he made the entry he did so at the instigation of Julian Blount; that his primary reason in filing was to make $100, which, he said, Julian Blount told him Mr. Coe I. Crawford would pay him for the land when he made proof, together with all the expenses he had been to in going to the land and making said proof.

I inclose herewith, as Exhibit A, his signed affidavit, in which he gives in detail the conversation he had with Blount in reference to taking this land; of his driving to the land prior to his filing upon it; that Mr. Coe Crawford's brother met them at Java with a rig at that time; that they went to the court-house at Bangor, where the filing was made; that two months later he made another trip from Huron to the land and stayed overnight; that Mr. Coe Crawford accompanied him from Huron to the ranch on this trip and paid his expenses and railroad fare. That he made a third trip in the fall of 1904; that Mr. Crawford did not accompany him on this trip, but paid his expenses for same.

He stated that there was a shack put up on the place 8 by 8 feet, 6 feet high, for a homestead residence; that this shack was all the improvements he saw on the land, and he states that he does not know who built it. That after returning from one of these trips, Julian Blount came to his house and gave him a check for $50; that this check was made out by Mr. Crawford; that about a year ago, together with Harry Lampe, he called at Mr. Crawford's office, when Mr. Crawford told him that they were not to prove up on the land, and that he should sign a relinquishment; that he remembers signing a paper at that time which he supposed was a relinquishment, and that after he had done so Mr. Crawford paid him the balance of the money on the deal, viz, $50, in the form of a check, which was signed with the firm name of Crawford & Taylor.

He states that he does not know much about the place; the land in question is about 2 miles from Crawford's ranch house, and that he does not know whether it is in Crawford's pasture or not; that his only idea in filing on the land was to make the $100.

Harry C. Lampe clerks in a boot and shoe store two doors from Thompson's place of business. I invited him down to my room in the hotel also, and when there I told him who I was, and that I had come to see him about the homestead he had taken. He also talked frankly about the homestead and his reasons for filing on same. His story is practically a reiteration of that of Thomas Thompson. He was one of the first to file on the lands, and his entry went to record three months before Thompson filed. On the start off Lampe, who filed on August 7, 1903, perjured himself in making the entry, as he was not of legal age until August 27, 1903.

I inclose herewith, as Exhibit B, his sworn statement relative to the manner in which he took the homestead and his reasons therefor. After first swearing him and then writing out his statement, I handed it over to Lampe to sign, but he refused point-blank to do so, although I repeatedly urged him to put his signature to the paper that day and the day following. He told me a number of times that he had sworn to it and "that is enough;" and the last time I saw him he said, "I won't sign it, but you can depend on it that it is the truth, and if I am called on the witness stand my story will be the same as I have given it to you."

In this sworn statement Lampe says:

"In July, 1903, Julian Blount came to me and asked me if I wanted to take a homestead near Crawford's ranch, in Walworth County. Blount said that if I would do so, Mr. Coe Crawford would pay all the expenses of filing on the land and the expenses of the trips I would have to make to it, and that when proof was made on same he would pay me $100 for a deed to the land. Blount told me he was going up, and that Thomas Thompson and Floyd Valentine were going, too. I agreed to the proposition, and early in August, 1903, Valentine and myself started for the land. Mr. Coe I. Crawford accompanied us on this trip."

Further on he says:

"The next spring—it may have been in June—I made another trip to the land, slept in the shanty that night and returned to Huron the next day. Valentine, Blount, and Thompson made the trip with me, and Mr. Coe Crawford also accompanied us. The bedclothes we used in sleeping in our shanties on these trips were furnished by the ranch. Mr. Coe Crawford also paid the traveling expenses on this trip to the land and return.

"Shortly after the second trip I called on Mr. Crawford in his law office at Huron and asked him if he could let me have the money on that homestead. He said he could, and paid me $100 and the expenses of the two trips I had made. He said he wanted us to continue with our homesteads.

On the last page of this statement Lampe says that he does not know whether there has been a proof made on this homestead or not; that he has not been out there since the summer of 1904; "I got the $100 that was promised me, and I supposed that if Mr. Crawford wanted to finish the deal up he would come and see me about it."

The last paragraph of this statement reads:

The only reason I took this homestead was to make the $100 which Mr. Crawford paid me. I never had any intention of making my home on the land.

I did not call on Julian Blount for the reason that I wished to have the investigation completed up to him before I asked him if he wished to make a statement. His connection with Mr. Crawford as stenographer would put that gentleman on his guard, if I talked to Blount before having secured all the facts relative to this fraudulent scheme, and I thought best to let him go for the present.

Harry Lampe told me that Floyd Valentine, who filed at the time he did, was employed in a baker shop at Huron in 1903; that he left Huron over a year ago, and the last he had heard from him was from Lead, S. Dak. I wrote the postmaster at Lead, asking if Valentine was there, but that official advises me that Valentine is not known in town and does not get mail at that office.

The records of the land office at Aberdeen show that the contiguous entries to the homesteads above mentioned, which were taken for the benefit of Crawford, were made by persons mainly who gave their residences as Bangor or Selby, S. Dak. I started for this county last Sunday night, expecting to make field investigation in these townships, 121 and 122, range 76, during this week. Last Monday it began to snow, and snow fell constantly all of Tuesday. There were from 3 to 4 inches of snow at Aberdeen, and parties that I talked with at the hotel, who came in from Walworth County, said that there was 2 or 3 inches more snow in that county than around Aberdeen. On Wednes-

day the thermometer was 24 below zero and yesterday morning 10 below.

In view of the amount of snow that had fallen I deemed it impossible to make anything like a correct survey of the lands involved or of the fences around the Crawford ranch, for the reason that the corner stones would be covered up and it would be merely a waste of time trying to locate them in the snow. The winter is so far advanced and the sun, when it does come out, is so warm that I expect this snow will have melted by the first of the coming week, when I expect to go direct to Selby and finish up the investigation.

I concluded not to talk with any of the persons at Selby or Bangor about this matter or the Iowa Investment Company ranch until I was ready to go out and make the field investigation, as I did not care to let anyone in Walworth County know of the case until that time.

Wednesday I went to Redfield, S. Dak., the residence of Frank S. Mott, homestead entry 13237, and Harry W. Brockman, homestead entry 13236, who filed last year. The lands that they filed on adjoin some of these lands taken for the benefit of Crawford on the west, and I thought perhaps they had made entries with the same intention. I found both these men at Redfield and closely questioned them as to their reasons for making the entries.

Mott is a veterinary surgeon and Brockman was formerly in the livery business there. Neither party is personally acquainted with Crawford nor have they any idea of where his ranch is. I talked to both of them separately, and both stated that while there was a fence around their lands they understood it belonged to a ranchman named Jackson, living in the township south of them, and that the two times they had been on the lands they filed on they had not heard anything of the Crawford ranch. They stated they did not know Jackson, but that they had learned these lands were vacant from Brockman's brother, who lives at Selby, S. Dak., and that they filed on the lands solely for their own use and benefit.

I will make an effort to find Floyd Valentine, and when I have located him will try and get an affidavit relative to his entry.

Referring to the Thompson affidavit and his statement that when Crawford paid him the last $50 he believed he signed a relinquishment, I wish to state that I have examined the records of the land office at Aberdeen, and same does not show any relinquishment having been filed. The present status of the Thompson, Valentine, Lampe, Blount, and Coe I. Crawford entries is the same as when these parties first filed on the lands.

From the above general statement of the case it will be readily seen that this is one of the regulation schemes to defraud the Government out of the title to its lands by perjury and subornation of perjury in making false homestead affidavits, and is of like character with numerous cases of conspiracy to defraud the Government, perjury, and subornation of perjury that I have reported during the past year in this district. I expect to be able to make full and complete report on the entries included in the Crawford pasture and of any entries that were made by residents of Walworth County for the benefit of this Crawford ranch by April 1. After that I will take up the Iowa Investment Company scheme and complete the investigation. This investigation has been necessarily delayed by the unusual snowstorm I referred to above. Had it not been for this storm I expected to conclude this report by March 24.

Very respectfully,

M. D. McENIRY,
*Chief of Field Division No. 10.*

---

COUNTY OF BEADLE, *State of South Dakota, ss:*

Thomas H. Thompson, being first duly sworn, on his oath deposes and says: I am 23 years of age, having been born June 21, 1882; am clerking for my father, Thomas Thompson, in a men's clothing store in this city [Huron].

In the fall of 1903 Julian Blount, who is a stenographer for Crawford & Taylor, lawyers, in Huron, S. Dak., came to me and asked me if I did not wish to go with him and take up a claim. I asked him "Where," and he replied, "In Walworth County." He told me I could make $100 for my right and have all my expenses paid; that if I took the claim Mr. Coe I. Crawford would pay the expenses and give me the $100 when I made proof. He said that Harry Lampe and Floyd Valentine had taken a claim under the same conditions before.

I told him I had not used my right and that I would go. We, Valentine, Lampe, and Blount, started for the land some time in the early part of November, 1903. We went to Bangor, where Blount and myself filed on land. We drove out to Crawford's ranch before filing on the land and looked it over. Mr. Coe I. Crawford's brother met us at Java, I think, and drove us out to the land. We then went to Bangor to the court-house and made the filing. I do not know before whom we filed nor do I remember the description of the land. I do not know who furnished the description of the land. Couple of months later we made another trip from Huron to the land and stayed overnight. Valentine, Lampe, and Blount, and myself went on this second trip. Mr. Coe I. Crawford accompanied us from Huron to the ranch and paid our expenses and railroad fare on this trip.

The improvements on the land I filed on consisted of a shack 8 by 8 feet, 6 feet high. I do not know who built the shack.

The next trip I made was in the fall of 1904. The three young men named above went with me on this trip, or rather, the three young men went the day before I did. I was sick and did not leave until the day following, and when I got to Aberdeen, Julian Blount met me and said there was nothing to do and that I could go back home. I did not see Mr. Crawford on this trip. Mr. Crawford paid my expenses on this trip also.

Several months after I filed Julian Blount came to my house and gave me a check for $50. This check was made out by Mr. Crawford.

About a year ago—I can not recollect the day—Harry Lampe came in the store and said: "Let us go up to Crawford's office and get the balance of our money." I went with him, and, as I understood it, Mr. Crawford said we were not to prove up on the land, and that I should sign a relinquishment. I remember signing a paper at that time, or what I supposed was a relinquishment. Mr. Crawford was busy at the time and did not say much else about the land. He paid me the balance of the money on the deal, $50, in the form of a check signed by the firm name of Crawford & Taylor.

I have not been up to the land since, nor has Mr. Crawford talked to me about it since I received the money. The land I slept on and on which I filed is about 2 miles from his ranch house. I do not know whether it is in his pasture or not. My only idea in filing on the land was to make $100. I had no intention of making my home on the land or of giving up the business I was engaged in in Huron.

THOS. H. THOMPSON.

Sworn and subscribed to before me this 26th day of February, 1906, in room 53 of Kent's Depot Hotel, Huron, S. Dak.

M. D. McENIRY,
*Special Agent General Land Office.*

---

COUNTY OF BEADLE, *State of South Dakota, ss:*

Henry C. Lampe, being first duly sworn, on his oath deposes and says: I am a citizen of Huron, S. Dak.; aged 23 years on August 27, 1905; am a single man, and clerk in Robinson's shoe store at Huron.

In July, 1903, Julian Blount came to me and asked me if I wanted to take a homestead near Crawford's ranch, in Walworth County; Blount said that if I would do it that Mr. Coe Crawford would pay all the expenses of filing on the land and the expenses of the trips I would have to make to it, and that when proof was made on same he would pay me $100 for a deed to the land. Blount told me that he was going up and that Thomas Thompson and Floyd Valentine were going, too. I agreed to the proposition, and early in August, 1903, Valentine and myself started for the land. Mr. Coe I. Crawford accompanied me in this trip.

We went to Aberdeen, stayed overnight, and the next morning went out on the Milwaukee Railroad to Selby, S. Dak. From Selby we went out to the land, some 10 or 12 miles; Mr. Crawford went with us and showed us the land; he then returned to Bangor with Valentine and myself, where we made out our homestead papers in the court-house and filed on the land. I do not remember before whom we made the filings, but we swore to the homestead papers. After filing, Mr. Coe Crawford drove us to the railroad station at Selby; we came home to Huron and he returned to the ranch.

The following winter—late in the fall, I think—I made another trip to the land. Valentine, Thompson, and Blount were in the party with Mr. Coe Crawford. Mr. Crawford told me on that trip that the improvements were on the land and that he had them put on. These improvements consisted of a shanty, about 6 feet high and about 7 by 8 feet in width and length. There were shanties on the other boys' claims, about the same size, and each of us slept in our own shanties that night. We returned to Huron the next day. Mr. Crawford paid all the expenses of lodging, meals, and railroad fare for this trip.

The next spring—it may have been in June—I made another trip to the land, slept in the shanty that night, and returned to Huron the next day. Valentine, Blount, and Thompson made the trip with me, and Mr. Coe Crawford also accompanied us. The bed clothing we used when sleeping in our shanties on these trips were furnished by the Crawford ranch. Mr. Coe Crawford also paid the traveling expenses of this trip to the land and return.

Shortly after the second trip I called on Mr. Crawford in his law office in Huron and asked him if he could let me have the money on that homestead. He said he could, and paid me $100 and the expenses of the two trips I had made. He said he wanted us to continue with our homesteads.

Late in the fall of 1904 I made another trip to Selby; Thompson and Blount were with me, and Mr. Crawford was with us and paid our expenses. Mr. Crawford went with us as far as Aberdeen, when he informed us he had forgotten some papers. We went as far as Selby, stayed overnight there, and as Mr. Crawford did not show up, we returned to Huron without seeing him again on that trip.

The three trips enumerated herein are all I made to the land. The only papers I remember signing were the ones when I made the entry. I do not know whether there has been a proof made or not on my homestead, and I have not been out to it since the summer of 1904. I got the $100 that was promised me, and I supposed that if Mr. Coe Crawford wanted to finish the deal up he would come and see me about it.

Last summer Julian Blount asked me where Floyd Valentine was, and I gave him his address in Lead, S. Dak. Julian Blount is the stenographer for Crawford & Taylor, attorneys at law, of which Mr. Coe Crawford is the senior member.

The only reason I took this homestead was to make the $100 which Mr. Crawford paid me. I never had any intention of making my home on the land.

(NOTE.—Deponent refused to sign, although repeatedly urged; he stated: "That's the truth; I swore to it, and that's enough.")

Sworn before me and transcribed by me this 26th day of February, 1905, in room 53, Kent's Depot Hotel, Huron, S. Dak.

M. D. McENIRY,
*Special Agent General Land Office.*

---

DEPARTMENT OF THE INTERIOR,
*Washington, March 27, 1906.*

The ATTORNEY-GENERAL.

SIR: Referring to Department letter of the 22d instant, inclosing copy of a letter of the 19th instant from the Commissioner of the General Land Office relative to an investigation of fraudulent entries and unlawful inclosures in Walworth County, S. Dak., and requesting, as recommended by the Commissioner, that a representative of your Department be detailed to assist the General Land Office in the prosecution of the case, I have the honor to transmit herewith the entry papers in six homestead entries in Aberdeen, S. Dak., land district and certain other papers, all as listed in a letter from the Commissioner under date of the 21st instant, two copies of which are herewith inclosed.

Very respectfully,

THOS. RYAN, *Acting Secretary.*

---

FARGO, N. DAK., *March 31, 1906.*

Hon. COMMISSIONER GENERAL LAND OFFICE,
*Washington, D. C.*

SIR: See your letter P 34928–9, G. PF. P., February 14 and 26, 1906, in reference to proofs coming from Walworth County, S. Dak., which fail to show substantial compliance with law, in which you refer to the proofs made by C. Oliver Peterson on homestead entry 11420, made May 28, 1900, for the west half of the northeast quarter and north half of the northwest quarter, section 12, township 121 north, range 78 west, and Harry L. Eaton on homestead entry 13067, made September 6, 1904, for lots 1 and 2 and east half of the northwest quarter, section 19, township 121 north, range 76 west, fifth principal meridian, as being of a stereotype character—shack 10 by 12 feet, no absences, land fit for grazing only, no improvements, grazing stock on this and adjoining lands, etc.

You also refer to a large number of entries in Walworth County made by Coe I. Crawford and the sale of isolated tracts to him, and also to his having made homestead entry 12009 on July 1, 1901, for the west

half of the southeast quarter, the northeast quarter of the southeast quarter, and the southeast quarter of the northeast quarter, section 34, township 122 north, range 76 west, fifth principal meridian.

In your letter of the 26th you refer to the homesteads of Thomas Thompson, Harry C. Lampe, James R. Hinman, and Julian W. Blount, made in the same locality as Coe I. Crawford's homestead entry referred to above, and suggest that it would be well to confer with the first three of the parties named and secure from them, if possible, sworn statements as to the actual facts in the case before proceeding further.

I have the honor to report that before receiving your said letter of the 26th, I had gone to Huron, S. Dak., and called on Thomas H. Thompson and Harry C. Lampe and secured from them affidavits in reference to their homesteads. I inclose these affidavits herewith, marked "Exhibits A" and "B," respectively. They show clearly that these two entries were made at the instigation and for the benefit of Mr. Coe I. Crawford and cover lands in the immediate vicinity of his own homestead filing.

James R. Hinman's H. E. 12833 was made in the interests of the Iowa Investment Company and is in a large pasture maintained by this concern several miles west of the lands taken in the interests of Crawford. The facts relative to the Hinman filing and many other entries in its vicinity made in the interest of the Iowa Investment Company are yet to be developed and are referred to in a separate letter. There is no connection between this concern and Coe I. Crawford or the Crawford Cattle Company organized by Mr. Crawford. Neither is there any connection between the C. Oliver Peterson or Harry L. Eaton entries with the land-grabbing operations of Coe I. Crawford.

My investigation developed the fact that in T. 122 N., R. 76 W., and extending down into sec. 1, T. 121 N., R. 76 W., there is an inclosure of some 2,400 acres maintained by the Crawford Cattle Company, whose headquarters ranch is on deeded land, SE. half of the NE. quarter, NW. quarter of the NE. quarter, and the NE. quarter of the NW. quarter of section 35. This inclosure is maintained by a two-wire fence and takes in the east half of section 33, all of section 34, the north half and southeast quarter of section 35, all of section 36, T. 122 N., R. 76 W., and part of section 1 in the township below.

Within this inclosure are the following homestead entries:

H. E. 12836, Julian W. Blount; W. half of the NE. quarter, SE. quarter of the NE. quarter, and NE. quarter of the SE. quarter, section 33.

H. E. 12745, Floyd D. Valentine; SW. quarter of SE. quarter, section 34; S. half of SE. quarter and NE. quarter of SE. quarter, section 33.

H. E. 13746, Harry C. Lampe; NE. quarter of NE. quarter, section 33; N. half of NW. quarter and NW. quarter of NE. quarter, section 34.

H. E. 12009, Coe I. Crawford; W. half of SE. quarter, NE. quarter of SE. quarter, and SE. quarter of NE. quarter, section 34.

H. E. 12835, Thomas H. Thompson; S. half of NW. quarter and E. half of SW. quarter, section 34.

All in T. 122 N., R. 76 W., and amounting to 800 acres.

Contiguous to some of these filings are three forties of vacant land in section 34, viz, northeast quarter of northeast quarter, southwest quarter of northeast quarter, northwest quarter of southwest quarter, section 34—120 acres. In sections 35 and 36 there are 960 acres of State land, which has been leased from the State of South Dakota. In section 1, township 121 north, range 76 west, the land covered by this fence is all deeded land.

Referring to the Thompson entry and his affidavit, Exhibit A, and the Lampe entry (see his sworn statement, Exhibit B), the facts developed show that in 1903 Julian Blount, a stenographer in the office of Crawford & Taylor, lawyers, at Huron, S. Dak., spoke to these young men about taking homesteads in Walworth County, stating to them that Mr. Crawford would pay all their expenses on the various trips to the land and that when proof was made he would pay them $100 for deed to the lands. Blount himself made an entry that year with these young men, and another young fellow, named Floyd D. Valentine, was also induced to make an entry in the same locality and, presumably, under the same terms.

As shown by these affidavits, Thompson and Lampe, who were clerks in stores at Huron, agreed to the terms and made several trips to the lands; that on these trips they were accompanied by Mr. Coe I. Crawford, who paid their expenses, and it is further shown that in 1904 Mr. Crawford paid them the $100 that his stenographer promised them when they were induced to make the entries.

No attempt has been made to offer proof on these lands, and it seems that for some reason Mr. Coe I. Crawford dropped the matter, so far as having the boys continue to make trips to the lands is concerned. At any rate, none of them has made trips to the lands since the summer of 1904. As Lampe aptly remarks in his statement, "I got the $100 promised me, and I suppose if Mr. Crawford wanted to finish the deal up he would come and see me about it."

They both state in these affidavits that the only reason they took these homesteads was to make the $100, and that they never had any intention of making their homes on the land. It is also shown in their affidavits that what improvements were placed on the lands, in the way of homestead shanties, were put up by Mr. Crawford. Lampe states on page 2 of his affidavit that Mr. Crawford told him on the second trip he made to the land the improvements were on the land, and that he (Crawford) had put them on.

Floyd Valentine, who accompanied Thompson, Lampe, and Blount and filed within this pasture in 1903, was working in a restaurant at Huron at that time. Some time in the early part of 1904 he left town, and my first information was to the effect that he was at Lead, S. Dak. I made diligent inquiry in that city by mail, but was unable to find him, and for several weeks hunted for him in the towns and villages in the Black Hills district without success.

On my return from an examination of the lands in the Crawford pasture this week, I stopped at Huron, S. Dak., and made inquiry again at the post-office for him, and was informed a letter had just been received from him by a party in Huron postmarked Alliance, Nebr. I learned from the party who got the letter that Valentine was then employed as a brakeman on the Burlington and Missouri River Railroad, with headquarters at Alliance, and on my return to Fargo Wednesday I wrote Special Agents Defrees and Scott at Alliance, Nebr., to question him closely relative to the inducements offered him to file on this land, quoting in my letter the information derived from Thompson and Lampe. Time has been too short to hear from these special agents, but as soon as I have their reply I will make supplemental report on the Valentine entry.

Owing to Blount's connection with Mr. Crawford, I did not interview him relative to his filing. There can be no question, in the light of Thompson's and Lampe's affidavits, that Blount's filing was made in the interests of Mr. Coe I. Crawford and at his instigation.

I inclose herewith, as Exhibit C, a photograph of Harry C. Lampe's homestead shack; as Exhibit D, a photograph of the shack that is just outside the fence on the south line of the southeast quarter of southwest quarter of section 34; as Exhibit E, a photograph of an abandoned shack on the Floyd D. Valentine homestead.

These pictures I took myself while making the investigation. There is no sign of a building of any description on the Crawford entry. These dilapidated shacks are the only improvements on any of these claims. The land in sections 33, 34, 35, and 36 is in the hills and draws on the north side of Swan Lake Creek.

Orin S. Crawford, brother of Coe I. Crawford, resides with his family at present on the deeded land in section 35 and manages this ranch. He has been the actual resident manager for years, and at the present time is taking care of some 200 head of cattle.

Besides this ranch and inclosures, of which I inclose an outline as Exhibit G, the Crawford Cattle Company have under lease in T. 122 N., R. 76 W., and Ts. 121 and 122 N., R. 75 W., 2,120 acres of State land. The greater part of this land in Ts. 121 and 122, R. 75, is contiguous to the homestead entry of Orin S. Crawford, H. E. 11265, made March 17, 1900, for the E. ½ of the SW. ¼, sec. 31, T. 122, R. 75, and lot 3, and SE. ¼ of NW. ¼, sec. 5, T. 121, R. 75, and is used for pasturage and hay purposes also. My information was to the effect that Orin S. Crawford lives on his homestead at times during the summer, and that frequently some of his children live there when he is away. I was unable to get any positive information during my trip to Walworth County as to the length of his residence, and concluded not to make fraudulent-entry report of this entry until after further investigation.

It has been the practice of Orin S. Crawford to herd cattle on this land during the spring and summer months for the farmers living in the country south of him, and for the past four or five years he has been herding from 400 to 700 head of cattle for these farmers, at $1 per head for steers and $1.50 per head for cows and heifers.

The first day I was in Walworth County I learned the organization of the Crawford Cattle Company, and wrote the secretary of state for South Dakota for information relative to their incorporation. So far this information has not been received, and as soon as same does come I will forward you this information.

I learned while in Walworth County that besides the Coe I. Crawford and Orin S. Crawford mentioned heretofore there were two other brothers in the organization. No one in that county seemed to have any further information regarding same. On Sunday, March 25, I called at the ranch house of Orin S. Crawford to talk with him relative to this concern, but did not find him at home, and his young sons could not give me any information about same.

On the north and part of the south side of this pasture there are a number of homesteaders living, who are engaged in a small way in cattle raising and farming. My investigation showed clearly that there is no business relationship between these parties and the Crawfords. In fact, quite a number of them have had trouble with Orin S. Crawford over fences, etc., and over the fact that the Crawfords have leased so much land in the neighborhood.

Southwest of the Crawford pasture, and contiguous to section 34 and that part of 33 within the Crawford pasture, is a large inclosure maintained by Jackson, Ridgway & Co. In this pasture there are possibly forty homestead entries on file. My observation in driving through it was that they are all taken in the interests of this concern, the Jackson & Ridgway Company. On the west part of section 33 the Thomas pasture adjoins the Crawford fence, and I am satisfied that there is no business connection between either of these concerns and the Crawford Cattle Company. The operations of the Jackson-Ridgway Company will be made the subject of another report.

So far as the business of the Crawford ranch is concerned, it has been handled largely by Orin S. Crawford. The leasing of State lands has been done by both Orin S. and his brother, Coe I. Crawford, and this investigation shows the procuring of these Huron people to file their homestead entries was the work of Coe I. Crawford alone.

The procurement of these parties to make these homestead entries under contract to sell same to him, by Coe I. Crawford, after proof was made was illegal and contrary to law and from its inception and places this well-known lawyer of Huron in the position of suborning the young men to commit perjury. The case is in many respects similar to the Stearns and Horsenell cases—conspiracy and subornation of perjury—which were tried in St. Paul last winter, and also to the several cases that are now in court at Sioux Falls. The motive back of the filings—the segregation of these 800 acres from the public domain and the converting them into a pasture to which his company would have undisputed possession—is plain. The fraud was willful from the fact that Mr. Crawford is considered one of the leading lawyers of South Dakota, and must have known the illegality of his operations.

In view of the facts set out above, I respectfully recommend that this report be laid before the Department of Justice for the prosecution of Coe I. Crawford for subornation of perjury in the making of the homestead affidavits of Harry Lampe, Thomas Thompson, Floyd D. Valentine, and possibly Julian W. Blount; also for conspiracy with Julian W. Blount, in securing Lampe, Thompson, and Valentine to make these entries.

Very respectfully,

M. D. McENIRY,
*Chief of Field Division.*

---

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
*Washington, D. C., April 4, 1906.*

Hon. D. D. CALDWELL,
*Department of Justice.*

SIR: In conformity with your request this forenoon I have the honor to submit the following statement relative to the Coe I. Crawford case, in Walworth County, S. Dak., supplemental to my letter of February 19, 1906, addressed to Mr. Pollock, chief of my division, now in the files in this case in your hands.

Since the letter to Mr. Pollock referred to above, I have made a careful investigation of the Crawford land frauds, and on March 29 and 30 submitted to the honorable Commissioner of the General Land Office five fraudulent entry reports covering the filings made by and in the interest of Coe I. Crawford, of Huron, S. Dak. Under date of March 31 I submitted a general report covering these cases, in which the recommendation was made that proceedings be instituted at once against said Crawford on the charge of subornation of perjury and conspiracy to defraud the Government. The reason immediate action is requested is owing to the fact that these entries were made in the summer and fall of 1903, and any action relating to the punishment of Crawford

for same should be commenced in the near future or same will be barred by the statute of limitation.

As is well known, Mr. Crawford is one of the political leaders in his State, and at present is conducting a campaign for the gubernatorial nomination in the Republican convention, which is held this summer. Closely associated with him in this campaign, in fact, one of his managers, is Mr. James D. Elliott, the United States attorney for South Dakota. Without in any way wishing to reflect on the integrity or honor of Mr. Elliott as a man or an officer, it is obvious that any action brought by the Government against Crawford should be done without the assistance of Mr. Elliott.

I am firmly of the opinion that Mr. Elliott is unalterably committed to the cause of Crawford, and with this case against the latter coming up I fully believe that the Government could not expect any results with Mr. Elliott in charge of the case.

There are also some fifteen or twenty more land cases now on the United States attorney's docket in that State for presentment to the grand jury and for trial, a number of them being of much importance, the prosecution of which, taken in connection with the Crawford case, would embarrass Mr. Elliott.

Very respectfully,

M. D. McENIRY,
*Chief of Field Division, General Land Office.*

---

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
*Washington, D. C. April 17, 1906.*

The COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: See my report of March 31, in reference to the land operations of Coe I. Crawford, in Walworth County, S. Dak., made in response to your letter "P" of —.

Supplemental to that report, I have the honor to inclose herewith letter under date of March 31, from E. A. Platts, assistant secretary of state of South Dakota, in which is given a summary of the articles of incorporation of the Crawford Cattle Company, organized by Coe I. Crawford. You will note this letter from the secretary of state's office states that the incorporation was for the purpose of buying, improving, selling, and leasing lands, aside from the cattle business. The two Crawfords mentioned as incorporators with Coe I. Crawford are his brothers.

Very respectfully,

M. D. McENIRY,
*Chief of Field Division.*

---

DEPARTMENT OF JUSTICE,
UNITED STATES ATTORNEY'S OFFICE,
DISTRICT OF SOUTH DAKOTA,
*Sioux Falls, S. Dak., April 17, 1906.*

Hon. COMMISSIONER GENERAL LAND OFFICE,
*Washington, D. C.*

SIR: See my report of March 31, 1906, on the fraudulent land scheme of Coe I. Crawford et al., made in response to your letter of instructions "P" 34928, GFP., of February 14, 1906.

I have the honor to advise that the case of United States *v.* Coe I. Crawford, for subornation of perjury, and against said Crawford and J. W. Blount, for conspiracy to suborn and conspiracy to defraud in connection with the Harry Lampe, Thomas Thompson, and Floyd Valentine homestead entries in Walworth County, S. Dak., was presented to the grand jury on Monday afternoon, April 16, 1906, by Mr. Porter, United States attorney.

Thompson, Lampe, and Valentine, mentioned above, John Vetter, register of the United States land office at Aberdeen, and E. G. Powell, clerk of courts of Walworth County, S. Dak., and myself were present as witnesses before the jury. At noon on Monday the grand jury voted to return no bill. I have been informed that the jury stood twelve to eight against returning a bill.

In view of the evidence submitted, the result was astounding, and was based in no way or manner on the testimony submitted. Mr. Porter informed me last evening that the evidence in this case was perfect; that the parties whom Crawford had suborned, Lampe, Thompson, and Valentine, were excellent witnesses for the Government, and that the only reason he could imagine why an indictment was not returned was that politics was brought into the case in their deliberations.

Coe I. Crawford was in Sioux Falls Friday night, a short time after two of the witnesses, Lampe and Thompson, arrived, and sought to influence the testimony they were to give before the grand jury by stating to them his side of the case. He had these witnesses in his room at midnight Friday night for over an hour. I saw them immediately after they left Crawford's room, and they told me of the conversation Crawford had with them. They said they had told him that they were going to tell the whole truth, as they understood it, about his hiring them for $100 to make these entries, and that the statements he had just then made to them were not in accordance with their understanding of the matters when they made the entries.

Friday evening Crawford was talking to several of the grand jurors in the lobby of the hotel, and also spoke to a number of other persons in the lobby of the hotel about the case against him. These parties came to me asking what I knew of the case, and stating that Crawford was talking to everyone that would listen to him about the matter. Of course I refused to discuss the matter in any way with any one of them.

On Saturday noon Mr. Crawford introduced himself to me, saying that he understood the Department had a case against him, and that he wished to state that the four young men of Huron, S. Dak., Lampe, Thompson, Blount, and Valentine, were entirely innocent of any wrongdoing, and that he had not knowingly done any wrongful acts himself in connection with making these entries; that he was interested with his brothers in a cattle company in Walworth County, and that at the time the Lampe, Thompson, Blount, and Valentine entries were made a lot of Russian immigrants were looking for lands in that locality, and in order to keep this class of people at a distance from their property he had suggested to some friends in Huron the advisability of filing on these lands.

Some time after these filings were made there had been some talk, he said, of these men making final proofs, but that after he saw the final homestead proof papers he had advised against it, as he had observed that the proof papers required continuous residence on the land. He also stated voluntarily that he had taken relinquishments of their entries some eighteen months ago, and that he still had them in his law office at Huron. He offered no excuse for keeping these relinquishments, and I did not ask him anything further about it. As stated before, Mr. Crawford approached me, introduced himself, and immediately began to talk about these matters in the lobby of the hotel. During the entire conversation I did not ask him a question relative to the case, and I excused myself and got away from him as soon as I decently could. To my mind he convicted himself in the short explanation he tried to make to me of these things.

The case was presented to the grand jury at the earliest possible moment after the arrival of Mr. Lewis, the special attorney from Washington, with the original papers pertaining to same. Everyone connected with the prosecution at this end believes the evidence is sufficient in every particular to have secured an indictment, and the only reason I can give for this miscarriage of justice was that Crawford or some of his friends got in their work with the grand jury on Friday night or some time before the jury convened on Monday. Last evening and this forenoon three of the grand jurors have said to me that the evidence in this case was as complete as in any case before them at this term, and that as soon as the case had been submitted to them a couple of the jurors began talking politics and said that this case was a political scheme.

This case is in many respects similar to other fraudulent land schemes on which indictments and convictions had been secured, and I do not believe that because of this man's political or social standing and influence the case should be allowed to drop. There is likely to be a grand jury called for the Deadwood (S. Dak.) term of court on May 15, 1906, and I respectfully suggest that the Department of Justice be called on to present the case to the grand jury at that term of court.

Very respectfully,

M. D. McENIRY,
*Chief of Field Division.*

---

FARGO, N. DAK., *May 21, 1906.*

The COMMISSIONER, GENERAL LAND OFFICE,
*Washington, D. C.*

SIR: See your letter "P" 34928 GFP., of February 14 in re the Walworth County land frauds and the connection of Coe I. Crawford, of Huron, S. Dak., with same; also my report on this fraudulent land scheme, dated March 31, 1906, and my letter of April 17, 1906, from Sioux Falls, S. Dak., advising the presentment of this case to the United States grand jury at the April term of court in that city and the failure of the jury to indict Crawford and Julian Blount for conspiracy to defraud, or indict the former for subornation of perjury.

I have the honor to report that a grand jury was summoned for the Deadwood, S. Dak., term of the United States district court to convene May 15, primarily for the resubmission of this case. To keep the jury as free as possible from outside influences, an order was issued by the court directing that the names of the jurors summoned be kept secret and not published in the newspapers as heretofore and to allow no one aside from the court officers to see the list of jurors until they had assembled at Deadwood.

When the grand jurors met at Deadwood in the afternoon of May 15, and before being sworn in as grand jurors, they were placed under oath by the court and searchingly examined by United States Attorney Porter for cause. During this examination each juror was advised of the Crawford case and was asked that, if sworn as a grand juror, if he would consider the case without bias, and if the evidence submitted by the Government warranted an indictment, if he would vote for same. Every man of them swore affirmatively that he would.

In addition to this the charge of Judge Carland to them as a grand jury was a specially strong one, and the court dwelt particularly on the fact that a man's social or political standing should not be allowed to influence their judgment or their duty when the evidence showed a crime had been committed.

The case against Crawford and Blount was the first one presented on Wednesday, and our evidence went in in perfect shape. The testimony of the three entrymen suborned, Lampe, Thompson, and Valentine, was direct and to the point and was in reality much stronger than outlined in my report of March 31.

From the start, however, several of the jury commenced asking irrelevant questions, and within a few minutes after the evidence was submitted a "no bill" was voted, twelve to seven.

There is no question as to the quantity or quality of the evidence in this case, and the result to all who were present at Deadwood is simply indicative of the political sympathies of the jury.

The principal witnesses for the Government, Lampe, Thompson, and Valentine, are exceptionally bright, young men and live and have been raised in the same town that has been the home of Coe I. Crawford. They have known him practically all their lives and held him in high esteem until this investigation brought home to them the depth of iniquity his selfishness and greed have led them into. Since the start of this investigation these witnesses have acted honestly and fearlessly and when summoned as witnesses testified frankly to the part they played in the scheme.

It is simply another case of men in high places escaping punishment for their misdeeds by reason of their position and influence. It seems like folly to recommend further effort in prosecuting this case, and it is questionable whether the result would be any different from this one.

The statute of limitations will soon run on two of the entries involved—Lampe's and Valentine's—and the only term of court before then is the summer term at Pierre, which is usually held in June.

While in Deadwood I learned that the conveniences for holding court at that place are limited and unless the Government had some specially important work for that term of court the term would be adjourned and no grand or petit jury summoned for same.

If the Department desires this case to be presented to another grand jury, I respectfully suggest that the matter be laid before the honorable Attorney-General at once, so that he could request the court to call a grand jury by June 1.

Before leaving Deadwood last Thursday evening I requested Mr. Porter, the United States attorney, to forward the papers in this case, all of which are now in his hands, to the Department as soon as possible, so that if any further action in the matter was desired you would have the record before you.

Very respectfully,

M. D. McENIRY,
*Chief Field Division.*

---

Under date of June 5, 1906, the Secretary of the Interior received a final report from the Attorney-General, in which he said:

"Referring to the matter of Coe I. Crawford, Julian W. Blount, and others (your files L. and R. R. Div., 1150, 1906), in which at the instance of your Department criminal proceedings were instituted against the said parties for alleged fraud in connection with certain homestead entries of public lands in Walworth County, S. Dak., I have the honor formally to report that on the presentation of the Government's evidence to the grand jury at Sioux Falls in April last that body declined

to indict. After conference with representatives of your Department it was decided to again present these cases to a grand jury, and this was accordingly done at the recent term at Deadwood, S. Dak. The result again was a failure to indict, the grand jury, it is understood, standing twelve to seven against indictment.

"These cases appeared to present flagrant violations of the public-land laws, and the failure of the Government to secure indictments can only be explained by the unusual political situation in South Dakota and the strong partisan feeling resulting therefrom. All of the cases, with two exceptions, will have been barred by the statute of limitations by the 1st of the coming month. One of the remaining two will be barred in August and the other in November of the present year. In view, however, of the Government's double failure to indict, notwithstanding the strong showing made and the probability of failure in an attempt to convict even should an indictment be secured, this Department is of the opinion that the Government's interests will be best served by pursuing the matter no further. I return the papers in the said cases herewith."

## River and Harbor Appropriation Bill.

### SPEECH

OF

# HON. STEPHEN M. SPARKMAN.

OF FLORIDA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 5, 1907.*

The House being in Committee of the Whole House on the state of the Union and having under consideration the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes—

Mr. SPARKMAN said:

Mr. CHAIRMAN: In so far as the final vote on this bill is concerned, there is no necessity for me to say aught in its behalf, for its provisions speak more forcibly in favor of its passage than I could possibly hope to do. Besides, after the thorough and masterly discussion of its leading features by the chairman of the committee and those who have followed him along the same line, any effort on my part to throw further light upon the subject would be vain and futile. But being a member of the Committee on Rivers and Harbors, and supposedly possessing some knowledge of the conditions under which this bill was framed, it will perhaps not be amiss for me to discuss briefly, as I shall, some of the leading features of the measure.

One of these which should appeal to the membership of this House, as it will to the people throughout the country, is the generous provision made for our harbors and internal waterways. The bill carries a larger amount than any of its predecessors. In fact, in cash and authorizations it is about one-fifth as much as all the river and harbor bills passed by Congress since the beginning of the Government down to and including that of 1905; and yet sentiment not only approves its size, but commercial and traffic conditions throughout the country demand this generosity toward our rivers and harbors.

There has been, Mr. Chairman, an awakening within the past two or three years along this line. I do not mean to say that there has been any new sentiment created, for there has not; it has only become more pronounced. During the twelve years of my services here there have been no more popular measures brought into this body than the river and harbor bills which we have passed every two or three years. If criticism has been heard it has been here on this floor and not elsewhere, and when here it has been in tones so soft and low as to be scarcely audible.

The country at large has always approved these measures not because the people saw in them the proverbial "pork barrel," nor yet because they desired to spend money in any given locality simply for the sake of spending it, but because their keen business sense taught them that the improvements contemplated would when made enable the people to market more easily and with greater profit the products of forest and stream, of farm and garden, of factory and mine, and everything that American industry and skill may produce.

The present condition of the public mind, justifying and demanding more liberal treatment of our harbors and waterways, is only this same sentiment developed and intensified by the campaign of education conducted to that end for the past two or three years by the National Rivers and Harbors Congress, reenforced by the ever-increasing need for water transportation now apparent on every hand.

In the earlier days of the Republic the reliance of the people for inland transportation was mainly upon the natural waterways of the country, supplemented by canals here and there. But after a while came the railroad, and for half a century these have been the chief dependence for local and interstate traffic. During these years the railroad has been developed to its utmost limit, until to-day there are more than 300,000 miles of track of all classes on which run more than 48,000 locomotives and upward of 1,800,000 cars. To be more accurate, the aggregate length of railway mileage, including tracks of all kinds, was on the 30th of June, 1905, 306,796.74 miles, while the total number of locomotives was 48,357, and of cars of all classes 1,842,871, requiring 1,382,196 men to operate them. With this equipment there were carried over this trackage during the same period 23,414,985 passengers, and freight amounting to 1,427,701,905 tons.

And yet with this great trackage and equipment, doing the enormous traffic just indicated, the railroads have not been able for the past two years to meet the heavy demands upon them, and why? Not because of any dereliction of duty toward the public, for they have no doubt made every reasonable effort to measure up to the demands upon them, but because the business of the country, growing beyond all expectation, has, in spite of the railroads, increased more rapidly than transportation facilities, and the result has been congested freight conditions east, west, north, and south, with corresponding loss and injury to all—producers, consumers, and carriers alike.

This condition, as well as its cause, was very clearly set forth by the Interstate Commerce Commission in its annual report submitted in December last. I read from page 16 of this report:

> The extraordinary prosperity which everywhere abounds, with the high prices obtainable for all classes of commodities, have so stimulated production as to yield a volume of transportation business which far exceeds in the aggregate the carrying capacity of the railroads. In a word, the development of private industry has of late been much more rapid than the increase of railway equipment. The conditions now existing in the Northwest, where large quantities of grain require immediate shipment, and in the Southwest and trans-Missouri region, where thousands and tens of thousands of live animals are denied movement to the consuming markets, may justly be regarded as alarming, while throughout the Middle West and Atlantic seaboard the shortage of cars for manufactured articles and miscellaneous merchandise has become a matter of serious concern. In some cases it is simply a lack of cars, in others insufficient tracks and motive power, in still others wholly inadequate freight yards and terminal facilities.

This is not only the opinion of the Commission, but it is also that of well-informed railroad men as well. President Elliott, for instance, of the Northern Pacific, testified a few weeks ago before the same Commission in the matter of "car shortage and other insufficient transportation facilities" that "in attempting to handle the freight offered, they (the railroads) were trying to force a 3-inch stream through a 1-inch nozzle; the railroads have more business," said he, "than they can handle."

President Hill, of the Great Northern, characterized the task as an effort "to bore a 1-inch hole with a half-inch auger," and proceeding along the same line, he said:

> The Government of this country and its growth and its business is against a stone wall so high that it can not see the top of it. No man can see the top of it to-day. I have looked everywhere, turned everywhere, to see what can be done. During the time from 1895 to 1905 the business of the country—the tons moved 1 mile—increased 110 per cent, and the facilities—the increase of facilities for doing the business and handling the miles—increased 20 per cent in ten years, or 2 per cent per annum. But of that 20 per cent three-fourths of it was new mileage that was built in sections of the country that added to the congestion of the old.
>
> Now, I think, and I have discussed this question with a number of the most intelligent railroad men that I know—I have asked them how much additional mileage should be built to absolutely relieve the country from the situation and difficulty it is laboring under, the unreasonable delay of freight. There has always to be some delay, but not an unreasonable delay. They put the necessary mileage, some as high as 50 per cent. Well, that is out of the question. But men who have taken up the question and thought about it and tried to work it out will say anywhere from 25 to 33 per cent. Now, 25 per cent of new mileage would be 55,000 miles, and if that is to be built in five years it would take 11,000 miles a year. But you would have to add one-third of the mileage for terminal and passing tracks. Add 33 per cent to 55,000 and it makes 73,000 miles. Now, 73,000 miles additional would not be any more than is actually necessary, because I have distributed it over five years, and in five years, if we are to have crops at all and if we don't stand still, the allowance is altogether too small. I do not think the new mileage, the new equipment, and terminal facilities could be produced for less than $75,000 a mile of main track, which would amount to $5,500,000,000, or a yearly average of $1,100,000,000.
>
> Now, that is what is necessary to move this stuff, to move the business of this country, and it is not any more than is necessary, but it is 30 per cent or 40 per cent of the cost of the civil war, and it is more money than the United States can raise. That is the stone wall we are up against, and foresight does not look forward far enough to get a glance of it. We are up against it until it is solved.

Thus it will be seen that while the conditions are indeed alarming neither the wise among the railroad men nor the Interstate Commerce Commission, whose duty it is to study all such matters, can see any light ahead. It is plain that if conditions remain prosperous the products of the country can not be distributed by the railroad lines alone. Hence we must look to other facilities than our railroads if we are to keep pace with the growing demands of commerce. In other words, we must look to the waterways of the country. Wherever, for instance, there is a harbor reached by rail it should be improved until the

commercial interests there are fully met. This will not only regulate freight charges in a measure, but will insure a more rapid transit of freight, both incoming and outgoing, while the improvement of our rivers, whether large or small, will act as feeders for the railroads and at the same time and as occasion may require furnish facilities for independent transportation.

In this connection, Mr. Chairman, I would like to correct an erroneous impression which seems to prevail in the minds of some of the critics of this and other river and harbor bills. They are accustomed to designate streams wholly within a State as "local streams, not worthy of improvement by the National Government," asserting that such improvement is unconstitutional and intimating that if appropriations are made for them it is either as an act of grace or more likely for the purpose of obtaining support here for other and what they are pleased to call in contradistinction "national streams."

Now, Mr. Chairman, no traffic-bearing stream can be local in a commercial sense, unless—which is rarely the case—it should be one that supplies alone a narrowly circumscribed community. But there are none such here. I have some familiarity with every item carried in this bill, and there is no stream provided for but what, in my opinion, is national in its character.

A stream may be wholly within a county or even a single township, yet may bear a commerce on its waters which, carried across State lines, is distributed by rail and water to all parts of the country. Such a stream is as much an interstate stream in a commercial sense as if it passed through a dozen States of the Union. There are several of these in my own State. One is the Manatee, wholly within the county of that name, the navigable portion of which is not more than 17 miles in length, and yet the products of the country adjacent to its banks—vegetables, oranges, and other tropical and semitropical fruits—are carried down the stream, and are shipped thence by rail and by water to every part of the country east of the Rocky Mountains.

The same is true of the Hillsborough, on either side of which the thriving city of Tampa, with its 40,000 or 45,000 inhabitants, is situated. The portion of the river mostly used for the purpose of navigation is but little more than 2,000 feet in length, and yet nearly a half million tons of commerce, worth upward of $15,000,000, were carried over its wharves last year and shipped by rail and water to every part of this country, a portion going even to foreign lands. Certainly no one would be justified in calling this a local stream. The same can be said not only of other similar streams in the State of Florida, but of those in other States provided for in this bill which do not cross State boundaries, but are referred to by some as "local streams."

Time was, perhaps, Mr. Chairman, when such a designation may have been proper. Before the advent of the railroad, touching these streams and carrying their commerce into all parts of the country, some of them may have been local in the sense now attributed to them. But interstate commerce knows no State lines, and the interstate railroad tapping these streams and continuing by rail the transportation of freight started on their waters into other States and Territories makes of them national highways as completely as if they traversed the continent or connected the waters of the Lakes with those of the Gulf.

The distinguished gentleman from Ohio [Mr. KEIFER], as I understood him, thought it wholly without the power of Congress to make appropriation for these rivers, his opinion being that the Constitution prohibits such, but at the same time was decidedly of the impression that Congress could appropriate money for a canal connecting Lake Erie with the Ohio River—a work wholly within a single State—because thereby commerce could flow over the Lakes to the Gulf through several States. But, sir, wherein lies the difference between a waterway like that and the shorter streams such as I have heretofore described, wholly within a county, on which commerce may flow to the sea, and thence by steam or sail be carried to the uttermost parts of the earth or by rail into every State in the Union? There can in principle be no difference, as there is none and should not be any in practice. These smaller streams require but little aid and get but little, but this little in some instances has accomplished more good than even much larger amounts spent upon so-called national waterways. And one of the commendable features of this bill, Mr. Chairman, is that no discrimination is made against these smaller streams. They are treated as national highways and placed on the same footing as those more pretentious as to length and volume.

Mr. SMITH of Kentucky. Mr. Chairman, I should like to ask the gentleman from Florida a question or two.

Mr. SPARKMAN. Certainly.

Mr. SMITH of Kentucky. Have you included in this bill appropriations for the improvement of any rivers that were not approved by what is known as "Board of Review?"

Mr. SPARKMAN. I think not. I heard that statement challenged the other day, but so far as my knowledge goes there have been none.

Mr. BISHOP. That is, no new projects.

Mr. SPARKMAN. No new projects. Of course there may be old projects which have been carried for many years in successive bills before the Board was established.

Mr. SMITH of Kentucky. Where the Government has been improving a stream and there is an application for the extension of improvements, further improvement of that stream, has your committee adhered strictly to the recommendations of the Board of Review on the question of further improvement?

Mr. SPARKMAN. Substantially so, though we have sometimes gone beyond the recommendation of the Chief of Engineers for the purpose of completing a project where we have thought it advisable to do so.

Mr. SMITH of Kentucky. Another question. In case the local engineers have recommended further improvement, and the Board of Review have turned down the recommendation of the local engineers, what has been the policy of the committee?

Mr. SPARKMAN. The policy has been to ignore any such project as that and to follow the recommendation of the Board.

Mr. SMITH of Kentucky. Does the committee believe that the Board of Review here in Washington knows more about the improvement of a stream down in Florida, or in Texas, or up in Maine than the local engineer in charge of the work in that locality knows about it?

Mr. SPARKMAN. I am reminded that in many of these instances the Board of Engineers have visited the particular locality; but in answer to the question propounded by the gentleman, I will say that we are compelled to resort to some source for information and we have no other body of men whose opinion we can command except the engineers of the War Department.

Mr. SMITH of Kentucky. But I want to remind the gentleman from Florida of the fact that the local engineer goes out and makes a survey and submits the facts touching the case. Take, for instance, a case like this: Suppose we have in view some particular project in our own locality. Take the Green River in Kentucky, which is one of the deepest channels that there is anywhere in the country. It is a magnificent little stream. The Government has already improved it up as far as the Mammoth Cave. In the last river and harbor bill there was provision made for a survey from the Mammoth Cave up to Montreville, Ky., with a view to further improvement. The local engineer, located at the city of Louisville, made a very thorough examination of the condition of the river. He traversed it in a skiff from Montreville clear to the Mammoth Cave, and he recommended the further improvement. Now, his recommendation, as I understand, was approved by the engineer at Cincinnati, and that comes to this board of review and they turn down the proposition. The engineer at Louisville showed that there would be a probable commerce on this part of the river of a million dollars annually, and yet this board of review turns down that recommendation.

Mr. SPARKMAN. I do not know, but in that particular case they may have made a mistake. They doubtless do make mistakes at times owing, maybe, to lack of information. We all make mistakes. Perhaps a board composed of civilians would be as capable of passing upon the commercial importance of a project as the engineers. I would not even like to yield to anyone my judgment on the importance of a project when I am acquainted with conditions, but we have created a board for the purpose of making the investigations, and we must take their opinion.

Mr. SMITH of Kentucky. The point I wanted to find out was whether the Committee on Rivers and Harbors were accustomed to abide by the decision of the board of review in all cases.

Mr. SPARKMAN. We have, at least as far as my knowledge goes.

Mr. SMITH of Kentucky. I do not believe the committee ought to do it. I think it ought to reserve the right to override the board of review.

Mr. SPARKMAN. Well, we have that right—the committee has—and so has Congress, but it would seldom be wise to exercise it. As I said, they may make mistakes, but in the main they have decided correctly. In one or two instances, in my own State, I have differed with the engineers, but we have had to abide by their decision.

Mr. SMALL. Will the gentleman permit me an inquiry?

The local examination is made by detail from the Engineer Corps of the United States Army and the Board of Engineers

for Rivers and Harbors, and this board of review referred to by the gentleman from Kentucky are also Army engineers, are they not?

Mr. SPARKMAN. Yes.

Mr. SMALL. Under the present practice these engineers pass not only on the engineering feasibility, but also on its commercial value and necessity—upon the question whether the commercial benefit justifies the appropriation?

Mr. SPARKMAN. Yes.

Mr. SMALL. Does not the gentleman think that is an anomaly, and that some other provision should be adopted rather than a board of Army engineers?

Mr. SPARKMAN. I have my opinion, but I see no way out of the difficulty. I would like to ask the gentleman what he would recommend, but I have hardly the time now to wait for his answers.

Mr. SMITH of Kentucky. I can suggest a remedy in a few words, and that is that the committee shall take the proof supplied by the local engineer who makes the examination.

Mr. SPARKMAN. I rather think it is a good idea to have a board of review. Some times you want to appeal to the board of review when the local engineers, through inadvertence or from other cause, in recommending a project have made a mistake in plan or some matter of detail.

Mr. SMALL. We have now the anomaly of Army engineers passing both upon the engineering practicability as well as the commercial necessity of the project and Congress being bound by that recommendation.

Mr. SPARKMAN. It is hardly an anomaly. It has been the practice for many decades, and Congress has not been able to devise any better plan. But be that as it may, my time is nearly up and I must proceed.

Now, Mr. Chairman, I would like to refer quite briefly to this proposition for a deep waterway from Chicago to the Gulf. The committee has been criticised quite severely for not having provided in the bill for this project. As one of the members of the committee who was opposed to it when it was before the committee, I desire to give my reasons for this opposition and for the action I saw proper to take at the time. It is a great project—one that will cost a great deal of money. The intention is not to stop at St. Louis, but to dig a deep-water canal in connection with the Mississippi River and other rivers from Chicago to the Gulf of Mexico. No one came before the committee to tell us what it was going to cost, and we thought it was the height of folly to undertake a project which some have said would cost upward of $100,000,000 until a sufficient survey had been had and the cost had been first ascertained, so that we could have something to submit to Congress.

In this bill we have provided for such a survey from St. Louis to the Gulf at a cost of $190,000. When that survey is made and the estimates are in, accompanied by the recommendations of the engineers, whatever they may be, we can determine, and this House can determine, whether it should be undertaken. Another suggestion I would like to make is that it may be better when we do reach it, and I am inclined to think we will—my friend from Missouri [Mr. CLARK] has just said that sooner or later we would be up against that proposition on the floor of this House—and when it does come it may be better that we should consider it apart from the ordinary river and harbor bill and in a separate measure, because, if it is going to cost any such sum as has been estimated, it is better that the river and harbor bill should not be loaded with it unless we are to very materially increase the size of these bills.

Mr. Chairman, I am not opposed to this class of improvement. I believe that we are rapidly coming to the point where we will have to add to the natural streams these artificial waterways. Whether this is one of them will depend upon what the engineers may report to us after they have made the examination, but at present I may say that I am not opposed to the project and will at the proper time favor it if it can be accomplished within reasonable bounds as to cost.

I believe, with others, that we are rapidly approaching that time when the products of the North, the Middle West, and the South in seeking a market will find their outlet largely through the Gulf of Mexico, and when all the waterways and railroads leading thither will be taxed to their uttermost to meet the demands of commerce flowing in that direction.

The proposed canal from the Lakes will, if constructed then, be of great use to the country, and perhaps we can not build it too soon. But, sir, we must not go into a work of such magnitude blindly. Let us have the survey first. Then if the plan is feasible the waterway will soon follow.

The suggestion, Mr. Chairman, of the probable trend of traffic from north to south leads me to speak more particularly of some of the projects in my own State and some of the harbors there opening into the Gulf. Along the 800 miles of seacoast from the mouth of the Perdido River to Key West there are many fine harbors. Indeed there is no stretch of our seacoast, whether on the Atlantic or the Pacific, that has so many. On this 800 miles we have eight fine harbors, capable, all of them, with little improvement, of accommodating deep-draft ships. These are Pensacola, St. Andrews Bay, St. Josephs Bay, Apalachicola, Carrabelle, Tampa, Charlotte Harbor, and Key West. Several of these are already reached by rail, Tampa, for instance, having three, while roads are projected or being constructed to each of the remaining harbors. Among these last is Key West, to which place Mr. H. M. Flagler, who has done so much for Florida, is, under a plan presenting some of the most wonderful engineering features of the age, constructing a railroad, to be completed perhaps within the next two years, and when thus completed Key West will be the most southerly harbor in the United States reached by rail. But all of these harbors will be needed to do the business which will be carried on between this country and those which lie to the south of us, to say nothing of the commerce that will spring up as a result of the completion of the isthmian canal.

Work is now being done on several of these harbors, while surveys are provided in this bill for the others, and it is safe to say that they can and will all be completed to the needed depth within the next four to six years, for I have no doubt but what the improvement of these harbors, with others throughout the country, will, under the stimulus of an aroused public sentiment and the great necessity for increased harbor facilities now weighing upon Congress, be carried forward to an early completion; and when I say completion, I mean, in the case of most of these harbors, a depth of 30 feet, for the commerce of the Gulf will require at least this depth at no distant day. Pensacola, New Orleans, and Galveston practically have this depth now, and the other Gulf ports, or most of them, can, with a small outlay of money, relatively speaking, be placed in the same condition.

And, Mr. Chairman, the same conditions obtain in the Atlantic ports of Florida. Fernandina, for instance, has at least 30 feet at mean high tide; Jacksonville, 25 or 26 feet, with an increasing commerce that will soon demand a greater depth, while the harbor at Miami is being improved with a view to the accommodation of the traffic which the advantageous position of that southern city and the enterprising spirit of her people invite. The tendency, too, in all the South Atlantic ports is likewise toward a depth of 30 feet, and I have no doubt but that the work of improvement will go on until this depth at least is reached.

Now I wish to say, Mr. Chairman, that while Florida has received generous treatment in this bill she gets no more than the tonnage and value of her rapidly growing commerce and the amount of money she pays into the National Treasury entitle her to receive. The tonnage of her water-borne commerce is not so great as that of some other States, to be sure, not exceeding perhaps 5,000,000 tons for the year 1906, but its value has been estimated to be worth at least $40 per ton, which would aggregate the enormous sum of $200,000,000. Then too, she is entitled to something for the money she pays into the public till. Why, sir, Tampa alone from customs, internal-revenue, and post-office receipts yielded to the public revenues last year upward of $2,500,000; while from her fields and her forests, her mines and factories, her gardens and her orchards, Florida adds millions each year to the wealth of the country. No State in the Union is progressing more rapidly, and none has so many fine harbors or presents such wonderful opportunities for that decentralization of traffic so essential in the rapid and cheap handling of freight. With thirteen fine harbors along her seacoast, eight on the Gulf and three on the Atlantic, there will be no danger of exorbitant port charges or the congestion of traffic either from or to the sea within her borders.

Now, Mr. Chairman, I have said that we must supplement the transportation facilities offered by the railroads with those of the waterways of the country, improved to their utmost capacity commensurate with the means at our command, if transportation facilities are to keep pace with that commercial growth which the present business conditions foreshadow for the future.

We have seen, Mr. Chairman, what the railroads are doing, but transportation over our waterways has not been inactive. For the fiscal year ending June 30, 1906, there were carried over our rivers 361,253,968 tons of freight, while on the Lakes there were carried, it is said, 240,000,000 tons more. In addition, there was a large amount of coastwise traffic on the Atlantic, the Gulf, and the Pacific. Of this vast tonnage of the rivers, the Lakes, and the sea, the railroads were relieved from handling the greater part, and yet the railroad tonnage reaches the enor-

mous figures I have just given. I therefore repeat, Mr. Chairman, that if transportation is to keep pace with production we must continue the liberality so auspiciously begun in this bill. The present prosperity is not a calamity, as some have asserted, and if we rise to the demands productive forces are making upon us there is no reason why these halcyon days should not continue.

Mr. Chairman, I hope that this bill will pass practically as it has been submitted to this House. It has met with painstaking care on the part of the committee; we have done the best we could with the means at our command, and I think that this House should stamp the seal of legislative approval upon our labors. [Applause.]

## Adequate Compensation for Services Rendered.

SPEECH

OF

# HON. JOSEPH A. GOULDEN,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, December 14, 1906,*

On the bill (H. R. 21574) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

Mr. GOULDEN said:

Mr. SPEAKER: I desire to express my views on the subject under consideration.

The present salaries were fixed nearly half a century ago, when the purchasing power of money was far greater than it has been in recent years. Again, the compensation in the business world has largely increased—in fact, more than doubled—in the last ten years. The country has grown in wealth so rapidly in the last half century, the people so accustomed to increased comforts, at a greatly added cost, that to-day it requires $2 where formerly one would answer and be considered ample and satisfactory.

Take the item of hotel accommodations as an illustration. Formerly the best hotels charged from $3 to $4 per day. Now the same, or those of similar standing, exact and receive from $6 to $8.

Another good example is in the matter of homes. A house that ten years ago could be erected for $5,000 now costs from $8,000 to $10,000. Owners are obliged to pay this advance, and in turn, not being philanthropists, charge it up to the tenants, increasing the rents from 25 to 50 per cent.

The great railroad corporations of the country, recognizing these facts, have within a few years increased the wages of their employees fully 20 per cent.

The city of New York pays good salaries to its public officials, even down to its laborers.

Its mayor and other chief officials receive $15,000 annually. Its commissioners and other department chiefs receive from $5,000 to $8,000, and the various clerks in the city's service are paid fully 33⅓ per cent more compensation than those of the United States Government. This is an injustice to a faithful class of public servants.

For four years I have labored before the different committees and the House itself to have the claims of the letter carriers and postal clerks recognized. I believe that this much-desired object is near at hand.

The Postmaster-General, the Committee on Post-Offices and Post-Roads, and the President of the United States have evidently seen a light, according to well-authenticated rumors that have reached the Members of this body, and something will soon be done. Let us hope that this is true, and that speedy but long-delayed justice may be done a most deserving class of men. Having been on record ever since I came to Congress as favoring fair and just remuneration to public officials, I am thoroughly in sympathy with the amendments under consideration and will support them.

Why should the Speaker and the Vice-President, the two able and faithful presiding officers of the greatest lawmaking body on earth, be paid the pittance of $8,000 yearly? The same will apply to the members of the Cabinet. The officials must live in good neighborhoods, in comfortable houses, and must entertain handsomely. In my judgment, their salaries should be not less than $20,000 instead of $12,000, as proposed, and this proposition would not then more than pay their expenses to sustain the exalted positions they occupy.

As to the proposed increase for Senators and Representatives, to take effect March 4, 1909, the beginning of the Sixty-first Congress, believing it to be fair and just, and that the sum of $7,500 yearly is necessary to enable a Member to meet the demands in the way of legitimate election expenses, the calls made on him for religious, charitable, and social bodies, with his actual living outlay, I shall vote for this item.

I am confident that my 400,000 constituents of the Eighteenth New York City district, composed of the growing and prosperous Borough of the Bronx and upper east side of Manhattan, will approve of my position on these amendments. My people are in harmony with the idea that to secure good, faithful services demands remunerative compensation, and that cheap labor is an abomination and dear at any price.

The great majority of the Members of this House know that the proposition to increase the compensation, striking out the old, obsolete law of paying 20 cents each way for mileage at every session of Congress, is right and just.

It will cost but a trifle more to pay this adequate salary with the saving in mileage.

If the Members of this body have the courage of their convictions on this matter, it will pass by a large majority. I rather fear that such will not be the case.

Be that as it may, I shall vote for all the amendments in the full confidence that those of us who do so will be sustained by the American people.

## Increase of Salaries of Senators and Members of the House of Representatives.

SPEECH

OF

# HON. MARCUS C. L. KLINE,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, December 14, 1906,*

On the bill (H. R. 21574) making appropriation for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

Mr. KLINE said:

Mr. SPEAKER: I am not rich in the sense that wealth is now reckoned, nor am I now a fit or proper subject for admission to the almshouse. On the amendment proposed to increase the salary of Senators and Members of the House of Representatives I can act unselfishly. The possession of wealth or the inconvenience of poverty will not influence my mind. I will not be a Member of the Sixtieth Congress and may bid final adieu to Congressional life on March 4 next, and therefore am personally entirely disinterested, except to do what I believe to be just between the Government and a Member of Congress.

I was heartily in favor of the previous amendments increasing the salary of the Vice-President, Speaker of the House of Representatives, and Cabinet officers to $12,000. It is, in my judgment, a reflection upon the intelligence and courage of the lawmakers of the past and the greatness and wealth of this prosperous country that the salaries of the Vice-President and Speaker of the House were not increased long ago. The national distinction these several officers occupy, the responsibility they owe to the legislative bodies over which they preside, and the large amount of labor they must perform justly entitle them to an increase of salary, and a very substantial increase.

The Cabinet officers are inadequately paid for the services they must continuously perform from the time of their appointment to the period of their retirement. It is a job which means twelve months' employment during each year. They are not enabled to practice law or give satisfactory, personal and businesslike attention to any other avocation in which they may have been engaged prior to their selection and appointment during their membership as a Cabinet officer. The large majority of Cabinet officers in the past, as well as those of the present Administration, were and are lawyers, and I boldly assert without any fear of contradiction that every such Cabinet officer could go back to his native home or metropolitan city in his State and earn at least three times as much in fees as he is receiving as a Cabinet officer. The President employs the best talent he can secure. The distinction and dignity of the office, the customary society associations attached thereto, the loss sustained to the business and profession of the incumbent, and the onerous and intricate labors he must perform all justify the increase of the salary of a Cabinet officer and beyond the limitations of the amendment just passed.

I am, however, opposed to the present amendment intending to

increase the salaries of Senators and Members of the House of Representatives. If it were possible, I would favor an increase of salary to such member who may, perchance, be chairmen of important and overworked committees. My opinion and judgment is that the average Member is well and adequately paid for the services he performs and the time he contributes to his Congressional work. It is said, as a reason for an increase of salary, that a Member must expend large sums of money to secure a nomination and election. What a candidate expends for nomination or election is personal and voluntary with each candidate. Some expend small amounts and others enormous sums in order to secure an election; and others, again, spend small fortunes to secure an election and may be defeated. No one, I dare say, is so brazen, unpatriotic, or illogical as to contend that the Government should pay the campaign expenses of the Members of this House, or any portion thereof. If such a contention were sound, it might, with equal justice and force, be asserted and contended that the Government should also pay the campaign expenses of the defeated candidate.

Members of Congress are sent to Washington to legislate for the country and protect the interests of their respective constituencies. Is $5,000 an adequate annual salary for such services? That is the question. In addition to said salary, each Member is entitled to a mileage of 20 cents at each session of Congress for each mile necessarily traveled from his home to the capital and return from the capital to his home by the nearest route usually traveled between said points. Without exaggeration, it can truly and safely be asserted that each Member during his journey to and from the capital expends no more for his reasonable traveling expenses than one-fifth of the mileage allowed. This excess of mileage allowed to Members resident more than a thousand miles from the capital contributes a large portion of the expenses incurred during the period they are or necessarily ought to be resident at Washington. In addition, each Member at each session is allowed $125 for stationery, and I am correct in saying that no Member can and does use more than $25 worth of stationery at each session for the transaction of Congressional work. These perquisites increase the Member's salary to the extent indicated.

This body is composed of all classes of men—millionaires, men well to do, lawyers, doctors, planters, farmers, and business men. Each is expected, and does live within the limits of his income, but every Member should live in a manner becoming and to the extent of the dignity of the office with which he is honored. No man can tell another within what limits his expenses of living shall be fixed. This is personal and voluntary with each Member. It is apparently true that many a Member has a larger earning capacity at home, in his business or profession, and that his service in Congress is a personal and pecuniary loss, but his income at home or his pecuniary loss whilst in the public service is not a criterion or a test or a standard by which his Congressional salary should be measured. If a Member is expected to live at the best hotels and most fashionable apartments at the capital, and enjoy the luxuries of automobiles, carriages, horses, and nightly attendance at theaters, entertainments, and other costly functions, then, without a doubt, a $5,000 salary is grossly inadequate. But we are not sent here with the idea of possessing and enjoying all of such luxuries and pay them out of the salary provided for. We are sent here to make laws and live becomingly.

The electors in our districts do not inquire much whether we are bachelors, widowers, married men, or whether we have a wife with a large or small family. If they did and our domestic relations entered into the minds of the voters, so far as the salary is concerned, then for the sake of economy it might be best only to elect bachelors or widowers without children. Or if Members with families are unable to maintain themselves with the present salary and the question of proper maintenance is to be made the test or standard by which the Congressional salary is to be fixed, then would it not be wise and equitable to fix one salary for the bachelor and widower without children and another and higher salary for the Member who has a wife and family of children? But, talking more seriously, it is certain that the present salary is adequate to support and maintain the bachelor luxuriously and in the best of style, and I think I can demonstrate that it is not a losing proposition for the Member who brings his wife with him when he is in attendance at the sessions of Congress.

Let us see, and I shall be very liberal. A Member who brings his wife with him can secure board and apartments (with the exception of one or two hotels) at first-class hotels, boarding houses, or apartments at the rate of $250 and less per month, and the bachelor or the Member who leaves his wife at home can secure entertainment at the same places for $175 and less per month. The term of Congress commences March 4th. Unless there is an extra session the Member's attendance is not necessitated at Washington until the following first Monday of December. For nine months the Member is at home attending to his private affairs, now and then attending to Congressional correspondence, and assisting place hunters to office, during which time he is in monthly receipt of Uncle Sam's check of $416, aggregating $3,744. Then the long session of Congress begins, with an average length of six months. During these six months the Member draws an aggregate salary of $2,496, and spends for entertainment, as before indicated, approximately $1,500, by which the married Member would still have to his credit during said six months about $1,000. With the average length of the long session fixed at six months, the Member is liberated and can go home about June 1st.

The Member is then again permitted to go home and remain there (unless an extra session is called) for six months, until the first Monday of December, the commencement of the short session. And during this period of six months, when he again can attend to his private affairs, he draws his monthly allowance of $416 per month, aggregating during that period $2,496, and during the remainder of his term of three months, ending March 4, the married Member who has his wife with him draws a salary of $1,248 and pays for his entertainment approximately, in the manner before indicated, the sum of $750, leaving a balance to his credit of about $500. Under this method of calculation, allowing $250 per month for expenses whilst in Washington and in attendance of the sessions of Congress, the married Member in a single term has to his credit the total sum of $7,740, with which he can comfortably maintain himself and family, whilst his residence is at home and Congress is not in session.

Everyone must acknowledge that this is quite a liberal sum, and especially so, because, ordinarily, the Member can attend to his private business affairs during fifteen months out of twenty-four; and the bachelor Member, believing that his expenses in Washington do not exceed $175 per month, liberally speaking (with occasional strolls through Peacock alley, a few dinners, and visitations at fashionable cafes) has to his credit during the term about $675 more than the married Member, or an aggregate approximating $8,415.

Although coming to Congress is not a money-making enterprise, it must be observed, however, if my calculation is correct, that the Member is adequately and quite liberaly compensated for the services rendered. I do not think it was ever contemplated that a Member should make large sums of money or become rich out of the salary provided for in payment of his services. He was to receive just and reasonable compensation for his time and the use of his experience, good judgment, services, and ability for the benefit of his country and constituency.

I can assure this House that if any of its Members has determined to retire from public life because of the inadequacy of the salary he is receiving as a Member of Congress (and I do not think that fact or sentiment urges many to retirement) there will be many able, eloquent, and worthy patriots in his district who would be willing and are ambitious to become the successor of such a retiring Member at the salary now fixed by law. Many a statesman is just waiting such an opportunity. I never knew or heard of any district wherein there was a safe or reasonable hope of election that no candidate could be found for the office. The political difficulty is, customarily, that the woods are too well filled with men who are willing to serve their country in Congress at the present rate of compensation, and many aspirants, good and worthy, must of necessity frequently be disappointed and turned down. Opportunity usually creates efficiency, and there are thousands of men in the private walks of life and in the professions, who are and could become the equals of the best and most efficient men in this House.

When the law was made fixing $5,000 as an annual salary for Congressional services, I apprehend the legislators had only in mind a long and short session of Congress, and did not have in mind the probable calling together of Congress in extra session. Were I amending the law on this subject, I would advocate an amendment to the present law fixing the salary of Members of Congress, by allowing each Member a per diem allowance of ten or fifteen dollars per day for each day the several Members might be in attendance during the period that Congress might be in extra session upon call or proclamation of the President, or allow each Member an additional salary of some reasonable sum for services during such extra session, as is provided in many of our States when extra sessions of the legislature are called by the Governor. With such an amendment I believe that the law regulating the salaries of Senators and Representatives in Congress would be adequate and just.

But every Member on this subject, as on other pieces of legislation, must and should act in accordance with his good judg-

ment and honest individual convictions. I believe, for reasons stated, that the present salary of Members of Congress is adequate, is just compensation, and commensurate with the services required to be performed by the average Member. I therefore must oppose by my voice and vote the amendment offered by the gentleman from New York increasing the salary of Members of Congress after March 4, 1909, to $7,500, and representing a progressive, an honorable, a patriotic, and intelligent constituency, who have heretofore ratified and indorsed all my public acts whilst in Congress, I also now feel confident that they will affix the stamp and seal of approval upon my vote on this subject now under consideration.

## Salaries of Senators and Representatives.

### SPEECH
OF
### HON. M. E. DRISCOLL,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,
*Friday, December 14, 1906,*

On the bill (H. R. 21574) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

Mr. DRISCOLL said:

Mr. SPEAKER: The question now before us is not new or complicated. Ever since I have been a Member of this House there has been continuous agitation in the lobby, if not in this Chamber, for an increase of Congressional salaries, and I now am rather pleased that it has come to a direct issue separate from all other matters, so that it may be definitely decided.

I shall vote against the proposition of salary increase commencing with the Sixtieth Congress, the Sixty-first Congress, or any other Congress, and I shall so vote, not because in my judgment the present salary is compensatory, but because an increased salary secured by our own official act would lower the honor and dignity of the office according as it would enlarge the emolument. Perhaps there are people who will not comprehend or appreciate this argument. Those people measure all things and all human endeavor by the dollar standard. They are unable to realize why any man should spend time and energy on any kind of work from which no financial remuneration, directly or indirectly, is expected. To such people this argument is not addressed. All over this country, in the public service and quasi public service, men and women serve on committees, boards of charities, and fill other places of work and responsibility without pecuniary consideration of any kind. They perform the labor gratuitously because they are interested in the work, because they are kind-hearted and public spirited, and because of the honor which goes with the appointment or election.

The only office in the public service which I ever held, aside from this, was as a member of a commission to draft a uniform charter for cities of the second class in the State of New York. For that work I received no compensation, although it took nearly half my time for a period of nine months. In a speech accepting my first nomination as Representative in Congress eight years ago I said:

> I have sought this office not for emolument, for I have a good practice. I have not been pushed into it by others that I may record their will. I have sought it for the honor.

Two years ago a similar bill was before Congress providing for an increase of the salaries of the President, Senators, Representatives, and other Government officials. I was asked by a reporter for the Syracuse Post-Standard if I favored it, and on January 3, 1905, I gave the following interview:

> No; I can't say that I do. My present views incline me the other way. Some of the papers and people who oppose it base their opposition on the ground that those officials are well paid now; that they receive about $1,000 a month for the time acutally consumed. That is a mistake. It is true as to the time spent in the discharge of our constitutional duties. But they are by no means our only duties, and by many of our constituents are not considered the most important.
>
> Our incidental and miscellaneous duties are never done. They do not terminate with our return from Washington at the close of the session. Have you ever called at this office that you did not see one or more persons waiting to see me? These interviews may not be important, and in many instances may as well be had with the secretary, but most people prefer to talk with their Senator or Member, and the Congressman who would devote all his time while at home to his own business or profession and none to his constituents would, in my judgment, be promptly retired.
>
> The Representative whose district is large geographically, and who lives in a small town in a remote corner of it, has a much easier time at home, for his people can not call on him without losing much time and incurring some expense, while in a compact district like this, where the Member's office is in the center and convenient of access, there are necessarily many interruptions and much time is consumed. In the large majority of cases the salary is not, in my judgment, fully compensatory when one takes into account political assessments and expenses and forced contributions for all sorts of charitable, social, and political matters.
>
> I object to an increase, because $5,000 per annum will secure as capable and honest men as if the compensation were double that sum. Generally speaking, there is no money in honest politics, and if people are dishonest increased salaries will not cure them. You never saw a man whose love for money was such as to tempt him to crooked ways who had enough. He always wants a little more. Financial temptation appeals more strongly to the man of large accumulations who takes pride in his wealth than to the poor man who doesn't care much for money and takes pride in other things.
>
> Life is made up of experiences. Most people are ambitious in some direction. Were they not they would accomplish but little. Some like distinction in the business world, others in social matters, others in scholarship and literature, and others still in political affairs. Money is not the only aim of human endeavor. There are others quite as worthy and exalting. The Congressman gets his compensation—$5,000 in cash and the balance in honor, pleasure, and experience. Few men seek a Congressional career for the salary. Most of them could earn more in their business or profession.
>
> I do not believe in the British system by which members of Parliament get no salaries. That is an ancient custom, established when only wealthy or independent men went to Westminster. Under that system such men as Edmund Burke, for instance, were not entirely independent. They had to rely on patrons of large means or on places in the Government, and were dependent on their benefactors or their party for existence.
>
> A Member of Congress can live on $5,000 a year, and many of the most useful Members do live on their salaries. Pastor Wagner's simple life and President Roosevelt's strenuous life are both inexpensive. A Member of Congress who lives at home and in Washington on his salary, after paying his political expenses and donations to all charitable institutions in his district, must live one or the other.
>
> Most people believe in the simple life. They have just made good resolutions and intend to keep them. But poor human nature is weak. Temptation comes and they forget, and it comes quite as often in the form of a surplus as from a deficiency of the filthy lucre. Too little of this world's goods may sour the disposition; too much may swell the head. Just a medium allowance is the golden mean.
>
> Necessity is said to be the mother of invention. It is also an ever-present advocate of decent conduct. Enough is better than a feast. Spiritual exaltation, the highest form of human enjoyment, is not produced by a large bank account. Ideals are not elevated by lofty mansions. Big dinners, with choice wines and expensive cigars, are not necessary to high thinking or wise legislation. If they were, the salary should be increased several fold. But good beer is better than imported champagne, and pure water better yet. Besides, there are millionaires in Washington who like to spend money and give impecunious Members as many of such entertainments as are good for them.
>
> Neither do I believe in an increase of salary for the President or Vice-President. The Presidency is the highest distinction to which a man can attain by his own efforts, and President Roosevelt is the most conspicuous personality in the world to-day. This honor is sufficient without pay, except enough to keep him and his family in comfortable simplicity. He should have a commodious house, convenient executive offices for work, and plenty of competent help to expedite business. But he should not have a new castle constructed on one of the suburban hills, and he should not indulge in show and ostentation after the manner of Eastern potentates. Our Presidents should continue to reside in the old White House, in which history has been made, and around which cluster so many pleasant and inspiring associations.
>
> This is a republic, and I hope it will continue so in form and substance. Imperialism should not be encouraged even by aping the manners of royal courts. Fifty thousand dollars annually are abundant to maintain our President and his family according to the ideals established by the founders of the Republic. Again, there is a standing application by all or nearly all the employees in the public service for increased compensation. If Congressmen and the President should double their own salaries, what excuse would they have to deny the petitions of other servants of the Government? Consistency is a jewel, even in the White House and Capitol.

In so far as that statement applies to the present proposed amendment it expresses my opinion to-day.

I was much interested in the speech in favor of the amendment delivered by the distinguished and eloquent gentleman from Massachusetts [Mr. SULLIVAN]. He spoke with so much feeling and earnestness that he seemed to have his own case in mind. It is a matter of sincere regret to his associates and a loss to the country that he has voluntarily retired from further service in this House. I quite agree with what he said and what he left unsaid when applied to him personally. But the laws are made for the many and not for the few. However, when he accepted, and perhaps sought, the nomination and election he knew what the salary was, and had no assurance that it would be raised. Did he come here for the money there is in it? My opinion of him is so high, both as to his ability and patriotism, that I am compelled to answer that question in the negative. Were the salary increased to $7,500, could he afford to remain for the money compensation alone? Certainly not. His fine attainments and recognized ability would warrant larger returns in his profession. Therefore should he serve in this House, even on the increased salary, he would have to take his pay part in cash and part in honor. That is what he is doing now, only that he is getting less cash and more honor. And should his salary be increased to the sum demanded, it would be looked upon as adequate compensation for his services, and his office would be stripped of the honor and distinction which are now accorded it, and he would not be entitled to the

good will and gratitude of his constituents and of the country which he now enjoys.

The present salary was fixed in 1866, when it is claimed that $5,000 were more than $10,000 now. The older Members of this House will remember that during the last years of the civil war and immediately thereafter paper money was so depreciated that it took nearly $3 to buy $1 in gold. Prices of labor, land, farm products, and all kinds of food and clothing were very high, and the cost of living in the same style was perhaps quite as high in legal tender as at the present time.

It is doubtful if increased salaries will stimulate competition for the office. Many candidates and fierce rivalry would make campaigns so expensive that the victors would realize no money profit. The gentleman from Massachusetts declares that unless salaries are increased future Representatives from large cities will be composed of the idle rich or ward heelers who live by their wits and by their wits alone. That would not be an inviting prospect. But his fears will not be realized for two good and sufficient reasons. First, the office requires too much work to attract the idle rich, and second, too little profit to attract the money-making ward politician.

Since 1866, when the present compensation was fixed, to the present time, has been and is a money-making period. Many of the ablest men in our country have been absorbed in making money. Wealth has been their aim and they have worshiped gold. Hundreds of millions have been accumulated by single individuals during those years. An aristocracy of wealth is being developed and classified. Yet able and honorable men have continued to represent our large cities and are now Members of that body. The salary is so small as compared with their earning capacity that many of them may, and perhaps do, look upon it as an honorarium. They like the experience and intellectual life, the honor, and distinction more than the money which they could accumulate in private life. And if the time ever comes when only the idle rich or the ward heelers will consent to represent the great urban constituencies in the Congress of the Republic, then public sentiment and civic virtue in those localities will have fallen low indeed. I am optimistic enough to expect no such calamity. Since the foundation of this nation great men, honest men, and patriotic men have willingly served in the House and Senate and in the Cabinets for the salaries allowed by law. Many of them died without wealth, but with distinguished honors, and in their declining days I am inclined to think they were as happy and contented as are the Rockefellers and Morgans of our time. Do not degrade these great offices by attempting to put them on a monetary basis.

## Post-Office Appropriation Bill.

REMARKS

OF

# HON. MARTIN B. MADDEN,

OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 20, 1907,*

The House being in the Committee of the Whole House on the state of the Union and having under consideration the bill (H. R. 25483) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes—

Mr. MADDEN said:

Mr. CHAIRMAN: Out of a total of 25,379 clerks receiving salaries up to and including $1,400 per annum, 18,290 receive $900 per annum and less.

In the last three years there have been no increases in the $1,300 and $1,400 grades. The $1,200 grade has only been increased by 183 clerks in three years.

The $1,100 grade has only been increased by 108 clerks in three years.

The $1,000 grade has only been increased by 110 clerks in three years.

It is estimated that under operation of existing conditions a clerk is compelled to serve from eight to nine years before reaching the grade of $900 per annum.

Statistics of the Post-Office Department show that 12 per cent of the post-office clerks receiving $1,000 per annum and less resigned from the service during the fiscal year ending July 1, 1906.

According to the number of resignations of post-office clerks for the month of October last, the percentage for the present fiscal year will be 21 per cent.

Statistics of the Post-Office Department show that the post-office clerks employed in first and second class post-offices worked a daily average of eight hours and forty-three minutes.

The post-office appropriation bill of last year provided for the possible promotion of 50 per cent of the $600 clerks, which meant that only 2,121 of this lowest grade should be promoted; 40 per cent of the $700 grade were promoted, which meant only 1,662 out of a total of 4,155 clerks; 20 per cent of the $800 grade were promoted, which meant only 847 clerks out of a total of 4,235 in that grade; 5 per cent of the $900 grade were promoted, which meant only 139 clerks out of 2,785; 5 per cent of the $1,000 grade, which meant only 137 clerks out of 2,744; 5 per cent of the $1,100 grade, which meant only 86 clerks out of 1,670. No promotions above this were provided for.

It is gratifying to note that after several years of effort substantial justice is at last done to a worthy lot of Government servants. Now that the clerks are to advance steadily from the date of appointment, we may hope for a much greater influx into the service. High-class men will seek and retain places in the postal service. The increase in compensation will add to the annual expenditure, but it will also add to the efficiency. The men will feel that their work is appreciated, and renewed effort will be put forth to meet the expectations of the public. There is no part of the public service so exacting, none which requires greater care, more accuracy, closer attention, more continued energy, and stricter integrity than the postal service. The men engaged in it have worked longer hours for less pay than any other class of men in the country. They have not complained; they have gone about their work cheerfully; they have hoped almost against hope for better working conditions. These have not yet come, but the increase in pay just voted them encourages the hope that the time is not far off when the number will be sufficiently increased at all the great distributing centers, so that no man will be called upon to work more than an eight-hour day. The Government should take the lead in furnishing the most advanced sanitary facilities to the men and women it employs. Their work should be done in quarters of the most approved character. The health of post-office clerks should be one of first consideration. Model buildings, constructed with a view to light and air, should be the rule and not the exception. I hope the time may soon come when buildings constructed for post-offices in the large cities will be of the one-story type, where facility of movement, coupled with good ventilation and plenty of sunlight, will enable those who transact that part of the people's business to do so under conditions which will be at once attractive and healthful. The railway mail clerks have earned the advance in pay accorded them. Their work is both dangerous and exacting. Their devotion to duty at all hours of day and night entitles them to the confidence and gratitude of the American people. They are always at work if not always on duty. When not on the car distributing mail they are studying new schemes to prepare themselves for greater usefulness in their calling. They have little or no home life. They brave the dangers of constant travel. Their hours are irregular. In common with all other postal clerks, the knowledge they acquire in the service is of no use to them if they wish to engage in other employment. For these reasons they are entitled to every consideration which a just and generous Government can properly accord them.

The compensation allowed carriers in first-class post-offices under existing law is $600 for the first year, $800 for the second, and $1,000 for the third and subsequent years.

The compensation allowed carriers in the bill now under consideration is $600 for the first year, $700 for the second year, $800 for the third year, $900 for the fourth year, $1,000 for the fifth year, and $1,100 for the sixth and subsequent years.

The committee no doubt intended to grant an increase in the carriers' pay, and in reality has raised the maximum from $1,000 to $1,100, but gentlemen will readily see that while under existing law carriers now receive the maximum of a thousand dollars beginning with the third year of service, they must serve five years under the proposed law before receiving $1,000. A little calculation will disclose the fact that the amount earned during the first nine years of continuous service is exactly $8,400 under both bills.

It is true that after a period of nine years the carrier will receive an annual compensation of $1,100, if the proposed schedule is adopted, but why pretend to increase the pay when, as a matter of fact, it is being reduced for two of the first five years of service? It may be said that for the greater compensation to be received in the long run some justification exists for the policy of less rapid advancement advocated by the authors of the present bill, but I see no good reason why a carrier at present in the $600 grade should be forced after the 1st of July to accept $700 instead of $800, and I think it a great injustice to the men. What method of calculation produced such a result

in the name of increased compensation it would be hard to say. I regret exceedingly that the committee could not see its way to recommend the following schedule, which I had prepared for adoption:

That hereafter carriers in the city delivery service shall be divided into grades, as follows:

In offices where the annual gross receipts shall be less than $50,000 the carriers shall be promoted successively to three grades, as follows:

First grade, salary $600; second grade, salary $850; third grade, salary $900.

In offices where the annual gross receipts shall be at least $50,000 and not in excess of $200,000 carriers shall be promoted successively to four grades, as follows:

First grade, salary $600; second grade, salary $800; third grade, salary $900; fourth grade, salary $1,000.

In offices where the annual gross receipts shall be in excess of $200,000 carriers shall be promoted successively to four grades, as follows:

First grade, salary $600; second grade, salary $800; third grade, salary $1,000; fourth grade, salary $1,100.

But the compromise agreed upon, which advances the men at present in the $600 grade to $800 on the 1st of July next, and those in the $800 grade to $1,000 on the same date, although only allowing those in the $800 grade to advance to $900 in succeeding years, is a great improvement over the schedule proposed in the bill as reported; and then, too, the increase of the present maximum in first-class offices to $1,100, which carriers now in the $1,000 grade are to receive on July 1 next, will encourage men to remain in the service and do their best to please the public. It is said that carriers work but eight hours, but gentlemen must remember that that means eight hours distributing, making up, and delivering mail, to do which they are required to be on duty about twelve hours. They must remain in what is known as the "swing" room when not engaged in the actual work of preparing or delivering the mail on the routes assigned them. Their work is hard; it is exacting; they are required to exercise great care in the discharge of their duties; they are devoted to the people's interest; they are required to be on duty in storm or sunshine; they earn the money paid them. I am glad their claims have in a measure received recognition by Congress.

The one thing which has impressed me as of first importance to the people at large is the necessity of the establishment of a postal savings bank system. Some there are who think the same thing about currency legislation and about tariff revision, but my judgment is that neither of these questions is as important as that to which I have just referred.

It was my intention to urge the enactment of legislation in favor of postal savings banks at this session of Congress, but the brevity of the session, crowded as it is with necessary supply bills, leaves no hope for an elaborate consideration of so important a subject.

After consultation with the leaders of the House I have concluded that unless proper consideration can be given to the subject it would be best not to take it up at this session, and since it is evident that such deliberation can not be had, I am of the opinion that its ultimate success will be more certain by postponing it to the Sixtieth Congress, when I hope to receive favorable action on the bill.

The financial legislation, which has received more or less consideration during this short session, would not, if enacted into law, put more than 200 additional million dollars into circulation, and it is not altogether certain that the legislation which has been considered would be wise. There are at least $350,000,000 of the present circulating medium not in circulation at all. It is evident that this proportion of the currency of the country is held by people who have saved it and have hidden it away. This class of people are distrustful of bankers generally, and will not deposit their savings unless in such banks as may be under the direct control of the Government itself.

It is with the hope of meeting their needs that I purpose to ask this legislation. My opinion is that the enactment of a postal savings bank law would not only force the circulation of the $350,000,000 to which I have adverted, but would encourage the people who now save to continue to put away a small part of their small earnings, because of the certainty that they could find it when it was needed, if it was in the possession of the Government.

Would it not then be better to pass the postal savings bank law and encourage these people to bring out the hidden wealth which they possess than to pass additional currency legislation, which if passed would only inflate the currency and possibly lead to a condition of things detrimental to the best interests of the country?

## Reorganization of the School System of the District of Columbia.

SPEECH

OF

# HON. EDWARD DE V. MORRELL,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 19, 1907,*

On the bill (H. R. 25037) to define the duties of the board of education of the District of Columbia, to further reorganize the schools of the District of Columbia, and for other purposes.

Mr. MORRELL said:

Mr. CHAIRMAN: During the first session of the Fifty-ninth Congress I had the honor of being chairman of a committee charged with the work of investigating the schools of the District of Columbia with a view to devising a proper method for increasing the salaries of the teachers. In pursuance of these duties together with my colleagues I made as careful an investigation as the limits of time would permit, gave hearings at which all interested parties attended and testified, and in conjunction with my associates submitted a bill to the full Committee on the District of Columbia, which was introduced into this body and in due time became law.

It was while charged with this investigation that I was enabled to see most clearly not only the glaring incongruities of the old law as remedied by the legislation referred to, but also other notorious inconsistencies and weaknesses fatal to the permanent success of the school system of the District of Columbia, but for which no remedy was provided at that time. These things impressed me seriously then, and after the adjournment of Congress I set about to know more of the different school systems of the country and to make a comparison between them and the system now obtaining in the District, with a view of drafting a more comprehensive bill which should contain the very best features of all other successful systems together with the best of the District system.

### THE UNIVERSALITY OF THE QUESTION.

Public education is one of the most vital questions before the American people, and one that has had its fairest trial and borne its best fruit within the limits of our own land. It has for half a century been the leading question in nearly all of our American States. It has been the most serious question presented for consideration to our great cities, and it has presented the same phases to nearly every village and town, and has gone on until every neighborhood in the United States places its schools as the item for first consideration and as the one of paramount importance. This is best evidenced by what is transpiring on the Pacific coast.

Public education is at once a State question, a city question, and a district question. It concerns all classes, all sexes, and all races. It is the preparation our Republic guarantees its future citizens, and the door of opportunity for all the children of the land. It is, however, above all else a local question, a fact which is recognized and emphasized in the school systems which are to-day considered as models. For the Federal Government, through powers expressly delegated to it under the Constitution by the States or through powers implied, to attempt directly or indirectly to infringe upon this inherent and jealously guarded right of the American people to personally care for and regulate the education of their children would be to my mind like willfully pulling out the keystone of the arch which has made the intelligence of the people of this land the wonder of the world and the nation the greatest and perhaps the only example of successful self-government ever beheld on the face of the globe.

It must never be lost sight of that the extension of the powers of the Federal Government, with the result in any way, shape, or form of breaking in upon those elements of government which either were originally or have as the country developed become essentially local, would be a dangerous experiment.

Jefferson, in his autobiography (vol. 1, p. 82), referring to local self-government, said as follows:

> But it is not by the consolidation or concentration of powers but by their distribution that good government is effected.
>
> Were this country not already divided into States, that division must be made that each might do for itself what concerns itself directly and what it can do so much better than a distant authority. Every State again is divided into counties, each to take care of what lies within its local bounds; each county again into townships or wards to manage minuter details, and every ward into farms, to be governed each by its individual proprietor. Were we directed from Washington when to sow and when to reap, we should soon want bread.

Of how much more importance to the citizen than the management of his farm, industry, or profession is the control of his home, which really means the bringing up and education of his children. In dealing with international or interstate affairs too great care can not be taken to keep foremost the fact that the initial, the basic, foundation of our government is local government. Therefore it is an unwise thing for any political party to continually appeal to the passions of the unthinking element in any community, for the result may obtain that once aroused all barriers will be broken down, local interest will be cast to the winds, and the eyes of all of those hungry for change and excitement will become fixed upon the Central Government rather than to the study and improvement of the interests of their local conditions at home.

In view of the complications which have lately arisen, henceforth treaties formulated and ratified by the treaty-making power of the United States should be so explicit in terms and limitations that nothing should be left to implication, which is always a dangerous and uncertain field to enter upon, whether the arrangement be between individuals, States, or nations.

In a population in the United States of about 85,000,000 people we have an enrollment of about 17,000,000 children, or in other words, about one-fifth of the entire population is enrolled in the public shools of the country. The salaries paid to superintendents and teachers are something more than $170,000,000 per annum, and the total expenditures for public schools in 1905 were twenty-five millions more than a quarter billion of dollars.

The magnitude of this expenditure becomes more apparent when it is known that it demands a payment of 30 cents on every $100 of the true valuation of all real and personal property of the land. This is of itself a high rate of taxation, but is more cheerfully paid by the citizens of every State in the Union than any other tax.

The general taxes of the country are divided into State and county, and the State tax provisions contain most generally a rate of taxation for the support of the public schools. This was soon found to be entirely inadequate to meet the demands of the schools, and out of the consequent discussion was born that feature of the school law called the "local tax." Under this proviso of nearly the entire body of American school law the districts were permitted to levy additional burdens upon themselves for the development of their schools. Nothing that can be said as to the wisdom of this feature of the law can equal the silent eloquence of the figures which differentiate the origin of the taxes going to the support of the public schools.

The total value of all the real and personal property of the United States in 1904 was $88,517,306,775. The total revenue in 1903 for public schools was $251,637,119, derived as follows:

| | |
|---|---|
| From income of permanent funds | $12, 102, 581 |
| From State taxes | 40, 455, 815 |
| From local taxes | 173, 730, 858 |
| From other sources | 25, 347, 865 |
| Total | 251, 637, 119 |

About seven-tenths of all the revenue comes from local taxes, taxes levied by the people of the neighborhood, sometimes annually and sometimes every five years, for the support of the local schools. When people year after year subject themselves to a burden which they could as easily vote off as on, it is high presumptive evidence that the added burden gives benefits correspondingly great and that the payment of the school tax is in some way connected with our basic ideas of national honor.

The real reason for this lies in the fact that the people are willing to tax themselves most heavily for that enterprise which legislation has left most largely in the hands of the people. Every little country district elects its own trustees to manage its local moneys and to supervise and control its local school. The people manage and control the primary education of the country through district supervision furnished by themselves. If there is one thing in our governmental polity more pronounced than another it is the almost complete solidarity of neighborhood control in schools. There are State officers who make a great demand upon the affections and time of the people; there are county and township officers that come very near to the more vital interests of all the people, but the school officers for the individual school district come closer to the intelligence and heart of the people than any or all of these. Nor have the people proven themselves incapable of self-government by the operation of these laws which give them an almost unlimited control of their schools. Annually have they been called upon in the very largest number of districts of the country to select trustees or directors for the management of their educational enterprises. Whom have they selected? The history of the several hundred thousand districts furnishes us a truth of which we as Americans may be justly proud. These lettered and unlettered voters have uniformly subordinated their prejudices, their party fealty, and their personal predilections to the welfare of the public school.

The rough and ready wit of the American voter has come to the front upon this question and has led him to see that the schools are for the benefit of his children, and that in order to make the benefit most advantageous their management should be of the highest order. The result has been in almost all cases that the most prudent, the most wise, and the most progressive of the district's citizenship have been selected and retained to manage the schools. Whoever would challenge the capacity of the masses for self-government should be cited to a study of the popular management of the schools by the people themselves. The chief men of every school district have served for years in the unthankful and unsalaried offices of school directors or school trustees. Go into the backwoods, where backwoodsmen select these officers, and note results? Is there a man there more alert than the others? You will find that man selected by the people to share his alertness with a system that will possibly make the backwoods children more alert than were their fathers. Go to our towns and cities and look over the roll of men who have for years at a time managed the schools. You will find the most eminent lawyers, the most eminent divines, bankers whose names are known from one end of the land to the other; in fact, the cream of the town's population, its men of the highest character and of the loftiest intelligence.

In drafting a general bill for the control of the schools of the District of Columbia I have tried to meet this idea of local control by the best arrangement possible in a political division where popular suffrage is denied. The truth, however, that the best schools are those that are most largely under popular control can not be successfully contradicted nor denied. Nor can that other truth—that the enlarged and almost unmeasured influence of the public school system of the United States rests upon the sound foundation of an almost unlimited control of the schools by the people themselves. They have been left free to manage the essential features of primary, intermediate, and high school education, with the resultant of better schools in these departments than are afforded by systems where the entire management comes from without and wherein the people themselves have the least to do.

This fundamental truth of a more enlarged freedom of management for the schools of the District of Columbia has been borne in upon my mind by an investigation of this larger question of public education and will have to be met fairly and fully before any perfected system of education can find place in that locality.

WHAT OTHER CITIES HAVE DONE.

But it is not the general work of public education that we must look for its larger triumphs, nor for forms of procedure in a model system for Washington. Public education has won its greatest laurels in the larger cities of America, and the consideration given the subject there has been greater, if possible, than that given the whole subject throughout the country. The Census Department has divided the cities of the country into five groups and given the expenditures of these cities for all purposes in two bulletins bringing the information down to 1903, from which I extract the following items for a tabulation of my own:

*City expenditures for public education.*

| Size of group. | Group. | Number of cities. | Expenditure. |
|---|---|---|---|
| 300,000 and over | 1 | 14 | $62, 469, 689 |
| 100,000 to 300,000 | 2 | 25 | 16, 991, 062 |
| 50,000 to 100,000 | 3 | 43 | 12, 186, 881 |
| 25,000 to 50,000 | 4 | 93 | 12, 930, 221 |
| | | [a] 175 | 104, 577, 853 |
| 8,000 to 25,000 | 5 | 370 | 20, 051, 361 |
| | | [b] 545 | 124, 629, 214 |

[a] Cities over 25,000 expended in 1903. [b] Cities over 8,000 expended in 1903.

From this official statement it is seen that 545 cities of the United States expended in 1903 an aggregate of $124,629,214, or about one-half of the expenditure of the whole country, for public education. This tabulation enables us to form another interesting table containing most valuable information:

| | Each. |
|---|---|
| 14 cities expend annually an average of | $4, 460, 000 |
| 25 cities expend annually an average of | 649, 000 |
| 43 cities expend annually an average of | 283, 000 |
| 93 cities expend annually an average of | 139, 000 |
| 370 cities expend annually an average of | 54, 000 |

The fourteen cities expending an average annually of $4,460,000 are New York, Chicago, Philadelphia, St. Louis, Bos-

ton, Baltimore, Cleveland, Buffalo, San Francisco, Pittsburg, Cincinnati, Milwaukee, Detroit, and New Orleans.

But not all of these fourteen cities actually expended $4,460,000. To maintain this average some must expend more and others less.

The actual expenditure in 1903 was:

| | |
|---|---|
| New York | $28,091,477 |
| Chicago | 8,471,771 |
| Philadelphia | 5,265,019 |
| St. Louis | 2,859,163 |
| Boston | 5,002,024 |
| Baltimore | 1,848,778 |
| Cleveland | 2,335,201 |
| Buffalo | 1,651,403 |
| San Francisco | 1,333,398 |
| Pittsburg | 1,737,156 |
| Cincinnati | 1,151,293 |
| Milwaukee | 1,079,738 |
| Detroit | 1,098,632 |
| New Orleans | 539,636 |

Each of four of these cities actually expends $4,460,000 and more, while each of the remaining ten expends less than that sum. The least of them, however, expends more than half a million per annum, while seventeen out of twenty-five, in group two, each expends $500,000 or more, and two in group three also make the same several expenditure.

Four of these cities expend annually an aggregate of more than $46,834,000, or nearly one-fifth of all that is paid in the entire country, and about two-fifths of all that is paid by the 545 cities of the Union having a population of 8,000 or more.

It will be admitted by everyone that the expenditure for public education in the cities of the United States is very great and that the management of such enormous aggregates would call for the best thought of the land, working out through a number of years a system or a set of systems producing the best results attainable. Such has been the case. The management of the educational funds of great cities so as to make them yield the greatest amount of good for the pupils of the schools has been most seriously considered in every one of them, with a resultant growth in efficiency every year. The great newspapers of each of these cities have opened their columns to both temperate and intemperate discussion of the question. Nothing has been done secretly or outside of the domain of the voter's sphere. The result is that our great cities have systems of schools that are the marvel of the world. It has not been long since the teachers of England sent a commission to examine our city school systems. This committee was made up of the leading educational spirits of the United Kingdom, and its report was in every respect flattering to our national pride. Even now another committee from the same kingdom is abroad in our land, and its report will doubtless add to the laurels we have already won.

The first thing that strikes us in looking at the mass of historical matter connected with these systems is the fact that they are an evolution. They represent progressive growth. They are always looking for better things and change as their field of usefulness enlarges or as experience outlines a better way. There are some general principles, however, which seem to have crystallized themselves into an unchanging law, and it may be well at this time to analyze a little more narrowly these almost universal principles which obtained in the old District law and which I have not changed in the bill introduced by myself.

A CENTRAL BOARD.

It is an almost universal practice throughout the United States to commit the business interests of the smallest educational district to a board of not less than three men or women, called "directors," "commissioners," "trustees," or "committees." In Indiana the township is made the unit and the business interests of that township as to all its schools are committed to one man, but this does not apply to the greatest system of schools in Indiana, the city school system of Indianapolis, where a board of five school commissioners are in supreme control, with a single director as its executive arm as to purely business affairs. The township system obtains in a few other States, but the consensus of practice is the district system, with its business committee of three or more men.

In the 545 city schools of the Union almost all of them have their central board of education in supreme control.

The city having the largest school interests in the land is that of Greater New York. Under its charter the mayor of the city appoints for a term of five years a board of education, consisting of forty-six members, whose powers and duties as defined under the charter are: The powers of a corporation; the use, control, and disposition of school property; the establishment and maintenance of elementary, high, evening, and vacation schools; the maintenance of free lectures; appointment of superintendents, assistant superintendents, principals, teachers, and other officers; the adoption of a course of study; the approval of text-books; the designation of licenses and the examination of applicants; the control of the retirement fund and the retirement of teachers; the trial of teachers, and the general administration of the school fund and the school law. All of this may be found in the educational chapter (Chap. XVIII) of the revised New York City charter, passed April 22, 1901, in body of New York Statute Law.

By an act of the legislature of the State of Pennsylvania, approved April 22, 1905, the control of all the schools supported by any school district of the first class was vested in a board of public education, consisting of twenty-one members appointed by the judges of the courts of common pleas for a term of three years.

Under the statutes of Illinois the control of all the school interests of Chicago is vested in a board of education of twenty-one members, some of whom have served successively for periods ranging from seven to twenty-six years.

By an act of April 28, 1905, the school interests of the city of Boston were placed under the control of a school committee of five members to be elected by the people. This act was a reorganization act and reduced the size of the committee.

The cities of St. Louis, Cleveland, Cincinnati, Pittsburg, San Francisco, Indianapolis, Baltimore, Buffalo, and New Orleans, each and all have this central board, as do more than nine-tenths of all the other cities of the country. The city of Washington has had it for years and no act of reorganization should, in my opinion, abolish it, or do aught that will weaken its supreme power of control.

It will be seen that there is no unanimity in these charter laws as to the size of the board, its method of appointment, its term of office, or any of the other minor details pertaining to its creation and life. These are questions that may well be left to the judgment of each locality, and no matter how they are settled, will not affect the fundamental question of a board having supreme power to act at any and every moment of need. In my bill I have retained the number ordained by the law of 1906, the method of their selection and their term of office, but have provided that in all future selections the question of locality shall be of greater importance.

A second principle of almost universal application is the authorization of a superintendent of schools to whom is given the supreme control of the educational arm of the board of education. The present law provides for that office, and I have not changed it in my bill.

Referring now to the new features of the bill, I beg to call attention first of all to the creation of a series of nine local school districts as an adjunct to the board of education in its administrative arm and a link between the neighborhoods and the central power. I have heretofore outlined the tremendous influence that absolute control has exercised over the development of schools generally. The people selected the boards annually, and by and through this selection kept the management of the schools entirely in their hands. When charters were granted to city governments this absolute power of control was in a measure cut off and centralized in a board of education, appointed in some cases, elected in others. The idea seems to have been to rebuke the popular management of schools and to make them more and more ideal through the law of more closely scrutinized and selected agencies. The board and superintendent were not dependent upon the people, as of old, and the ideal of education became greater than the practical. The era of fads set in, and almost every conceivable monstrosity in the way of method found place in legitimate school work. In the cities of New York and Philadelphia this drifted on until a popular wave of discontent arose and a change was made. The change provided local school boards subordinate to the boards of education.

The gulf between the board of education and the people in the District of Columbia is wider and deeper than it ever was in New York or Philadelphia. There the people might at times get a chance to change the boards by voting for a change of appointing officers. In Washington suffrage is unknown, and the people must take what is given them, with no other redress than a constant show of discontent, resulting in frictions, disturbances, and turmoil.

While it is impossible under present conditions to give the people of the District suffrage, it is not impossible to give them a greater local control of the schools, with the consequent advantage of a greater interest in the schools.

LOCAL SCHOOL BOARDS.

In Greater New York this division of responsibility and recognition of the people was demanded as early as 1901, when the legislature authorized the board of education of the city of New York to divide the city into forty-six local school districts of as nearly equal school attendance as was possible, and to

appoint five persons resident therein as a local school board for each district. This act brought 230 persons into vital relations with the schools and cast upon them duties which, from the nature of the case, could not be fully performed by the central board, and which, therefore, were not performed to the greater or lesser injury of the schools.

The duties of these boards were minutely set out in the bill and detailed every feature of local management contained in my bill, and were as follows: The visitation of their schools quarterly; inspection of the same with reference to punctuality and regularity of pupils and teachers, the number and fidelity of the teachers; the studies, progress, order, and discipline of the pupils; the cleanliness, safety, warming, ventilation, and comfort of school premises; inquiry into the sufficiency of school accommodations; recommendation of new buildings, repairs and alterations of the same; reporting of derelictions of duty on the part of school officers; to excuse absence of teachers; to try and determine all matters relating to discipline, corporal punishment, and other matters affecting the administration of the schools in their respective districts rising upon the complaint of pupils, parents, or guardians against teachers or principals, and to impose penalties prescribed by the board of education; to transfer teachers from school to school within their respective districts, and generally to act as the administrative arm of the central school board in all affairs arising within their districts.

The same difficulties arose in my own city, Philadelphia, with the result that in April, 1905, the duties of the central board were confined to questions of general policy, and sectional school boards in and for each ward of the city, consisting of twelve members each, to be elected by the people for a term of three years, were provided for. The members of these sectional school boards were to be residents of the wards from which they were chosen and their duties were similar to those recited as to the city of New York, except the settlement of local disputes.

In the report of the city superintendent of the schools of New York for 1901, Mr. W. H. Maxwell, possibly one of the ablest superintendents of the United States, and so recognized by school men from one end of the United States to the other, said of these school boards that their greatest power lay in the fact that they would bring these schools of the city nearer to the people of the city, and thereby increase their efficiency. That in order to accomplish the greatest good great care should be exercised by the central board in dividing the city judiciously into school districts and a greater care that a wise selection be made of the local school board members.

In the report of the same superintendent for 1905 it was further recommended that in addition to the duties already cast by law on the local school boards, that the hearing of truancy cases be placed within their jurisdiction. This is the strongest corroborative evidence that local disputes of all kinds are best settled by men of the neighborhood, an extension of the principle of the common law that every man is entitled to a trial by a jury of his fellows in the bailiwick in which he lives. If after four years of work under the general law the district superintendents of the city of New York, whose duties bring them into close relationship with the local school boards, recommend that these boards be given additonal power over truancy, it is strong evidence that the boards have wisely served the purpose of their creation in the conservation of energy and are more effectually meeting the questions of local school disputes than was possible under the old régime.

Assistant Superintendent Higgins, of the New York Schools, in his report to Superintendent Maxwell in 1905, said of these boards:

> The effect of regular visits to the schools is generally overlooked. The members are residents of the district; hence they are known in person or by reputation to many of the parents and to more of the pupils. Their visits are incentives to the pupils and encouragement to the teachers, for one commendation from a friend or even from an acquaintance is more helpful than ten from a stranger. Even criticism from the same source is sugar-coated, and good results are gained without the bitter taste which follows that administered by nonresidents. These visits are also made the subject of conversation at home, and parents are gratified to learn that they have a neighbor who can give official attention to the schools. It is because of this local relation and other reasons that I venture to make this suggestion: That all cases arising under the compulsory education law be referred for adjustment to the local school board of the district in which they originate.

Another great advantage of the local school board is that it relieves the system of the blot cast upon it by many thinking people—that the organization of education is mainly carried on by paid officials to the exclusion of the voluntary element. There is no doubt but that a local school official acting without pay brings to his work a greater interest, if not a greater affection, than those who are simply so employed for gain. In addition to all this, such local school boards serve as schools of experience in the preparation of men for the higher duties of the central school board and educate a greater number of men as to the real needs as well as the real work of the schools themselves.

In the bill drawn by myself I have placed the original trial of all charges against a teacher for gross misconduct, insubordination, neglect of duty, or inefficiency, whether made by a principal, the superintendent of schools, the assistant superintendent, or by any parent or guardian, in the district in which the teacher is engaged, and have made the local school board of that district the trial board. Knowing the repulsiveness of star-chamber proceedings to the American mind, I have safeguarded the teacher's rights by requiring that the trial be open and fair; that the teacher be permitted to attend in person and by attorney, and that notice in writing of the time and place of said trial, accompanied by a copy of the charges, be sent through the mails to the accused at least five days before. The punishment prescribed is suspension for a fixed time without pay or dismissal. A report of their proceedings and findings is to be forwarded at once to the board of education as a supreme board of review, which is given the power to reject, confirm, or modify the finding, and whose action is final.

The distinction between the tenure of office of teachers and persons not teachers has been clearly and definitely pointed out by the court of appeals of the State of New York in People ex. rel. Callahan *v.* Board of Education (174 N. Y. Reports, pp. 174 and 175), and the permanency of the tenure of a teacher's position clearly differentiated from that of a mere employee. This decision does not give teachers a life tenure in their positions, as has been charged by some persons, but it does throw around teachers the permanent protection of law as to the tenure of office unless removed therefrom after a trial upon preferred charges. Life tenures in office are abhorrent to Americans, but a permanent tenure subject to removal upon charges is not a life tenure by any means. Snap judgments which destroy the permanency of official service are also abhorrent to the American sense of justice, and the bill I have prepared makes all such methods of procedure unlawful.

This difficulty arises with even stronger force when the question of license is reached. In all the States and cities some prearranged method is adopted for the ascertainment of the general scholastic ability of applicants, and licenses of different grades are authorized by law. The almost universal method is an examination, although exceptions are made in many cases in favor of normal and college graduates. Where licenses are granted for one year or for a term of years the tenure of office ceases with the life of the license. The burden of constantly recurring examinations has been recognized by educators and legislators as an unnecessary load for competent teachers to carry, and the claim allowed that licenses after a certain period of satisfactory work shall become permanent. This has been held to give a life tenure in office, but is as clearly subject to termination for cause as is the tenure growing out of contractual relation. Experience has demonstrated, however, that in many cases the obtaining of a permanent license stops all further effort of the teacher to perfect himself in his work and marks the beginning of decay. Teachers with life licenses are lifted at once from recurring periods of study for examinations, and in many cases give up study altogether. They rely upon their wits to keep pace with the more studious and become centers of factions opposed to regulations, or incompetent bodies of favored men and women.

In the bill I have submitted an independent board of examiners is provided for the initial entrance into the district schools and provision made for a permanent license, safeguarded by a provision for revocation by the board of superintendents after notice and trial, as in the case of charges for misconduct and insubordination.

The best justification and defense these examinations have had came from George William Curtis in these eloquent words:

> Is not every argument for the appointment of the great body of ministerial officers of the Government by fitness and character, wisely ascertained, infinitely stronger when applied to the selection of schoolteachers? And if the selection of those officers by methods which secure their independence, promote their self-respect, and stimulate their interest and zeal, instead of destroying greatly increases the efficiency of the public service, elevates the tone of public employment, and removes a reproach from the national name, is it to be apprehended that similar care would harm the character and efficiency of the public schools? In other branches of the public service, whatever objections may be urged against the reform system of appointment, it is undeniably better than the system which it supplants. Whatever foolish questions may be asked, whatever possible frauds practiced in an examination, they are wholly insignificant when compared with the unspeakable folly, and the certain fraud of appointment by patronage or mere personal and partisan favor. There could not be a worse system of selection in all the other branches of the public service. Is it the best one for the great department of primary education?

I believe that the requirement of certification or license before appointment is universal in all the States of the Union. The examination upon which the certificate or license issues is, then, the cardinal

point. What are the vital, essential conditions of effective examinations? To be properly effective, the examinations must be uniform, entirely competent, and wholly independent of the appointing power. The examiners must be sincerely interested in education, familiar with the duties of a teacher and with the requirements of the art of teaching, and capable of conducting an examination to ascertain both the scholastic attainments and the specific, professional fitness of the candidates. Wherever these conditions do not exist, the public school system, and therefore the whole community, suffers. It is a common wrong, a common injury. The people of this country tax themselves heavily enough for the support of schools and teachers to entitle them to the best and to the adoption of all means plainly necessary to secure the best.

All licenses wherever issued, so far as I have been able to ascertain, are, at the first, nothing more than trial licenses, expiring at the end of a year. In many cases the States require a second examination for a second license, and if the teacher shall not obtain a higher grade of license than before this fact is marked against him in the general scale of efficiency provided by the system. In other States the trial license is continued for one or two years longer upon the approval of the superintendent of schools or a board of superintendents, and at the end of the second license is made permanent upon the same condition. The permanent license is in the system of all schools, with all its attendant difficulties; and if the welfare of the schools demands that integrity of examination so admirably set out in the language of George William Curtis, it is but right and fair that a revocation of this license should follow at once where the records show that a teacher holding a permanent license has retrograded in professional ability or has become wholly inefficient in the work specially set for him to do. If it is a wrong to admit incompetent persons through fraud or favoritism to the positions of teachers in the public schools, it is an equal wrong to hold incompetent teachers in their places simply because they hold a license which seemingly gives them a life position in the schools.

EXECUTIVE WORK OF THE BOARD OF EDUCATION.

Under the terms of the present school law the executive work of the board of education is cast entirely upon a single expert agent, the superintendent of schools. My bill divides the executive work of the board into two parts, the strictly educational and the purely business. To the superintendent of schools is given the supreme authority, under the control of the board of education, of all matters pertaining to the educational functions of the system, and a second superintendent is provided, a superintendent of buildings and supplies, into whose hands, under rules prescribed by the board of education, is given all matters pertaining to buildings and repairs, care and maintenance of grounds, purchase, storage, and distribution of all supplies necessitated by the system of schools.

So important has this second division of superintendence become that in nearly all of the great cities it is entirely separated from the work of general superintendency and placed in the hands of a coordinate officer.

In Philadelphia the charter law made a threefold division of this executive work, and authorized a superintendent of schools, a superintendent of buildings, and a superintendent of supplies.

In Chicago the board of education separates its educational work from the purely business work by the maintenance of a business department, whose work is performed by a superintendent of supplies and an architect. In New York the work is cast upon three departments, as was the case in Philadelphia.

In Boston there is a complete separation of the work upon more radical lines. There is a board of education composed as hereinbefore stated controlling the educational work of the city, and a board of schoolhouse commissioners, appointed by the mayor, composed of three members—an architect, a master builder, and a lawyer—into whose hands is given the entire control of building, inspection, and repairs. The board of education has no authority over this board other than those limitations contained in the statements furnished when the original order is given. Thus Boston's board, during the last five years, has expended $7,000,000 on buildings and furnishings and $275,000 per annum on repairs. In all the large cities the expenditures for these specific services are from 40 to 50 per cent of the aggregate expenditures. The necessity for this new department in Washington school administration was deemed so urgent as to impel me to provide for it in the bill under discussion.

It has been said that nowhere in the country has the clash between the standard of accommodations and their cost been settled so satisfactorily as in Boston. The careful, conscientious work of the schoolhouse commission has established what is said to be an almost absolutely accurate standard of accommodation for primary, grammar, and high schools, coupled with the most economical cost for the same. The limit of accommodation for primaries of from eight to ten rooms is 35,000 cubic feet per room and 22 cents per cube; grammar school buildings from twelve to twenty rooms the limit of accommodation is 45,000 cubic feet per room at 26 cents per cube. The economy of cost represented by 22 cents per cube is one of the standards by which the efficiency of the schoolhouse department of Boston has been most severely tested, and for which it claims a high degree of praise. This 22 cents per cube, roughly speaking, is 84 per cent for building, 9 per cent for heating, 4 per cent for plumbing, and 3 per cent for electric work; that is, of every 22 cents expended for a cubic foot of accommodation, 18 cents is in the building, 2 cents in the heating, 1¼ cents in the plumbing, and three-fourths cent in the electrical work.

An analysis of the expenditures of this board from February 1, 1905, to February 1, 1906, shows that much more attention is paid to primary and grammar schools than to high and manual training schools. The expenditure was as follows:

| | |
|---|---|
| For land and buildings— | |
| For primary schools | $589,818 |
| For grammar schools | 396,168 |
| For high schools | 24,490 |
| Not chargeable to any school | 18,613 |
| For manual training schools | 537 |

The abnormal development of high, normal, business, and manual training schools in Washington to the detriment of the fundamental basis of all schools, the primary and grammar schools, is nowhere better shown than in the buildings which are chargeable to each of these classes of schools. The primary and grammar school buildings are poor and insignificant compared with the buildings in the other classes. The primary and grammar school buildings are singularly deficient in accommodation, while the accommodation of the other classes far exceeds the demand. The ornaments of education are permitted to outweigh its utilities and the masses are neglected or made to suffer for the lack of accommodation in order that the few may progressively develop and be furnished with accommodation which they can not use. If the superintendent of buildings and supplies, as created by my bill, shall be able to revolutionize this system and give to the people of Washington abundant accommodations in the primary and grammar school grades at an economical standard of cost, he will have done as much for the true interests of public education as any other agency connected therewith.

My bill provides that this superintendent shall be an architect of good standing; that he shall give bond to the board of education for the faithful performance of his duties, and that he and all his subordinates shall be subject to the rules and regulations of the board of education. He is to do no private work upon any account, nor be interested, directly or indirectly, in any contract for building materials, the erection of any building, or the furnishing of school supplies, under penalties of not only dismissal from the service, but to a fine of not less than $10,000, to be recovered before any court in the District of Columbia having jurisdiction thereof; that this officer shall have supreme authority in the approval of all plans for new school buildings, for additions to existing school buildings, and for structural changes therein; that after contracts have been made by the board of education for any of these things, to supervise the builder or contractor, in order that the intention of the board of education shall not be overridden or changed. Supplementary to this, to purchase such books, apparatus, stationery, and other things as the board of education shall direct; to store these books and supplies, and to furnish them to the schools under the rules and regulations of the board and the direction of the superintendent. It is confidently expected that the creation of this office will take from the superintendent a large mass of purely office work which at present taxes his time to the detriment of real school work, and will place it in the hands of competent business men specially fitted for the work, and thereby increase the general efficiency of the system itself.

SUPERINTENDENCY.

The superintendent of schools, as the executive arm of the board of education in all strictly educational matters, is retained, and the law is drawn so as to be inapplicable to the present superintendent during the term for which he was selected.

The supremacy of his executive power is not changed, but for the improvement of the service a board of superintendents is created whose united experience and wisdom shall be necessary to certain ends. The truth is recognized throughout my entire bill that too much work thrown on a single board or a single individual destroys the efficiency of that board or individual. Hence the creation of the local school boards as an adjunct to the general board and the creation of a board of superintendents as an additional lever for effective superintendency. The general power of visitation is cast upon the superintendent. The

power of visitation implies personal investigation, personal inspection, and personal contact with the subordinate agencies. Heretofore so much of the purely business matter of education in the shape of official duties has been cast on the superintendent and his assistants as to weaken their scholastic efficiency. Reports from subordinates have been made to take the place of personal investigation, and this has had the tendency to build up a kind of bureau of officials, with red tape as its principal mechanism and the dry rot as its inevitable result. For intelligent supervision there must be knowledge gained by the eye and ear through a personal contact with the governed. The contrary policy results in a host of supervisors as adjuncts to the superintendency, reporting to the superintendents, usurping the rightful duties of the principal, increasing the general expense, and creating in its worst form a bureauocracy. The relief given by my bill through local boards and the establishment of a department under the superintendent of buildings and supplies will put mere office work in the hands of purely business men and give high-class men that time which is absolutely necessary to intelligently supervise and regulate the more important matters committed to their charge. The system will get the use of scholastic and trained ability at first hand and not through an intermediate body of irresponsible supervisors.

High-class men are selected as superintendents to make rules and regulations for the reception of pupils, their promotion, and their graduation; to investigate the text-books and scholastic supplies; to regulate the gradation of pupils and their courses of study; to recommend teacher assignments; to actually visit the schools regularly and inquire into the effectiveness of every school agency, and to advise, assist, and encourage the principals and teachers scholastically and not through the medium of red tape and bureau orders. This is a demand for scholastic ability, the ability for which they are paid and the ability the system demands.

It may be said that these positions exist already in the District system, and that my bill is simply an iteration. Nothing can be further from the fact. As hereinbefore pointed out, their existence is but nominal. The duties assigned these officials under the existing system are not sufficiently coordinated with the duties of other necessary agencies, nor are these other agencies so arranged as to make the superintendency effective.

SUPERVISION.

All extraneous supervision is abolished, and the necessary vital supervision of the schools placed in the hands of a real superintendency and the principals of the schools. One of the greatest evils of the Washington schools—and, in fact, a growing evil in all schools—has been the multiplication of intermediate supervising officers. The practice has made bureaucrats of the superintendents and machines of the principals, without any corresponding gain to the system. There has been a gradual weakening of the real scholastic ability of superintendents and principals, resulting in the filling of high schools with pupils not properly prepared and the world with graduates unworthy of the degree. Principals have been so shorn of their legitimate power as to become mere automatons, and the disintegrating work has gone on downward in an undue interference with teachers that paralyzes their individuality and unfits them for the only work for which the schools are created—the education of the children of the land.

Supervision has run riot, not in its genuine and legitimate sphere, but in ever-present interference and superficial control. There is a general complaint throughout the country as to oversupervision, that supervision that invades the jurisdiction, not only of principals, but of the teachers themselves. All such supervision is interference, and as such is a curse to the schools. In the last analysis the teacher is the school. It is from the teacher, in his daily and hourly contact with pupils, that all true education must spring. Everything else is system. As is the teacher so will be the school. Great and costly buildings are effective; costly and profound supervision has its legitimate place; but the real educative power—the sole agency for which all systems exist—is the vital educative element, the teacher in the grade. Every part of a system that helps the teacher is invaluable, while, as a corollary, every adjunct that invades the teacher's sphere, interferes with his scholastic judgment, or destroys his individual identity is a curse. Nowhere has system so vaunted itself as in supervision; and nowhere has its deadening, withering, and destructive results been more pronounced than in the supervision that simply interferes. Everything for a system that will fortify and strengthen the chief officer of the school, the patient, overworked, and ofttimes ill-paid teacher at the desk, but nothing whatever for a system that exalts itself over the child; that makes its glory more important than the children themselves; that substitutes interference for supervision and boasts of its corps of supervising interferers, overriding principals and undoing the power of teachers to do what they are fitted to do, and which they would do but for the officious interruptions of the overzealous, imprudent, and overpaid supervisors. I have tried in my bill to safeguard all vital and essential supervision, and have tried with equal energy to rid the Washington system of all useless supervision and to strengthen the hands of principals and teachers. Every power added to these two agencies is, in my opinion, an added power to the possibilities of the schools.

Such are the most salient features of the bill. There are many other details of management fully provided for, but which need no special analysis at this hour.

My aim has been to take up the piecemeal legislation that has obtained with reference to the great system of schools now prevailing in the District of Columbia and to embody it in a single great charter law, as has been done in every great system of city schools throughout the country. With a unified law it is possible to work out a proud position for the educational system of the capital city, but with the present scrappy, badly arranged, and widely scattered legislative enactments such a consummation is hardly possible.

I should like to see a system of schools in the District second to none in the country at large or in the world. I should like to see an effective system, a system giving the world graduates of excellence and worth, but above all giving to every boy and girl in the District the added elements of a sound primary education and the added self-respect which follows therefrom. With these he may unlock the doors of fate, swing wide the gates of opportunity, and properly and fairly adjust himself to that equality of chances which our wise and benign laws guarantee to every man.

APPENDIX.

[H. R. 25037, Fifty-ninth Congress, second session.]

In the House of Representatives.—January 28, 1907.—Mr. MORRELL introduced the following bill; which was referred to the Committee on the District of Columbia and ordered to be printed:

A bill to define the duties of the board of education of the District of Columbia, to further reorganize the schools of the District of Columbia, and for other purposes.

*Be it enacted, etc.*, That in addition to the board of education already established by section 2 of an act to fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia, approved June 20, 1906, there shall be established a series of local school boards, whose powers and duties, tenure of office, appointment and removal shall be as follows:

On or before June 30, 1907, the board of education shall divide the District of Columbia into nine local school districts. These districts shall be compact in form and, as near as may be, of equal school attendance in the public schools therein. Subject to these conditions, the board of education shall thereafter have power every five years again to divide the said District of Columbia into the same number of local school districts as it deems proper. Upon the completion of this division into local districts the board of education shall prepare maps of the same, showing the boundaries and numbers of each local district, and shall file duly authenticated copies of the same with the supreme court judges of the District of Columbia, with the Commissioners of the District of Columbia, and, after the appointment of the local boards hereinafter provided for, with the chairman of each of these boards.

SEC. 2. That there shall be established in each of these local districts a local school board consisting of five members, to be appointed by the board of education of the District of Columbia within thirty days after June 30, 1907. No person shall be eligible for appointment who is under thirty years of age and who has not resided continuously in said local district for a period of three years next preceding the date of his appointment. Each member of said local boards shall hold office for a period of five years, except that upon the first appointment the tenure of office shall be as follows: One member shall be appointed to serve for one year, one for two years, one for three years, one for four years, and one for five years, and shall be so designated by the board of education in its letters of appointment. Each member of the local school board shall serve without pay.

SEC. 3. That section 2 of an act to fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia, approved June 20, 1906, is hereby amended so as to vest the supreme control of the public schools of the District of Columbia in a board of education to be known and styled as the board of education of the District of Columbia. The members now serving upon the board as organized under the act referred to shall continue to serve until the expiration of their original appointment. In all new appointments under said section the judges of the supreme court of the District of Columbia shall select their appointees from the local school districts by this act established in the manner following: One member to be chosen from each local school district, who, in addition to the qualifications required by section 2 of the act of June 20, 1906, shall have resided within the boundaries of said local district for five years next preceding the date of his appointment, so that at the expiration of the terms of the members now serving the board of education of the District of Columbia shall consist of nine members, every one of whom shall be a resident of a different local school district.

SEC. 4. That the board of education of the District of Columbia shall, in addition to the other powers herein expressly conferred, have power—

First. To establish and conduct elementary schools, kindergartens, manual training schools, trade schools, truant schools, normal schools, night schools, and vacation schools.

Second. To maintain free lectures and courses of instruction for the people of the District of Columbia.

Third. To establish and conduct playgrounds in connection with the public schools.

Fourth. To establish new schools and discontinue or consolidate any of the existing schools.

SEC. 5. That the board of education shall keep full and accurate minutes and records of all its proceedings, and that any alteration, mutilation, defacement, extension, destruction, or amplification, with intent to defraud, of a record, minute, memorandum, notice, book, paper, or writing which the board of education of the District of Columbia is required to keep, is hereby made punishable by a fine of not less than $200 and not more than $500.

The secretary of the board of education shall have charge of the rooms, books, papers, and documents of the board and shall, in addition to his duties as secretary of the board, perform such other duties as may be required by its members or committees.

SEC. 6. That the board of education of the District of Columbia shall, immediately after the establishment of the local school districts herein provided for, group the same into three supervisory districts, each to be composed of three contiguous local school districts, to be numbered and styled supervisory district No. 1, supervisory district No. 2, and supervisory district No. 3, and whose administration and management shall be assigned to three assistant superintendents of schools, to be appointed by the board of education of the District of Columbia upon the recommendation of the superintendent of schools. Said assistent superintendents shall at all times be under the direction and control of the superintendent of schools, and shall, under his direction, carry out the rules of the board of education in all matters pertaining to the administration of the supervision of the white schools within the limits of the supervisory districts herein established, each of said assistant superintendents to reside during his term of appointment in the supervisory district to which he shall have been assigned. The board of education of the District of Columbia shall also appoint, upon the recommendation of the superintendent of schools, an additional assistant superintendent, who shall be under the control of the superintendent of schools and who shall perform like duties in the administration and have exclusive supervision of the colored schools of the entire District of Columbia, to be numbered and styled supervisory district No. 4. The said assistant superintendents shall be appointed for a term of three years.

SEC. 7. That in addition to the regular membership of the local school board provided for by this act there shall be two ex officio members, to wit: First, the resident member of the board of education of the District of Columbia, and, second, the assistant superintendent of the supervisory district of which the local school district forms a part. Each of these ex officio members shall have the right to speak at all meetings of the local school boards, but not the right to vote nor to hold the positions of chairman or secretary of the board: *Provided*, That the assistant superintendent for the colored schools shall be an ex officio member of any local school board whose boundaries contain a colored school, and shall have the same rights in these local boards as have the assistant superintendents of the regular supervisory districts.

SEC. 8. That it shall be the duty of the members of each of these local boards, within thirty days after their appointment to meet at the place designated by the board of education of the District of Columbia and organize by the election of a chairman, vice-chairman, and secretary, and to take and subscribe an oath to support the Constitution and laws of the United States. Any vacancy in any local school board caused by death, resignation, or otherwise shall be filled for the unexpired term by the board of education of the District of Columbia within ten days after the vacancy occurs. The officers of the local school board shall serve for one year and be subject to reelection. A vacancy in any of the offices of any of these local school boards shall be filled by the board in which the vacancy occurs at its next regular meeting.

SEC. 9. That subject to regulation by the rules and regulations of the board of education of the District of Columbia the duties and powers of the local school boards shall be as follows:

First. Each local school board shall meet once a month at a place in said District to be named by the board of education of the District of Columbia.

Second. Each local school board shall have power, and it shall be its duty, to adopt by-laws regulating the exercise of all powers and duties vested in it, which by-laws shall not conflict with the rules and regulations of the board of education of the District nor with the provisions of this act. Each local school board shall keep a record of its proceedings, which shall be open at all times to inspection by the board of education or any member thereof, or by any Member of the Congress of the United States. The secretary of the board shall have charge of the books, papers, and documents of the board, and shall receive an annual compensation of $100. The board of education of the District of Columbia shall provide such books, stationery, and other supplies as may be necessary for the proper performance of the duties of the local school boards. It shall also designate the regular meeting places of the local boards, which may be in any of the school buildings of their respective districts.

Third. In their respective districts the local school boards shall visit, at least four times a year, all the schools in the district, and inspect the same with respect to punctual and regular attendance of the pupils and teachers, the number and fidelity of the teachers, the studies, progress, order, and discipline of the pupils, the cleanliness, safety, warming, ventilation, and comfort of school premises, and shall call the attention of the board of education of the District of Columbia, without delay, to every matter requiring official action.

Fourth. They shall also, on or before the 1st day of July in each year, make a written report to the board of education of the District of Columbia, showing the condition of the schools, the efficiency of the teachers, and the wants of the district, especially in regard to schools and school premises.

Fifth. They shall make special reports to the board of education of the District of Columbia whenever, in their opinion, additional accommodation is necessary for kindergarten or elementary school purposes, with a recommendation of the sites within their respective districts which they consider it necessary to acquire for such purposes.

Sixth. They shall recommend such plans as in their opinion will consolidate the schools without impairing their efficiency. In this regard they are specially required to suggest plans by which the present eight-room buildings may be given over entirely to the first four grades of primary education, and by which a central grammar school building of from twelve to thirty rooms may be provided for a series of these primary buildings.

Seventh. They shall also recommend the erection of such buildings on said sites, or on any other property of the board of education of the District of Columbia, and such repairs or alterations of existing school buildings as they may deem necessary or desirable.

Eighth. They shall, from time to time, when additional accommodation is necessary, report to the board of education premises which are suitable and which may be hired for that purpose, with the terms upon which the same may be obtained, such report to be accompanied by a certificate from the resident member of the board of education that the premises so recommended comply with the laws and ordinances of the District of Columbia and with the rules and regulations of the board of education of the District of Columbia relating to buildings to be used for school purposes.

Ninth. They shall report immediately to the board of education any dereliction of duty on the part of the superintendent of schools, the assistant superintendents of schools, or any of their deputies or assistants, or the employees in their respective departments, and they shall present to the board of education all of the facts and circumstances constituting such dereliction of duty.

Tenth. They shall have power to excuse absences of teachers within their respective districts, subject, however, to the approval of the superintendent of schools in cases where teachers are excused with pay, and in accordance with the rules and regulations of the board of education governing such cases.

Eleventh. They shall try and determine all matters relating to discipline, corporal punishment, and other matters affecting the administration of the schools in their respective districts arising upon the complaint of pupils, parents, or guardians against teachers or principals, and shall impose such penalties as may be prescribed by the rules and regulations of the board of education. But they shall not have power to pass upon any complaint against a teacher until after the matter has been referred to the principal of the school in which such teacher is employed, and he has made a report thereon.

Twelfth. They shall have power, and it shall be their duty, to try charges made by a principal, the superintendent of schools, or the assistant superintendent of the district involved, or by any parent or guardian of a pupil residing in the district, against a teacher employed within their respective districts, for gross misconduct, insubordination, neglect of duty, or inefficiency. On receiving notice of said charges they shall immediately proceed to try and determine the case, and shall fix the penalty or punishment to be imposed for the offense committed, which shall consist of suspension for a fixed time without pay or dismissal. Their determination upon said charges and the penalty or punishment imposed therefor shall be reported immediately to the board of education of the District of Columbia, which may reject, confirm, or modify the determination of the local school board, and the penalty or punishment imposed, and the decision of the board of education of the District of Columbia shall be final. In all such cases, whether before the local school board or the board of education of the District of Columbia, the teacher who is on trial shall have the right to be attended by counsel and by as many friends of his selection as the respective boards may determine. At least five days previous to the date fixed for the trial or hearing a notice in writing shall be sent by mail to the teacher charged, together with a written copy of the charges or reason for the proposed dismissal. Appeal from the decision of the said board may be taken to the court of appeals of the District of Columbia, and the decision of said court shall be final, the costs of such an appeal to be a charge on the appellant: *Provided*, That the accused may, as is his or her personal privilege, waive a public trial or investigation, which waiver shall be in writing and shall be entered of record in the minutes of said board of education.

Thirteenth. They shall present charges of any dereliction of duty on the part of janitors in their respective districts, together with the proof thereof, to the board of education of the District of Columbia.

Fourteenth. They shall procure the enforcement of the general law, and the rules and regulations of the board of education relating to the sanitary condition of the schools and the health of the pupils in their respective districts.

Fifteenth. They shall have power to transfer teachers from school to school within their respective districts, but only after hearing the principals of the schools affected by such transfers, and subject to the approval of the superintendent of schools: *Provided, however*, That such transfers shall not involve promotion or increase of salary.

Sixteenth. They shall report to the board of education of the District of Columbia and to the superintendent of schools all vacancies in the teaching force as soon as such vacancies occur.

Seventeenth. The power of the board of education of the District of Columbia over all matters pertaining to the schools is to remain supreme, and the enumeration of the foregoing powers as incident and belonging to the local school boards shall not be taken as in any manner destroying the supremacy of the board of education. The local school boards are to be the chief advisers of the board of education of the District of Columbia and of the superintendent of schools as to local needs and conditions, and an administrative arm enlisting the best local thought for the advancement and development of the schools.

SEC. 10. That the executive work of the board of education of the District of Columbia shall be committed to two expert agents, who shall be appointed by the board of education for a period of three years, subject to removal for neglect of duty, insubordination, or inefficiency. Said agents shall be a superintendent of schools and a superintendent of buildings and supplies. They shall be responsible to the board of education of the District of Columbia for the conduct of their respective departments; shall make annual reports to the board, and shall, from time to time, submit such plans and suggestions for the improvement of the schools and the school system as the board of education may require, or as they shall deem expedient: *Provided*, That this provision as to a superintendent of schools shall not become applicable until the expiration of the term for which the present superintendent was appointed, unless a vacancy should occur through resignation, death, or removal.

SEC. 11. That the superintendent of buildings and supplies shall be an architect of good standing, and before entering upon the discharge of his duties shall take and subscribe an oath to support the Constitution and laws of the United States. He shall also give bond to the board of education of the District of Columbia in such amount as it may prescribe for the faithful performance of the duties of his office. He and all his assistants shall be subject to the rules and regulations of the board of education. Said superintendent of buildings and supplies shall do no private work upon any account, nor be interested directly or indirectly in any contract for building materials, the erection of any building, or the furnishing of school supplies. Any violation of this provision shall subject said officer to dismissal and to a fine of not less than $10,000, to be recovered before any court in the District of Columbia having jurisdiction thereof.

SEC. 12. That all plans for new school buildings, for additions to existing school buildings, and for structural changes shall be passed upon and must be approved by the superintendent of school buildings

and supplies, who shall submit the same to the board of education of the District of Columbia, whose action thereon shall be final. The superintendent of buildings and supplies shall, after contract made by the board of education for the erection of any new building, for additions to any existing school buildings, or for any structural changes in any old building, see that the contract of the builder or contractor is faithfully performed, and in case of any deviations or departures therefrom to report the same at once to the board of education of the District of Columbia.

SEC. 13. That the superintendent of buildings and supplies shall purchase such books, apparatus, stationery, and other things as he may be instructed to purchase by the board of education of the District of Columbia, and shall be governed in his purchases by the laws of the United States applicable to the purchase of Government supplies. He shall furnish these supplies to the schools of the District of Columbia in accordance with the rules and regulations of the board of education and under the direction of the superintendent of schools.

SEC. 14. That the superintendent of buildings and supplies shall, in general, be the executive officer of the board of education of the District of Columbia in all matters relating to the erection, alteration, or repair of buildings, care and maintenance of grounds, purchase, storage, and distribution of all supplies for the use of the schools, the board of education, the officers and employees thereof, the several local school boards, and the office of the superintendent of schools, and such other matters as may be assigned to him as such executive officer by the rules and regulations of the board of education of the District of Columbia.

SEC. 15. That no one shall be eligible for election to the position of superintendent of schools, or to the position of assistant superintendent of schools, who has not one of the following qualifications:

First. Graduation from a college or university, together with at least five years of successful experience in teaching or supervision since graduation.

Second. A principal's certificate from any school board of any of the States of the United States or from the board of education of the District of Columbia, together with eight years of successful experience in supervision or teaching.

SEC. 16. That the superintendent of schools shall have the right of visitation and inquiry in all of the schools of the District of Columbia as constituted under this or any preceding law, and shall report to the board of education of the District of Columbia on the educational system of the District and on the condition of any and all of the schools thereof. He shall have a seat in the board of education of the District of Columbia and the right to speak on all matters before the board, but not to vote.

SEC. 17. That the superintendent of schools, as often as he can consistent with his other duties, shall visit the schools of the District as he shall see fit, and inquire into all matters relating to the government, courses of study, methods of teaching, management and discipline of the schools, and the condition of the schoolhouses and of the schools generally; he shall advise and encourage the pupils and teachers and officers thereof; subject to the rules and regulations of the board of education, he shall prescribe suitable registers, blanks, forms, and regulations for the making of all reports, and for conducting all necessary business connected with the school system, and he shall cause the same, with such instructions and information as he shall deem conducive to the proper organization and government of the schools and the due execution of their duties by school officers, to be transmitted to the officers or persons intrusted with the execution of the same. He shall submit to the board of education an annual report containing a statement of the condition of the schools of the District and all matters relating to his office and such plans and suggestions for the improvement of the schools and the school system and for the advancements of public instruction in the District of Columbia as he shall deem expedient and as the rules and regulations of the board of education of the District of Columbia may require.

SEC. 18. That he shall enforce the compulsory education law of the District of Columbia and shall nominate the truant officers provided for by law. He shall also nominate to the judge of the juvenile court the probation officers required by law, and shall direct these officers in their duties.

SEC. 19. That he shall assign such clerks as may be assigned him by law to their various duties, and may suspend or discharge them for cause; but in such case the clerk or clerks so suspended or discharged shall have the right to appeal to the board of education of the District of Columbia.

SEC. 20. That he shall have power at any time to call together any or all of the assistant superintendents, directors, supervisors, principals, or teachers for consultation, and shall assign to them, subject to the rules and regulations of the board of education, such duties as in his judgment will be conducive to the welfare of the public schools in the District of Columbia. Three of the assistant superintendents shall be assigned by him to the work of supervision of the white schools in the supervisory districts hereinbefore established and the fourth one to the supervision of the colored schools of the entire District of Columbia. He shall also report any case of gross misconduct, insubordination, neglect of duty, or general inefficiency on the part of any assistant superintendent, director, supervisor, or principal to the board of education. He may also empower an assistant superintendent to execute all the duties of his office during his absence or disability.

SEC. 21. That the superintendent of schools and the four assistant superintendents of schools shall constitute the board of superintendents of the District of Columbia. The superintendent of schools shall preside over the board of superintendents, and all communications from the board shall be made in his name. The board shall have power to pass by-laws regulating its duties. It shall keep a list of all principals and teachers in the service of the board of education, with a record of the dates of their appointment, the grades and classes taught by them, and of such other matters as the board of education may prescribe. Such lists shall be open to the inspection of teachers so far as their own record is concerned, of members of the board of education, of the members of the local school boards, and of principals. All principals shall report to the board of superintendents all matters pertaining to the work of teachers under their control in such form as the superintendent of schools may require.

SEC. 22. That the board of superintendents shall establish for the schools, subject to the approval of the board of education, rules and regulations for the reception of pupils into the schools of the District, the promotion from grade to grade, from school to school, for the graduation from all grades of schools, and for the transfer of pupils from one school to another.

SEC. 23. That the board of superintendents shall recommend to the board of education such changes in text-books, apparatus, and scholastic supplies as in their opinion will advance the interests of the schools. They shall also determine the number of new text-books and the amount of apparatus and scholastic supplies needed for the succeeding year and report the same to the board of education of the District of Columbia.

SEC. 24. That the board of education of the District of Columbia, before acting upon the recommendation of the board of superintendents as to any proposed change in text-books, apparatus, or scholastic supplies, shall give public hearings, at such times and places as it may determine, to the publishing houses whose books are recommended for adoption and to those houses whose books would be displaced. At this hearing a free and full discussion shall be had as to the merits of the respective books, apparatus, and supplies, and the board may hear such principals or teachers as it may elect. If the board of education of the District of Columbia shall approve the recommendations of the board of superintendents in whole or in part, the changes shall be made under the rules and regulations of the board of education, and the books, apparatus, or supplies so adopted shall not again be changed for a period of three years: *Provided*, That the books, apparatus, and supplies not displaced by the final action of the board of education shall also remain unchanged for a like period of three years: *And provided further*, That nothing in this section limiting the hearing of the board of education to two publishing houses shall in any manner affect the action of the board of superintendents as to the number of publishing houses to be heard in the matter of recommendation.

SEC. 25. That the board of education of the District of Columbia shall have power to change the grades of all schools and of all classes of any high school or other school under its charge upon the written recommendation of the board of superintendents and upon the same recommendation to adopt and modify courses of study for all schools under its jurisdiction: *Provided*, That elastic and flexible courses of study for high and manual training schools shall be considered as of greater importance than the abstract demands of an ideal system and that morality and American citizenship shall be emphasized.

SEC. 26. That the board of superintendents, with the advice of the directors of the respective special branches, shall assign to the several local school districts such teachers of drawing, music, physical culture, manual training, sewing, or other special branches as the board of education of the District of Columbia may appoint, and the local school boards shall assign such teachers to their duties in the schools of the several districts to which they are appointed. The directors of special branches shall act as advisers to the board of superintendents, to the local school boards, and to principals with regard to the special branches they supervise, and under the direction of the superintendent of schools shall examine the work in their several branches, report upon the same, and instruct teachers in the teaching of their several branches.

SEC. 27. That the board of education of the District of Columbia shall have power, upon the nomination of the board of superintendents, to appoint such directors of special branches as are provided for by law for the term of three years; such directors shall be subject to the supervision and direction of the superintendent of schools. No person shall be eligible for appointment as director of a special branch who is not—

First. A graduate of a college or university recognized by the board of education of the District of Columbia; and

Second. A graduate from a course of professional training of at least two years in the special branch that he is to supervise or teach; and

Third. A teacher of that special branch with at least three years of successful experience.

SEC. 28. That under the supervision and direction of the superintendent of schools the assistant superintendents shall visit every school in the supervisory district to which they are assigned; shall inquire into all matter relating to the government, courses of study, methods of teaching, discipline and conduct of such schools, and the condition of the schoolhouses and of the schools generally; shall examine classes when necessary, and shall advise, assist, and encourage the pupils and teachers thereof.

SEC. 29. That the assistant superintendents shall report the results of their inspections, supervisions, and examinations to the superintendent of schools, who shall transmit such parts of such reports as he may consider necessary or proper to the board of education and to the local school boards for the districts for which the same are made, respectively. Such reports shall be made at such times concerning such matters and in such form as said superintendent of schools shall require. It shall further be the duty of each assistant superintendent to report to the local school boards within any local school district to which he is assigned, and through the superintendent of schools to the board of education, any case of gross misconduct, neglect of duty, or general inefficiency arising in such district on the part of any principal or teacher or other member of the educational staff within his jurisdiction.

SEC. 30. That, subject to regulations prescribed by the board of superintendents and under the supervision of the assistant superintendents in charge, the principal of each school shall have charge of the supervision of schools in his building or buildings, and shall direct the methods of teaching in all classes under his charge. And the board of education of the District of Columbia, upon the joint recommendation of the superintendent of schools and of the local school board of any local school district, shall so consolidate existing schools as to create a central grammar school, to which all grammar school pupils of the primary schools affected thereby shall be transferred, and to which the remaining primary schools shall be annexed as feeders. The board of education, upon the recommendation of the superintendent of schools, shall appoint a principal for this central grammar school, who shall also be principal of its annexed primary schools and shall supervise the same as herein provided. The positions of supervising principals are hereby abolished.

SEC. 31. That the board of superintendents shall have power, from time to time, to issue syllabuses of the topics in the various branches taught, which shall be regarded as the minimum amount of work required in such branches.

SEC. 32. That the board of education of the District of Columbia, on the recommendation of the board of superintendents, shall designate kinds or grades of licenses to teach, which may or shall be issued in the District of Columbia, together with the academic and professional qualifications required for each kind or grade of license.

SEC. 33. That the board of education of the District of Columbia, on the recommendation of the board of superintendents, shall also designate the academical and professional qualifications required for service as principals, assistant principals, heads of departments, assistants, and all other members of the teaching staff.

SEC. 34. That no license or certificate shall be granted to any person who is not of good moral character, nor to any person who shall not

first have presented a certificate from a physician recognized by the board of education as competent for the purpose, setting forth that said applicant is neither mentally nor physically disqualified by any chronic or acute physical defect from successfully performing the duties of a teacher: *Provided,* That this section shall not apply to any person now enrolled upon the educational staff of the District of Columbia.

SEC. 35. That a board of examiners is hereby constituted whose duty it shall be to examine all applicants who are required to be licensed as teachers in the District of Columbia, and to issue to those who pass the required tests of character, scholarship, and fitness such licenses as they are entitled to receive. Such board of examiners shall consist of the superintendent of schools, together with four persons appointed by the board of education upon the nomination of the superintendent of schools. The terms of these four examiners shall be for one, two, three, and four years and shall be so designated in their nominations and appointments, and as their terms expire their successors shall be appointed for a full term of four years, which shall thereafter be the full and regular term of said examiners. They shall each be paid $100 per annum, except that the superintendent of schools shall receive no additional compensation.

SEC. 36. That no person shall be appointed examiner who does not possess some one of the following qualifications:

First. A degree or diploma from a college or university recognized by the board, together with five years' successful experience in teaching since graduation.

Second. A State certificate obtained from the proper educational authorities of some State of the United States as the result of an examination held since 1880, with at least seven years' successful experience in teaching.

Third. The highest certificate issued by the school authorities of the District of Columbia since 1880, together with eight years' successful experience in teaching.

SEC. 37. That no assistant superintendent of schools, director, principal, or teacher engaged in the public school system of the District of Columbia shall be permitted to serve on the board of examiners.

SEC. 38. That the board of examiners shall hold such examinations as the superintendent of schools may prescribe and shall prepare all necessary eligible lists, which shall be kept in the office of the superintendent of schools and be open to inspection by members of the board of education, assistant superintendents, and local school boards. All licenses shall be issued in the name of the superintendent of schools of the District of Columbia.

SEC. 39. That graduates of colleges and universities who have pursued for not less than one year pedagogical courses satisfactory to the superintendent of schools; graduates of schools and colleges for the training of teachers approved by the superintendent of schools; teachers holding a State certificate issued by the proper authorities of any State of the United States since the year 1890, or persons who, on the 1st day of July, 1907, shall be assistant superintendents, supervisors, directors, supervising principals, principals, heads of departments, or teachers in the public schools of the District of Columbia may be exempted, in whole or in part, from such examination at the discretion of the superintendent of schools. The names of those to whom licenses shall be granted, including those exempted from examination, shall be entered by the superintendent of schools upon lists to be filed in his office, a separate list being made for each grade or kind of license for which the board of education shall by its rules and regulations make provision; and such lists shall always be open to the inspection of the members of the board of education, to local school boards, the assistant superintendents, and the principals of schools. Except as superintendent of schools or assistant superintendent of schools or superintendent of buildings and supplies, as director of a special branch, as principal of or teacher in a training school, or as principal of a high school, no person shall be appointed to any educational position whose name does not appear upon the proper eligible list. No person shall teach in any public school of the District of Columbia who has not such license, except as herein otherwise provided, nor shall any unlicensed teacher have any claim for salary.

SEC. 40. That licenses to teach shall be issued by the superintendent of schools for a period of one year, and may be renewed without examination in case the work of the holder is satisfactory to the superintendent of schools for two successive years. At the close of the third year of continuous successful service the superintendent of schools may make the license permanent. Authority to revoke any permanent license for cause shall be vested in the board of superintendents: *Provided, however,* That no permanent license shall be revoked until the causes have been investigated and a trial had as hereinbefore provided for.

SEC. 41. That principals, assistant principals, heads of departments, teachers, assistants, and all other members of the teaching staff shall be appointed during the month of August of each year by the board of education of the District of Columbia on the nomination of the board of superintendents for a term of one year from the 1st of September next ensuing; and their pay shall be made in twelve equal monthly installments, or for such time as they may retain their connection with the schools of the District: *Provided,* That upon all reappointments for any one or all of these positions preference shall be given to the old appointees, unless the good of the schools shall demand a change. Such nominations and appointments shall be made except in the case of high schools, manual training schools, or training schools for teachers, for the several local school districts, respectively, and when so made the principals, assistant principals, heads of departments, teachers, assistants, and all other members of the teaching staff shall be assigned to duty to such schools and to such positions in such schools as the board of superintendents shall determine. Where practicable, teachers shall be appointed for schools in the local school districts where they reside.

SEC. 42. That teachers and principals may be promoted or transferred from one school to another school within the District by the board of superintendents, subject to the approval of the board of education of the District of Columbia: *Provided, however,* That a teacher shall not be transferred from a school in one local school district to a school in another local school district without his consent. For all purposes affecting the appointment, promotion, or transfer of the teachers in any school, the assistant superintendent assigned to the local school district in which such school is situated, the principal of such school, and, in the case of transfer, the assistant superintendent and the principal of the school to which it is proposed to transfer a teacher, shall have seats in the board of superintendents, with votes on such propositions. The provisions of this section shall not be held to affect or impair the power of the several local school boards to transfer teachers from school to school within their respective districts, as hereinbefore provided.

SEC. 43. That except as herein provided, the nominations provided for above must be made from the list of properly certified principals and teachers and other persons eligible for service in the positions to be filled, in the regular order of the standing of the candidates on said lists: *Provided, however,* That the board of superintendents, subject to the proviso of section 41 of this act, may consider for each appointment the three persons whose names are highest on the appropriate eligible list. The existing eligible lists in the District of Columbia and the relative standing of persons whose names are on said lists shall not be affected by the passage of this act.

SEC. 44. That the nominations by the board of superintendents, as herein provided, shall be filed with the secretary of the board of education of the District of Columbia on or before the 10th day of July, 1907, and within the same time in each ensuing year. Within thirty days after the filing of such recommendation with the secretary of the board the board of education of the District of Columbia shall finally act upon said nomination, either by appointing such principals or teachers or other officers or by rejecting such nominations. A failure on the part of the board of superintendents to nominate within the time prescribed herein shall be held as equivalent to the nomination of the principals, teachers, or other members of the teaching staff at that time holding these positions under appointment by the board of education. A failure on the part of the board of education to confirm or reject a nomination within the time prescribed herein shall be held as equivalent to the appointment of the principals, teachers, or other members of the teaching staff. In case of a failure to appoint, other names shall be submitted by the board of superintendents to the board of education within two weeks after each failure until an appointment is made. In case of the consolidation of schools or of the discontinuance of any school or of the abolition by law of any position, principals, teachers, and holders of the abolished positions, if in good standing, shall be preferred in new appointments to be made in any of the schools of the District. Resignations of principals and teachers and of all other members of the teaching staff shall be made to the superintendent of schools.

SEC. 45. That principals, teachers, and other members of the teaching staff shall be retained solely upon their special fitness to teach, and in the assignment of such persons to duty their natural or acquired aptitudes for particular phases of teaching shall be duly considered. Principals shall perform a certain amount of actual teaching, and their fitness to supervise shall be determined by their special fitness to teach. Teachers in all schools shall be held responsible for the teaching of the regular grade work as outlined in the syllabuses of the board of superintendents. To attain this end, the principals shall instruct the teachers not only as to the matter involved, but as to the best methods of procedure. All such supervision, however, shall stop short of interference, and matter shall be deemed of greater importance than method. Supervision shall not extend to criticism of teachers before their classes nor to interference with teachers in the management of their classes. The true dignity of teachers as the ultimate agents of all right instruction shall be respected, and all regulations detracting from or destroying that dignity are expressly forbidden. All syllabuses shall be rationally and scientifically prepared by the board of superintendents with special reference to the matter to be taught, and be stated in as plain and concise language as the subject will permit without reference to the pedagogical or psychological reasons assumed to underlie it. The assistant superintendents shall specially explain these syllabuses, both as to matter and method, to the principals of the schools, and to this end are empowered to call the principals together from time to time and give them such instruction as they may deem fit. All principals who fail in special fitness to teach or in the higher aptitudes of supervision, together with all teachers who fail in actual teaching power or who willfully refuse the guidance of their principals, shall be deemed inefficient and dropped from the rolls.

SEC. 46. That teachers, to be retained upon the eligible list, shall attend all meetings called by the superintendent of schools or by the principal of the school to which they are assigned. The superintendent of schools, upon the recommendation of the board of superintendents, is also empowered to require principals or teachers to further fit themselves for the duties of their positions by attendance upon professional schools during the vacation months under penalty of being stricken from the rolls.

SEC. 47. That the schools of said District under the management and control of the board of education of the District of Columbia shall be free to all pupils over 5 and under 21 years of age residing in said District or who during such tutelage own property in and pay taxes levied by the government of the District of Columbia, or whose parents reside or are engaged in business or public duties therein or during such tutelage pay taxes levied by the government of the District of Columbia: *Provided,* That no child under 6 years of age shall be received in said schools except in kindergarten classes: *And provided further,* That nonresident or nontaxpaying pupils may be admitted to and taught in said schools on the payment of such amount, to be fixed by the board of education of the District of Columbia, as will cover the expense of their tuition and cost of text-books and school supplies used by them; and all payments hereunder shall be paid into the Treasury, one-half to the credit of the United States and one-half to the credit of the District of Columbia.

SEC. 48. That the board of education of the District of Columbia shall represent the schools and the school system of the District of Columbia before the Commissioners of the District of Columbia and before the committees of Congress in all matters pertaining to estimates and appropriations for educational purposes and in all other matters, and shall in general be the representative of the school system of the District in its entirety. On or before the 1st of October in each year it shall submit an estimate in detail of the money needed for the entire school system of the District during the next succeeding fiscal year to the Commissioners of the District of Columbia, who shall include the same in their estimate of money needed for the government of the District of Columbia. The board of education shall administer all money appropriated or available for educational purposes in the District of Columbia, subject to the general provisions of the law relating to the audit and payment of salaries and other claims.

SEC. 49. That the board of education of the District of Columbia shall provide such offices and rooms as it may deem advisable within the District of Columbia for the administration of the powers and duties conferred by this act upon the board of education, the local school boards, the board of superintendents, the superintendent of schools, and the board of examiners.

SEC. 50. That on and after July 1, 1907, all children of school age

being instructed in the schools of the District beyond the kindergarten grade shall be given a full school-day session, and the board of education, upon the recommendation of the proper local school board, shall have power to rent such additional property as may be required for this purpose. The board of education shall have power to dispose of such personal property used in the schools or other buildings under the charge of said board, upon the joint certificate of the superintendent of schools and of the superintendent of buildings and supplies, as is no longer required for use therein; and all money realized by the sale thereof shall be paid into the Treasury of the United States to the credit of a special rent fund, which is hereby appropriated to the payment of the additional rent charge authorized by this section.

SEC. 51. That the board of education shall make such provision as will secure prompt and efficient service for the selection and acquisition of sites, the planning and erection of new buildings for school purposes, and for the alteration and repair of existing buildings and for the regulation of the purchase and distribution of school books and supplies and for the execution and carrying into effect of all matters and things authority for which shall have been granted by the board and for the preservation of all school records. Subject to such provision, the superintendent of school buildings and supplies shall be the executive officer of the board in respect to all matters contained in this section or in respect to which he is charged with duties under the provisions of this act.

SEC. 52. That the board of education shall provide for the purchase of all books, apparatus, stationery, and other things necessary and expedient to enable the schools of the District to be properly and successfully conducted. It shall cause to be furnished all necessary supplies and shall make regulations for the furnishing thereof to the schools in the several local school districts. It shall have power to enact rules and regulations for the government of the superintendent of buildings and supplies, which rules and regulations shall provide that all supplies, as far as possible, shall be obtained by contract, made at public letting in the manner provided by law for obtaining other Government supplies.

SEC. 53. That requisitions for text-books, apparatus, and scholastic supplies shall be made by principals upon the superintendent of buildings and supplies under rules to be established by the board of education, but no requisition for any school shall be honored unless it is approved in writing by the assistant superintendent of the supervisory district where such school is situated.

SEC. 54. That section 6 of an act to fix and regulate the salaries, school officers, and other employees of the board of education of the District of Columbia, approved June 20, 1906, be amended so as to read as follows:

"SEC. 6. That the board of education of the District of Columbia shall have power to arrange all teachers in the classes and groups in the above schedule, except as hereinafter specified:

"For the year ending June 30, 1907, each principal, head of department, and teacher shall receive the salary in his class next above his present salary, and no teacher or principal shall in any event receive less than his present salary. If promoted to a higher class, he shall receive the salary in that class next above his present salary, and after June 30, 1907, if certified by the board of superintendents, he shall receive an annual increase within his class or group as herein provided, without action of the board of education; but no principal, head of department, or teacher shall in any one year receive more than one promotion within his class or group: *Provided*, That if the salary in his class next above his present salary shall be less than $25 in excess of his present salary he shall receive the next higher salary, so that no teacher shall receive for the first year an increase of less than $25.

"A teacher shall not be promoted from one class to another, except by the board of education of the District of Columbia, upon the recommendation of the board of superintendents.

"Every new teacher at the time of his appointment shall be assigned to a class or group by the board of education on the recommendation of the board of superintendents, and shall receive for the first year the minimum pay of said class or group. The first year in Group A, class 6, shall be probationary.

"For the purpose of this act a model teacher shall be held to be a teacher of the first or second grade, or of the kindergarten, whose special aptitude for primary teaching makes it desirable to retain him in said grades with the pay of a higher grade.

"Teachers of classes 1 and 2 shall receive an annual increase of salary of $25 for four years, or until the maximum is reached.

"Teachers of class 3 shall receive an annual increase of salary of $25 for ten years, or until the maximum is reached.

"Teachers of class 4 shall receive an annual increase of salary of $30 for ten years, or until the maximum is reached.

"Teachers of class 5 shall receive an annual increase of salary of $40 for ten years, or until the maximum is reached.

"Teachers in Group A of class 6, after the probationary year, shall receive an annual increase of salary of $100 for eight years; in Group B, of $100 for three years.

"The aforesaid equal annual increase of salary for each class or group of the teaching staff of the public schools of the District of Columbia shall be uniform throughout each class or group, and each of said persons shall at once, after the certification of the board of superintendents, receive all the emolument in accordance with the above schedule of minimum salaries to which said person is entitled by reason of merit, of experience, and of grade of class taught."

SEC. 55. That a public school teachers' retirement fund, to be made up from the following sources, is hereby created:

First. All money, pay, compensation, or salary forfeited, deducted, reserved, or withheld for any cause from any member or members of the teaching or supervising staff of the public schools of the District of Columbia. The superintendent of schools shall certify monthly to the board of education the amounts so forfeited, deducted, reserved, or withheld during the preceding month. Said amounts shall be turned into said retirement fund.

Second. All moneys received from donations, legacies, gifts, bequests, or otherwise for or on account of said fund.

Third. Ten per cent annually of all excise moneys or license fees belonging to the District of Columbia and derived or received by the collector of taxes from the granting of licenses, wholesale or retail, to sell strong or spirituous liquors, ale, wine, or beer in the District of Columbia. The Treasurer of the United States is authorized upon the receipt of any moneys from this source to place 10 per cent thereof in said retirement fund.

Fourth. One per cent of all the salaries of all members of the teaching and supervising staff of the public day schools of the District of Columbia, whether the same be kindergarten, primary, grammar, high, normal, manual training, or special, except that the amount deducted from the salary of any teacher or principal shall not exceed $30 in any one year, and the amount deducted from the salary of any supervising official shall not exceed $40 in any one year. And the board of education shall, after July 1, 1907, deduct on each and every pay roll of the teaching and supervising staff said 1 per cent from each and every amount earnable in the period covered by the said pay roll, notwithstanding the minimum salaries provided by section 4 of an act to fix and regulate the salaries of teachers, school officers, and other employees of the board of education of the District of Columbia, approved June 20, 1906, shall be thereby reduced, and shall certify monthly to the Treasurer of the United States the amounts so deducted, and said amounts shall by the Treasurer be turned into said retirement fund. All deductions made under the provisions of this clause from the salary of any person who may be dismissed from the service for cause before said person shall have become eligible for retirement under the provisions of this act shall be refunded to said person upon such dismissal.

Fifth. All such other methods of increment as may be duly and legally devised for the increase of said fund.

SEC. 56. That the Treasurer shall, on the 1st day of January, 1908, and on the same day in each succeeding year, invest the said permanent fund, and the income thereof is hereby appropriated and may be used by the board of education for the payment of annuities, and if necessary, in order to carry out the provisions of this act, the excess, after such time as such excess may accrue, of any sum over $500,000 is hereby appropriated and may be used by the board of education in the same manner as the income thereof.

SEC. 57. That the president of the board of education and two members of the board of education to be named by the president of the board, the superintendent of schools, and three members to be selected from the assistant superintendents, principals, assistants to principals, and teachers of the public day schools shall constitute a board of retirement. The three last-named members shall be chosen as follows:

On the third Saturday of May in each year the assistant superintendents, principals, assistants to principals, and teachers in each local school district, including teachers of normal, manual training, high, and kindergarten schools, directors, and teachers of special branches shall meet at the call of the assistant superintendent of each supervisory district, which call he shall issue at least one week before said meeting and at a place within the said local school district designated by him, to select by ballot one of their number as representative to serve for one year. At the close of said meeting the presiding officer shall transmit to the board of education the name and address of the representative so chosen. The district representatives shall meet at 4 o'clock in the afternoon of the fourth Saturday of May following their election at the hall of the board of education and choose by ballot three of their number to serve on the board of retirement for one, two, and three years from the 1st day of the following July, and shall certify their names and the term for which each was chosen to the board of education: *Provided*, That at the second and each succeeding annual meeting of these representatives they shall ballot for but one member, whose term of office shall be for three years.

SEC. 58. That should a vacancy occur among the members of the board of retirement so chosen, the representatives shall meet and choose by ballot one of their number to serve on the board of retirement for the unexpired term.

SEC. 59. That on the recommendation of the board of retirement, the board of education of the District of Columbia shall have power, by a two-thirds vote of all its members, to retire any member of the teaching or supervising staff of the public day schools of the District of Columbia who is mentally or physically incapacitated for the performance of duty and who has been engaged in the work of teaching or of school supervision, or of both combined, for a period aggregating twenty years, fifteen of which shall have been in the public day schools of the District of Columbia. And the board of education of the District of Columbia may retire from active service any member of the said teaching or supervising staff who shall have attained the age of 65 years and shall have been engaged in the work of teaching or schcol supervision, or both, for a period aggregating thirty years. On the recommendation of the board of retirement, the board of education of the District of Columbia shall have power, by a two-thirds vote of all its members, to retire upon his own application any member of the teaching or supervising staff of the public day schools of the District of Columbia who has been engaged in the work of teaching or supervision, or both, for a period aggregating thirty years, fifteen of which shall have been in the public day schools of the District of Columbia.

SEC. 60. That upon such retirement, whether voluntary or otherwise, the person retired shall be entitled to receive an annuity out of the teachers' retirement fund of not less than one-half of the annual salary paid to such person at the period of retirement. Any person retired under the provisions of this act after thirty years of service shall receive as an annuity one-half of the annual salary paid to said person at the date of said retirement, not to exceed, however, in the case of a teacher or principal the sum of $1,500 per annum and in the case of a supervising official $2,000 per annum. And in no case shall the annuity of any person who shall be retired after thirty years of service be less than $600. Any person retired after twenty years of service, but with less than thirty years of service, shall receive an annuity which bears the same ratio to the annuity provided for on retirement after thirty years of service as the total number of years of service of said person bears to thirty years. The annuities provided for by this act shall be payable in monthly installments. All retirements made under the provisions of this act shall take effect either on the 1st day of July or on the 1st day of January. The number of persons retired in any one year shall be so limited that the entire amount of the annuities to be paid for that year shall not be in excess of the estimated amount of the retirement fund applicable to the payment of annuities for that year.

SEC. 61. That the words "teaching and supervising staff of the public day schools of the District of Columbia" as used in these retirement sections shall include the superintendent of schools, the assistant superintendents of schools, directors, and assistant directors of special branches, principals, assistant principals, heads of departments, and all regular and special teachers of the public day schools of the District of Columbia. Nothing in this act shall be construed as prohibiting the reappointment to active service, on his own application, of any person who has been retired under the provisions of this act. Upon the reappointment of any such person the payment of the annuity of said person shall be discontinued.

SEC. 62. That the moneys, securities, and effects of the public school-teachers' retirement fund, and all pensions or annuities granted and payable from said funds, shall be and are exempt from levy and sale by virtue of an execution and from all process and proceedings to enjoin and recover the same by or on behalf of any creditor or person having or asserting any claims against, or debt or liability of, the pensioner or annuitant of said fund.

SEC. 63. That wherever the masculine pronoun appears in this act it shall be construed to apply to either male or female teachers or employees of the board.

SEC. 64. That this act, except as to the teachers and officers now employed, shall take effect from and after its passage, and be in full force and effect from and after the 1st day of July, 1907. All acts or parts of acts in conflict herewith are hereby repealed.

## Limiting the Hours of Service of Railroad Employees.

SPEECH

OF

# HON. WILLIAM S. BENNET,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, February 18, 1907,*

On the bill (S. 5133) to promote the safety of employees and travelers upon railroads by limiting the hours of service of employees thereon.

Mr. BENNET of New York said:

Mr. SPEAKER: Some days since I referred briefly to the practical abolition of sweat shops in New York City. The remark was entirely incidental, but has had at least one important result. Mr. Marcus M. Marks, a prominent member of the National Civic Federation, a noted publicist and successful clothing manufacturer in a very large way, started an investigation of the subject, which resulted as shown by the following letter:

NATIONAL ASSOCIATION OF CLOTHIERS,
*New York, February 6, 1907.*

Hon. WILLIAM S. BENNET,
*House of Representatives, Washington, D. C.*

MY DEAR MR. BENNET: My attention has been called to your defense of New York City when the statement was made by Representative SIMS, of Tennessee, that sweat shops are a blot on our community, etc.

Recently, to assure myself that my position on this question was absolutely correct, I spent three days inspecting what were considered the worst workshops in the clothing trade, two days with Labor Commissioner Sherman and one of his deputies, and one day with a well-posted labor leader. I asked them all to show me the worst. While I found conditions of plumbing in some of the tenements outrageous (and I wish, by the way, that something could be done to hasten improvements in this connection), I found the shops well lighted, well ventilated, and the workmen fairly comfortable. Even "finishing" in the tenements, which is the worst phase of manufacturing, was conducted under vastly improved conditions. It was conceded by the labor commissioner, his deputy, and the third party referred to that the "sweat shop" in the clothing industry was practically a matter of the past. I am glad to be able to confirm your statement to that effect. Of course, we wish better and still better conditions. There should be no let-up in movements in the direction of progress. In saying this I express the sentiments of all our leading manufacturers.

With assurances of my esteem, I remain, very sincerely, yours,
MARCUS M. MARKS,
*687 Broadway, New York.*

This letter is important, not only because of its specific contents, but as another indication that good people in and out of labor unions, working together intelligently, can secure not only the enactment of proper regulations under the police power of the States, but also the rigid enforcement of such regulations. An enlightened public sentiment in any community acting on the legislative body nearest that community is after all the best and most mighty force behind good legislation.

## The Ship-Subsidy Bill.

SPEECH

OF

# HON. R. WAYNE PARKER,

OF NEW JERSEY,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 27, 1907,*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. PARKER, under the general leave to print granted February 25, 1907, submitted the following remarks:

Mr. SPEAKER: This is so great a subject and includes so many branches that it is well to consider nothing but the particular measure which is now before the House.

It is not a general measure for subsidies based on speed or tonnage, but is purely to extend our mail steamship contracts and to institute an organized naval reserve of captains, mates, and sailors.

Direct mail service to the Atlantic and Pacific coast of South America by fast steamers is more than a public benefit. It is a public necessity that we should keep up such direct intercourse with our sister republics as shall put us on friendly terms with them and their people. Unless they know us and trust us the Monroe doctrine will soon be a thing of the past. European influence is growing in many of the South American states, and banking, trade, and colonization are being ardently encouraged by European governments. Anyone can indicate the natural and certain result unless we do something to assure the people of those republics that their interests are bound up with us and not with Europe.

The system of mail contracts proposed is one that has been adopted by every progressive nation on the globe and, most of all, by those that are devoted to free trade. Cargo goes more cheaply in the slower vessel. Passengers and mails must have speed. Every increase in speed makes a much greater increase in coal consumption, and if we do not intend to send our passengers and mails to South America by way of the subsidized European lines, we must spend part of the moneys which we get from the ocean mails in encouraging a fast passenger and mail service. The expense is a real economy, for every one of these steamers will be as available as a cruiser in time of war as if we built, manned, and maintained them as ships of the Navy at many times the cost.

There is no favoritism in the bill, and no danger of our paying more than the service is worth, because each contract will be open to competition by all responsible bidders. The amounts named are perhaps too low to secure the minimum speed of 16 knots. But if it is sufficient to support a greater speed, the line that offers to give the highest speed will receive the contract. This provision for competitive bidding as to the guaranteed actual running speed of the line will secure open competition for the speediest passenger and mail service and for the best naval reserve and cruisers that can be got for the money. This is not subsidy. It is a bill to provide for the national defense and to encourage our commerce and friendly intercourse with our neighbors at the least competitive cost.

When the question of cost was raised in this body, I opposed the decrease by one-third of the sum payable on the Argentine mail contract. I said (RECORD, Mar. 1, p. 4424):

Mr. Chairman, I desire to be heard in opposition to this amendment. Mr. Chairman, I do not desire to take up anybody's time on this, and I have only a single sentence to utter to the committee. If we expect to maintain the Monroe doctrine over the American Continent, we must adopt such measures as will bring us by mail and speedy traffic in continual intercourse with our friends and brother republics of the south, and we must spare no money that is necessary to have a speedy service. If you do not give enough, you will not get the service at all.

I have no more to say to a patriotic House.

I have no liking for subsidies if they can be avoided. They may sometimes be necessary. But this is not a subsidy, but a system of competitive mail contracts. Feeling, as I do, that we need direct American mail and passenger communication; that we need a reserve of speedy cruisers, with their officers and crews; that it is far cheaper and better to have them in the merchant-marine reserve than in the active navy, and that the fullest and fairest competition is provided, I can not but lament that this wise, conservative, and moderate measure has been filibustered to its grave by a small minority of the body to which the House substitute was returned and by which a much stronger act has been passed.

The last section of the bill provides for the organization of the sailors and officers of our merchant marine into a naval reserve. There is no subject on which I have felt and spoken so strongly for many years. On the continent of Europe the whole merchant marine of every state is organized as a part of its navy. Every sailor and officer serves for a while on a man-of-war, and he and his ship are part of the reserve fighting force of the nation. In England and America there is and can be no such compulsory service. The provisions of this bill for an annual retainer to officers and men, giving about $5 a month to the officers and less than half that sum to the men, are copied from the provisions of the English act. That system has been a great success as to officers, who are proud to take their year's training in the navy and to wear the uniform and fly the flag to which that service entitles them. The naval certificate of proficiency as an officer is required for employment upon all the great liners, and such a system as to officers is likely to be as great a success here as abroad. Perhaps its best result is in bringing the naval officer and the simple sea captain in touch with one another, in the same way that we are trying to bring the Regular Army in touch with the militia, but to a

much greater extent, inasmuch as sailors meet the same dangers and the same problems of navigation, engineering, electricity, and command, whether they be in public or private service. So far as the officer is concerned, the naval-reserve system proposed by this act is certain to create a brotherhood of the sea which will broaden and benefit not only the officers of the merchant marine but those of the Navy as well.

The experience of Great Britain with her naval reserve does not give much encouragement as to the success of the proposed system as to petty officers and men. The English system provides an annual training of some weeks, during which the sailors are paid the regular wages of the navy; but that training takes them away from their ordinary employments, so that the vessel owners do not care to employ a reserve man, and the retainer of $30 or $40 a year is, after all, so small that few choose to take it who are really employed at sea. The English naval reserve has never been recruited to anywhere near its full strength, and its membership has been largely composed of the amphibious loafers who haunt shore towns. Finally, the ranks of the reserve have been opened to old navy men who have seen many years' service and retired. As a result, the English naval reserve, unlike those of France and Germany, does not include an active body of sailors employed in the merchant marine. Like conditions would probably produce like effects here, and it is improbable that any considerable body of American seamen will join the ranks of a naval reserve which offers so few advantages and such small pay.

This would be of little consequence if we had plenty of American sailors to flock to the flag on the first rumor of war, as Americans always do. The real trouble is that the number of American sailors grows less from year to year. Americans can do better on land. They get better pay and more chance of promotion. In old times every sailor on a ship might have an interest in the voyage. Merchant adventurers in every little coast town enlisted their crews to join in the chances of whale and seal fisheries, gathering gold or slaves on the Guinea coast, breaking blockades, trading to revolted colonies in the Spanish Main, or carrying silks and spices of the East Indies or the sweets of the West Indies through the pirate haunts of the Malay Islands, the Levant, or the Gulf of Mexico. The dangers as well as the profits and the risks of such a life of adventure appealed to every boy in England and America who had a drop of the blood of the old Norse sea kings. But the dangers, the profits, and the risks are gone for the sailor.

The trade of the world is carried on fixed ocean routes, whether by the liner or the tramp. Courage is no longer needed, for there are no foes to meet. Seamanship is usually not required in the sailor, who has become a mere deck hand. Liner and tramp alike hire the cheapest labor that can be got. Lines to the Orient are manned by Orientals. Nearer home the vessels are filled with motley crews made up of nations who are ready to work for small wages, and a shipowner hires his men where he can get them cheapest.

These conditions are not confined to America. It is not generally realized that while the merchant marine of Great Britain has grown from year to year, it is being manned more and more by foreigners. The number of British subjects, not including Lascars, who were employed in the merchant marine of the United Kingdom as petty officers and sailors was, in 1857, 96,914. In 1875 it was 82,000; in 1889 it was 60,709, and in 1901 it was only 44,290. These figures, of course, only include petty officers and seamen properly so called, and modern crews include many other employments, such as firemen, stewards, engineers, etc. If we compare 1875 with 1901, British sail tonnage had fallen off one-half, steam tonnage had nearly or quite quadrupled, and the total tonnage had grown some 60 per cent, and the total crews had increased about one-tenth—from 204,500 to 225,080—but the British crew had fallen off in numbers from 182,000 men to 151,380, or over 30,000 less. Foreigners had increased some 17,000 and lascars over 35,000, or, all together, over 52,000 more. It is idle to think that Americans or English will go to sea as mere laborers aboard ship in competition with all the ill-paid races of the world. The American and English boy will only go where there is brotherhood as well as pay and a chance of promotion. Neither the Americans nor the English are ready for universal conscription. We can not, like France and Germany, fill our merchant marine with sailors by counting sea service as military service. It is not enough to have our own ships if they are to be manned, like the English, by the cheapest labor that can be got. We shall have no complete naval reserve unless we can make it to the advantage of the vessel owner to employ Americans and give them a chance of promotion. It is by good pay and a chance of promotion that the British and American navies are recruited. In our own Navy the average pay is $30 a month. Chief petty officers get as high as $85 a month, with a chance of promotion to the post of warrant officer, with a pay that sometimes is over $1,900 a year, besides food, etc. Merchant ships can not afford such wages, and if they paid them they could not run in competition with foreign ships and their ill-paid crews.

All the statutes that have been proposed contain provisions that a certain proportion of the crew should be Americans. Such provisions are idle, for, even if enforced, the ships would hire the lowest-priced Americans they could find, and the better sailors would often come from other races.

The time has come when this problem must be met. The greatest cities of our country are situated on the coast. Their defense must be intrusted to a Navy which will be small in time of peace, but must be increased in time of war from Americans who are seamen. It is not a question of very great expense. If we paid to owners and charterers of American vessels engaged in the foreign trade an average of $25 a month for every American employed on such vessel who had received his training in the Naval Reserve 10,000 such men would cost but $3,000,000.

Authorities agree that America can and will build ships if it shall not cost more to run them, and the difference in that cost is almost solely in the higher wages paid to the crew. If we should protect American labor at sea by paying to the ship this difference in wages it will pay to run the ships and therefore to own the ships which these 10,000 men can man. By this course we should build up the merchant marine by simply paying the difference of cost of employing American labor, without the dangers which must attend subsidies based upon speed or tonnage, in view of the changing cost at which goods are carried and speed is obtained. While we should therefore welcome any system involving the enrollment of a naval reserve of sailors the real question will be to provide paying employment for the members of that reserve, and the simplest course would seem to be to pay to the vessel owner a sufficient sum to induce him to employ the members of this reserve at American wages—that is, to pay him the difference between American and foreign labor. I had the pleasure of urging a bill in this regard before the naval board, elaborating the scheme in the RECORD of April 22, 1904, and on November 25 I brought it before the Merchant Marine Commission in a short argument, which I print as an appendix.

If the first enlistment in the Navy was for but one year, as a matter of practice, after a year's service a sailor could go to any shipowner, proud of his certificate of service and enrollment as a member of the reserve, and ask employment at a fair rate in consideration of the sum which would be paid to the vessel for every month that he was so employed.

The question presses for solution. It is graver every year. Subsidies on speed or tonnage will secure ships, but will not man them. Our motto for the merchant marine must be: "Seamen as well as ships; let American ships be manned by American officers and sailors enlisted, enrolled, and trained in our Navy and ready for any emergency; the country can well afford to pay the additional cost of their employment."

---

## APPENDIX.

*Hearings before the Merchant Marine Commission, Friday, November 25, 1904—Statement of Hon. Richard Wayne Parker, Representative in Congress from the Seventh district of New Jersey.*

Representative PARKER. Mr. Chairman and gentlemen, the present need, in my judgment, is of a system that will induce Americans to go to sea.

They will not do so now because no shipowner can afford to employ them when he can get foreigners so much cheaper.

But no system will be complete that will not see that the ships which shall carry our flag shall not only be built and owned, but officered and manned, by Americans. No system will be profitable which shall not make it pay the shipowner to hire Americans.

Any full relief must deal with the personnel. It must provide for seamen as well as ships.

Let American ships be manned by American sailors, enlisted, enrolled, and trained in our Navy and ready for any emergency. The nation can well afford to pay to the shipowner the additional cost of their employment, and if that additional cost be paid, it would pay our merchants to own and operate ships.

### DIRECT PROTECTION.

The trouble is the difference in wages. A subsidy that is based on that difference would be direct protection not only to the shipowner, but to the seaman and to the Navy, to which they would be a reserve.

Americans do not go to sea. In the report of the Commissioner of Navigation for 1903 Mr. Chamberlain says:

"All American vessels on salt water which go out of sight of land for any time during the year would be fully manned by 50,000 men, including masters."

More than half the sailors on these ships are Americans—perhaps about 30,000 men in the merchant service, whereas the Navy requires some 34,000 to man our ships fully, and boys have to be drawn from the interior.

It is easy to see why Americans do not go to sea. In the old times a ship's success depended upon her crew. To be successful at all she had to be fully manned with brave men, ready and able to unload and load their vessel on any coast, to strip her to the girt lines, to beach

her to repair her, sometimes practically to rebuild her, ready to meet pirates, privateers, and savage tribes, and eager to go wherever profit could be found, from the Tropics to the poles. In such employment a vessel fully manned with brave Americans interested in the venture made more money than another manned with hirelings. No wonder that our boys then went to sea.

FOREIGNERS CHEAPER.

Now all is changed. Big liners ply even the remote Pacific on fixed ocean ways. They are even driving out the tramp. It is pure business to hire the cheapest men, and no bounties or subsidies on tonnage or speed, or by way of postal subvention, will bring the American into the crew while the foreigner can be had cheaper.

This is not theory, but experience. Great Britain has maintained and increased her merchant marine by postal and admiralty aids of every kind, but their crews are less and less British crews.

I have here, by the kindness of the Naval Intelligence Office, the Report of the Naval Reserves Committee of Great Britain, 1903. This committee states (p. 7):

"8. Since 1859 the requirements of the navy have outgrown the power of the mercantile marine to supply them. The former have increased; the number of British seamen employed in the latter has decreased."

The naval force grew from 73,104 in 1859 (see 2, p. 7), to 122,500 in 1902–3 (see 3, same page).

On the other hand (p. 8, par. 9), "in 1857 there were 96,914 petty officers and sailors, British subjects, not including lascars, employed in the mercantile marine of the United Kingdom. In 1875 it was estimated that there were 82,000. In 1889 the estimated numbers had fallen to 60,709, whilst in 1901 there were only 44,290."

DECREASE OF BRITISH SEAMEN.

A careful table covering the years from 1875 to 1901 is contained on page 75 of the same report, and the figures are startling. The sail tonnage of merchant vessels registered under the merchant shipping acts had gone down by half, but the steam tonnage had nearly or quite quadrupled, so that the total tonnage had grown 60 per cent, from nearly 6,000,000 (5,785,000) tons in 1875 to over 9,000,000 (9,388,176) tons in 1901. The total crew had likewise increased 10 per cent, from 204,500 to 225,080, while, on the contrary, the British crew had fallen in number from 182,000 men to 151,380, the balance of the crew being made up by the increase of foreigners and lascars. Foreigners had increased from 20,500 men to 37,170, and lascars had increased from 2,000 men to 37,430. Thus over 52,000 foreigners and lascars, mostly lascars, had been added to the British merchant marine in this short period, and over 30,000 less British seamen were in that marine.

The figures are still more startling if you disregard engineers, firemen, etc., and go to the ranks of pure seamen. Officers, 38,000 in 1875 had become 26,030 in 1901; petty officers, 10,000 had become 7,630; sailors, 72,000 had become 36,660; the apprentices, 14,500 had become 5,170. Including officers, petty officers, sailors, boys, and apprentices, the number of British seamen proper had fallen from 134,500 in 1875 to 76,390 in 1901, or nearly half. It is perfectly plain that the influx of lascars and Chinese and people of all other races who can go cheaply into the British service is destroying the British merchant marine, just as it is destroying the American merchant marine.

WHAT INCENTIVE?

Now, the question is how to meet this condition; how to give Americans an incentive to go to sea. It is idle to try to do it by statutory requirements. An apprentice system is good, but it is another burden on our ships, unless they are compensated for it. Statutes may require that a certain proportion of every crew shall be Americans, but in this case the vessel will employ the very cheapest Americans they can get, and even this raises the wages on the ship, so that every other sailor who comes aboard, nondescript or Chinese, insists upon getting the same wages, and the expenses of our ships are increased without getting Americans after all.

We must institute an American system as to the manning of our ships. Little aid can be had from the experience of other nations. Norway, Italy, Greece, and Spain have no difficulty because they have the cheapest sailors in the world. England has made a failure of her attempt to encourage the British sailor by a naval-reserve system. That system is a great success as to officers. Captains and mates are allowed to go temporarily into the navy, where they are examined and certified as to fitness, and obtain the glory of being attached to the naval service and the standing of having passed their examination. That system has thus created a roll of captains and officers in the merchant marine of whom any nation should be proud. We need a like system in America.

FAILED AS TO SAILORS.

But that system has failed as to sailors. The naval-reserve pay is niggardly—about $15 a year for ordinary seamen and about double that for engineers, while twenty-eight days of annual training is asked from every man. Shipowners will not employ men who must leave them for this training, and, as a rule, therefore, sailors do not belong to the naval reserve, which has to be recruited partially from longshoremen, fishermen, and others who are not really seamen. The whole system has failed to encourage the sailor.

We can learn nothing by the experience of Germany and France, which, with other continental countries, encourage their marine by making service therein with a short naval training constitute an exemption from military obligations, the equivalent of a large bounty to the seafaring man. Every man ashore has to serve his years in the actives and a longer course of years in the reserves of the army, while the man who is at sea, after a certain amount of naval training, can have his wages in his ordinary profession and be exempt from military service. This keeps the ranks of seamen full, while England has failed, in that in twenty-five years her seamen at sea have fallen off by one-half.

A SAILOR-RESERVE BILL.

There seems to be no remedy for the fact that Americans do not go to sea except to see that it will pay them to do so. It will not get Americans to go to sea to give postal subsidies or tonnage subsidies or freight subsidies or speed subsidies. It will not prevent the shipowner's hiring the cheapest labor he can get. But Americans will go to sea if they can have good wages as well as a chance of graded service with promotion. In that regard we may follow the foreign naval reserve system, avoiding their mistakes.

To that end I drafted a sailor-reserve act to establish a naval volunteer force of seamen—H. R. 5079 of this Congress. I explained its features as a tentative measure in remarks submitted April 22, 1904, on the discussion of the act for the appointment of this commission. It has been favorably considered by the Navy Department, which only feels that the naval estimates should not bear the whole expense. The proposition is that the United States shall pay the ship so much each month for every man employed who shall be enlisted and enrolled and shall have served his necessary training in the United States Naval Reserve, and that thereby the shipowner shall receive not only compensation for the difference in cost of employing Americans, but also a very considerable bounty to the ship. If that ship employ 200 men at an allowance of $20 a month for each man, it would amount to nearly $50,000 a year. It would be less in smaller ships. If the allowance shall be increased for speed and proper construction of the vessel, it might be even greater than this sum. No enormous amount, however, is required. If 25,000 Americans be enlisted in such a naval sailor reserve, it would at that rate amount to only $5,000,000 in a year.

NAVAL VOLUNTEERS.

But the proposition, stated briefly, is that the Secretary of the Navy may form a force of not over 30,000 men, to be called "naval volunteers"—a sailor reserve, enlisted for five years. Facilities are to be provided by which such volunteers as appear and report—they are not forced to—shall be instructed and trained and exercised on shore or on board ship, at such times and places and under the command of such officers as the Secretary thinks fit, and they may be also examined and certified as to their fitness as officers of the force and of merchant vessels.

The President may call them into active service in time of war or of emergency. They are entitled to pay when they are in service. The Secretary of the Navy may make rules for their organization, and he may discharge anyone at any time. He may organize them into classes, and then comes the encouragement to the Americans to join:

"That in order to encourage the merchant marine and the employment of such naval volunteers therein there shall be paid to the owners or charterers of any vessel of the United States which shall be engaged in foreign trade or in the deep-sea fisheries, for every naval volunteer actually employed and serving on such vessel during every deep-sea fishing voyage or foreign trading voyage, the monthly sums hereinafter provided for, for every month of the duration of such voyage: *Provided, however*, That no such payment shall be made unless such naval volunteer shall have been in actual training, as mentioned in section 3, for a period equal to as many months as the years or fractions of a year that he has been enrolled and enlisted as such naval volunteer: *And provided further*, That he has been certified as fit for the office or position held by him on such merchant or fishing vessel.

"The Secretary of the Navy shall fix the rates of pay aforesaid for various grades, which rates shall not be above $20 a month for any grade up to petty officers, nor above $30 a month for engineers or mates, nor above $40 a month for captain, and which rates may be graded according to the character and size of the vessel, the kind of voyage, and the grade of service as may be deemed best by the Secretary of the Navy."

AUXILIARY CRUISERS.

And then follows a provision to encourage vessels of high speed and sufficient strength:

"That whenever such foreign voyage shall be in a steam vessel and her time between ports on such voyage shall represent a speed of over 10 knots an hour on the shortest courses between such ports, then the pay in the last section mentioned shall be increased in proportion as the speed represented by such time bears to 10 knots: *Provided*, That such vessel shall have been built or strengthened and kept in condition as may be fixed by naval regulations and to the satisfaction of the Secretary of the Navy: *Provided further*, That such vessel shall have entered into bond or agreement, satisfactory to such Secretary, that such vessel may be taken by the United States at an appraisement of its fair value whenever the President shall declare an emergency that renders such taking advisable."

Such a system of bounty for employing Americans and for their organization as a naval reserve is not exclusive of any other arrangement for postal, naval, or freight subsidy or discriminating duties. There are difficulties as to bounties upon freight, tonnage, and speed. Some of us remember ancient railroad charters which provided minimum rates, which are often four or five times as much as are now actually charged by the railroads. A tonnage subsidy may be reasonable when made and unreasonable afterwards. High speeds become usual speeds. The United States once granted a postal subsidy for a fast mail, to be run at extra speed, and the railroads now have several equally fast trains upon the road and still get their subsidy. There is prevalent objection, and honest objection, to the granting of bounties on tonnage or speed, because speed increases and tonnage rates decrease. There can be no objection whatever to bountying men, and paying the difference between foreign and American wages, and that difference would be by no means inconsiderable as an encouragement to American shipping. But it can be added to any other system.

USEFUL MEN IN NEED.

At any rate this plan is likely to give us men available in time of need. It will enable the Government to know where they are, for if it pay the vessel owner on production of a certificate of enrollment of the man, with inspection to see that it is the same man, the Government will know where your man is and can get him at any time. Meanwhile he will be proud that he can go to a vessel owner and say that he is a naval volunteer, and can claim larger wages than others, because the ship will get something for employing him.

This plan also provides for grades and classes of service and examinations and training for promotion into the higher grades. The nation can well afford to pay for the employment of American captains in American ships. Every such captain in time of war is worth everything to us. Sailors can be promptly trained, but not American captains, and it is a grief that the race is almost going out of existence with the decay of the sailing vessel. It is the key to American supremacy upon the sea that Americans be there. And we must encourage the American officer, give him his turn of duty in the war vessel, his certificate of fitness, his uniform as a sailor-reserve captain, his fraternity as a brother of the sea.

The training of the Naval Reserve has been a matter of some difficulty. A few weeks each year are hard for the man to find and for the Government to employ."

A YEAR IN THE NAVY.

I have talked with a great many naval officers, one of whom made a rather appropriate suggestion—that perhaps a year's work in the Navy might be the qualification for the reserve. We might avoid many desertions in the Navy if the first enlistment were for one year, with the

privilege of enlisting afterwards for five years, or of going into the sailor reserve, so that they can be called back into the Navy in case of emergency. This would avoid the difficulties of short annual training.

There was a romance of the sea in ancient days. That romance is gone, and the American no longer cares to go there, because he is not paid properly for its hardships. Meanwhile the military nations of the continent of Europe are able to keep up their sea power and put their men on the sea, bountying them by exemption from military service, while America and England are falling behind in the race. We must resume our heritage as heirs of the sea king. We must get our boys on the free ocean, not by conscription, as a continental tyrannical power may do, but by extra allowance to the ships for every sailor that is available for national defense. I hope that some such plan will be embodied in the recommendation which may be made by this Commission.

THE FRENCH FISHERMEN.

Mr. Chairman, I believe I have done. I have taken too much time.

Senator LODGE. In alluding to the foreign systems you did not speak of the French. Is it not true that the French give fishing licenses only to men who have served a certain time in the navy?

Representative PARKER. Yes, sir.

Senator LODGE. They have to serve first in the navy, and then they get their licenses as fishermen.

Representative PARKER. Yes, sir; a short service.

Senator LODGE. A short service.

Representative PARKER. It is different from the military service. They do not have to serve on shore.

Senator LODGE. All those Breton fishermen have to serve a short time or some time in the navy before they can get their licenses as fishermen?

Representative PARKER. Yes, sir.

Senator LODGE. So a man has to spend a little time in the navy before he can be licensed. I did not know how far it had been extended.

Representative PARKER. It is extended to everybody who follows the sea in any way for a profession, and he is, as I say, excused from onerous military duty and allowed to follow the sea freely. No wonder they do follow the sea.

Senator LODGE. They get a certain amount of work out of all the men who want to be fishermen or sailors?

A BOUNTY TO THE SHIP.

Representative PARKER. Yes, sir; we should do it in the other way by a bounty to the ship which will let them pay the men for going to sea. I have copies of the remarks I submitted on this subject in the House. It was not a speech. I will hand them to the clerk.

The CHAIRMAN. We shall be pleased if you will leave us some copies.

Representative PARKER. I have tried not to repeat what I said there. This matter of figures is entirely new.

I have to return this pamphlet to the Naval Intelligence Office, unless the Commission would desire to have it left possibly for the quotations.

The CHAIRMAN. I think if you would leave it, unless we can get another copy, it may be desirable to have a portion of it copied.

Secretary MORTON. I think probably the chief intelligence officer can get another copy of it.

The CHAIRMAN. Thank you. We will see that it is returned.

Representative PARKER. I will so report, then.

The bill referred to by Mr. PARKER is as follows:

A bill (H. R. 5079) for the establishment of a naval volunteer force of seamen and for the government of the same.

Whereas it is expedient that there should be a volunteer force of seamen for service in the Navy in time of emergency, that they should be duly trained, and that the foreign trade of the United States should be encouraged, as well as the employment of such seamen in such foreign trade: Therefore,

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That it shall be lawful for the Secretary of the Navy to raise and keep up a number of men not exceeding thirty thousand, to be called "naval volunteers," such men to be enlisted from among seafaring men and others who may be deemed suitable for service.

SEC. 2. That such volunteers shall be enlisted for five years.

SEC. 3. That the Secretary of the Navy shall provide facilities whereby such volunteers as may appear and report shall be instructed, trained, and exercised on shore or on board any ship, at such times and places and under the command of such officers as the said Secretary may think fit, and whereby such volunteers may also be examined and certified as to their fitness as officers of such force and of merchant vessels.

SEC. 4. That it shall be lawful for the President in case of emergency communicated to Congress, or proclaimed, if Congress be not sitting, to order that any or all of such volunteers shall be called into actual service; and upon such order and such notice thereof as may be prescribed by Navy regulation, every naval volunteer who shall not appear and enter into actual service shall be subject to the penalties of desertion.

SEC. 5. That such naval volunteers when in actual service, or when training as aforesaid, shall be entitled to pay and allowances for actual service in the Navy, and shall be subject to the discipline of the Navy, as fully as if regularly enlisted therein, and shall be organized, armed, and uniformed as may be provided from time to time by regulation.

The Secretary of the Navy may prescribe rules and regulations for their organization and training, and may at any time discharge any such naval volunteer, and may organize them into classes, and make rules and regulations as to the time, places, and manner of their service.

SEC. 6. That in order to encourage the merchant marine and the employment of such naval volunteers therein there shall be paid to the owners or charterers of any vessel of the United States which shall be engaged in foreign trade or in the deep-sea fisheries, for every naval volunteer actually employed and serving on such vessel during every deep-sea fishing voyage or foreign trading voyage, the monthly sums hereinafter provided for, for every month of the duration of such voyage: *Provided, however*, That no such payment shall be made unless such naval volunteer shall have been in actual training, as mentioned in section 3, for a period equal to as many months as the years or fractions of a year that he has been enrolled and enlisted as such naval volunteer: *And provided further*, That he has been certified as fit for the office or position held by him on such merchant or fishing vessel.

The Secretary of the Navy shall fix the rates of pay aforesaid for various grades, which rates shall not be above $20 a month for any grade up to petty officers, nor above $30 a month for engineers or mates, nor above $40 a month for captain, and which rates may be graded according to the character and size of the vessel, the kind of voyage, and the grade of service, as may be deemed best by the Secretary of the Navy.

SEC. 7. That whenever such foreign voyage shall be in a steam vessel and her time between ports on such voyage shall represent a speed of over 10 knots an hour on the shortest courses between such ports, then the pay in the last section mentioned shall be increased in proportion as the speed represented by such time bears to 10 knots: *Provided*, That such vessel shall have been built or strengthened and kept in condition as may be fixed by naval regulations and to the satisfaction of the Secretary of the Navy: *Provided further*, That such vessels shall have entered into bond or agreement, satisfactory to such Secretary, that such vessel may be taken by the United States at an appraisement of its fair value whenever the President shall declare an emergency that renders such taking advisable.

## The Ship-Subsidy Bill.

### SPEECH

OF

### HON. EDMUND H. HINSHAW,

OF NEBRASKA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, February 28, 1907,*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. HINSHAW said:

Mr. CHAIRMAN: For many years and in various ways the shipping interests of this country have been seeking aid through Congress from the Treasury in the way of a subsidy. For the building and running of ships in the merchant marine numerous plans and devices have been employed, usually disguised by some patriotic motive and under the contention that such schemes were wholly in the interest of the country at large and not for private gain. Sometimes a cargo subsidy was proposed, which means that the United States will pay to the owner of an American vessel a certain bonus or bounty for transporting cargoes in vessels of a certain speed and capacity. Other schemes have been to pay enormous prices for the transportation of the mails. March 3, 1891, an act was passed providing that the Postmaster-General could pay for the transportation of the mails in American vessels $4 per mile in vessels of 20 knots per hour, $2 per mile in vessels of 16 knots per hour, and $1 per mile in vessels of 12 knots per hour. Under this act four vessels have been paid, and for fifteen years have been plying between this country and Europe, receiving about $760,000 per year. But even the advocates of subsidy acknowledge that the effect of this act has been practically without benefit to the American merchant marine. The payment of this money has been merely a bounty or bonus to these shipowners, and has not resulted in substantial benefit to our country.

Last year there was passed through the Senate of the United States a bill (S. 529) which provided for a cargo subsidy. It, in short, provided for the payment annually of $5 per ton for American vessels engaged in the foreign trade for twelve months, $4 annually for nine months, and $2.50 annually for six months' service. In addition, that bill provided for fortnightly or monthly mail service from ports on the Atlantic coast to Brazil, $300,000 fortnightly; from the Atlantic coast to Uruguay and Argentina, $375,000 fortnightly; from the Atlantic coast to South Africa, $375,000 fortnightly; from the Gulf coast to Brazil, $275,000 fortnightly; from the Atlantic coast and Gulf to Cuba, $125,000 semiweekly; from New Orleans to Central America and Panama, $75,000 weekly; from the Gulf coast to Mexico, $50,000 weekly; from the Pacific coast to Hawaii, Japan, and the Philippines, $600,000 fortnightly; from Puget Sound to Japan and the Philippines, $420,000 fortnightly; from the Pacific coast to Australasia, $217,000, in addition to about $290,000 now paid to the Spreckles Line; from the Pacific coast to Panama, $120,000 fortnightly. The vessels required under the bill range from 12 to 16 knots per hour, and one-half of the sums paid for fortnightly service to be paid in the event that contracts were made for monthly service.

After this bill passed the Senate it came to the House Committee on Merchant Marine and Fisheries, of which I am a member. Extensive hearings were had, mainly on behalf of the Senate bill, at which much interesting information was developed. In January of this year those who had been so earnestly promoting the cargo-subsidy proposition abandoned that portion of the programme, and the substitute bill now under consideration was voted out of the committee by the historic vote of 8 to 7. Believing as I did that the substitute mail subsidy was only a subterfuge—using the language of Mr.

HUMPHREY, a member of the committee in favor of the legislation—and would be of no lasting benefit to the American people I voted against a favorable report of the measure.

Briefly, this proposed substitute now under consideration is an amendment to the mail-subsidy act of March 3, 1891, and provides that the Postmaster-General is authorized to make contracts for a term of ten years with citizens of the United States for carrying mails on steamships hereafter built in the United States or now in service and between ports of the United States and ports on the routes and for the amounts, to wit—I give only the fortnightly service, the monthly service receiving only one-half the compensation, and the vessels are 16 knots' speed, except for the Panama service. First, from the Atlantic coast to Brazil, $600,000 a year; second, from the Atlantic coast to Argentina, $800,000; third, from the Gulf to Panama (14 knots' speed), $150,000; fourth, from the Pacific coast to Panama and Chile, $600,000; fifth, from the Pacific coast to Japan and the Philippines, $700,000; sixth, from Puget Sound to Japan and the Philippines, $700,000; seventh, from the Pacific coast to points in Australasia, $200,000, in addition to about $290,000 now paid to the Oceanic, or Spreckles, Line. In addition to this the bill provides for the organization of a naval reserve.

It is 5,000 miles from New York to Rio de Janeiro, and it is estimated that it would require five steamers, costing $6,000,000, and that each would receive $27,000 for each trip. It is 6,000 miles from New York to Buenos Ayres, and each vessel would receive about $33,000 a voyage. The line from the west coast to Chile, 6,000 miles, would receive a like amount. In these three cases the payment would be between $5 and $6 per mile. From the best information obtainable, it is fairly clear that the cost of operating and maintaining these vessels would be much less than the amount of the subsidy, so that the United States, under this bill, is called upon to pay the operating expenses of these vessels, thus leaving a part of the subsidy and all the money received from freight traffic wholly a profit to the owners. These amounts are excessive and rapacious. Even if each vessel should cost $1,200,000, the United States would save money by building and owning the vessels herself. However, there is nothing in this bill that obliges the owners to construct or operate a vessel of any particular size or cost. To be sure, the speed is to be ascertained upon a trial trip of four hours, 16 knots per hour. This of itself, however, does not mean the building of a vessel of more than 5,000 tons. If our commerce is to be substantially benefited by this subsidy, there should be a requirement that these vessels be of at least 10,000 tons, and perhaps larger. In fact, there is running between this country and South America to-day a very large number of so-called "tramp steamers" which carry all the freight now offered in South America for this country or to be transported from here to South America, at rates which have not been considered exorbitant. Almost all orders for merchandise are now sent by cable dispatch and not by mail. If this bill provided for a reasonable and proper payment for the transportation of the mails, it is probable that no one would object, but when the amounts are made so out of proportion to the service rendered, it seems to me that there is no excuse for it.

In fact, this bill is being promoted primarily by the shipbuilders of this country. Cramp and others of Philadelphia appeared before the committee urging this legislation. Mr. Gary, head of the steel trust, likewise appeared in its favor. In the main the labor organizations of the country are opposed to it. The Patrons of Husbandry and the farmers' organizations are strongly opposed to this form of taking from the Treasury money which might be used in upbuilding the agricultural and other interests of the country.

The subsidies provided in this bill for the trans-Pacific lines are without excuse or palliation. Already there is a line of steamers owned by J. J. Hill which runs between Puget Sound and the Orient in connection with his railroads—the Northern Pacific and Great Northern. He has stated that they are a paying proposition. They receive no subsidy. Whatever may be said to the contrary it is my firm opinion that he would be the recipient of the bounty named in this bill. His vessels are of 14½ knots speed, and this act provides for 16-knot vessels. The bill, however, provides that the speed shall be "deemed complied with if satisfactory speed is developed during a trial of four hours' continuous steaming at sea in ordinary weather." This means that a trial speed, with coal picked by hand, with vessel scraped and in prime condition, engines and machinery in the most perfect repair, shall be made for four hours, and without doubt a 14½-knot vessel could comply with these requirements. The line owned by E. H. Harriman, now running between San Francisco and the Orient, is composed of 16-knot vessels and of course could readily comply with the conditions, and while it is generally supposed that Mr. Harriman is the wealthiest man in the country he probably would not be opposed to accepting this subsidy on that account. The line from San Francisco to New Zealand and Australia already receives, under the act of 1891, about $290,000 and is under contract with this Government at that rate for about seven years yet to come; but it now seeks to avoid that contract and obtain a gratuity by this bill of $200,000 more without rendering additional service. This line is run by Spreckels, the sugar king, and is composed of 16-knot vessels.

The subsidy proposed to be paid by this bill aggregates $3,850,000, and under the terms of the bill contracts are to be made for ten years, and it is expressly provided that while Congress may repeal this act it can not abrogate or annul the contracts already made. Thus we are sure to have an expenditure in the next ten years of $38,500,000, and doubtless if this legislation is passed the amounts herein given will be found to be wholly inadequate to meet the demands of the subsidy hunters, and every succeeding Congress will be importuned for increases on lines to various parts of the world. Those who are opposing this legislation have contended from the beginning that this is but the entering wedge. We know that this is true, because we have heard upon this floor and through the press many expressions of this kind. I for one am convinced that the shipbuilders, shipowners, and owners of railways who expect to profit from these contracts, will never relax their efforts until this country is induced to give annually from the Treasury from eight to ten millions of dollars. Even after contracts have been solemnly entered into between certain lines of vessels and the Government the owners of these ships do not hesitate to come again to Congress asking for additional subsidies upon the plea that the contracts which they have entered into are not sufficiently remunerative. The Spreckels, or Oceanic Line, running between San Francisco, New Zealand, and Australia, has a contract with the Government for a triweekly service, for which they receive about $293,000 a year in addition to the profits from the commerce which they carry. They likewise receive a subsidy from the other countries to which they run for bringing their mail to this country. What assurance have we now that even if this extra $200,000 a year be given this line that they will not be here demanding additional amounts in a few years?

It seems to me that this is a dangerous policy for the Government to embark upon. Our appropriations are already exceedingly large. We will expend this year more than $90,000,000 for improvements of rivers and harbors; about one hundred million for the maintenance and enlargement of the Navy; about seventy-five million to maintain the Army; about one hundred and forty-five million for pensions, a most worthy expenditure. We have increased the salaries of rural carriers, which was demanded by every dictate of justice; there are now about 43,000 of them in the country. We have increased the salaries of the city carriers, also a mere act of justice. The appropriations for the maintenance of the legislative, executive, and judicial branches of our Government are enormous. We give large sums to the agricultural experiment stations and colleges of the country, an expenditure justifiable because of the expansion and growth of these great interests and necessary for the internal improvement of the country. We are appropriating for the Geological, Geodetic, and topographical surveys. We appropriated large sums for the preservation of the forests, investigation of water supply, and the reclamation of arid lands. We expend large sums for the inspection of meats, made necessary for the protection of consumers. The appropriations for this session alone will aggregate nearly $1,000,000,000. Our country is exceedingly prosperous. Labor is employed at high wages. Capital finds abundant opportunities for investment and profit. All industries are at the highest tension. The railroads can not carry all the freight. We need more cars, tracks, better terminal facilities far more than we need ships. We are all anxious to build up the merchant marine, but I do not believe that the farmers and producers of this country are in favor of paying out of the National Treasury for individual enterprises vast sums of money and mortgaging the resources of the country for years to come, making contracts which can not be annulled and setting loose upon future Congresses a vast horde of interested beneficiaries and public plunderers.

It must also be remembered that if we send cargoes of goods to Brazil, Argentina, and Chile, we must receive and purchase from them in return. From Brazil we doubtless will receive for years to come vast supplies of coffee, because we do not produce coffee in continental United States. The coffee of Porto Rico is now seeking a market here, and I confidently believe that before many years we will obtain from this, our own island,

all the coffee that it can produce, and then in this commodity we will not be so completely dependent upon Brazil.

But how about Argentina? What does she produce and sell? Wheat, beef, and hides, the identical articles which we produce in such abundance that we export the former two. As it is now, with our tariff on hides, we use 80 per cent of Argentina's production, and our good friends from Boston are trying to have the tariff on hides abolished so that they can use the entire product of Argentina in direct competition with the products of western farms. Incidentally it may be remarked that the people of New England and the East are the chief advocates of this subsidy proposition. I can not believe that the farmers of the Mississippi and Missouri valleys are greatly interested in having the raw materials of manufactures and agricultural products of Chile, Argentina, and Peru shipped into the United States. Those countries certainly will not, under this act or any other, buy from the United States the very articles they produce.

Under our coastwise laws none but American-built ships can engage in trade on the Great Lakes or along the coasts of the United States, no foreign ships whatever being allowed in this trade, which is the most remunerative of any in the world. Vast shipyards have started up on the Great Lakes and Atlantic coast to supply ships for this particular trade, and it has been demonstrated and abundantly appears in the hearings before your committee that these ships, both passenger and freight, can be built and are now being built just as cheaply in these American shipyards as are similar ships in any part of the world. They receive no subsidy, but of course are protected from the competition of foreign ships. Nevertheless, American capital and labor have so thoroughly entered into the building of these ships that competition is keen and complete in the coastwise and lake trade. There is no reason why these shipyards can not produce vessels for the foreign trade as cheaply as they do upon the Clyde or in other foreign shipyards. Under our present tariff law materials for the building of ships to be used in foreign trade come into this country free of duty. The other principal item is labor, which of course is much more expensive in this country than in any other, but the uniform testimony before our committee was to the effect that, while American wages are much higher than abroad, the greater efficiency, skill, and intelligence of the American workingman make up for the difference in the wage.

The fact is that both capital and labor in this country are so well and profitably engaged in building and running railroads, in producing raw material and manufacturing it, and in feeding, clothing, housing, and educating the millions of free and happy American citizens and their families that there is at present no sufficient temptation for them to go out upon the uncertain seas after foreign trade.

It has been intimated that because other countries subsidize their ships it is therefore incumbent upon the United States to do likewise. Germany, England, and France are essentially warring nations. They maintain great navies and standing armies, which we with our greater wealth and population do not attempt to emulate. It is needful for those nations who are always menaced by the specter of war to have merchant ships instantly available for use as transports. And so, for the purpose of bolstering the failing fortunes of this bill, lurid pictures of war have been conjured up to intimidate us into the enactment of this measure. But the sane American, viewing the history of his country and the direction of its policies, sees no war clouds upon the horizon and fears no contest which present resources can not amply sustain.

## The Ship-Subsidy Bill.

### SPEECH
OF
### HON. FRANK W. MONDELL,
OF WYOMING,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 27, 1907.*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. MONDELL said:

Mr. CHAIRMAN: I am very glad, indeed, to have the opportunity to lend my influence and my vote to the bill under discussion. In my opinion the legislation is not only wise, but timely, and it will, I believe, have a most helpful and beneficial influence in the establishment and maintenance of friendly and cordial relations between the United States and countries toward which we sustain peculiar and mutually advantageous political relations, and in extending our trade by affording increasing opportunities for profitable markets for the products of our soil and manufactures.

Mr. Chairman, I am as enthusiastic in support of this measure as I was fixed in my opposition to the bill as it came to the House, for I am unalterably opposed to the adoption of any measure providing for a cargo or tonnage subsidy to ocean freight carriers. I should be very glad, indeed, to witness the upbuilding of the American merchant marine and to aid in the passage of any proper legislation that might result in the increase of shipping carrying the American flag, but I do not believe cargo bounty would permanently have that effect, and if it did we would not, in my opinion, be justified in taxing the people of the country to build up that particular industry on the high seas.

Our people and our capital will embark in the business of shipping on the high seas as soon and as rapidly as the business can be carried on under our flag at a reasonable profit. In the meantime, with limitless opportunities for investment of American capital in other fields of industry, I for one am perfectly content that the bulk of our ocean-bound commerce shall be carried in those ships that will carry it most advantageously and at the lowest rates without regard to the flag they fly.

This bill, however, contains no provision for cargo bounty and subsidy. On the contrary, it proposes the establishment of seven speedy, regular lines of steamships between important ports of the United States and ports in South America and the Orient.

First, a line from an Atlantic port to Brazil; second, from an Atlantic port to Argentina; third, from a Gulf port to the Isthmus of Panama; fourth, from a Pacific port to Panama, Peru, and Chile; fifth, from a Pacific port, by way of Hawaii, to Japan, China, and the Philippines; sixth, from a Pacific port north of Cape Mendocino to Japan, China, and the Philippines; seventh, from a Pacific port, by way of Hawaii and the Samoan Islands, to Australia.

To encourage the establishment of these lines it is proposed to grant for each line mail pay or bounty of from three hundred to four hundred thousand dollars per annum for a monthly service and from six hundred to seven hundred thousand dollars for a fortnightly service, except in the case of the Gulf coast-Panama route, for which from seventy-five to one hundred and fifty thousand dollars is to be paid.

In order to obtain the benefits of this legislation, first-class ships must be provided, capable in the case of the Panama route of maintaining a speed of 14 knots, and in the case of all other routes, a speed of 16 knots. It has also provided that the repairs for these steamships shall be made in the United States, and provisions are made for the enrollment of the crews of these vessels, or such members thereof as are willing to undertake such service, as members of our Naval Reserve.

These lines of swift ocean messengers, flying the American flag, carrying American mails and American products, if established, will require the services of not less than thirty-two 16-knot steamers, which must be built in the United States, be first-class in every respect, approved with a view to their use as auxiliary cruisers or transports in times of war, and held at the disposal of the Government at all times. The legislation will therefore provide us with that class of vessels which, with the upbuilding of the Navy, we stand most greatly in need—large and powerful scouts and cruisers, manned by American seamen.

By reason of the Monroe doctrine we sustain peculiar relations with the countries of South and Central America. We have constituted ourselves their protectors from foreign aggression, and in a certain sense we stand their sponsors before the world; but notwithstanding this peculiar and important political relationship we have no direct, regular, and speedy connection with the most important capitals and trade centers of South America. Those countries are developing prodigiously, their trade and commerce are increasing by leaps and bounds, and yet we of all the important commercial countries of the globe are alone without the means of direct, regular, and speedy communication with those lands and their markets.

The Orient is just awakening to a new and mighty development. The marvelous industrial growth and expansion of Japan is certain to be duplicated on a large scale in China. We can not afford to forego the opportunity for participating in a large measure in the growing trade and commerce of eastern seas. Further than that, our flag is planted at the very crossroads of eastern political activity, trade, and commerce. Our Pacific ports look out upon the mighty sea that is to bear this vastly

increasing trade, while our outpost at Hawaii constitutes its most important crossroads.

Every consideration, political and commercial, calls us to our duty of maintaining not alone with an armament of war, but with the swift messengers of peace, good-fellowship, and trade, that constantly increasing influence on the Pacific and in the Orient to which our national position, our growth, and development, political, economic, and commercial, call us.

The time is ripe for this legislation. We have already delayed too long the establishment of fast mail, passenger, and commercial lines between our ports and South America and the Orient; while our commercial rivals, taking advantage of our neglect and indifference, have, by the payment of subsidies similar to those we now provide, but much larger, established close and friendly social and important and profitable commercial relations with regions where, but for our neglect, now tardily proposed to be remedied, ours would and should be the commanding influence and commerce.

The maximum expenditure of about three and one-half million dollars per annum proposed in this measure would be well spent, if it promised no immediate or direct returns in increased postal receipts or trade, in the benefits which will accrue by the establishment of a better understanding and closer social and political relations between our people and those of the nations of South America, whose political fortunes and future are so clearly interwoven with ours, and with the great empires of the East, with whose people we must inevitably continue to be brought into contact in the peaceful conquest of the Pacific; but it is estimated by those qualified to judge that a large portion of the expenditure proposed will be returned in postal receipts, and there can be no doubt but what the establishment of these swift messengers of trade, carrying American merchants and American drummers with their goods and wares swiftly, promptly, and regularly to the great trade centers of South America and of the Orient, will rapidly and vastly increase the market for American products and manufactures.

I congratulate the House and the country upon the promised enactment of this legislation, which, in my opinion, marks a new epoch in our development; for turning now from the old-established and hotly contested European marts of international trade, we go forth to tardily seek a better acquaintance and closer and larger trade relationship, which will be mutually profitable, with our sister republics of the south and across the vast stretches of the Pacific, to a closer connection with our own possessions, and a further cementing of the ties of our traditional friendship and a larger share in the trade, commerce, and political activities of the awakening empires of the Orient.

---

## River and Harbor Appropriation Bill.

### SPEECH

OF

# HON. ROBERT F. BROUSSARD,

OF LOUISIANA,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 6, 1907.*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. BROUSSARD said:

Mr. CHAIRMAN: In the year 1873 the Congress of the United States provided for "a survey for connecting the inland waterways along the margin of the Gulf of Mexico, from Donaldsonville, La., to the Rio Grande in Texas, by cuts and canals," and in the same year the survey was commenced and was completed in 1875. The report of the survey was made to the Chief of Engineers of the United States Army by Capt. C. W. Howell, United States Army. The first conception of this project, however, dates back further than the year 1873, it having been conceived by the Louisiana and Texas Canal Company. This company had a partial survey made by Mr. Peler, a civil engineer, who later assisted the United States engineer in charge of the work. Of the findings and objects of this Louisiana and Texas Canal Company I have been unable to find any trace.

In the first session of the Fifty-sixth Congress my attention was accidentally called to the project, and I instituted a search for the old reports of the Engineer Department of the Army and found the Howell report of 1875. I then resolved to revive the project and immediately introduced H. R. 7080, a bill providing for a resurvey of this waterway. I was unsuccessful in that Congress. In the Fifty-seventh Congress former Congressman Cooper, then representing the Texas district adjacent to mine, joined in the prosecution of the matter, and in the first session of that Congress introduced H. R. 7071. We had no better success in that Congress. In the Fifty-eighth Congress, second session, Congressman GARNER of Texas introduced H. R. 5751 and I reintroduced my bill of the previous Congress, being H. R. 7867, and Congressman GARNER and I joined efforts in pressing the survey. Aided most materially by Congressman BURGESS of Texas and Congressman RANSDELL of Louisiana, both of whom had meanwhile become members of the Rivers and Harbors Committee of the House, and with the cooperation of Congressmen PUJO and ROBERTSON of Louisiana and BROOCKS and GREGG of Texas, through whose district this waterway is projected, we secured an appropriation in the last session of that Congress for a preliminary examination of it. Soon thereafter a convention for the discussion and furtherance of this project was called at Victoria, Tex. On account of yellow fever and resulting quarantine restrictions, however, the interested people of southwestern Louisiana were unable to attend the convention. So great was the success of the Victoria gathering that a similar meeting was held at Lake Charles, La., and the enthusiasm and interest displayed in this convention exceeded that of the Texas city. The seeds of success were sown in Victoria and began to bear fruit immediately after the quarantines were raised and Major Jadwin was able to continue his survey in Louisiana. The result of his investigation was a favorable report on the entire project.

I have tried to give an impartial history of this project. I trust that I have done full justice to everyone thus far connected with our success, and that I may be pardoned personal reference to myself in the narration of events leading to this convention. Let no one claim exclusive credit for what has been done; there is credit enough for all, and the work to the final culmination of this important matter is such that all may gain further laurels and the blessings of this and generations to come by aiding in the good work.

The cycles of the history of the world have been labeled by the historian with the name of the main accomplishment in the advancement and progress and the civilization of each cycle. The age of electricity is to be followed by the age of canals. This is to be the age of canals. The duty of canalizing this country is one devolving upon us, and let no one underestimate the tremendous scope of this duty or the benefit to accrue from the duty well performed. Its importance to the welfare of our people—to their economic and industrial advancement and the civilizing effects upon them—is beyond the conception of this generation. Canal construction is but in its infancy; it is too early to even predict its ultimate accomplishments; of one fact we are sure, the whole tendency of canalizing this country is in the direction of development, of advancement, and of improvement. Anyone doubting this has but to study the effect of the cutting of the Suez Canal upon the trade of the Orient as well as upon that of all of Europe. He has but to speculate upon the resulting effects of the opening of the Panama Canal on the fortunes, the economic, the industrial developments of the people of the world.

I said canal construction is but in its infancy. Almost all of the canals of the world have been cut within the last fifty years. The nine main ship canals of the world were cut in the order following:

The Suez Canal, 90 miles between seas, was commenced in 1859 and completed in 1869.

The Cronstadt and St. Petersburg Canal, running from St. Petersburg to Bay Cronstadt, a distance of 16 miles, was commenced in 1877 and opened to navigation in 1890.

The Corinth Canal, 4 miles long, connecting the Gulf of Corinth with the Gulf of Ægina, was begun in 1884 and completed in 1893.

The Manchester Canal, 35½ miles long, running from Manchester to the Mersey River, was opened to navigation in 1894.

The Kaiser Wilhelm, 61 miles in length, and connecting the Baltic and North seas, was commenced in 1887 and concluded in 1895.

The Elbe and Trave Canal, also connecting the North and Baltic seas, but shorter than the Kaiser Wilhelm by 20 miles, commenced the year the latter was opened to navigation, was concluded in 1900.

The Welland Canal, connecting Lakes Erie and Ontario, and the Sault Ste. Marie, connecting Lakes Superior and Huron, the former a Canadian and the latter an American canal. These are the nine principal ship canals of the world. The last two canals give, together with their connecting lakes and rivers, continuous passage from the head of Lake Superior to Lake On-

tario and the St. Lawrence River. True the Welland was cut in 1833, but it was insignificant until it was enlarged in 1871 and 1900. So also the Sault Ste. Marie was cut in 1855 and enlarged in 1881 and 1896 by our Government.

The Canadian canal at St. Marys River was opened in 1895. Of these I shall have occasion to refer to again. Thus it is noticed of what recent origin has been the opening of the important canals of the world.

I shall not here enumerate the numberless smaller or less important canals that have been cut on every part of the globe, all of recent construction, as that would serve no useful purpose at this time. Suffice it to say that France has 3,021 miles of canals; Holland, 2,224; Germany, 1,511; Belgium, 1,229; United Kingdom, 3,097; the United States has thirty-seven navigation canals, with a mileage of 2,443 miles.

I can not leave this phase of the subject, however, without making reference to the Imperial, or Grand, Canal of China, 4,000 miles in length and connecting Hangchow and Peking. There are two peculiar reasons for my special mention of this canal. One is its antiquity, it being said to have existed in its present state at the time Columbus discovered America. The other is the varied uses which these ancient people make of it. Says the United States consul at Hangchow, Mr. Anderson:

Leading from the Grand Canal in each direction are smaller canals, and from these lead still smaller canals, until there is hardly a single tract of 40 acres that is not reached by some sort of a ditch generally capable of carrying good-sized boats.

Now, what uses do the Chinese make of this canal?

They use it for navigation.

They use it for irrigation.

They use it for fishing. They catch shellfish from its bottom.

They gather muck from the bottom to be used for fertilizer.

They use the floating weeds, grasses, and other vegetable débris gathered from it for food.

They use the weeds growing along its banks for weaving baskets and for fuel.

They use the swampy places along the canal to grow lotus roots, out of which arrowroot is made.

They grow water nuts, especially water chestnuts, in the best parts of these swampy places.

They have duck farms all along the canal, though how a duck can eke a living in the waters of the canal after the Chinaman has raked it is a puzzle to me; and finally, they use the water of the canal for laundering, for culinary, and for bathing purposes.

I said awhile ago that I should again refer to the Canadian and American canals, connecting together the great inland seas forming the northern border of the United States.

With regards the Canadian canal I shall simply quote from United States Consul Bettinger's report of March 21, 1906, the following:

From the point where the waters of Canada mingle with those of the Atlantic to a Canadian port at the head of Lake Superior, along the entire course of which a vessel may sail in Canadian waters, the distance is 2,200 statute miles.

From the Straits of Belle Isle to Montreal the St. Lawrence River extends 986 miles, with a channel wide enough and deep enough for ocean steamers.

From Lake Superior to Three Rivers on the St. Lawrence where tidal influences, a few hour's sail from Montreal, there is a drop in level to the extent of 600 feet—that is, a vessel from Montreal on its voyage to Port Arthur has to ascend 600 feet. To attain this height there is a system of locks in operation, by means of which vessels are lifted 551 feet, leaving 49 feet to be overcome by working against a downward stream, which at one place, near Iroquois, often necessitates a tug to help the steamer up the river.

CANALS.

Between Montreal and Kingston the canals, with their length, lock dimensions, and height of lift, are as follows:

| Canal. | Length. | Length of locks. | Lift of locks. |
|---|---|---|---|
| | *Miles.* | *Feet.* | *Feet.* |
| Lachine | 8¼ | 270 | 45 |
| Soulanges | 11 | 280 | 84 |
| Cornwall | 11 | 270 | 48 |
| Farrans Point | 1 | 300 | 3½ |
| Rapide Plat | 8½ | 270 | 11½ |
| Galops | 7½ | 800<br>270 | 15½ |
| Murray | 5½ | (a) | (a) |

[a] No locks.

The width of the locks is 45 feet and depth of water on the sills is 14 feet. On their course down from Kingston to Montreal several of the canals are not used, as the rapids are run with safety. From Kingston the course west is through Lake Ontario until Port Dalhousie is reached, where the Welland Canal is entered. This splendid construction extends 26¾ miles. The total lift is 326¾ feet, which is effected by twenty-six locks, each 270 by 45 feet, with a depth of 14 feet. From the end of the Welland Canal, Port Claiborne, there is deep water to Sault Canal—394 miles. The Sault Ste. Marie Canal extends 5,967 feet. It has only one lock, which is 900 by 60 feet, and lowest depth 20 feet and 3 inches, the total rise being 18 feet. Another water course runs from Montreal to Ottawa and turns down to Kingston, a total distance of 245 miles. The rivers Ottawa and Rideau are part of this waterway. The canals on this route are: Lachine, 8½ miles; St. Anne lock and piers, one-eighth of a mile; Carillon Canal, three-fourths of a mile; Greenville, 5¾ miles. From Ottawa to Kingston—126½ miles—there are thirty-five locks. Besides these main-line canals, there are others on the line of the Richelieu River, in Ontario, through the Petersburg district, in Cape Breton, and a number of branches acting as feeders to the Rideau and the Welland systems.

As to the St. Marys Canal at Sault Ste. Marie, Mich., I shall simply quote from Mr. J. A. Farlie's In Annals of the American Academy of Political and Social Sciences, January, 1898, the following:

There has been a canal around the falls in St. Marys River between Lake Superior and Lake Michigan, available for vessels drawing not more than 12 feet of water, from 1855 on, but fifteen years later the average annual increase of 21 per cent of each year's freight traffic over that of the preceding year made it so evident that the canal would be soon inadequate for the increasing commerce that the United States Government began improvements, and by 1881 had completed an 18-foot channel between the lakes and provided a 515-foot lock with a single lift of 20 feet for carrying vessels from the level of one lake to that of the other. The continued growth of the traffic led to an improved 20-foot channel, provided with an 800-foot lock, in 1896. Following the example of the United States, the Dominion of Canada built a canal around the Canadian side of the falls in 1895.

The volume of traffic through this canal far exceeds that through the Suez Canal. In 1881 the traffic at the old St. Marys Falls Canal was 1,560,000, as against 4,130,000 tons through the Suez Canal; but with the enlargement of the American canal a rapid increase in traffic immediately developed. By 1889 it equaled that of the Suez Canal (about 7,000,000 tons in each). In 1895 a tonnage of 15,000,000 tons went through the St. Marys Falls Canal, as compared with 8,500,000 tons through the Suez Canal, and in 1901 the figures for the St. Marys Canal were 28,403,065 tons. The present traffic through the American canal exceeds the total foreign trade of the port of New York and is equal to nearly half of the total volume of the foreign trade of the United States. In value the traffic through St. Marys Falls Canal presents less imposing figures, though even in this respect it is by no means insignificant.

The value of freight passing through the canal in 1896 is estimated at $195,000,000, and in 1891 at $290,000,000. The Indian traffic through the Suez Canal in 1896 is valued at $360,000,000. Nevertheless, a trade increasing nearly $1,000,000 a year within a period of five years may prima facie be expected to have had important economic effects.

As in the case of the Suez Canal, the most striking results have been on the machinery trade, the influence of the St. Marys Falls Canal on the shipping industry of the Great Lakes being especially marked. It is not too much to say that the development of the carrying trade of the Great Lakes, both in numbers and kinds of vessels used, is due almost wholly to the "Soo" Canal. From 1881 to 1895 the volume of commerce through the Detroit River increased from 17,500,000 tons to 29,000,000 tons. During the same period the volume of commerce through St. Marys Falls Canal increased by 13,500,000 tons, and as a larger share of the canal traffic goes through the Detroit River to Lake Erie ports, the increase in the traffic of the Detroit River is seen to have been mainly in the traffic from Lake Superior, made possible by the existence of the canal and locks at Sault Ste. Marie. This increase in traffic means a corresponding increase in the number of vessels in the lake-carrying trade, and probably half of the 3,230 vessels on the Lakes are employed in business depending on the canal. Between 1883 and 1897 the total tonnage on the Lakes increased from 720,000 to 1,410,000 tons, the increase being more than the total increase in the American merchant marine during this time. Further, while in 1883 the lake tonnage was but one-sixth of the total American merchant marine, in 1897 it was nearly two-sevenths of the total.

What else has been accomplished? From the same authority I quote:

The geographical changes in production that have resulted from the operation of the St. Marys Falls Canal have been accompanied by important movements of population. A definite connection can be shown between the canal and certain particular population movements, but with other changes the canal has been only one of several factors. The increase of population around the shores of Lake Superior may be fairly ascribed to the development which has been given to that country by the canal. Taking the counties bordering on Lake Superior we find that from 1880 to 1890 the population of the Michigan counties increased from 61,750 to 116,600; of the Wisconsin counties from 8,000 to 41,000, and of the Minnesota counties from 6,400 to 54,700. The total increase is not a startling figure in the United States, but compared with the percentage of increase in these same States as a whole the result is striking. During the decade the population in Michigan and Wisconsin increased in each case about 27 per cent and of Minnesota about 70 per cent. In the Lake Superior counties the per cent of increase was in Michigan 90 per cent, in Wisconsin 400 per cent, and in Minnesota 800 per cent. The only explanation of the difference is that new lines of industry have been opened up by the larger "Soo" canal. One conspicuous feature of this increase of population in the Lake Superior region is the development of the cities. Of the total increase of 136,000, 72,000 occurs in the six cities of Duluth, Superior, Ishpeming, Ashland, Marquette, and Iron Mountain.

Duluth, from a town of 3,500 in 1880, had become a city of 33,000 by 1890, and six years later had a population of 60,000. Ishpeming increased during the ten years from 6,000 to 11,000. Superior from 4,700 to 9,000, while the other three places were not in existence in 1880, but had populations between 8,500 and 12,000 in 1890.

From these facts and figures of development following upon the Government improving the waterways of various localities we can safely predict a future of unequaled growth and advancement for the fertile lands of Louisiana and Texas contiguous to the proposed waterway.

This project has been pronounced not only feasible, but even easy of accomplishment. It is not an engineering feat, as was the canalization of the Seine for 155 miles, from Paris to Rouen, with nine stations of movable and immovable dams for the drainage of superfluous waters, as well as locks to insure in low-water stages continuous navigation.

Nor like the Canal du Midi, from Toulouse, on the Garonne, to Cotte, on the Mediterranean, 150 miles in length with 114 locks and 600 feet in rise.

Nor like the St. Quentin Canal, with 58 miles of length and its 35 locks and two subterranean passages at its summit-level pond, respectively 3,609 and 18,700 feet in length.

Nor like the Erie Canal, with its 72 locks in its length of 387 miles.

Nor like the Ohio Canal, from Cleveland to Portsmouth, Ohio, with its 150 locks in 317 miles.

Nor like a dozen more American canals which I could name with their innumerable locks.

It is simply a question of digging dirt, a greater part of which has already been dug.

True, the expense of cutting this waterway was estimated in 1875 at $8,039,461.19, and that for only a canal 6 feet in depth, but now the cost of dredging is not nearly so much as then. For instance, the dredging in 1875 was estimated to cost all the way from 40 cents to $1 per cubic yard. No one dreams that with modern machinery the most difficult and expensive cut would come near costing even the smaller figure of the lowest cubic-yard estimate of the 1875 estimate. Thus we see that the cost of locks is eliminated, while the deepest cuts would cost but a small fraction of the estimated cost of 1875.

In fact, Major Jadwin recommended the entire canal, and his estimate of the cost was as follows:

| Franklin to— | Miles. | Cost. | Maintenance. |
|---|---|---|---|
| Vermilion River | 49 | $125,900 | $10,000 |
| Point opposite Mermenteau River | 43 | 163,392 | 10,000 |
| Point opposite Calcasieu River | 37 | 224,329 | 10,000 |
| Mouth of Sabine River | 35 | 164,886 | 10,000 |
| Galveston | 97 | 637,683 | 20,000 |
| Brazos River | 54 | 141,528 | 20,000 |
| Pass Cavallo | 78 | 552,497 | 20,000 |
| Aransas Pass | 62 | 65,850 | 10,000 |
| Point Isabel | 139 | 717,262 | 25,000 |
| Rio Grande | 10 | 138,946 | 10,000 |
| Lock (Howell's) | ..... | 18,739 | ..... |
| Total | 604 | 2,951,013 | 145,000 |

The dimensions of the proposed waterway are the same throughout, i. e., available depth of 5 feet and bottom width of 40 feet.

Although Major Jadwin recommended the entire project, the Board of Engineers for Rivers and Harbors could be prevailed upon to accept only 208 miles of the project, to cost $496,670.80, with $50,000 for maintenance, their recommendation being as follows and which is carried in the pending river and harbor bill:

| | Miles. | Cost. | Maintenance. |
|---|---|---|---|
| Mississippi River to Franklin (covered by existing projects) | ..... | ..... | ..... |
| Franklin to Mermenteau River | 92 | $289,292.00 | $20,000.00 |
| Galveston to Brazos River | 54 | 141,528.80 | 20,000.00 |
| Aransas Pass to Cavallo Pass | 62 | 65,850.00 | 10,000.00 |
| Total | 208 | 496,670.80 | 50,000.00 |

Now that 208 miles of the canal have been provided for, the agitation of the matter should not only continue until the waterway is constructed in its entirety; but after then the demand for 9 feet in depth and 80 feet in width for the canal should be made and supported by every person who lives along this proposed waterway. A water course only 5 feet deep and 40 feet wide is not sufficient to handle the enormous traffic that lies waiting in southwestern Louisiana and southern Texas to be floated to market via the inland water route.

While those of us who have taken such interest in this important enterprise are glad that we have launched it on a safe basis, we can not but regret that the Board of Engineers did not see fit to approve the entire project, and to me there is another source of regret, which I am compelled to refer to at this moment. My first resolution for a survey of this project, as well as subsequent resolutions, provided that the inland waterway should start at Donaldsonville, La., go down Lafourche Bayou, take the course of the Attakapas Canal into Lake Verret, thence up the Teche. The order of survey included in the river and harbor bill directed that the survey start from Donaldsonville. I can not but regret that Major Jadwin did not submit plans, specifications, and estimates of cost for that portion of the route, but should have decided instead to start the waterway at Franklin, availing himself of the Plaquemine route to reach the Mississippi River. This is particularly unfortunate, for the reason that Bayou Lafourche is dammed at its head, and there is a great desire to have a lock replace the dam established by order of Congress. The burden of constructing this lock has been placed by both Congress and the State legislature upon the Atchafalaya and Lafourche levee districts jointly. The cost of this lock seems to be far in excess of the ability of these two boards, and so there are some differences said to exist in Louisiana over this dam and the lock.

I am reliably informed that the two boards are willing to subscribe $500,000 toward the construction of this lock, and it is my candid opinion that Congress should contribute the balance of the money necessary for its construction. It is my sincere hope that Congress will in the near future recognize the importance of this matter, avail itself of the offer of these two boards, and provide the necessary balance, and thus relieve the people who are now complaining of the existence of the dam. I shall certainly do everything in my power to commit Congress to the project.

For what purpose should this waterway be cut?

For coast defense—to move safely, easily, unexposed from storms and the enemy, troops, ammunition and armament, coast artillery, light-draft cruisers, and provisions in case of need. For that purpose it should not be less than 9 feet deep—to move these to any point of attack—to reach the great number of streams emptying themselves into the Gulf of Mexico, which the inland waterway will traverse in its grand function of linking the Mississippi and Rio Grande—to move these component parts of defense up the Rio Grande in case it should be our misfortune to again disagree with our western neighbor, which God forbid or long delay—to move these from the West to the Mississippi River, thence down the great river to the Gulf, or up the river to where? Let me tell you where, to the Great Lakes in the North.

From Chicago to Joliet, Ill., the city of Chicago has cut a drainage canal. That city, where things are done, has cut 30 miles of canals at a cost of $1,000,000 per mile. It proposes in the near future to spend twenty million more. It contends that if the United States Government will do for Chicago what it did for the wheat growers of Lake Superior and the iron mine owners and miners of the territory west of that great lake, when the Government took charge of the work already done by local contribution at Sault Ste. Marie—take possession of the Chicago Canal and spend $25,000,000 more, or half what Chicago has spent on it, the Great Lakes will have 14 feet all-water route connecting them with the Mississippi River and the Gulf of Mexico. Not long ago Congressmen LORIMER and RAINEY made a trip in a boat of small draft from Chicago to New Orleans. They traveled 1,500 miles, and I was with them a short part of the trip. They organized waterways associations in every city, town, and hamlet between Chicago and New Orleans. At no distant day this work will be done. Move, then, those objects I have just mentioned to the Great Lakes.

Again, lately, a bill passed the Congress for the authority to cut a canal through the States of Pennsylvania and Ohio, connecting the Ohio River with Lake Erie. This ship canal shall begin on the Ohio River at some point between Beaver and Pittsburg to some accessible harbor on Lake Erie and shall have a depth of at least 12 feet. Move these objects, then, up the Ohio River into Lake Erie.

Such, therefore, is the purpose of cutting this waterway, but the incidental benefits are no less important; they are of a magnitude the extent of which is in the future and baffles accurate estimate. Through this waterway may be moved the full half of the sugar production of the United States, practically the entire sulphur production of the United States, nine-tenths of the entire production of rice, nearly all of the salt mined in America, a large percentage of cotton production, the bulk of oil production, the immense product of the forest—of pine, cypress, and hard wood of southwest Louisiana and southern Texas—the reclamation of thousands upon thousands of acres of land of such rich and varied qualities that it can produce everything grown on the earth, the opening of abattoirs to prepare into meat the immense herds of cattle roaming the vast plains of Texas, instead of sending them to Chicago and Kansas City to there be prepared and reshipped to us and sold at prices including the freight both ways. Thousands of barrels of oil, the cheapest fuel; wood of excellent quality, variety, and in great quantity; and with navigation facilities into these rich

forests, the establishment of factories to convert these woods into merchantable articles is sure to follow.

Who shall say where it will end? Who shall say?

The flour that is manufactured on Lake Superior and now finds its way into Canada, the Atlantic seaboard, into the North and East, everywhere by all-water route at cheap freight rates, will then find its way down the Mississippi River and land in southwest Louisiana and southern Texas by an all-water route at a vastly reduced cost of transportation. The iron of Lake Superior and the varied manufactures of iron—the agricultural implements there manufactured—the grain crops of all kinds, will have the same privilege. The coal loaded at Pittsburg will be floated down this waterway at a minimum cost and be consumed at reduced prices. We, on our part, will reverse the course of the travels of the crafts bringing these things to us. We will send back our rice, our sugar, and our lumber and the manufactures thereof, our sulphur, our salt, and our meats—all back to the North and East at rates now unthought of by the transportation companies. Every town tributary to the waterway shall have equal enjoyment of every port of the Gulf. Every city or town along the natural water courses tributary to the waterway will become a customer to every port of entry between the two great rivers it is sought to connect. All of these thriving towns will be privileged to use New Orleans, Galveston, Morgan City, Calcasieu, Port Arthur, Sabine Pass—all will be equally accessible to each. The increase of population that followed the cutting of the Sault Ste. Marie Canal will follow the cutting of this waterway.

But, gentlemen, that is not all; this waterway will regulate railway rates. It is well for Congress to pass laws to regulate railway rates; but, after all, water navigation, water competition, is the sole self-acting regulator of railway rates. I quote a pertinent paragraph from Mr. O. P. Austin, Chief of the Bureau of Statistics of the United States Department of Commerce and Labor:

> Railway tariffs are badly adapted to commercial fluctuations. In this respect water carriage presents incomparably greater elasticity. Waterways also create a new competition and often cause railways to reduce their tariffs. It is a happy method of forcing the hands of railway monopolies. Here is the heart of the question. The interest of the country is to have its transportation at the cheapest price possible. In this age, especially when the sharpness of international competition seems not to know any limits, carriage at the lowest price is an absolute necessity. Now, navigable waterways afford an economical method of transportation par excellence. Not only do they prevent the exaggeration of rates by railways, and, indeed, often produce reductions which permit certain industries to compete in foreign markets, but in many cases they also permit the operation and development of natural riches, mine and quarries, which by their remote situation can not incur the comparatively high freights of railways in bringing their products to market. This means of transportation is strongly recognized on the European continent.

How germane to the living issue of the day—indeed, "here is the heart of the question." The waterway shall be constructed; it shall have a depth of 9 feet; it shall be constructed by the Federal Government.

That it should be constructed by the Government—that all canals shall be constructed by the Government—is a vital question with the people of this Republic. The policy of European countries and of Canada is never one to be tolerated with us. Of Holland's 2,224 miles of canals, 1,511 are owned by the railroads; of 3,869 miles of canals in the United Kingdom, 2,768 miles, or more than two-thirds of the mileage, is in the control of the railroads. So the policy is pursued in other countries. The canals are the feeders of the railroads, and so they should be, and so they incidentally become under Government ownership of them; but while they feed the railroads, so far as the circumstances require, the main function under Government ownership of them is to primarily regulate the charges for freight transportation, and incidentally only to supply and be supplied of freight going or coming from localities beyond the operations of each. The private ownership of canals means the railroad ownership of them; the railroad ownership of them means that the main function of the canal is destroyed, that of competing and by competing in freight rates throw out the full benefit of the cheapness of this system of transportation. It is to dwarf the usefulness of canals and to permit them to fulfill their secondary function solely, which may be better performed by a railroad.

This great Government of ours must open its purse to better improvement of its rivers and harbors, to the cutting of canals, even if in so doing it finds that it can spend less in armament, in colonial possessions, in strange, alien, and obnoxious government abroad with no profit to our people. This is but the beginning of the canal age. This Government of ours, the foremost nation in the race for commercial supremacy, ever mindful of the welfare of its people, must realize that we are now entering the canal age, and in order to hold our lead in the march of progress and civilization this Government's policy toward its waterways must be generous and magnanimous.

## River and Harbor Appropriations.

### SPEECH

OF

# HON. J. B. BENNETT,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 6, 1907.*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. BENNETT of Kentucky said:

Mr. CHAIRMAN: The bill under consideration carries an appropriation and authorization of more than $83,000,000 for the improvement of various rivers and harbors, which is, I am glad to note, a very large increase over the amount carried in any river and harbor bill heretofore reported to this House. This increase meets with my hearty approval, because it is responsive to a sentiment in the country demanding more liberal appropriations than have heretofore been made for the improvement of the waterways and harbors of the country.

The people of all sections of the country seem recently to have become thoroughly aroused to the importance of improvements of the character provided for in this bill to facilitate the growing commerce of the country and cheapen and regulate the rates of transportation, and have been manifesting an awakened interest in them everywhere, both individually and as organized bodies, and any river and harbor bill introduced here that failed to recognize by increase of appropriation this universal demand of the people of the country would prove disappointing when enacted into law. I therefore, Mr. Chairman, congratulate the Rivers and Harbors Committee and its distinguished chairman, the gentleman from Ohio, that in this bill they have responded to some extent to the earnest appeals of the people everywhere in the country by increasing the appropriations carried in this bill, and although the bill does not contain all that I have earnestly desired it should, yet it does contain provisions in which my constituency are deeply interested, and is therefore entitled to my support, and I hope it will become a law.

The only criticism, Mr. Chairman, that I have to offer on the bill is that it does not go far enough, and that places that should have been provided for are not included in the bill, but it may be said, in justification of this action by the committee, that the amount authorized and appropriated is very large and seems to be well distributed throughout the country, and I have no doubt that in the judgment of the committee it has been equitably distributed; but I am sure, Mr. Chairman, that projects of equal merit to others provided for in the bill have been passed by, and I want to speak, briefly, of one thus treated in my section of the country. I refer to the project for the improvement of the Big Sandy River and the Tug and Levisa Forks of this river.

Earnest appeals have been made to the committee for a small appropriation and authorization to continue work upon this project, but these appeals have met with no response in this bill, the committee, it is understood, insisting that the increased appropriation for the improvement of the Ohio River should be satisfactory to this section of the country.

The Big Sandy River, with the Tug Fork thereof, forms the boundary line between the States of Kentucky and West Virginia, and drains a territory rich in mineral resources, as I shall presently show; and I believe and have earnestly insisted that provision should be made in this bill for continuation of improvements already begun on this river.

I have the honor, Mr. Chairman, to represent on this floor a district in Kentucky which borders upon the Big Sandy River for a distance of more than 40 miles; and the State of Kentucky borders upon these two rivers for about 100 miles, and the Levisa Fork, whose junction with the Tug Fork forms the Big Sandy, extends for a distance of about 100 miles through the mountain region of the State of Kentucky. The people of my district and the people of all eastern Kentucky and of western West Virginia are interested directly and deeply in the improvement of these rivers, and the completion of the improvements contemplated by surveys already made would add greatly to the commerce of the country and afford to the people of the United States as great benefits, in my judgment, as the improvement of any stream of like size in the whole country.

Mr. Chairman, I want to call the attention of the committee

to the vast resources of the territory drained by these rivers, that would find in the improved river an outlet to the commercial world. The figures I refer to are not based upon mere conjecture. They are taken from a report made by Prof. C. N. Brown, of the Ohio State University, who was selected by the engineer in charge, because of his large experience and eminent fitness for the work, to thoroughly investigate and make report of the resources of this territory. He went upon the ground, and his estimates are based upon facts learned by actual observation and data obtained from the Kentucky State geological survey. This report will be found in House Document No. 235, Fifty-sixth Congress, second session. On page 14 of document referred to Professor Brown states as follows:

The two branches of the Big Sandy River coming together at Louisa, Ky., drain an area of about 4,000 square miles, lying in the States of Kentucky, West Virginia, and Virginia. The Levisa Fork is the western and larger branch, and its basin includes about 1,600 square miles in Kentucky and about 800 square miles in Virginia. The Tug Fork is the eastern branch and forms a part of the boundary line between Kentucky and West Virginia. It drains about 500 square miles in Kentucky, 700 square miles in Virginia, and 400 square miles in West Virginia.

These streams are navigated by small steamboats, ranging from 20 to 137 tons burden, during the winter and spring and by "push boats" during the summer and fall. The boats go to Fish Trap, the mouth of Russell Fork, on the Levisa Fork, or about 100 miles above Louisa. On the Tug Fork they go to the mouth of Sycamore Creek, about 4 miles above Williamson, W. Va., and 61 miles above Louisa.

The area drained by these streams and their branches is rough and mountainous, and includes a part of the Cumberland Mountains. The valleys are usually quite narrow, giving very little land adapted to agriculture, and the hills or mountains rise from 200 feet to 1,500 or 1,600 above the streams. The area has had a dense growth of hardwood forest, including black walnut, poplar, oak, and other valuable and merchantable timber. Most of the timber near the main streams has been removed, but there is yet a very large amount of valuable timber that can be brought to market on these streams and will furnish employment to large numbers of men for many years to come.

The entire drainage basin of the Big Sandy River is included in the great Appalachian coal field, which extends from Pennsylvania to Alabama, and which includes the great coal and iron regions of Pennsylvania, Ohio, West Virginia, Kentucky, Virginia, Tennessee, and Alabama.

Some of the minerals of great economic worth peculiar to this great Appalachian basin are now known and worked in the Big Sandy Valley, and it is probable that others will be discovered in paying quantities as the region under consideration is prospected and developed.

The principal minerals of economic value and importance to be expected and sought for in this region are as follows: Coal, iron ore, clays, building materials, oil and gas, salt, glass sand, etc.

The coal is at present considered to be by far the most important and valuable of the minerals so far found or developed in the Big Sandy Valley, and the bulk of this report is devoted to this mineral. Before taking up the description of the coal field a short statement will be made of each of the other minerals observed in the valley.

It will be noticed from this statement that the territory drained by the Big Sandy and its forks is of very great extent, and that it abounds in mineral wealth, while virgin forests of timber yet exist in many localities and productive lands are found all over this territory; but by far the greatest element of wealth and the one that would add most to the commerce of the river and the world is the splendid deposits of most all kinds of coal, which exists in almost inexhaustible quantities throughout the entire basin contiguous to the river. From this report we learn that the quality of this coal is unsurpassed and the supply practically unlimited. I again quote from Professor Brown's report, same document, page 50. He states:

Gathering the estimates made for the various counties, we have an estimate of the number of tons of coal that may be expected to come down the Levisa Fork Valley before the coal fields are exhausted:

| | Tons. |
|---|---|
| Lawrence County | 55, 296, 000 |
| Johnson County | 419, 840, 000 |
| Floyd County | 256, 000, 000 |
| Knott County | 64, 000, 000 |
| Pike County | 751, 360, 000 |
| Letcher County | |
| Total | 1, 546, 496, 000 |

This number is so vast that one can not grasp its meaning without some kind of comparison. For this purpose the following few statistics have been gathered from the most convenient sources.

From the report of the inspector of mines of Ohio for 1896 the following is taken:

Amount of coal (including anthracite) shipped up the Great Lakes from Ohio, Pennsylvania, Maryland, and West Virginia:

| | Tons. |
|---|---|
| During 1890 | 5, 200, 449 |
| During 1891 | 6, 016, 331 |
| During 1892 | 7, 596, 812 |
| During 1893 | 7, 773, 580 |
| During 1894 | 6, 869, 257 |
| During 1895 | 7, 318, 234 |
| During 1896 | 8, 914, 327 |
| Average of the seven years | 7, 098, 429 |

If we assume that this trade has or will grow to, say, 10,000,000 tons per year, we see that the Levisa Fork has enough coal to supply the entire lake trade for over one hundred and fifty years.

From the report of the Chief of Engineers for 1895, page 2091, Maj. W. H. Heuer gives the following as the total shipments of coal from Pittsburg, Pa., down the Ohio River in boats and barges:

| | Tons. |
|---|---|
| During 1886 | 3, 483, 232 |
| During 1887 | 2, 155, 702 |
| During 1888 | 4, 174, 376 |
| During 1889 | 2, 589, 639 |
| During 1890 | 3, 420, 357 |
| During 1891 | 2, 893, 752 |
| During 1892 | 2, 299, 294 |
| During 1893 | 2, 364, 401 |
| During 1894 | 2, 453, 787 |
| During 1895 | 2, 393, 873 |
| Average of ten years | 2, 822, 841 |

If we assume the coal shipped on the river from Pittsburg to be 6,000,000 tons per year, we see that the Levisa Fork could supply this trade for over two hundred years.

If it should be thought that the estimates given for the various counties are too large, it is seen that they may be reduced by a large per cent and still show an enormous quantity of coal in this valley. It is believed that those best acquainted with the valley will criticise this report because the estimates are made as small as they are, but it is thought best to err on this side.

Again, on page 62 of his report, he gives estimates of amount of coal found on Tug Fork, as follows:

| | Tons. |
|---|---|
| Lawrence County, Ky | Not estimated. |
| Wayne County, W. Va | Not estimated. |
| Martin County, Ky | 151, 040, 000 |
| Pike County, Ky. (northern part) | 289, 280, 000 |
| Mingo County, W. Va | 230, 400, 000 |
| Total | 670, 720, 000 |

Stating this quantity in the same units as used for the Levisa Fork, we see that the Tug Fork could maintain the coal trade in the Great Lakes for sixty-seven years, or could maintain the Pittsburg shipments on the river for over one hundred years.

| | Tons. |
|---|---|
| On Levisa Fork | 1, 546, 496, 000 |
| On Tug Fork | 670, 720, 000 |
| Total | 2, 217, 216, 000 |

This quantity is so great that it may be thought that the estimates have been too liberal, but even if it be discounted 50 per cent there is still left a quantity almost beyond conception. But it is thought that the estimates have been quite conservative and that the quantity of available coal in these valleys is much more than above stated.

The estimate of 1,000 tons of coal for each acre of coal 1 foot thick is at least 20 per cent below what is now obtained in many coal fields, and it is probably 25 per cent below what can be obtained with the best modern methods of mining.

The estimates of acreage and thickness of the seams is much less than what is claimed by many persons thoroughly acquainted with the field, some of whom are not in any way interested in its development.

We find the same facts, with comments thereon, presented by Mr. B. F. Thomas, resident engineer at Louisa, Ky., in final report of date November 10, 1900, from which we quote. On pages 20 and 21 of final report he states, with reference to the resources of this territory, as follows:

The summary here presented is of the coal tributary to the proposed slack-water improvement, and is made up partly of the above-mentioned report and partly from other sources, and is believed to be an exceedingly conservative estimate:

| | Tons. |
|---|---|
| Lawrence County, Ky | 150, 000, 000 |
| Johnson County, Ky | 600, 000, 000 |
| Martin County, Ky | 300, 000, 000 |
| Floyd County, Ky | 350, 000, 000 |
| Pike County, Ky | 1, 000, 000, 000 |
| Knott County, Ky | 100, 000, 000 |
| Letcher County, Ky | 100, 000, 000 |
| Wayne County, W. Va | 50, 000, 000 |
| Mingo County, W. Va | 350, 000, 000 |
| Total | 3, 000, 000, 000 |

In order to be able to form some idea as to the significance of the above figures, some statistical information is given as to the area, production, and water shipment of coal in the United States.

The Appalachian coal field furnishes about two-thirds of all the bituminous output of the United States, and is about 900 miles long and contains about 63,000 square miles. Of this area, West Virginia has 17,000 and Kentucky 9,000 square miles. Nearly one-half of the latter lies tributary to the rivers under consideration—Big Sandy, Levisa, and Tug.

The largest coal-producing area in this field is that of Pennsylvania, which ranges from 40,000,000 to 50,000,000 tons per annum. Of this about 3,000,000 tons are shipped by water to western and southern points. The total bituminous coal production of the United States varies from 130,000,000 to 140,000,000 tons per annum. The total lake shipments of bituminous coal amount to from 5,000,000 to 6,000,000 tons per annum.

It will be seen from the above figures that the quantity of coal estimated in the Big Sandy field is equivalent to the entire output of the United States for nearly twenty years—would supply the production of the Pennsylvania field for over fifty years, would furnish that transported from Pittsburg by river for one thousand years, and would equal the entire lake traffic for four thousand and fifty years.

Professor Brown's report, referred to heretofore, gives the locations, sizes of veins, and analyses of the various coals found in the Big Sandy Valley, and it is only necessary in this report to summarize the approximate quantities.

As an introduction to this summary it may be well to quote from the Brown report the following:

In order to form some idea of the total possible traffic that the coal of the Big Sandy Valley may furnish to the river when improved and the railroads when built estimates of the total tonnage of coal will be made, but it must be remembered that any statements as to the quantity of coal that may be obtained from any particular large area of this valley must of necessity be rough estimates, on account of the lack of accurate data as to the areas and thickness of the various veins.

In making the estimates that will be given hereafter every precaution will be taken to make them conservative and less than the general belief of those persons best able to judge the matter from a thorough acquaintance with the valley. Some of the companies holding large areas of coal lands have had a few surveys made of the crop lines of the principal veins on their lands, and these have been made use of. The topographical contour maps made by the United States Geological Survey were studied on the ground, and other notes taken from observations made during the extended tour of the valley.

It will be estimated that 1,000 tons of 2,000 pounds each can be shipped for each foot of thickness from each acre. This is to include the total shipment of coal, including lump, nut, and pea coal. This allows for about 700 tons per foot per acre to be lost in ribs and pillars and in "faults" and "horsebacks." In many mines 1,200 tons of lump coal besides all the nut and pea coal is shipped from each acre for each foot of thickness of clean coal.

The above assumptions give 640,000 net tons (2,000 pounds) for each foot of thickness for each square mile, and this number will be used in the estimates made below.

Mr. Chairman, it seems to me that these figures of the probable amount of coal available for commerce should convince the most skeptical of the desirability of the Government improving these streams at as early a date as possible, so as to afford cheaper transportation to this vast amount of coal and other products now inaccessible.

If this project had been presented to the committee and to Congress as an original proposition, it would come with that merit that should at once command the attention of both the committee and this great body, and be provided for with as liberal an appropriation as would be warranted by the revenues available for such purposes. It certainly would deserve fair treatment in any rivers and harbors bill where justice to deserving projects was intended. But, Mr. Chairman, the appropriation requested for these rivers does not come as an original project, and this is greater reason why it should have been provided for in this bill.

Several years ago Congress committed itself in favor of the project for improving these rivers; and I want to state here, as briefly as possible, what has heretofore been done by the Government upon these rivers toward securing slack water to this great coal field. About the year 1878 the Federal Government began making small appropriations for the Big Sandy and its forks, but these appropriations for a long time were scarcely sufficient for maintenance of the streams and did not warrant the commencement of new constructions, but in 1880 the project for a lock and fixed dam near Louisa, Ky., was adopted, which was so modified in 1891 as to provide for a movable instead of a fixed dam. This project was completed in 1896, and the lock and dam is now in operation. In the year 1898 a project for the improvement of these rivers to Pikeville, on Levisa Fork, and to Pond Creek, on Tug Fork, was submitted by Maj. W. H. Bixby, Corps of Engineers, being about 114 miles on Levisa Fork and about 90 miles on Tug Fork, which it was claimed would extend slack water into the heart of these coal fields. This project required the construction of three dams on Big Sandy River proper and ten on Levisa Fork and eight on Tug Fork, a total of twenty-one dams, at an estimated average cost of $225,000 for each dam, or an estimated cost of $4,725,000 for the entire project. Still later, to wit, March 3, 1899, the rivers and harbors bill contained the following provisions relative to the Big Sandy River and its forks:

Improving Big Sandy River, Kentucky and West Virginia: Continuing improvement, $52,500: *Provided*, That a contract or contracts may be entered into by the Secretary of War for such materials and work as may be necessary to complete two locks and dams in the Big Sandy River between Louisa and the mouth of Big Sandy River, in accordance with the report of April 27, 1898, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $420,000, exclusive of the amount herein and heretofore appropriated: *Provided further*, That of the amount authorized to be expended, $1,000 may be expended for the maintenance of Levisa Fork and $1,500 on Tug Fork, and $20,000, or so much thereof as may be necessary, for a detailed survey of the Big Sandy River and Levisa and Tug forks of the same in Kentucky and West Virginia: *Provided*, That the rest of the amount may be used for the local survey, acquisition of sites, and commencement of construction of the above-named locks and dams.

Since the adoption of the above provision two locks and dams have been constructed in the Big Sandy River proper, one at Catlettsburg, Ky., and one at Kavanaugh, Ky., which have been found sufficient to carry slack water from Catlettsburg to Louisa, thus affording a 6-foot stage in the Big Sandy River proper with one less lock and dam than was supposed to be necessary in Major Bixby's original estimate. Provision has also been made for the construction of Lock No. 1, Tug Fork, and Lock No. 1, Levisa Fork, and construction of these locks has been completed, but they are of no benefit to navigation on the stream, because dams have not been provided for. It is estimated that $117,500 each is necessary to construct the dams for each of these locks, which are necessary to complete these two improvements, and without this the work that has been done is absolutely useless.

According to the statement of the engineer in charge, there has heretofore been expended on these rivers, exclusive of maintenance of Tug and Levisa forks, the sum of $1,090,108.50. It will be seen, therefore, that the project for the improvement of these streams is well progressed, and that a large sum of money has heretofore been expended with a view to tapping these immense coal fields, and yet the improvement has not advanced far enough to be of any considerable benefit to other than local traffic, and much is required yet to be done in order to obtain full benefit of the money already expended on this project. The committee has been liberal with appropriations and authorizations in the bill reported to most all portions of the country, but this particular project has been entirely neglected. We do not ask, Mr. Chairman, that this river should be treated by the committee with greater liberality than other rivers of the country of equal imporance and promise, but we do insist that it is entitled to fair and just treatment by this body, and that this bill should carry at least an appropriation large enough to furnish dams for the incompleted projects on Tug and Levisa forks which have been commenced. It is estimated that the amount necessary to do this work is $235,000, and this comparatively small amount should have been reported by the committee and incorporated in this bill. The vast natural resources of the region that will soon be reached if this improvement is continued, its great benefit to the thousands residing in the territory touched and those in proximity thereto, the benefits to the whole country from the cheap fuel that will become accessible, and the large amount already expended by the Government that is as yet of only local benefit all point to the wisdom of completing this work as expeditiously as possible and cry out against its neglect or abandonment.

I understand the fact, Mr. Chairman, that the demands made upon the Rivers and Harbors Committee from all sections of the country are very great, and that it is impossible to satisfy them all and hold the appropriations of this bill within reasonable bounds; but, notwithstanding this fact, we feel that a small part of the estimated cost of the completed project on these rivers should have been carried in this bill, and that its failure is hardly compensated for by liberal appropriations for the Ohio River, although the sting of its loss may be less poignant when it is remembered that appropriations for the Ohio River benefiting navigation carry with them needed and lasting benefits to all the inhabitants of the Big Sandy Valley, because without the improvement of the Ohio the improvement of Big Sandy would be of much less benefit.

The vast resources of the Big Sandy Valley require the improvement of both the Ohio and Big Sandy rivers to enter into the commerce of the country, and if those which are needed nearest home can not be had at this time we are pleased to note that others equally important to the completed project of navigation on these rivers are provided for.

This bill carries an appropriation and authorization of more than $4,000,000 for the improvement of the Ohio River, with a view to securing in the end a 9-foot stage of slack water from Pittsburg to Cairo. This is the most liberal appropriation that has ever been carried in any rivers and harbors bill for this object, and these provisions, I know, are heartily indorsed by the people of my district and of the entire Ohio Valley. The only criticism that is likely to be made upon them is that the amount provided is not as large as we should have been glad to have. There is one question, Mr. Chairman, on which the people of the Ohio Valley are undivided, and that is the desirability of early action on the part of this body providing for the completion of the Ohio River project. The great and increasing commerce of the valley, which the railroads of the valley are unable to provide for, demands its speedy completion. The heavy freight rates charged by the railroads for moving the immense products of this valley to market constitute a heavy tax upon consumers everywhere in the country, and the completion of this project would, no doubt, reduce them largely, and thus be an inestimable benefit to consumers everywhere in the country.

There is produced on the fertile farms of the Ohio Valley and its tributaries everything that can be grown from the ground in this climate in the greatest abundance. Thrifty cities line its shores that are filled with manufacturing industries of almost every kind that ship their products to all the markets of the world, while the rich deposits of mineral wealth before mentioned is but an instance of many similar ones that exist, all of

which will be cheapened to consumers everywhere by the inevitable lowering of freight rates that will certainly follow its completion.

I do not agree, Mr. Chairman, with the view I heard expressed on this floor the other day that commerce will not again develop upon an improved river because, as a matter of choice, it prefers the railroads. With some kinds of freight this may be true, but not with all. Most of the commerce will seek that facility of transportation that affords the lowest freight rates when reliability is reasonably secured, while the inability to carry all the freight seeking carriage would force upon the river much freight at any rate.

This bill provides for the completion of Locks and Dams Nos. 26, 8, and 37 on the Ohio River and also a large appropriation for the falls of the river at Louisville, Ky. I confess I should have been better pleased with the bill, Mr. Chairman, if the locks and dams at Portsmouth and Catlettsburg had been provided for also; but I am aware of the fact that all of them could not be provided for in the same bill, and the distinguished chairman of the Rivers and Harbors Committee has informed the House that in making appropriations for those provided for the committee has followed the recommendation of the Board of Engineers, placing the first dams at the points most needed, and we are very much consoled in our disappointment by this declaration of the distinguished chairman, because we note that the next locks and dams recommended by the Board of Engineers are at Parkersburg, W. Va., Catlettsburg, Ky., and at Portsmouth, Ohio, in the order named. Following the precedent of this bill, we shall expect the locks and dams at these points to be provided for in the next rivers and harbors bill, and have no doubt that this will be the case.

## The Late Hon. Rockwood Hoar.

### REMARKS

OF

### HON. CHARLES H. GROSVENOR,

OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, February 10, 1907.*

The House having under consideration the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. ROCKWOOD HOAR, late a Member of this House from the State of Massachusetts.

"*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased"—

Mr. GROSVENOR said:

Mr. SPEAKER: Death with its merciless hand has not stricken a more worthy Member of the House of Representatives since I had the honor to be a Member of it than ROCKWOOD HOAR. He came from Massachusetts. He was the son of one of the most distinguished men of Massachusetts, George Frisbie Hoar, who as lawyer, literary man, patriot, and statesman had few equals and no superior in the Senate of the United States. His long service to his country made him an honored leader of opinion, and so it was reasonable for us to expect, when his son came to take his seat in the House of Representatives, more than the average of excellence, and we were not disappointed. He had a mind as sharp and incisive as the mind of his father. He was laborious, industrious, and clear-headed. He struck at the marrow of questions and studied them with diligence and aptitude.

As a member of the Committee on the Revision of the Laws he showed especial fitness and especial adaptation. He was making his way rapidly to a high position in the House of Representatives. He exhibited the elements of mental accuracy, incisive, clear, and brilliant.

I knew nothing of his history prior to his appearance here, but it did not take any of us long to discover that there had come amongst us a man destined for high position.

A more untimely death has not occurred in the House of Representatives in recent years.

I took delight in talking with him. His knowledge of literature, history, events of the past was of a high grade and his conversational powers of the very best.

It may be said of him that he exhibited a possibility fully equal to the high position attained by his father. He was genial, pleasant, considerate of others, was popular in the House of Representatives, and his popularity was of that stanch and endurable character that would have made him a prominent and distinguished personage in any assemblage of men.

His State has suffered an irreparable loss. The House of Representatives can well mourn the loss of a man who bid fair to be so valuable. His associates may well pay this tribute to his memory. There was every reason to believe that he would be a conspicuous member of the Massachusetts delegation, and I join in this brief and imperfect tribute to a man whose death I consider not only a national but a personal loss.

## River and Harbor Appropriation Bill.

### SPEECH

OF

### HON. EATON J. BOWERS,

OF MISSISSIPPI,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, February 7, 1907.*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. BOWERS said:

Mr. CHAIRMAN: It is not my purpose to enter into the general discussion of this bill except in a very brief way. I am in entire accord with those gentlemen who have declared that this is the best rivers and harbors bill that has ever been presented to this House. I regard it as the best in many ways. It comes nearer covering every deserving project in the United States than any previous bill that I have examined, and it appropriates more money to the improvement of our waterways than any of its predecessors.

The following statement taken from the report of the committee will show the amounts appropriated and authorized by the bills for some years past:

| Year. | Cash. | Authorized. | Total. |
|---|---|---|---|
| 1896 | $12,659,550.00 | $59,616,404.91 | $72,275,954.91 |
| 1899 | 16,091,841.94 | 23,866,324.13 | 39,958,166.07 |
| 1902 | 26,771,442.00 | 38,336,160.00 | 65,107,602.00 |
| 1905 | 18,181,875.41 | 17,184,657.63 | 35,366,533.04 |
| 1907 (as reported by Committee on Rivers and Harbors) | 35,181,612.00 | 48,634,526.00 | 83,816,138.00 |

This marked increase in the amount appropriated may be credited to two factors:

First. The increasing importance of water transportation, not only as a means of carriage, but as a competitor of rail lines, and the consequent influence upon all transportation rates.

Second. The awakening of the public mind to the above facts and to the importance of the development of water transportation, as shown by the popular and increasing demand for not only larger river and harbor bills, but also for annual instead of biannual appropriations. A great force and influence in bringing these matters before the people and in educating the public mind has been the National Rivers and Harbors Congress, to whose effective work I am happy to bear witness, and whose laduable efforts will, I trust, be continued until all their objects have been attained. To my mind the improvement of our harbors and inland waterways is of more importance to the internal development and commercial welfare of our people than any other matter now before Congress. It is admitted that the question of transportation is the greatest of all business questions now up for governmental solution, and in my opinion the primary and greatest step in its solution is the development of our waterways. But of that I shall have more to say further on in my remarks.

This bill marks, to a certain extent, a new plan, which the committee has wisely adopted, that of providing, wherever practicable, money enough to complete every project which it inaugurates. A most important departure and practice, in my opinion, because it obviates all trouble and difficulty resulting from partially completed projects. Again, it is apparent that every section of the United States has been cared for, and the appropriations and authorizations are intelligently distributed all over the country. By this I do not mean that the money has been distributed according to State lines, or geographical lines, or to various localities in order that the Government's aid may be equally or equitably distributed over the whole country, regardless of merit, or commerce and its needs. No worse plan

could be devised and none would find less favor with the committee which reported this bill. But a careful and painstaking examination of the rivers and harbors, and of the commerce and needs of every part of the United States, has been made by the committee and by the engineers under its directions, and the worthy and needy projects all over and in every part of the country have been cared for as fully and adequately as possible within the limits in which it was necessary to frame this measure. I congratulate the South, that section of the country from which I come, upon the recognition which it has received, and I specially congratulate the State of Mississippi upon the provisions made for its rivers and harbors.

As it is my purpose to address my remarks largely to the appropriations made for that State and especially for my own district, the Sixth, I shall proceed at once to a statement of the projects in that district, of the appropriations made therefor, and to a brief discussion of those projects.

All the seacoast of Mississippi lies in my district, and I am perfectly familiar not only with every cove and harbor, but with almost every foot of coast line which lies within our borders. It has long clamored for recognition and improvement, but until a few years back was only partially successful. Recently the attention of the engineers has been turned in that direction, and the results of improvement may be described as truly marvelous. A great commerce has been built up, young and thriving cities have grown and flourished on our coast, rail lines have been built, and more are now building, from the interior to our ports, and trade and commerce have flourished as never before. The following brief statistics will be of interest:

Pascagoula, for which $200,000 is appropriated for further improvement and maintenance, received its first substantial recognition in the river and harbor act of 1899, since which time there has been appropriated, exclusive of the amount carried in this bill, $529,000, the amount herein appropriated swelling the total to $729,000. The residue of $320,622 necessary to complete the present project will be appropriated as fast as estimated by the engineers. The splendid results of these expenditures are told in the following figures, compiled and furnished by the Commercial Club of that place:

In 1896, the only year before the present improvement was undertaken for which I have data, the exports from Pascagoula amounted to $1,561,400. Note the remarkable increase in the past eight years, as shown by the following table:

| | |
|---|---|
| 1899 | $2,051,312 |
| 1900 | 2,269,178 |
| 1901 | 2,629,000 |
| 1902 | 3,176,125 |
| 1903 | 3,405,450 |
| 1904 | 3,828,792 |
| 1905 | 4,142,630 |
| 1906 | 5,004,214 |

And in addition to these figures the inbound commerce by rail and water for 1906 amounted to $3,020,000, making a grand total for 1906 of $8,024,214. Surely a magnificent showing, justifying not only the expenditures already made, but an equally liberal policy in the future.

The dredging of Horn Island bar to a depth of 21 feet, which was provided for by the rivers and harbors bill of 1905, and which has been accomplished, and for the maintenance of which an appropriation of $9,000 is carried by this bill, will greatly facilitate and increase the commerce of this important port.

An appropriation of $10,000 for the further improvement of upper Pascagoula, Leaf, and Chickasahay rivers also appears in the bill, and the maintenance of these streams, specially important as logging streams and as a timber supply for the port of Pascagoula, is thus assured.

Biloxi is provided for by an appropriation of $9,000 for the maintenance of the present channel and depth at that point, and in addition a survey is ordered not only of the present channel, but for an extension thereof around the peninsula at the eastern end of the town and into the sheltered waters of Back Bay, with a view of deepening the channel to such depth as commerce may demand and of extending same into the sheltered and commodious harbor of Back Bay. The necessity and importance of this improvement will be obvious to all those who understand the locality. The front of Biloxi is more or less exposed, the Back Bay is perfectly sheltered and protected, and the extension of the channel into that bay will not only reach all the large plants situated thereon, but afford an absolutely perfect and protected anchorage.

For the Pearl River a new plan has been adopted designed to make the river navigable from Rockport to the mouth all the year, and an appropriation of $30,000, three times as much as heretofore carried in any one bill, is made available for immediate work. The entire plan contemplates the expenditure of $100,000 in the next few years to complete this improvement and the remaining seventy thousand will follow as rapidly as it can be used by the engineers. A survey is directed for the removal of the bar at the mouth of East Pearl River, and that serious obstruction to the navigation of that important stream will soon be removed.

The difficulties that for so long have beset and vexed the navigation of Wolf and Jordan rivers are removed by an appropriation of $30,000 for the removal of the bars at the mouths of these streams, and just here I wish to answer the criticism which some gentlemen have aimed at the small streams provided for in this bill. No one who will take the trouble to look into the commerce of the small streams found worthy of improvement will ever thereafter ridicule or oppose appropriations for their betterment. The commercial figures given by the gentlemen who have discussed this question more at length, notably my colleague [Mr. HUMPHREYS of Mississippi], are almost astounding. I want to add the facts as to Wolf and Jordan rivers to the already formidable data arrayed in behalf of the small streams. In 1904, the last year for which I have any detailed figures, the tonnage of these two small streams was 105,116 tons, valued at about $1,900,000, and the river and harbor board report that the tonnage for 1905 showed a material increase over that of the preceding year. And this great business was done despite the fact that the bars at the mouths of these rivers were impassable nearly half the time, and consequently nearly one-half the time of the vessels wasted. Surely such a condition not only justified but called loudly for relief.

For the maintenance of Gulfport Harbor, including the anchorage basin and the channel from Ship Island thereto, this bill carries the sum of $100,000, a sum sufficient for the maintenance of the present channel available for vessels of 22 feet. Indeed, frequently vessels of deeper draft use this channel without difficulty.

I have no hesitation in saying that the story of Gulfport is without a parallel in the history of the improvement of waterways. With an appropriation of only $150,000, a channel 22 feet deep and 300 feet wide has been dredged from Ship Island to the main shore, and a perfectly sheltered anchorage basin half a mile long by one-quarter mile wide has been provided. It is a matter of common knowledge that this work has cost over one million and a half dollars, and that the excess has been provided by the gentleman who did the work and who is of course interested in Gulfport. But interest or no interest, I challenge the annals and records of river and harbor improvement to produce another case of such progressive public spirit and high civic ideals and action. The sum expended by the Government at Gulfport, viz, $150,000, has achieved results that I challenge the world to match at the price. The port was opened for business in 1902. Note the following marvelous growth of commerce:

EXPORTS.

*Comparative shipments from Gulfport by water for the years 1902, 1903, 1904, 1905, and 1906.*

| Year. | Vessels. | Lumber. | Rosin. | Turpentine. | Tonnage. | Estimated value. |
|---|---|---|---|---|---|---|
| | | *Feet B. M.* | *Barrels.* | *Gallons.* | | |
| 1902 | 31 | 19,035,252 | ..... | ..... | 42,830 | $338,000 |
| 1903 | 111 | 105,849,522 | ..... | ..... | 238,162 | 1,665,000 |
| 1904 | 269 | 245,213,829 | 92,726 | 255,480 | 568,000 | 4,025,196 |
| 1905[a] | ..... | 207,614,000 | 112,549 | 577,200 | 488,132 | 5,227,571 |
| 1906 | ..... | 300,000,000 | 110,736 | 565,000 | 693,000 | 7,322,561 |

[a] Port practically closed three months in 1905 on account of quarantine.

The movement in and out by rail for said port was as follows:

| Year. | Inbound. | | Outbound. | | Total. | |
|---|---|---|---|---|---|---|
| | Tons. | Value. | Tons. | Value. | Tons. | Value. |
| 1904 | 370,259 | $12,228,822.00 | 68,283 | $6,139,872.00 | 438,542 | $18,368,755.00 |
| 1905[a] | 316,807 | 15,252,712.48 | 74,834 | 5,885,530.17 | 391,641 | 21,138,247.00 |
| 1906 | 389,843 | 15,769,815.00 | 70,964 | 7,066,260.00 | 460,807 | 22,836,075.00 |

[a] Port practically closed three months in 1905 on account of quarantine.

From these tables it will be seen that in five years the exports have grown over 1,600 per cent in volume and over 2,100 per cent in value—from 42,830 tons in 1902 to 693,000 tons in 1906; from $338,000 in 1902 to $7,322,561 in 1906; and the combined business by both rail and water for the year 1906 reaches the enormous total of $30,158,636. And I repeat that nowhere in this country has the same trifling expenditure of money produced the same wonderful results. By the last river and harbor bill a new survey of Gulfport channel and harbor was ordered with a view of determining whether the commerce required its further deepening. Owing to the existence of the contract for maintenance, the question was not passed upon on its merits; and as this bill carries a provision for the cancellation of that contract, the matter will be sent back to the engineers to be passed upon anew and on its merits. And just here I desire to

applaud the committee for the liberal and public spirit that prompted their assent to the recision of this contract. It is an act of justice that will be applauded by all who know anything of the facts.

In the outset I expressed great satisfaction with this bill, and I repeat that expression. I confess that I would be more pleased if it contained a provision for which I labored and for which I am still hopeful, viz, for the construction of a seagoing hydraulic dredge for use on the Mississippi coast. Experience has demonstrated that the Government can, where it owns a dredge, do its work for much less than it can contract it out. In some cases the difference is so great as to be almost appalling. If we can secure a dredge for use on our coast and in our projects, it assures for all time to come that all our harbors will not only be cared for *but that they will be improved to their utmost capacity.* The ownership and presence of the dredge will so reduce the cost that all objections to undertaking any of our work will be entirely overcome.

With this bill—and I say it with a pride that I hope is pardonable—every river and harbor in my district that is capable of improvement receives governmental aid and is taken care of. Every survey that has been made has resulted in improvement and an appropriation, and there is not a stream in the Sixth district that is seeking aid or a harbor on our whole coast that is not provided for. While I was unable to add this dredge to the very full and liberal appropriation (in every case the full amount estimated by the engineers and in some instances more) made for this district, I venture to express the hope that the Senate may insert the provision, and that it will be retained in conference.

Just a few words more, Mr. Chairman, and I will conclude. In the Fifty-eighth Congress, speaking on this subject, I said:

> Upon the internal development of this country on a large, grand, and sufficient scale depends in a great measure, if not entirely, its commercial welfare, prosperity, and supremacy. That development can not be wrought out except by the improvement of its rivers and harbors, because the problem of transportation lies at the very threshold of commerce, and no commerce can be successfully or profitably pursued without the fullest, freest, and cheapest methods of transportation.

And, again, further along in the course of my remarks:

> I am a firm believer, Mr. Chairman, in the necessity and efficiency of competition as a prime—indeed a necessary—factor in the attainment of the cheapest and most efficient service. My face is firmly set against every consolidation or combination which looks in any way toward the destruction, amalgamation, or swallowing up of any line or factor in the problem of transportation, the greatest, in my judgment, which now faces the industries and commerce of America.
>
> Even though I be mistaken in my prediction that these ports are necessary, absolutely and imperatively necessary, to the welfare, development, and upbuilding of the agriculture, commerce, and manufactures of the State—and I have not the slightest fear that I am mistaken—there can be no mistake in the statement that they are needed as competitors to other ports through which the commerce might move. But this is not all. No agency has been so potent or effective in the past in regulating and reducing rates on railroads as water competition. Wherever water has competed with rail lines, cheap rates and great commercial prosperity have unfailingly followed, and, if for no other reason, it is apparent that these waterways should be improved for the results that must accrue in the permanent reduction of freight rates by all routes.
>
> One more thought in this direction. All rail lines seek the sea, as commerce seeks the shortest and cheapest route, and wherever cheap, easy, convenient, and commodious ports are made available for the use of the commercial public, then to those ports old lines of transportation extend and build, and new lines reach out to them, until they have become the point of convergence of numerous arteries of commerce which penetrate all of the country which is tributary thereto and whose products can or ought to be transported through these gateways. From these ports, when developed, there will run into the interior new lines of carriers, until the whole country becomes one vast web and network of convenient lines which will, profitably to themselves as well as to the people, serve the commerce of all the country round.

I do not believe that I can better express my idea of the importance of the development of our waterways than by repeating that language. And I congratulate the committee, the Congress, and the nation upon the broad and liberal policy evidenced by this bill.

---

## The Power of Congress to Legislate on Child Labor.

SPEECH

OF

# HON. HERBERT PARSONS,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, March 2, 1907,*

On the sundry civil appropriation bill.

Mr. PARSONS said:

Mr. CHAIRMAN: The bill under consideration contains an appropriation for the investigation of the conditions of woman and child labor. I make use of this opportunity, therefore, to discuss the power of Congress to legislate in regard to the labor of women and children.

Earlier in this session the Congress passed a law providing that the Department of Commerce and Labor should investigate the industrial, social, moral, educational, and physical condition of woman and child workers throughout the country, and it is for this investigation that this bill appropriates $150,000. The bill for the investigation was opposed in this House by the chairman of the Committee on Appropriations, the gentleman from Minnesota [Mr. TAWNEY], and on his motion a resolution was passed calling upon the Committee on the Judiciary for a report on the power of the Congress to legislate in regard to the labor of women and children. This direction to the Committee on the Judiciary also necessarily related to bills prohibiting interstate transportation of the products of factories and mines using the labor of children under 14 years of age, one of which was introduced in the Senate by the Senator from Indiana [Mr. BEVERIDGE] and in this House by me.

The Committee on the Judiciary recently reported to the effect that Congress had no power to legislate in regard to the labor of women and children. I propose in these remarks to dispute the accuracy of that report. I shall not at this time argue the desirability of Federal legislation or whether some of the statements made in regard to the evils of child labor are exaggerated or not. The agitation throughout the country and the legislation or attempts at legislation in many of the States reveal an evil that needs correction, and convinces me that if Congress has the power to grapple with the evil, and so be the most efficient force to eradicate it, it will shortly exercise the power.

The report of the Committee on the Judiciary is, with all respect, a remarkable document. It quotes and cites the language used by the Federal courts in various cases. It does not, however, give the facts in a single case and it omits to call the attention of the House to several cases which point to a conclusion the very opposite of that reached by the committee. I have no doubt that should the Congress legislate in the matter the constitutionality of the legislation would some day be disputed and that in the opinions of the Federal courts mere expressions could be found to apparently substantiate the argument of unconstitutionality. This is true of every attack made on the constitutionality of legislation of the Congress in regard to interstate commerce. But it is the decisions, as interpreted by the opinions of the court, that make the law, and not mere words used by the courts.

To bring the matter clearly before the Committee, I here quote the first section of the bill introduced by Senator BEVERIDGE in the Senate and by myself in this House. It reads as follows:

> *Be it enacted, etc.*, That six months from and after the passage of this act no carrier of interstate commerce shall transport or accept for transportation the products of any factory or mine in which children under 14 years of age are employed or permitted to work, which products are offered to said interstate carrier by the firm, person, or corporation owning or operating said factory or mine, or any officer or agent or servant thereof, for transportation into any other State or Territory than the one in which said factory or mine is located.

Members will notice that the prohibition attaches only at the point when the products of such child labor enter interstate commerce. There is no direct attempt by the bill to regulate or affect factory or mine conditions within a State. The bill amounts to a prohibition of the transportation of their products in interstate commerce if the labor of children under 14 years of age has been used. The simple question, therefore, is, Has the Congress the power to prohibit from interstate commerce whatever it thinks should be prohibited?

Parenthetically let me say that this power under the interstate-commerce clause is not the only power that Congress can exercise in regard to the labor of children, nor is the method attempted the only way in which Congress can exercise its interstate-commerce power in this regard. It, of course, can exercise the police power in the District of Columbia and the Territories. It can also say that neither the Government of the United States nor the Government of the District of Columbia nor the government of any Territory shall purchase the product of any factory or mine in which children are employed. This would be rather far-reaching. The Congress could further deal with child labor in regard to all labor which was in the current of interstate commerce. In the recent case of Swift *v.* United States the Supreme Court, in holding the Sherman antitrust law applicable to a combination of dealers in fresh meats, decided that it was not necessary to prove that all the products were to go into interstate commerce, but that it was sufficient to show that the course of business was, to use the language of Mr. Justice Holmes, in "a current of commerce among the States," and that, as in the business many cattle were shipped into a State from out of that State and after dressing shipped out into

another State, the business was one in the current of interstate commerce.

There is much complaint of child labor in cotton mills. Under the foregoing decision it is not impossible that in every case where the cotton was shipped to the mill from outside the State—and a considerable portion of the product was sold outside the State—a law of Congress framed on the "current of commerce" theory could deal with child labor in a variety of cotton mills, as, for instance, in the cotton mills of Massachusetts and even in some of those in the South.

But this power is nothing like as effective as the power asked for in the bill the first paragraph of which I just quoted.

Can the Congress legislate to prohibit from interstate commerce products of factories and mines in which the labor of children under 14 years of age is used? The power of the Congress in this regard depends upon the interstate commerce clause in the Constitution, which reads: "To regulate commerce with foreign nations and among the several States and with the Indian tribes." The power to prohibit thus depends upon the power given by the words "to regulate." Does "regulation" include "prohibition?" Has the Supreme Court gone so far as to decide that? Upon what interpretation has the Congress itself acted?

In order to place the matter clearly before the committee I shall avoid the discussion of a long line of Federal cases. The answers to the foregoing questions are, however, that the Supreme Court has decided that the power of regulation includes the power of prohibition, and that Congress has repeatedly acted upon that interpretation of the power.

The Supreme Court decided it in the Lottery case, which is not cited by the report of the Committee on the Judiciary.

In that case the defendants were indicted for conspiring to ship lottery tickets by express from one State to another. The Federal statute provided punishment for such an act, thus, in effect, prohibiting the transportation of lottery tickets in interstate commerce. The court, after holding that the tickets were subjects of traffic, also held that Congress had "plenary power over such commerce and may prohibit the carriage of such tickets from State to State." (Lottery case, 188 U. S., 321.)

It has been said by the Supreme Court that the power to regulate interstate commerce is the same as the power to regulate foreign commerce, and that court has upheld prohibitions of importation of impure tea and counterfeit coin. Upon that power is based the prohibition in the Dingley tariff law against the importation of convict-made goods.

What has the Congress itself done? It passed the lottery act, heretofore mentioned. It passed the meat-inspection bill, which prohibits from interstate commerce meat which is not stamped "Inspected and passed." It may be that this legislation could be upheld on the principle that meat packing is in the "current of interstate commerce;" but the statute in the respect mentioned is not framed on that theory. In the pure-food law the Congress acted on the theory that the power to regulate included the power to prohibit. One section of that act prohibits from interstate commerce food that contains terra alba. Suppose that we paraphrased that section and let it read as applied to child labor, it would read thus: "That * * * any person who delivers for shipment from any State * * * to another State any confectionery if it *is the product of child labor* (contains terra alba)." Would it not be equally valid in law?

This House has passed a bill prohibiting convict-made goods from interstate commerce. The court of appeals of the State of New York held a State statute unconstitutional which forbade the sale of convict-made goods unless they were stamped "convict made," and based its decision, the case being one of goods shipped from Ohio to New York, on the ground that the statute as applicable to such a case was repugnant to the commerce clause of the Federal Constitution. The Ohio supreme court did the same. On the same principle those courts would, in a similar case, be compelled to hold unconstitutional a State statute that forbade the sale of goods made in another State by child labor. We can legislate as to child labor just as much as and no more than we can as to convict labor, and all that would be necessary in drawing the bill would be to copy verbatim the convict-made goods bill except to substitute the word "child" for the word "convict."

The Congress has acted on the same principle in the act to prohibit from interstate commerce any article designed to prevent conception, and the constitutionality of the act was sustained by the court for the northern district of California. In the act in regard to diseased cattle, insect pests, falsely stamped silver articles, nitroglycerin and explosive materials the Congress has placed upon the power to regulate a practical interpretation, which includes in such power the right to prohibit.

I admit that the power is far-reaching. I admit that under it there is almost nothing as to which Congress can not legislate. The power is greater even than the police power of the States. There let me suggest a limitation on the power of Congress to prohibit which may occur to the minds of some. It is sometimes said that although the power to regulate includes the power to prohibit, the Supreme Court will pass upon the question whether the prohibition in a particular case is a proper method of "regulating." Granted that that is so, what test will the Supreme Court apply? Some will say that some such limitation of the principle was set forth or intended or acted upon in the lottery case. Assuming that that was so, what, in effect, would be that principle? It would be merely this, that the power to regulate involved the power to prohibit to the extent that in intra-state legislation by State legislatures the police power permitted prohibition? If that is the limitation on the power to prohibit, then that limitation includes the case of child labor, for the regulation of child labor is a proper exercise of the police power of the States.

Let me therefore repeat that the Supreme Court has decided that the power to regulate includes the power to prohibit; that the Congress, and in particular this House, has repeatedly acted on this interpretation, and that the power to prohibit from interstate commerce the products of child labor is ample.

---

## River and Harbor Appropriation Bill.

### SPEECH

OF

# HON. JAMES A. HUGHES,

OF WEST VIRGINIA,

### IN THE HOUSE OF REPRESENTATIVES,

*Thursday, February 7, 1907,*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. HUGHES said:

Mr. CHAIRMAN AND GENTLEMEN OF THE COMMITTEE: I wish to offer the following amendment:

On page 74, line 9, insert the following, in accordance with the recommendation of the Chief of Engineers:

"For improving the Big Sandy River and its tributaries, $361,300, to be used for the following purposes: To complete each of the dams, No. 1, respectively, in the Levisa and Tug forks of the said river, $235,000; for a steel service bridge at Lock No. 1, in the Big Sandy River, $7,000; for an additional lock house at Lock No. 2, in the Big Sandy River, $1,800; for dredging plant, $17,500."

I feel that this amendment should be part of this bill and will try to give the committee at this time my reasons for same. The improvement of the Big Sandy River was begun more than twenty years ago and has progressed very slowly. Our appropriations in this improvement have been small and far between, but we have not raised any serious objections up to this time. We now feel that leaving us entirely out of the river and harbor bill is treating us unfairly, to say the least. In the main river, from Catlettsburg, Ky., which is located at the mouth of the Big Sandy River, to its fork, which is situate at Louisa, Ky., is a distance of 27 miles. There are now three dams completed.

We have in each fork of the river a lock completed. We have a lock in the Levisa Fork, which is located about 8 miles above Louisa, Ky., and we have another lock in the Tug Fork of the Big Sandy River, about 5 miles above Louisa, Ky.

As you will readily understand, a lock without a dam, if you will permit the expression, isn't worth a dam. The Chief of Engineers says, in his annual report, that an appropriation of $235,000 should be made for the completion of Lock and Dam No. 1 in the Tug Fork and No. 1 in the Levisa Fork of the Big Sandy River. His estimate says it will take $117,500 to complete each one of these locks and dams.

While the improvements made in the main river have been of a great deal of value to the people living along the Big Sandy, by giving them an outlet by water from Louisa to the Ohio River during the whole year, the improvements yet to be made are the most valuable ones to be considered. What I mean by this is, Dam No. 1, located in the Levisa Fork of the Big Sandy River, when it is completed, will put back water to the first coal fields of any value on this river, namely, the "Torchlight," "White House," and what is known as the "Warfield territory." The same conditions exist in reference to the other fork, the Tug Fork of the Big Sandy River. The completion of this lock will put us in like fields on this fork of the river.

Now, it would seem to me that on matters of this kind the appropriation should be made from a thorough business under-

standing of the situation. This being the case, if the business nature of my proposition were thoroughly understood—and I am endeavoring to make myself clear in that particular—I am firmly convinced that there would not be a solitary vote in this House against this amendment. If you will permit an illustration. If you were boring an oil well and you had gone down the greater part of the way, say, 1,600 feet, and at this distance you had every possible indication that 200 feet more would put you in "pay sand" and it would cost you very little additional to go down that extra 200 feet, would you, or any man with a good, keen appreciation of the business side of the situation, say, "We will stop this work here and not go any farther?" Now, this is exactly the position you are taking in this case. With the improvements that have been made on the Big Sandy River, we are just now striking the "pay sand." If you give us nothing more, give us what the engineer recommends, which is $361,300. With this little amount we could finish the two locks and dams already begun, one in the Tug Fork and the other in the Levisa Fork of the Big Sandy River, which are now only half finished. This will allow us to make the necessary improvements in Dam No. 1, at Catlettsburg, Ky., and will give us a sufficient amount for a dredge plant, and at a cost of $17,500; also $1,800 for a lock house at Lock No. 2. Now, this whole appropriation, which will do the Big Sandy and the people living along this stream so much good, will, if appropriated, cost the small and insignificant sum of $361,300.

Now, I have tried to make this plain to you, and sincerely hope that you will sustain this amendment in this bill, and that the chairman of this committee will ask that it be incorporated in the bill. Now, as to the other improvements in which I am interested, I am sorry that your honorable chairman did not feel that he could, in justice to all, make a larger appropriation for the Ohio River; but I know, however, there is to be a stopping place somewhere and, in his good judgment, I am sure he has done what he thought was fair and right, and distributed the amounts in this bill as well and as fairly as could have been done. Therefore I shall say no more on that. Feeling that I have taken up all of your time that I should, I shall kindly ask leave to print the balance of my remarks, as I have some statistics here which show the advantage in the improvement of waterways in other countries as well as our own.

Fiume, the chief port of Hungary, spent $18,000,000 in improving its harbor. Its trade increased from 325,000 tons in 1872 to 2,954,000 tons in 1898. This shows clearly the beneficial result of spending money as they do in Europe. Europe has left us far behind in the matter of improvements of waterways.

The Kaiser William Canal was built for deep-draft ships across the Danish Peninsula to save the distance of 425 miles. It cost $39,000,000 and has increased the trade of Germany's ports on the Baltic Sea—Stettin, Lubeck, and Konigsberg—by leaps and bounds, and is Germanizing Russia and Poland.

The Liverpool and Manchester Canal was built at a time when Manchester was threatened with grass on her sidewalks. The 45-mile haul, with the cost of reloading onto cars at Liverpool, was killing Manchester. Land was dear, but she built a ship canal 45 miles at the highest cost per mile on record, with the exception of the Panama Canal, which was $1,600,000 for each and every mile built. This was just ten times the amount for which American contractors offered to build a ship canal for Russia from the Black Sea to the Baltic Sea, which was $160,000 per mile.

Since 1871 France has spent $368,000,000 on her waterways and she is not quite the size of the Ohio Valley. She had a complete and costly system of canals when she started her heroic waterway measures, and nevertheless she has spent as much in thirty-five years, lacking $2,000,000, as the United States has spent in all for her rivers and harbors.

The Ohio River, crippled as it is, has a tonnage of that equal to the whole of the ocean tonnage of Russia, which is from twenty to thirty millions of tons annually. The United States is not only equal to France in size, but is a little larger and much richer in minerals and the efficiency of her capital and labor. France increased the length of the 6-foot stage in thirty-five years from 1,000 to 3,200 miles. Germany is a little larger than France, but a little less than the Ohio Valley in size, yet she built one canal 168 miles long, at $125,000 per mile, for the mere purpose of diverting the Rhine traffic, which goes through Holland at the Rhine's mouth from Holland, and to the new Port Emden, on the River Ems. Ems has done a great business, in addition to having a great growth, but Rotterdam, Holland, on the Rhine, has grown like Chicago.

The city of Hamburg has spent $75,000,000 to improve its harbors and channels on the River Elbe. Austria appropriated $50,000,000 June 11, 1901, to start a work which will cost $250,000,000, viz, to connect the Danube at a six-foot stage with the German rivers, which will be made one by a cross-country canal at a 6-foot stage.

Reverting again to the Ohio River, its shores are the greatest tonnage-producing territory in the world. Pittsburg has greater tonnage than New York, Boston, and Chicago combined, and while Europe is spending money this way and reaping such results as are shown it is the height of folly to leave our waterways unimproved. A policy adopted like that of France, Germany, and every other country in Europe except Turkey, would make the uninhabited wastes of the Big Sandy Valley a human hive of industry and thrift.

House Document 326 of the Fifty-sixth Congress, first session, page 13, says that Prof. C. N. Brown, geologist of the Ohio State University, was sent by the War Department engineers to examine the valley, and that he found 2¾ billion tons of coal, a quantity that would have supplied the then existing demands to the Great Lakes for two hundred years. Professor Brown gave it as his opinion that it would be safe to count on from 3 to 4 billions of tons, with the chances greatly in favor of a considerable excess over the larger figures.

This will be the source of the supply for the Pacific coal trade, which is to be, after the Panama Canal shall have been finished. The same report shows, on the page immediately following, that if there were no coal the improvement of this river after the plan which is now the universal policy of Europe would make the river a great hive of human industry in point of national assets. Iron, clay, glass, sand, salt, oil, Portland cement, lime, and fire brick in vast quantities immediately available are already in sight.

The valley of the Big Sandy is 4,500 miles, almost exactly equal in extent to the great State of Connecticut. This part of our national domain, equal in possibilities to that magnificent State, will remain comparatively valueless, owing to the peculiar topography, as shown on page 20 of House Document 235 of the Fifty-sixth Congress, second session, until the splendid work already begun can be completed in accordance with the plan outlined in Document No. 235, thereby deepening this magnificent river from its headwaters to its mouth, and the establishment of a 9-foot stage of water from Pittsburg to Cairo.

As to the value of a policy of liberal appropriations, I wish to call your attention to the results obtained from those European countries which have set the standard for the world and whose lead in this particular the United States will do well to follow. I wish to invite your attention particularly to the increase in the volume of trade in Germany from the improvement of her waterways.

Having looked at the force "behind and at the making of" the statistics of Germany, let us look at the statistics themselves: Germany in 1871 had forty-one million people, in 1900 fifty-six millions, an increase of from 197 to 270 per square mile. Emigration in 1853, 318 thousand, in five years ending 1901, average, twenty-three thousand. Tonnage of seagoing vessels increased, 1871 to 1903, 250 per cent; the proportion of steam tonnage to the total tonnage increased in the same years 2,000 per cent. Present excess of births over deaths, one million a year. Germany's percentage of deaths is lowest among nations, and falling. In 1895 the world's total export and import trade was eighteen billion dollars; of this Germany had ten per cent; in 1905 the figures were twenty-one billions, and Germany's share was twelve and one-half per cent. Berlin alone among the cities of the world, it is said, surpasses Chicago in the ratio of its increase, growing in thirty years from 750,000 to 2,000,000. Fifty of Germany's cities now are spreading like a prairie fire. In 1886 Germany bought from us twenty-five and a half millions of goods; in 1890 she bought from us 250 millions of goods, an increase in fourteen years of nearly 1,000 per cent. In five years ending in 1901 her postal revenues rose from sixty-eight to ninety-nine millions. In twenty-eight years ending in 1904 her production of pig iron rose from 2 to 10, her production of iron ore from 4¾ to 22; her production of coal from 38 to 121 million tons. When we were boys we used to sing about a "Little German Band." I will sing you a song now about a little German bank, one of ten representative interests reported by a commission to the German Government as being an index of Germany's growth since 1871. It is the Deutsche Bank, of Berlin, privately owned and managed. This bank grew in four periods ending with 1871, 1880, 1890, 1895, by these leaps and bounds: Capital 3¾, 13, 25, 50 millions of dollars. Business, three-fifths, two and a half, seven, thirteen billions of dollars. The Imperial or Reichsbank, of Berlin, did a business in the last year reported of forty-six billions of dollars.

Of capital invested abroad England with her enormous prestige, her financial plant established from of old, her world-wide correspondence had, in 1900, $10,000,000,000. Germany, start-

ing with her empty hands thirty years before 1900, had, in that same year, five billions. I will call your attention later to the deep strategy of some of that investment. A manifest destiny has seemed to guide it in its course. I will merely state at this time that of the five billions of Germany's foreign investment in 1900, two billions were invested in municipal bonds, ice plants, traction systems, and aid of local industrial enterprise in southwestern Russia. Two hundred millions are similarly invested in the unfederated Balkan States, which are to be federated to something some day, and one hundred and twenty millions are invested in Hungary. In Asia, Africa, and the Pacific islands Germany has preempted territory five times her own area, of which she may be expected to make in time what Americans have made of Alaska and Texas.

Germany hastes not and rests not; she will not knock a green apple from the bough which is sure to ripen and fall into her lap. Asia Minor is dotted with German plants manned by the graduates of her technical schools. A German-owned railroad runs down the valley of the Euphrates; a prophet who foreteils the future in terms of events is very likely to be made ridiculous by the course of events; a clergyman enjoys no immunity from this law, but it still remains true that no ambition, no prospect in the horoscope of our America, seems so likely to come to pass as that the Black Sea by the inevitable collapse of Turkey and Austria, the federation of the unfederated States of the Danube, and the disintegration of Russia in the west and southwest will be some day a fresh-water lake in the heart of an expanded Germany. And every American with humanity in his heart and a little history in his head since Uncle Sam has annexed about all of the earth he cares for will welcome such an expansion of the Fatherland, which will lift from the Levant the oriental blight.

---

## The Programme for the Interparliamentary Union for the Second Hague Conference.

SPEECH

OF

# HON. RICHARD BARTHOLDT,

OF MISSOURI,

IN THE HOUSE OF REPRESENTATIVES,

*Monday, March 4, 1907.*

Mr. BARTHODLT said:

Mr. SPEAKER: The Interparliamentary Union, as is now generally known, at its last two conferences held at Brussels in 1905 and at London in 1906, has considered and agreed upon a programme for the next great conference of nations to be held at The Hague in the summer of this year. The Congress of the United States, through its arbitration group, is a member of that great international organization of lawmakers, and American delegations composed exclusively of Members of this House have attended both the Brussels and the London conferences. For this and other reasons I deem it proper to inform the Members of this House and the American people of the nature of that programme, representing, as it does, the wishes, the hopes, the aspirations of the people of this and other countries as to what steps should be taken at the second Hague conference to secure the peace of the world on a more permanent basis.

At the London conference of the Interparliamentary Union, which completed the programme referred to, a resolution was passed calling upon the delegations from the eighteen several countries represented there to bring that programme to the attention of their respective governments, and, pursuant to this action, the American delegates instructed me, as their chairman, to prepare a report for submission to the President of the United States. This task I have endeavored to perform by personally presenting to President Roosevelt a report which, by unanimous consent, I shall insert in the RECORD. It is, as I believe, a full and comprehensive statement of the questions which the Interparliamentary Union expects the next Hague conference to consider. The report is as follows:

THE INTERPARLIAMENTARY UNION
FOR THE PROMOTION OF ARBITRATION,
*Washington, D. C., January 24, 1907.*

MY DEAR MR. PRESIDENT: On March 6, after you had called the second Hague conference, in compliance with your promise made to the Interparliamentary Union, our arbitration group held a meeting and authorized me to propose to the executive council of the Interparliamentary Union:

First. That the parliaments of Central and South America be specially invited to participate in the approaching conference of our union.

Second. That the union formulate a treaty of arbitration worthy of general acceptance, and acceptable both to the United States and to the great powers of Europe.

Third. The determination of the proper basis of representation in a permanent international congress.

I repaired to Brussels in May following and presented these three propositions to the executive council of our union. The result was:

First. The immediate issue of invitations to the Central and South American parliaments and the appearance of four Spanish-American nations at the 1905 conference of our union.

Second. The appointment of a committee, of which I was a member, to prepare and present to the conference to be held at Brussels on the 28th of the following July, a general treaty of arbitration.

Third. A request that I present to the conference in July a basis for a permanent international parliament.

I availed myself of every possible assistance during the short interval allowed me for this important work, and when the conference assembled, on the 28th of July at Brussels, I laid before it two documents, copies of which I take pleasure in attaching hereto. One of them was a proposed treaty of arbitration and the other was an outline of a permanent international congress.

Our brethren of the European parliaments were somewhat surprised at the first view of our propositions, but this was quite natural, because we in America are simply the Europeans who wish most to push forward. But it required only the three days of our session to crystallize the sentiment of the entire conference solidly in favor of the principles:

1. Of a permanent international congress, having power to convene *periodically and automatically*, to discuss such international questions as the current of events may make paramount.

2. Of granting jurisdiction to The Hague court in a clearly defined area, so that the court can become *an integral and self-acting* part of the world's judicial machinery.

Two commissions, composed of twelve of the most eminent parliamentarians of Europe, were appointed to consider the details, with instructions to report prior to the assembling of the second Hague conference.

It may interest you to recall the fact that the members of our union, upon leaving the Belgian parliament house, after taking this stand for securing a more permanent peace among all nations, were rejoiced by the good news that you had succeeded in reestablishing peace in Asia on that very day.

In the preparation of the general treaty of arbitration, which I submitted at Brussels, due consideration was given to the indisposition of the great powers of Europe to agree to the arbitration of all questions, and also to the best means of avoiding the rocks which wrecked the nine treaties negotiated by Secretary Hay, at your request, and which failed to become operative, though ratified almost unanimously by our Senate, on account of the provision requiring the signing of a subsequent agreement (treaty) for each particular question.

I suggested clear definition of the classes of controversies included in the treaty and automatic action in such cases by the Hague court. And to make unity of action possible between advanced and backward nations I proposed permitting each nation to designate the area in which it would submit its action to the court.

Before our union assembled for its fourteenth conference, at London, in July of the present year, both of these commissions had filed reports favorable to the main ideas contained in the propositions submitted at Brussels in 1905.

After full consideration of these reports, copies of which are hereto attached, the London conference adopted the reports, after having made some amendments to the report on treaty of arbitration, which made it more progressive than as reported by the commission.

The Commission had reported in favor of granting jurisdiction to the Hague court, in a large number (seventeen) classes of controversies, so that no further agreement or treaty need be concluded between the contending parties before cases of the designated kind can go to the Hague court for trial and final determination.

Upon motion of Hon. JOHN SHARP WILLIAMS, questions of debt were added to this list by unanimous consent of the executive council and of the conference in full session.

This commission appended to its proposed treaty of arbitration a suggestion that the signatory powers resort to mediation in all the questions reserved from the treaty prior to the commencement of hostilities. Upon motion of Hon. W. J. Bryan, amended by His Excellency von Plener, ex-secretary of the Austrian treasury, this recommendation was enlarged so as to call definitely

in all such cases for either mediation or an impartial investigation of disputed questions of fact, as the one or other method may be the more appropriate, prior to the commencement of hostilities. The clause thus enlarged was carried into the body of the proposed treaty by a unanimous vote of the conference in full session.

This idea was part of the treaty proposed by me at Brussels, and was regarded by the Europeans as too progressive until the matter was thoroughly discussed in the council and in the open conference in London.

You will see that these recommendations, taken together, constitute a complete and scientific proposition.

First. A permanent deliberative body is suggested in which all nations will be represented, to crystallize the best sentiment of the world into rules of international law.

Second. The treaty of arbitration is to empower The Hague court to say when these rules have been violated, *in a clearly defined area.*

Third. Controversies not falling within this area are to be reserved for trial by armed forces. But hostilities are not to commence until the good offices of friendly powers have been asked by the disputants in vain, or until disputed questions of fact have been examined in the light of evidence by an impartial international commission.

Having obtained such progressive action, I did not think it wise to press further for other ideas contained in the treaty I proposed. But I think it appropriate to call your attention to these:

First. That each nation might designate the questions it is willing to surrender up to the jurisdiction of The Hague court, and the treaty to become operative between it and all the other signatories, but only to the extent that others designate the same classes of questions as suitable for obligatory arbitration.

To illustrate: The small powers would designate all questions.

The great powers might designate many questions, some more than others. The treaty would become operative between some nations for all questions, without any right of appeal to arms after the decision of the court.

Between others it would become operative, say, for all the controversies included in the treaty as proposed by the commission and approved by the conference, i. e., in eighteen classes of contentions.

Between others in a still more limited area.

I suggested, also, that the clause requiring mediation or investigation prior to commencement of hostilities in all the questions reserved for forcible settlement might be stricken out by any country unwilling to go so far, thus letting the treaty in all its clauses but this one operate between such a country and all others ratifying it.

In this way the treaty could operate on each country up to the limit of its arbitration sentiment.

It seems to me you are in a position, with this two-edged sword, to cut the Gordian knot of the arbitration problem which has thus far defied statesmanship, even that of your lamented Secretary of State, John Hay.

Other resolutions of the conference were as follows:

Upon motion of Mr. Cremer, as amended by Baron d'Estournelles, the conference declared in favor of national commissions for consideration of the question of armaments, with a view to an international agreement to arrest or reduce them, and also for the placing of this question upon the programme of the approaching Hague conference.

On motion of Signor Brunialti (Italy) and of M. Louis Franck (Belgium), the conference adopted resolutions declaring for:

1. The definition of "Contraband of war" as being restricted to arms, explosives, and munitions of war.

2. Reasserting and confirming the principle that it is not proper to destroy either ships carrying contraband of war or goods on board such ships which are not contraband of war.

3. Universal consent to the inviolability of private property at sea in time of war.

Upon motion of M. Beernaert, ex-prime minister of Belgium, who is now a senator, it was requested that the employment of new types of instruments of war and the bombardment of undefended ports, towns, and villages should be placed upon the programme of the approaching Hague conference.

Upon motion of Dr. Albert Gobat, general secretary of our union (member of the Swiss Parliament), it was resolved that the forthcoming Hague conference should consider and more clearly define the rights and duties of neutrals in time of war.

Upon my own motion, it was unanimously declared that each group of our union should take steps immediately to secure from their government an annual appropriation in aid of the work of the interparliamentary union and of the general movement for the substitution of arbitration for force in international affairs.

You will observe that these far-reaching recommendations divide themselves into two classes:

First. Those that can be effectuated only by general consent of the powers.

Second. Those that any one nation can effectuate by its own individual action.

I will address a separate note to you in regard to the second class, confining myself here to action that should be taken in concert with other powers, either at or after the forthcoming conference at The Hague.

By securing the indorsement of the foregoing progressive ideas by this union, composed of over 2,000 members of national legislative bodies, the arbitration group of our Congress has opened the door for some Chief Executive to take the lead in effectuating these things which are indispensable to the peace, prosperity, and further progress not only of our country but of all nations. The conditions which now confront us seem to make this work appertain more directly to you than to any other Chief Executive.

The forthcoming conference at The Hague was called upon your initiative, and this action was based upon the resolution of our union adopted at its first American session, upon motion of American members of our body. This second conference at The Hague will be participated in by all American nations, and this fact is due to American initiative.

We are therefore upon the eve of what may be correctly called the "American conference at The Hague," and we will not disappoint the world by failing to make that conference produce results proportionate to the possibilities of this hour and to the rightful place of the United States in the politics of the world.

Nothing impractical has been proposed, but simply the attempting of all that is now possible. The hour has struck for realizing these things, and the prestige that you obtained throughout the world by your successful intervention in the war between Russia and Japan and by other acts in bringing The Hague court into operation points to you as the Chief Executive who should lead in espousing ideas which have already found advocates among the most eminent jurists and legislators of every advanced nation.

Happily the political conditions of our country insure your receiving the support of the leaders of all political parties.

The party to which you belong declared for arbitration at its last national convention. The elected leader of the Democratic party in the House is a member of our union, and both he and the acknowledged leader of the Democratic party in the country participated in the recent conference at London. Both of them contributed valuable ideas, which were adopted by the conference, and exerted their influence in causing our union to declare for this progressive platform. Shortly after bringing forward this proposition I declared that it was one upon which good people in every country and of every shade of political opinion could stand together, regardless of the forms of the country's constitution and of the national policies with which their party may be associated. Events have justified my hopes, but in no country more conspicuously than in our own.

Assured that you will be led to do all that is wise and right at this critical moment, I tender you my services to aid in all possible ways, and beg to remain,

Very sincerely, yours,

RICHARD BARTHOLDT,
*President of the American Group.*

THEODORE ROOSEVELT,
*President of the United States.*

Mr. Speaker, it will no doubt be a source of supreme satisfaction to the Members of the House to note from this report that the two main propositions to be submitted to The Hague conference by the Interparliamentary Union are of American origin, and this, I hope, will be an additional reason why they should receive the support of the delegates which, by appointment of President Roosevelt, will represent the United States at The Hague. [Applause.]

In order that the report may be complete, I insert in the RECORD a copy of the resolutions adopted at London. They are as follows:

EXHIBIT B.

Resolutions adopted by the fourteenth interparliamentary conference.

1. That it would be advantageous to give The Hague conferences a more permanent influence in the work of pacification, and that the powers should agree in establishing the periodical meeting of these conferences; that the powers, when appointing their representatives to the second Hague conference, could usefully include in their instructions the duty of endeavoring to find the means of constituting a permanent consultative council intrusted with codifying and developing the law of nations.

2. If a difference should arise between the contracting parties which by the terms of the convention need not be submitted to arbitration, the parties shall not have recourse to any measure of hostility, of whatever nature, before having jointly or separately demanded, according to the circumstances of the case, either the constitution of an international commission of inquiry or the mediation of one or more friendly powers. This requisition shall be made, in case of need, conformably to Article VIII of The Hague convention for the peaceful settlement of international conflicts.

3. The Interparliamentary Conference, considering that the increase of naval and military expenditure, which weighs so heavily upon the world, is universally recognized as intolerable, expresses the wish that the question of the limitation of armaments should form part of the programme of the next Hague conference. The conference decides further that each group of the Interparliamentary Union should, without further delay, bring this resolution before the Government of its own country and press in its own parliament for the appointment of commissions for the study of the question of armaments, with a view to an international agreement to reduce or arrest them, so that the question of the limitation of armaments shall be made the subject of the national study necessary to secure the success of the international discussion.

4. (1) By treaty define contraband of war as being restricted to arms, munitions of war, and explosives.

(2) Reassert and confirm the principle that neither the ship carrying contraband of war, nor other goods on board such ship, not being contraband of war, may be destroyed.

(3) Affirm that even between belligerents private property should be immune at sea as it is on land.

5. It is desirable that the second Hague conference consider the propriety of prohibiting the use of new types of rifles, guns, and marine engines of war; also the bombardment of undefended ports, towns, and villages.

6. The second Hague conference should consider carefully, and if possible clearly define, the rights and duties of neutrals, so that these rights and duties may be clearly understood among all civilized countries.

7. It is earnestly requested that various groups of the Interparliamentary Union should take steps at the earliest possible moment to secure an annual appropriation by their respective Governments in aid of the work which is being done by the Union and in general furtherance of the movement for the substitution of law for war in international affairs.

## Post-Office Appropriation Bill.

### REMARKS

OF

# HON. HALVOR STEENERSON,

OF MINNESOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 19, 1907,*

On the bill (H. R. 25483) making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1908, and for other purposes.

Mr. STEENERSON said:

Mr. CHAIRMAN: In my speech on the post-office appropriation bill yesterday I was cut short by the lapse of the time allotted me from discussing as fully as I had intended the question of the proposed new divisor to be used in determining the average daily weight of mail carried by railroads and the position taken by the minority report signed by the gentleman from Iowa [Mr. HEDGE].

The provision in the bill on the subject is as follows:

That hereafter the average weight *per day* be ascertained in every case by an actual weighing of the mails for such number of successive days, not less than *one hundred and five*, at such times and not less frequently than once in every four years, and the result to be stated and verified in such form and manner as the Postmaster-General may direct. (Lines 16 to 22 of the bill.)

The present law is as follows:

The average weight to be ascertained in every case by the actual weighing of the mails for such a number of successive working days, not less than ninety, at such times, and not less frequently than once in every four years, and the result to be stated and verified in such form and manner as the Postmaster-General may direct. (Rev. Stat. 4002.)

I have underscored the words in the new provision which are not in the present law.

It will be observed that the new provision requires the weighing to be done on "successive days" instead of "working days," not less than one hundred and five, and that it is to ascertain the weight per day and not daily weight. Webster defines working day as "a day when work may be legally done, in distinction from Sundays and legal holidays."

The provision in the bill does not propose two divisors—one of seven for the routes that carry mail seven days a week and one of six for the routes that carry mail six days in the week, or to put it in three months' weighing periods, 105 and 90, respectively, which would be equivalent to 365 and 313 for a whole year, but it proposes a new divisor to be used in computing average weight per day on all routes, to wit, 105.

That this new provision is misunderstood by the minority report signed by the gentleman from Iowa, Mr. HEDGE, will be seen by the following extract from his report:

A brief statement of the history of this arrangement is useful: The existing scale of payment to railroads for carrying the mails was originally, in 1873, enacted strictly for a six-day service. If a railroad company, because requested by the Department, is willing to render the service in seven days, what reason does this furnish for actually reducing its compensation? Such companies might, it seems, very properly demand additional pay for Sunday service, but up to this time have not done so. They have accepted the scale of payments established in the original law without demanding an increase because of the increased service they perform. To protect them from being required, through the phrase "average daily weight," to accept one-seventh less than the six-day roads, the words "working days" were incorporated into the original law; that is, the Sunday mails are counted in the Monday weights, and as if carried on Monday.

The Department seems never to have found any intricacy or difficulty in administering the law as it stands, and no substantial result can be conceived to follow the adoption of the change other than an arbitrary reduction of 14 per cent affecting railroads performing the greatest service for the Government, and those only.

The only question to be determined is, "Is the Sunday service worth this addition to the average of the pay for the six working days?"

There is no element of sharp practice or immorality in it. It is a mere question of value received.

As an illustration of what may be properly regarded as compensation for Sunday service, the case is often referred to of western railroads, where a six-day service between Chicago and Omaha was being performed. The Department asked them to add a Sunday train, and to induce this offered an extra payment of $500 per Sunday, or at the rate of $1 per train mile. This offer was accepted, and this bonus of $500 per day for a Sunday service was paid for years.

If the recommendation of the majority is approved and enforced, the strange result will follow that the roads carrying a certain quantity of mail for the six working days (and delaying Saturday's mail until Monday) will receive a larger compensation for it, not relatively or comparatively larger, but a larger actual compensation in dollars and cents than the roads which carry the same quantity on seven days of the week (and not delaying Saturday's mail). To illustrate, or, rather, to demonstrate, take two lines each carrying 365 tons in a year. One runs six days in a week, or three hundred and thirteen days in a year. The other runs seven days in a week, or three hundred and sixty-five days in a year.

| | |
|---|---|
| 365 tons, 730,000 pounds ÷ 313 = 2,332 pounds per day, for (legal rate) | $132.52 |
| 365 tons, 730,000 pounds ÷ 365 = 2,000 pounds per day, for (legal rate) | 128.30 |
| | 4.22 |

The road performing Sunday service receives $4.22 per mile less than the road resting on Sunday.

Take the case of a line 500 miles long. A line that runs six days in the week would render 313,000 miles of service and receive $132.50 × 500 = $66,260 per year. The line that runs seven days in the week would render 365,000 miles of service and receive $128.30 × 500 = $64,150, or $66,260 — $64,150 = $2,110 per year less than the line that runs six times a week.

In other words, if this railroad should abandon its Sunday service, though Saturday mail would be delayed twenty-four hours, it would receive more dollars than if it maintained that service. Is it the object of the majority to provide fair pay for a great service or to punish the Sabbath-breaking incident to that service?

I call attention to these words in the report:

No substantial result can be considered to follow the adoption of the change other than an arbitrary reduction of 14 per cent affecting railroads performing the greatest service for the Government, and those only.

Is Sunday service worth this additional to the average of the pay for the six working days?

It is clear from the above that the minority think that a higher amount is now paid for the same weight carried in a year on a seven day a week route than a six day a week route. This is clearly an error, which is proven by the computation above quoted, for in that computation they show that on the Sunday route 2,000 pounds per day was carried and 2,332 pounds per working day on the other.

The difference in weight is found because two divisors are used; in the first case one equivalent to three hundred and sixty-five days in the year; the other to three hundred and thirteen. But under the present law the Department computes by one divisor, equivalent to three hundred and thirteen, and then the daily average on both routes will be the same.

This is just and equal because the total amount of tonnage moved in the whole year on both routes is the same and the distance is the same. The amount of transportation is exactly the same for the year on both routes. The only difference is that on one 365 loads of 2,000 pounds each was delivered, and on the other 313 loads of 2,332 each; total the same in each case, 730,000 pounds, or 365 tons, moved the same distance. Inasmuch as the six-day route got the same amount of transportation, with as frequent dispatch as the Government and the people served desired, it is just that the pay should be the same. The error lies in supposing that the Government now uses two different divisors in determining the average daily weight on the two classes of routes. The law requires one, equivalent to the number of working days in the year—313—and the Government uses only one. The proposed new provision in the bill only requires one divisor, equivalent to all the days in the year—365.

That is the only difference in the law as it is and the law

proposed. The effect of the present law is to pay the same rate per pound for the same volume of mail the same distance of route upon six-day-a-week and seven-day-a-week routes, and the effect of the proposed law is the same, only it reduces the daily average by one-seventh. The weight per day under the new provision would be diminished one-seventh upon all routes, and consequently the compensation would be reduced to correspond, but the relative compensation on the different routes would not be changed. It seems to me, therefore, that a great deal of time has been wasted over this proposition, for its only object is by indirection to accomplish a reduction of compensation on all mail routes, which can much better be made by a straight percentage reduction. [Applause.]

## The Japanese School Question.

### SPEECH

OF

### HON. GEORGE G. GILBERT,

OF KENTUCKY,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 12, 1907.*

On the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes.

Mr. GILBERT said:

Mr. CHAIRMAN: On November 26, 1906, President Roosevelt sent a special message to Congress in relation to the refusal of the city authorities of San Francisco to permit Japanese children to attend the schools with the white children in that city. The President in the course of this message makes use of this language:

> I authorized and directed Secretary Metcalf to state that if there was failure to protect persons and property, then the entire power of the Federal Government, within the limits of the Constitution, would be used promptly and vigorously to enforce the preservance of our treaty, the supreme law of the land, which treaty guaranteed to Japanese residents everywhere in the Union full and perfect protection for their persons and property; and to this end everything in my power would be done, and all the forces of the United States, both civil and military, which I could lawfully employ would be employed.

The President seems to proceed upon the idea that if there was a treaty between the United States and Japan which authorized and permitted the Japanese children to attend the same schools side by side with the white children, therefore the treaty must be obeyed by the authorities of the State of California, and that the treaty, ipso facto, is the supreme law of the land. With the permission of the House for a few minutes, I want to animadvert upon the correctness of this legal proposition.

By article 10, section 1662, of the Political Code of California it is provided in the school laws of that State as follows:

> Trustees shall have the power to exclude children of filthy or vicious habits, or children suffering from contagious or infectious diseases, and also to establish separate schools for Indian children and for children of Mongolian or Chinese descent. When such separate schools are established, Indian, Chinese, or Mongolian children must not be admitted into any other schools, etc.

I have very great admiration for the present occupant of the White House, and I am perfectly willing, without any hesitation, to accord to him the best of motives in seeking the enforcement of our treaty relations with Japan. But it is not true that the provisions of a treaty are the supreme law of the land unless the provisions of the treaty are confined to such subjects as may be regulated and controlled by treaty, and not then unless the treaty conforms, or at least does not conflict, with other provisions of the Constitution of the United States. It seems to me to be perfectly absurd to say that the President and two-thirds of the Senate can by treaty make valid some act which is prohibited by the Constitution to be exercised by the Government of the United States in any and all of its departments. Every law writer and every decision of every court has concurred in the statement that the Government of the United States is one of delegated powers. The functions of the United States Government are restricted to the exercise of certain duties, and that limitation extends to the President, and to the Senate, and to the House of Representatives, and to the courts, and to every official and department of the Government. Why does it need any argument to show that the President and two-thirds of the Senate can not do what the President and all of the Senators and all of the Members of the House of Representatives can not do? We are willing to admit that the power to make a treaty is delegated to the President, by and with the advice and consent of the Senate, and that it is expressly prohibited to the States. (Constitution of the United States, Art. I, sec. 10.)

The power is not only prohibited to the States and delegated to the President and Senate, but there is no part of the Constitution which expressly divides the power with any other department or officer of the Federal Government. And still we insist that treaties are not treaties at all in the constitutional sense unless made under the authority of the United States, and this is the full title of the treaty-making power. We go further and acknowledge that the power to make treaties is lodged exclusively in the President and the Senate and that the States have surrendered every vestige of the power to make treaties. And still it remains true that the agency through which the national faith is bound must be authorized to bind it. The power to make some contracts may be exclusive and absolute, but the question still remains, What contracts may be made? When, therefore, it is asserted that the President and Senate alone have authority to make treaties it does not follow that it may by treaty do anything which is a possible subject of contract. It seems therefore beyond question that the treaty is invalid which destroys the Constitution of the nation or the rights of its people thereby secured. A treaty can not violate the Constitution of the United States. Somebody will argue that a foreign nation looks to the United States as a unit, as one nation, and in negotiating a treaty with our Government a foreign power is not required to study our Constitution and to look into the limitations upon the different departments of our Government—that is, between this country and foreign nations.

The foreign nations look at our one flag as one Government and has nothing to do with the forty-five States and the limitations upon the authority existing as between the National Government and the forty-five States. But to this contention there are several sufficient answers. It will not be seriously argued that the President alone can make a treaty with a foreign nation. The treaty to be binding upon this country must at least be made not only by the President, but must be indorsed and approved by and with the advice and consent of two-thirds of the Senate present. So that it is necessary that the foreign nation shall look into the provisions of our Constitution to see whether the treaty has been made by the properly constituted authorities established by our Government to make the treaty. The foreign nation must look to see not only that the treaty has been signed by the President, but that it has been ratified by two-thirds of the Senate present; and that foreign power must not only look into our Constitution, but is required to look into the Journal of the Senate to see how many Senators were present. And being thus required to look into our Constitution and our methods of proceeding for the creation or making of a treaty, it must look further to see whether the Government itself can bind the people of this country by the provisions of the treaty. The Constitution, for example, provides that the legislative powers herein granted shall be vested in the Congress of the United States, which shall consist of the Senate and House of Representatives.

Suppose a treaty should be made with Japan by which the President and the Senate should undertake to exercise legislative powers for the Japanese who saw proper to become residents of this country. Would the provisions of such a treaty deprive Congress of the power of legislation for the Japanese who might reside here? The Constitution provides that Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense, etc. Suppose the President and the Senate should undertake by treaty to collect taxes, lay imposts and excises upon goods imported from Japan. Would the provisions of such a treaty deprive Congress of these duties imposed upon the House and Senate by the Constitution? The Constitution provides that all bills for raising revenue shall originate in the House of Representatives. Suppose the President and the Senate should, by treaty, undertake to usurp this important function in so far as the citizens of some foreign country were concerned. This question need not be pursued any further upon this particular line. The schools of California are created by the laws of that State and are supported by taxation collected from the people of that State. The State of California is under no obligation whatever to the General Government to have any system of common schools at all. The State of California derives not one dollar from the Treasury of the United States to support her school system, and, like every other State in the Union, she exercises the right and authority to control her schools in any way she sees proper. The State of California has a perfect right to prescribe the ages and other conditions and limitations in whatever manner she sees proper.

There is nothing in our political history and certainly nothing in the history of our jurisprudence to intimate that the treaty-making power of the General Government can invade the reserved rights of the States. And if such a treaty should ever

hereafter be formulated which undertakes to invade the vested or reserved rights of the States, certainly the treaty would not be made under the authority of the United States and would have no legal force.

Perhaps the most important decision ever announced by the Supreme Court of the United States was announced by Mr. Justice Miller in what is known as the Slaughterhouse cases. The great controversy between the five judges who concurred in the opinion of the court in that case and the four judges who dissented was over the construction of the first clause of the fourteenth amendment to the Constitution. That first clause reads as follows:

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the State wherein they reside.

The majority of the court in construing that clause reached the conclusion that persons may be citizens of the United States without regard to their citizenship of a particular State, and that the main purpose of that clause in the fourteenth amendment was to establish the citizenship of the negro, and that the distinction between citizenship of the United States and citizenship of a State is clearly recognized and established. The conclusion of the court was that that clause of the fourteenth amendment was for the purpose of protecting the privileges and immunities of the citizen of the United States and did not cover and was not intended to protect the privileges and immunities of the citizen of a State, leaving to the State the exercise of the same general police powers and the same absolute control of its local reserve rights as had existed before the adoption of this fourteenth amendment. And Mr. Justice Miller enumerated some of the privileges and immunities which appertain to the citizens of the United States and which do not appertain to a citizen of a State, and makes use of this significant sentence:

The right to peaceably assemble and petition for redress of grievances, the privilege of the writ of habeas corpus, are rights of the citizen guaranteed by the Federal Constitution. The right to use the navigable waters of the United States, however they may penetrate the territory of the several States; all rights secured to our citizens by treaties with foreign nations, are dependent upon citizenship of the United States and not citizenship of a State.

Here is an express authority that the only privileges and immunities that can be secured under a treaty are the privileges and immunities of a citizen of the United States, and that the privileges and immunities which are secured to a citizen of a State by the constitution and laws of a State are outside of the domain of the treaty-making power and are not protected by any of the provisions of the treaty. The primary trust of all governments is the welfare of the people for which they are created; the interference of a foreign will in internal affairs must be secondary and subordinate. This is modern international law, and must be that upon which a republic will insist. In its nature, therefore, an executive treaty ought not to form or modify municipal law for any people, and can not under our Constitution. A treaty can not disjoin or disturb the equipoise of power fixed by the Constitution. It can not be the mainspring of authority nor derange the constitutional distribution of powers. No treaty can bind the United States to do what Congress alone can do under the Constitution, and certainly no treaty can bind the United States to do what neither Congress nor any other functionary, nor all the functionaries, of the Government can do. Mr. Justice Story, in his work on the Constitution, volume 2, section 1836, has this to say:

This Constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made or which shall be made under the authority of the United States shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the constitution or laws of any State to the contrary notwithstanding.

Commenting on this provision of the Constitution Judge Story says: "It will be observed that the supremacy of the laws is attached to those treaties only which are made in pursuance of the Constitution," a caution very proper in itself, and in fact the limitation would have arisen by irresistible implication if it had not been expressed. A treaty may supersede a prior act of Congress, and an act of Congress may supersede a prior treaty, citing Taylor *v.* Morton (2 Curtis, 454); Robs *v.* Church (8 Blatch., 304). This supremacy of a treaty is of such treaties only as are made or caused to be made under the authority of the United States—that is, under the authority delegated to the United States by the Constitution. (See Tucker on the Constitution, vol. 1, p. 376.) And Judge Tucker in volume 2, section 354, puts this pertinent question: "Can a treaty by compact with a foreign nation bind all of the departments of our own Government to do certain matters which are fully confided by the Constitution to some particular department?" If all of these matters are intrusted to Congress by the Constitution, and yet if the treaty-making power is unlimited all these matters may be taken out of the hands of Congress and all the powers of the Government absorbed and usurped by the treaty-making power. Jay's treaty was negotiated during the Administration of President Washington, in which there were general stipulations as to commerce, duties, etc., upon British vessels.

It was then contended that this treaty was complete without any consent of the House of Representatives, and even General Washington refused to communicate to Congress the negotiations leading up to the treaty, and Congress was called upon to vote certain appropriations to carry this treaty into effect; and Congress did this, but still, in order to avoid such a vote being regarded as a precedent thereafter, a resolution was adopted by a vote of 63 to 36 that while the House of Representatives did not arrogate to itself any agency in the negotiation of treaties, still when any treaty contained stipulations which required the voting of money, that, notwithstanding the treaty, the House of Representatives reserved to itself the right and the duty to deliberate and determine for itself whether the treaty shall be effected or not, at least in so far as voting the supplies called for by the treaty. Suppose a treaty contain a stipulation calling for the appropriation of public money. Does the stipulation of the treaty dispense with the necessity of observing that provision of the Constitution that all bills for raising revenue shall originate in the House of Representatives? So in the treaty of 1815 it contained stipulations as to certain duties on articles imported from Great Britain, and President Madison sent the treaty to Congress with a message requesting certain needed legislation. Surely nobody will argue that Congress was bound to vote the stipulations called for, and certainly no lawyer will argue that Congress could do nothing but carry into effect the provisions of the treaty. It was in this debate that Mr. Calhoun took the position announced by the distinguished gentleman from Vermont [Mr. FOSTER] the other day.

Take that provision of the Constitution that Congress is directed to make all laws necessary and proper to carry into effect the provisions of the Constitution. Power therefore is given to Congress to carry into effect the treaty. Can it be argued that Congress must sit, without any will of its own, merely to execute the will of the treaty-making power? In Wheaton's Elements of International Law, page 329, we find this language:

The treaty when thus ratified is obligatory upon the contracting States independently of the auxiliary legislative measures which may be necessary on the part of either in order to carry it into effect. Where, indeed, such auxiliary legislation becomes necessary in consequence of some limitation upon the treaty-making power expressed in the fundamental laws of the State or necessarily implied from the distribution of its constitutional powers, such, for example, as a prohibition against the alienation of the national domain, within which the treaty may be considered as imperfect in its obligation until the national assent has been given in the forms required by the municipal constitution.

So we find another extract in the works of Judge Story, who was never regarded as a States-rights advocate, reading as follows:

The power given by the Constitution can not be construed to authorize the destruction of other powers given in the same instrument. It must be construed therefore in subordination to it, and can not supersede or interfere with any other of its fundamental provisions. Each is equally obligatory and of paramount authority within its scope, and no one impresses a right to annihilate any other. A treaty to change the organization of the Government or to deprive it of its constitutional powers would be void, because it would destroy what it was designed merely to fulfill, the law of the people. (Story's Commentaries on the Constitution, vol. 3, sec. 1502. Also, First Tucker's Blackstone, App., 332, 333.)

Mr. Justice Marshall, speaking of treaties and the treaty-making power, in the case of Foster *v.* Neilson (2 Peters, 314), says this:

In the United States the Constitution declares the treaty to be the law of the land. It is consequently to be regarded in courts of justice as equivalent to an act of the legislature whenever it operates of itself without any legislative provision. But when the terms of the stipulation import a contract, when either of the parties engages to perform a particular act, the treaty addresses itself to the political and not to the judicial department, and the legislature must execute the contract before it can become a rule for the court.

It has been repeatedly decided that an act of Congress passed subsequent to a treaty and in conflict with the provisions of the treaty operates to suspend the treaty and to abrogate its provisions wherever they conflict. It would be strange, indeed, to argue that an act of Congress can abrogate the provisions of a treaty because in conflict with the treaty and that the treaty must stand although in conflict with the provisions of the Constitution. The result would be to make a statute of greater significance in our jurisprudence than the Constitution. So in the case of Turner *v.* The American Baptist Union (5 McLean's Repts.), Mr. Justice McLean said, in speaking of the binding force of a treaty:

It is not operative in the sense of the Constitution, as money can not be appropriated by the treaty-making power. This results from the limitations of our Government. An action of no department of the Government can be regarded as a law until it shall have all the sanctions required by the Constitution to make it such.

As well might it be contended that an ordinary act of Congress without the approval of the President was a law as to argue that a treaty which engages to pay a sum of money is in itself a law until Congress has provided for raising the money, and in such a case the representatives of the people and the States exercise their own judgment in granting or withholding the money. They act upon their own responsibility and not upon the responsibility of the treaty-making power. Observe that the Constitution provides that treaties made "under the authority of the United States" are the supreme law of the land. They are not the supreme law of the land if made under the authority alone of the President and the Senate. They must be made under the authority of the United States. They must be made within the scope of the delegated powers conferred upon the Government of the United States by the Constitution.

Recently a valuable law book has been published entitled "Treaty-making Power of the United States," by Hon. Charles H. Butler. In volume 2, section 425, the author says:

> In the case of Geofroy *v.* Riggs, already referred to, the Supreme Court, speaking through Mr. Justice Field, declared that the treaty-making power of the United States extended to all subjects of negotiation between the Government thereof and the governments of other nations; that the power as expressed in the Constitution is in terms unlimited, except by those restraints which are found in that instrument against the action of the Government or of its departments and from those arising from the nature of the Government itself and that of the States; but that it would not be contended that it exended so far as to authorize what the Constitution forbids, or a change in the character of the Government of the United States or of one of the States, etc. (See Geofroy *v.* Riggs, 133 U. S., 258.)

Mr. Spier, in his book on Extradition, has this to say:

> A second remark is that whether the extradition of a citizen under the stipulated authority of a treaty is or is not consistent with State bills of rights is not a material question, since the Constitution makes all treaties of the United States part of the supreme law of the land, and as such superior to any State constitution or State law. It gives to the President the treaty-making power, and if he makes extradition treaties with the advice and consent of the Senate, and if such treaties are not repugnant to the Constitution it is then and there a part of this supreme law. (Spier's Law of Extradition, pp. 38 and 39.)

Certainly the Constitution does not confer upon the President and the Senate alone the power to legislate, and this point was emphasized by the Supreme Court in 1845, in the case of Pollard's Lessees *v.* Hagan (3 How., 212), where we find this language:

> Every nation acquiring territory by treaty or otherwise must hold it subject to the constitution and laws of its own government and not according to those of the government ceding it.

A case very similar to the Japanese school question in California arose in the case of Soon Hing *v.* Crowley (113 U. S., 703). In this case a municipal ordinance in regard to laundries was under consideration, and it was announced by the Supreme Court that the ordinance prohibiting washing and ironing in public laundries or wash houses within certain defined territorial limits from 10 o'clock at night to 6 in the morning is a police regulation under the control of the city, and that even if there was a treaty between the United States and China in conflict with this municipal ordinance the ordinance remained in full force, notwithstanding the treaty; that the States never surrendered their police powers to the General Government, and consequently no treaty between the General Government and a foreign power can militate against the fullest exercise of the police power upon the part of the State.

So in the case of Cutler *v.* Dibble (21 Howard, 366). The legislature of New York passed an act respecting the intrusions on Indian lands, and the point was made that this act of the legislature was in violation of the treaty between the United States and the Seneca Indians. But the court sustained the statute, and held that the State of New York had the power of a sovereign over these Indians and their property so far as it was necessary to preserve the peace of the Commonwealth and protect these helpless bands of Indians from imposition and intrusion, and the court further stated that the power of a State to make such regulations to preserve the peace of the community is absolute and was never surrendered to the General Government, and consequently could not be controlled by any treaty.

The famous case of Cantini *v.* Tillman (54 Fed. Rep., 969) is eminently in point. In this case certain Italian complainants asserted that they were protected by treaty stipulations between Italy and the United States. This treaty stipulated that the citizens of each of the high contracting parties shall have liberty to travel in the States and Territories of the other, to hire and occupy houses and warehouses, to employ agents of their choice, and generally to do anything incident to or necessary to trade upon the same terms as the natives of the country, submitting themselves to the laws there established, etc. And the citizens of each of the high contracting parties shall receive in the States and Territories of the other the most constant protection and security for their persons and property, and shall enjoy in this respect the same rights and privileges as are or shall be granted to the natives, etc. The court proceeded, in construing this treaty, to hold that the provisions of the treaty gave to the complainant the same rights as citizens of the United States, and said it would be absurd to say that they had greater rights. The court uses this language:

> We have seen that the right to sell intoxicating liquors is not a right inherent in the citizens and is not one of the privileges of American citizenship; that it is not within the protection of the fourteenth amendment; that it is within the police power. The police power is a right reserved by the States and has not been delegated to the General Government. In its lawful exercise the States are absolutely sovereign. Such exercise can not be affected by any treaty stipulations.

A multitude of cases can be cited in support of this contention, and it only remains to show that the State of California does not derive its right to maintain a common school system from the General Government, and surrendered none of its control of that question to the General Government. The State of California has the same right to determine for itself the rules and regulations for the conduct of its schools as it has to determine any other question in the multitude of reserved rights of the States. No court has ever decided that the General Government, either by an act of Congress or by the exercise of the treaty-making power, can invade the common school system of the States, the impulsive declaration of the President about sending the Army and Navy to protect the Japanese to the contrary notwithstanding.

In the case of Roberts *v.* The City of Boston (5 Cushing, Mass., 198) it appeared that the plaintiff was denied admission to the primary school for white children and she, by her next friend, claimed damages for exclusion. But the supreme court of that State, in an opinion by one of the greatest of all of America's great lawyers, Chief Justice Shaw, held that the law vested power in the committee to regulate the system of distribution and classification of the pupils and that when the power was reasonably exercised their decision must be conclusive. The court held that the separation of the colored children from the white children was founded on just principles of reason and experience and was the result of an honest discriminating judgment.

So in the case of State *v.* Duffy (7 Nevada, 342) it was held that age and sex have always been marks of classification in public schools throughout the history of our country, and that the trustees of the public schools of Nevada might send colored children to one school and white children to another, or they might make any such classification as they should deem best, whether based on age, or sex, or race, or any other reasonable existing condition.

School privileges in California and in every other State are conferred by the statutes of the State and are subject to such regulations as the legislature of the State may prescribe or authorize. The supreme court of New York decided that the legislature of the State may make from time to time such limitations and alterations in these particulars as they may see fit. (Dallas *v.* Fosdick, 40 Howard (N. Y.), 249.)

The public school system of New York seems to be conducted very much after the fashion adopted in San Francisco. It is regulated by official boards created for that purpose, and it is a settled law in New York that the board may assign a particular school for colored children and exclude them from schools assigned for white children, that such a regulation is not a violation of the fourteenth amendment. (People *v.* Gaston, 13 Abb. (N. Y.) Pr. N. S., 160.)

The case of Hall *v.* De Cuir (95 U. S., 485) contains an interesting and instructive presentation of the authorities upon a question very similar to the one we are considering.

I am very well aware that there has grown up in the last generation a school of politicians who fully realize that we are much wiser than the fathers and have outgrown the Constitution. We are besieged day after day by a thoughtless clamor from every quarter to establish a uniform system of laws upon the subject of marriage and divorce in all States and for a uniform system of laws affecting interest and usury and the settlement of insolvent estates, and for uniform laws affecting child labor, and the eight-hour question, and uniform insurance laws. We are asked in a measure to wipe out State lines and State constitutions and blow the bugle and beat the drum and start onward in the march to glory and an empire. We are asked to trample down the reserved rights of the States, and the President, not being a lawyer and not having thoroughly investigated this question, seems inclined to give encouragement to the doctrine that the General Government may invade the State and can determine by treaty or otherwise how the schools of the States shall be conducted.

People are not surprised therefore when the President's Secretary of State makes a carefully prepared speech to the effect

that as this country has grown older and as its population has become denser and its means of communication have been increased that we have outgrown the old Constitution, and that more and more of the duties and functions of Government in every respect must cluster around the national capital, and as the years go by we must move farther and farther away with the Government from the homes and firesides of the people, as contemplated and explicitly provided for by the founders of the Republic. One of the strangest and most inexcusable of all of the strange statements was made the other day by a young man who was undertaking to advocate a national law against child labor. In this article occurs this extraordinary paragraph:

The first thing we see on studying the child-labor question is that this evil can not be left to the States to remedy. Of course there is not the slightest reason in the world why it should be left to the States to remedy, but we started out one hundred and twenty-five years ago with the notion that each State was a little nation and that this artificial thing called a State had certain rights. At that time the idea of this being a nation, a people living in one land and flying one flag had not thoroughly developed. There were many great men in our constitutional convention who saw this clearly, but there were a lot of little men who wanted to be big men and could be big men only in the narrow borders of their colonies, not being great enough for the country as a whole. These men insisted on the theory of the sovereignty of the State. These little men had the votes, and that is how it has happened that we started out the way we did. I am talking plainly in order to tell the fact, and that is the plain fact, crude though it be.

Now, the truth is that there was not a single delegate in that great Constitutional Convention who was little enough to advocate the abolition of State lines or who made any effort to establish one great consolidated empire with all the powers and functions of the Government concentrated in one central locality. And let me tell you, the most dangerous feature of to-day is the fact that the closer our public men get in touch with this Administration the greater contempt they seem to show for the limitations of the Constitution. And notwithstanding the high authority of Mr. Secretary Root and the Senator from Indiana, it remains true that every age of the world's history has been preeminent in certain pursuits and in achievements along the line of these certain particular occupations. We still go back for more than two thousand years and study the paintings and the statuary of ancient Greece. We study the paintings of men who painted fruits and flowers with such exquisite skill that the bees came to gather the honey and the birds came to gather the berries from the flowers that seemed to grow upon the walls of the city. For a thousand years to come Phidias and Praxiteles will be still the models of the highest excellence. For a thousand years to come the architects of every country will stand and gaze with admiration at the great cathedrals and temples that ornament the cities of the old world.

For centuries to come the students of sculpture and poetry and architecture and other arts will make pilgrimages and sit at the feet of the old masters. For centuries yet to come the dramatic poets of every land will still flock to the Bard of Avon and will still concede that the brightness of every other poet pales before the unrivaled splendor of Shakespeare. For a thousand years to come statesmen of every land will turn to Washington and Jefferson, to Hamilton and Franklin, to Adams and Madison, and the other founders of this Republic as the greatest builders of a free government that the world has ever produced. They will continue to grow in the reputation of statesmen long after the greatest of living statesmen shall have been forgotten. We have not outgrown the Constitution and we are not wiser than the fathers. This old Constitution, with its reserved rights to the States, emphasizing local self-government, protects the schools of California against any invasion by the Federal Government and confers no authority upon the General Government to establish a national law against child labor, however desirable the prevention of the evil may be. Those people in California are right in requiring the Japanese and the Chinese and the negro and other alien races to attend separate schools. That separation of the races is best for every race and for everybody.

Ministers of all our religions proclaim at the marriage altar this divine doctrine: "What God hath joined together let no man put asunder." It is equally a divine doctrine that "What God has put asunder let no man join together." The finger of the Almighty has written in the most unmistakable characters, in differences of color, of caste, of sentiment, of life, of literature, of geographical position, and in every way the necessity of keeping the races of mankind separate. Yet there is danger in these days that we are to have our national history rewritten, our Constitution that has stood for a hundred and twenty-five years overturned and destroyed, and we are now to be taught that we have not only outgrown the Constitution and have become wiser than the fathers, but we have outgrown the wisdom of the Almighty, and are even attempting to profane the very temple of the most high. There are people here in this Capitol willing to trample under their feet what has been demonstrated in every age and in every country to be true, and we are to forget what is written in indelible characters on every tomb and monument of the centuries—that the Ethiopian can not change his skin nor the leopard his spots.

We have by the terms of the Constitution, by statute in almost every State, by all the decisions of all the courts upon that question, by immemorial usage, and in every way recognized and enforced the right of each and every State in this Union to regulate and control its schools in its own way. No President has ever heretofore attempted, by treaty with any foreign power or by conference with any State or city officials, or in any other way attempted, to interfere with the State control of the schools. Nothing can be more unwise than the conference now being held at the other end of the avenue. If the President should fail to have his way in this conference and California officials should stand firm in defense of the unquestioned rights of that State, the danger of a permanent estrangement between our country and Japan will have been increased, first, by reason of the blunder of the President in boosting the Japanese into the belief that they were being unfairly treated and, secondly, by reason of the failure of the President in this pending conference itself.

Whereas if, upon the other hand, the President should succeed in inducing the officials of California to recede from their position we will become the laughing stock in the face of the whole civilized world. Such a position will come home to grieve us, not only in Cuba, but in every State North and South. Besides, every other nation will claim the right under the most-favored nation clause to send their children to the same State schools, side by side with the children of our own schools; or they will insist upon so amending the treaty as to give them the same rights in the schools that have been conceded to the Japanese. Indeed, the negro children and the Chinese children here at home in every State will vehemently demand the same right to send their children to the same State schools that the white children attend, and we will have no good reason left for refusing these demands.

---

## The Ship-Subsidy Bill.

### SPEECH

OF

### HON. IRVING P. WANGER,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, March 1, 1907,*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. WANGER said:

Mr. CHAIRMAN: It may be truly said that not only one but many mountains have been laboring, lo, these many years, and at last, in the closing days of the Fifty-ninth Congress, what has promise of being a fair hillock has been born!

What was an imperfect and incomplete measure for the encouragement of all classes of ships in the American merchant marine has become a measure to establish fast steamship lines to the Orient and to South America, primarily, to carry the mails, and, secondarily, to encourage commerce by expanding the markets for American products and to promote the national defense by the building of the limited number of ships necessary for this mail service and by the creation of at least a partial naval reserve.

It is useless to discuss the wisdom or folly of a genuine ship subsidy measure, as it is evident this Congress will not go beyond the provisions contained in the amendment reported by the House Committee on the Merchant Marine to the bill (S. 529), and in fact the indications seem pretty strong that the mail lines to the Orient provided for in the bill are not favorably regarded by a very large part of the membership of the House.

Heartily concurring in all that has been said of the importance of oriental trade, and of regular and swift transportation of mails to Japan and China, and more particularly to Hawaii and the Philippines, I greatly regret that my esteemed friend from Minnesota [Mr. STEVENS] endeavored to minimize the importance of better communication with the countries of Central and South America.

While there are not nearly a proportionate number of sailings from our Pacific coast to the Far East as there are from the Atlantic seaboard to South America, there is nearly as rapid,

although not as frequent, mail communications with the Orient as may be secured under the encouragement to be furnished by this bill, as the steamers of the present lines from San Francisco and Seattle to the Orient are generally almost, and in some instances quite, as swift as those to be built to secure the mail contract provided for those lines.

On the other hand the average time for present mail communications from New York to Panama is one week, which may be reduced to four days from New York and to three days from New Orleans if the bill becomes effective.

And the average time from the United States to Brazil and Argentina is twenty-five days when it ought not to exceed nine, and the sailings are irregular and ships wanting in good passenger accommodations, thereby furnishing a complete explanation of the very small percentage of the trade of the United States with those countries and the preference given to European manufactures and other products.

Our consular officers have eloquently portrayed the disadvantages our people labor under in traveling or forwarding merchandise to the South American countries, the almost infinitesimal number of Americans, who go thither, most of whom do so by way of Europe, and the measurably small number of South Americans who visit this country. Frequent reference to the representation of these consular officers and of American manufacturers and merchants has been made, notably by the distinguished chairman of the Committee on the Merchant Marine [Mr. GROSVENOR], and it seems appropriate to submit some sentiments and arguments that have been made by South Americans.

During the proceedings of the International Commercial Congress, held in October, 1899, under the auspices of the Philadelphia (Pa.) Commercial Museum in connection with the National Export Exposition, attended by delegates from the Governments of the Argentine Republic, Austria, Bahama Islands, Belgium, Bermuda, Bolivia, Brazil, Canada, Chile, China, Costa Rica, Cuba, Ecuador, Germany, Great Britain, Greece, Guatemala, Haiti, Hawaiian Islands, Honduras, Jamaica, Japan, Leeward Islands, Liberia, Mexico, New South Wales, New Zealand, Nicaragua, Peru, Paraguay, Queensland, Roumania, Russia, Salvador, South Australia, Uruguay, Venezuela, and Victoria, and by delegates from foreign chambers of commerce from these countries and from Africa, Arabia, British Guiana, Ceylon, Colombia, Denmark, France, Hungary, India, Italy, Madeira, Norway, Portugal, Spain, Sweden, Turkey, and Western Australia, the then distinguished Speaker of the House, the late Hon. Thomas Brackett Reed, presided in the second day's session, and in his brief address in taking the chair, uttered this gem:

* * * We desire to become acquainted with you; we desire that you should become acquainted with us. To this generation and the next are open broader possibilities than were ever open in the history of the world. All the inventions which devour time and place are the harbingers of trade; and trade, when it has its senses, is always the harbinger of peace.

You may receive, perhaps, too many welcomes, but I desire to add one by welcoming you here to-day, and I do it in order to add that it is my full belief that the welcome will become warm with the advancing years.

Hon. Dr. John A. Cockburn, of South Australia:

* * * We in South Australia have a large country. Australia is a continent in itself, and South Australia comprises an area of some 578,000,000 acres, an area so vast you have to look on the map in order to appreciate its significance. * * * At the very earliest dawn of our era a great sentence was pronounced, that no man could live for himself alone. The close of this century has witnessed the further truth of the fact that no nation can live for itself alone. We are bound together by a network of most intimate ties, which consist in more than the circulation of merchandise through the channels of trade and the commerce of the world, and there is nothing more important than the problems concerned in the maintenance and extension of this circulation, which is the lifeblood of our modern world.

Mr. Herbert Gibson, of the Argentine Republic:

* * * The sea of commerce and progress which has spread across Europe and North America has scarcely yet reached with more than gentle ripples the great South American continent. There lies there a vast undeveloped field of both mineral and vegetable resources, and it awaits but the awakening hand of immigration to become a most important productive continent. One might say without any exaggeration, it is more real than a metaphor, that South America lies slumbering awaiting her rediscovery by the northern pioneer. * * * We, as the South American republics, and I more particularly may say the Argentine Republic, are dependent upon foreign markets for every article of daily consumption.

Capt. J. Cordeiro da Graço, of Brazil:

* * * On this occasion I can not forget a tribute to the memory of a great man of this country, that the world feels is dead, Dr. William Pepper, who was president of this institution. * * * My Government, in official letters, told me to do as much as I could to bring the relations of commerce closer with this greater Republic, our largest consumer. We export to this country two-thirds of our production; that means we export to this country over $50,000,000, and we do not import from this country more than $13,000,000. If we do not import more from the United States, it is due to difficulties or lack of communications. Mr. McKinley, the great statesman and magistrate of this nation, said in 1897 that the "maker must find a taker." It is true, but the maker can not find the taker nor the taker the maker without communication. I am advised by my country to say that we will allow a subsidy for encouraging the hoisting of an American flag on an American ship, as we were accustomed to see several years ago. Several things have been exported to this country, as rubber and other goods, but the lack of communication is so great that you can not compete in freight with other nations. These are facts. We want navigation and better facilities, and it is for these two things that I have struggled during the time I have been in this country. * * * It is my duty to fulfill the orders of my Government to close more and more the relations with this great nation.

The governor of Pennsylvania said that the United States can produce cheaply and can compete with any other country.

* * * You can not until you have facilities for navigation.

* * * * * * * *

No other country in the world can offer the United States of North America such a good outlet for her manufactured products, railroad, navigation, and banking enterprises as can the sister nation of Brazil. In order to give you a slight idea of its commerce I might state that Brazil ranks fourth among the nations which export to this country, being outranked only by Great Britain, Germany, and France.

Exports from Brazil to the United States for about ten years showed the following increase: From $45,000,000 it increased in 1892 (during Blaine's reciprocity treaty) to $118,500,000; * * * that our exports of rubber in 1897 amounted to 25,036,628 pounds. * * * To all this must be added hides, furs, skins, sugar, woods, manganese, cacao, crude leaves, shells, raisins, oils, and other articles. If we consider that these hundreds of thousands of tons are shipped in vessels not one of which hoists the glorious Star Spangled Banner; if we consider that these enormous transactions are settled in London, where the people of the United States must pay heavy commissions, in addition to the large amounts paid for freight, insurance, etc., to foreign shipping companies, it is evident that there is a vast opportunity for American enterprise, and that American ships, either sailboats or steamers, bringing goods to Brazil, are certain to find a cargo for the return trip to the United States, where they can find a cargo to Europe upon their arrival. How long, my friends, will you be blind to these facts? Is it possible to compete with European nations in the Brazilian trade if you have no transportation facilities? No; you can never do it.

Mr. Juan Antonio Loredo, of Peru:

Great would be my satisfaction if I were able to make evident the ardent desire existing in Peru for the development of commercial relations with the United States, which, although increasing every year, are yet carried on on a small scale, as, according to statistical data, only 7 per cent of our total exportation comes to this country and only 14 per cent of our purchases are made here.

The United States is looking for new markets for the surplus of its manufactures, which are able in many cases to advantageously compete with similar products of European countries. To acquire those markets it is necessary to make concessions to the industries of the countries with which they want to trade. * * * Something else is necessary, and that is, in the first place, rapidity and economy in transportation, which can be obtained by establishing regular steamship lines. * * *

Mr. Jorge Basadre, of Peru:

So great has been the fame of Peruvian wealth that I feel somewhat uneasy when I say that the volume of our general commerce did not reach $25,000,000 during last year. * * * I confess that what we have accomplished is yet very little, but there are great possibilities in the country as a market for American products.

* * * * * * * *

Peru is a very rich country in ores and in tropical products, which are found in their almost virgin forests; but to develop our natural resources we need cheap means of transportation.

Mr. Prudencio de Murguiondo, of Uruguay:

Money and enterprise can accomplish wonders in Uruguay. * * * What is needed is first-class American ships of equal size or larger than those put on by the Houston Line and of equal or greater speed. These are about 6,000 tons capacity and have no passenger accommodations. * * * Give us American ships of the best class, making the trip in eighteen days, * * * with first-class passenger accommodations, and they will secure passengers. There are many that go to England and Europe with their pockets full of money, and they will spend it in the United States and then go to Europe by first-class steamers and get there before they could go to Europe from Uruguay and Argentina.

It will be an inducement for South Americans to visit this country, which they do not have if they go direct to Europe, for after spending their money there they do not care to turn this way, as it is to them an out-of-the-way route.

Is not the case well stated by the consul-general of Uruguay, that when their merchants first go to Europe their money is spent there and there is no inclination to visit the United States; and that if they first came to New York and to other American cities and saw how excellent are the products of our factories, they would buy here?

And do not these inspiring addresses cause us to realize how generous are the feelings of South Americans toward us and cause us a feeling akin to shame that we have done so little to manifest our appreciation of their culture, their invincible struggle for stable republican government, and for the development of their exhaustless resources?

Would it not be far better for our country if a reasonable percentage of our well-to-do citizens who annually visit the continent of Europe for recreation and pleasure, no less than for business, traveled to South America instead? And would not there soon be a higher appreciation of Spanish-American character and the millions to be garnered in their countries, if we only became better acquainted?

There is every reason to believe that many Americans would visit the republics south of us if they had anything like nearly

equal traveling facilities thither that are now enjoyed across the Atlantic.

The assertion that the farmers of the country are not interested in the promotion of our trade with South America makes appropriate a reference to some of the remarks made at the said International Commercial Congress by a highly esteemed member of it, Mr. C. J. Whellams, of Minnesota:

The other day a visitor, after listening to the addresses in this hall, remarked to me that a good deal was being said in the interest of the manufacturer and not very much in the interest of the farmer.

It is true much has been said that may only interest the manufacturer, but it is also true a very great deal has been said at this congress bearing on the direct and enlarged benefit to accrue to the farmers of this country through the extension of our export trade to the Orient and other parts of the world. Agriculture and manufacture can not progress or live without each other. Bad harvests cause depression in manufacturing, and closed factories hard times for the farmer. Manufacturing has lightened the labor of the farmer. * * * Manufactures are as much a necessity with the farmer as the farmer's products are to the manufacturer.

* * * * * * *

Now, we must, as a nation, find new people to trade with; we must, as a nation, find people who will buy our products, people who have not heretofore bought our products. We must have more than one customer, and we can. I will briefly suggest how we may. This country must encourage the upbuilding of a merchant marine to carry our products to the markets where they will bring the most money.

Mr. J. J. Hill lately said:

We have the cheapest transportation in the world, but when we undertake to sail ships on the seas under the American flag, as our laws stand at this time, it can not be done. I looked the matter up with the greatest care, and we were forced to make an arrangement with the Japanese Steamship Company, manned by Japanese sailors, to carry our products to Asiatic waters.

In the past the great railway system of this country was built by Government aid. How much more is that aid needed toward the establishment of a merchant marine! In constructing our railways the greatest competition was between ourselves, whereas to build up our merchant marine we have to compete with the most powerful nations of the world. A merchant marine is all important to the farmer and the manufacturer, and in helping to secure it they will help themselves.

It has been asserted that organized labor in the United States is not only against every form of ship subsidy, but that it is against the amendment we are considering. It is true that Mr. Samuel Gompers so declared when discussing the bill as it came from the Senate. But I can not believe that the workingmen of this country are against the upbuilding of the nation, and know that they are generally as ambitious for the development of our resources and the extension of our trade as any other class of citizens. To make more desirable and remunerative the manly employment of the sailor, to multiply labor in the shipyards, and to provide the nation with a fleet of steamers auxiliary to our fighting ships are objects appealing as cogently to labor as to capital, and I am very glad to have in authentic form the evidence of at least one union to that effect, as follows:

AMALGAMATED SHEET METAL WORKERS' INTERNATIONAL ALLIANCE,
*Norristown, Pa., November 17, 1906.*

Hon. I. P. WANGER.

DEAR SIR: The following resolutions were adopted by this local union:

"*Resolved*, That Local Union No. 270, of the Amalgamated Sheet Metal Workers' International Alliance, of the borough of Norristown, Pa., believing that the ships needed for our foreign carrying should be built of American materials by American workmen in American shipyards, and that such ships should be commanded, officered, and manned by Americans, urges the House of Representatives to speedily pass the shipping bill which was passed by the United States Senate on February 14, 1906, as being in the interest of American workmen.

"We believe that with your aid and help the shipping bill as passed by the Senate will become a law. As Americans and union men we most earnestly appeal to you as an American, and as one who desires to see our country in the van of the shipping trade. The thousands of dollars which now go to foreign countries will flow into our business life, thereby benefiting us all. In the event of the passage of this bill it will mean employment at good wages for hundreds of American workingmen."

Hoping you will give this bill your most hearty support, I remain,

Respectfully, yours,

[SEAL.] HARRY E. RICHARDS, *Secretary.*

I hope my esteemed constituent will pardon me for giving publicity to his letter no less than to the resolution. It will be noticed that he is as eloquent and enthusiastic as any manufacturer, shipbuilder, or Member of this body.

Referring to the argument that the farmers of the country will fail of benefits through the acquirement of swift transportation facilities to South America and the Orient, it is to be remembered that Republican protection saves them from disastrous competition with the farm products of those foreign lands, and that as markets are secured for our manufactures a larger home demand is created for the American farmer, and he is given a better market for his products right here in our beloved land. I would like to see a comprehensive measure for the upbuilding and maintenance of our merchant marine, which would encourage the export, especially of dairy products and of other things that American farmers and dairymen produce of a quality superior to any other people, and believe that such a measure may be formulated, and will be, in the comparatively near future. It has been well said that John Bull is the best feeder on earth and that he can never grow on the British Isles the farm products he consumes. Far-off Australia, by the encouragement of ships specially adapted to land Australian products in England, has captured a large part of what was once the market of our agriculturists, and Canada, by similar policy, has taken part of the remainder, and we can only regain our lost foothold by a similar policy. It must be remembered that it is not the quality of butter as it comes from the dairy that establishes its rating in Great Britain, but it is the condition of it upon arrival in the British market. When the cornfields awake to a thorough realization of what may be reaped through properly equipped shipping, they will be no less enthusiastic than are the seaboard cities in behalf of American domination in trade on the high seas.

From the remarks made it appears as if the South and Middle West were united in practically unanimous opposition not only to all the lines provided for in the pending measure to the Orient, but also the other lines, including that from a port on the Gulf of Mexico to Colon on the Isthmus; and it looks as if the strange anomaly would be presented of the Representatives of the districts on the Atlantic seaboard supporting a measure which will give competition from a Gulf port to the Isthmus and possibly imperil the supremacy in trade that other localities enjoy with the Isthmus and that the Representatives of the cities and States and districts that will be benefited by that competition will oppose the measure.

Complaint has been heard from time to time that New York and other places in the East enjoy too much of a monopoly of sending supplies to the Panama Canal, and now the opportunity is presented to test her primacy, and cold water is thrown upon the proposition by the complainants. It was supposed that the Mississippi Valley and States bordering upon the Gulf of Mexico would be the principal beneficiary of building the isthmian canal, but while the representatives of the Pacific slope and of the Northern and Eastern and Middle Atlantic States cordially favor regular steamship communication between a Gulf port and Colon, the proposition is spurned by those who should logically be its enthusiastic champions.

It is to be hoped that when the vote is taken these indications will fail to materialize and that all sections of the country will unite in giving that regular and timely communication between the Mississippi Valley and the Isthmus of Panama which is so desirable and so justly due that productive center and the Gulf States.

Minimized as the measure has been, it is none the less important, and every dollar of expenditure called for will be more than returned to the public Treasury through increased mail receipts, so that no added tax burdens will be imposed upon the people, who will, in addition, reap a rich return in enlarged trade and in the consciousness that a number of ships have been added to the merchant flotilla that will be available for the national defense in the event of war.

It has been said that the measure pays money to private interests. There is not and can not be a dollar disbursed from the public Treasury that does not go to some individual or corporation. We sustain the mail service in our own land, and he would be an idiot who would oppose appropriations for the purpose because, forsooth, railroads and individuals receive the money to render the service. Is there any more reason to fail to provide for communication where the same is urgently needed to enlarge our markets?

Let us rise above the miserable appeals to prejudice, which are unworthy the representatives of the intelligent Americans, and perform the patriotic duty of enacting the pending measure.

## Our New Postal Subventions.

### SPEECH
OF
### HON. GEORGE G. GILBERT,
OF KENTUCKY,
IN THE HOUSE OF REPRESENTATIVES,
*Tuesday, February 12, 1907.*

On the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes.

Mr. GILBERT said:

Mr. CHAIRMAN: There is such a constant clamor in the press almost every day bewailing the decadence of our merchant marine, and such a lot of cards and pamphlets sent out over the country by the Merchant Marine League, and yet there is an

entire misapprehension as to the facts in relation to this whole subject. A great many people have been led to believe that we have no merchant marine of any consequence and that our flag is scarcely ever seen upon the ocean. These people would be surprised to know the truth. We have the largest merchant marine of any nation on the globe. We have more than 25,000 vessels—ships large and small—engaged in the transportation of our commodities from port to port. No other nation on the globe, not even the British Empire, has as many ships as we have. Not only this, but we have the most profitable sea-going craft of any nation under the sun. Our merchant marine has increased 42 per cent in the last ten years, and on the Pacific Ocean it has doubled in the last ten years. In 1906 in the coastwise trade alone we had 5,735,483 tons of shipping, whereas in 1896 we only had 3,858,927 tons in the coastwise trade. In other words, there has been an increase in ten years in the coastwise merchant marine alone of 1,876,556 tons, or an increase in ten years of 48 per cent. On the Atlantic and Gulf coasts we have 17,477 ships; around the little island of Porto Rico we have 59 ships; up and down the Pacific coast we have 2,787 ships; in the Hawaiian Islands we have 49 ships; on the Great Lakes we have 3,052 ships and boats, and on the great rivers of this country we have 1,582 vessels. Our shipping industry is flourishing and prosperous and is not going to decay, these subsidy grabbers to the contrary notwithstanding.

During the last fiscal year there were built in American shipyards 1,221 vessels of 418,745 gross tons, and the Commissioner of Navigation tells us that during the next year we will build a greater number of vessels, with a greater amount of tonnage, than has been built in any previous year. Here is what he says:

> Unless strikes, delays in furnishing structural steel, or other unforeseen difficulties prevent, the output of steel merchant vessels during the current fiscal year will be greater than ever before in this country, and it is possible that the total tonnage of all the types of vessels for the year will exceed 525,000 gross tons, the largest tonnage built since 1855. Up to November 19 203,000 gross tons have been built and numbered. If that rate be maintained for the rest of the year, the output of our yards will be the largest in our history. Work in progress is more evenly distributed among the shipyards of the seaboard and Great Lakes than for some years. On July 1, 1905, only seven ocean steamships of 1,000 gross tons or upward, aggregating 38,000 tons, were under contract or construction. On July 1, 1906, thirty-two such ocean steamships, aggregating 131,000 gross tons, were similarly reported. While some of these are now in operation, others will not for various reasons be finished by the end of the current fiscal year. So many ocean steamers, however, have never before been under contract in the United States as at the present time.

Why, then, should we go into the Treasury and take out the public funds to assist these shipbuilders in the further prosecution of their private business? But they say that we have not sufficient communication with South America, and that we must subsidize certain lines so that they can compete with foreign nations. No amount of subsidy is going to build up a great trade between this country and the Argentine Republic, or Uruguay, or Paraguay, or any of those countries that are situated on substantially the same latitude south of the equator that we are north of the equator.

This is for the very obvious reason that those countries are engaged in producing a surplus and shipping abroad the same character of products that we are engaged in exporting. Those countries are helping us to feed Europe and Asia. Those countries are raising vast quantities of wheat, corn, cattle, and hogs, and shipping farm products of every kind, and, like us, they are engaged in exporting the very same character of products that we are engaged in exporting. It would be therefore perfectly absurd for us to expect as large a trade between this country and those countries as would naturally exist between those countries and European ports. Those people import manufactured articles and export farm products, and why should we go down there with a shipload of wheat, or corn, or cattle, or why should those countries come here with shiploads of corn, or wheat, or cattle? It is perfectly natural for us to send our ships loaded with farm products to European ports and bring back those ships loaded with manufactured articles; and it is perfectly natural for those South American countries to send their ships loaded with farm products to European ports and come back loaded with manufactured articles. So that all this hue and cry about Germany and England and France having so much larger trade with the Argentine Republic than we have is mere nonsense. Now, when it comes to Brazil, that country exports what we desire to buy and consequently we purchase from Brazil her tropical products to a greater extent than all other countries combined. Brazil exports coffee and rubber and mahogany and things that we need, and we imported from Brazil last year without any subsidy more than all other countries combined. Now, as to the necessity for having ships, you would be surprised perhaps to know that we sent from this country more than three ships a day to South American ports every day of last year. And we would have sent a still greater number of ships if there had been any sufficient quantity of freight to be transported to and from the ports of these countries.

During the first six months of the year 1906, 259 sailing vessels, or 43 sailing vessels every month, went from the ports of the United States to the ports of South America. From January 1 to June 30, 1906, 89 steamers cleared from New York and 35 entered at New York from South American ports, making 124 vessels. Between New York and Chile there were 14 steamers cleared and 17 entered, making 31 for the six months. Between Baltimore and South American ports there were 6 steamers cleared and 10 entered, making 16 in all. And so on down the line. There were 285 steamers in all for the six months stated, and 259 sailing vessels, as above shown, making 544 ships entered and cleared between the ports of the United States and South American ports in six months, making ninety-odd vessels every month and more than 3 ships every day of the year.

It is an easy matter for merchants and shippers in any part of the world to get their goods shipped in these days. The harbors of the world are full of craft that have had to lay up for lack of freight, and steamers of good capacity and sufficient speed and sailing vessels by the thousands are lying idle in the harbors, floating idly in every port and corner of the world waiting for cargoes. These vessels are struggling along, gradually building up a trade between this country and South America, gradually increasing the amount of freight and pulling along and having a hard time of it, it is true, but the proposition now presented in this subsidy bill is perfectly absurd. The proposition is to select a few ships, or have a few ships built, favorites of the Government, and give them out of the public Treasury large sums of money, not to build up cargoes, but to enable them to make trips without cargoes, and this subsidy will be large enough to enable these particular ships to reduce the freight and passenger rate so as to drive the thousands of vessels now employed in that business, and who receive no subsidy from the Government, out of existence. Or if it does not have the effect of driving them out of existence, it will inevitably have the effect of making their success more difficult and making their competition more severe. Suppose you and I are farming side by side, and the Government pays a bounty of 10 cents a bushel on the corn you raise or pays a bounty of 2 cents a pound on the beef and pork you produce and pays me no bounties at all, does it not make the burden of my life harder? Does it not make my efforts to succeed at farming the more difficult?

So here is the absurd proposition that the Government will cause to be built a few ships, pay them enormous sums for every round trip they make regardless of passengers and cargoes. Now, if our ships can not compete under the present status of things with the very small per cent of foreign ships which are receiving subsidies from the foreign governments, how are our thousands of unsubsidized vessels hereafter to compete with these highly-paid favorites of our own Government. Subsidies are the minor factor in all maritime success. Commercial skill and industry are the major factors of the present development of the shipping industry of certain European countries, and notably of Germany. And those who have investigated the effects of subsidies in foreign countries have universally reached the conclusion that subsidies have been disappointing and have not brought the expected results. Besides that, subsidizing a few lines of ships has always had the tendency to restrict free competition and to build up shipping rings and confederations; and certainly no subsidies should be allowed without exercising some control over the freight rates and at least fixing the maximum rates to be charged by the ships receiving the subsidy. There is nothing in this bill to prevent the ships from charging a higher freight rate to our own shippers than they do to foreign shippers, and there is no attempt to exercise any authority or control over the rates to be charged. It is a notorious fact now that notwithstanding the high subsidies paid by France, Germany, and Italy, and the very small subsidies paid by the British Government, that the freight rates between European ports and Australia and Africa and other far-distant ports are uniform. There is a perfectly established shipping rate between the shipowners of the European Governments, so that the freight from Portsmouth to Australia is universally the same as the freight rate from Bremen, or Calais, or Marseilles, or any other European point. We have set here month in and month out legislating and contriving some methods by which we can force the railroads of this country to treat the shippers alike, and we have attempted to punish these railroads for rebates and discriminations.

We want to force the common carriers to give the public a square deal and leave free and open the competition between the public and the carriers. We want them to reduce the freight rates. But here when we come to this subsidy scheme the entire method is reversed. The complaint is that the freight rates are too low and that we must make them higher by continuing to pay the same old rate for freight and passengers on the ships and then paying an additional price by way of subsidies for the privilege of continuing to pay this same old rate. And instead of having these common carriers on the ocean to treat all shippers alike we are insisting upon making Government favorites and pets out of some of these carriers, giving them the cream and benefit of Government support and protection, making them the wards of the nation and turning thousands of other shipowners engaged in the same trade out without any support or assistance or protection. We want in the shipping industry to build up the few and break down the many.

The truth is that the very same high protectionists who are advocating this ship subsidy would hasten to repeal the law if it should have the effect that they pretend to believe it will have. If the ship subsidy should have the effect of enabling us to import large quantities of goods from foreign countries, these very ship-subsidy advocates would hasten to do one of two things: They would hasten either to repeal the law or they would hasten to increase the tariff. They would argue that the tariff is not high enough, because here is a flood of foreign goods coming in over the tariff wall, and we must put the tariff up higher and keep these goods out. Then they would come back and put the subsidy still higher, so as to enable the goods to come in and then put the tariff still higher to keep them from coming in. The effort is to have our cake and eat it, too. The effort of these stand-pat protectionists has been for a generation and more to destroy our ocean-carrying trade, to keep out foreign goods, and we have continued to build the tariff wall higher and higher for the avowed and express purpose of keeping out foreign goods. And if we have succeeded in keeping the goods out it has necessarily resulted in injuring the ocean-carrying trade to that extent.

The President said in his message the other day, in regard to this bill, as follows:

> The bill has been prepared almost exactly in line with Secretary Root's speech at Kansas City. It is not an experimental bill. It is modeled almost exactly on the recent Cunard contract with the British Government, etc.

Now, the President has so many duties to perform and so many things to see after that he has not had time to study the Cunard contract. He has been deceived and misled by somebody upon whom he had a right to rely. There has been no very recent Cunard contract. The last one was made on July 30, 1903, and made good for twenty years, and has not since been changed or modified in any respect whatever. And this Cunard contract or subvention made between the British admiralty and the Cunard Steamship Company is as wholly unlike the terms of this proposed bill as two propositions can possibly be. The Cunard subvention or contract imposes many duties and obligations upon the steamship company, none of which and none similar to which are included or contemplated in the pending bill. For example, the Cunard Steamship Company obligates itself to build forthwith two large steamships and guarantees that they shall make a speed of from 23 to 25 knots an hour. There is no speed provided for in this bill at all. It is true the bill does specify not less than 16 knots speed in some of the sections and not less than 14 knots speed in other sections, but the bill does not require this or any other degree of speed to be made. On the contrary the bill expressly releases the company from making any speed except during the test of four hours. The language of the bill is as follows in this particular:

> The requirements of this section as to the rates of speed shall be deemed to be complied with if said rates are developed during a trial of four hours' continuous steaming at sea in ordinary weather in water of sufficient depth to make the test a fair and just one; and if the vessels are maintained in a condition to develop such speed at any time while at sea in ordinary weather.

So it will be seen that it is the capacity of the ship to make the speed, and not the speed that is actually made, which determines its capacity to receive the subsidy. Now, when we turn to the Cunard contract we will find that the entire subsidy provided by the contract shall be forfeited unless the ships in fact make a speed of 23½ knots an hour, and in lieu of the compensation provided in the contract the steamship company will receive only reasonable compensation for its services, to be fixed by arbitration.

Again, the Cunard contract obligates that company to build these two new ships according to plans and specifications to be submitted by the Board of Admiralty, and all the other ships now in existence of that company are also to be held at the disposal of His Majesty's Government and to be hired or purchased on terms set forth in the contract. There is nothing in this bill that requires these American ships to be built after any particular fashion or to make any particular speed or to do anything else except draw the monthly pay from the Public Treasury. In the Cunard contract that company obligates itself not to increase freight rates and to make no contract for the carriage of persons or goods to the disadvantage of British subjects. Here, by this bill, any ship company can put the subsidy in its coffers and proceed the next day to reduce the freight rate so as to drive its competitors out of business, and live on the subsidy until that has been accomplished. There is nothing in this bill to prevent the shipowners who receive this subsidy from discriminating against American citizens and charging our people a higher price for transporting persons and property than they charge the foreigner. The contract with the Cunard company obligates that company to keep in storage ready for use and to fit them onto the steamers free of charge certain armaments and equipment, which may be called for at any time by the Board of Admiralty, and they must be put on without delay, and contracts for the shipment of merchandise are to be abandoned and every ship of the line turned over to the admiralty at any time at the end of seven days' notice.

Nothing of this kind is intimated in the pending bill. No services are to be rendered in consideration for which this $3,750,000 is to be paid by the Government to the shipowners. Under the Cunard contract that company obligates itself not to let any of its steamers out under a charter party without the consent of the Government, and not then if the Government gives notice that the ships within the time specified may be needed. The Cunard contract specifies that the master and officers and engineers in charge of a watch on board shall always be British subjects, and that three-fourths of the crew also shall be British subjects. Nothing of that sort is provided for in this bill. All of the payments under the Cunard contract are conditioned upon the ships showing an actual speed of not less than 23½ knots, and if any less speed than that is shown the entire £150,000 is forfeited, and the company agrees to accept a reasonable compensation for its services. For these and many other stipulations contained in that contract, all of which are to be performed, and bond and security given that they are performed, the Government agrees to lend that company £2,600,000. This sum is not donated to the ship company, but that company obligates itself to pay back every dollar of the money at 2¾ per cent per annum interest. You have all heard, no doubt, that the British Government has donated this large sum of money to the Cunard Steamship Company. You will find it in the literature of the Merchant Marine League and in reports made to this House ad nauseam. The truth is that the British Government, in lending this £2,600,000 to the Cunard Steamship Company at 2¾ per cent interest, would get $30,000 a year, more than the Government would get if it had taken the same amount of money and invested it in the Government bonds of the United States.

Furthermore, the Cunard Steamship Company obligates itself in that contract to donate stock to two nominees of the Government, and, moreover, those stockholders are authorized to attend all the meetings of the board of directors and to require a poll and a record vote on all important measures of the board and to participate in voting the stock of the company itself to the extent of one-fourth of all the stock of the company. Here is the contract complete, and there have been no amendments to it, as I have stated. Now, take this contract and compare it with this pending bill, and you will see that the President had never read this contract, and the people who are making that statement all over the country are either dishonest or misinformed.

Look at this bill. We are to pay $600,000 a year for a fortnightly service from a port or ports on the Atlantic coast to Brazil. Now, think of that proposition. We already have steamers and sailing ships going to Brazil every day of the year, and we are already bringing here from Brazil more products than every other country of the world put together. What will this line of steamers do? It will draw the subsidy and down the freight rate until it drives out its competitors, and then establish a higher rate and create a monopoly in the traffic between New York and Brazil. Or if it does not put down the freight rate and drive out its competitors then it will take the $600,000 for doing absolutely nothing.

Then the second clause provides for the payment of $800,000 a year for a fortnightly service from some port on the Atlantic coast of the United States to Argentina.

Then, in the third section we are to pay $150,000 a year for

a weekly service from the Gulf of Mexico to Panama. Then, further, this bill provides for three lines from the Pacific: One to Peru and Chile at $400,000 a year; two to the Philippines, Japan, and China, at $700,000 a year each, and one via Hawaii, Samoa, and Australia at $200,000 a year in addition to the $283,000 a year this line is already receiving for carrying the mails. Here are provided princely donations amounting to $3,750,000 to be handed over to three great railroad trusts for nothing. These sums are presents and it is already well known who will get this money. On the Pacific James J. Hill and the Great Northern Railroad Company will get one line, and the subsidy; E. H. Harriman, notorious for having organized the Northern Securities trust, and his combine of railroads will get two of these, and the sugar trust, the Oceanic steamships—Spreckels's line—will get the fourth line of steamers. So that the Government proposes to pay the sugar trust a bounty of $200,000 a year by this bill in addition to the $283,000 it is already receiving for bringing its own sugar from Hawaii to San Francisco, and to pay Hill and Harriman great rewards for organizing railroad combines and throttling competition. On the Atlantic side of this bill it is already known that Morgan and the shipping trust will get all three of the lines and pocket the $1,550,000 a year. For doing what? For carrying the mails? Why, the mails are already being carried under contracts without the payment of a single dollar of this $3,750,000, and hundreds of other vessels stand ready to take the places of these favored ships that have the existing contracts. What are the ships to do for the Government in order to earn this vast sum of $3,750,000 a year? Absolutely nothing at all. The talk about a naval reserve has no connection whatever with this subsidy. Any officer or sailor on any ship is given the opportunity to volunteer into the Naval Reserve, and if they do, certain sums are to be paid them, about equal to one month's wages.

But none of these sums are to be paid out of the $3,750,000. That sum all goes into the pockets of the shipowners. And the ships that get this subsidy do not furnish the men for the Naval Reserve. On the contrary, the bill provides that these naval volunteers are to be enlisted "from the officers and men now and hereafter employed in the merchant marine and fisheries of the United States, including the coastwise trade of the Atlantic and Pacific and the Great Lakes."

So that the proposition is to give all the subsidy to a few fast ships belonging to these rich trust magnates and exact nothing from them in return and then get the naval reserves from the vessels engaged in the coastwise trade and in the over-sea trade.

Why should we pay out that money out of the Treasury to go down to Argentina after cattle and wheat and corn and farm products when we are exporting them ourselves by the millions of dollars a month? The man who expects to build up an active trade between this country and Argentina is just about as reasonable as the man who expects an active exchange of commodities between Ohio and Illinois. Just as much sense in sending our ships down to Argentina after cattle and wheat and corn as it would be for a farmer in Illinois to load up his wagon with corn and go to peddling it out across the border to the farmers in Ohio, every one of whom has as much corn for sale as the farmer engaged in this foolish enterprise. But as between this country and Europe or as between Argentina and Europe there is an immense commerce. Commerce is the interchange of commodities. Argentina is shipping vast quantities of corn and wheat and hogs and cattle and farm products of every kind to the dense populations of Europe and bringing in exchange manufactured articles and machinery from the old country, just as we are doing the same thing and just as both countries will continue to do with or without subsidies.

The truth is that the commerce of no nation in modern times has been built up by a subsidy. France has for years been the largest subsidy-paying people on the globe, and she has made the most complete failure of her maritime enterprises of any first-class power of modern times. Everybody knows, who has looked into the subject at all, that England dominates the seas, that England has a row of fortresses around the globe, and that England pays less subsidies than any other first-class power. Furthermore, all the hue and cry we hear about our not being able to build the ships as cheaply as other nations and not able to man them as cheaply as other nations turns out upon investigation to be mere rot. Everybody knows that England pays higher prices to her sailors and to her seamen generally than any other European nation, and everybody knows that the rate of wages paid in English shipyards and the English laborers generally is higher than the wages paid to the sailors of Germany, or France, or Italy, and higher than the wages paid to the laborers generally in those countries.

We can very easily have the American flag flung to the breeze in every seaport of the world, and all we have to do is to repeal an antiquated statute that prevents capitalists from going where they please and buying ships wherever they can buy them the cheapest and hoisting the American flag at the masthead. This is the only country in Christendom where that old statute still exists. Every country of Europe has abrogated this antiquated law for many years, and every country of Europe permits its citizens to go into any of the shipyards anywhere in the world and buy their ships wherever they can get them upon the most favorable terms, bring them home, and hoist their own national flag. The truth is that more than 250,000 tons of American shipping now engaged in the commerce of the world is to-day being done under foreign flags. The ships are owned by American citizens and American corporations, and they are a part of the American merchant marine, but they float at the masthead the Union Jack, or the flag of Germany or some other country simply because of this statute. There is not much sense about this agitation about the American flag on a merchant ship anyhow.

The flag on a merchant ship does not mean anything more than the American flag stuck to the locomotive of a train or attached to an automobile at Newport. A merchant vessel is a mere chattel, subject to the laws and institutions of the port in which it is located; it is a vessel of that country where its owners are citizens. This is wholly unlike a war ship. The battle ship is a part of the territory of the country, and the flag of the battle ship means as much floating from the masthead at Odessa or Portsmouth or Calais as it does when soaring from the Capitol of the United States. It is the United States which is in legal contemplation. But the merchant vessel means nothing more than that it is a piece of personal property belonging to its owners, subject to the laws of the locality where it may be placed.

Let me repeat this statement. If the high protectionists who are advocating the passage of this subsidy bill believed in good faith that its enactment into law would accomplish what they claim it would accomplish, they would hasten back here to repeal the law. They would come clamoring into this Hall and shouting that we are being ruined by a flood of manufactured goods coming in from the Old World, coming in over the high-tariff wall, and we must repeal this subsidy bill. Or else they would come clamoring for an additional tariff to keep those very goods out. The policy of the high protectionists has been to keep out the importation of foreign goods, to destroy the over-sea trade and commerce. They will deny all this and say that the purpose of the tariff is only to keep out manufactured goods and to prevent them from coming in competition with goods manufactured in this country. But that denial is insufficient. Everybody knows that the over-sea traffic can not be built up without the importation of foreign manufactured goods. The man who expects an over-sea trade by the importation of grain or stock or farm products or the importation of any of those commodities that we are busily engaged in exporting is a first cousin to an idiot. We know, and everybody knows, that if we are to have a valuable over-sea trade we must be able to carry shiploads both ways; and as we are not going to import live stock and farm products, we must of necessity import manufactured goods.

It seems to be a universal fault in the human family to be constantly turning to the Government with the hope and expectation that the Government can do for us so much better than we can do for ourselves. The King—the Lord's anointed—was the fountain head not only of social order, but he was the receptacle of that divine right and unction by which the nation was saved from its enemies both at home and abroad. We tried in the foundation of this Government to cut loose from that universal heresy and to impress upon our people the vast importance of every man being the architect of his own fortune, and we have tried to teach the American citizen to paddle his own canoe, and to look upon the Government merely as an agency by which to transact certain important business for the citizen. Our fathers did succeed in the heroic days of the Revolution in breaking away from this old disease of paternalism, and we have all along insisted that self-reliance and individual effort were the true means of success. We still adhere to that doctrine in the main, and have by reason of adhering to it outstripped every other country in every industry and in every avocation. We pay our laborers, or rather they pay themselves, higher wages and they live in better houses and have greater comforts than any other toilers on the globe. And it is on account of their own superior intelligence and superior comforts that they are the most skilled and ingenious laborers on the globe. Although we are engaged in feeding the crowded populations across the sea, we are also outstripping them in manufacturing articles of every kind. You may go down into the hold of every steamer and every tramp sailing

vessel that crosses the Atlantic or the Pacific and you will find every species of machinery and of manufactured articles of every conceivable kind going into every port and underselling the products of every land in their own market. We make shoes for the Germans of Berlin; we make locomotives for the Englishmen in Australia; we build trolley lines for the Turks in the Ottoman Empire; we build railroads in Persia and China; we build iron and steel bridges for the Czar, and we build sewing machines for the ladies of Tasmania and New Zealand. None of these laborers receive any subsidies from the Government, and the contention that we can not build ships as cheaply as they are built in Europe is not only false, but absurd in the extreme.

All of these other machines are constructed by laborers, who are paid high wages, just as the laborer who builds the ships is paid high wages. This industry of our people, this self-reliance of the American workingman, this skill of the American mechanic have put us in the lead in everything, including the building and manning of ships. Why, we are transporting through the Sault Ste. Marie Canal, which connects Lake Michigan and Lake Huron—through this canal alone we are transporting vastly more freight and passengers than are carried by all the commerce of the world through the Suez Canal. Our coastwise trade, amounting to more than 6,000,000 tons, is the largest and most profitable shipping industry on the globe. Our coastwise trade carries more tonnage, charges higher prices, makes shorter trips, collects more money than any other shipping industry of any country under the sun. And we have less excuse for going into the Treasury of the United States and taking out the public money and paying it into the pockets of these subsidy grabbers than any other country in the world. Japan is subsidizing steamships and sending them broadcast around the globe hunting for something to carry. Germany is subsidizing two steamship lines and forcing them upon every trip to circumnavigate the entire continent of Africa hunting for something to do. England, in the midst of her ocean empire, is subsidizing her ships connecting her insular possessions as a matter of governmental necessity. But even in these countries the effect of the subsidy has been to make the lot of the other shipowners harder and to concentrate the traffic in the hands of the subsidized steamers. From every standpoint this country will be guilty of the extremest folly to subsidize some twenty or thirty steamships and try to concentrate our ocean traffic in the hands of these few ships and make the lot so much harder for the 25,000 vessels that are to receive no subsidy whatever.

This bill ought to be styled "An act to destroy the American merchant marine in the interest of certain railroads and millionaire shipowners." It will be exceedingly difficult for this country ever to become again prominent in the ocean carrying trade, and this fact furnishes not a source of distress, but is one of the greatest compliments that can be paid to our Government and our people. We are too prosperous, and our people are too busy, and they are too well employed at high wages to consent to engage in this scramble at the cheap rates now charged by the ships of other nations engaged in the ocean carrying trade. Thousands of ships of high and low degree are lying idle, rocking on the waves in every harbor of the world, waiting and watching and anxious for freight and passengers. These are cheap steamers and sailing vessels, with crews made up of Chinese, negroes, and Portuguese and Norwegians and other cheap laborers, and therefore our shipowners can not successfully compete with them in this traffic; neither can our laborers successfully compete with the Chinese coolies and Jamaica negroes in the construction of the Panama Canal. There is just as much reason and sense in going down into the Treasury of the United States to pay our rich shipowning corporations the difference between those cheap freight rates charged as there would be to go down into the Treasury and take enough money to pay us for hiring American skilled laborers to go and finish digging the Panama Canal.

We can, if we really are in earnest about it, restore the ocean carrying trade to American vessels, first, by repealing an antiquated statute that prohibits our people from going into foreign shipyards and purchasing ships and floating the American flag, or we can build up the American marine by returning to a time when a successful method was adopted of establishing discriminating duties giving the American vessels a preference in port dues. No treaties need be held up as preventing this method, because as soon as Congress enacts this measure into law all of the treaties that are in conflict with it will be abrogated.

No, gentlemen, these stand-pat Republicans are now up against this proposition—how to keep the tariff walls so high as to keep foreign goods out and at the same time have a ship subsidy so large as to bring the foreign goods in. How are we to destroy foreign commerce with one hand and build it up with the other? How are we to pay more for transporting our commerce across the seas than we pay now and make money in the transaction? How are we to enable our ships to compete with foreign subsidized ships by substituting a new and greater competition? How are our thousands of ships that are to have no subsidy to compete with our new ships that are to be subsidized at much larger prices than the foreign ships?

## Rates and Remedies.

### SPEECH
OF
# HON. GEORGE F. BURGESS,
OF TEXAS,
IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 6, 1907.*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. BURGESS said:

Mr. CHAIRMAN: This bill appropriates for the improvement of the harbors, rivers, and waterways of this Republic, in round numbers, $83,000,000, the largest amount ever carried in any similar bill in the history of the Government. It is my deliberate judgment that, viewed from every proper standpoint, this bill is the best rivers and harbors bill ever offered Congress, and that it will be more universally approved by the people of this country than any other bill ever passed. The widespread satisfaction with which this bill will be received is the result of an increased knowledge of this character of legislation, brought about by the happy conjunction of many causes, some of which I shall briefly mention. One of the main causes of the present popularity of this class of appropriations is due to the persistent, systematic, intelligent, organized education of the country as to the real facts demanding such legislation.

On October 8, 1901, in the city of Baltimore there was held a national rivers and harbors congress, and it was largely attended and many splendid addresses were delivered, and the following resolutions were adopted:

Whereas it is desirable to arouse the sentiment of the people to a fuller appreciation of the value and importance of improving and developing the waterways and harbors of our country, in order to meet the demands of our rapidly increasing internal and foreign commerce for the advantage and benefit of the whole people, and for the purpose of imparting reliable and more complete information upon this important subject, this congress, representing all sections of our country, has been convened: Therefore, be it

*Resolved*, That this congress asserts that the best development of our national resources demands the adequate improvement of our waterways, and therefore it indorses and urges upon the congress of the United States a liberal policy in their improvement through systematic and adequate appropriation therefor. In equally unequivocal terms this congress deplores and condemns any action which leads to the failure of river and harbor legislation.

*Resolved*, That it is the sense of this congress that the improvement of rivers and harbors is of equal importance with the work carried on by any department of the General Government, and for this reason we urge that appropriations therefor be placed upon such a footing as will insure at all times ample funds for a vigorous prosecution of the work, and to this end we indorse the system of continuing contracts.

*Resolved*, That in the judgment of this congress all items should be excluded from the river and harbor bill that do not appertain to the improvement of harbors and waterways for the purposes of water-borne commerce.

*Resolved*, That the wonderful prosperity of our country is largely due to the vast increase in our foreign commerce, and that to advance our position as a great commercial nation all possible facilities must be afforded, deeper and wider channels must be created to meet the requirements of the modern steamships that have revolutionized the commerce of the world.

*Resolved*, That our great systems of internal navigation by the lakes and waterways of our country, besides being so essential as great highways of commerce to the fullest development of our national resources, are natural and effective regulators of freight rates, and we therefore urge their continuous and systematic improvement, with liberal appropriations therefor.

*Resolved*, That an executive committee of seven be appointed by the president of this congress, representing the different sections of the country, who shall have general charge of the affairs of this congress, with power to convene future meetings and to perform such other duties as may be necessary to carry into effect the purposes and objects of its organization.

*Resolved*, That the foregoing preamble and resolutions be formally submitted to the appropriate committees of Congress at its next session by a committee consisting of one delegate from each State, to be appointed by the president of this congress, who shall be ex officio a member of the committee.

This was all the action, practically, that was taken, and nothing further was done until the summer of 1905, when the fact that three years had elapsed between the passage of the rivers and harbors bill of 1902 and that of 1905, together with the fact that the bill of 1905 was totally inadequate to meet the needs of the country, impelled the friends of river and

harbor improvement to bestir themselves, and on the 15th and 16th of January, 1906, there was held another rivers and harbors congress in the national capital. This meeting was much more largely attended than the former one, and at this meeting many splendid addresses were delivered, great enthusiasm was developed, and the following resolutions were adopted:

Whereas there has existed in the past an unjust prejudice against appropriations recommended in river and harbor bills in consequence of lack of information and failure to realize the enormous benefits these improvements confer upon the people of the whole country by reducing and regulating the rates of freight transportation and by creating new and important channels for the transit of the products of the forest, field, mine, and factory; and

Whereas the marvelous growth and development of the resources of the country and the increase of our commerce, domestic and foreign, have been the surprise and envy of all civilized nations, all to be enhanced by the completion of the Panama Canal, and these developments demand for their successful, continuous, and further extension a more liberal policy on the part of the Government; and

Whereas the evolution of our transportation agencies has added to and emphasized other reasons for river, harbor, and waterway improvements, the cogent one being that such improvements exert a natural, proper, and permanent competitive effect on the cost of transportation, which is invaluable to our whole nation: Therefore, be it

*Resolved*, That this congress, recognizing, appreciating, and commending the invaluable work of the Rivers and Harbors Committee of the House of Representatives and of the Committee on Commerce of the Senate, aided by the Engineer Corps of the Army, deeply regrets the limitations resulting from appropriations so small as to seriously embarrass and defeat the proper development of their labors.

*Resolved*, That the National Government, having assumed the improvement and control of the rivers, harbors, and waterways of the country, is unequivocably bound to discharge these obligations promptly, and by sound business methods, and instead of appropriating for the purpose at uncertain intervals of two or three years, should by annual appropriations place river and harbor bills on a parity with other great appropriation bills, and thereby permit all such work to be carried on economically and continuously without the waste incident to intermittent effort.

*Resolved*, That in view of the large number of projects for the improvement of our harbors, rivers, waterways, and canals that have been approved by the engineers and the committee, requiring the expenditure of large sums of money, we not only recommend, but urge, an annual appropriation of at least $50,000,000 confined to works of improvement approved or in progress, and that it is due the country that Congress take whatever steps may be required to provide the sums necessary to promptly, effectively, and economically complete accumulated worthy national projects adopted and recommended by the constituted authorities now delayed only by the lack of available funds.

*Resolved*, That the executive committee be, and is hereby, directed to use all proper means to actively further the purposes of these resolutions in such manner as will assure the completion of these works of national development.

In addition to all this a permanent executive committee was appointed, consisting of fifteen men carefully selected from the different sections of the country and thoroughly representative of each, and was clothed with plenary power to take such steps as it might deem proper to intelligently arouse the sentiment of the American people to the wisdom of carrying out what the convention had declared in the resolutions I have quoted. That distinguished Democrat and splendid gentleman, my colleague and friend, Hon. JOSEPH E. RANSDELL, of Louisiana, was chosen as chairman of this executive committee, and immediately upon the adjournment of that congress he began a practical and systematic effort to arouse public interest in the demands of the congress. He and the secretary of the executive committee, Hon. J. F. Ellison, of Ohio, deserve great credit for their efficient services. The effect of their efforts were seen when in December last year the National Rivers and Harbors Congress was again convened in the national capital.

Mr. Chairman, I gravely doubt if there has assembled a more splendid body of men at any time on any subject in the national capital than those composing this last Rivers and Harbors Congress. Greater in numbers by far than previous congresses and composed of men who thoroughly understood the situation and who came and went away with determination to contribute all in their power to the furtherance of the objects of the convention as expressed in the following resolutions:

Congress has demanded in the past an awakened public sentiment in favor of adequate appropriations for river and harbor improvement. We maintain the awakening has come. Congress must now recognize that public sentiment in favor of increased appropriations, as voiced by conventions and the press, has reached a point where the concern is not the advisability, but only the question of amount and frequency of such appropriation. Present conditions demonstrate that transportation facilities are totally inadequate for the prompt and economical transportation of the products of the country. Within the last ten years the tonnage moved by railroads has increased 47 per cent, while during the same period railway mileage has increased only 20 per cent.

Hundreds of millions of dollars are lost annually to our farmers and other producers by the failure of the National Government to provide the assistance which properly improved natural waterways will give in increased facilities for transporting freight.

We maintain that water competition is the best and surest regulation of freight rates. The improvement of rivers and construction of waterways will afford the most natural, permanent, and effective method of reducing and regulating the cost of transporting both our domestic and foreign commerce.

The saving in the cost of transportation to both the producers and the consumers of the country will, through cheaper and competitive freight rates, more than justify the expense incident thereto.

The opening of the Panama Canal, which will so greatly increase our facilities for trade with the Orient, and the awakened development of closer business relations with South American republics, emphasizes the question of water transportation as one of national and international importance.

All progressive nations have learned by experience the imperative necessity of using natural and artificial waterways for the movement of their products and have adopted a policy of systematic development of such waterways, and the time has now arrived when the United States, with greater natural advantages, must also recognize the function of the waterway system in the economic development of this country.

Events have shown the wisdom of the resolutions adopted at our last meeting, which we now reaffirm.

The National Government having assumed the control of the rivers, harbors, and waterways of the Republic, it owes the people the prompt and efficient discharge of such function: Therefore, be it

*Resolved*, That we urge Congress to appropriate not less than $50,000,000 annually for the improvement of rivers, harbors, and waterways, commencing with the present session of Congress.

I wish to say, Mr. Chairman, in this connection that each of these congresses possessed not a tinge of sectionalism or of partisan politics, but a common purpose in the interest of the whole country, regardless of section or of party adherence, animated all the delegates.

This is really a great nonpartisan, patriotic work in the interest of all sections and classes of citizenship.

The success of this movement has been greatly accelerated by two other causes. The first of these is the fact that for some years, led by the distinguished gentleman from Ohio as its chairman, the Committee on Rivers and Harbors has endeavored, individually and collectively, to so handle its work as to lift these appropriations out of the "pork-barrel" class. Earnest effort has been continually put forth to make the appropriations solely upon the merit of the project proposed, and to equitably apportion the total amount carried in the bill among the various meritorious projects in proportion to their relative importance and value to the country. Happily, this effort has been thoroughly successful, and but rarely has any adverse criticism in this respect been heard from any section of the country. The great press, so powerful in its effect upon public opinion, has almost universally recognized the fairness, the impartiality, the justice, and the wisdom displayed in recent river and harbor appropriation bills. Whether the chairman of this great committee shall continue at its head in the future or not, he has written himself a record in this character of legislation since he became chairman of this committee which shall be a deathless monument both to his ability and fairness.

The second of these causes is chiefly due to the present President of the United States, who precipitated the rate issue, which excited universal thought upon the great question of transportation, and from the question of the regulation of railroad rates the transition in the public mind to that of water transporation was easy, natural, and certain. The people, generally, began to think of the value of the improvement and development of rivers and harbors as a means of furnishing wider and cheaper freight transportation, and the immense productiveness of the country and the inability of existing methods of transportation to adequately handle these products widened and deepened this trend of thought in the public mind. Mr. Chairman, it takes but little investigation and thought to reach the conclusion that the positions taken in these resolutions are abundantly supported by the logic of the facts.

Of the many wise public utterances of President McKinley, perhaps his last public utterance at Buffalo, shortly before the happening of the tragedy which cost him his life, was the wisest and most comprehensive, in that he laid great emphasis upon the ever-increasing importance to this country of *markets*. For the last ten years the great law of supply and demand has been working overtime. The output of American factories, fields, forests, mines, and ranches has been increasing by leaps and bounds, and both the foreign and domestic demand seem to have more than kept pace in growth with this phenomenal increase in production. *Markets are meeting places of supply and demand, and transportation is the essential medium through which supply and demand join hands and work in unison for universal benefit.* Under the operation of this great law, in but little more than a decade this Republic has been changed from a debtor to a creditor people, practically every dollar of foreign indebtedness has been wiped out, and America is able now to loan money to the furtherance of great enterprises not only in its own bounds, but in other countries as well. There seems to be not the slightest evidence of any diminution in the outflow of our foreign commerce; on the other hand, it seems as certain as anything in the future can be that our exports, both in raw and manufactured products, must increase, as well as our domestic commerce. Hence it follows, logically, that transportation—the medium of access to markets, both foreign and domes-

tic—must press upon our attention with ever-increasing importance. Here, as in the whole domain of progressive civilization, the beneficent effect of the law of competition holds. The creation of additional ports, inviting interior competitive lines of railway, joining through these ports with competitive lines of steamships to various markets; competitive lines of boats along improved rivers and waterways, reaching these great ports, as well as market centers in domestic territory, plainly demonstrate not only the importance, but the imperative necessity of a progressive, liberal policy in the improvement of the ports, rivers, and waterways of the Republic.

Let no man doubt, Mr. Chairman, that this organized, educated public sentiment has come to stay. There will be no recession of this great movement, but it shall go on and on, gathering force, until every port, every river, every waterway susceptible of improvement in this great Republic shall be completed, and America will stand in this matter, as in many others, at the very head of the great progressive nations of the world. No money of the people brings so widespread benefit and so great an interest upon investment as the money thus expended. A splendid instance of the value to the whole people of this class of appropriations exists in my own State. A board of distinguished engineers, called upon only a few years ago to report upon the subject, gave it as their deliberate judgment, upon full investigation, that the expenditure of nearly $10,000,000 in the creation of a deep-water port at Galveston, in the State of Texas, saved the people upon their products in territory tributary to that port more each year than the total cost to the Government of the creation of the port. Certainly every business man in the country must be aroused to the importance and value of this character of appropriations when the showing is made of a dividend of 100 per cent per annum upon the investment. The report I have mentioned will be found in the Report of the Chief of Engineers for 1903, on page 1348. In passing I mention the fact that the last engineer's report shows that commerce passed through this port last year exceeding in value $525,000,000.

I wish to call special attention to some matters mentioned in the resolutions of the rivers and harbors congresses which I have heretofore quoted. It will be noted that they have declared for annual river and harbor bills. This demand is prompted by sound business judgment. Practically all other appropriation bills, especially where the work is continuing in character, are annual, for the obvious reason that such would be the course pursued by any business organization discharging such functions. Congress naturally gives attention each session to agriculture, to the Army, to the Navy, to the post-office, to all the great functions of government, and economy and efficiency would be promoted by a similar procedure in rivers and harbors appropriations. Undoubtedly it would be better that Congress should give annual attention and direction to this great work than that two or three years should elapse between the passage of such bills. Twenty-five million dollars appropriated each year for three years would produce, in my judgment, far better results than seventy-five millions appropriated every three years. I can not too strongly press upon the attention of Congress and the country this wise demand in these resolutions which emanated from an organization almost entirely composed of business men from every section of the country. It will be noted also that in the resolutions of 1901 this language occurs:

*Resolved*, That our great systems of internal navigation by the lakes and waterways of our country besides being so essential as great highways of commerce to the fullest development of our national resources are natural and effective regulators of freight rates, and we therefore urge their continuous and systematic improvement with liberal appropriations therefor.

That of January, 1906, declares:

Whereas the evolution of our transportation agencies has added to and emphasized other reasons for river, harbor, and waterways improvements, the cogent one being that such improvements exert a natural, proper, and permanent competitive effect on the cost of transportation, which is invaluable to our whole nation.

And that of December, 1906, declares:

We maintain that water competition is the best and surest regulation of freight rates. The improvement of rivers and construction of waterways will afford the most natural, permanent, and effective method of reducing and regulating the cost of transporting both our domestic and foreign commerce.

Mr. Chairman, these resolutions present a difficult and far-reaching problem. I am one of those who oppose the national ownership and operation of the transportation agencies of the country, whether on the water or on the land, and yet I believe that the sentiment in favor of national ownership and operation of railroads is growing so in the country as that nothing short of efficient governmental regulation of rates through State and national railroad commissions will check it.

I heartily subscribe to this course. I am proud of the fact that I was the first man in this Chamber on either side who gave his hearty approval, in an address to this House, of the first definite rate recommendation made to Congress by the present President of the United States. I gave my vote cheerfully in support of the recent rate legislation, but I believed then, and I believe now, that that legislation does not go far enough to meet the situation and to satisfy the demand of the country for relief.

If, as under the Hepburn bill, Congress can clothe the Interstate Commerce Commission with power to fix a rate on one railroad between two points, it can clothe the Commission with power to fix rates on all roads between all points, and this should be done. If it can clothe the Commission with power to fix a rate, it can also direct the principles and policies upon which this rate fixing shall proceed. More than that, it ought to declare its will under its power and leave as little exercise of power for the Commission as the circumstances will permit. In my opinion, rate legislation ought to be immediately passed, clothing the Interstate Commerce Commission with plenary powers to fix rates—with the power to value the various railroads of the country and to fix rates upon the basis of such valuation, so that a fair interest will be permitted upon the basis of such fair valuation; with the power to fix classification and to prevent any change thereof, so that the rate may not be changed by a change of classification on the part of the railroads, and providing that when such rate is fixed no inferior Federal court shall, by injunction, disturb the operation of the rate. But, Mr. Chairman, when all this shall be done, if it ever be done, still it will be true that under such perfect power, wisely exercised with justice alike to the railroads and to the people, the rate can not be as cheap as a water rate, and hence we can not escape this question in the improvement of rivers and harbors of the Republic: What consideration, if any, shall be given to the effect upon freight rates that will be produced by such improvements?

Here, as in many other instances, extreme views are taken. It is quite common to hear it said if this or that waterway is created, so long as it reduces rates, we don't care whether a single ton of freight is ever water borne or not. On the other hand, you will hear it said that rivers and waterways ought to be improved solely from the standpoint of the actual commerce which will be water borne by the improvement. In my judgment the truth lies between these two extremes. The first would be unjust to the railroads, for when the States have chartered railroads, and acting in good faith their owners have invested millions and built lines and developed the country, it is unjust to create an artificial waterway solely for the purpose of bringing freight rates down to a lower point than they could be forced by effective commissions under the constitutional rights of the railroads to earn legitimate profits upon a fair valuation of their property.

Nor would such action, if taken, be remunerative to the people unless the conditions exist, to which I shall hereafter allude, when I state what I conceive to be the proper basis of action, for the obvious reason that boats could not profitably maintain themselves in a competitive struggle with the railroads, and hence policy unites with justice against such action.

On the other hand, it would be unjust to the people to go to the extent of saying that the improvement of a river or a waterway must solely depend upon the amount of actual commerce to be borne by it, for if when it is improved the country tributary to it develops and the commerce is so augmented as that the railroads could meet the water rate, and do meet it, certainly the people are entitled to this natural, cheaper method of carrying their products, so that the wise, just view appears to me to be this: In the improvement of a river or the creation of a waterway the controlling question should be, Are there along its course quantities of heavy, bulky freight which can be moved slowly and which naturally could be more cheaply water borne than by rail? If so, with due regard to the value of the improvement, viewed from such standpoint and the cost of the improvement, such improvement should be undertaken, and the happy result will follow which has invariably followed the improvement of such rivers and canals not only in this country but in Europe; namely, cheapening the carrying of heavy raw materials, such as coal, iron ore, cotton, wheat, lumber, sand, brick, stone, and building materials, so stimulating the whole section and augmenting its production as that the railroads make up in increased passenger and fast freight traffic more than they lose by the carrying of all this heavy and slow-moving freight by water. In a degree it will be also true that a tendency to lower rates on all commerce carried will be produced, since, if the railroad rate is too high on any given product, the tendency will be to have it carried by

the same boats which carry these heavy, bulky, slow-moving freights.

Thus a happy, natural balance is struck, alike beneficial to the railroads and the people. Such I believe to be the wise middle course to be pursued in appropriating for the improvement of rivers and waterways, one which recognizes a competitive and yet cooperative utilization of all the means of transportation. In this country the waterway through the Great Lakes, the Erie Canal, the Mississippi and Ohio rivers are fine illustrations of this view. I hope ultimately to see the 14-foot channel from the Lakes to the Gulf and a 9-foot channel from the Mississippi River above New Orleans along the coast of Louisiana and Texas to Brownsville added to these.

Mr. Chairman, I have said, and I repeat it now with emphasis, that this class of appropriations should be and is nonsectional and nonpartisan; that they should be made and are made by the present committee upon the merit of each project regardless of the politics of the section contiguous to the proposed improvement; that an appropriation for the improvement of a port, a river, or a waterway should be made, and is made by this committee, alone from the standpoint of sound business judgment, and yet, unfortunately perhaps, there is a controlling factor which in the very nature of things is partisan and which there seems to be no way of avoiding. The great question, as a whole, of the amount of revenues and the amount of expenditures year by year is an administration question, to be determined by the dominant party, which is and should be held responsible by the people for its wise and efficient action. Naturally the leaders of the dominant party from the President down must discuss among themselves the various amounts which the various appropriation bills can be permitted to carry, and seek to bring the appropriations within the estimated revenues of the Government.

In this way the total amount of river and harbor bills, the question of whether they shall be annually passed, becomes a partisan question, and the only remedy I see is to so arouse and unite public sentiment and make it so universal and pressing as that no administration by any party can afford to thwart the will of the people, who, in fact, have no partisan feeling about this matter. This situation, coupled with the fact that when the committee attempts to make up a bill carrying a certain sum total it is confronted with the situation in which the approved and meritorious projects exceed by many times the total amount which can be carried in a single bill, brings up another perplexing and difficult question, which has caused, on the part of the ignorant and unthinking, the selfish and avaricious, many unjust criticisms against the committee and many bitter and groundless attacks upon its distinguished chairman. It must be perfectly obvious to every thoughtful man, who would be just, that under a condition like this the committee, and especially its chairman, must stand like a stone wall for an equitable apportionment of this total amount to be carried in the bill, among the different meritorious projects, regardless of sectional or political situations, and this involves a necessary consideration of the principles and policies upon which said equitable apportionment shall proceed. This is another difficult and perplexing problem, presenting many phases and many extremes. Let me illustrate one of the most common of these extremes; for instance, the lake people, with much pride, boast of their vast tonnage, approaching 50,000,00 tons, while the people of Texas, for instance, reply, "Yes, that's a magnificent tonnage, but its value is less than $500,000,000, while a tonnage flowing through the port of Galveston, of less than 3,000,000 tons, exceeds in value $500,000,000.

It will be seen that this situation, which can be verified by the last report of the Chief of Engineers, naturally suggests the controversy that on the one hand, in the apportionment of this money, it shall proceed upon tonnage and upon the other hand that it shall proceed upon value. The truth is that neither would be a fair method of procedure; that both the value and the tonnage should be taken into consideration, together with a multitude of other facts; for instance, the mere value of the tonnage, made up mainly of iron and coal, coming through the Lakes would not be a fair criterion of the value of the commerce to the whole country, for the bringing together of the raw materials at a cheaper rate so augments manufacturing enterprises as to bring a vastly increased benefit to the whole country not accruing in the case of the exports of wheat and cotton through other ports of far greater value per ton. It is my judgment that the apportionment of $83,000,000 in this bill among the different projects is the finest feature in this particular bill, in which it rises above any other similar bill in the history of the country.

Another question the distinguished chairman has brought forward in his opening address presenting this bill to the House is this: In making up this bill what policy should be pursued as would eliminate, either in amount or in entirety, certain projects; is it better to undertake to finish pending meritorious projects wherever the amount is within reasonable limits, rather than to widely divide and apply the total amount to all possible projects? Without a single dissenting voice the whole committee thought it was wiser business judgment to pursue the course of attempting in this bill to complete pending projects and to refuse to take up new ones except where extreme merit existed and completion was possible. I am thoroughly confirmed in this view myself, and feel certain that every thoughtful man will readily discern that by this method the country will get quicker returns upon its investment than by any other method possible under all the conditions. It is true that this course works here and there a hardship, but the conditions are such as that it is impossible under any method to appropriate the amount of this bill without working many hardships. The gentlemen from Pennsylvania who are clamorous for the construction of Lock and Dam No. 7; the gentlemen from Illinois and Missouri and other States who are so clamorous for the Government to undertake the 14-foot project from the Lakes to St. Louis, will, I feel certain, upon reflection realize that this bill has gone as far upon correct, sensible business principles and policies as could be expected, and that their hardship is one forced by the exigencies of the situation. They must bide their time, as many others are doing, and as many have done for many more years than they have borne their hardship or will likely have to bear them.

Permit me, Mr. Chairman, just here to say to my colleague in this Congress and to the country that heretofore the chief obstacle in the way of increased and annual appropriations for river and harbor improvements has been the narrow, local, sectional view of those interested in the various proposed improvements. This fact, in connection with the want of general information on the part of the public, has vastly retarded the progress of this work. If we are to have larger and annual appropriations, it must come through a wide recognition of conditions and a general union for the common good of all. Selfishness and narrowness must be submerged in a patriotic and businesslike procedure, by which finally all will get more, and get it quicker for each of their local improvements, than can possibly be obtained any other way.

Mr. Chairman, turning from a general view of the subject, I wish to say a few words touching Texas projects. It will be noted that the total of the Texas items, including the $100,000 for upper Red River and some other small items partly chargeable to Texas and in the bill under the head of other States, that the sum total for Texas in this bill is a few dollars over three million eight hundred thousand. Some one uninformed may say that Texas is getting more than her share. This is a mistake. The proportion of this amount to the total amount of this bill is considerably less than the proportion for Texas in the last bill and slightly less than in either of the two preceding bills. Not only that, but as a matter of fact at least three and possibly four of the Texas items are in no proper sense chargeable alone to Texas. The appropriation of $360,000 for Sabine Pass benefits more territory outside of Texas than in it. This situation is still more true of the port of Galveston, and Aransas Pass looks to far more territory outside of the State than in it.

Undoubtedly the improvement of the Trinity and Red rivers to Dallas and Denison, respectively, will have a marked beneficial effect upon the new State of Oklahoma. It is true that there are so many other projects which have been liberally treated that the total amount for the State is large, and I fear that Galveston and possibly Buffalo Bayou have suffered by reason of these facts. My own judgment is that more should be carried in this bill for both of these great projects. When the committee was making up this bill the facts touching the extension of the Galveston Harbor channel were not procurable, or I believe a larger appropriation would have been carried in this bill for that project. I trust these facts will be obtainable in time for an amendment increasing the appropriation for this channel to extend it further up the bay, so as to permit of the improvement of additional wharf property owned by the Rock Island–Frisco system of railroads, and which I am informed they would under such conditions immediately improve at great expense.

This is of vast importance because of the great increase of commerce at this port and the congestion of traffic at the busy season of the year. Perhaps no port in the history of the country in the last ten years shows so remarkable a growth. The commerce last year of this port, in and out, foreign and domestic, was in excess of $525,000,000, and, taking the figures to date, it is almost certain that at the end of this fiscal year

there will be a gain of over $100,000,000. This port already is the second in the United States in the value of exports, being exceeded alone by the great port of New York, and last year was fourth in total commerce, and, if my estimate proves correct, it will be a close competitor for second place at the end of this year in total commerce. We hope soon to see the Government undertake to give us 35 feet of water at Galveston, which we deserve upon any proper basis of comparison with Boston, Baltimore, and New Orleans. We have been patient about this matter, but we feel that by the time another rivers and harbors bill is made up that action should be taken along this line.

The appropriation in the bill for Sabine Pass was abundantly justified by the splendid showing of the great increase in commerce at Port Arthur. This furnishes, with the railroads running back into the interior from it, a most serviceable port to a large area of country, and to some extent competitive with the port of Galveston and its tributary lines.

The appropriation for Aransas Pass will be most gratifying, not only to all the people of southwest, west, and northwest Texas, but to those of Arizona, New Mexico, Colorado, and western Kansas and Oklahoma.

It is not generally known that a line drawn due north and south from Dallas would pass within a few miles of Aransas Pass, and that if the line of the Missouri, Kansas and Texas Railroad were extended in a straight line south from Smithville that it would strike within a mile of the town of Rockport, which is almost due north of Aransas Pass on the western shore of Aransas Bay, some 9 or 10 miles from the Gulf. In my judgment, this appropriation for Aransas Pass takes this port out of the domain of experiment and commits the Government to the making of a deep-water port there, and hence of necessity will attract the building of railroads to it and the ultimate establishment of steamship lines to European ports, thus affording another great competitive system of transportation, as against Galveston, Sabine Pass, and New Orleans, and cooperating with them competitively against all other ports to the immense benefit of a large territory with increasing population, engaged almost exclusively in the production of export products. No appropriation in this bill is more uniformly and emphatically sustained by the reports of the engineers of the United States, local, district, and Chief, as well as every board ever called upon to report upon it. With absolute unanimity all these officers and all these boards have said that Aransas Pass is the ideal place on the Gulf of Mexico for the creation of a great port. One board went even so far as to italicize their emphatic statement that the port was "worthy of immediate improvement." The board of review in its last report, under which this appropriation was made, specifically said that the commercial and industrial situation justifies the creation of a port on the Texas coast west of Galveston, and that Aransas Pass presents the most feasible place for the creation of such deep-water port.

The appropriations in this bill for the Red River, the Trinity, the Brazos, and the Guadalupe are gratifying, undoubtedly, to all persons interested in these improvements. I look to see immense benefit produced by their completion, especially of the improvement of the Trinity and the Brazos rivers. The head of navigation proposed, under the plan of improvement on the Trinity, is the city of Dallas, a splendid progressive city in the northern part of the State, and in the very heart of the richest agricultural section on the American continent. It is the distributing center as well as market of, perhaps, as many as two million people. Under present conditions freight rates both to and from Dallas are excessively high. Undoubtedly the establishment of navigation by water from Dallas to Galveston, via the Trinity River, will have a far-reaching effect upon these rates. Not only that, along the river are quantities of coal, lumber, and cotton, and facilities for the manufacture of brick and the quarrying of stone. These will maintain boats, locally, alone. With the exception of coal, the same situation is as emphatically true of the Brazos River, certainly as far north as Waco, which is a thriving, prosperous city near the geographical center of the State, and possibly much farther up the river than Waco.

The value of the improvement of the Guadalupe River is largely dependent upon the accomplishment of deep water at Aransas, or the extension of the inland waterway from Matagorda Bay to the Brazos River, so as to connect with the Brazos-Galveston channel, and thus give access to the port of Galveston. Undoubtedly the local advantages of this improvement, in connection with access to the bays south, east, and west, will justify the expenditure, but far greater benefits will accrue when connection with a deep-water port is established by one or both of the two ways I have mentioned. I confidently hope in the near future to see this inland waterway improved all the way east from Matagorda Bay to a connection with the Mississippi River through Bayou Plaquemine.

Such a waterway runs through the heart of as rich a country in both States as exists on the Western Hemisphere, or perhaps in the world. It runs through the very heart of the lumber, oil, rice, and cane sections of both States and reaches great sulphur and salt mines, and affords a tremendous market for the coal of Pennsylvania and West Virginia through the Ohio and Mississippi rivers, which would be not only a benefit to those States and increase the commerce for the great Ohio and Mississippi rivers, but would afford us in Louisiana and in Texas a better and far cheaper fuel than we can now obtain, a growing, pressing necessity for which exists in both States by reason of the increased demand for fuel on the one hand and a decreased wood and oil supply on the other.

In conclusion, Mr. Chairman, I wish to say to the Congress and to the country what few even in my own State realize, namely, the splendid situation in Texas with reference to waterway improvement, better than exists anywhere else within my knowledge; a vast fertile territory, lying upon the Gulf of Mexico, and susceptible of cultivation to the very edge of the salt water, with three great ports capable of being connected by the inland waterway, safe from storms, and all connected with splendid rivers, running north and south, reaching up into the interior of the States, of which the Trinity and the Red rivers reach its northern boundaries. What a splendid situation can be produced by the wise expenditure of the necessary money to improve all this possible water situation. When I think of this situation, of the favorable climate, of the splendid people, of the perfect distribution of its population, both in cities and in country, of its varied products, of its fertility, and of its splendid, patriotic history, it makes me proud of the fact that I live in the Lone Star State.

---

**The Late Hon. Rufus E. Lester.**

## REMARKS

OF

## HON. CHARLES H. GROSVENOR,

OF OHIO,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, February 10, 1907.*

The House having under consideration the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. RUFUS E. LESTER, late a Member of this House from the State of Georgia.

"*Resolved*, That, as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House at the conclusion of these services shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased"—

Mr. GROSVENOR said:

Mr. SPEAKER: I knew our honored friend from the time he came to Congress. He was especially interesting to me because of his relation to an interesting portion of the great South, a portion where I had served as a soldier at the close of the war and where I had many acquaintances.

RUFUS E. LESTER was a true type of the southern gentleman. He was affable, pleasant, always amiable, always genial. I did not become intimately acquainted with him until his service had ripened into a considerable experience. I found him to be a liberal man. I found him to be a man of more than average ability as a business man, a man of good judgment, and a man of pure character. He served in the Confederate Army, but he had become a loyal citizen of the United States. I have often thought, when considering such men as LESTER, what a tremendous sacrifice they made for what they believed to be the true principle of American manhood. I differed with them most earnestly. I was a young man at the beginning of the rebellion and looked upon the action of the people of the South as the most shocking and criminal which had ever occurred in our country. I had the true feeling of the average northern soldier, however, and came early to recognize the chivalry and manhood of the men who went to war for a principle which I believed to be criminal and which they believed to be patriotism. How they suffered, what they sacrificed, will never be adequately understood by the present and coming generations of man.

Once in my early experience as a soldier there came into my hands as an officer a large mail, many hundreds of letters, that had been captured on a train that was crossing a number of Southern States and carrying mail from place to place. It be-

came my duty to investigate that mail for the purpose of ascertaining as far as possible about the movements of the Confederate troops, and as I read I wondered. There were letters from wives to husbands, there were letters from mothers to sons, there were letters from sweethearts to lovers, and there were all kinds of business and social communications. They laid bare the sufferings of the people of the South. They laid bare the record of their sacrifices, their losses, their courage, their patriotism, their perseverance. I never hesitated to respect those people from that day to this; and I think that among the men most zealous then we have the men most loyal and faithful now.

It is a great thing to have lived from that period of turmoil, blood, and fire to this period of reconciliation, peace, and happiness. Our friend was a worthy type of the southerner then and a worthy type of the loyal American later on. He was intelligent, patriotic, wise, and no man ever came into contact with him who did not separate from him with respect.

I mourn his death. It was untimely, it was sad, it was tragic; but on the other shore he will be rewarded for his patriotism to his country, and no line of demarcation will be drawn between the acts he committed as the result of conscientious belief in the days of war and blood and in the days of peace and loyalty.

## Sundry Civil Appropriation Bill.

SPEECH

OF

# HON. JACK BEALL,

OF TEXAS,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, February 22, 1907.*

The House being in the Committee of the Whole House on the state of the Union and having under consideration the bill (H. R. 25745) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes—

Mr. BEALL of Texas said:

Mr. CHAIRMAN: For many years past Congress has been making an appropriation to cover the cost of transporting silver coins, including silver dollars, from the Treasury to the various sections of the country where silver coins are needed to meet the demands of business. Last year, for the first time, the sundry civil appropriation bill, in which this item has been carried, omitted the silver dollars from the coins to be carried at Government expense, but an amendment was adopted while the bill was being considered in the House which restored the silver dollar. The committee has again omitted the appropriation for the silver dollar, and the gentleman from Ohio [Mr. KEIFER] has offered an amendment which, if adopted, will continue the long-established policy of keeping the silver dollar in circulation at Government expense.

Mr. Chairman, the appropriation last year for this purpose was $120,000, and it has been scarcely sufficient. This appropriation is necessary to keep in circulation among the people the 83,000,000 silver dollars and the $120,000,000 of fractional silver that are now in circulation and needed there to meet the demands of business. The real issue in the amendment is whether we will continue to use the silver dollar. The chairman of the Committee on Appropriations on yesterday stated that the committee would ask that sufficient appropriation be made to care for fractional silver coins. Fractional silver would to a large extent remain in circulation without any appropriation for its transportation at Government expense, but the silver dollar will not. For change less than one dollar the banks are compelled to use fractional silver. Unless we return to the "shinplaster" of the seventies, there is no other kind of money available for small change. For the accommodation of their customers demanding money of a denomination less than one dollar the banks would be compelled to keep a supply of fractional silver coin even though they were forced to pay the charges of transportation. The failure to transport this fractional silver at Government expense would probably result in reducing the amount that would remain in circulation, but it would not retire all of it. With the silver dollar the case is different. It is possible for the banks to meet the demand for dollars by paying out the one-dollar bills. The silver dollar is heavy. One thousand silver dollars weigh a little less than 60 pounds, and the average cost of carrying them is about $2.15. The cost of carrying the same quantity in value of paper money is only a small part of the cost of carrying the silver. If you require the banks to pay the cost of the silver transportation, the inevitable result will be that they will demand the paper money and the silver dollar will remain in the Treasury.

The silver dollar could still be used in certain sections of the country conveniently located to one of the subtreasuries; but it so happens that in these sections the silver dollar is not needed now and is almost entirely out of circulation.

It makes no difference to the people of this city whether or not this appropriation is made, because the silver dollar is not used, and if it should be, the Treasury of the United States is here. The people of New York, Philadelphia, Baltimore, Boston, Chicago, and St. Louis are not concerned about it, because there is a subtreasury in each of these cities, and the silver dollar can always be procured. But the case is different with the West and South. Take the great stretch of country west of the Mississippi River, constituting two-thirds of our entire area, and destined in time to have superiority in wealth and population, and it has but one subtreasury, and that is at San Francisco, upon the shores of the Pacific Ocean. That great section which lies east of the Mississippi and south of the Ohio has but one subtreasury, and that is at New Orleans. A majority of the subtreasuries are upon the Atlantic coast of the New England and Middle States, and there is one within 100 miles of all the people of these States. With some of the Western States it is 1,500 miles to a subtreasury, and with a great part of the South it is several hundred miles to one.

I have recently had occasion to investigate this matter in an attempt to secure a subtreasury at Dallas, Tex., to serve the people of that State and the people of Colorado, New Mexico, Oklahoma, Indian Territory, and Arkansas. I have the indorsement of a majority of the representatives of that great area in both the House and Senate; I have hundreds of letters from bankers and business men of all kinds urging upon the Secretary of the Treasury that he give this proposition his approval, but he has declined to do so. The Secretary bases his refusal upon the statement that the "interests of the Government do not require it." If the Departments here at Washington constitute the Government, if the various agencies forming the governmental machine operating in various sections are alone considered, this may be technically true; but if this is really a government by the people and their interest is the interest of the Government, then the Secretary of the Treasury is entirely wrong. It is not specially in the interest of the "Government" as a "government" that many appropriations are made. The interest of the "Government" does not require the delivery of mail in either city or country, but the convenience and interest of the people demand that this be done. The interest of the "Government" did not require that there should be enacted a law for the inspection of meat products or for the regulation of railway rates, but the interests of the people required both, and Congress has given both.

It is equally true that the West and South need more and better financial facilities for carrying on their vast business affairs. In certain seasons of the year we feel very keenly our remoteness from the centers of money supply. The nation looks to the wheat fields of the West and South for bread and to their herds for meat, but yet the nation furnishes to the West and South no adequate financial facilities for marketing these products. The world looks to the cotton fields of the South and the ranches of the West for the fibers with which it is clothed, but these sections are now denied the conveniences and even the necessities for their proper production and marketing. Present conditions are bad enough, but the defeat of an appropriation to carry the silver dollars from the Treasury to the people who want it will result in its retirement and further inconvenience to the people. It seems that this is the purpose of the majority here. While there has been no avowed determination to destroy the silver dollar as a circulating dollar, this will be the effect of the final defeat of this appropriation. Let me say that the old silver question of ten years ago is not involved in this controversy. The single gold standard is now established, and so long as the supply of gold remains sufficient to afford an increase of circulation proportionate with our increase of population it is not likely to be disturbed. The proposition here is not to coin more silver dollars, but to keep the ones we have in circulation.

Mr. Chairman, the people of the South use the silver dollar in their smaller business affairs. Tradition, interest, and preference all unite in making it a favored servant of trade. The people who labor prefer it to the paper bill. It is cleaner; it is more easily counted, harder to lose, and easier to find. There is a melody about its jingle that soothes our spirits. With enough in our pockets to rattle, we are at peace with all mankind and look with pity alike upon plutocrats and paupers. To the darky in southern cotton fields it is the very breath of existence. To him it is the key that unlocks the door to cakewalks and crap games innumerable. Without a "wheel" in

his pocket he is a social outcast, denied recognition in the inner circles of the dusky four hundred; with one, he is the petted leader of "Coontown" and the champion manipulator of the "come seben and eleben" bones. This argument ought to appeal to certain philanthropic gentlemen of this House.

But the gentleman from Connecticut [Mr. HILL] is overwhelmed with fear lest the banks derive some benefit indirectly from this amendment. My observation has been that the banks are usually able to protect themselves under any conditions. They are not conducted as charitable institutions. If the defeat of this amendment imposes any obligation upon the banks to pay the charges for transporting silver, they will very promptly transfer the burden to the people, and in the end the people who want silver dollars will pay the expense. But this is an unusual and novel rôle for the gentleman from Connecticut to play. It is the first instance within my knowledge of such tender solicitude upon his part. Last year he appeared as one of the champions of a financial measure that proposed to open the Federal Treasury to national banks, and before this session ends he will probably repeat the performance.

There is to-day in the hands of certain favored national banks the sum of $150,000,000 belonging to the people of this country. It is money wrung from them by Federal taxation and loaned to the national banks by the Secretary of the Treasury without interest. It is now proposed to give legal sanction and authority to the Secretary of the Treasury to do that which he has heretofore done without authority. Last year this House adopted an amendment which required the payment of interest upon these deposits. As soon as this amendment was adopted, gentlemen who are now furiously assailing this proposition pigeonholed the Fowler bill, because its passage would have either taken this money out of the vaults of Wall street bankers or it would have required them to pay several million dollars annual interest. The very gentlemen who are now clamorously protesting against the Government serving the interest and convenience of the people by keeping the silver dollar in circulation will probably before this session ends clamor just as vigorously for legislation that will empty the money of the Federal Treasury into the vaults of the national banks. If this is done, it will be the crowning act of infamy of that party whose record is full of infamy.

Fifteen years ago you denounced as anarchists and ridiculed as lunatics the farmers who sought to borrow money from the Government. These farmers were willing to give as security the products wrung from the soil of mother earth by their toil. You are now proposing to give the money belonging to all the people to the gamblers of New York upon security the product of speculation and greed. Populism asked no money of the Government except upon payment of reasonable interest, while you now propose to loan $460,000,000 of the Government money to the sharks of Wall street and you refuse to permit them to pay interest. Democracy then said that it was wrong to loan the money of the people, even to those in need and for fair interest, and it now denounces as infamous this proposal to take money from those who need it to pour it into the laps of those who revel in greed and stink in corruption.

## The Ship-Subsidy Bill.

### SPEECH
OF
### HON. HERBERT PARSONS,
OF NEW YORK,
IN THE HOUSE OF REPRESENTATIVES,
*Thursday, February 28, 1907,*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce.

Mr. PARSONS said:

Mr. CHAIRMAN: The computations made by the gentleman from Illinois [Mr. WILSON] seem not to have been critically examined by Members, and, therefore, to have astonished them by the great profits which apparently the line to Buenos Ayres would make. An examination of those figures will show that they are greatly in error, and instead of a profit the company that contracts for that route will, after paying expenses and receiving the subvention, have a large deficit, which it must make good from passenger fares and freight receipts.

The basic figures of the gentleman from Illinois [Mr. WILSON] I will not dispute, but, on the contrary, will make use of to prove this point. Before applying them, however, there are several things to consider. The route, as he speaks of it, calls for twenty-six round trips a year with $800,000 subvention. Continuous steaming from New York to Buenos Ayres and back, at the rate of 16 knots an hour, would take thirty-one days. In addition, there must be allowed two weeks a trip for loading and unloading and coaling at the ends of the route. Such fortnightly service would require five ships. The allowance that the Canadian Pacific Railroad Company makes for its *monthly* trans-Pacific service from Vancouver to Japan and Hongkong, which is a 16-knot service, and which is almost exactly the same distance as that from New York to Buenos Ayres, is three ships. The wages on these ships will be continuous. There will not be much lay up for the ships at either end. Coal burning, however, would not be necessary continuously on each ship throughout the twelve months of the year. But if we take the minimum figures, the coal for the twenty-six trips would be twenty-six times thirty-one days' coal.

Something must be allowed annually for depreciation, and I think the gentleman from Illinois and others will admit that 5 per cent is not an unreasonable amount. The ships built in American yards would cost probably $800,000 each, and the five ships would thus cost $4,000,000.

Let us then apply these considerations to the figures of the gentleman from Illinois [Mr. WILSON]:

| | | |
|---|---|---|
| The wages for one ship for one month would be | $4,206.30 | |
| The wages for five ships for one month would be | 21,031.50 | |
| The wages for five ships for twelve months would be | | $252,378.00 |
| Food on one ship one month | $2,243.00 | |
| Food on five ships one month | 11,215.00 | |
| Food on five ships twelve months | | 134,580.00 |
| 110 tons of coal per day, at $3.40 per ton, for one round trip of thirty-one days | $11,220.00 | |
| Coal for twenty-six round trips of thirty-one days | | 291,720.00 |
| 5 per cent allowance for depreciation | | 200,000.00 |
| Total | | 878,678.00 |

In addition to the foregoing, allowance must be made for repairs, insurance, port charges, docking facilities, office rent and general expenses, and advertising. The docking charges alone at New York would cost $30,000 a year. The rent of a suitable office would cost half that amount. If we allow half as much in Buenos Ayres for similar expenses, we have a total for dock and office rent of $67,500. Then there are the numerous office expenses to be added. At least an equal amount will be needed for them. The cost of insurance and advertising I do not know. For repairs 1 per cent would seem to be a minimum.

| | |
|---|---|
| Adding to the preceding total of | $878,678 |
| These items, viz: | |
| Rent and dockage charges | 67,500 |
| Office expenses | 67,500 |
| Repairs | 40,000 |
| We get as a total | 1,053,678 |
| But the subvention would only be | 800,000 |
| Leaving a deficit of | 253,678 |

in one year, without having made allowance for insurance, advertising, or for interest on money borrowed or invested.

Instead, therefore, of a profit of $3,398,382 in ten years, as claimed by the gentleman from Illinois, there would in that period, despite the subvention, be a deficit of $2,536,780, which must be made up by passenger fares and freight rates. Let us hope that it will. But such results can not be expected at once. It will probably be several years before both ends are meeting. Even when the deficit already mentioned has been made good there will still be the necessity of earning a return on the investment, which must be made and which will exceed $4,000,000. It would be unreasonable to ask anyone to venture into this business without a profit of at least 6 per cent. Even that rate of profit, considering the risks, could only be risked by those who could afford to lose the money. But assume that 6 per cent is the profit to be made, then the amount that must annually be earned from passenger fares and freight rates is not $253,678, but $493,678. Wherein did the gentleman from Illinois err? He erred in two ways. He mentioned repairs and wear, but did not provide for them, though they are large items. And he assumed that one ship could make all the twenty-six trips.

A great deal is said about free ships. A study of the figures that I have given will show that free ships would be no solution. Admitting, as contended by the opponents of the bill, that the cost of building the ships abroad would be only 60 per cent of what it is here, then the cost of the five ships mentioned before would be not $4,000,000, but $2,400,000. The 5 per cent allowed for depreciation would be $120,000 instead of $200,000; that is, the amount allowed for depreciation would

be $80,000 less than I have allowed above. But the total annual expense would be, as I have shown above, at least $1,053,678, and the saving by free ships would be only $80,000, or less than 8 per cent of the expense. Even if we had free ships then, if the same percentage of subvention were to be allowed, it could only be reduced from $800,000 to $736,000.

The figures given above have been applied only to the monthly route to Buenos Ayres, inasmuch as that was the route upon which emphasis was laid by the gentleman from Illionis [Mr. WILSON] in his speech. But the application will lie to all the routes in the bill.

## Increase of Salaries for Senators and Representatives.

SPEECH

OF

# HON. THOMAS W. HARDWICK,

OF GEORGIA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, December 14, 1906,*

On the bill (H. R. 21574) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

Mr. HARDWICK said:

Mr. SPEAKER: The proposition of the gentleman from New York [Mr. LITTAUER] ought to be clearly understood both by this House and by the country. It is not the increase of the salaries of the Members of the present House. If it were it would not receive the support of a corporal's guard. It is not to increase the salaries of the Sixtieth Congress, to which many of us have already been elected. If it were there are many of us who would be unwilling to vote to increase our own compensation, and unwilling to put ourselves in the attitude of having been elected to an office at a salary fixed by law and then by our own votes having increased that salary.

The proposition of the gentleman is to increase the compensation of the Members of the Sixty-first Congress, to which none of us belong, to which many of us will not be elected, and to which none of us can be elected until the people have passed not only on this but on every other act of our legislative careers. I assume, then, that we may proceed to discuss and act upon the pending proposition with the certain knowledge that the American people, who, in the main, are always fair and just in their judgment, will acquit us of selfishness, of greed, and of avarice, and will understand that there is nothing of a "salary grab," either past, present, or future, involved in the determination of this question.

The plain question, freed from all personal considerations, is whether or not the present salaries of the Members of Congress should be increased?

I propose by my vote to-day to answer this question in the affirmative, and I wish to briefly state some of the reasons that control my actions.

1. The amendment of the gentlemen proposes to make the salary $7,500 per annum, beginning March 4, 1909, and to cut off all mileage allowances, substituting therefor the actual traveling expenses of the Members in going to and from the capital to their homes once each session. The elimination of the mileage allowance will be a considerable saving, to be credited against the $2,500 increase, exactly how much I have not figured. Most important of all it will c ualize salaries as between Members themselves. To illustrate, the Delegate from Hawaii receives, so I am informed, about $2,300 per annum for mileage. His expenses in traveling to Washington and back from Honolulu, once each session, will not exceed $300, leaving him really with a net compensation of $7,000 per annum. My mileage amounts to $261.20 per annum, and my expenses in traveling from my home to Washington and back, once each session, will not exceed $61.20, leaving me with a yearly compensation of $5,200, as against $7,000 received by the gentleman from Hawaii. This same inequality, in varying degrees, exists between all the Members, and one great merit of the proposed amendment is its abolition.

2. Since the present compensation of Members of Congress was fixed (1874) the expenses of living have increased enormously all over the country, and especially, I think, here in Washington. It is almost impossible for any Member of Congress, who has even a small family, to bring his family with him to the sessions and support them in even moderate comfort upon the salary. Any decent and respectable hotel in this city will take all, or nearly all, of his salary, for board alone. In fact, numbers of the poorer Members are unable to bring their families at all, or, if they do so, find themselves involved in debt, which they must economize and save during all the recess to meet. The American people are both prosperous and generous. They do not desire to see their public servants starve or become laden with burdensome debts. I believe they are not only able, but willing, to pay living wages for honest service.

3. I am unalterably opposed to a niggardly, parsimonious, "penny-wise" policy of paying public salaries, or any other salary for that matter. There is no real economy in it. There in no wise policy back of it. In my judgment, many wealthy corporations and individuals make a great mistake in paying to men whom they trust with large sums of money and with responsible positions such niggardly salaries that first debt and then temptation to the employee comes. In the public service the States and nation must pay reasonably fair living salaries or they will be forced to draw their servants from two, and just two, classes—the rich, leisure class and the practical politician, with his hand always behind him. I am opposed to seeing this Government controlled by either class or by a combination of both. I shall never by my vote or voice aid in closing or keeping closed the gates of a laudable ambition to enter the public service upon any man simply because he is poor, has no money, and can not afford to enter public life and can not honestly make a living in it.

On the contrary, I do now and shall always favor the paying of reasonable compensation to public servants, so that men without financial means, but honest, capable, and clean, can serve in all branches of the public service.

If I had the power to do so, I would gladly couple to this amendment a provision that no Senator, Representative, or Delegate in Congress should be allowed by law to represent, either as agent, officer, employee, or attorney at law any person, firm, or corporation that is asking or receiving any special legislative favor or privilege from the Government of the United States. I would pay the Members enough to live on and then require them by law not to accept employment of the character above specified from anyone. If conditions do not require such a provision, certainly it could do no harm. It could no more be construed as a reflection upon Members of Congress than are the existing laws against bribery or against their making contracts with the Government a reflection on them. If such a provision were added to this bill and the salaries of the Members were increased on that condition, I have not the slightest doubt that our action would be enthusiastically approved by a great majority of the people of the United States.

## Legislative, Executive, and Judicial Appropriation Bill.

SPEECH

OF

# HON. JAMES O. PATTERSON,

OF SOUTH CAROLINA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, December 14, 1906,*

On the bill (H. R. 21574) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1908, and for other purposes.

Mr. PATTERSON of South Carolina said:

Mr. SPEAKER: I have listened with much interest to the gentlemen who have addressed this House upon the pending question of increasing the salaries of the Members of Congress, and while I have enjoyed listening to the able and forceful arguments delivered by the distinguished gentlemen who have preceded me, I must say that I am not convinced that it would be right or proper for me to vote for the amendment increasing our salaries.

I was opposed to, and voted against, the amendments passed by this House to-day increasing the salaries of the Speaker, Vice-President, and Cabinet officers from $8,000 to $12,000. I voted against the increase of these salaries because, in my opinion, the present salaries as now provided for these officials are sufficient and should not be increased.

The question now before the House to increase the salaries of Congressmen is one affecting personally each individual Member of this House who hopes or expects to be elected to the Sixty-first Congress, and there are, in my opinion, but a few who have not the laudable desire and ambition to come back here and continue to serve their constituents in the Sixty-first Congress. To me it is a very delicate matter, that of fixing and increasing my salary as the Representative of the Second Congressional

district of South Carolina. I sought this place for the reason that I desired to have the honor of representing my district on the floor of this House and not for a pecuniary consideration or for any mercenary motive, and at this time to undertake to increase my salary and compensation, even though it be in an indirect manner, by voting for the increase for the Sixty-first Congress, of which I hope and expect to be a Member, would be giving the lie to my actions and utterances and would be doing violence to my conscience and debasing my sense of right and self-respect. Since the time of the constitutional convention of 1787 this question has been debated and discussed, and even the framers of the Constitution debated the question for some time as to whether Senators and Representatives should receive any compensation at all; and, if so, by whom they should be paid, whether by the States or by the United States Government. It was finally decided, after a divided vote, that their salaries should be fixed by Congress and that they should be paid out of the Treasury of the United States. The salary of Congressmen has been changed from time to time, commencing as it did with the First Congress at a small per diem and mileage. It was afterwards changed to a salary, which has fluctuated from $1,500 to $7,500 and mileage. The present law fixing and regulating the salary of Congressmen was passed by the Forty-third Congress, in 1874. In the year 1873 the act commonly called the "back-salary-grab act" was passed. This act increased the salary of Senators and Representatives from $5,000 to $7,500. Although this act was passed during the last hours of the Forty-second Congress, it was made retroactive and covered the two past years of the Forty-second Congress. The so-called "back-salary-grab act" would in this day and generation be called "graft." To some, no doubt, the present amendment will, if enacted into law, have the odor of graft, though I do not believe that any of the honorable gentlemen who advocate the amendment are actuated by any but the best and purest motives.

The next Congress changed the salaries and fixed them at $5,000 per annum. This was in 1874 and is the law now of force. Salaries are either high or low by comparison. The citizens of my district and State are not, and have never been, accustomed to high or exorbitant salaries, and the highest salary paid to a State official in South Carolina does not exceed $3,000, and that includes the governor and supreme court judges, and other States' officers receive even less than that. In my individual opinion these salaries are too low, but the State, as a whole, seems to be satisfied that their officials receive sufficient remuneration, as the legislature has not seen fit to increase them, though suggestions have been made to that end from time to time for several years past, and I have been in sympathy with the suggestion to increase their salaries.

Mr. Speaker, my chief aim and desire is to represent my constituents on the floor of this House—to truly represent them. I realize the responsibilty and will endeavor in this instance, as I have in all others, to act up to the highest standard of right, honesty, and justice, and in doing so I feel it to be my duty to vote against this amendment. I am proud of my position here upon this floor, representing a great and noble people, who in intelligence and progressiveness are second to none in this great Republic; but my district being mostly an agricultural country there are no millionaires and no very rich people, but mostly people of moderate means, who do not indulge in extravagant habits or high living, but are frugal, honest, and industrious, and to them an increase of our present salary would mean an unwarranted and extravagant expenditure of the people's money. Believing, as I do, that the voice of my people would be against this amendment, I, as their Representative, am bound to vote against it, and will hereafter, as I have done in the past, content myself with the salary I am now receiving, which enables me to live economically and modestly, but respectably, with my wife and children with me a part of the time in this city. I prefer the confidence and respect of the good and true people whom I represent to the money and wealth which might come to me by doing what I conceive to be wrong. I cast this vote honestly and conscientiously, believing that in so doing I represent the voice of my constituents, whom I am endeavoring to faithfully serve, and I trust that this amendment will be killed, and that this large sum of money, thus sought to be converted to the private uses of Congressmen and Senators yearly for all time to come, shall be appropriated by this Congress to the improvement and development of our country in such manner that the South shall receive her just and proportionate share, of which she has been so long deprived. I am in favor of but one increase of salary, and that is for the rural free-delivery carriers, whose compensation is entirely too small and not commensurate with the services they perform. I introduced a bill, which is now in the hands of the Committee of this House on Post-Office and Post Roads, providing for an increase of their salaries to $1,000, and I ask the careful consideration of every Member of this House to that bill, and I am satisfied that the fairness and justice of this claim for increased compensation will appeal to all fair-minded men.

---

**The Late Representative Hitt.**

## REMARKS

OF

# HON. HENRY D. FLOOD,

OF VIRGINIA,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, February 17, 1907.*

The House having under consideration the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. ROBERT R. HITT, late a Member of this House from the State of Illinois.

"*Resolved*, That, as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of these exercises, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased"—

Mr. FLOOD said:

Mr. SPEAKER: The tradition of Diogenes lighting a lantern at midday in Athens and announcing that he was searching for a man naturally provokes a smile. But Diogenes was by far too profound and earnest a man to be associated with the ridiculous. What the rigid philosopher meant was that he was upon the search of a man who regarded things intrinsically, and shaped his life accordingly.

I believe he would have ended his quest had he met with ROBERT R. HITT.

The entire career of our departed friend and colleague was concerned with large and vivifying and inspiring matters. He was saturated upon the very threshhold of his manhood with that wonderful debate between Lincoln and Douglass—alike dramatic and fraught with tremendous results. His subsequent life got its trend from that season of intimate association with those mighty reasoners.

The congenial studies to such a spirit were large questions with large relation. His varied experience for many years served to sharpen his faculties and to broaden their range.

Mr. HITT served during the momentous revolution in a confidential capacity to that colossal war minister, Edwin M. Stanton. During those exciting years succeeding the downfall of Napoleon the Third he was secretary of the legation to France. Afterwards he was assistant to Blaine in the Department of State.

What a unique and splendid career. One to dazzle and turn the heads of most men—ROBERT R. HITT they only steadied and sobered.

How well qualified he was for the discharge of his difficult duties upon the Committee on Foreign Affairs; how admirably did he discharge those duties; how perfectly, as if by processes of nature, he measured up to all of the requirements exacted of him; how enviable was he throughout his entire career, and yet without ever exciting envy, so true and modest and lovable a gentleman he was.

Mr. HITT was an incessant student of generous and stimulating topics. The value of such studies is inestimable. Cicero declared in a kindred case: "These studies foster our earlier years, afford delight in our later years, adorn us in prosperity, prove a refuge and a solace in adversity. They impart gratification at home; they embarrass not abroad; they are with us during the vigils of the night; they roam with us in foreign lands, and are our companions amid the retirement of rural scenes."

Mr. Speaker, eloquent and touching tributes are being paid to our friend. His long and versatile career is being happily and faithfully delineated. But the highest tribute paid to him is the unvaried testimony to his unselfish and disinterested kindliness. Who that has known it does not cherish its memory with gratitude and admiration?

His unobtrusiveness, his self-poise, his sympathy, his companionableness were based upon the profound intuition of justice. With an ingenuous but not overawing estimate of his own merits he generously responded to those of others, and there was a frankness and simplicity in his greeting and intercourse that stamped the genuineness of the man.

He ever "wore without reproach the grand old name of gentleman."

Mr. Speaker, justice is indeed a high attribute, if not the very highest. The ancient mythologists call it the "offspring of heaven and earth." Its supremacy in any human breast signalizes a noble nature. And when to this exalted quality are added gentleness and modesty, kindliness and sympathy, fellowship and helpfulness, we then indeed recognize a creation "where every god doth seem to set his seal to give the world assurance of a man."

ROBERT R. HITT has fought his fight and finished his course. He did generous service throughout, for which his State and the Republic will always hold his name and memory in high honor.

We will sorely miss him, and the one consolation we have is that his district has sent to this House as his successor one who measures up in so many ways to the high standard set by his predecessor.

Every valuable and earnest career is a long conflict. In this conflict Mr. HITT came off conqueror.

He has laid his armor down, and "fallen upon sleep."

The knight's bones are dust,
And his good sword rust;
His soul is with the saints, I trust.

---

**Life and Character of the Late Senator Bate, of Tennessee.**

ADDRESS

BY

## HON. M. G. BUTLER,

OF TENNESSEE,

IN THE HOUSE OF REPRESENTATIVES,

*Sunday, January 20, 1907.*

The House having under consideration the following resolution:

"*Resolved*, That in pursuance of the special order heretofore adopted the House proceed to pay tribute to the memory of the Hon. W. B. BATE, late Senator from the State of Tennessee.

"*Resolved*, That as a further mark of respect to the memory of the deceased and in recognition of his distinguished career and his great service to his country as a United States Senator, the House, at the conclusion of the memorial proceedings of this day, shall stand adjourned.

"*Resolved*, That the Clerk of the House communicate these resolutions to the Senate.

"*Resolved*, That the Clerk of the House be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased"—

Mr. BUTLER of Tennessee said:

Mr. SPEAKER: In the remarks which I shall submit on this occasion I do not propose to enter in detail into the history of this great and good man, whose death we so much deplore and whose memory we have met to commemorate. His life and character, both civil and military, has been so ably and reliably depicted by gentlemen who have preceded me it would be simply a matter of repetition for me to dwell upon it. But as the distinguished Senator was born and reared in the county of Sumner, in the district which I have the honor to represent in this House, I feel that I should bear testimony of the high esteem in which he was held by those who knew him best and had shared his hospitalities in peace and with him the trials and dangers of war; those who responded to his commands on the bloody historic fields of Shiloh and Chickamauga and who with a fidelity akin to worship have ever rallied to his standard since that time, until they lovingly but sadly laid him to rest on the 13th of March, 1905. Truly those people admired him as perhaps they did no other man; nor was this admiration undeserved, because with them he was as a brother, ever ready to extend a helping hand in time of distress and by his example and influence led them on to a higher and better life.

He was perhaps more widely known than any man in Tennessee, and, on account of his heroic valor, his undaunted courage, his sterling integrity, his patriotic devotion to his country, his self-sacrificing disposition, his loyalty and fidelity to his friends, his unswerving adherence to principle, and his Christian character, none knew him but to love him. I had the honor of an intimate acquaintance with him from my early manhood up to his death, and can say without exaggeration a more courteous, affable gentleman I never met. He was the soul of honor—a true type of genuine southern manhood, with which the country of his nativity so richly abounds. He was ever grateful to his political friends and tolerant of those who chose to oppose him, always conceding to others what he claimed for himself—honesty of purpose.

His heart went out in sympathy to those in distress, especially to those who wore the gray and shared with him the trials, privations, and dangers of that terrible conflict between the States, in which he played such a prominent part, as shown from the records of the War Department and statements of gentlemen on this floor.

It is needless to say those old soldiers loved him as a brother, because they demonstrated their devotion and confidence in him when they rallied to his standard almost to a man in the hottest political campaign Tennessee has witnessed for many years, in which he was triumphantly reelected to the United States Senate only a few months before his death. It was said in that campaign that he was too old to longer make an efficient Senator, but the response came quick and fast, "Let him die in the harness," and so he did.

Tennessee mourns the loss of her distinguished son, and well she may, because with that same courage and patriotism displayed on so many hard-fought battlefields he was ever on the watchtower looking after the interests of his beloved State and the people who so often, but so deservedly, honored him. In the death of Senator BATE Tennessee has lost one of her most gifted and loyal sons and the nation one of its most efficient and trustworthy Senators. As a Senator he was ever at his post of duty, faithful to the trust his people had reposed in him, zealously guarding the interests of the nation with an ability and firmness worthy of the high position.

His ashes rest beneath the sod of Tennessee, and his name and memory will live in the hearts of his people.

---

**The Ocean Mail Bill.**

SPEECH

OF

## HON. EDGAR D. CRUMPACKER,

IN THE HOUSE OF REPRESENTATIVES,

*Wednesday, February 27, 1907,*

On the bill (S. 529) to promote the national defense, to create a naval reserve, to establish American ocean mail lines to foreign markets, and to promote commerce—

Mr. CRUMPACKER said:

Mr. CHAIRMAN: The shipping bill is one of much importance to the country, as it bears upon the vital questions of the national defense, the promotion of commerce and the political development of the Western Hemisphere, and, incidentally, the promotion of the American merchant marine. The policy of the bill is not new in the legislation of this country. Many years ago Congress passed laws authorizing the Postmaster-General to enter into contracts with steamship companies for the establishment of regular ocean mail lines between ports in this country and foreign countries. The late President Harrison was an ardent advocate of that policy, and in pursuance of his recommendation Congress passed an act which was approved on the 3d of March, 1891, authorizing the Postmaster-General to contract with steamship lines on a fixed basis of pay for the carrying of mails to foreign countries, and the present bill provides simply for the expansion of the policy contained in that act.

OUR FOREIGN CARRYING TRADE.

Our merchant marine engaged in the foreign trade is in a most unsatisfactory condition. The ocean carrying trade in the export and import business of this country is of the value of about $200,000,000 a year, and 90 per cent of all that trade is carried in foreign bottoms, and only 10 per cent is carried in boats of American register and sailing under the American flag. It is the desire and hope of every citizen of the Republic that some time there will be a rehabilitation of the American carrying trade and that American ships, manufactured in American shipyards, out of American material, by American labor, will carry a large percentage of American export products to foreign markets. In recent years an active interest has been aroused for the upbuilding of our merchant marine, and numerous schemes and propositions have been advocated with that end in view. Most of these propositions have been coupled with provisions for the payment of bounties and subsidies out of the Treasury of the United States to steamship companies either upon a speed or tonnage basis or both. I have always opposed those propositions and am opposed to them now. While I would be glad to have American deep-sea shipping grow into prominence and prosperity, I am not willing to vote money out of the public treasury and pay it to steamship companies simply for the privilege of having American products carried to foreign markets in American ships.

Everyone acquainted with existing conditions knows that whenever the business of ocean transportation becomes sufficiently profitable American capital and American enterprise will engage in it. The reason we have so little over-sea shipping now is that our capital and our labor find more profitable employment on shore than on the sea. All of the propositions for the building up of our foreign carrying trade have been coupled with provisions requiring American ships to be officered by American citizens and a considerable percentage of the crew to be Americans. It is impossible to secure American officers and crews at the low rate of wages commonly paid by foreign steamship companies, and if American wages are paid to officers and crews on American ships those ships will be at a great disadvantage and can not successfully compete on the high seas with foreign lines.

The ocean shipping trade is of stupendous magnitude, and ship companies provide for its accommodation wherever it may be developed. The people of the United States can secure transportation of products to and from foreign countries much cheaper under existing conditions, by engaging in profitable production, than by withdrawing capital and labor from such production and embarking in shipping in the face of disastrous and even destructive competition. If foreign countries see fit to pay a portion of the freight for hauling our products into their markets to compete with their producers, the people of this country ought not to complain. Whenever the ocean trade affords inducements that will justify capital and labor in withdrawing from productive enterprise on shore, our merchant marine will increase in size and importance, and not until then. Foreign ships do not discriminate against American products, and the officers and crews of boats have no more to do with the creation and development of markets for products they carry than the crews of railroad trains have to do with the development of the markets for the products which they haul over the railroads of the country. A hundred years ago merchant ships were international peddlers. The master of a ship would take on cargo and travel about from one port to another and dispose of the cargo by sale or barter to the best advantage. He was the salesman—the market hunter—but with modern methods of communication reaching all the great commercial centers of the world practically all shipments are now made upon mail or cable order, and the ship simply carries under specific directions.

THE COASTWISE TRADE OF THE UNITED STATES.

The United States has the second largest merchant marine of any country in the world, and it does more in the way of legislation to upbuild and promote its merchant marine than any other country. When I speak of the American merchant marine, I include all kinds of shipping—foreign and coastwise. Under the laws of the United States all shipping between domestic ports and between the United States and Porto Rico and Hawaii and Alaska must be conducted in American bottoms. The law provides that if any foreign ship shall carry a passenger or a ton of cargo from one American port to another, the ship and the cargo shall be forfeited. If a foreign ship should carry a passenger or a ton of cargo from New York around Cape Horn to San Francisco, it would be subject to absolute forfeiture. We have now ships aggregating nearly 6,000,000 tons of carrying capacity engaged in the coastwise trade, and every ship that carries the American flag, whether in the coastwise service or in the foreign trade, must be built in an American shipyard. There is no other country, I repeat, on the face of the earth that gives an absolute monopoly of such a vast and profitable trade to its own ships as the United States gives to American ships in its coastwise business. Our total merchant marine has a tonnage of 6,674,000 in round numbers, of which only about 900,000 tons are engaged in the foreign trade; and while it is desirable that more American ships be engaged in the foreign trade, I am opposed to the policy of taking money out of the public Treasury and turning it over to steamship companies for that purpose. If we should subsidize a foreign ship line, the subsidy would need to be perpetual. It would have to continue as long as the wages of American seamen are materially higher than the wages of foreign seamen, and it is the hope of every citizen of this country that our rate of wages will be permanently and substantially higher than wages paid by any foreign country. If subsidized ship lines were authorized and in the course of the years the subsidy should be withdrawn, the ships would have to go out of business, unless conditions should be such that American wages would be reduced to the same level as foreign wages, so that American ships could successfully compete on the high seas with foreign ships.

NOT A SUBSIDY BILL IN THE POPULAR SENSE.

I submit these observations upon the general policy of paying subsidies and bounties to all kinds of vessels simply for carrying the American flag for the purpose of distinguishing that policy from the policy embodied in the bill recently passed by the House. While ocean ships may not create trade, they are necessary to carry it on. Foreign trade, like domestic trade, is conducted purely for profit. It has no sentiment, no patriotism, and the country that is prepared to offer the best bargains in the world's markets is the country that will command the greatest share of the world's commerce. But a country may be able to offer good bargains and yet have but little foreign commerce. It may produce commodities that other countries would very much desire, but it can not hope to find a market for those commodities unless it brings them within reach of those who desire them. Trade does not necessarily follow the flag or steamship lines, but it does in a large measure follow intelligence. Steamship, mail, and cable intercourse with other countries brings to the notice and within the reach of those countries products that are desirable, and by that means foreign markets are created and expanded. It is the chief purpose of the House bill to so unite this country and the South American republics commercially that American products will be brought to the notice and within the reach of the markets of those countries. The purpose of the bill is not, primarily, to build up the American merchant marine, but it is to create and expand foreign markets for our products, and it is hoped that the establishment of the steamship lines proposed in the bill will very materially increase the sale of American products in South America.

The bill authorizes the Postmaster-General to contract for four additional ocean mail lines, all to South America. The bill does not provide subsidies within the popular meaning of that term. The word "subsidy" is an ugly word in the public mind, and it always carries with it the idea of investing public money to build up private enterprise or the granting of public money without any adequate tangible return. This bill requires the Postmaster-General to contract for regular mail service between certain ports in this country and ports in South America, and to pay steamship lines that secure contracts under its terms a fair and reasonable compensation for the service they perform. *It is no more a subsidy than is the money that is paid by the United States to railroad companies for transporting the inland mails. It is predicated upon precisely the same principle.*

The bill has the earnest support of President Roosevelt, Secretary Root, Secretary Taft, Secretary Shaw, and Postmaster-General Cortelyou. They all appreciate the vital importance of the expansion of our commerce and the strengthening of political ties between this country and the South American republics by establishing regular passenger and mail communication between the two continents. The bill that passed the Senate provided for the indiscriminate payment of a tonnage bounty to all boats, steam and sail, engaged in the foreign carrying trade, whether they performed any public service or not. It was a bounty bill to encourage the merchant marine, and nothing more, while the House bill simply authorizes contracts for carrying ocean mails at a reasonable compensation. The steamship companies are supposed to render a full equivalent for every dollar they will receive from the public Treasury.

OCEAN MAIL LINES UNDER THE LAW OF 1891.

There are now eight steamship lines carrying mails from this country to foreign countries under the law of 1891. Five of these lines run from the port at New York—one to Southampton, England; one to La Guaira, Venezuela; one to Maracaibo, Venezuela; one to Tuxpam, Mexico, and one to Habana, Cuba. There is also a contract line running from Boston, New York, and Philadelphia to Port Antonio, Jamaica. There is also a contract line running from San Francisco to Australia by way of the Samoan Islands, and another contract line running from San Francisco to Tahiti. There is no mail or passenger line of American ships running from ports in this country to Brazil, Argentina, Uruguay, Peru, or Chile in South America; nor is there any American mail line running between any port in the United States and any port in Asia or Japan. The lines provided in the bill reach the important countries in South America. The compensation provided by the law of 1891 is not sufficient to induce steamship lines to enter into contracts with the Government to carry the mails regularly to those countries, and that is the reason additional legislation has become necessary. The foreign trade of the Argentine Republic is larger than the foreign trade of any other country in South America, and its chief articles of export are wool, wheat, corn, hides, linseed oil, and cattle and meat, and its chief articles of import are iron, cotton, wood, coal and coke, machinery, and sackcloth. The temperature and climate of the Argentine Republic are very similar to the temperature and climate of the United States, and its products are much like the products of this country, but its manu-

facturing interests are not developed, and it requires a great deal of machinery and farm implements, such as the manufacturers of this country may be able to supply. Our trade with the Argentine Republic is comparatively small. That country buys the bulk of its imports from Great Britain and Germany.

We import from Brazil over $75,000,000 of products a year. The principal products of Brazil are coffee, rubber, hides, cotton, cocoa, and tobacco. Her coffee product for the year 1903 was about $75,000,000, and she shipped and sold over $48,000,000 of that product to this country. Her rubber product was over $48,000,000, of which $22,450,000 was sold to this country. Of an entire export product of $184,000,000 in 1903 the United States imported from Brazil $75,664,000, and of an entire import product for that year of $121,000,000 the United States exported only $13,595,000. In Chile conditions are substantially the same, excepting that the products of that country are largely mineral and chemical. It would seem that, since we buy over $75,000,000 worth of stuff every year from Brazil, we ought to sell to the people of that country more than $13,500,000 worth, and, in my judgment, if there were regular lines of communication between this country and Brazil and the Argentine Republic, and Peru and Chile, the sale of our commodities there would be greatly promoted. While we might not be able to sell much in the way of food products, the market for our manufactured goods ought to be greatly enlarged in South America, and would be if our products could be brought to the attention and within the reach of the South American people.

An increase in the foreign markets for manufactured goods is of as great importance to the farmers of the country as a direct increase in foreign markets for the products of the farms themselves, and even greater. If we had a larger foreign sale for manufactured goods, a greater percentage of our people would be engaged in manufactures, and the home market for foodstuffs would be correspondingly increased. We would feed, clothe, and shelter exclusively all those engaged in supplying the foreign market with manufactures; whereas if our foreign market were contracted, we would have fewer men engaged in manufacturing, the home demand would be decreased in proportion, and we would ship more foodstuff abroad to feed foreign employees in factories where we would meet competition from all parts of the earth. The more of our people that are engaged in factories the greater number the farms would have the exclusive opportunity to supply with food. Any policy that will increase the markets for the manufactured products of this country will redound to the benefit of the American farmer; in fact, he will be its chief beneficiary.

We have already sufficient shipping facilities with Europe, where our principal trade is. Numerous ship lines operate between this country and all ports of that Continent. The purpose of the House bill is to establish steamship lines and develop commerce with countries where commerce is undeveloped at this time. It is true there are a number of foreign boats plying between ports of this country and South America, but they run on no regular schedule; they are small boats, as a rule, and make exceptionally slow time. It is the custom of those traveling between this country and South America to go and come by way of Europe, crossing the Atlantic twice on each trip. If we had the lines contemplated by the House bill, there would be regular communication in first-class high-speed ships between this country and all the principal ports of South America, and that communication would be direct, rapid, and reliable. If trade should be considerably promoted as a result of the establishment of those lines, there would be an abundance of freight boats that would follow in their wake to take care of the trade. Freight lines will go wherever freight has been or may be developed; and whether the boats be domestic or foreign, the rates will be substantially the same. The ethics of foreign commerce are those of the bargain counter; the people of the world will patronize the industries that offer the best bargains. The world's shipping will go to the lines of merchant boats that will carry to the best advantage for the smallest amount of money, without regard to the nationality of the boats or the flag they may carry.

THE MONROE DOCTRINE.

In addition to the importance of mail and passenger communication between this country and South America as bearing upon our commerce, it will have a vital bearing upon the political relations of the two continents. The governments in the Western Hemisphere have a common destiny. The tendency is toward republican institutions, and the policy of the people of the Western Hemisphere is to promote popular government and to discourage any tendency toward the monarchical system. This policy is embodied in what we call the "Monroe doctrine." The Monroe doctrine is the law of the political development of the Western Hemisphere. It is the law of American primacy, and it can not operate to the disadvantage of a single republic in the hemisphere, but its purpose is to unify and harmonize all of the governments in the hemisphere upon the basis of republican institutions—in short, to republicanize all America. It is akin to the policy of the concerted powers of Europe, and its high aim is to preserve in the Western Hemisphere the political equilibrium along republican lines, as the concerted powers of Europe preserve the political equilibrium in the Eastern Hemisphere along monarchical lines. The Monroe doctrine is no more the policy of the United States than it is the policy of Mexico or the South American republics. The governments of both continents are interested in it alike. The doctrine has been asserted perhaps more frequently by the United States because of the commanding position it has achieved in the world's affairs; but if any foreign power should encroach upon the continent of North America with a view of permanently establishing monarchical institutions here, the Republics of Mexico, Brazil, Chile, Argentina, and other South American governments could as well interpose and insist upon the observance of the vital principle of the Monroe doctrine as the United States does now when there is danger of monarchical aggression of foreign powers in the South American Continent. The Monroe doctrine, I repeat, is the doctrine of all the Western Hemisphere. It embodies a policy that is necessary for the growth and prosperity of popular government, and it should be as jealously guarded and as earnestly supported by Mexico and the republics of South America as it is by the United States.

But in view of the fact that it has been the duty of this country to assert the Monroe doctrine and prevent monarchical encroachment upon South American soil in recent years, a vague suspicion has been excited in the minds of some statesmen of that continent, and they seem to entertain the fear that the United States has ulterior designs upon South American territory. The recent visit of our great Secretary of State to the South American republics had a wonderful influence in assuring the people of those countries of our friendship and the honesty and unselfishness of our purposes and intentions, and in order that we may cooperate and stand together in the support of the great and vital law of our mutual political growth it is important to establish, as far as it can be done by reasonable legislation, conditions that will unite the peoples of the two hemispheres in a closer bond of commercial and political fellowship. This aspect of the pending legislation can not be too strongly emphasized. Our country for generations has carried much of solicitude and anxiety over the destiny of the South American republics, and it has had the burden of responsibility of maintaining and enforcing the Monroe doctrine. When the peoples of the two hemispheres come to understand each other better, when they come to realize the overshadowing necessity of standing together for the promotion of policies and institutions that are of vital importance to them all alike, no foreign country will ever raise a voice against the validity and the vitality of the Monroe doctrine as the dominating force in the political progress of the western hemisphere.

AN AUXILIARY TO THE AMERICAN NAVY.

Another vital consideration of the proposed legislation is that it will constitute a powerful support of the American Navy. Our acquisition of the Spanish islands, our responsibility for the construction and maintenance of the Panama Canal, and our conspicuous position in the world's politics and commerce have made it necessary that we materially enlarge and strengthen the American Navy, so that the power and prestige of this Republic shall be respected throughout the civilized world. Our Navy now is assuming formidable proportions. When the war boats are constructed that have been authorized, we will have a navy that is third, and possibly second, in fighting power among the navies of the world. Every citizen of the country realizes the importance of maintaining a substantial naval establishment, and yet the people do not feel disposed to bear the expense of maintaining a navy upon a war footing in times of peace. The policy of the Government is to maintain a navy that will be reasonably adequate for our protection, considering the nature of our interests and the possibilities of war. What that standard shall be is a matter of judgment, but everyone familiar with naval warfare realizes the imperative necessity of having merchant boats that may be utilized without delay as auxiliary naval cruisers and transports in times of emergency. If this bill shall be enacted into law, it will mean the construction of at least twenty high-class ocean steamers, every one of which must be constructed, in a general way, under the direction of the Secretary of the Navy and must be fitted to carry naval armament and to be used as auxiliary cruisers. With such a material addition to the merchant fleet of the country it will not be necessary to construct and maintain as many war boats as it would be without this addition, and, in

my judgment, the Government can save in the ordinary expenses of building and maintaining a navy every dollar that it pays out under the contracts contemplated by the House bill.

When this country entered upon war with Spain it had few merchant ships that it could impress into service, and it was compelled to buy upward of forty ships from foreign owners to round out the naval fleet. The bill provides that the ships which are to have contracts shall be subject to the call of the United States whenever they may be needed for the purpose of naval warfare. It will constitute a material addition to the naval strength of the country, and this addition to the naval resources will save the people as much as it will cost the Government by relieving it of the necessity of an equivalent of direct naval equipment.

THE COST OF THE PROPOSED LINES.

If all of the lines authorized by the pending bill should be established, the possible maximum expenditure would amount to $2,500,000. We are now paying, under contracts made under the law of 1891, about $1,600,000 a year for the lines that are in operation. Last year our receipts from our ocean mails were almost $3,000,000 more than its entire cost, including the contract price paid to the lines established under the law of 1891. If the receipts should continue to be the same in the future as they have been in the past, and every line authorized by the House bill should be established at the maximum rate fixed by the bill, it would still leave a balance in favor of the Government on account of its ocean mail service. But the contemplated lines would doubtless considerably increase the mail communication between this country and the republics of South America. In all probability within a year or two the postage receipts of the ocean mail would yield as large a net surplus as they do under the present policy. The ocean mail business would continue to be more than self-supporting, and, as an incidental result, we would have the impetus given to American shipbuilding that would come from the construction of twenty new high-powered mail and passenger boats that would probably cost a million dollars each, constructed in American shipyards, by American labor, with American material; we would have an important addition to the naval strength of the United States that would come from such a substantial increase of our merchant fleet; we would have the immeasurable good that would result from establishing a closer intercourse between our own country and the South American republics, both commercially and politically. We would doubtless greatly expand foreign markets for our products; and I am sure that the importance of uniting this Republic with the republics of South America in a closer bond of political fellowship, in a stronger tie of political fraternity, would more than compensate for all the money we would pay out under contracts contemplated by the proposed law. So from any standpoint the law would be one of great importance to the people of this country.

All of the Pacific lines were struck out of the bill in the belief that the cost of those lines would be out of proportion to the resulting benefits. Those are the so-called Hill and Harriman and Spreckels lines, and I voted to strike them from the bill. Those lines are run in the interests of great railroad systems; and if no money is made at all on the ocean carriage, a large profit is made by great railroad lines they serve, and they are permanent. I would not have voted for the bill if those lines had remained in it.

NO COMPULSORY ENROLLMENT IN THE NAVAL RESERVE.

The original bill passed by the Senate at the last session of Congress provided for an enrollment of members of crews on American ships in what was termed the "Naval Reserve," and it provided that no boat could participate in the benefits that the bill proposed to confer unless a substantial portion of its crew had enlisted in the Naval Reserve and had become subject to the control of the Secretary of the Navy and subject to call to duty if the country should need them for the purposes of defense. The enrollment feature of that bill was compulsory, because no shipowner could afford to employ anyone in his crew without his agreeing in advance to become enrolled as a member of the Naval Reserve. The bill provided for substantial retainers for members of the Naval Reserve, the same as the House bill does, but the House bill eliminates entirely every compulsory provision. It does not permit compulsory enrollment in the Naval Reserve. It authorizes the voluntary enlistment of sailors on the contract ships and on all other American ships, including those on the Great Lakes, in the Naval Reserve. The enlistment is entirely voluntary and it does not affect the right of the boats to contract or receive compensation under the bill. The compulsory feature of the original bill was very strongly opposed by the American Federation of Labor. That feature is absent from the House bill, and numerous labor organizations in all parts of the country are advocating the bill. There can be no possible objection to the measure from the standpoint of organized labor, but, on the other hand, its tendency will be to increase labor in the shipyards, the mines and factories, and on the farms by requiring the construction of at least twenty first-class modern mail and passenger boats to engage in foreign commerce. It is claimed that the bill is but the entering wedge for an objectionable ship-subsidy scheme. Was the act of 1891 an entering wedge? This bill is only an amendment of that act, and it is in strict harmony with its policy. There is absolutely no merit to that criticism. The policy of this bill has no similarity to the ship subsidy or bounty scheme as it is popularly understood, but it is to establish regular lines of communication in the belief that they will increase the markets for the products of the American farm and factory and bring in closer touch and stronger sympathy the people of all the Americas.

---

## River and Harbor Appropriation Bill.

### SPEECH
OF
### HON. GEORGE W. SMITH,
OF ILLINOIS,

IN THE HOUSE OF REPRESENTATIVES,

*Tuesday, February 5, 1907.*

On the bill (H. R. 24991) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. SMITH said:

Mr. CHAIRMAN: Living, as I do, in the valley between the Ohio and Mississippi rivers and being profoundly impressed, as are all my people, with the urgent necessity for a deep waterway from the Great Lakes to the Gulf and for ample appropriations to prevent caving banks and to protect from overflows, I desire to offer some general remarks on H. R. 24991. I desire to express some views relative to same and certain projects in connection therewith.

The river and harbor appropriation bill as reported by the committee carries the sum of $35,181,612 in cash appropriations and $48,634,526 in authorizations for expenditures under continuing contracts which may hereafter be made, making a total of appropriations and authorizations of $83,816,138. This is the largest appropriation ever recommended by the River and Harbor Committee for such purposes.

The Committee on Rivers and Harbors is composed of gentlemen of known and recognized intelligence, ability, and integrity, presided over by Mr. BURTON of Ohio as chairman, who, I believe, by the membership of the House, of the Senate, and by the country at large is recognized as the peer of any man in Congress. I have served with Mr. BURTON since he first entered Congress and been associated with him in matters connected with business in the House of Representatives, and have always found him courteous, affable, ready to listen to any legitimate proposition which any Member had to present for his consideration and ready to give a frank and candid opinion on such proposition. I take pleasure in saying the same for every individual member of his committee.

Possibly—yes, probably—the Committee on Rivers and Harbors has the hardest work of any committee of the House. It has to do exclusively with all the great, as well as the small, waterways and harbors of the United States. Every Member of Congress who has a waterway in his Congressional district and whose people desire the improvement of such stream or streams appeals to the Committee on Rivers and Harbors. If he is well supported by sufficient data and facts furnished by his people he may have a reasonable show for success, but if the Member appeals to the committee on a request for an appropriation for some specific point without any data or evidence to support his request it is not strange that he should fail in his efforts to secure same, and in such case it is not the fault of the Member nor of the committee, nor should such failure be charged up as inattention of the Member nor indisposition on the part of the committee to do the right thing or justice to the Member making the request.

The improvement and maintenance of the channel and the depth of water to be secured in the Mississippi River is one of the live issues with all the people living in the Mississippi Valley to-day and of especial interest to the whole country. The Mississippi Valley above Cairo, Ill., contains approximately 15,000,000 inhabitants, representing possibly the most thrifty and prosperous people within the domain of the United States.

This assertion is not made disparagingly of the thrift and prosperous condition of the people of the other portions of our country, but simply as a statement borne out by the facts patent to all that the Mississippi Valley is the great granary of the world and is recognized by all civilized countries as in many respects the garden spot of earth.

The Mississippi River, with its tributaries, from its headwaters to the Gulf, embraces within its territory a constellation of States which, for wealth, mineral resources, agricultural products, soil, and climate, is not excelled by any other like group of States within our domain. What greater or grander area of territory or what more desirable variety of climate than that included in this valley could be desired by any mortal who is not wholly averse to all the favors and choicest gifts which nature, in her most pleasant moods, has conferred upon him? The Mississippi Valley can, under proper conditions and culture, furnish the grain, the meats, and the fruits for the average consumption of the people of the civilized world. Her resources in minerals are but slightly developed and, so far as known, are practically inexhaustible. Her people are healthy, educated, robust, energetic, and capable of accomplishing anything to which they may turn their hand or direct the energy of their body or brain. They are ready and willing at all times to perform their part of the great work devolving upon the people of our day and generation, and cheerfully share in all the burden which advanced civilization may cast upon them. They but want the opportunity of expressing, by act and deed, this inherent thought and desire, which is inborn and is a part of their very nature.

While all our country lying between the Atlantic and Pacific coasts, the Lakes and the Gulf, is the pride of every American citizen, whether native born or naturalized. While this great scope of territory is limitless in its mineral wealth and resources, and is a source of pride to everyone, whether he lives among the hills of New England, the awe-inspiring Rocky Mountains, or mid the sunny climes of the far-away Pacific coast, yet all with one accord cast a loving, lingering look to the great valleys of the Ohio and Mississippi rivers. This valley, in point of extent, population, and future possibilities, is almost incomprehensible. Its broad prairies, its extensive coal deposits, to say nothing of its other mineral resources, its fertile and unexcelled richness of soil, make it, as it should be, the garden spot of the American Continent.

To the people of this valley the question of rates and transportation is a burning issue. With all the vast network of railroads scattered over our country, our transportation facilities are far too small to meet the demands of trade and business generally. From reliable statistics we find that within the last ten years the tonnage moved by railroads has increased 47 per cent, while during the same period railway mileage has increased only 20 per cent.

Railroads have been one source of the great and rapid development of our country. Without them much of our vast territory, now yielding handsome returns to those who own and cultivate it, would still be virgin soil. Without them the farmer would still be cutting his little field of wheat, oats, barley, and rye with the old-fashioned, primitive hand sickle. The railroads have aided in opening markets by furnishing facilities for transporting products to various portions of the country, thereby offering incentives for larger production and the building up of industries along all lines. We give all credit to railroads for the great work they have done in aiding the wonderful development of our vast domain, yet their work has not been of a charitable nature. The Government has been generous to a fault with such companies. Lands amounting in area to empires have been freely and lavishly donated to them from the public domain on the theory that such course was in the interest of the people of our entire land and would result in the advancement and building up of this the greatest of all countries, our beloved United States; but long before the people thought of railroads or steam navigation the Almighty, in His wisdom and for the benefit of His children, dug out and fashioned the various waterways which spread like spiders' webs throughout our land, and were built and fashioned much after the arterial and veinous system of the human body. Our great rivers represent the arteries, while the smaller streams represent the veins. Each is necessary to the other for practical and business purposes.

Since our Government has been so bountiful and generous to railroads, shall it not show its appreciation of the gift of the Almighty in furnishing us with our great waterways by making liberal appropriations for their improvement, thus furnishing additional facilities to shippers and placing in the hands of the people a natural and powerful weapon with which to guard against the greed, avarice, oppression, and extortions of soulless railroad corporations? While the United States stands ahead of all other countries in the development of railroad transportation, it is lamentably far behind some other countries in the matter of the improvement of its natural transportation facilities, the great waterways. Both France and Germany have gone far ahead of us along this line. They, with other governments, learning from experience the imperative necessity of using natural as well as artificial waterways for the movement of their products, have adopted a policy of systematic development and improvement of their waterways. I will not weary the committee with tables detailing the fabulous sums they have expended; such data is easily accessible to all. With the great natural advantages possessed by the United States over those other countries, and standing, as we do, in the sunlight of the greatest prosperity ever achieved by any government on earth, possessing the intelligence to accomplish whatever we undertake and abundant means to successfully carry out any enterprise upon which we embark, is it not time that Congress should call a halt on the parsimonious manner in which they have dealt with our great waterways?

As waterways are improved and facilities for transportation by this means made more available for our people, freight rates to the farmer, manufacturer, and all others desiring to avail themselves of this means of transporting their products will either be reduced or, at least, exorbitant rates will be prevented. This is in the interest of all. The protection of such interests is within the scope and power of the Government and, in my judgment, is one of its highest duties to the citizens at large. Properly and efficiently improve your waterways and then, as has often been said by others, transportation rates will, to a very large extent, regulate themselves.

On the 15th and 16th days of November last there was a deep waterways convention held in St. Louis, Mo., at which I was present. I believe every State in the Mississippi Valley was represented by regular delegates. Those delegates were men of brains and business ability. They were not there with individual axes to grind, but met to discuss, in a cool, level-headed, and business way, the proposition for the construction of a deep waterway from the Lakes to the Gulf by way of the Mississippi River, and to take counsel with each other as to the best means they could adopt to aid their representatives in Congress in securing the necessary appropriation to begin this work. There was no politics in this gathering; no jealousies on account of location. It was simply a business meeting of business men, all having one common end in view—the commercial prosperity of the Mississippi Valley—well knowing that such object when accomplished would affect every portion of our whole country. Every phase of this great question was carefully discussed; the urgent necessity for doing this work clearly set forth; the right of these people of the Mississippi Valley to urge Congress for action at the present session along those lines plainly demonstrated, and at the close of the convention resolutions were unanimously adopted urging the cooperation of all Members and Senators to support, by their influence and vote, legislation looking to the accomplishment of the object sought by the delegates.

I but voice the sentiment of the people in the district I have the honor to represent when I say to this body of distinguished Representatives that my people are earnestly in favor of the deep-waterway project. They know, if accomplished, it will prove a boon and blessing not only to our farmers, but to all our people. I heartily concur in their opinion and am glad of the opportunity to aid in this work. As several of my colleagues have fully discussed every phase of this project and furnished full data and information, I will not occupy the time of the committee in covering the same ground, but will only say it is my earnest desire that every public-spirited, broad-minded Member in this Congress will, when the voting time comes, vote "aye" on this proposition.

I am glad the committee have provided as large an amount for the improvement of the Ohio River as they have, yet that will fall far short of the amount necessary for the work. I am glad the upper Mississippi has been given as much as it has by the committee, but the committee could have still acted wisely and made the appropriation larger. The lower Mississippi has fared better in this bill than many other places, but doubtless the amount provided for them will fall much below their real needs.

I have been a staunch advocate of liberal appropriations for rivers and harbors. They are public highways. The General Government assumes full control over and charge of same. The citizen may not, in any manner, obstruct such waters, even though it should be to prevent the currents from cutting all his land away. If the citizen can not do this, is it not the duty of the Government to appropriate money and take such steps as

may be necessary to protect the property of its citizens? Along the Mississippi River I have seen some of the finest farms on her banks almost completely destroyed within a few seasons. Their owners saw them going, but were powerless to stop the ravages of the mad waters. They would appeal for help to their Member of Congress, but when he would, in turn, appeal to the Government he would be met with the old, old song, "Sorry; but we can appropriate money to be used on the rivers only in the interest of navigation, or the improvement and preservation of a harbor." I am willing to go on record as an advocate of the Government providing means to protect the river banks from cutting, and thereby protecting, the property of the helpless citizen on its shores.

While I am pleased with much which the Committee on Rivers and Harbors have done, yet what shall I say when I see that they have provided the munificent sum of $250,000 for that stretch of the Mississippi River between the mouth of the Ohio and the mouth of the Missouri River? What came over the spirit of your dreams this year? In 1900 you gave us $100,000, in 1902 you gave us $650,000, in 1903 you gave us $650,000, in 1904 you gave us $650,000, in 1905 you gave us $650,000, and the Engineer Department recommended to your committee the sum of $650,000 this year; but, regardless of this recommendation and the fact that $650,000 was not near enough to do the necessary work between St. Louis and Cairo, in this bill you cut us down to $250,000, when the necessities of that stretch require a million. If you are going to give us anything, make it large enough to be of some service. A niggardly appropriation is not economy, but a useless and inexcusable waste of public funds. The district represented by my colleague [Mr. RODENBERG] and that represented by myself cover the whole stretch of the Mississippi River on the Illinois side from Cairo to St. Louis. Two hundred and fifty thousand dollars would not begin to cover the work actually and urgently needed on the Mississippi within my own district, and I understand the same is true of Mr. RODENBERG's district.

We must have more money or much of the work already done will be substantially lost for lack of funds to keep it in repair, and we will be left without anything to provide needed and necessary work for the next year. We along that stretch of the river feel that the paring down of our former appropriations is unwarranted. It will so handicap the engineer in charge that he will practically be unable to do anything. Irreparable damage will occur if this mistake is not remedied here. I am advised that the flood of this season is already partially destroying work done last year, that work being to a large extent only temporary owing to insufficient funds needed to make it permanent. The necessity for a much larger appropriation this time is as great or greater than for some prior years, owing to floods and high waters, and I appeal, in all candor and earnestness, to each member of this committee, at the proper time when we come to vote on the provision for the improvement of the Mississippi River between St. Louis and Cairo, to stand by us and make this appropriation $1,000,000 instead of $250,000 which has been reported. [Applause.]

---

## Free Alcohol.

### SPEECH

OF

# HON. THOMAS F. MARSHALL,

OF NORTH DAKOTA,

IN THE HOUSE OF REPRESENTATIVES,

*Thursday, February 7, 1907,*

On the bill (H. R. 24816) to amend an act entitled "An act for the withdrawal from bond tax free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses by mixture with suitable denaturing materials," approved June 7, 1906.

Mr. MARSHALL said:

Mr. CHAIRMAN: The question of the removal of the tax from alcohol rendered unfit for use as a beverage was agitated by those who were interested in the use of alcohol for manufacturing purposes for more than ten years, practically without result. Those who had made a study of the nature and uses of alcohol believed that it is a commodity that would ultimately come to replace, in a greater or less degree, the use of kerosene and gasoline for heat, light, and power. Taking this view opened a tremendous possibility for this new industrial agent, and once their attention was brought to it the entire agricultural interests throughout the country became intensely interested and made an earnest appeal to their Representatives for free alcohol.

The combination of the farmers and manufacturers gave the movement sufficient friends to secure the passage of the law approved June 7, 1906, entirely removing the tax from alcohol when rendered unfit for beverage, and providing an appropriation for Government supervision of its manufacture and sale.

It was comparatively easy to frame a law which would bring a large measure of relief to the manufacturers and extremely hard, on the other hand, to frame one which would bring a full measure of benefit to the agricultural classes, for the fact must constantly be borne in mind that before denaturized alcohol can be made alcohol proper must be produced, and when regulations are provided for the manufacture of alcohol by an unlimited number of people the door to fraud is opened wide. Remembering that there is a tax of over $2 per gallon on alcohol fit for beverage, you can realize the great temptations there will be on the part of designing persons to dispose of it before it is denatured without paying the tax.

It has taken ten years or more to build up in France, Germany, and England the systems which are used there to prevent fraud against the revenue, and I have been a strong advocate of the theory that we should take advantage of their experience and begin where they have left off. The measure which is now under consideration, in my judgment, does that.

Mr. Chairman, the original free-alcohol bill approved June 7, 1906, when it left the House was believed to be in excellent shape and thought by its friends to be all that was desired, but the interests which fought the legislation so vigorously before the House committee and in the House itself were successful, by direct or indirect means, in securing amendments in the Senate which, while they did not actually prohibit the manufacture of alcohol on a small scale, greatly hampered it.

Since the enactment of the law and the issuance of the regulations these same people who had successfully accomplished their purpose in the Senate at once gave the law and the regulations a bad name before the people, and the publicity bureau of the Standard Oil Company was successful in filling the newspapers with statements which were absolutely untrue and some that were half true, thereby successfully creating a misunderstanding of the law and regulations, and delayed for one year at least the establishment of numerous distilleries throughout the country, and held for themselves that much longer complete control of the market for gasoline and kerosene.

The situation at the time of the passage of the law at the end of the session was such that the friends of the measure did not feel safe in undertaking to do anything but concur in the Senate amendments, thereby making sure of the progress that had been made, thinking it was wiser to wait until another session to undertake to further perfect the law.

The bill under consideration is the outgrowth of a bill introduced by Mr. HILL and another by myself, which bills were both referred by the Committee on Ways and Means to the Treasury Department and by them condensed into one bill, and so changed as to bring the same more in line with similar legislation. I believe the bill as a whole is a good one and ought to accomplish the much-desired results of permitting the establishment anywhere in this country of small farm distilleries, which is the great object sought.

In section 4 I should have preferred a provision made for all distilleries under 200 proof gallons instead of 100, but as the proposition is a radical departure from anything that has ever been undertaken in this country, the Department was loath to go any further than is proposed in the bill, and in this view the Ways and Means Committee concurred. If this provision of the law proves workable, as we all hope and believe it will, it ought to be an easy matter to increase by further legislation the size to meet any reasonable requirements. The original bill as introduced by me placed no limitations whatever on the size of the still, leaving it entirely with the Commissioner of Internal Revenue, which I believe would have been entirely safe and satisfactory, but which would perhaps place a responsibility on the Commissioner which he ought not to be asked to assume.

The last section of the bill, which makes the law operative on September 1, 1907, I strongly opposed, and did everything in my power to prevent the Department from setting the date as late as January 1, 1908, which they desired; and I undertook to get an agreement for July 1, and afterwards for August 1, but was ultimately obliged to compromise on September 1, 1907, as that was what the committee agreed on. However, Commissioner Yerkes assured me that he would get out the regulations approving the size and kind of sealed tanks or cisterns and the valves and locks and other appliances necessary at an early date, possibly as early as May or June of this year, thereby enabling those who desired to commence the manufacture on September 1 to construct their plants beforehand and be ready

for operation when the law becomes effective, and which would be in ample time to take care of this season's crop.

Mr. HILL'S able and exhaustive address has explained the features of this bill so fully, containing as it does such an array of facts and data surrounding this whole question, that it seems superfluous for me to go over the same ground. Volumes might be uttered as to the tremendous possibilities growing out of the use of industrial alcohol.

However great the benefits from its use may be, or however general its consumption may become, neither can come suddenly. It will be by patient and steady growth for years that the ultimate object will be attained.

We have much to learn regarding the economical manufacture of alcohol. Heretofore the manufacture has been confined to alcohol of a high grade made from clean, sound grain for beverage purposes only, and designed to be put on the market at a big price. Now we will have an entirely different condition, which will create a demand for alcohol made from anything that will produce alcohol, without regard to the quality, its flavor, or use for medicinal purposes. The facts are that the worse it tastes or smells and the more disagreeable it may be, so long as it may contain the properties of alcohol, the better it is for changing into a form unfit for use as a beverage. The tremendous demand that must grow up in this country will call for the full exercise and inventive genius of our people.

Ranking alongside in importance of the question of the cheap manufacture of alcohol, is the manufacture of suitable appliances for its use. With alcohol selling at about $2.50 per gallon, there has been no incentive for our inventors to produce lamps, stoves, engines, and other appliances for the use of alcohol; but now that the cheap material will be had, the field is opened, and it will be but a matter of time when these appliances will be produced in this country in the same way that they are in Germany and France; in fact, it is safe to presume that we will outrank them in this branch of the industry. For the time being, however, we will have to rely upon importations of foreign lamps, stoves, etc.

Many are interested in the cost of farmers' stills, and I have been unable to get any reliable information on the subject, but such data as I have gathered here and there lead me to believe that aside from a building (which many farmers would already have) a suitable farm still can be supplied at a cost of from $100 to $200.

It is assumed ordinarily that industrial alcohol can be made cheapest in the southern part of our country from waste molasses, and in the northern part from corn, and in certain portions from potatoes.

It has occurred to me that in the Red River Valley, in our State, where there are immense wheat farms, a new field for the manufacture of alcohol from potatoes will be found. Red River Valley lands are naturally very productive of potatoes, and by the introduction of some new variety of potatoes especially adapted for the manufacture of alcohol the yield of potatoes ought to be nearly doubled, in which case they ought to be profitably grown and made into alcohol, especially in view of the fact that no crop is better to rotate with wheat than potatoes. While I have not gone into the figures involved in the proposition, it appeals to me that the man with a section or less of land who would rotate his wheat crop with potatoes and manufacture the potatoes into alcohol at a still on his farm, feeding the refuse from the still to his live stock, would have a combination that ought to be a money maker. To say the least of it, it is worthy of the consideration of our people.

However, it is not for me to point out the way. I believe if the pending bill becomes a law, we will have all the legislation that we need at this time, and the successful introduction and general use of denaturized alcohol will simply be a question for solution by our ingenious and energetic people. While many are inclined to scoff, I for one am strong in the belief that those who have solved so many difficult and seemingly impossible problems will not fail in finding a solution of this. I have every faith that industrial alcohol will become so general in its use that such farm products as corn and potatoes, which have in the past become frequently a drug on the market, will in the future always have a reasonable marketable value as raw materials from which to make alcohol, thereby giving our farmers every year a comparatively uniform market for their products, which is much better than to have a high price one year and an excessively low price another.

I have an abiding faith, further, that the use of industrial alcohol will ultimately supplant in a great degree the use of kerosene and gasoline for the uses of heat, light, and power. Even at a slightly increased cost the use of alcohol will become very general, because of its safety, superiority, and convenience in handling and using. It does not seem unfair to assume that in any event the use of alcohol will become so general for the purposes mentioned that it will act as a leveler for the price of kerosene and gasoline and at least keep them at the present level instead of advancing tremendously, which is bound to come, owing to the scarcity of kerosene and gasoline, unless some competing material, such as alcohol, is brought into the market.

Much misapprehension has gone abroad relative to the attitude of Mr. Yerkes, Commissioner of Internal Revenue. For more than a year I have been in close touch with Mr. Yerkes, and while he has been hampered by the existing law, I have always found him friendly to the widest possible use of denaturized alcohol. It is barely possible that had some of his interpretations of the law been placed to a test, they might not have been upheld. However, this is no fault of his, but is based upon his understanding of the situation. He is bound, like any other honest man, to be governed by his conception of the law.

He has been severely and unjustly criticised by the newspapers, but through it all has never shown the slightest resentment, and I am of the opinion that there is not in the Government service a more efficient, capable, honest man than Commissioner Yerkes. I feel sure that should this bill be enacted, he will do everything in his power to bring about the greatest possible manufacture of industrial alcohol which is consistent with full protection from frauds against the revenue.

My deep interest in the subject of the extensive use of industrial alcohol has been on behalf of the farmers in the prairie States, where the question of fuel for heat, light, and power is one that confronts every man every hour. Nothing to my mind could be of greater use and benefit than a commodity which can, in a greater or less degree, compete with gasoline and kerosene, this being particularly true when this commodity can be made from the every-day products of the farm and field.

Next in importance to securing the general use of this industrial material is the question of keeping it from the control of combinations and trusts, which now have their greedy hands on so many of the necessities and comforts of our people. I feel that the enactment of this bill will not only result in the widespread use of industrial alcohol, but will result in its manufacture by small distilleries throughout the country, thereby effectually keeping it from the control of the trusts and combinations.

I believe, further, that no one factor of modern civilization will do more to bring home to the prairie farmer the necessities and comforts which will put the conveniences of his home on a par with that of his city brother. The passage of this bill, to my mind, will be one step more in the direction of stopping the exodus from the farms to the cities, a thing greatly to be desired.

---

## The Naval Appropriation Bill.

### SPEECH
OF
### HON. HENRY D. FLOOD,
OF VIRGINIA,

IN THE HOUSE OF REPRESENTATIVES,

*Friday, February 15, 1907,*

On the bill (H. R. 24925) making appropriations for the naval service for the fiscal year ending June 30, 1908, and for other purposes, and the question being on the motion of Mr. BURTON of Ohio to amend the bill on page 81, lines 7 and 8, by striking out the words "similar in essential characteristics and additional to the battle ship."

Mr. FLOOD said:

Mr. CHAIRMAN: I wish to submit a few reasons why I think the Government should aid in the building of public roads throughout the country.

I think undoubtedly the power of the Government to make appropriations for this purpose is ample and can be defended.

The power is expressly given to Congress by the Constitution "to provide for the general welfare," and the general welfare of this country demands at this time nothing so imperatively as it does a good system of public roads—a thing which we can never have without the aid of the Federal Government.

The exercise of this power to aid in the building of public highways is more than 100 years old. As far back as Jefferson's first Administration Congress made provision for a national road from Georgia to New Orleans, which was completed during Jefferson's last term, and of which there is a map in the Library of Congress.

In 1816 Henry Clay made a speech in advocacy of the construction by the General Government of an extensive system of turnpikes and canals. He was ably seconded by John C. Calhoun.

At the next session of Congress, in 1817, Calhoun took the lead in advocating a bill to set apart and pledge the bonus of the national bank and the shares of the United States as a permanent fund for constructing roads and canals and improving the navigation of water courses.

In 1818 Clay made another speech on the subject of internal improvements, in which, after an elaborate argument upon the constitutionality of the subject, he discusses the great benefit of canals and turnpikes to the country. His remarks would apply to turnpikes at the present time. He said:

I think it very possible that the capitalist who should invest his money in one of these objects might not be reimbursed 3 per cent annually upon it, and yet society in various forms might actually reap 15 or 20 per cent.

And, again, he said:

Of all the modes in which a government can employ its surplus revenue none is more permanently beneficial than that of internal improvement. Fixed to the soil, it becomes a durable part of the land, itself diffusing comfort and activity and animation on all sides.

Mr. Clay was an untiring and strenuous advocate of the Cumberland road—the great national pike to extend from Cumberland, Md., to St. Louis. The bill for the first section of this road passed Congress March 29, 1806, which authorized the President [Mr. Jefferson] to appoint three commissioners to lay out the road from Cumberland to the Ohio River. This road had many ups and downs during successive administrations, but by the time railroads began to loom up it had been completed to Vandalia, Ill., at an expense to the Government of nearly $7,000,000, a sum which meant then many times to the Government what that amount would mean now.

In the Eighteenth Congress Thomas H. Benton fathered the bill to lay out a road from the border of Missouri to the boundary line of the United States, and thence, with the consent of Mexico, to the frontier of New Mexico. In his Thirty Years in the Senate he attributed the waning interest in the subject to the application of steam to boats and railway trains. He uses the following language:

The progress of events has withdrawn the whole subject—the subject of a system of national internal improvements once so formidable and engrossing the public mind—from the halls of Congress and discussion of the people. Steamboats and steam cars have superseded turnpikes and canals.

Even great works accomplished by Congress at vast cost, after long and bitter debates, and deemed national at the time, have lost their character and sunk into the class of common roads. The Cumberland road, which cost $6,700,000 and was a prominent subject in Congress for thirty-four years, from 1802, when it was conceived, to 1836, when it was abandoned to the States. This road, once so absorbing the public money and public attention, has degenerated into a public highway and is entirely superseded by the parallel railway.

There is no real distinction between a turnpike and a railroad in their claims for help from the General Government. But the railroads have been aided to the extent of millions and millions of dollars in land and money by the National Government, while the proposition to secure aid for the highways of the country meets with no favor beyond a respectful hearing.

There is no real distinction, so far as the public good and welfare is concerned, between the aiding of public roads and the aiding of waterways, and yet our waterways and harbors have been aided to so collossal an extent as to dwarf and finally eclipse our equally valuable highways.

The importance of good roads is so apparent it will not be questioned by one and need not be discussed.

We are appropriating this year $83,000,000 for rivers and harbors, $95,000,000 for our naval establishment, $81,500,000 for the Army.

The building of a comprehensive system of good roads is of more importance to the people of this country than any one or all these purposes.

The necessity for better roads in many parts of this country is the greatest need of the hour. The States and counties can not build them. The right kind of roads can only be built, and will only be built, when the National Government lends a helping hand. If we are ever to have a system of roads in this country to compare with those of the other enlightened nations of the world, it has got to be done by the aid of the Federal Government. If the agricultural communities of this country are ever to be thoroughly developed and made desirable as places of abode during all seasons of the year, it can only be done when the Federal Government has determined to aid in the construction of proper highways and turnpikes.

I listened with much pleasure to the speech delivered on this subject in December by the gentleman from Alabama [Mr. UNDERWOOD], and I use some of the statements made by him in that speech:

The cost of transportation is the vital question in all modern commerce. With the world's markets in which to dispose of our products, our success and prosperity is largely dependent on costs of carrying our products to these markets. * * * The cost of carrying a ton 100 miles in England is $2.35; in Germany, $2.25; in France, $2; in the United States, 72 cents, the cheapest freight rates in the civilized world, and we have very properly regulated them. On the other hand, the cost of moving our products from the farms to the railroad stations is from two to four times as much as it is in France or Germany. This part of the cost of transportation to the markets of the world is just as vital to our success and the development of our foreign trade as is the railroad freight.

A circular of the Agricultural Department states that, on an average, it costs 25 cents per ton per mile for hauling farm products over common earth roads.

All the progressive nations of Europe are giving national aid to their highways, while our Government is following the example of the South American nations, thereby imposing a burden of millions of dollars annually upon our producers; and a glance at the condition of the South American countries ought to convince us of the error of our ways. That land, so prodigal in its resources, is still more affluent in the number and availability of its waterways, and yet Brazil, Argentina, and Peru have burdened themselves with railroads, which have weighted them down, while their domestic commerce is largely transported upon the pack saddle.

What a different picture has been presented by the countries of Europe. A splendid system of roads has been inaugurated by those countries. The great Napoleon, following the example set by the Roman Empire, built an extensive system of roads throughout France, and now not less than $7,000,000 each year are expended by the French Government in keeping up these roads and making new roads. This work employs 35,000 persons, and they now have 350,000 miles of well-paved roads. The central Government of England began to improve the roads in that country in 1835, and now $15,000,000 is being expended yearly upon their roads. Macaulay, in writing of the condition of the public roads in England prior to 1835, gives a description of them that is applicable to our roads nearly seventy-five years later. He says:

The fruits of the earth were sometimes suffered to rot in one place, while a few miles distant the supply fell short of the demand. One general cause of the badness of the roads was the defective state of the law. Every parish was bound to repair the roads which passed through it, and thus a sparse and impoverished parish was often compelled to maintain highways between rich and populous towns.

The farming element in the country constitutes about 35 per cent of its population, and it is not fair or equitable to expect it unaided to build and maintain the public highways of the country. It creates the wealth of the nation, which largely finds its way into the pockets of other people, and yet has been required unaided to maintain the highways of the nation. It has produced an amount of wealth within the past ten years equal to one-half of the entire national wealth, and, though but little more than one-third of the population, it has contributed more than two-thirds of the amount needed to support the Government; and yet its just demands for aid in building a good system of thoroughfares go unheeded.

Let the farmer withhold his hand from the plow for two seasons and the grass will grow in your thoroughfares; barnacles and bilge water will rot your ships as they lie idle at your docks; cobwebs will festoon your counting houses; owls and bats will usurp your warehouses; your children will clamor to you for bread, and we will gather in this Chamber with pallor in our faces.

Who are the most trustworthy guardians of the Republic? Why, sir, those whose activities cluster around the home, whose virtues are those of the family, and whose patriotism springs from and is fostered by the rooftree. Such men are not blown about by every wind of doctrine, but are the ultimate and supreme hope for the conservation of our institutions.

It is but just that a class of our population which furnished so much of the greatness of the nation and to the support of the Government, and hitherto has gotten so little from the National Government, should receive all the aid that can be given to it constitutionally.

While the country has advanced in area, in population, and in wealth, and along all lines of science, trade, and industry, no advancement has been made in the condition of our roads in many sections of the country during the past one hundred years.

The statement of the average cost of transportation from the farm to the railroad station, which I referred to a few minutes ago, demonstrates what an immense financial advantage a good system of roads would be to the farmers of this country. And of vital and pressing moment to the national welfare is the

fact that a good system of roads would check the tendency of the people to leave the farm and go to the city. This drift has taken from the farm much of the bone and sinew essential to a successful carrying on of our agriculture. It is producing an unhealthy congestion in large centers of population. The problem of getting young men to go back to the country from the cities and those already there to remain in the country is growing graver every day. The State and nation alike have been wisely contributing to the advantages of the country as a place of residence. A more extensive system of schools is being inaugurated each year. I know this to be true in my own State, and I believe it is true of every other State in the Union. Circulating libraries are doing much to add to the comfort of country life, and the rural free delivery of mails makes a great and permanent inducement to such a life. How these advantages would be enhanced by a system of good roads every intelligent man can see. Every mile of turnpike would secure to the farmers on both sides what political economists call "the unearned increment," just as the proximity to the railroad or the church or the schoolhouse does, and with the main permanent thoroughfares in good condition more time and heart would be given to the farmer to improve the plantation road. The wear and tear of his team, which is his capital, would be greatly lessened. The increase in value of his land would be greatly increased. The development of a neighborhood with such thoroughfares would proceed in geometrical ratio.

With the agricultural interests of the land upon a satisfactory basis we have the real breakwater to financial disaster, for all real value is in the land. With the earth yielding her increase the fluctuations upon the stock market are of no vital moment. The exploitation of railroads, the watering of stock, the artificial showings, the manipulation and even wreckage of railroads are not disasters save to the gamblers, for the railroads never cease to haul the produce to the markets.

Our great cities are augmenting their population in an accelerated ratio. Some day, without warning, they may tell a tale of disaster, and then there will be no escape or refuge save in the immunity, the stability, and the conservatism of the country.

Let the General Government foster this great enterprise not only at the behest of justice but of wisdom. For whatever confirms and strengthens the agricultural interests performs the same for every other interest. Upon the strength and security of the farmer rests the integrity and security of the nation.

## Appointment of Former West Point Cadets as Second Lieutenants in United States Army.

---

SPEECH

OF

# HON. MORRIS SHEPPARD,

OF TEXAS,

IN THE HOUSE OF REPRESENTATIVES,

*Saturday, March 2, 1907,*

On the bill (H. R. 23630) authorizing the President to nominate and appoint Birchie O. Mahaffey, John A. Cleveland, and Traugett F. Keller as second lieutenants in the United States Army.

Mr. SHEPPARD said:

Mr. SPEAKER: I desire to submit a brief explanation of the bill (H. R. 23630) which has recently passed both the House and the Senate and received the signature of the President. Under the provisions of this bill Birchie O. Mahaffey, of Texas; John A. Cleveland, of Alabama, and Traugett F. Keller, of New York, are made second lieutenants in the Army of the United States.

On May 3, 1901, the following members of the class of 1902 of the United States Military Academy at West Point, Birchie O. Mahaffey, of Texas; John A. Cleveland, of Alabama; Traugett F. Keller, of New York; Raymond A. Linton, of Michigan, and Henry A. Bowlby, of Nebraska, were dismissed for "taking prominent part in devising, planning, preparing for, instigating, and executing the mutinous demonstration of the 16th of April." I quote the exact language of the order of dismissal in order to show the exact cause of dismissal. The young men were not dismissed for hazing.

The Military Secretary, in his report on this bill, stated that they were dismissed for "insubordination or hazing." On closer investigation The Military Secretary, Gen. F. C. Ainsworth, who is one of the most accurate and obliging officials our Government has ever had, discovered the error, and wrote me the following letter:

WAR DEPARTMENT,
THE MILITARY SECRETARY'S OFFICE,
*Washington, February 28, 1907.*

Hon. MORRIS SHEPPARD,
*House of Representatives.*

DEAR SIR: In response to your personal inquiry of to-day as to the exact cause of the dismissal in 1901 of Cadets Henry L. Bowlby, John A. Cleveland, Traugett F. Keller, Raymond A. Linton, and Birchie O. Mahaffey, I beg leave to advise you that an examination of the official records shows that these cadets were dismissed on charges of "taking a prominent part in devising, planning, preparing for, instigating, and executing the mutinous demonstration of the 16th of April, 1901."

Very respectfully.

[SEAL.]

F. C. AINSWORTH,
*The Military Secretary.*

This demonstration was a mere boyish exuberance and had no serious results. Since the dismissal the careers of these young men have been especially praiseworthy. Four of them were tendered engineering employment of a most difficult character in South America, where they acquitted themselves with distinguished credit both as to engineering skill and gentlemanly conduct. Returning a year or two ago to this country, young Linton was appointed a colonel of Michigan State troops and aid-de-camp on the staff of Governor Warner, of that State. Bowlby on his return became a member of the faculty of the University of Washington. Keller holds a responsible position in the engineering service of New York City. Mahaffey, after an especially successful engineering career in South America, is now in the railroad engineering service in Texas. Cleveland is in Ecuador, where he has risen to the important position of inspecting engineer and road master of the Guayaquil and Quito Railway Company.

Ever since the dismissal the young men, their families, and friends have been naturally very anxious to have the stain of expulsion wiped from their careers. In December, 1904, I wrote Brig. Gen. A. L. Mills, the Superintendent of the Military Academy and the author of the order of dismissal, asking if he would not recommend these young men for commissions in the Army, and whether, in his opinion, their appointment would interfere with the interests of the service or the discipline of the academy. He replied very kindly as follows:

WEST POINT, N. Y., *December 27, 1904.*

Hon. MORRIS SHEPPARD,
*Member of Congress, Washington, D. C.*

MY DEAR SIR: I beg to acknowledge the receipt of your very kind personal letter of the 23d instant, regarding ex-Cadets Henry A. Bowlby, John A. Cleveland, Traugett F. Keller, Raymond A. Linton, and Birchie O. Mahaffey, who were dismissed in May, 1901, and in whose behalf a motion is on foot among the Congressmen representing the districts from which they were appointed to request the President to give them commissions in the Army.

In reply and in answer to the question you ask, I am glad to write that, in my opinion, the appointment of these young men as second lieutenants in the Army would not interfere, either with the best interests of the service, nor do I believe it would in any way reflect upon the Military Academy. No existing law known to me operates to prevent their being commissioned, and I certainly would not initiate any opposition to the movement. On the contrary, if the matter of their proposed appointment should be referred to me officially, I will be glad to recommend the young men to the favorable consideration of the President. Should they be appointed, the law requires they should be examined by a board of officers before being commissioned. At this examination the facts connected with their career at the Military Academy of course would be brought out, but I believe the board would do justice to them and would be little inclined to condemn them now for the trouble in which they were involved as cadets. This would be the stand I would take were I a member of such board, and I believe similar views will be held by most other officers. With kindest regards, I remain,

Yours, very truly,

A. L. MILLS,
*Brig. Gen., U. S. Army, Superintendent.*

This letter of General Mills was presented to President Roosevelt by Congressman HINSHAW, of Nebraska, in February, 1905. The President expressed himself favorably and referred the letter to the Secretary of War, who wrote me on February 25, 1905, suggesting that the young men "file applications with the War Department setting forth all the facts and also a statement of what they have done since they were dismissed."

When the applications were taken up for consideration, it was found that only Bowlby and Linton were still within the age limit for appointment from civil life. Bowlby and Linton were appointed in September, 1906, the Secretary of War stating in reference to Mahaffey, Cleveland, and Keller that but for the disqualification on account of age he would have recommended their appointment also, and that his action would have had the approval of the President.

To remedy the discrimination against Mahaffey, Cleveland, and Keller, arising unavoidably from this situation, the Representatives of the districts in which these young men reside, Mr. TAYLOR of Alabama, Mr. GOULDEN of New York, and I, introduced bills at the beginning of the present session authorizing the President to appoint them to second lieutenantcies. Mr.

GOULDEN's bill was reported by the Military Affairs Committee, and on Saturday last became a law. Mr. GOULDEN, Mr. TAYLOR of Alabama, Mr. FORDNEY of Michigan, Mr. HINSHAW of Nebraska, Mr. SLAYDEN of Texas, and Senator CULBERSON of Texas have rendered invaluable service in pressing this matter to a successful conclusion.

## Life and Character of the Late Russell A. Alger.

REMARKS
OF
# HON. SAMUEL W. SMITH,
OF MICHIGAN,
IN THE HOUSE OF REPRESENTATIVES,
*Sunday, February 24, 1907.*

On the following resolutions:

"*Resolved*, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. RUSSELL A. ALGER, late a Senator from the State of Michigan.

"*Resolved*, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career, the House, at the conclusion of the exercises of this day, shall stand adjourned.

"*Resolved*, That the Clerk communicate these resolutions to the Senate.

"*Resolved*, That the Clerk send a copy of these resolutions to the family of the deceased."

Mr. SMITH of Michigan said:

Mr. SPEAKER: In keeping with a custom of many years in this honorable body, this hour and this day has been set apart to do honor to the memory of the distinguished dead.

I accept this opportunity to pay tribute to one who in life was my friend and in whose death I experienced a personal loss; one whom I hold in affectionate remembrance for his genial and kindly qualities, for his broad love of humanity and his generous soul.

I became acquainted with him while serving in the State senate. He was then governor of Michigan. I there became impressed with his sterling qualities which the exigencies of life had developed in him. He was the soul of honor in politics, the same as in every other relation in life.

RUSSELL A. ALGER was born in Lafayette Township, Medina County, Ohio, February 27, 1836. His parents died when he was but 11 years of age. He was then compelled to provide for himself, laboring on the farm at small wages, attending school winters and until he acquired an education; then, having completed a course in law, he was admitted to the supreme court of Ohio in 1859, and in May, 1885, the degree of LL. D. was conferred on him by Hillsdale College.

He removed to the comparatively new State of Michigan in the latter part of 1859 and engaged in the business of lumbering, then in its infancy, laying the foundation of his fortune.

Events were stirring and destiny was preparing for the noble and distinguished career which he has so honorably filled.

Abraham Lincoln called for volunteers and RUSSELL A. ALGER responded, entering the Army in 1861 as captain of Company C, Second Michigan Cavalry, and rose through successive ranks to brevet brigadier-general, then was brevetted major-general, United States Volunteers, for distinguished bravery and meritorious services during the war.

At the close of the war he became extensively engaged in the lumber business and other industries, and being possessed of those qualities of mind and heart which make for success in the self-made man—courage and sound business judgment—in assuming again the arts of peace he accumulated, by honest means and methods, a large fortune, which he has generously used for the betterment of mankind.

I leave to others more intimately acquainted to tell the story of the thousands of homes and hearts made comfortable and happy by his generous love.

It sometimes happens that commercial relations make political relations expedient and to be desired. General ALGER was always a consistent and devoted Republican.

He was honored as a delegate to the Republican national convention in 1884, and that same year was elected governor. His large business interests forbade his accepting a renomination in 1886. During his term as governor his name was frequently mentioned in connection with the office of United States Senator, but he cast it aside for the time being, saying that he "would like to represent his State in the Senate some time."

He was a candidate for President at the Republican national convention in 1888, Michigan casting her vote solidly for him on every ballot.

In 1889 he was elected commander in chief of the Grand Army of the Republic, and more than once he feelingly expressed his gratitude for this honor bestowed on him by his comrades. He prized it as one of the greatest honors of his life.

President McKinley appointed him Secretary of War in 1897, which portfolio he resigned in August, 1899. He urged President McKinley earlier in the same year to accept his resignation, but the President refused to do so. On the merits of the work performed by the War Department during this period, the War Investigation Commission has said:

> After thirty-three years of peace, during a great part of which the Army did not exceed 26,000 men, it suddenly became necessary to arm, clothe, feed, and equip more than a quarter of a million.
>
> The sudden emergency which called our people to arms after an interval of half a century of peace with all foreign powers was met by the War Department with earnestness and energy. The situation found the country unprepared with any large stock of arms, ammunition, clothing, supplies, and equipments. That they were duly provided and that the numerous demands on the industries of our people were met so promptly will remain one of the marvels of history.

I assert without fear of successful contradiction that when the historian comes to write an unbiased opinion of his conduct of the War Department it will be told that he was one of the best of Secretaries of War.

Upon his retirement from the Cabinet he returned to Michigan, where thousands of citizens gathered to welcome her honored hero as a testimonial of their appreciation of his sincerity of purpose and his ability in administering the affairs of his office, as thousands have so recently gathered to pay the last sad tribute to the man who died brave and true, full of years and full of honors, whose life was was part of the history of his time and, as one has said: "For his gallant conduct upon the battlefield of life he has been promoted to a higher service."

As husband, father, and friend the white flower of a blameless life is left as a priceless legacy of love to the inner circle of home. That life will ever be an inspiration to the youth of our land.
